(3) A member of the Committee who is a member of the uniformed services or an officer or employee of the United States may not receive additional pay on account of such member's service on the Committee, but a member of the Committee who is a member of the uniformed services shall be allowed travel or transportation expenses under section 5703 of title 5, United States Code, unless such member is otherwise entitled to such expenses under any other provision of law.

(4) The Secretary shall furnish the Committee an executive secretary and such secretarial, clerical and other services as are necessary for the conduct of the Committee's business.

(g)(1) The Committee shall terminate on September 30, 1991.

(2) Two years prior to the date of its termination, the Committee shall submit to the Congress its recommendation as to whether the Committee should be renewed and continued beyond such termination date.

(h) There are authorized to be appropriated such amounts as may be necessary to carry out the provisions of this section.

SEC. 17. Notwithstanding the provisions of the Act entitled "An Act to authorize the Secretary of Commerce to sell two obsolete vessels to Coast Line Company and for other purposes", approved June 3, 1980 (Public Law 96-260; 94 Stat. 435), the Secretary of Transportation shall permit the vessels PICTOR, United States official number 243529, PROCYON, United States official number 244022, and ZELIMA, United States official number 248207, to be scrapped in the foreign market if—

(1) the purchaser of such vessels and the country in which such vessels are to be scrapped are acceptable to the Secretary of Transportation; and

(2) the seller of any such vessel agrees in writing to reimburse the United States a reasonable amount, acceptable to the Secretary of Transportation, of not less than one-half of the profits realized from such sale.

SEC. 18. Notwithstanding any other provision of law or any agreement with the United States Government, the vessels PAUL BUNYAN, United States official number 602272, and JOHN HENRY, United States official number 599294, may be sold to a foreign purchaser or purchasers if—

(1) the person desiring to sell the vessel submits to the Secretary of Transportation and the Secretary of the Navy a written offer under which the Secretary of Transportation may elect to acquire either or both vessels for the National Defense Reserve Fleet or the Secretary of the Navy may elect to acquire either or both vessels for the Ready Reserve Fleet, under the same terms and conditions as those offered by the foreign purchaser or purchasers; and

(2) neither Secretary elects to acquire the vessel within 60 days after the date on which a written offer is submitted to the Secretaries under paragraph (1) of this subsection.

SEC. 19. The Port of Houston Authority bridge over Greens Bayou approximately two and eight-tenths miles upstream of the confluence of Greens Bayou, Texas and the Houston Ship Channel is declared to be a lawful bridge for all proposes of the Act entitled "An Act to provide for the alteration of certain bridges over navigable waters of the United States, for the apportionment of the cost of such alterations between the United States and the owners of a bridge, and for other purposes", approved June 21, 1940 (33 U.S.C. 511 et seq.). The Secretary of the department in which the Coast Guard is operating is authorized to reimburse the owner of the bridge for work done prior to the date of enactment of this section, that would be the responsibility of the United States under the Act of June 21, 1940 (33 U.S.C. 511 et seq.) if performed after the date of enactment of this section, except that such reimbursement shall not exceed $450,000.

SEC. 20. Notwithstanding any other provision of law or of prior contract with the United States, the United States flag tug MOIR, official Coast Guard number 60018, shall not be subject to the requirement of section 506 of the Merchant Marine Act, 1936 (46 U.S.C. App. 1156).

Mr. DANFORTH. Mr. President, I am offering today a committee amendment in the nature of a substitute for H.R. 2466, the Coast Guard miscellaneous provisions bill that passed the House on July 29, 1985.

The provisions of the committee amendment are the result of extensive discussions with representatives of the affected public and are supported by them. The text of the amendment also has been discussed and successfully negotiated with members of the House Merchant Marine and Fisheries Committee to ensure that it will be welcomed and considered favorably and expeditiously.

The first eight sections of the committee's substitute are those of H.R. 2466 as passed by the House with only minor changes. Similarly, section 19 of the committee's substitute is the same as section 10 of H.R. 2466, with only a minor modification.

Sections 9 through 18 and section 20 of the committee's substitute include new provisions relating to conversion,

scrapping, sale, and documentation of various vessels, Coast Guard drug enforcement efforts, commercial fishing vessel safety, and other matters which have been carefully negotiated and enjoy unanimous support from the interested public.

Mr. President, the committee amendment reflects a consensus and I ask my colleagues to support it.

Mr. HOLLINGS. Mr. President, there is one provision of this Senate amendment to H.R. 2466 that is of particular value to South Carolina and other States ravaged by the influx of illegal drugs from abroad. This provision, section 12 of the amendment, addresses a question raised in the courts regarding the Coast Guard's law enforcement practices with respect to foreign-flag vessels suspected of drug trafficking.

Under international law, a foreign vessel operating outside of the U.S. 12-mile contiguous zone and territorial sea is generally subject only to the jurisdiction of its flag country. However, U.S. law allows the Coast Guard to board and seize a suspicious foreign-flag vessel on the high seas if permitted to do so by treaty or "other arrangement" with the nation whose flag the vessel is flying.

The typical situation arises after the suspect vessel's master refuses a Coast Guard cutter's request to board. The captain of the cutter then must send his boarding request and supporting information up the chain of command to Coast Guard Headquarters and the State Department. This is usually done by telephone, followed by written message. State Department in turn, through the affected American Embassy, seeks the cooperation of the country whose registry is being claimed. The necessary special arrangement for boarding and possible seizure usually consists of oral communications by the flag nation, confirmed by subsequent messages or diplomatic notes.

Some lower courts have questioned the validity of these special arrangements, asserting that the underlying law calls for a more formal agreement.

The Justice Department, Coast Guard, and other Federal agencies involved in the fight against the illegal drug trade have urged enactment of the clarification contained in section 12. Even under the special arrangements procedure, U.S. law enforcement agencies have an awesome task. As is obvious from the description of this procedure, days can pass while the Coast Guard cutter awaits the flag-country's approval to board. In the meantime rapid weather changes can hamper the cutter's ability to keep in range of the suspect vessel, enough time may elapse to allow escape into a third country's waters, and contraband drugs and other evidence can be disposed of over the side.

Section 12 makes it clear that boarding and seizure authority granted by an agreement via telephone, radio, or other similar means qualifies as a legitimate arrangement under U.S. law. This change will further strengthen Public Law 96-350, which has been very successful in facilitating the convictions of maritime drug smugglers. Prior to the 1980 enactment of that law, which I supported, only 64 percent of those arrested by the Coast Guard were accepted for prosecution, and then only 45 percent of those tried were convicted. In contrast, Coast Guard Seventh District statistics for 1984 indicate that 76 percent of those arrested were accepted for prosecution, and of those cases 85 percent resulted in guilty verdicts in Federal court.

I urge approval of this and other provisions in the Senate amendment to H.R. 2466.

COASTAL ZONE LAW REAUTHORIZATION

Mr. BIDEN. Mr. President, I am pleased to see that the conferees on the budget reconciliation bill included a reauthorization of the Coastal Zone Management Act [CZMA] in the final bill. Although this action means the Senate will not get an opportunity for a separate vote on this important measure, I support the inclusion of the CZMA reauthorization in the reconciliation bill because I believe it removes any uncertainty that may have developed over the future of this program.

The Coastal Zone Act performs a valuable role in helping States develop management plans for their coastal areas—areas that frequently contain some of the most beautiful and environmentally useful but fragile lands in that State. Congress recognized in 1972, when the original Federal Coastal Zone Act was passed, that tremendous economic pressures can be brought to bear on coastal areas because of their value to industrial and commercial interests. These are pressures that reflect the short-term value of developing coastal areas, overlooking the long-term environmental and recreational values of these lands.

Mr. President, the people of Delaware were pioneers in putting into law the mechanisms to protect their coastal areas from unwarranted or damaging development. In 1971, at the initiative of then-Governor Russell Peterson, who has received national recognition for his commitment to environmental concerns, the Delaware Legislature passed a landmark law to provide some balance to the increasing but often conflicting industrial, commercial, and recreational demands on the State's coastline.

I can assure my colleagues in the Senate that Delawareans continue to support the goals of that law, in large part because the benefits of the Coastal Zone Management Act are enjoyed by many and clear to all. I don't think you could find anyone in the State who believes the beaches and marshlands of Delaware would be in nearly the condition they are today if it wasn't for the 1971 law.

When the Federal Government followed suit in 1972 with the CZMA we are reauthorizing today, the stage was set for joint efforts between the States and the Federal Government to work for the orderly development and protection of fragile coastal areas. This is a cooperative effort that has worked well over the years, despite the efforts of some to undermine its long-term goals.

Mr. President, a recent article in the Wilmington News Journal reviewed efforts, both commercial and protective, that have occurred along the roughly 115 miles of Delaware coastline. The impact of the 1971 law has varied from one stretch to another along the coast, but the overall effect, according to a representative of the Delaware Development Office, has been beneficial: "For the nature of Delaware, it's a good idea." Under the provisions of the act, even groups that might normally be in conflict over coastal resources have been able to reach agreement.

As a headline for the article stated, "Government regulation and benevolent owners protect much of the coastline, but development efforts continue." Clearly this is a law which has succeeded in balancing the opposing interests that often arise in coastal areas.

Mr. President, the Federal Coastal Zone Act and the State's coastal zone management plan receive bipartisan support in Delaware. As an example, earlier this year I received a letter from Delaware Governor Michael Castle that goes into more detail as to the benefits that have resulted from the cooperation between Federal, State, and local governments, and the need for a reauthorization of this program. I will ask that the letter be printed at the conclusion of my remarks.

Mr. President, there are some provisions in the reauthorization that I think could be made better, but I believe it has managed to retain the thrust of the original law, and is clearly an improvement over extended uncertainty about the future of the law. The State share of grant funding for research under this act will rise over the life of the bill, but the States should be able to plan and adjust to the gradual decrease in the Federal share.

In contrast to the sudden and draconian cuts proposed year after year by the administration, the terms of the reauthorization bill will allow States to avoid the postponement or cancellation of efforts that are needed to

better understand the intricacies of coastal environments, and to take the steps necessary to protect them for future generations.

Mr. President, this congressional recommitment to ensuring balanced use of our Nation's finite and fragile coastal resources will be cheered by Delawareans and more across the Nation.

Mr. President, I ask unanimous consent that the letter from Governor Castle be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STATE OF DELAWARE,
OFFICE OF THE GOVERNOR,
April 8, 1985.

Hon. JOSEPH R. BIDEN,
U.S. Senate, Russell Senate Office Building, Washington, DC.

DEAR SENATOR BIDEN: As you are probably aware, the federal Coastal Zone Management Act (CZMA, Public Law 92-583 as amended), was enacted in 1972 to promote the national interest through active state involvement in preservation, protection, wise development, and restoration or enhancement of coastal resources. The CZMA, reauthorized in 1980, provides for a unique partnership between the federal, state and local governments with the participation of the public in the development and implementation of coastal management plans. Federal approval of a state's coastal management plan offers financial assistance through a federal grant program and the promise that federal activities directly affecting the state's coastal zone will be consistent with the plan.

Coastal management plans have been successfully instituted in 35 eligible coastal states and territories, including Delaware (1979). These plans and the federal assistance program have produced new statutes and stricter regulations, and have supported special studies, such as the Governor's Inland Bays Task Force, to better protect critical wetlands, beaches, coastal waters, and public recreation areas. They have fostered important new research into the control of mosquitos and the spread of Phragmites, an undesirable reed which seriously reduces the value of our wetlands. State coastal programs have streamlined permitting processes, fostered closer federal-state coordination, and offered expanded opportunities for intergovernmental cooperation and public participation.

For these reasons, reauthorization of the Federal Coastal Management Program is crucial. Hearings are currently scheduled before Senate and House Committees, with reauthorization legislation before the full Congress this spring. On behalf of the State of Delaware, I urge your fullest support.

I am enclosing for your information a copy of a portion of a resolution adopted by the National Governors' Association on February 25, and a Fact Sheet prepared by the Coastal States Organization. Please contact me or Secretary Wilson if additional materials or information are needed.

Sincerely,

MICHAEL N. CASTLE, *Governor.*

COASTAL ZONE MANAGEMENT

I. THE FEDERAL/STATE PARTNERSHIP

The Coastal Zone Management Act [CZMA] of 1972 authorized the framework for the wise stewardship of our Nation's coastal resources. To accomplish this, the CZMA established a unique partnership between Federal, State, and local governments to ensure the balanced consideration among the myriad of competing coastal resource uses. The CZMA encourages coastal States to develop coastal management plans, subject to review and approval by the Federal Government. In addition to its oversight function, the Federal role in the partnership consists of a combination of financial assistance to States and the assurance of consistency of Federal activities with approved State management plans.

To date, the partnership established by the CZMA has been remarkably productive. More than 90 percent of our national coastal areas now fall under a federally approved State coastal management plan. Twenty-eight of thirty-five eligible coastal States and the territories have instituted these plans, and several other States are now in the process of doing so as well.

II. NEED TO CONTINUE THE FEDERAL/STATE PARTNERSHIP

Because of their experience in managing these programs, coastal States and territories have developed a unique expertise for dealing with coastal zone management issues. This expertise will become increasingly important as pressures upon the Nation's finite coastal resources continue to increase. The Nation's coastal areas now contain more than half of our population and that percentage is expected to grow to 80 percent by the year 2000. The coastal areas of the country are increasingly called upon to support a tremendous and often conflicting array of critically important activities: Fisheries development and enhancement; commerce and industrial port development; energy exploration and production; public access and recreation; waterfront restoration and housing; wetland preservation and coastal preservation; etc. In order to provide a national framework which fairly and efficiently considers and balances among all of the uses and users of coastal resources, the State-Federal partnership established by the CZMA must continue. The National Governor's Association believes that it is important for the States to continue to take primary responsibility for implementation and improvement of coastal zone management plans. However, to continue the workable partnership established by the CZMA, it is equally important for the Federal Government to continue to provide States with regulatory incentives and financial assistance.

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute.

The amendment in the nature of a substitute (No. 1431) was agreed to.

The PRESIDING OFFICER. If there be no further amendments to be proposed, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 2466), as amended, was read the third time and passed.

Mr. DOLE. I move to reconsider the vote by which the bill passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT OF TITLES 5 AND 39, UNITED STATES CODE

Mr. DOLE. I ask unanimous consent that the Committee on Governmental Affairs be discharged from further consideration of the bill numbered S. 1840 and I ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, there is no objection on this side.

The bill will be stated.

The assistant legislative clerk read as follows:

A bill (S. 1840) to amend titles 5 and 39, United States Code, to revise the authority relating to the payment of subsistence allowances to Government employees for periods of official travel, and for other purposes.

The Senate proceeded to consider the bill.

AMENDMENT NO. 1432

(Purpose: To revise the authority relating to the payment of subsistence and travel allowances to Government employees for official travel, to prescribe standards for the allowability of the cost of subsistence and travel of contractor personnel under Government contracts, and to amend the title)

Mr. DOLE. I send an amendment to the desk on behalf of Senator STEVENS and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE], for Mr. STEVENS, proposes an amendment numbered 1432.

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. This Act may be cited as the "Federal Civilian Employee and Contractor Travel Expenses Act of 1985".

TITLE I—TRAVEL EXPENSES OF FEDERAL CIVILIAN EMPLOYEES

SEC. 101. Section 5701(4) of title 5, United States Code, is amended to read as follows:

"(4) 'per diem allowance' means a daily payment instead of actual expenses for subsistence and fees or tips to porters and stewards;".

SEC. 102. (a) Section 5702 of title 5, United States Code, is amended by striking out subsections (a), (b), (c), and (d) and inserting in lieu thereof the following:

"(a)(1) Under regulations prescribed pursuant to section 5707 of this title, an employee, when traveling on official business away from the employee's designated post of duty, or away from the employee's home or regular place of business (if the employee is described in section 5703 of this title), is entitled to any one of the following:

"(A) a per diem allowance at a rate not to exceed that established by the Administrator of General Services for travel within the continental United States, and by the President or his designee for travel outside the continental United States;

"(B) reimbursement for the actual and necessary expenses of official travel not to exceed an amount established by the Administrator for travel within the continental

United States or an amount established by the President or his designee for travel outside the continental United States; or

"(C) a combination of payments described in subparagraphs (A) and (B) of this paragraph.

"(2) Any per diem allowance or maximum amount of reimbursement shall be established, to the extent feasible, by locality.

"(3) For travel consuming less than a full day, the payment prescribed by regulation shall be allocated in such manner as the Administrator may prescribe.

"(b)(1) Under regulations prescribed pursuant to section 5707 of this title, an employee who is described in subsection (a) of this section and who abandons the travel assignment prior to its completion—

"(A) because of an incapacitating illness or injury which is not due to the employee's own misconduct is entitled to reimbursement for expenses of transportation to the employee's designated post of duty, or home or regular place of business, as the case may be, and to payments pursuant to subsection (a) of this section until that location is reached: or

"(B) because of a personal emergency situation (such as serious illness, injury, or death of a member of the employee's family, or an emergency situation such as fire, flood, or act of God), may be allowed, with the approval of an appropriate official of the agency concerned, reimbursement for expenses of transportation to the employee's designated post of duty, or home or regular place of business, as the case may be, and payments pursuant to subsection (a) of this section until that location is reached.

"(2)(A) Under regulations prescribed pursuant to section 5707 of this title, an employee who is described in subsection (a) of this section and who, with the approval of an appropriate official of the agency concerned, interrupts the travel assignment prior to its completion for a reason specified in subparagraph (A) or (B) of paragraph (1) of this subsection, may be allowed (subject to the limitation provided in subparagraph (B) of this paragraph)—

"(i) reimbursement for expenses of transportation to the location where necessary medical services are provided or the emergency situation exists,

"(ii) payments pursuant to subsection (a) of this section until that location is reached, and

"(iii) such reimbursement and payments for return to such assignment.

"(B) The reimbursement which an employee may be allowed pursuant to subparagraph (A) of this paragraph shall be the employee's actual costs of transportation to the location where necessary medical services are provided or the emergency exists, and return to assignment from such location, less the costs of transportation which the employee would have incurred had such travel begun and ended at the employee's designated post of duty, or home or regular place of business, as the case may be. The payments which an employee may be allowed pursuant to subparagraph (A) of this paragraph shall be based on the additional time (if any) which was required for the employee's transportation as a consequence of the transportation's having begun and ended at a location on the travel assignment (rather than at the employee's designated post of duty, or home or regular place of business, as the case may be).

"(3) Subject to the limitations contained in regulations prescribed pursuant to section 5707 of this title, an employee who is described in subsection (a) of this section and who interrupts the travel assignment prior to its completion because of an incapacitating illness or injury which is not due to the employee's own misconduct is entitled to payments pursuant to subsection (a) of this section at the location where the interruption occurred.".

(b) Section 5702 of such title is further amended by redesignating subsection (e) as subsection (c).

SEC. 103. (a) Subchapter I of chapter 57 of title 5, United States Code, is amended by inserting after section 5706 the following new section:

"§ 5706a. Subsistence and travel expenses for threatened law enforcement personnel

"(a) Under regulations prescribed pursuant to section 5707 of this title, when the life of an employee who serves in a law enforcement, investigative, or similar capacity, or members of such employee's immediate family, is threatened as a result of the employee's assigned duties, the head of the agency concerned may approve appropriate subsistence payments for the employee or members of the employee's family (or both) while occupying temporary living accommodations at or away from the employee's designated post of duty.

"(b) When a situation described in subsection (a) of this section requires the employee or members of the employee's family (or both) to be temporarily relocated away from the employee's designated post of duty, the head of the agency concerned may approve transportation expenses to and from such alternate location.".

(b) The analysis for chapter 57 of title 5, United States Code, is amended by inserting after the item pertaining to section 5706 the following new item:

"5706a. Subsistence and travel expenses for threatened law enforcement personnel.".

SEC. 104. Section 5707 of title 5, United States Code, is amended—

(1) by inserting "(1)" immediately after "(a)";

(2) by inserting the following at the end of subsection (a):

"(2) Regulations promulgated to implement section 5702 or 5706a of this title shall be transmitted to the appropriate committees of the Congress and shall not take effect until 30 days after such transmittal."; and

(3) by inserting at the end thereof the following new subsection:

"(c)(1) The Administrator of General Services shall periodically, but at least every 2 years, submit to the Director of the Office of Management and Budget an analysis of estimated total agency payments for such items as travel and transportation of people, average costs and duration of trips, and purposes of official travel; and of estimated total agency payments for employee relocation. This analysis shall be based on a sampling survey of agencies each of which spent more than $5,000,000 during the previous fiscal year on travel and transportation payments, including payments for employee relocation. Agencies shall provide to the Administrator the necessary information in a format prescribed by the Administrator and approved by the Director.

"(2) The requirements of paragraph (1) of this subsection shall expire upon the Administrator's submission of the analysis that includes the fiscal year that ends September 30, 1991.".

SEC. 105. Section 5724a title 5, United States Code, is amended—

(1) by striking out "instead of" each place it appears in subsections (a)(1) and (a)(2) and inserting in lieu thereof "or";

(2) by striking out "maximum per diem rates prescribed by or under section 5702 of this title" each place it appears and inserting in lieu there of "maximum payment permitted under regulations which implement section 5702 of this title"; and

(3) by striking out "average daily rates" in subsection (a)(3) and inserting in lieu thereof "daily rates and amounts".

SEC. 106. (a) Subchapter II of chapter 57 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 5734. Travel, transportation, and relocation expenses of employees transferred from the Postal Service

"Notwithstanding the provisions of any other law, officers and employees of the United States Postal Service promoted or transferred under section 1006 of title 39, United States Code, from the Postal Service to an agency (as defined in section 5721 of this title), for permanent duty may be authorized travel, transportation, and relocation expenses and allowances under the same conditions and to the same extent authorized by this subchapter for other transferred employees within the meaning of this chapter.".

(b) The analysis for chapter 57 of title 5, United States Code, is amended by inserting after the item relating to section 5733 the following new item:

"5734. Travel, transportation, and relocation expenses of employees transferred from the Postal Service.".

SEC. 107. (a) Section 7(e) of the Technology Assessment Act of 1972 (2 U.S.C. 476(e)) is amended by striking out "a per diem in lieu of subsistence at not to exceed the rate prescribed in sections 5702 and" and inserting in lieu thereof "payments when traveling on official business at not to exceed the payment prescribed in regulations implementing section 5702 and in".

(b) Section 636(g)(2) of the Foreign Assistance Act of 1961 (22 U.S.C. 2396(g)) is amended by striking out "5702(c)" and inserting in lieu thereof "5702".

(c) Section 4941(d)(2)(G)(vii) of the Internal Revenue Code of 1954 (26 U.S.C. 4941(d)(2)(G)(vii)) is amended by striking out "5702(a)" and inserting in lieu thereof "5702".

(d) Section 456(a) of title 28, United States Code, is amended by striking out "a per diem allowance for travel at the rate which the Director establishes not to exceed the maximum per diem allowance fixed by section 5702(a) of title 5, or in accordance with regulations which the Director shall prescribe with the approval of the Judicial Conference of the United States, reimbursement for his actual and necessary expenses of subsistence not in excess of the maximum amount fixed by section 5702 of title 5" and inserting in lieu thereof the following: "payments for subsistence expenses at rates or in amounts which the Director establishes, in accordance with regulations which the Director shall prescribe with the approval of the Judicial Conference of the United States and after considering the rates or amounts set by the Administrator of General Services and the President pursuant to section 5702 of title 5".

(e) Section 326(b) of title 31, United States Code, is amended by striking out "rates"

and inserting in lieu thereof "rates and amounts".

(f) Section 6 of Public Law 90-67 (42 U.S.C. 2477) is amended by striking out "rates" and inserting in lieu thereof "rates and amounts".

TITLE II—TRAVEL EXPENSES OF GOVERNMENT CONTRACTORS

SEC. 201. The Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) is amended by adding at the end thereof the following new section:

"TRAVEL EXPENSES OF GOVERNMENT CONTRACTORS

"SEC. 24. Under any contract with any executive agency, costs incurred by contractor personnel for travel, including costs of lodging, other subsistence, and incidental expenses, shall be considered to be reasonable and allowable only to the extent that they do not exceed the rates and amounts set by subchapter I of chapter 57 of title 5, United States Code, or by the Administrator of General Services or the President (or his designee) pursuant to any provision of such subchapter. This section shall be implemented in regulations prescribed as a part of the single system of Government-wide procurement regulations as defined in section 4 of this Act.".

SEC. 202. The Administrator for Federal Procurement Policy, in consultation with the Secretary of Defense and the Administrator of General Services, shall undertake a study to determine whether limitations should be placed on payments by executive agencies to Government contractors for costs incurred by contractor employees for transportation and relocation. The Administrator for Federal Procurement Policy shall submit within 280 days after the enactment of this Act a report thereon to the appropriate committees of the Congress.

TITLE III—EFFECTIVE DATE

SEC. 301. (a) The Administrator of General Services shall promulgate regulations implementing the amendments made by sections 101, 102, 103, 104, and 106 of this Act not later than 150 days after the date of enactment of this Act. The amendments made by title I of this Act shall take effect on the effective date of such regulations, or 180 days after the date of enactment of this Act, whichever occurs first.

(b) The amendments made by section 201 of this Act shall take effect 30 days after the effective date of the amendments made by title I.

Amend the title so as to read as follows: "To amend title 5, United States Code, to revise the authority relating to the payment of subsistence and travel allowances to Government employees for official travel; to prescribe standards for the allowability of the cost of subsistence and travel of contractor personnel under Government contracts; and for other purposes."

Mr. STEVENS. Mr. President, today I am introducing, along with Senator JOHN WARNER, an amendment to my earlier bill dealing with the question of the proper per diem rate to be paid Federal employees. This bill is entitled the "Federal Civilian Employee and Contractor Travel Expenses Act of 1985". This amendment incorporates my previous bill and several added features in a similar bill in the House. It revises certain provisions of title 5 relating to subsistence allowances by removing the statutory ceilings and revising the methods of reimbursement for official travel. Title 41 will also be amended to impose the limits established under title 5 for travel costs of contractors.

Currently, per diem rates for Federal travelers are set by the Congress. The last time these rates were changed was 1980. The present maximum rate of $75 for high cost areas, $50 for other areas, is woefully inadequate. The term "high cost" has lost its meaning as has the value of the $75 limit.

Inadequate reimbursement rates require many Federal travelers to cover some of their official travel expenses out of pocket. This is not the message we want to deliver to our work force. This is even more insulting considering that we are constantly asking Federal employees to help the Nation fight the budget deficit by maintaining their current pay.

Reimbursement for travel to high cost areas, which cover 402 of the 470 areas recently studied, requires using the actual expense method. To be reimbursed, employees must submit a detailed account, item by item, of each day's expenses along with receipts. Not only is this time consuming but it is also an irritant when employees prepare the vouchers.

In addition to lifting the statutory dollar ceiling, this legislation would also eliminate the actual expense reimbursement method for travel. This bill empowers the Administrator of the GSA to prescribe the methods for reimbursement. The GSA has projected an annual reduction of administrative costs of $54 million by using the lodgings plus per diem method contained in this bill, which is favored by the GSA. Because travel costs vary considerably from city to city, the GSA will periodically conduct a survey of travel costs allowing the Administrator to administratively set reimbursement costs. The rates would be locality based. This method would require only a lodgings receipt. In fact, several agencies have already been participating in experimental programs along these lines. This legislation would establish a uniform reimbursment system for all agencies. It provides for reimbursement of transportation expenses for employees who because of illness or emergency abandon official business travel prior to completion. Subsistence and travel expense for law enforcement personnel and immediate families who have to be evacuated from their homes because of job related threats may also be reimbursed.

The amendment affecting contractor employees is to be implemented in regulations prescribed as a part of the single system of Government-wide procurement regulations. And finally, it permits the Judicial Conference to set reimbursement rates considering the rates and amounts set by the Administrator of General Services and the President. This will also correct an oversight in existing law by giving executive agencies the authority to reimburse employees transferring from the Postal Service for their travel, transportation, and relocation expenses. Prior to 1970, postal employees had this entitlement.

In summary, I am convinced these changes proposed are long overdue. They are much fairer to the Federal employee, greatly reduce administrative processes, and send a positive message to our official travelers.

I ask that the sectional analysis be printed in the RECORD at this time.

The material referred to follows:

SECTION-BY-SECTION ANALYSIS

Section 1. This section provides for a short title of the bill. It may be cited as the "Civilian Employee and Contractor Travel Expenses Act of 1985".

TITLE I—TRAVEL EXPENSES OF FEDERAL CIVILIAN EMPLOYEES

Section 101. This section amends section 5701(4) of title 5, the definition of "per diem allowance" to mean a daily payment instead of actual expenses for subsistence and fees or tips.

Section 102. Section 102(a) amends section 5702 of title 5 by deleting subsections (a), (b), (c) and (d) and inserting the following:

(a)(1) provides for an employee traveling on official business away from his/her duty station to be entitled to one of the following:

(A) a per diem allowance at a rate set by the Administrator of General Services for travel within the continental United States and by the President or designee for travel outside the continental United States;

(B) reimbursement for the actual and necessary expenses not to exceed an amount established by the Administrator for travel within the continental U.S. or by the President for travel outside the continental U.S.; or

(C) a combination of (A) and (B).

(a)(2) provides that a per diem allowance or maximum reimbursement be established by locality, to the extent feasible.

(a)(3) requires the Administrator of General Services through regulation to prescribe the method of payment for travel of less than a full day.

(b)(1) provides for reimbursement for an employee on official business who abandons the travel assignment prior to its completion because of emergency situations.

(b)(1)(A) provides that an employee is entitled to reimbursement for transportation and subsistence expenses to the employee's duty post, home or place of business when travel is abandoned because of an incapacitating illness or injury not due to misconduct.

(b)(1)(B) provides for reimbursement to an employee for transportation and subsistence expenses to the employee's duty post, home or place of business when travel is abandoned because of a personal emergency such as an illness or death of a family member or flood or fire. Reimbursement is subject to approval by an appropriate agency official.

(b)(2) provides for an employee described in subparagraph 3(A) and (B) with agency approval to be reimbursed for transporta-

tion expenses to a location for medical services or where the emergency situation exists, payments for subsistence until the location is reached and reimbursements and payments for return to the assignment. It also provides that the amount of reimbursement shall be the employee's actual costs of transportation to the emergency location and return to assignment from such location less the costs of transportation which would have been incurred had the travel began and ended at the employee's post of duty, home, or place of business.

Section 102(b) further amends section 5702 by redesignating subsection (e) as (c).

Section 103(a) provides for amending subchapter I of Chapter 57 of title 5 by adding after section 5706 a new section:

Section 5706(a) Subsistence and travel expenses for threatened law enforcement personnel (a) provides that the head of an agency may approve subsistence payments for employees who serve in law enforcement, investigative or similar capacity, and their immediate families when moved to temporary living accommodations because of job related threats, (b) provides that the head of an agency may approve transportation expenses for an employee referred to in (a) when the employee and/or family is temporarily relocated from his/her post of duty.

Section 103(b) provides for amending the analysis for chapter 57 by adding the new item: "5706a. Subsistence and travel expenses for threatened law enforcement personnel."

Section 104 provides that regulations implementing section 5702 or 5706a shall be transmitted to appropriate committees of the Congress and shall not take effect for 30 days after transmittal. It further provides that the Administrator of General Service shall periodically report, at least every 2 years, to the Office of Management and Budget on costs for travel, transportation and relocation. The reporting requirements expire with the fiscal year ending September 30, 1991.

Section 105 provides for several technical and conforming changes to section 5724a.

Section 106(a) provides for amending Subchapter II of chapter 57 of title 5 to add a new section, "5734. Travel, transportation and relocation expenses of employees transferred from the Postal Service." This new section provides that travel, transportation, and relocation expenses may be authorized for employees who transfer from the Postal Service to executive branch agencies.

Section 106(b) provides for amending the analysis for chapter 57 to add the new item, "5734. Travel, transportation, and relocation expenses of employees transferred from the Postal Service".

Section 107 provides for several technical and conforming amendments to the Technology Assessment Act of 1972, Foreign Assistance Act of 1961, the Internal Revenue Code of 1954, title 31 and title 42. It also provides for the Director of the Judicial Conference of the United States to prescribe rates for subsistence expenses with the approval of the Judicial Conference taking into consideration the rates or amounts set by the Administrator of General Services.

TITLE II—TRAVEL EXPENSES OF GOVERNMENT CONTRACTORS

Section 201 amends the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) by adding a new section 24, "Travel Expenses of Government Contractors", which provides that travel costs for contractor personnel under contract with any executive agency may not exceed the rates and amounts set by the Administrator of General Services or the President.

Section 202 provides for the Administrator of Federal Procurement Policy, in conjunction with the Administrator of General Services and the Secretary of Defense, to undertake a study to determine whether limitations should be placed on payments for costs for transportation and relocation for contractor employees.

TITLE III—EFFECTIVE DATE

Section 301(a) provides for the Administrator of General Services to promulgate regulations implementing sections 101, 102, 103, 104, and 106 no later than 150 days following enactment. The amendments made by Title I shall take effect on the effective date of the regulations or 180 days after enactment, whichever occurs first.

Section 301(b) provides for the amendments made by section 201 to take effect 30 days after the effective date of the Title I amendments.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1432) was agreed to.

The bill is open to further amendment. If there be no further amendment to be proposed the question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading and the bill to be read a third time.

The bill (S. 1840), as amended, was read the third time and passed, as follows:

S. 1840

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Federal Civilian Employee and Contractor Travel Expenses Act of 1985".

TITLE I—TRAVEL EXPENSES OF FEDERAL CIVILIAN EMPLOYEES

SEC. 101. Section 5701(4) of title 5, United States Code, is amended to read as follows:

"(4) 'per diem allowance' means a daily payment instead of actual expenses for subsistence and fees or tips to porters and stewards;".

SEC. 102. (a) Section 5702 of title 5, United States Code, is amended by striking out subsections (a), (b), (c), and (d) and inserting in lieu thereof the following:

"(a)(1) Under regulations prescribed pursuant to section 5707 of this title, an employee, when traveling on official business away from the employee's designated post of duty, or away from the employee's home or regular place of business (if the employee is described in section 5703 of this title), is entitled to any one of the following:

"(A) a per diem allowance at a rate not to exceed that established by the Administrator of General Services for travel within the continental United States, and by the President or his designee for travel outside the continental United States;

"(B) reimbursement for the actual and necessary expenses of official travel not to exceed an amount established by the Administrator for travel within the continental United States or an amount established by the President or his designee for travel outside the continental United States; or

"(C) a combination of payments described in subparagraphs (A) and (B) of this paragraph.

"(2) Any per diem allowance or maximum amount of reimbursement shall be established, to the extent feasible, by locality.

"(3) For travel consuming less than a full day, the payment prescribed by regulation shall be allocated in such manner as the Administrator may prescribe.

"(b)(1) Under regulations prescribed pursuant to section 5707 of this title, an employee who is described in subsection (a) of this section and who abandons the travel assignment prior to its completion—

"(A) because of an incapacitating illness or injury which is not due to the employee's own misconduct is entitled to reimbursement for expenses of transportation to the employee's designated post of duty, or home or regular place of business, as the case may be, and to payments pursuant to subsection (a) of this section until that location is reached; or

"(B) because of a personal emergency situation (such as serious illness, injury, or death of a member of the employee's family, or an emergency situation such as fire, flood, or act of God), may be allowed, with the approval of an appropriate official of the agency concerned, reimbursement for expenses of transportation to the employee's designated post of duty, or home or regular place of business, as the case may be, and payments pursuant to subsection (a) of this section until that location is reached.

"(2)(A) Under regulations prescribed pursuant to section 5707 of this title, an employee who is described in subsection (a) of this section and who, with the approval of an appropriate official of the agency concerned, interrupts the travel assignment prior to its completion for a reason specified in subparagraph (A) or (B) of paragraph (1) of this subsection, may be allowed (subject to the limitation provided in subparagraph (B) of this paragraph)—

"(i) reimbursement for expenses of transportation to the location where necessary medical services are provided or the emergency situation exists,

"(ii) payments pursuant to subsection (a) of this section until that location is reached, and

"(iii) such reimbursement and payments for return to such assignment.

"(B) The reimbursement which an employee may be allowed pursuant to subparagraph (A) of this paragraph shall be the employee's actual costs of transportation to the location where necessary medical services are provided or the emergency exists, and return to assignment from such location, less the costs of transportation which the employee would have incurred had such travel begun and ended at the employee's designated post of duty, or home or regular place of business, as the case may be. The payments which an employee may be allowed pursuant to subparagraph (A) of this paragraph shall be based on the additional time (if any) which was required for the employee's transportation as a consequence of the transportation's having begun and ended at a location on the travel assignment (rather than at the employee's designated post of duty, or home or regular place of business, as the case may be).

"(3) Subject to the limitations contained in regulations prescribed pursuant to section 5707 of this title, an employee who is described in subsection (a) of this section and who interrupts the travel assignment prior to its completion because of an inca-

pacitating illness or injury which is not due to the employee's own misconduct is entitled to payments pursuant to subsection (a) of this section at the location where the interruption occurred.".

(b) Section 5702 of such title is further amended by redesignating subsection (e) as subsection (c).

SEC. 103. (a) Subchapter I of chapter 57 of title 5, United States Code, is amended by inserting after section 5706 the following new section:

"§ 5706a. Subsistence and travel expenses for threatened law enforcement personnel

"(a) Under regulations prescribed pursuant to section 5707 of this title, when the life of an employee who serves in a law enforcement, investigative, or similar capacity, or members of such employee's immediate family, is threatened as a result of the employee's assigned duties, the head of the agency concerned may approve appropriate subsistence payments for the employee or members of the employee's family (or both) while occupying temporary living accommodations at or away from the employee's designated post of duty.

"(b) When a situation described in subsection (a) of this section requires the employee or members of the employee's family (or both) to be temporarily relocated away from the employee's designated post of duty, the head of the agency concerned may approve transportation expenses to and from such alternate location.".

(b) The analysis for chapter 57 of title 5, United States Code, is amended by inserting after the item pertaining to section 5706 the following new item:

"5706a. Subsistence and travel expenses for threatened law enforcement personnel.".

SEC. 104. Section 5707 of title 5, United States Code, is amended—

(1) by inserting "(1)" immediately after "(a)";

(2) by inserting the following at the end of subsection (a):

"(2) Regulations promulgated to implement section 5702 or 5706a of this title shall be transmitted to the appropriate committees of the Congress and shall not take effect until 30 days after such transmittal."; and

(3) by inserting at the end thereof the following new subsection:

"(c)(1) The Administrator of General Services shall periodically, but at least every 2 years, submit to the Director of the Office of Management and Budget an analysis of estimated total agency payments for such items as travel and transportation of people, average costs and duration of trips, and purposes of official travel; and of estimated total agency payments for employee relocation. This analysis shall be based on a sampling survey of agencies each of which spent more than $5,000,000 during the previous fiscal year on travel and transportation payments, including payments for employee relocation. Agencies shall provide to the Administrator the necessary information in a format prescribed by the Administrator and approved by the Director.

"(2) The requirements of paragraph (1) of this subsection shall expire upon the Administrator's submission of the analysis that includes the fiscal year that ends September 30, 1991.".

SEC. 105. Section 5724a title 5, United States Code, is amended—

(1) by striking out "instead of" each place it appears in subsections (a)(1) and (a)(2) and inserting in lieu thereof "or";

(2) by striking out "maximum per diem rates prescribed by or under section 5702 of this title" each place it appears and inserting in lieu thereof "maximum payment permitted under regulations which implement section 5702 of this title"; and

(3) by striking out "average daily rates" in subsection (a)(3) and inserting in lieu thereof "daily rates and amounts".

SEC. 106. (a) Subchapter II of chapter 57 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 5734. Travel, transportation, and relocation expenses of employees transferred from the Postal Service

"Notwithstanding the provisions of any other law, officers and employees of the United States Postal Service promoted or transferred under section 1006 of title 39, United States Code, from the Postal Service to an agency (as defined in section 5721 of this title), for permanent duty may be authorized travel, transportation, and relocation expenses and allowances under the same conditions and to the same extent authorized by this subchapter for other transferred employees within the meaning of this chapter.".

(b) The analysis for chapter 57 of title 5, United States Code, is amended by inserting after the item relating to section 5733 the following new item:

"5734. Travel, transportation, and relocation expenses of employees transferred from the Postal Service.".

SEC. 107. (a) Section 7(e) of the Technology Assessment Act of 1972 (2 U.S.C. 476(e)) is amended by striking out "a per diem in lieu of subsistence at not to exceed the rate prescribed in sections 5702 and" and inserting in lieu thereof "payments when traveling on official business at not to exceed the payment prescribed in regulations implementing section 5702 and in".

(b) Section 636(g)(2) of the Foreign Assistance Act of 1961 (22 U.S.C. 2396(g)) is amended by striking out "5702(c)" and inserting in lieu thereof "5702".

(c) Section 4941(d)(2)(G)(vii) of the Internal Revenue Code of 1954 (26 U.S.C. 4941(d)(2)(G)(vii)) is amended by striking out "5702(a)" and inserting in lieu thereof "5702".

(d) Section 456(a) of title 28, United States Code, is amended by striking out "a per diem allowance for travel at the rate which the Director establishes not to exceed the maximum per diem allowance fixed by section 5702(a) of title 5, or in accordance with regulations which the Director shall prescribe with the approval of the Judicial Conference of the United States, reimbursement for his actual and necessary expenses of subsistence not in excess of the maximum amount fixed by section 5702 of title 5" and inserting in lieu thereof the following: "payments for subsistence expenses at rates or in amounts which the Director establishes, in accordance with regulations which the Director shall prescribe with the approval of the Judicial Conference of the United States and after considering the rates or amounts set by the Administrator of General Services and the President pursuant to section 5702 of title 5".

(e) Section 326(b) of title 31, United States Code, is amended by striking out "rates" and inserting in lieu thereof "rates and amounts".

(f) Section 6 of Public Law 90-67 (42 U.S.C. 2477) is amended by striking out "rates" and inserting in lieu thereof "rates and amounts".

TITLE II—TRAVEL EXPENSES OF GOVERNMENT CONTRACTORS

SEC. 201. The Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) is amended by adding at the end thereof the following new section:

"TRAVEL EXPENSES OF GOVERNMENT CONTRACTORS

"SEC. 24. Under any contract with any executive agency, costs incurred by contractor personnel for travel, including costs of lodging, other subsistence, and incidental expenses, shall be considered to be reasonable and allowable only to the extent that they do not exceed the rates and amounts set by subchapter I of chapter 57 of title 5, United States Code, or by the Administrator of General Services or the President (or his designee) pursuant to any provision of such subchapter. This section shall be implemented in regulations prescribed as a part of the single system of Government-wide procurement regulations as defined in section 4 of this Act.".

SEC. 202. The Administrator for Federal Procurement Policy, in consultation with the Secretary of Defense and the Administrator of General Services, shall undertake a study to determine whether limitations should be placed on payments by executive agencies to Government contractors for costs incurred by contractor employees for transportation and relocation. The Administrator for Federal Procurement Policy shall submit within 180 days after the enactment of this Act a report thereon to the appropriate committees of the Congress.

TITLE III—EFFECTIVE DATE

SEC. 301. (a) The Administrator of General Services shall promulgate regulations implementing the amendments made by sections 101, 102, 103, 104, and 106 of this Act not later than 150 days after the date of enactment of this Act. The amendments made by title I of this Act shall take effect on the effective date of such regulations, or 180 days after the date of enactment of this Act, whichever occurs first.

(b) The amendments made by section 201 of this Act shall take effect 30 days after the effective date of the amendments made by title I.

Mr. DOLE. I move to reconsider the vote.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VETERANS' COMPENSATION AMENDMENTS OF 1985

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of H.R. 1538.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 1538) to amend title 38, United States Code, to provide a 3.4-percent increase in the rates of compensation and dependency and indemnity compensation [DIC] paid by the Veterans' Administration.

AMENDMENT NO. 1433

Mr. DOLE. Mr. President, I send an amendment to the desk in the nature

of a substitute on behalf of Senator MURKOWSKI, Senator CRANSTON, and others, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] for Mr. MURKOWSKI, Mr. CRANSTON, Mr. KERRY, Mr. HEINZ, and Mr. SPECTER, proposes an amendment numbered 1433.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Veterans' Compensation Rate Increase and Job Training Amendments of 1985".

TITLE I—DISABILITY COMPENSATION AND DEPENDENCY AND INDEMNITY COMPENSATION RATE INCREASES

SEC. 101. DISABILITY COMPENSATION.

(a) IN GENERAL.—Section 314 of title 38, United States Code, is amended—

(1) by striking out "$66" in subsection (a) and inserting in lieu thereof "$68";

(2) by striking out "$122" in subsection (b) and inserting in lieu thereof "$126";

(3) by striking out "$185" in subsection (c) and inserting in lieu thereof "$191";

(4) by striking out "$266" in subsection (d) and inserting in lieu thereof "$274";

(5) by striking out "$376" in subsection (e) and inserting in lieu thereof "$388";

(6) by striking out "$474" in subsection (f) and inserting in lieu thereof "$489";

(7) by striking out "$598" in subsection (g) and inserting in lieu thereof "$617";

(8) by striking out "$692" in subsection (h) and inserting in lieu thereof "$713";

(9) by striking out "$779" in subsection (i) and inserting in lieu thereof "$803";

(10) by striking out "$1,295" in subsection (j) and inserting in lieu thereof "$1,335";

(11) by striking out "$2,255" in subsection (k) and inserting in lieu thereof "$1,659" and "2,325", respectively;

(12) by striking out "$1,609" in subsection (l) and inserting in lieu thereof "$1,659";

(13) by striking out "$1,774" in subsection (m) and inserting in lieu thereof "$1,829";

(14) by striking out "$2,017" in subsection (m) and inserting in lieu thereof "$2,080";

(15) by striking out "$2,255" each place it appears in subsections (o) and (p) and inserting in lieu thereof "$2,325";

(16) by striking out "$968" and "$1,442" in subsection (r) and inserting in lieu thereof "$998" and "$1,487", respectively;

(17) by striking out "$1,449" in subsection (s) and inserting in lieu thereof "$1,494"; and

(18) by striking out "$280" in subsection (t) and inserting in lieu thereof "$289".

(b) SPECIAL RULE.—The Administrator of Veterans' Affairs may adjust administratively, consistent with the increases authorized by this section, the rates of disability compensation payable to persons within the purview of section 10 of Public Law 85-857 who are not in receipt of compensation payable pursuant to chapter 11 of title 38, United States Code.

SEC. 102. ADDITIONAL COMPENSATION FOR DEPENDENTS.

Section 315(1) of title 38, United States Code, is amended—

(1) by striking out "$79" in clause (A) and inserting in lieu thereof "81";

(2) by striking out "$312" and "$42" in clause (B) and inserting in lieu thereof "$136" and "$43", respectively;

(3) by striking out "$54" and "$42" in clause (C) and inserting in lieu thereof "$56" and "$43", respectively;

(4) by striking out "$64" in clause (D) and inserting in lieu thereof "$66";

(5) by striking out "$143" in clause (E) and inserting in lieu thereof "$147"; and

(6) by striking out "$120" in clause (F) and inserting in lieu thereof "$124".

SEC. 103. CLOTHING ALLOWANCE FOR CERTAIN DISABLED VETERANS.

Section 362 of title 38, United States Code, is amended by striking out "$349" and inserting in lieu thereof "$360".

SEC. 104. DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING SPOUSES.

Section 411 of title 38, United States Code, is amended—

(1) by striking out the table in subsection (a) and inserting in lieu thereof the following:

"Pay grade	Monthly rate	Pay grade	Monthly rate
E-1	$491	W-4	$703
E-2	505	O-1	621
E-3	518	O-2	640
E-4	552	O-3	686
E-5	566	O-4	725
E-6	578	O-5	799
E-7	607	O-6	900
E-8	640	O-7	973
E-9	[1] 669	O-8	1,067
W-1	621	O-9	1,145
W-2	645	O-10	[2] 1,255
W-3	664	xl	xl

"[1] If the veteran served as sergeant major of the Army, senior enlisted advisor of the Navy, chief master sergeant of the Air Force, sergeant major of the Marine Corps, or master chief petty officer of the Coast Guard, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $772.

"[2] If the veteran served as Chairman of the Joint Chiefs of Staff, Chief of Staff of the Army, Chief of Naval Operations, Chief of Staff of the Air Force, Commandant of the Marine Corps, or Commandant of the Coast Guard, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $1,345.";

(2) by striking out "$55" in subsection (b) and inserting in lieu thereof "$57";

(3) by striking out "$143" in subsection (c) and inserting in lieu thereof "$147";

(4) by striking out "$70" in subsection (d) and inserting in lieu thereof "$72".

SEC. 105. DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN.

Section 413 of title 38, United States Code, is amended—

(1) by striking out "$240" in clause (1) and inserting in lieu thereof "$247";

(2) by striking out "$345" in clause (2) and inserting in lieu thereof "$356";

(3) by striking out "$446" in clause (3) and inserting in lieu thereof "$460"; and

(4) by striking out "$446" and "$90" in clause (4) and inserting in lieu thereof "$460" and "$93", respectively.

SEC. 106. SUPPLEMENTAL DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN.

Section 414 of title 38, United States Code, is amended—

(1) by striking out "$143" in subsection (a) and inserting in lieu thereof "$147";

(2) by striking out "$240" in subsection (b) and inserting in lieu thereof "$247"; and

(3) by striking out "$122" in subsection (c) and inserting in lieu thereof "$126".

SEC. 107. EFFECTIVE DATE.

The amendments made by this title shall take effect as of December 1, 1985.

TITLE II—VETERANS' JOB TRAINING AMENDMENTS

SEC. 201. EMERGENCY VETERANS' JOB TRAINING ACT AMENDMENTS.

(a) SHORT TITLE.—(1) The first sentence of section 1 of Public Law 98-77 (29 U.S.C. 1721 note) is amended to read as follows: "This Act may be cited as the 'Veterans' Job Training Act'.".

(2) Any reference in any Federal law to the Emergency Veterans' Job Training Act of 1983 shall be deemed to refer to the Veterans' Job Training Act.

(b) ELIGIBILITY.—Section 5(a)(1)(B) of the Veterans' Job Training Act, as redesignated by subsection (a), is amended by striking out "fifteen of the twenty" and inserting in lieu thereof "10 of the 15".

(c) COUNSELING.—Section 14 of such Act is amended—

(1) by inserting "(a)" before "The"; and

(2) by adding at the end the following new subsection:

"(b) The Secretary—

"(1) shall provide for a program under which periodic (not less than monthly) contact is maintained with each veteran participating in a program of job training under this Act for the purposes of avoiding unnecessary termination of employment, referring the veteran to appropriate counseling if necessary, and facilitating the veteran's successful completion of such program; and

"(2) after consultation with the Administrator, shall provide for a program of counseling services designed to resolve difficulties that may be encountered by veterans during their training under this Act and shall advise all veterans and employers participating under this Act of the availability of such services and other related counseling services and assistance and encourage them to request such services and assistance whenever appropriate.".

(d) AUTHORIZATION OF APPROPRIATIONS.—Section 16 of such Act is amended—

(1) by inserting "and $65,000,000 for fiscal year 1986" after "1985"; and

(2) by striking out "1987" and inserting in lieu thereof "1988".

(e) TOLLING OF CERTAIN PERIOD.—Section 17 of such Act is amended—

(1) by striking out "Assistance" and inserting in lieu thereof "(a) Except as provided in subsection (b), assistance";

(2) in clause (1), by striking out "February 28, 1985" and inserting in lieu thereof "January 31, 1987";

(3) in clause (2), by striking out "July 1, 1986" and inserting in lieu thereof "July 31, 1987"; and

(4) by adding at the end the following new subsection:

"(b) If funds for fiscal year 1986 are appropriated for the purpose of making payments to employers under this Act but are not both so appropriated and made available by the Director of the Office of Management and Budget to the Veterans' Administration on or before February 1, 1986, for such purpose, assistance may be paid to an employer under this Act on behalf of a veteran if the veteran—

"(1) applies for a program of job training under this Act within 1 year after the date on which funds so appropriated are made available to the Veterans' Administration by the Director; and

"(2) begins participation in such program within 18 months after such date.".

(f) EFFECTIVE DATE.—(1) Except as provided in paragraph (2), the amendments made by this section shall take effect on the date of the enactment of this Act.

(2) The amendment made by subsection (e)(2) shall take effect on February 1, 1986.

SEC. 202. COORDINATION.

(a) IN GENERAL.—In carrying out section 1516(b) of title 38, United States Code, the Administrator of Veterans Affairs shall take all feasible steps to establish and encourage, for veterans who are eligible to have payments made on there behalf under such section, the development of training opportunities through programs of job training consistent with the provisions of the Veterans' Job Training Act (as redesignated by section 201(a)(1) of the Act so as to utilize programs of job training established by employers pursuant to such Act.

(b) DIRECTIVE.—In carrying out such Act, the Administrator shall take all feasible steps to ensure that, in the cases of veterans who are eligible to have payments made on their behalf under both such Act and section 1516(b) of title 38, United States Code, the authority under such section is utilized, to the maximum extent feasible and consistent with the veteran's best interests, to make payments to employers on behalf of such veterans.

Amend the title so as to read: "An Act to amend title 38, United States Code, to provide a 3.1-percent increase in the rates of disability compensation and of dependency and indemnity compensation paid by the Veterans' Administration; to make improvements in veterans' job training programs; and for other purposes."

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, I rise in support of an amendment in the nature of a substitute to H.R. 1538, that would provide a 3.1-percent cost-of-living [COLA] for service-connected veterans and their survivors and dependents, effective December 1, 1985.

Where has the year gone? The first session of the 99th Congress is practically over and yet much remains undone. I am extemely disappointed that even though this session has lasted practically until Christmas, we have not accomplished many important goals.

The 3.1-percent COLA was originally passed by the Senate on December 2, 1985, in S. 1887, in the proposed Veterans' Compensation Benefits Improvements Act of 1985; however, unfortunately, the House and Senate were unable to resolve their differences on several provisions in this legislation. To avoid a further delay in the COLA, the House and Senate agreed to consider the provision of the 3.1-percent COLA in the proposed Omnibus Budget Reconciliation Act of 1985.

In a year when saving money has been at the forefront of everyone's mind, the conference report on the Omnibus Budget Reconciliation Act of 1985, has not been completed. Title XIX of this legislation contained provisions relating to veterans' programs which were projected to save more than $1.26 billion over the next 3 years.

Therefore, in order to expedite the provision of the COLA for service-connected disabled veterans, I am supporting the adoption of the 3.1-percent COLA in a separate bill. The House passed H.R. 1538, which would provide a 3.4-percent COLA for service-connected disabled veterans. This legislation was referred to the Senate and held at the desk, just in case a time such as this arose when the Congress might need to act expeditiously in order to ensure a COLA for service-connected disabled veterans before adjournment sine die. The House has agreed to a 3.1-percent COLA in our reconciliation conference report. The automatically indexed COLA for Social Security and VA pension recipients will also be 3.1-percent for fiscal year 1986.

In addition to the COLA, this amendment would also extend the Emergency Veterans' Job Training Act for a year beginning February 1, 1986. Both the House, in H.R. 1408, and the Senate, in S. 1887, have passed extensions of this veterans' job training program. This amendment reflects the compromise version of S. 1887. Employment for veterans is too important an issue to delay until next year. We are reminded of this by the November unemployment rates which show Vietnam veterans aged 30 to 44 with a rate three-tenths of 1 percent higher than their nonveteran counterparts.

It is with significant disappointment that I view the inability of the House and Senate to compromise on S. 1887, and related House-passed bills. The main stumbling block was the House's refusal to accept the VA loan guaranty reforms that I offered. The Loan Guaranty Program is, without question, in dire need of tighter credit underwriting standards, and other significant reforms to ensure that the program moves toward solvency. It is not the intent of this important benefit to allow a veteran to purchase a home he or she cannot afford. The numbers of foreclosures continues at approximately 2,500 a month. This year, the VA requested over $400 million to cover program losses. This practice must stop. The veteran home buyer is an important beneficiary who deserves a program that will protect his or her interests.

The Congressional Budget Office [CBO] estimated that my loan guaranty provisions would have saved over $300 million in fiscal year 1986-89. Although somewhat belatedly, this legislation was endorsed by the VA in a side-by-side submitted by the VA general counsel, as well as by the Housing Roundtable, and other housing and lending professional organizations. I intend to make the enactment of this legislation my highest priority for the second session of the 99th Congress.

The House indicated that the only reason they would not consider this legislation was because they did not have sufficient time to hold hearings. I trust that will not be the case next year.

Mr. President, I do regret that the COLA is not part of a comprehensive bill based on legislation contained in Senate-passed S. 1887; however, due to the circumstances, I endorse strongly the passage of H.R. 1538, as amended to provide, effective December 1, 1985, a 3.1-percent COLA for those veterans who are the highest priority group of VA beneficiaries—those with service-connected disabilities and their dependents and survivors.

VETERANS' COMPENSATION RATE INCREASE AND JOB TRAINING AMENDMENTS

Mr. CRANSTON. Mr. President, as the ranking minority member of the Committee on Veterans' Affairs, I rise in support of the pending amendment which Chairman MURKOWSKI and I are offering in the nature of a substitute to H.R. 1538. This amendment is derived from S. 1887, the proposed "Veterans' Compensation and Benefits Improvements Act of 1985", which the Senate passed on December 2, 1985. It would provide for a 3.1-percent increase in the rates of disability compensation paid to service-connected disabled veterans and the rates of dependency and indemnity compensation paid to the survivors of those who die from service-connected causes. It would also extend, improve, authorize additional appropriations for, and rename the Emergency Veterans' Job Training Act of 1983.

COMPENSATION AND DIC RATE INCREASES

The VA's service-connected disability compensation program is at the very heart of our Nation's system of veterans' benefits. The priority that is attached to the needs of service-connected disabled veterans and the survivors of those who have made the ultimate sacrifice is well-known and well-established. The more than 2.2 million veterans who suffer from disabilities resulting from their service and the 342,000 survivors of those who died from service-connected disabilities are and will remain our committee's No. 1 priority. They are certainly mine.

Thus, Mr. President, I'm delighted that the pending amendment would provide for a compensation and DIC COLA equal to the increase being made this year in Social Security and VA pension benefits—3.1 percent. Consistent with the precedent we established last year in the VA compensa-

tion COLA bill, Public Law 98-543, as well as in the Reconciliation bill, Public Law 98-369, this increase would be effective on December 1, 1985, the same date as the indexed COLA's for Social Security and VA pension. As our committee has noted many times in the past and throughout this year, we continue to be committed to maintaining this approach.

I also note that, by virtue of section 156(e)(1)(A) of Public Law 97-377, a fiscal year 1983 continuing appropriations measure enacted on December 21, 1982, the enactment of this COLA would automatically result in a 3.1-percent increase, effective on December 1, in survivors' reinstated, social-security-like benefits paid under section 156 of Public Law 97-377 to certain surviving spouses with minor children.

Mr. President, the House proposed this year, as is evidenced by the underlying measure, H.R. 1538, that we proceed with a 3.4-percent COLA, splitting the difference between the 3.7-percent increase passed by the House in H.R. 3128 and the Senate's 3.1-percent increase in S. 1887. By passing this amendment, the Senate will be insisting on a 3.1-percent increase.

It should be noted, Mr. President, that it is true that last year we did not, regrettably, increase compensation rates by exactly the same percentage as the Social Security COLA. The Social Security COLA turned out to be 3.5 percent and the compensation COLA we enacted before we knew the CPI amount was 3.2 percent.

However, at that same time we moved forward by 4 months the effective date of the COLA—from April 1, 1985, to December 1, 1984. This acceleration of the COLA was a major benefit to all compensation/DIC recipients in fiscal year 1985.

In the case of veterans with disabilities rated 10-, 20-, or 30-percent disabling, there was no dollar difference in the monthly rate between a 3.1-percent COLA and a 3.5-percent COLA. However, because the effective date was moved forward by 4 months, these veterans all received more in fiscal year 1985 than they would have otherwise had the date not been moved up. In the case of 30-percent disabled veterans, this meant $24 more in fiscal year 1985 than if the effective date had been left at April 1 and a 3.5-percent COLA had been enacted.

In the case of veterans rated 40- through 70-percent disabled, the difference between the two COLA percentages was $1 per month. However, in the case of a veteran rated 60-percent disabled, for example, the earlier effective date meant $55 more in fiscal year 1985 in compensation than would have been paid with a 3.5-percent COLA increase, effective on April 1.

One last example—in the case of veterans rated 100-percent disabled, the dollar difference between the COLA's was $4 a month. The earlier effective date, however, meant $140 more in fiscal year 1985 than if a 3.5-percent COLA had been granted effective April 1, 1985.

Thus, Mr. President, in light of the effect of the earlier effective date and in consideration of the great urgency to control Federal spending, I concur in the Senate position that a 3.1-percent COLA is the appropriate adjustment.

If, in future years, there is again a disparity between the amount of the Social Security COLA and the VA compensation COLA we enact before the amount of the Social Security COLA is known, I would certainly carefully and sympathetically consider the need and justification for a restoration of the percentage-point difference in establishing the rate of a subsequent compensation increase.

EMERGENCY VETERANS' JOB TRAINING ACT AMENDMENTS

Mr. President, in addition to providing for these increases in VA compensation and DIC benefits, our amendment would extend, improve, rename, and authorize new appropriations for the Emergency Veterans' Job Training Act of 1983 (EVJTA) enacted as Public Law 98-77. A number of the provisions in the amendment are derived from legislation I introduced on October 3, S. 1733, the proposed "Veterans' Job Training Amendments of 1985." Joining with me as cosponsors of that measure—which was designed to extend, make improvements in, and authorize the appropriation of additional funds for EVJTA are the distinguished Senator from Massachusetts [Mr. KERRY] as well as three of my fellow members of the Veterans' Affairs Committee, the distinguished Senators from Hawaii [Mr. MATSUNAGA], Arizona [Mr. DECONCINI], and West Virginia [Mr. ROCKEFELLER], which were incorporated into an amendment that Chairman MURKOWSKI and I offered on the floor to S. 1887, the proposed "Veterans' Compensation and Benefits Improvements Act of 1985," which the Senate approved on December 2.

As the original Senate author of Public Law 98-77—along with the distinguished former chairman of the committee [Mr. SIMPSON]—and of the extension of the program enacted last year in Public Law 98-543, I am intensely interested in this job training program. Indeed, on July 30, I joined with the distinguished chairman of the committee [Mr. MURKOWSKI] in offering an amendment that was approved by the Senate in the veterans' health bill—S. 876—to extend the period of time that veterans have to enter training under this job training program. A provision derived from our amendment that would extend that period until July 1, 1986, was incorporated into S. 1671 and signed into law on Monday, September 30, as Public Law 99-108.

CURRENT STATUS OF PROGRAM

Mr. President, the EVJTA Program provides cash incentives to employers to hire and train certain long-term unemployed Vietnam-era and Korean-conflict veterans. It has at the present time expired in one respect. The period during which veterans could apply for participation in an EVJTA job training position expired on February 28, 1985. However, as I noted, the period during which veterans who have been certified as eligible for the program may enter training, which had expired on September 1, 1985, has been extended to July 1, 1986, by virtue of the enactment of Public Law 99-108, enacted on September 30, 1985.

EVJTA originally authorized the appropriation of $150 million for each of 2 fiscal years—1984 and 1985. However, only $150 million was appropriated for fiscal year 1984—approximately $142 million of which was made available for the implementation of the job training program itself. The program presently has a carryover balance from that $150 million appropriation of some $15-20 million, which is being used to place previously certified eligible veterans. Since September 30, when the program was reopened for previously certified veterans, more than 750 veterans have been placed in training positions through the use of these carryover funds.

Since its inception, more than 403,500 applications were received from veterans for participation in training under EVJTA, and almost 52,900 employers have been approved for more than 124,000 job slots. More than 37,000 veterans have entered into training under EVJTA. According to an evaluation of the program—carried out under contract with the Veterans' Administration—those who completed the program had an average hourly wage of $6.77; the completion rate for veterans who entered training under the program was estimated to be 44 percent; and the direct cost of training per participant was estimated to be $3,000.

NEED FOR LEGISLATION

During the Senate's consideration of S. 876 on July 30, the distinguished Senator from Massachusetts [Mr. KERRY] raised the issue of further extending and expanding the EVJTA Program, and the Chairman and I expressed certain reservations about proceeding with extension legislation at that time. (CONG. REC., S10395, July 30, 1985.) The result was an agreement which led to the Committee's September 12 hearing regarding the program. Senator KERRY testified very movingly and persuasively. All testimony, except for that of the Administration, urged extension of the EVJTA Pro-

gram. After careful consideration of the issues raised at that hearing, I concluded that more can and should be done under EVJTA but that certain program improvements were called for before we extend the program or provide further funding.

Thus, the measure we introduced on October 3 would reopen the program for new applications by eligible veterans and would also make a number of improvements in the program designed to overcome program weaknesses revealed by our hearings and the VA program evaluation—especially the high veteran drop-out rate—and to take into account empoyers' general satisfaction with the program.

On October 24, the distinguished Chairman introduced S. 1788, the proposed "Veterans' Benefits and Improvements Act of 1985", which contained his proposal for an extension of the program. We then worked together closely in developing the provisions that were, by virtue of our floor amendment to S. 1887, approved by the Senate on December 2.

Subsequently, during negotiations with the House Committee on Veterans' Affairs on S. 1887, H.R. 1408, H.R. 2343, and H.R. 2344, a compromise was developed, with respect to EVJTA, between the House-passed EVJTA bill, H.R. 1408, and the Senate's provisions. The amendment we are offering now embodies that compromise, which I would like to describe briefly.

AUTHORIZATION OF APPROPRIATIONS

First, Mr. President, our amendment would authorize the appropriation of $65 million for fiscal year 1986—to remain available through fiscal year 1988—for the EVJTA program. The House figure was $75 million and the Senate figure was $55 million. We split the difference. The Senate figure of $55 million when added to the President's fiscal year 1986 budget estimate for fiscal year 1986 outlays for the program, $35 million, approximated the amount estimated in that budget for fiscal year 1985 outlays under EVJTA, $88 million.

EXTENSION OF PERIODS TO APPLY FOR PARTICIPATION AND TO ENTER TRAINING

Second, the amendment contains the Senate-passed provisions from S. 1887 that would—effective on February 1, 1986—provide an additional year for veterans to apply for participation in the program and an additional 18 months for veterans to enter into job training programs under the Act. The amendment would further provide—as did the Senate bill—that in the event new funding for the program were not made available to the VA by OMB by February 1, these periods would be extended for a period of time equal to the period between that date and the date on which funds are made available.

PREVIOUSLY CERTIFIED ELIGIBLE VETERANS

One of the concerns I raised during the Senate's consideration of S. 876 and at the committee's hearings on September 12 was that a reopening of the program to new applicants would have the effect of causing those veterans already in the EVJTA pipeline who had not yet been placed in training—principally because they were more difficult to place—to be bypassed by VA and Department of Labor personnel involved with implementation of the program, including disabled veteran outreach specialists and local veterans' employment representatives, and by employers who would focus on veterans who are easier to place and more job ready. As I previously noted, under current law, veterans were required to apply for participation in the EVJTA Program by February 28, 1985, and, by virtue of the enactment of Public Law 99-108, have until July 1, 1986, to enter training. Setting the effective date at February 1 for the reopening of the program for new applicants, as our amendment would do and as the Senate bill did—coupled with permitting entry into EVJTA training by veterans who had certifications of eligibility but who have not yet been placed—is designed to enable the VA and the Department of Labor to direct their efforts for the next 2 months to assisting those veterans who are likely to be those most in need of employment assistance—those who are not job-ready and who have hardcore unemployment difficulties.

Mr. President, it should be noted that those veterans who have been certified for the program, who are still unemployed, and who have not yet been placed in training under EVJTA are quite likely to have special problems in obtaining and retaining employment. Not surprisingly, the VA's evaluation of the program found that employers tended to select the most employable among the veterans certified for program participation. Thus, I concluded that the VA and the Department of Labor needed to strengthen their efforts to assist veterans under EVJTA during the recently enacted extension and will need to explore ways to provide special types of assistance, particularly in the area of employment counseling to reduce the disturbingly high noncompletion rate. I have strongly urged both agencies to do a better job in this area.

Also, during an October 3 hearing of the Veterans' Affairs Committee I recommended to the VA's Chief Benefits Director, John Vogel, and he agreed with my recommendation that the VA send a letter to all certified veterans who had not yet been placed in training positions under EVJTA advising them the deadline for entering training had been extended and urging them, if they are still interested in the program, to contact the VA or the Department of Labor for assistance. Such an initiative was carried out and completed by the end of October. And as I previously noted, more than 750 veterans have been placed in training since the program reopened on September 30.

EFFORTS TO REDUCE THE "DROPOUT" RATE

Third, the amendment would, as did the Senate bill, respond to the unacceptably high drop-out rate for veterans placed in training positions by requiring the Labor Department to provide two new support activities: First, counseling services designed to resolve difficulties encountered by veterans during EVJTA training, and, second, a program under which periodic contact would be maintained with veterans placed in training in order to facilitate their successful completion of training.

In carrying out these new activities, the Labor Department would be required to advise all veterans and employers participating in EVJTA of the availability of the counseling services and encourage them to request appropriate services whenever necessary. In addition, the Labor Department would be required to advise each veterans placed in training of other related counseling services and assistance and encourage them to request such services and assistance whenever appropriate. This information should include information on counseling services available through the VA—including the VA's readjustment counseling, Vet Center Program, for Vietnam-era veterans—and through other appropriate agencies in the community.

In connection with the requirement to maintain periodic contact with veterans placed in training, I want to point out that an individual assigned to maintain such contact need not be, in each case, a trained or professional counselor. Rather, efforts should be made in the selection of the individual assigned as a "contact person" to a particular veteran to base the selection on the particular needs of that veteran.

In this connection, I note that the Labor Department has the resources of more than 3,300 DVOP's and local veterans' employment representatives that could be asssigned responsibilities for implementing this requirement and am delighted that the Department has already taken steps to develop a case manager approach with respect to veterans placed in training. Also, I note that it may also be advantageous for the Secretary of Labor to arrange with the VA for use of a VA employee or employees to serve as the contacts in certain locations in appropriate circumstances.

Fourth, Mr. President, our amendment would, as did the Senate bill, reduce the period of unemployment required to establish eligibility for par-

ticipation in the program—from 15 of the 20 weeks immediately prior to making application to 10 of the 15 weeks.

Finally, Mr. President, our amendment would change the name of the program to the "Veterans' Job Training Act", as did the Senate bill.

INTEGRATION WITH VA VOCATIONAL REHABILITATION PROGRAM

In addition to these improvements in the EVJTA authority, the amendment contains another provision derived from my proposal contained in S. 1733 and passed by the Senate in S. 1887. With respect to the VA's program of vocational rehabilitation for service-connected disabled veterans under chapter 31 of title 38, the VA would be required—for the benefit of participants in that program who are eligible to have payments made to employers in their behalf, pursuant to section 1516(b) of title 38—to take all feasible steps, utilizing section 1516(b) payments, to establish and encourage the development of training opportunities that are consistent with the provisions of EVJTA.

The VA's chapter 31 Vocational Rehabilitation Program is designed to assist service-connected disabled veterans who have employment handicaps to become employable and to obtain and maintain suitable employment. Under the section 1516(b) authority, the administrator may make payments to employers for providing on-job training to service-connected disabled veterans who have been rehabilitated to the point of employability when such payments are necessary in order for the veteran to obtain needed training or begin employment.

Pursuant to this authority, the VA has established a special chapter 31 Employer Incentives Program to facilitate the placement of veterans who are generally qualified for suitable employment but who lack work experience required by an employer or who are difficult to place due to their disabilities. Under this program, an employer who hires an eligible veteran in an approved training position may be reimbursed for the direct expenses of hiring the veteran, up to one-half of the wages paid to the veteran.

Under the amendment, the Administrator would be required to utilize EVJTA-approved job training programs under this segment of the VA's chapter 31 Vocational Rehabilitation Program and to ensure that, in the case of a veteran who is eligible for participation in both programs, maximum efforts are made, consistent with the veteran's best interests, to utilize the title 38 authority. In this manner, the VA would be able to use a program, EVJTA, with which employers are already familiar, for the benefit of VA chapter 31 vocational rehabilitation trainees and to make maximum use of title 38 benefits in lieu of limited EVJTA funds.

DELETION OF VETERANS' JOB TRAINING FUNDING FROM THE CONTINUING RESOLUTION

Clearly, enactment of an authorization of fiscal year 1986 appropriations for EVJTA is now imminent. As a result of the fine work of the distinguished Senator from Arizona [Mr. DECONCINI], a member of both the Veterans' Affairs Committee and the Appropriations Committee, who succeeded in persuading the Appropriations Committee to adopt our amendment to provide $55 million in fiscal year 1986 funding for continued operations under EVJTA, the Senate had approved new funding for the program in the third continuing resolution, for fiscal year 1986, House Joint Resolution 465. Unfortunately, these funds were rejected by the House of Representatives.

I regret very much, Mr. President, that support for our funding provision to help unemployed veterans was not forthcoming from the other body and that the funds were, consequently, deleted from the conference agreement. By seeking to make the additional funds available in that continuing resolution, we were seeking to ensure that, when the program reopens on February 1, 1986, pursuant to this legislation, sufficient resources would be available to serve the eligible veterans who seek to participate. It is thus most unfortunate that the House and Senate conferees chose to drop the Senate amendment. However, I pledge to do all that I can to secure the necessary funding as soon as possible in the Second Session.

STATUS OF NEGOTIATIONS REGARDING OTHER VETERANS' LEGISLATION

Before concluding my remarks on this measure, Mr. President, I want to comment on the negotiations between the House and Senate Committees on Veterans' Affairs over the numerous differences between our compensation, education, and other VA benefit measures embodied in S. 1887 and H.R. 1408, H.R. 2343, and H.R. 2344. I regret to note that those negotiations have reached an impasse over certain provisions in the Senate bill—now endorsed by the administration—designed to improve, and enhance the fiscal stability of, the Home-Loan Guaranty Program. As a result of that impasse, it has become clear that further action on the remaining provisions of S. 1887 will not be possible this year.

Thus, Mr. President, there are a number of provisions in which I was deeply interested that are not included in any legislation to be sent to the President this year. These include the following provisions of S. 1887 as it was passed by the Senate on December 2.

Section 108 of S. 1887—which is derived from Senate Concurrent Resolution 20, which I introduced on February 26—would declare the sense of the Congress that VA compensation should remain exempt from Federal income taxation. A majority of the U.S. Senate—52 Senators, 11 from our committee—has now endorsed this measure.

Sections 203 and 204 of S. 1887—which were derived from S. 1509, which I introduced on July 26 with Senator COHEN and which is cosponsored by Senators BUMPERS, MITCHELL, and PRYOR—would permit "New GI Bill"—chapter 30 of title 38, United States Code—benefits to be used for home-study and would add responsibility for monitoring the "New GI Bill" Program to the responsibilities of the VA's Advisory Committee on Education. In addition, section 201 contains provisions derived from S. 962, which Sentor COHEN and I introduced on April 22 and which is cosponsored by Senators MITCHELL, BUMPERS, and ROCKEFELLER, to permit veterans training under the "New GI Bill" Program to use their benefits for VA on-job training and apprenticeship programs.

Section 501 of S. 1887—which is derived from S. 1397, the proposed "Veterans' Administration Reorganization Act of 1985," which I introduced on June 27 and which is cosponsored by Senator MATSUNAGA, DECONCINI, and ROCKEFELLER—would provide necessary clarification in section 210(b)(2) of title 38 regarding the "detailed plan and justification" that the VA is required to provide to Congress with respect to certain substantial proposed reorganizations in advance of implementing them.

Section 502 of S. 1887—which is derived from section 2 of S. 6, the proposed "Veterans' Administration Health-Care Amendments of 1985," my bill introduced on January 3, 1985—would expand the definition of the "Vietnam era" for the purpose of veterans benefits and services under title 38, United States Code, to include the period beginning on February 21, 1961, and ending on August 4, 1964, in the case of those who served in Vietnam during that time.

Section 503 of the S. 1887—which is derived from section 6 of S. 6—would specify that, effective with respect to VA pensions paid on or after January 1, 1986, any remuneration provided to veterans for participation in certain VA work-therapy programs will not be counted as income for purposes of VA pension programs.

Section 202 of S. 1887 incorporated an amendment I proposed to amend the "New GI Bill" to correct an inequity that would exist in the cases of individuals who were made eligible, by the recently enacted Department of Defense Authorization Act, 1986, Public Law 99-145, both for the chapter 34, Vietnam-era GI bill and for the "New

GI Bill' and who had left the service and reentered prior to the enactment of the "New GI Bill."

S. 1887 also included, in section 205, our suggestion to permit economically disadvantaged individuals training under the "New GI Bill" program or the chapter 32 VEAP Program to participate in the VA's Work-Study Program. As the original author in 1972 of the VA's Work-Study Program for disadvantaged, full-time veteran-students, I was and am particularly interested in getting this provision enacted.

Section 215 of S. 1887 would prohibit the implementation of any requirement for the submission of term-by-term enrollment certifications for educational assistance benefits. The OMB proposal that this provision would invalidate would, if implemented, be extraordinarily costly and time consuming for the VA and the educational institutions and would delay GI bill payments to hundreds of thousands of veterans. This year, we were proposing to put it to rest.

Section 216 of S. 1887 would establish a Commission on Veterans' Education Policy, comprised of representatives of the education community and veterans' service organizations, to be selected based on their expertise in pertinent fields, as well as ex officio representatives of the VA and the Congress. The purpose of the Commission would be to assist in identifying problem areas that need to be explored and in developing possible solutions to some longstanding, complex issues involving the VA's administration of education benefits.

Finally, at my request, section 306 of S. 1887 would provide permanent authority to transfer funds from the direct loan revolving fund to the loan guaranty revolving fund.

Mr. President, during the Senate's consideration of S. 1887, I discussed in detail each of these provisions, and my statement on that measure appears at page S16634 of the CONGRESSIONAL RECORD for December 2. At this time, I want to stress my intention to continue to pursue these matters at the earliest appropriate opportunity in the second session of this Congress and express my deep regret at our failure to be able to reach agreement on the larger package.

CONCLUSION

Mr. President, before closing, I want to take the opportunity again to note the leadership and commitment of the distinguished Senator from Massachusetts [Mr. KERRY] in the development of this legislation. As I previously noted, he first raised this issue in July and has been a vital participant in developing the EVJTA provisions.

I want especially at this time also to thank the minority staff of the Veterans' Affairs Committee, Babette Polzer, Ed Scott, and Jon Steinberg, for their fine work on this bill over the last few weeks and months. My gratitude also goes to the Senate majority staff, Chris Yoder, Julie Susman, and Tony Principi, for their hard work and cooperation on this measure.

I also wish to note the contributions of the staff of the House Committee on Veterans' Affairs, particularly Jill Cochran, Mack Fleming, and Rufus Wilson, in working with us to reach agreement on the EVJTA provisions.

Mr. President, I urge the Senate to approve the pending amendment.

Mr. THURMOND. Mr. President, I am happy to join Senator MURKOWSKI and others as a cosponsor of the Senate amendment to H.R. 1538. This important substituting amendment would make three changes to the House version of the bill.

The first change would be to give the legislation a new title. The bill would be referred to as the "Veterans' Compensation Rate Increase and Job Training Improvements Act of 1985."

The second change, more substantive than the first, would provide for a 3.1 percent cost-of-living adjustment for veterans' compensation and pension benefits as opposed to the House increase of 3.4 percent. The increase would be made retroactive to December 1, 1985. Now I don't desire for anyone to believe that the House of Representatives cares more for this Nation's veterans that I do, but the 3.1 percent increase in benefits, which the Senate has already passed once this session, is based on the Consumer Price Index and is equal to the increase agreed upon for Social Security recipients. I think that a 3.1 percent increase is fair and I am happy to see that we are able to provide it for our needy veterans.

Finally, the Senate amendment would provide for the extension and expansion of the Emergency Veterans' Job Training Act. I suggested to the chairman of the Veterans' Affairs Committee earlier this year that we move ahead with this measure. The Senate approved such action when it passed S. 1887 on December 2. Unfortunately, an agreement on that comprehensive piece of legislation has not been reached with the House. We have been able to agree, however, on the wisdom of expanding this program and providing for some type of cost-of-living adjustment.

Mr. President, I urge my colleagues to support our amendment in order that we can continue to provide our veterans with the benefits so many of them need and deserve.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1433) was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Without objection, the title is amended.

OFFICE OF JUVENILE JUSTICE AND DELINQUENCY PREVENTION

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of S. Res. 278, dealing with the Office of Juvenile Justice and Delinquency Prevention, and I ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 278) to disapprove the freeze on funds for the Office of Juvenile Justice and Delinquency Prevention.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. DENTON. Mr. President, I rise in strong support of Senate Resolution 278, a resolution introduced by the distinguished chairman of the Judiciary Subcommittee on Juvenile Justice, Senator SPECTER, which disapproves the current informal freeze of funds of the Office of Juvenile Justice and Delinquency Prevention [OJJDP]. I am pleased to join as a cosponsor of this effort.

Mr. President, on Friday, December 13, the very same day that President Reagan signed H.R. 2965 the Commerce, Justice and State Departments appropriation bill, which appropriated 1986 funds for OJJDP, the Justice Department upon the informal recommendation of the Office of Management and Budget, froze all OJJDP funds for a 45-day period at the end of which time a formal request for a rescission will be filed with the Congress.

In some quarters Friday the 13th is viewed as a very unlucky day. Little did we know how unlucky this particular Friday the 13th would be for the Nation's children.

Since Friday, my office has received countless calls from various organizations in Alabama and nationwide, which presently are recipients of

OJJDP grants. The calls relay the concern that a freeze of funds will lead to the destruction of numerous juvenile justice projects; a destruction which will slow, if not reverse, the tremendous strides made by the States in the deinstitutionalization of status offenders and the removal of juveniles from adult jail facilities. Officials in Alabama have indicated that the freeze will force the immediate shut down of approximately 90 percent of the juvenile justice projects in the State and will severely affect the State's compliance with the removal of juveniles from adult jail facilities.

Mr. President, in light of the current budget situation we are all fully aware of the need to trim individual budgets. I am sure that the juvenile justice community is willing to carry its share of budget cuts. But we must not balance the budget by disproportionately burdening juvenile justice. We must continue to keep the protection of this Nation's children a priority.

Therefore, I support Senate Resolution 278, and I commend Senator SPECTER for his leadership since 1981 in preventing the zero funding, rescission or deferral of OJJDP funds. I urge my colleagues to support the resolution and move for its expeditious consideration.

Mr. HOLLINGS. Mr. President, since 1971, I have been a member of the Appropriations Subcommittee that has jurisdiction over the funds for the Department of Justice. For the last 9 years, I have been either the chairman or the ranking minority member of the subcommittee and am well-acquainted with the Juvenile Justice, Regional Information Sharing, and the Justice Assistance Programs. This is not the first time that the Department has tried to cut off these programs but never before have we seen such a cruel impoundment procedure being instigated just before Christmas.

In view of the previous experience, we certainly expected the Department to propose that these funds be rescinded. It has been this administration's policy of proposing rescissions of appropriations that they did not originally request. But, with the Congress about to adjourn and the formal rescission not to come until the President's budget for 1987 is transmitted on February 5, 1986, the administration is proceeding in the most meanspirited manner possible. There are persons entirely dependent on these programs, such as the Regional Organized Crime Information Center that so ably serves our State and local law enforcement officials throughout the South and will be cut off on January 2 unless additional funds are granted.

Mr. President, Chief J.P. Strom of the South Carolina law enforcement division has told me many times of the vital assistance ROCIC provides. There are other multistate intelligence networks covering other parts of the Nation. ROCIC provides valuable intelligence, equipment and communications support to our police out on the front lines of the war on drug traffickers. These are the unsung heros of the daily battles against crime and they should have our full support. Instead, the Department of Justice is giving a Christmas present to the criminals by telling them to close their offices.

Congress may conclude that these programs must be reduced, but during the interim, these programs should be maintained until Congress can act. I recall that we continued the funding of the Department of Justice from October until December 13 when the President approved the fiscal 1986 appropriations bill. Fairness demands that provision be made for these grantees.

I have heard that some in the Department of Justice have indicated that this impoundment is due to Gramm-Rudman-Hollings. Nothing could be further from the truth. Gramm-Rudman-Hollings is based on reducing all programs, alike, and does not zero out some to preserve the funding of others.

Mr. HEFLIN. Mr. President, I join my colleagues in expressing my extreme concern about the Department of Justice's current freeze on funding for the Bureau of Justice Assistance, the Regional Information Sharing System, and other Department of Justice programs.

Congress has repeatedly rejected attempts by the Department of Justice to limit or eliminate these vital programs. It appears that the Reagan administration is now attempting to dismantle these programs through a back door method.

The Office of Justice programs is extremely valuable to the State of Alabama and the Nation. The Regional Information Sharing System provides funding for multijurisdictional investigations, specialized surveillance, investigative equipment sharing and a multitude of other programs. Without these funds, these and other necessary services would be unavailable to a great many local and State law enforcement agencies.

I urge the Department of Justice to comply with clear congressional intent and immediately release the funds for these vital programs before serious disruptions are created in our criminal justice system.

AMENDMENT NO. 1434

(Purpose: To amend S. Res. 278, to include programs coordinated by the Office of Justice Programs)

Mr. BYRD. Mr. President, I send to the desk an amendment on behalf of Mr. BIDEN.

THE PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD], for Mr. BIDEN, and Messrs. THURMOND, HEFLIN, HOLLINGS, DECONCINI, LEAHY, INOUYE, and STENNIS, proposes an amendment numbered 1434.

Mr BYRD. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

THE PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

The first section of the Resolution is amended by striking the period at the end thereof and inserting in lieu thereof:

"the Office of Justice Programs, the Bureau of of Justice Assistance, the National Institute of Justice, the Bureau of Justice Statistics, the Victims of Crime Act programs, and the Regional Information Sharing System Programs".

Mr. BIDEN. Mr. President, I commend Senator SPECTER's efforts to alert the Senate of this action taken by the Department of Justice. The Senate must strongly and quickly express its objections to the Department of Justice freezing funds for law enforcement and juvenile justice programs supported by the Congress.

The manner in which the Justice Department, in the closing days before the congressional recess proposes to terminate or stop funding for valuable law enforcement and juvenile justice programs is a slap in the face to Congress and State and local criminal justice agencies.

As the ranking member of the Judiciary Committee and strong supporter of the juvenile justice program, I have worked in committee and on the floor to block repeated efforts by the President to eliminate funds for the Office of Juvenile Justice and Delinquency Prevention and State and local law enforcement.

I propose to make clear to the Department of Justice and Office of Management and Budget that the Senate is strongly opposed to freezing funds to any of the State and local juvenile justice or law enforcement assistance programs.

Therefore, I offer an amendment supported by Senator THURMOND and others that expands this resolution to include all law enforcement and juvenile justice programs for which Congress has appropriated funds.

I ask all my colleagues to support this amendment and Senator SPECTER's resolution which will send a clear message to the Department of Justice and the Office of Management and Budget of the Senate's continued support for juvenile justice and law enforcement programs both State and local.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1434) was agreed to.

Mr. DENTON. Mr. President, I rise in strong support of S. Res. 278, a resolution introduced by the distinguished chairman of the Judiciary Subcommittee on Juvenile Justice, Senator SPECTER, which disapproves the current informal freeaze of funds of the Office of Juvenile Justice and Delinquency Prevention (OJJDP). I am pleased to join as a cosponsor of this effort.

Mr. President, on Friday, December 13, the very same day that President Reagan signed H.R. 2965 the Commerce, Justice and State Departments appropriations bill, which appropriated 1986 funds for OJJDP, the Justice Department upon the informal recommendation of the Office of Management and Budget, froze all OJJDP funds for a 45-day period at the end of which time a formal request for a rescission will be filed with the Congress.

In some quarters Friday the 13th is viewed as a very unlucky day. Little did we know how unlucky this particular Friday the 13th would be for the Nation's children.

Since Friday, my office had received countless calls from various organizations in Alabama and nationwide, which presently are recipients of OJJDP grants. The calls relay the concern that a freeze of funds will lead to the destruction of numerous juvenile justice projects; a destruction which will slow, if not reverse, the tremendous strides made by the States in the deinstitutionalization of status offenders and the removal of juveniles from adult jail facilities. Officials in Alabama have indicated that the freeze will force the immediate shutdown of approximately 90 percent of the juvenile justice projects in the State and will severely affect the State's complance with the removal of juveniles from adult jail facilities.

Mr. President, in light of the current budget situation we are all fully aware of the need to train individual bedgets. I am sure that the juvenile justic community is willing to carry its share of budget cuts. But we must not balance the budget by disproportionately burdening juvenile justice. We must continue to keep the protection of this Nation's children a priority.

Therefore, I support S. Res. 278, and I commend Senator SPECTER for his leadership since 1981 in preventing the zero funding, rescission or deferral of OJJDP funds. I urge my colleagues to support the resolution and move for its expeditious consideration.

Thank you, Mr. President.

Mr. MCCONNELL. Mr. President, I join in the resolution of the Senator from Pennsylvania, and urge my colleagues to support it as well. In my judgment, the attempt by the administration to rescind the 1986 funding for the Office of Juvenile Justice and Delinquency Prevention should be soundly rejected. Similar attempts have been made in the past, and each has been disapproved.

Mr. President, last summer the members of the Subcommittee on Juvenile Justice, under the able leadership of Senator Specter, advised OJJDP that it was the unanimous judgment of the subcommittee members that all unspent funds from fiscal year 1985 appropriations for that office should be spent, as directed by the act. In a letter dated November 21, 1985, we advised the distinguished acting chairman of the Subcommittee on Commerce, Justice, State, the Judiciary and Related Agencies, that we believed that all funds for OJJDP should be retained by the Senate conferees. In that letter, we noted as follows:

As you know, the conference report prepared by the Committee on Appropriations to accompany H.R. 2965, the Department of Commerce, Justice, and State, the Judiciary, and related agencies appropriation bill for fiscal year 1986, would provide for new appropriations to the Office of Juvenile Justice and Delinquency Prevention of only $62,100,000. This amount would be combined with some $7,900,000 in unobligated balances of funds previously appropriated to that office. In this way, the Administration seeks to provide a total appropriation for OJJDP of $70,000,000 for fiscal year 1986.

While this is characterized by the Administration as level funding for OJJDP, we see it as a cut of nearly $8,000,000 in the level of appropriations from the previous year, a significant and unwarranted cut in the funding for this important office.

When the Appropriations Committee's report on this bill goes to conference with the House, we respectfully request that you advise the Senate conferees that the Senate should concur with the House provision of the bill, providing for funding of the Office for fiscal year 1986 at the same level as 1985 and appropriate $70,000,000. In addition, we would ask that you advise the Senate conferees that it is the Subcommittee's belief that the $7,900,000 of funds previously appropriated and now available in unobligated balances should be redirected to the states, as currently provided for in the Senate report.

Mr. President, those letters represent the unanimous judgment of the members of the Juvenile Justice Subcommittee that the programs funded by OJJDP are vitally important, and are deserving of full funding. Happily, the Members of this body have uniformly agreed with that assessment.

Nevertheless, now the Office of Management and Budget has informally recommended to the Department of Justice the rescission of all fiscal year 1986 appropriations for the Bureau of Justice Assistance [BJA], OJJDP, and other programs. The Justice Department sought a reconsideration of the proposed rescission of appropriations for BJA. The Department did not, however, seek to avoid the rescission request as to OJJDP funds. As a result, the administration has ordered OJJDP not to spend any of its funds until the rescission issue is resolved, notwithstanding that Congress has not yet received a formal notice of a proposed deferral or rescission of OJJDP funds pursuant to the Impoundment Control Act of 1974. A formal rescission notice from the Administration is not expected to be received by Congress until the end of January 1986, at which time the 45-day time period begins for congressional action. Consequently, a variety of important programs nationwide stand to be disrupted, notwithstanding the clear congressional intent.

Mr. President, I understand the administration's position on funding for OJJDP, and while I support the administration whenever possible, on this issue I disagree most stridently. These programs are necessary, these funds are appropriate, and this resolution is a good one. I urge my colleagues to help defeat this latest attempt to delete these funds for children and adolescents who are in need.

Thank you, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 278), as amended, was agreed to, as follows:

S. RES. 278

Resolved, That the Senate hereby disapproves the current informal freeze, in the absence of a formal rescission request, on funds of the Office of Juvenile Justice and Delinquency Prevention, the Office of Justice Programs, the Bureau of Justice Assistance, the National Institute of Justice, the Bureau of Justice Statistics, the Victims of Crime Act programs, and the Regional Information Sharing System Programs.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SENATE SCHEDULE

Mr. DOLE. Mr. President, it is my understanding that we are about to receive the papers on reconciliation. I can advise Members that there is a 30-minute time agreement, provided we receive the papers first. The yeas and nays have been requested on the conference report.

I also advise that there will be a rollcall vote on the Scanlon nomination, and I am not certain how much longer that will take. It was our hope that we could have the votes back-to-back, so that Members could catch airplanes and do other things. That may not be possible.

So Members are on notice that there will be another vote some time before we finish our business.

Mr. President, I understand that the distinguished Senator from Colorado is prepared to make his opening statement while we are waiting for the sig-

nature sheets, and that would save time, so I yield the floor.

Mr. ARMSTRONG. If that is agreeable to the majority leader and to the Senator from Louisiana, who I believe will be managing the conference report for the minority, while this does not technically count against the 30 minutes, my disposition is not to use the 30 minutes but to proceed as quickly as possible.

Mr. JOHNSTON. Mr. President, I agree with my distinguished colleague from Colorado.

OMNIBUS BUDGET RECONCILIATION—CONFERENCE REPORT

Mr. ARMSTRONG. Mr. President, I send to the desk a conference report on H.R. 3128, the Consolidated Omnibus Budget Reconciliation Act of 1985, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3128) to make changes in spending and revenue provisions for purposes of deficit reduction and program improvement, consistent with the budget process, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Colorado [Mr. ARMSTRONG]?

There being no objection, the Senate proceeded to consider the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

Mr. ARMSTRONG. Mr. President, I have sent to the desk a conference report on the reconciliation bill for fiscal year 1986. I am pleased to do so on behalf of Senator DOMENICI, who is unavoidably away from the Chamber today, and to report to my colleagues that this legislation implements many of the savings proposed in the first concurrent budget resolution agreed to by Congress on August 1. It will save $20.5 billion in fiscal 1986 and $83 billion over the next 3 years.

Mr. President, this conference report actually comprises the work of 31 subconferences and the fruits of negotiations over the past several weeks—indeed, the past few hours—on literally hundreds of provisions covering the jurisdiction of virtually every committee of the House and Senate.

Mr. President, I ask unanimous consent to have printed in the RECORD a table summarizing the major provisions of the conference report and the savings associated with each of the subconferences.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PRELIMINARY BUDGET RECONCILIATION SAVINGS

[In millions of dollars]

	Fiscal year—			Total fiscal year 1986–88
	1986	1987	1988	
Conference totals:				
Reductions in outlays	−17,696	−22,577	−28,764	−69,036
Increase in revenues	2,819	5,011	6,172	14,002

Subconference No. 31—Restore retirement funds: Restore social security retirement funds				
ADDENDUM				
Total reconciliation savings	−20,515	−27,588	−34,936	−83,038
Differences between total reconciliation savings and savings in the conference bill:				
Interest impact of agricultural credit reforms [2]		105	348	453
Interest impact of debt forgiveness [2]	1,884	2,285	2,711	6,880
Ship construction differential subsidies [3]	200			200
Pay offsets in function 950 [4]	203	363	439	1,005
Walsh-Healey overtime provision [5]	60	265	490	815
SBA interest offset [2]		25	91	116
Total, difference	2,347	2,938	3,731	9,016
Savings in the conference bill	−18,168	−24,650	−31,205	−74,022

[1] Less than $500,000.

[2] Interest offsets related to agriculture credit savings, public housing debt forgiveness and SBA business loans were not assumed in the resolution reconciliation instructions and are therefore not counted in total reconciliation savings. These offsets are included in the scoring of the conference bill.

[3] Savings from ship construction differential subsidies were achieved through administrative action. However, these savings were assumed in the reconciliation instructions and both House and Senate reconciliation bills included language affirming the Secretary of Transportation's authority to receive CDS payments. Therefore these savings are included in total reconciliation savings but are not included in the scoring of the conference bill.

[4] Reconciliation instructions for provisions relating to pay adjustments and the extension of the 2,087-hour workyear calculation did not assume offsets in function 950, offsetting receipts. These offsets are therefore not included in total reconciliation savings but are included in the scoring of the conference bill.

[5] The Walsh-Healey overtime provision was contained in the Senate and House-passed reconciliation bills and in the defense authorization bill. It was enacted first in the defense authorization bill, Public Law 99–145. Because these savings were assumed in the reconciliation instructions, they are included in total reconciliation savings but are excluded from the estimate of the conference bill.

Note.—All outlay estimates on this table are based on preliminary estimates from the Congressional Budget Office. All revenue estimates are based on preliminary estimates from the Joint Committee on Taxation. Changes are measured against the fiscal year 1986 budget resolution baseline and assume a Dec. 31, 1985, effective date unless otherwise stated in the legislative language.

Mr. ARMSTRONG. In brief, Mr. President, when the Senate considered the reconciliation bill, we achieved a saving of $21.4 billion for 1986, $28.4 billion in fiscal year 1987, $35.9 billion in projected savings for fiscal year 1988—a total for the 3 years of $85.7 billion.

I would have to say a word of compliment to those who negotiated through the subconferences on behalf of the Senate because the final figures which we have achieved in this conference report are extraordinarily close to the targets set by the Senate. In total we are within $2 billion in 3 years of the sought-to-achieve reconciliation bill. We come up with the final total projected savings of $83 billion.

Let me just mention a couple of specific aspects of it.

Last May 10 at about 3:30 a.m. in the morning we passed the comprehensive budget resolution. The Senate sought to freeze the defense budget along with most of the cost-of-living adjustments. The budget resolution which was adopted that morning, as my colleagues will remember, eliminated about a dozen Federal programs and would have reduced deficits by $300 billion over 3 years.

This was a tough budget. It was a tough vote for most Senators. It was a plan which will withstand the test of time because it was fair. It was the right thing to do.

But as my colleagues know, the budget we passed on that morning has not come to pass and I am not going to go back and relitigate that or conjure up old demons, but after several difficult days in July the hope of deep spending cuts was dashed and the Senate was left with the task of trying to pick up the pieces.

I know that Senator DOMENICI particularly had hoped we would accomplish much more than we did this year, and I shared that hope, but under much less than optimum circumstance the decision was made to press ahead with the reconciliation process and get the most we could get and get something instead of nothing.

So I do not mean to minimize what we have. It is not everything we would like to have, but I do not believe it is either enough to fully accomplish the job ahead.

Mr. President, may I also observe that the reconciliation bill contains some provisions which I do not personally support and which I know that other Senators may not prefer, and indeed, which may not enjoy the support of the President, but it is like all major legislation, the product of negotiation and compromise among different interests. It is a product that while not perfect will save an extraordinary, indeed a stupendous amount of money over the next 3 years, $83 billion.

Now that the Gramm-Rudman Deficit Reduction Act is the law of the land, the stage is set for us to get the job done beginning in January, but this reconciliation bill is an important, indeed a critical prelude to that process because if we were to fail to enact this conference report there would be $83 billion more on the table against which Gramm-Rudman would have to operate. So this is really an important step for us, even though it is not in any sense the final step.

Mr. President, I see on the desk a stack of papers. May I inquire is that the final paperwork? If not, then let me just conclude my remarks and yield to my colleague from Louisiana.

I wish to close by recognizing the invaluable leadership and participation of our colleague, Mr. JOHNSTON, who has stepped forward to manage on behalf of the minority party in the absence of Senator CHILES, who we trust is recovering from his surgery and who we all hope will be back to pick up his role of leadership in this task next month.

I spoke to Senator CHILES a while back, and it sounded as though he was on the mend and doing well and probably doing better tonight, I would say to my colleagues, than we are. We miss him. But the Senate is fortunate that Senator JOHNSTON has been here to pick up this task.

I also wish to extend my personal thanks to the Budget Committee, especially the director, Steve Bell; the deputy director, Bill Hoagland; Richard Brandon; and many others who have worked literally day and night to bring us to this stage and deserve not only our thanks but indeed our compliments.

Mr. President, pending the arrival of the paperwork, I yield the floor and hope that my colleague from Louisiana will also have something to say about this conference report.

Mr. JOHNSTON. Mr. President, I thank my distinguished colleague for his generous remarks.

Mr. President, the distinguished Senator from Colorado [Mr. ARMSTRONG] has stepped in at a very crucial time in the reconciliation process and I think has played a key role in getting us to the point where we are.

Reconciliation has been in all its parts and in especially some of its parts like a child with a series of childhood diseases, life threatening each, and enough to make its parents despair as to whether it would pull through. Most recently it has had cancer from which we hope it will recover. It has been through diphtheria; it has been through pneumonia. It has been through the worst of diseases.

But we think finally, Mr. President, we are going to pass reconciliation here tonight and with it save $83 billion.

Mr. President, I do not speak tonight so much to my colleagues who I am quite sure will vote readily, enthusiastically, and eagerly for 83 billion dollars' worth of cuts which have been put together with such craftsmanship by those involved. I think it was a

monumental job. It is recognized as such and, as I say, it will be eagerly supported.

But my few remarks tonight, Mr. President, go really to the White House because there is a lingering rumor still that in spite of the fact that this saves $83 billion they might be so foolish as to veto this legislation.

Mr. President, I would strongly urge the President that he not do so. I think it would be a tragedy in so many ways for the country and certainly for the Gramm-Rudman process.

This does, in fact, save $69 billion over 3 years in outlay cuts and $14 billion in revenues, for a total of $83 billion or $5 in spending cuts for every $1 in revenues.

There are $69 billion in outlay cuts in domestic programs, and if this is not passed, Mr. President, and I say that to the President in this body and also to the other President also, that $69 billion has to come half from his defense and, Mr. President, he and you have both said constantly and repeatedly that national defense should not be cut by Gramm-Rudman. If this is vetoed, Mr. President, you are setting the scene for having to take half of $69 billion additionally from national defense which you would not have to do so.

Mr. President, the cuts in outlays come from all parts of the budget, $6 billion from agricultural credit, $5 billion from rural housing loans, $0.4 billion from Amtrak, $4 billion from the strategic petroleum reserve, $2.5 billion from highways, $11 billion from Medicare.

Congress has met its commitments to cut these programs in very difficult times. The revenues are not general tax increases. There are no changes in the rates. They are modest taxes at best and an extension of the tobacco tax, the excise tax; $4.9 billion is not a tax increase. It is a simple extension of that tax, and there is not anyone in this body that I know of who thinks that the tax should not at least be extended.

There are $3.5 billion for the Superfund tax. Mr. President, that is a very painful and difficult subject matter. Many of us from the petrochemical States whose States have double-digit unemployment right now think if you put the value-added tax to finance Superfund that it would take our States out of deep recession and put them directly into a depression.

If you were going to make that sacrifice for States like Louisiana and Texas for the good of the Nation it would be one thing; but it would not be for the good of the Nation, Mr. President, because it would make our whole petrochemical industry noncompetitive.

In any event, Mr. President, after a very long period of time, debate, and consideration in this Senate we came up with that modest $3.5 billion tax and certainly $83 billion in outlay savings should not be sacrificed because of some ideological disagreement with what is called a value-added tax if that in fact is what it is.

Mr. President, in January when we come back, we come back the last week in January, and by February 5 the President must submit his budget. In my judgment, when the President submits his budget for fiscal year 1987, it is going to be a very acrimonious time in this body, particularly if there are no increases in taxes in that budget and if there continue to be increases in national defense, because it is going to mean that the rest of the budget is absolutely savaged and it is not going to be that kind of atmosphere where Congress and the White House can sit down and quickly put back together this package of cuts. In fact, once Humpty-Dumpty falls off that wall, if this package is vetoed, it is going to be impossible, in my judgment, to put this Humpty-Dumpty back together again. Congress will say, "Let us let sequestration do it because half of this would come from national defense." I refer particularly to our friends in the other body. They think national defense should be cut a lot more.

And the way to do it is to do it automatically under Gramm-Rudman, under sequestration. So that is really what we are talking about at the bottom. If this bill is vetoed, then you change $69 billion in outlay domestic cuts to 50-50 domestic and defense cuts. And that is exactly what the White House is going to get if this is vetoed.

Mr. ARMSTRONG. Will the Senator yield?

Mr. JOHNSTON. I certainly will.

Mr. ARMSTRONG. Mr. President, I did not mean to interrupt the Senator's statement. It is not my desire to use further time, other than to comment briefly on the possibility that the President might veto this bill.

I have also heard the rumor around this Chamber and in the lobbies beyond this Chamber that the President might have some disposition to veto this bill. I want to say, without having any inside information and without having any real way to know this, other than just having watched Ronald Reagan's public life for a long time, that he is not going to veto this. In my judgment, it would be the most unlikely act of folly for any President, let alone President Ronald Reagan, to veto this bill. You will just never make me think he is going to do that.

I know that he does not like the value-added tax provision in here. I do not like it, either. I voted against it when it came through the Finance Committee, 16 to 2. But he is not going to veto this bill over that.

There are other things he does not like, nor do I. But, Mr. President, I associate myself with the remarks of the Senator from Louisiana in saying that what is good in this bill far outweighs those things about which we might disagree.

I am just confident that, when the President focuses on it, he is going to have his pen out to sign it and do so, I believe, not grudgingly, but, in fact, will be glad to do so, even though there may be things in there he does not fully endorse.

Mr. JOHNSTON. Mr. President, I am very pleased to see this conference report on H.R. 3128, budget reconciliation, presented to the Senate. Putting this package together of budget saving measures was a remarkable achievement for which the chairmen of the respective committees should be proud.

In particular I am pleased with the provisions in title VIII, subtitle A, which settle the longstanding and contentious dispute between the coastal States and the Federal Government over the division of the so-called 8(g) OCS revenues. This provision is a modified version of S. 1653, the Outer Continental Shelf Lands Act Amendments of 1985, which I introduced on September 17, 1985, with Senator MURKOWSKI as a cosponsor. Identical language was introduced on the same day in the House by Mr. BREAUX and Mr. HUCKABY.

Let me review what is contained in this conference report in subtitle VIII A, amendments to the Outer Continental Shelf Lands Act of 1985.

SECTION 8002, NATIONAL POLICY FOR THE OUTER CONTINENTAL SHELF

This section simply adds an additional policy to those already contained in the OCS Lands Act. In effect, the policy states that the 8(g) revenues will provide coastal States and localities with funds which States or localities may in their discretion use to mitigate adverse economic and environmental effects related to the development of OCS mineral resources.

SECTION 8003. REVISION OF SECTION 8(g)

Paragraph (1) of section 8(g) of the OCS Lands Act is amended to clarify and expand the requirements on the Secretary of the Interior to provide information to the Governor of any coastal State where nominations are solicited for leasing lands wholly or partially within three nautical miles of the seaward boundary of such State.

Paragraph (2) of section 8003 revises the 8(g) provision in current law which provided for a fair and equitable disposition of certain OCS revenues to coastal States. After the date of enactment of this subtitle any bonuses, rents or royalties received by the Federal Government which are derived from any lease of any Federal tract lying wholly or partially within 3 nautical miles of the seaward bounda-

ry of a coastal State must be deposited in a separate account in the Treasury.

The conference report uses the term "all bonuses, rents, and royalties, and other revenues (derived from any bidding system authorized under subsection (a)(1)), excluding Federal income and windfall profits taxes, and derived from any lease of any Federal tract. * * *"

The parenthetical phrase simply limits "other revenues" to include only the revenues from the current OCS bidding system and the alternative bidding systems that are set out in section 8(a)(1) of the OCS Lands Act as amended. The exclusion of Federal income and windfall profits taxes from distribution under this subtitle was already recognized in the committee report on the Senate version of this bill.

The use of the term "any Federal tract which lies wholly or partially within 3 nautical miles of the seaward boundary of any coastal State" throughout this subtitle is the means by which the Department of the Interior is foreclosed from prorationing the States' share of 8(g) revenues by surface acreage.

This paragraph also requires the States' share of the 8(g) revenues to be transmitted to the State not later than the last business day of the month following the month in which those revenues are deposited in the Treasury. While the statement of managers affirms that the Department must meet this deadline, it recognizes that the Department requires some time to process the reports from lessees to distinguish 8(g) revenues from non-8(g) revenues. We certainly expect that the Department will exercise its most diligent efforts to identify the 8(g) moneys and to either distribute the States' share immediately to the States or to invest these moneys in interest-bearing securities.

There is no question but that paragraph (2) applies to revenues derived from Federal tracts lying wholly or partially in the 8(g) zone regardless of when they were leased. The language on its face says "any lease" and makes no exclusion based on the date of the issuance of the lease itself. This is in contrast to paragraph (5) of this same section which is explicitly limited to lease sales occuring after September 18, 1978, and which addresses the situation where there is a boundary dispute between the Federal Government and the State under section 7 of the OCS Lands Act.

The legislative history on this provision confirms this logical interpretation of the plain meaning of the words on this point. On November 14, 1985, Senator EVANS offered an amendment No. 1040 to the provision on section 8(g) contained in the Senate's omnibus reconciliation bill, S. 1730. The Evans amendment would have limited the application of paragraph (2) to any lease "issued after September 18, 1978."

Senator EVANS explicitly noted that the State of Louisiana was claiming that this provision on section 8(g) in S. 1730 gives Louisiana the right to revenues in the 8(g) zone on tracts leased prior to September 18, 1978. He acknowledged, "S. 1730 supports the attempts of Louisiana to claim these additional revenues."

Senator METZENBAUM cosponsored the Evans amendment and sent out a "Dear Colleague" letter on November 12, 1985, which was devoted entirely to alerting members to Louisiana's claims that the section 8(g) provision as reported in the Senate's budget reconciliation bill would apply to revenues from leases issued before the 8(g) zone was first created by legislation, September 18, 1978. The Evans-Metzenbaum amendment was defeated by a tabling motion in a vote of 54 to 45. Furthermore, in my own statement on page S. 15437 of the CONGRESSIONAL RECORD of November 14, 1985, I acknowledged that the committee-reported provision applied to future bonuses and rents from leases whenever executed and that the provision also applied to future royalties from any leases, "whether executed before or after the 1978 amendments. . .".

So there can be no doubt about it, the Senate considered limiting the sharing of revenues with the States to only those revenues from leases executed after September 18, 1978, and declined to do so. On the House side, Representative BREAUX addressed this same point when the measure on 8(g) which he sponsored was considered on the floor on October 23, 1985, as part of the House budget reconciliation bill. He said,

> So it does provide for the past inadequate escrowing activities because of the prorationing scheme that the Interior Department came up with, including post-1978 royalties from the 8(g) tracts no matter when the lease was issued.

The same issue arose again in the House-Senate conference on budget reconciliation although the House and Senate had passed bills with essentially identical language on the point in question. Representative SHARP proposed to the House conferees that they add statement of managers language to the effect that the OCS subtitle would not apply to any revenues from tracts leased prior to September 18, 1978. The House conferees considered this and rejected it by a rollcall vote.

The statement of managers is dispositive on this issue.

> During the Conference, an issue was raised as to whether revenues received by the Federal Government from tracts located in what is now the 8(g) zone, but which were leased prior to the date of enactment of the OCS Lands Act Amendments of 1978 (September 18, 1978), should be excluded from the distribution of revenues to the States under this title. The uniform position of the Senate Conferees was that the issue had been settled by a roll call vote on the Senate floor and that all such revenues were subject to such distribution under this title. The House Conferees then considered and rejected a motion to adopt Statement of Managers language to exclude such revenues.

Therefore, the plain words of this conference report coupled with the legislative history on the House and Senate side leaves no doubt that paragraph (2)—as well as section 8006 on recoupment—applies to tracts whenever they were leased.

Paragraph (3) requires the Secretary of the Interior or the Governor to notify each other whenever either determines that an area which potentially contains hydrocarbons underlies the Federal-State boundary. The Secretary and the Governor are permitted to enter into a unitization agreement or other royalty sharing agreement. Whether or not such an agreement is achieved, the Secretary may lease the tracts in question, which is consistent with the provision in current law.

Paragraph (4) requires the Secretary of the Treasury to invest the revenues deposited under this section in securities backed by the full faith and credit of the United States having maturities suitable the needs of the account and yielding the highest reasonably available interest rates as determined by the Secretary. These securities will require a short maturity period as the Department is required to distribute the States' shares of the revenues by the last business day of the month following the date of deposit. Of course this time period is measured from the date the Federal Government first receives the revenues from the lessees, whether or not the 8(g) revenues are segregated from the non-8(g) revenues.

Paragraph (5) addresses the situation where a State has a boundary dispute with the Federal Government over the location of the Federal-State boundary. Section 7 of the OCS Lands Act, as amended, controls this situation. Only since the location of the Federal State boundary is settled can the location of the 8(g) zone be established and the State's share of 8(g) revenues determined. Section 8(g)(5) of this conference report governs how escrowed funds are to be treated in such a situation. The conference report explicitly limits the application of this paragraph to tracts from lease sales occurring after September 18, 1978.

Paragraph (6) provides that any OCS bonuses, rents, or royalties received by the Federal Government beginning October 1, 1985, shall be deposited and distributed to the States under section 8(g) as revised by this conference report. Thus, the revised

section 8(g) will have a retroactive effect back to October 1, 1985, for purposes of determining the amounts to be deposited in the separate Treasury account and the computation of the States' shares.

Paragraph (7) applies to the situation where Federal leases lie wholly or partially within three miles of the seaward boundary of 2 or more States. There are Federal tracts in the Sabine Pass between the States of Texas and Louisiana which fall in this category. Under this provision Texas and Louisiana will each receive 13½% of the 8(g) revenues from these tracts, and potentially an additional amount under recoupment in section 8006.

SECTION 8004. DISTRIBUTION OF 8(G) ACCOUNT

This section of the conference report determines how the funds currrently held in the 8(g) account shall be shared with the States including those 8(g) revenues which the Government receives between now and the date of actual distribution of such funds to the States.

Subsection (a) requires the Secretary of the Interior to distribute to the States prior to January 1, 1986, the States' shares of OCS revenues received beginning October 1, 1985, under the new 8(g) provision as revised by this conference report, plus the States' shares enumerated under subsection (b) from the current 8(g) escrow account held in the Treasury.

The statement of managers recognizes that some of the States' shares of 8(g) revenues have been invested in securities which will not mature until after January 1, 1986. In the past the Department has invested the escrowed 8(g) funds in 90-day Treasury notes. Therefore, there may well be some delay in paying the States all they are due by January 1, 1986. However, the Department is expected to use all available funds to pay the States their share prior to Janaury 1, 1986. As soon as the remainder of funds due becomes available as these notes mature, the States must be paid the balance they are due.

Subsection (b) determines the distribution of funds deposited in the special Treasury account through September 30, 1985, which were escrowed under the 8(g) provision as it existed prior to amendment by this conference report.

That original 8(g) provision called for a fair and equitable disposition of revenues among the States and the Federal Government. Subsection (b) is the legislative settlement establishing a fair and equitable disposition of the bonuses, rents, and royalties and accrued interest which are contained in the special Treasury account. Paragraph (1) mandates the State-by-State distribution of bonuses and rents and accrued interest royalties and accrued interest which were actually deposited into the 8(g) account through September 30, 1985.

Paragraph (2) refers to the distribution of the royalties derived from any lease of Federal "* * * lands within 3 miles of the seaward boundary * * *" of such State plus accrued interest. By this term paragraph (2) refers back to the original 8(g) language which gave rise to the need for a fair and equitable legislative settlement between the Federal Government and the States. Paragraph (2) provides each State 27 percent of the royalties plus accrued interest which were actually deposited into the 8(g) Treasury account with respect to each such State. The Treasury account currently keeps track of how much royalties were collected offshore each specific State, so the Treasury account provides the basis for identifying the amount of royalties plus interest to which each State respectively is entitled to a 27-percent share—and somewhat more in the case of recoupment.

Paragraph (3) simply gives the U.S. Treasury the balance of the moneys remaining in the 8(g) Treasury account as of September 30, 1985, after the States' shares have been distributed.

Paragraph (4) provides that a State's acceptance of the payment to which it is due under this section will satisfy and release all that State's claims against the United States under section 8(g) as it existed prior to amendment under this title. Obviously, the State's claims are not extinguished until it accepts the full payment it is due under this section. Thus, if the Federal Government pays the State in more than one installment as securities in which the 8(g) funds are invested reach maturity, then the extinguishment of the State's claim occurs only upon acceptance of the final installment.

It should be understood that section 8004 represents a fair and equitable disposition of only the funds which were actually deposited in the account or invested in securities held by the account as of September 30, 1985.

Section 8006 on recoupment addressed the remaining issue of what is a fair and equitable disposition to the States of funds which should have been escrowed by the Department of the Interior but which for a variety of reasons were not actually escrowed in the past.

SECTION 8005. IMMOBILIZATION OF BOUNDARIES

SECTION 8006. RECOUPMENT

The legislative history of the 8(g) provision in the budget reconciliation bill amply demonstrates that the Department of the Interior did not escrow all the 8(g) revenues which should have been placed in the separate Treasury account.

This section on recoupment establishes by legislation a fair and equitable disposition to the States of the revenues derived by the Federal Government between September 18, 1978, and September 30, 1985, which should have escrowed but which in fact were not placed or kept in escrow. This section accomplishes this objective by first entitling the States in section 8006(a)(2) to 27 percent of all bonuses, rents, and royalties and other revenues collected by the Federal Government plus accrued interest for the period September 18, 1978, through September 30, 1985, and which were derived from any lease of any Federal tract which lies wholly or partially within 3 nautical miles of the State. Then section 8006(a)(2) reduces the amount due the State by that which they were already paid under section 8004(b) in the distribution of the amounts actually held in escrow as of September 30, 1985. So the net amount the States receive under recoupment is that which they should have received but which they did not receive.

Here again the reference to "any lease of any Federal tract" in section 8006(a)(1) means that this section applies to any Federal leases regardless of the date of their execution.

The conferees added the term "excluding Federal income and windfall profits taxes" to ensure that these taxes are not treated as "other revenues." In fact, the term "other revenues" is limited to those revenues derived from any bidding system authorized in sectin 8(a)(1) of the OCS Lands Act.

Subsection (b) calls for establishment of a second separate Treasury account for recoupment which is funded as described in subsection (c). On the last business day of each month the total amount in this recoupment account is swept out and paid to the State's which are due recoupment payments under subsection (a). Each State receives a pro rata share—based on the amount of recoupment each State is due relative to the total amount of recoupment due to all the States—of the total amount swept out of the account.

Subsection (c) provides that an additional 10 percent share—over and above the 27 percent share the States receive under section 8003—of the revenues deposited after October 1, 1986, into the separate Treasury account established under section 8(g)(2) will be placed in the recoupment account described in section 8006(b).

Mr. President, the Congress has fashioned a legislative solution to the 8(g) controversy that is fair and equitable, which should end litigation over the issue, and which has been scored by the Congressional Budget Office as saving the Federal Government hundreds of millions of dollars. I urge my colleagues to support this conference report. I urge the President to sign

this bill to put an end to the 8(g) controversy.

Mr. President, the compromise reached on the question of the Uranium Enrichment Program deserves a few comments. The Senate took the position that the Department of Energy's Uranium Enrichment Program should be made to repay to the Treasury only those revenues, if any, that exceed the program's costs. The House took the position that the Uranium Enrichment Program's costs, if effect, should include specific required repayment amounts.

Based on the record we have now we simply cannot resolve the complex factual question of how much the program can, in fact, afford to repay to the Treasury or even how much the program actually owes to the Treasury. Therefore the compromise that is proposed by the conferees sets the repayment numbers of the House as goals, and authorizes the Secretary of Energy to determine the amount that the program will repay consistent with several criteria. The Secretary is not required to make any repayment.

The criteria in the bill assume that the continued viability of the Federal uranium enrichment enterprise is in the national interest. In our view in the Senate, this viability is severely threatened by proposals that the costs of the program be artificially increased. The price that the U.S. Department of Energy charges for uranium enrichment services is far above the prices charged by competitor governments and far above the prices charged on the secondary market for enriched uranium. If the United States is to remain in the enrichment business, the U.S. price simply must be lowered. This can only be accomplished by lowering the costs of enrichment, not by increasing them. We need to invest in new, lower-cost enrichment technology—like the laser-based technology currently under development. We do not need to impose new costs on the program that will delay the time when the United States can offer enrichment services at competitive prices.

So we think that the goals for repayment set out in this bill are way too high. We think the program should lower costs and prices. We are confident that an honest determination by the Secretary under the bill will find that the repayment amount that will not adversely affect the reliability of supply of uranium enrichment services at competitive prices to existing and potential customers will be a zero repayment. We are deeply concerned by recent press reports that the Office of Management and Budget is seeking even larger repayment amounts than those in the House bill.

The only conclusion that we can draw from these reports is that someone wants the United States out of the uranium enrichment business. This is not a new proposition. In the 1970's it was proposed by President Ford and dropped when the phrase "nuclear nonproliferation" began to appear regularly in the newspapers.

If privatization of the uranium enrichment business is what we are dealing with, we should face that issue squarely and debate it. There are lots of implications to such a notion that go far beyond the provision of enrichment services to the Nation's nuclear reactors. A reconciliation bill is not the place for such a debate. Budget proposals that purposely cripple the Federal enterprise in order to set up a situation where selling it off is the only option are not the way to make policy.

Under the bill we are approving, the Secretary of Energy is required to make a determination of the size of the Uranium Enrichment Program's debt and the amount of repayment that can now be made consistent with the continued financial integrity of the program over the long term. I hope that these determinations and the process by which they are made will provide the basis for a debate on the long-term future of the Department of Energy's enrichment program. No reasonable long-term planning is possible under a threat of an undetermined and possibly crippling repayment requirement. We should settle this issue. The program can be a source of cash to reduce the deficit or it can be competitive. It cannot be both.

The stakes of guessing wrong in this planning process are very high. We should be debating this issue, and soon. If the provision we are enacting today brings the beginning of that debate closer, our work will have been worthwhile.

I reserve the balance of my time.

The PRESIDING OFFICER. Who yields time?

Mr. ARMSTRONG. Mr. President, I yield 5 minutes to the Senator from Texas, and more if he needs it.

Mr. GRAMM. Mr. President, I thank the distinguished Senator from Colorado. I rise to make several points about the conference report and about reconciliation.

I wish to begin, Mr. President, by saying that I am disappointed by the fact that reconciliation, which was a vehicle used so effectively in 1981 to reform entitlement programs, to change the spending patterns of the Federal Government, to change the direction of the American economy by changing the policies of the Federal Government, has become a catch-all vehicle for doing so many things that have nothing to do with saving money.

I am pleased that, under the Gramm-Rudman-Hollings proposal, points of order will lie against nongermane provisions; and by that we mean, in simple English that the general public understands, provisions that do not have anything to do with saving money in reconciliation. It saddens me a great deal to be forced to make a choice concerning the things in this bill that I strongly support and things in this bill that have nothing to do with saving money that I strongly oppose.

I oppose beginning a new entitlement program in this bill. And we have done that by expanding the base and reauthorizing trade adjustment assistance. We have imposed a new tax on imports, in clear violation of GATT. We have reauthorized more programs in this bill than any bill that has been adopted since I have been in Congress in 7 years. I thought reconciliation was about saving money, not reauthorizing programs.

So I believe that my strongest concern about this bill has nothing to do with how we ought to finance Superfund. In fact, I think the base of that tax has got to be a broad base if we are going to be able to afford the kind of cleanup that Congress seems committed to.

But my concern is that we have, in the process of this reconciliation bill, come very close to destroying the only vehicle that we have ever found to address the fundamental issues about Government spending. And I think that is a sad commentary on what has happened to the budget process in the 5 years that we have tried to make it work. I am hoping that next year, with a new framework, we can prevent this from happening.

Mr. ARMSTRONG. Will the Senator yield to me?

Mr. GRAMM. I am happy to yield.

Mr. ARMSTRONG. I share the concern that the Senator from Texas has expressed, because the extraneous provisions which have been added to this bill are a procedural outrage, whether you agree with the substance of them or not.

But, as reassurance, let me point out to the Senator that we have adopted a provision which will limit the addition of extraneous matter to future reconciliation bills. And it will be my purpose, following the adoption of this conference report, to offer a Senate resolution, which has been cleared on both sides, which will extend the same protection against extraneous material being added to reconciliation conference reports.

So I can say to the Senator, while the horse is out of the barn on this particular bill, I do not think we will ever again face the kind of wholesale legislation on a reconciliation bill that we have seen on this bill. I share his concern, but I think we have got that bottled up.

Mr. GRAMM. Mr. President, let me say to the Senator from Colorado that

I appreciate and wholeheartedly support that sense of the Senate. We, as a result of the Byrd amendment which has been incorporated into the Gramm-Rudman-Hollings proposal, have an additional vehicle in a point of order in the future. But I think it is unfortunate that a vehicle that was aimed at saving money has become the No. 1 reauthorization and spending vehicle in the Congress.

Finally, I would like to make an additional point that has nothing to do with whether you are for or against this bill. In the future, we have got to come up with a better accounting system so we all know what we are doing.

Let me give you an example. The biggest single savings in this reconciliation bill comes from Medicare—$11 billion. Now, you look at that $11 billion and you could say we could certainly use that $11 billion in the budget. But the truth is this reconciliation bill not only does not save any money in Medicare, it adds to spending in Medicare. And it does so because of an accounting system that really does not make sense, and I hope we will not use it in the future.

What we have done here is raised the reimbursement level for Medicare providers by 1 percent and we have scored that against the current services base to claim the largest single savings in this proposal. But there is one flaw in that process, or one hook before we run to the bank with the $11 billion, and that is, the administration, through HHS, froze the reimbursement level and, therefore, not only do we not save the $11 billion here, but we are raising spending above the level which would exist under Medicare in the absence of the adoption of this bill.

I appreciate all the work that has been done on this conference report. I do not know whether the President is going to sign it or not.

Quite frankly, I am strongly opposed to some of the provisions it contains, some of the new programs, and some of the new entitlements which we are starting on the spending bill. On the other hand, there are some savings in here.

But there are two points that I think ought to be reiterated.

No. 1, we need a vehicle, to stop reconciliation from being used to promote spending, rather than to stop it. As a result of the Byrd amendment, Gramm-Rudman-Hollings, and a resolution that will be offered here, we will prevent the abuse of reconciliation in the future.

Reconciliation is for saving money, and not for spending.

No. 2, it is vitally important in the future when we bring these kind of proposals to the floor for debate that we have an assessment by the Congressional Budget Office as to how much money is actually saved.

It is very diffcult to have any kind of meaningful debate on an issue when we have the largest single savings in a vehicle which represents not savings at all but a substantial increase in spending.

So I think, No. 1, we need to go back to use reconciliation for what it was meant to do. I just wish we were going to do it this year. I would have felt a lot better about this proposal.

No. 2, we need to have an effective way of accounting so we know whether we are saving money or not. While there are savings in this bill, and I know people have worked hard to get those savings, the truth is the savings are nothing like the figures we are showing here because they do not take into account the savings that have already been undertaken.

I thank the distinguished Senator from Colorado for yielding.

I yield back the balance of my time.

Mr. BENTSEN. I would ask the distinguished Senator from Louisiana, our very able ranking member on Energy and Natural Resources and the reconciliation subconference on Outer Continental Shelf matters, if he would enter into a brief colloquy regarding the section 8(g) OCS settlement in the conference report on reconciliation. Senator Johnston, it is my understanding that the 8(g) settlement in the reconciliation conference report was, in part, necessitated by the legal dispute between the States and the Federal Government over a "fair and equitable" disposition of revenues from the 8(g) zone and that the report among other things expressly intends to settle and extinguish that legal dispute. The legislative history of this measure is replete with references to the ruling by Judge Robert Parker in the eastern district of Texas.

Judge Parker, using a concept of bonus-enhancement, held that the State of Texas was entitled to the equivalent of 27 percent of the 8(g) bonuses in question as income to which the State was fairly and equitably entitled as a result of mineral development on State lands adjacent to the 8(g) zone.

This legislation implicitly recognizes that ruling and grants the States at least 27 percent of the bonuses, rentals and royalties as the basis for a permanent 8(g) settlement that benefits the entire Nation.

Mr. JOHNSTON. I would commend my distinguished colleague from Texas for his correct interpretation of out intent in this legislation.

Mr. BENTSEN. I would also like to ask the distinguished chairman of the Energy and Natural Resources Committee, Senator MCCLURE, if he agrees with my understanding as I have stated it.

Mr. MCCLURE. I do.

PENSION BENEFIT GUARANTY CORPORATION CONFERENCE REPORT TO THE RECONCILIATION BILL

Mr. THURMOND. Mr. President, in my capacity as a conferee on the Pension Benefit Guaranty Corporation [PBGC] subconference, I found my experience as chairman of the Judiciary Committee to be extremely valuable. Because the Judiciary Committee has jursdiction over bankruptcy law, I have developed an active interest in this area. As my colleagues are aware, initial PBGC reconciliation proposals dealt with bankruptcy issues, both directly and indirectly. I am pleased that this conference report has deleted all those provisions which would have directly affected bankruptcy law and principles. Specifically, the creditor status in bankruptcy of the PBGC based on 30 percent of an employer's net worth purposefully remains the same as under existing law. The conference does not address the question of whether or not a pension plan is an executory contract. That will be decided under the law as it existed prior to this conference report. However, to the extent a pension plan is an executory contract, it is covered by the voidance provisions of section 365 of the Bankruptcy Code. Absent the consent of all involved parties, no claim by PBGC survives bankruptcy.

The conferees wisely chose to stay neutral and simply maintain current law regarding these issues. However, we did see the need to create a larger sized claim by the PBGC. While maintaining a neutral position on the status of the 30-percent net worth claim, to the extent that 75 percent of the employer's pension asset insufficiency exceeds 30 percent of the employer's net worth—the PBGC was given a general unsecured claim in bankruptcy. It is clearly understood by the conferees that although this additional claim is unsecured, no inference whatsoever should be created as to the status of the 30-percent net worth claim. The status of this new, general unsecured claim adds no evidence—one way or the other—to the issue of what status in bankruptcy PBGC has to 30 percent of the employer's net worth.

I deeply appreciate the sensitivity which the conferees have shown to the concerns of the respective Senate and House Judiciary Committees regarding these bankruptcy issues.

The current estimated deficits for the PBGC in the amount of $1.3 billion illustrate the need for immediate reforms in this system. Several provisions in current law have contributed to this present state of affairs. The premium rate has been too low. Waivers of employer funding have been granted too generously. Although the dumping of pension plans with insufficient assets to pay retirees has not been encouraged, it has been facilitat-

ed under current law. Those companies which have taken advantage of this system have exacerbated the financial problems of the PBGC.

The reforms which are provided in this legislation will put businesses on notice that in the future, responsibilities to these pension plans cannot be so easily abandoned. As a matter of fairness, I firmly believe in the concept of reasonable notice. Too many citizens, financial institutions, and other creditors have in good faith relied on the existing law. Despite prospective application of these reforms, I fear that some creditors, especially small businesses, still may be unfairly impacted by this legislation. The small businessman who has extended credit to a distressed company has done so in reliance on existing law. If the credit customers of these small businessmen file for bankruptcy after January 1, 1986, the recovery of the small creditor in Bankruptcy Court may be greatly reduced due to the increased size of PBGC's claim as an unsecured creditor. This example clearly demonstrates that retroactive application would be blatantly unfair. Nevertheless, the majority of conferees have approved one exception to the prospective application of these reforms.

The exception to which I refer involves a provision in this legislation that only applies to pension plans that have posed no threat to the solvency of the PBGC. These pension plans are full funded and seek termination to regain excess assets. Many of these plans hope to use these assets to expand their business and hire new employees. They have applied for termination in compliance with current law and do not deserve this selective retroactive treatment. Over my strenuous objection, the majority of my colleagues on the conference have imposed a possible 90-day suspension of processing these currently pending terminations.

The challenge faced by the conferees was to provide reforms without discouraging the formation of pension plans. As I have stated, this legislation has its defects. However, I believe that in most respects we have succeeded in meeting this challenge. Accordingly, I am willing to support this conference report.

Mr. SIMON. The provisions of the reconciliation bill dealing with Department of Labor plan assets regulations only provide SEC registered real estate limited partnerships and other similar real estate entities with effective date relief if the Department of Labor fails to issue final regulations or issues final regulations which would subject such real estate entities to plan asset treatment. What assurance do we have that this section will solve the problems raised by the efforts of the Department of Labor to subject such real estate entities to ERISA jurisdiction?

Mr. NICKLES. The provisions you refer to and the related conference report language were worked out in advance with the Department of Labor. The cooperative attitude on the part of the Department was reason enough to limit this section to effective date relief and reason enough for us to refrain from substantive legislation at this time.

I share your concern that the Department's regulations come out right on this point. I suggest that we all be prepared to enact substantive legislation if the Department does not clearly exclude SEC registered real estate entities from plan asset treatment in its final regulations.

Mr. SIMON. Thank you. I am satisfied. It is particularly important that the Department not disturb the highly technical free transferability exceptions which have been crafted so carefully to reflect the myriad existing state blue sky and other requirements and the administrative practices of such programs. If those exceptions are tightened in final regulations without careful attention to the impact on SEC registered real estate entities, the regulations will be fatally flawed and a legislative solution may be necessary. The proposed requirement that public real estate offerings not be primarily marketed to plans which was in the January proposal but is absent fom this bill is inappropriate. It results in undue expansion of the Department's jurisdiction through a logically flawed shortcut. That requirement would avoid a more careful analysis based upon the similarity of the characteristics of a given investment vehicle to a typical investment management relationship which is the proper focus of ERISA.

I take comfort in the Department's cooperative approach to this legislation and hope that the Department's final regulations will contain standards applicable to SEC registered real estate entities which are not more stringent than those described in subsection (A)(1)(c) of this provision.

Mr. NICKLES. I agree with your observations.

A VICTORY FOR THE COAL INDUSTRY AND COAL MINERS

Mr. ROCKEFELLER. Mr. President, today a victory was won for the coal industry and coal miners. A major compromise was reached by the Senate and House regarding the financing of the black lung disability trust fund. In the reconciliation legislation we are acting on tonight, the compromise provision is included which will restore the fiscal solvency of the fund.

I have been actively involved in this issue since the President made his original proposal to increase the excise tax on coal by 50 percent. This tax increase would have had a disastrous effect on the coal industry. Even more jobs would have been lost and the industry would have had little choice but to raise the price of domestic coal—a move which would have inevitably hurt us in the international marketplace.

At the same time, I have recognized the urgent need to deal with the $2.5 billion deficit of the black lung trust fund. We simply had to take action this year to restore the fund's solvency if we were to ensure that miners and their families would continue to receive benefits entitled to them under the law.

In the recent weeks, I have concentrated on promoting an alternative to the tax increase as well as to a measure adopted by the Senate Finance Committee which would have ended the borrowing authority of the black lung trust fund. A number of my distinguished colleagues who represent States with signficant coal mining joined me in seeking a responsible response to the fiscal problems of the fund.

Today, we succeeded in winning the support of the reconciliation conferees for a responsible alternative. The compromise plan was developed by the Bituminous Coal Operators and the United Mine Workers of America. These two groups worked cooperatively to fashion and approach to solve the black lung trust fund deficit—namely, they suggested a one-time, 5-year forgiveness of the interest payments on the cumulative indebtedness of the trust fund and a 10 percent increase in the coal excise tax.

Mr. President, I am grateful to the reconciliation conferees for agreeing to this compromise proposal. By enacting the tax increase and the forgiveness of interest payments, we project that the $2.5 billion debt of the trust fund will be retired by the year 2007. This means that we will restore the integrity and stability of the Black Lung Program, which provides critical relief to the retired miners who suffer from the crippling disease of pneumoconiosis.

I extend my heartfelt thanks to all of my colleagues who listened to the views of those who are concerned about the future of the coal industry and the Black Lung Program. Specifically, I am indebted to the distinguished chairman and ranking minority leader of the Senate Finance Committee for listening to various points of view and recommendations on this critical matter. They appropriately felt an obligation to tackle the financial problems of the black lung trust fund, and in the end helped to enact a positive and responsible approach to reach this critical objective.

Finally, I commend my fellow colleagues representing West Virginia.

The minority leader of the Senate played an active role in developing the final compromise. And in the House of Representatives Congressman NICK JOE RAHALL was pivotal in enlisting the support of conferees on this matter.

I fervently hope that the provision included in the reconciliation legislation will quickly restore the financial health of the black lung trust fund. The current deficit threatens the ability of the program to meet its obligations under the law. I am proud that the parties most concerned about the fund—including representatives of coal producing States, the coal industry, and the United Mine Workers of America—have succeeded in winning congressional approval of an equitable plan for insuring the integrity and future of the Black Lung Program.

Mr. NICKLES. Mr. President, today I have the pleasure to discuss important reforms reported by the joint conference on single-employer pension plan termination insurance that are part of the budget reconciliation bill.

This important insurance program, which is administered by a self-financing Government corporation, the Pension Benefit Guaranty Corporation, was created in 1974 to assure that pension benefits earned by workers would be paid even if the employer terminated the plan in an underfunded condition. The program covers about 30 million retired and working Americans in over 100,000 defined benefit plans and is financed by premiums paid by those plans and by liability paid to the PBGC by employers that terminate underfunded plans.

Both the premium rate—currently $2.60 per plan participant—and the employer liability rules under current law have proven inadequate. The program is now responsible for benefit payments to about 160,000 current and future retirees in about 1,100 terminated plans and has a deficit of over $1 billion. The conference has agreed on a premium increase to $8.50 effective January 1, 1986, and reforms to protect this program against unwarranted claims.

A revision of the employer liability rule is central to the reform package. Under current law, an employer is liable to the PBGC for unfunded guaranteed benefits, but the amount of liability is limited to 30 percent of the employer's net worth. The PBGC has historically been able to collect only about 15 percent of plan underfunding through employer liability. The corollary is that the PBGC program affords companies with large unfunded pension obligations relative to net worth the opportunity to shift their pension funding obligations to other companies that keep their plans going and continue to pay PBGC premiums.

Several predecessor bills to increase the PBGC, employer liability recoveries and institute other needed reforms in the program have been introduced by me in the Senate and by various Members in the House over the last several years. One such bill, S. 1227, was ordered reported by the full Senate Labor and Human Resources Committee in June 1984. This proposed legislation was the basis for the reform package sent to the Budget Committee in September of this year for reconciliation purposes. The joint conference on PBGC insurance reforms had before it two employer liability formulations. The Senate bill and the House Education and Labor formulations are quite identical. They set employer liability at the full amount of unfunded guaranteed benefits. However, where the amount exceeded 30 percent of the employer's net worth, the excess unfunded guaranteed liability would be payable in annual installments equal to 10 percent of the employer's pretax profits. The profits payments would end after 10 years or upon payoff of the plan underfunding, if earlier. The profits interest payment schedule would enable uniform payment terms and minimize the need for PBGC and an employer to negotiate payment arrangements.

After consultation with bankruptcy experts, it became clear that the formulation would not produce sufficient savings for the program. In a bankruptcy proceeding the bankruptcy court is likely to liquidate the PBGC's profits interest claim using very conservative collectibility assumptions consistent with the "fresh start" principle favoring the debtor. Thus the profits interest could easily be undervalued, reducing PBGC's recovery. This is a serious problem with the proposal in view of the fact that about 75 percent of claims against the program occur in the context of bankruptcy proceedings.

Another problem with the proposal is that members of the bankruptcy bar and counsel representing bank lenders have mounted an attack on the status of PBGC's employer liability claim in bankruptcy proceedings. ERISA created an automatic lien in the PBGC's favor for the amount of employer liability that an employer neglects or refuses to pay and accorded this lien tax priority status in bankruptcy proceedings, which assures complete or very sizable recovery. The bankruptcy and bank bar members assert that the PBGC claim does not have tax priority status. They argue that changes in the Federal bankruptcy law which established the new Federal Bankruptcy Code in 1978, deny the PBGC the tax priority status that was intended under ERISA.

The Bankruptcy Code listed the specific types of taxes entitled to priority (see 11 U.S.C. §§ 503(b)(1)(B), 507(a)(7)), whereas ERISA did not specify that PBGC's claim would be treated in the same manner as a particular tax. Section 4068 was amended by the Bankruptcy Reform Act, changing it to conform to Bankruptcy Code language, but leaving the priority language as originally enacted in 1974. The PBGC therefore has continued to file those claims as tax priority claims under 11 U.S.C. §§ 503(b)(1)(B) and 507(a)(7).

The PBGC has never litigated the status of its employer liability claim under current bankruptcy law. Because 30 percent of net worth is generally a small figure, disputes over PBGC's recovery are settled through negotiation rather than litigated. PBGC did litigate the priority status of its claim in one case under prior bankruptcy law, however, and prevailed.

The conferees were concerned that PBGC's recovery would be reduced to unacceptably low levels if the profit interest were liquidated and discharged as a general creditor claim. We therefore adopted a different formulation by combining features of the Labor Committees' and Ways and Means Committees' proposals.

The conference agreement gives the PBGC, in addition to its current law tax priority claim for 30 percent of net worth, an additional claim for the excess, if any, of 75 percent of unfunded guaranteed benefits over the 30 percent of net worth amount. This additional claim has a general unsecured status in bankruptcy proceedings. Thus the conference agreement is a compromise between the House Ways and Means Committee bill, which would set employer liability at 100 percent of unfunded guaranteed benefits and apply the current law tax priority to the entire amount, and the profits formulation under the House Education and Labor and Senate bills.

The conference agreement does not alter the bankruptcy status of the claim PBGC makes, as plan trustee, for unpaid contributions. As under current ERISA law and the Bankruptcy Code, unpaid contributions that accrue after a bankruptcy petition have administrative expense priority; those that accrue within 180 days before the petition have employee benefit status—subject to the $2,000 per employee limit on priority employee wage and benefit claims—and remaining unpaid contributions have general unsecured status.

Finally, I would like to comment on the effect of ERISA and the Bankruptcy Code on an employer's right to terminate a plan in a distress termination under the conference agreement. In order to have a distress termination one of three tests must be met by each contributing sponsor and each substantial member of its controlled group. Each such person must be in a

liquidation proceeding, in a reorganization proceeding in which the bankruptcy court approves the termination, or in deep financial trouble as demonstrated to the PBGC under specified criteria. The conference agreement makes no change to the existing law regarding the appropriate forum to adjudicate disputes concerning such terminations. The Bankruptcy Amendments and Federal Judgeship Act of 1984 added section 157(d) to the Judicial Code providing that a U.S. District Court shall withdraw and hear disputes where consideration of both bankruptcy law and other Federal laws, such as ERISA, is required.

BUDGET RECONCILIATION

Mr. CHAFEE. Mr. President, the reconciliation package before us represents a great deal of hard work and careful discussion. It also contains an extraordinary number of provisions which might be called extraneous by some, but which are extremely important.

MEDICAID

For several years now, I have been working to reform the Medicaid system. Specifically, I have been working to change the program so that Medicaid funds can be used for community-based long-term care services to our citizens with mental retardation and developmental disabilities.

In the long run, I believe this system is in need of a major overhaul. The current system is biased toward the use of institutional facilities—but we should be working harder to keep handicapped citizens in the community.

True Medicaid reform, such as what I have proposed in my legislation, S. 873—the Community and Family Living Amendments of 1985—may take years to accomplish. In the meantime, there are several interim changes that should be made. We were able to include some of these changes during this reconciliation process.

LIFE SAFETY CODE

Earlier this year, I received complaints about the application of an outdated Life Safety Code by the Department of Health and Human Services from parents and residential providers across the country. Consequently, in the legislation before us there is a provision to require the Secretary of HHS to accept the 1985 Life Safety Code as an acceptable standard for fire safety. This code, while still striving for fire safety, offers greater flexibility in the use of resources within a residence to promote such safety. As a result of this action the Secretary of HHS has already acted to accept the new code.

PUBLICATION OF ICF/MR REGULATIONS

People concerned about intermediate care facilities for the mentally retarded [ICF/MR], have been waiting for 2 years to see new regulations for these facilities. In the reconciliation package, we have included a provision to require the Secretary to publish for comment the current draft of the new ICF regulations within 60 days of passage. These regulations have been more than 2 years in the making, and their publication is long overdue. With this provision, I hope we can move on to a new era of planning based on these new regulations.

MEDICAID WAIVER—DENIALS AND RENEWALS

Since 1981, HHS has offered home and community based care waivers to allow Medicaid moneys to be spent in specific non-Medicaid facilities. This program, called the Medicaid Waiver Program, has allowed many severely handicapped persons to live in the community rather than in institutions.

However, the process of applying for and receiving a waiver has been so unpredictable, that it discourages many States from applying for a waiver. In an effort to build greater permanence and predictability into the waiver program, I fought for the inclusion of two related provisions: First, a provision that calls for a moratorium on all denials of waiver renewal requests from States, and second, a provision that requires the Secretary to renew those waiver requests it approves for additional 5-year periods rather than the current 3-year periods.

ICF/MR PLANS OF CORRECTION

In recent years, many States have been confronted with the need to renovate old institutions for the developmentally disabled while at the same time trying to develop community based alternatives for those individuals. In many States, this choice between institutions and the community based services has presented a financial hardship. It has forced many States to renovate buildings that they had intended to close.

One of the provisions included in reconciliation would alleviate this problem—in very limited situations. This provision that would allow an institution with a building or wing that is out of compliance to submit a plan of correction that incorporates depopulation of the building or wing over a 3-year period. Among a variety of other limitations, this would be allowed only in situations where the violations are nonlife threatening, and only with the approval of the Secretary.

I do not believe that this option will be used in many situations. The intent here is simply to allow those States which have had successful experiences with community based services the option of expanding on that success. There are many States which simply would not ask for this option, and if they did ask would be denied because they do not have a positive history of community based services and to some extent deinstitutionalization.

Some people are concerned about this provision because they think that States are given too much power. This is not so. The State must request to implement this provision, but the Secretary of HHS must approve the request. This preserves the balance of power between the State and the Federal Government.

Some are also concerned that this provision will let States dump people out of institutions with no programs. I would never introduce such a provision. As it is framed there are a wide variety of requirements and limitations on the use of this provision. For those individuals who are affected, there are a number of safeguards and requirements which must be met throughout the operation of the plan.

MEDICAID DEMONSTRATION PROJECTS

Many critics of the Medicaid system have stated for years that we can do better and more creative things with the money we are spending. Unfortunately, the Medicaid system is so rigid that it prevents trial attempts at innovative programs.

For this reason, I supported in reconciliation a provision that would allow a "pilot project" in up to four States that would allow for greater flexibility in community residential expenditures. These demonstration projects will allow community based services to be set up on an experimental basis for both the elderly and the developmentally disabled populations.

There are many other provisions dealing with the Medicaid Program in this package. Those outlined above are simply the highlights. All in all, I believe that these provisions represent a substantial step in the attempt to provide a reasonable and rational method of providing long-term care services.

MEDICARE

There were also many changes made in the Medicare Program, most of them were reasonable changes. Some, however, I believe may come back to haunt us. Very few changes in the program were made which will have a direct economic impact on beneficiaries of the Medicare Program. Most of the savings were due to freezes or other restrictions placed on the providers of health care services—such as hospitals and physicians.

I am concerned that if we continue down this path, we will have a health care program for which there are many beneficiaries needing health care services, but few professionals available to deliver those services.

This package cuts the increase in payments to hospitals to a fraction of 1 percent. In addition, it substantially reduces—by close to 50 percent—the amount of reimbursement for indirect education costs to hospitals. I will be watching the effect of these combined reductions carefully to determine

whether hospitals are capable of absorbing them.

We also continued a freeze on physician payments, with the exception of a 1 percent increase to what are known as "participating physicians"—those who have agreed to accept assignment in 100 percent of their Medicare patients. I know that there is grave concern among the physicians in my State about the freeze especially because of incredible increases in malpractice premiums during the past year.

It is becoming harder and harder to offer quality health care at the same time reimbursement is reduced. This is just the beginning of the problems we will be encountering in the coming years.

I predict that this body will be spending more and more of its time debating health care issues in the coming years. The problems are just beginning to surface and they are complex and troubling. There simply are no easy answers.

Next year and the year after and the year after that, when the time comes to produce budget savings, we are going to be faced with some very difficult problems—a growing elderly population which is living longer, long-term care services for that population, rebellion among health care providers who can not continue to absorb the loss resulting from our actions to freeze reimbursement, and the list will get longer.

So, Mr. President, while I am satisfied, generally, with our recommendations in this package, I am also worried about the future. I believe these problems can be resolved, but only if all of us work together with a common goal in mind—quality health care at a reasonable price. It sounds simple, but those of us who are familiar with the problems know that it will not be simple to achieve this goal.

Mr. President, I am delighted to report that this bill includes a funding package for Superfund, the important program to clean up toxic waste sites. My colleagues and I worked long and hard to get this measure included in the bill. What we have is a tax that will raise $10 billion over the next 5 years. It is a broad-based manufacturers' excise tax. We rejected a waste end tax and have avoided the need to resort to general funds from the Treasury.

This step moves us considerably closer to our goal of completing the process of amending and expanding Superfund. My only regret, Mr. President, is that the funds collected will not be immediately available to revitalize the program. Superfund and all cleanup work has been brought to a virtual standstill since the old tax expired on September 30. These new funds will become available as soon as the House and Senate meet and complete work on a series of pending amendments to the underlying program. At best, that cannot be done until early February 1986. If that effort drags on too long, a short-term, emergency release of funds may become necessary. I am deeply worried that the Superfund Program is becoming a political football. The consequences of playing brinkmanship are unacceptable to me. While political posturing on the importance of Superfund continues, Federal cleanup work has stopped. Long-term cleanup of major sites requires long-term planning and assured funding. This bill will help and I am anxious to move forward with whatever steps are necessary to get the program for cleaning up toxic dumps back on track.

Mr. LAUTENBERG. Mr. President, I rise in support of the reconciliation bill. This bill will cut $20.5 billion from the deficit this year, $83 billion over 3 years. Those savings are significant. They are significant because they reduce the deficit. They are significant because Congress is making them.

Congress is making the decisions. It is making choices. I do not agree with every choice made. But, Congress is making them. It will have to make a great many more. The toughest decisions are yet to come. But, we have begun to make them.

Now, I was distressed to hear that Donald Regan, the President's Chief of Staff, has reportedly said he will urge the President to veto the reconciliation bill. The President is being urged to veto $83 billion in deficit reductions.

Mr. President, unfortunately, the prospect of a veto of the reconciliation bill is a sign of things to come. It is telling about what the Gramm-Rudman Act will mean.

Under Gramm-Rudman, the Congress gave its power to the President. It surrendered its prerogatives to make choices. For that reason and others, I opposed Gramm-Rudman. Because under Gramm-Rudman, the President can impose across-the-board cuts in spending, not just if Congress fails to cut the deficit, but also if Congress fails to cut the deficit the way the President would like.

Now, Congress has cut the deficit. We just passed a continuing resolution that is $18 billion below the President's request in budget authority. And now, we are about to pass an Omnibus Reconciliation Act, with program cuts and revenue measures, that will cut the deficit some $83 billion.

We will send that deficit cut to the President, and the President may veto it. If so, the President would veto deficit cuts made by the Congress, and substitute cuts made with all the care and discrimination of an electric meat slicer.

The President would veto a cigarette tax, as provided in reconciliation, and substitute across-the-board cuts in health care, cancer research, and Medicare.

If so, the President would veto a minimal tariff on imports, designed to support job training for displaced workers, and substitute across-the-board cuts in those very same.

He would veto a broad-based tax to support an enlarged and more effective Superfund, as provided in reconciliation, and substitute across-the-board cuts in toxic waste cleanup.

The President would veto cuts in what we pay banks to service guaranteed student loans, as provided in reconciliation, and substitute instead across-the-board cuts in the loans we pay students.

That is what we face, Mr. President. That would be Gramm-Rudman at work.

Mr. President, I support reconciliation because it is a significant step toward deficit reduction. It also includes changes in law that are critical to my State and to the Nation.

Mr. STAFFORD. Mr. President, I would like to say immediately that I am dismayed by the conference report on budget reconciliation as it affected Superfund. I refused to sign the conference report.

I am dismayed because of the provisions dealing with Superfund. Or, perhaps more accurately, not dealing with Superfund.

The tax which supports Superfund expired on September 30.

This bill will enact a new tax, designed to raise $10 billion over 5 years. But for reasons I do not understand, although the money will be collected it cannot be spent.

If this bill becomes law, not one red cent will be available to the Superfund Program tomorrow than is available at this very instant.

The conferees have chosen to prohibit the expenditure of that money, as it has been explained to me, to keep the pressure on the House and Senate conferees to produce a substantive reauthorization of the Superfund law. Supposedly an imminent deadline is needed to achieve this.

Mr. President, the Committee on Environment and Public Works reported a Superfund bill in September of 1984, when the taxing deadline was 1 year away. When that bill died in the Finance Committee, we reported a bill again on March 1 of this, when the deadline was 6 months away. The House last year passed a bill when the deadline was nearly 16 months away.

I suggest, Mr. President, that what is required is not deadlines, but action. The conferees had the chance to take that action, but didn't. It is a tragedy that the conferees had the opportunity to keep this program running but chose not to do so.

This unique approach of collecting taxes, but not spending them was, I

have been told, first suggested by the House conferees. In that context, Mr. President, I would like to observe that even though the House passed a Superfund bill 10 days ago and requested a conference, the conferees have yet to be appointed and the Senate is yet to receive the message from the House. Because of this, it is likely that the entire holiday recess will be lost. Reportedly, the appointments have been prevented because of a struggle for representation on the conference committee.

Mr. President, the Superfund Program is dead in the water. Contracts are in jeopardy, construction has been halted, and investigations have been slowed. All we are now paying for are emergencies and salaries.

If Superfund is defined as the program that the country had on August 1, 1985, then it no longer exists. This bill presented the opportunity to revive it, but the conferees not only failed to seize opportunity, but rejected it outright.

UNIFORM MINIMUM DRINKING AGE

Mr. LAUTENBERG. Mr. President, I rise to bring the attention of my colleagues a provision in this bill which I consider to be of national importance. That provision makes permanent the Uniform Minimum Drinking Age Act of 1984. This law, Public Law 98-363, requires that States raise their minimum drinking age to 21 by October 1, 1986, or risk the loss of Federal highway assistance.

The provision included in reconciliation makes the withholding of highway funds permanent. This amendment to existing law is made necessary by the attempts of a small number of States to evade the intent of the law by sunsetting their 21 laws in 1988 when Federal withholding is scheduled to end. This provision also ends the reimbursement of withheld funds at the close of fiscal year 1988. The provision also includes two lenient provisions. One allows States to phase in their 21 laws and be in compliance with Federal law provided they do so expeditiously. The other extends the availability of highway funds withheld so that States will not simply lose funds when they lapse under the normal procedures of the highway law.

The opponents of this law and the amendments to it, included in this legislation, have stressed the punitive aspects of the law. I want to emphasize the compassionate nature of this bill. The purpose of this law is not to withhold highway funds; it is to save the lives of hundreds of young Americans every year on our highways. Its purpose is to close the blood borders that separate States with differing minimum drinking ages which provide an incentive for young people to drive in order to drink. Far too many of them do not make it home and their parents, their brothers, sisters and loved ones suffer the pain. This law does not put an end to drunk driving, but it will help hundreds of families to avoid the loss of a son or daughter.

Mr. President, this week has been designated by President Reagan as "National Drunk and Drugged Driving Awareness Week." How fitting it is that the Congress has the opportunity to close the loopholes in the Uniform Minimum Drinking Age Act this week.

Reconciliation, Mr. President, is essentially an authorization bill. This provision belongs in an authorization bill. I have worked closely with the committee of jurisdiction, the Committee on Environment and Public Works, to craft this provision. This provision is a compromise worked out by the committees of authorization in the House and Senate.

Mr. President, this provision is of critical importance to such groups as the National Safety Council, Mothers Against Drunk Driving and PTA's throughout the Nation. This provision is supported by Secretary of Transportation, Elizabeth Dole, and the Reagan administration.

Mr. President, I introduced this provision in July with the cosponsorship of my friend and colleague, Senator JOHN DANFORTH, the able chairman of the Committee on Commerce, Science and Transportation. Senator DANFORTH has been steadfast in his support for this measure.

Finally, Mr. President, I want to recognize the contribution of the chairman of the House Public Works and Transportation Committee, Representative JIM HOWARD of my State of New Jersey, for his extensive efforts to bring about a uniform minimum drinking age of 21 in this Nation. Without him, this law would not be on the books and these amendments would not be possible.

I also extend my thanks to the staff of the House Public Works and Transportation Committee. Caryll Rinehart, Dick Sullivan and Clyde Woodle have lent their expertise to this effort and I thank them.

Mr. MURKOWSKI. Mr. President, I rise today in support of the adoption of the conference report and final passage of H.R. 3218, the Omnibus Budget Reconciliation Act of 1985. As chairman of the Committee on Veterans' Affairs, I am pleased that the conferees on title XIX of H.R. 3218 regarding veterans' programs have been able to work out a fair and equitable compromise, one which will meet the savings targets required under our reconciliation mandate and which will result in significant reforms in VA health care delivery.

The provisions contained in the conference agreement include the establishment of income eligibility criteria for VA health care, the authorization of reimbursement under health insurance contracts, a 3.1 percent—percent cost-of-living adjustment [COLA] for veterans in receipt of service-connected disability compensation and related benefits, an epidemiological study of the health of women veterans, and evaluation of the needs of native-American veterans including Alaska Natives and a waiver of congressional notice-and-wait period for administrative reorganization of certain automated data processing functions within the VA.

Both the House- and the Senate-passed bills contained the establishment of new eligibility criteria and income thresholds for certain non-service-connected veterans and third-party reimbursement for non-service-connected veterans who are furnished VA health care. Both the House- and the Senate-passed versions also contained a provision related to the service-connected disability compensation COLA.

Mr. President, I am extremely pleased with the spirit of cooperation and dedication to the resolution of these issues that was evidenced by all the conferees and their staff. I particularly want to thank G.V. (SONNY) MONTGOMERY, chairman of the House Veterans' Affairs Committee, and JOHN PAUL HAMMERSCHMIDT, ranking minority member of the House Veterans' Affairs Committee, and their staffs, as well as Senator CRANSTON, the ranking minority member of this committee and his fine staff.

The most significant differences in the House- and Senate-passed bills were found in the policies contained in the proposed income eligibility criteria. The differences were especially significant in how to treat eligibility for VA health care and the level of copayment that should be required for veterans who were deemed able to pay.

HEALTH-CARE ELIGIBILITY

Mr. President, the revisions proposed by the Senate-passed bill regarding eligibility for VA health care would have prioritized the care to indicate the Nation's commitment to service-connected disabled and impoverished veterans. Inpatient and outpatient care would have been prioritized in the same manner and nursing home care would have been prioritized to ensure that VA nursing care beds would be available first for those who need the highest level of care. The Senate-passed bill would have established an across-the-board income threshold of $25,000 for non-service-connected veterans and required the medicare deductible every 60 days for veterans being furnished hospital care or nursing home care within a 1-year period. Veterans who would have been furnished outpatient care and who exceeded the income threshold would have paid 20 percent of the average cost of VA outpatient visit.

Mr. President, I believe that although we have moved toward the House's position in many aspects of this bill, the House was also willing to modify its position regarding entitlement to health care as well as the copayment for those veterans who have non-service-connected disabilities and who do have the ability to contribute toward their care.

Under the conference agreement, nine categories of veterans "shall" be furnished needed hospital care in VA facilities and may be furnished such care, if currently authorized, in non-VA facilities. These categories of veterans would include all service-connected disabled veterans, so-called special statutory categories (including POW's, veterans exposed to Agent Orange or radiation and veterans of World War I and earlier conflicts) as well as other non-service-connected veterans with incomes not exceeding $15,000 for a veteran with no dependents and $18,000 for a veteran with one dependent, plus $1,000 for each additional dependent. By establishing a new "shall" category for these veterans seeking hospital care the Congress has indicated its strong feeling that these categories of veterans should have the highest priority and that they should be furnished needed care to the extent that beds are available and funds have been appropriated. The statement of managers indicates that the conferees clearly intend that for the above-mentioned categories, the VA's sole obligation is: First, if a veteran is in immediate need of hospitalization, to furnish and appropriate bed at a VA facility where the veteran applies, or if none is available there, to furnish a contract bed if authorized in section 603 or arrange to admit the veteran to the next closest VAMC, or DOD facility with which the VA has a sharing agreement, with an available bed; or Second, if the veteran needs nonimmediate hospitalization, to schedule the veteran for admission where the veteran applied, if the schedule permits, or refer the veteran for scheduling and admission to the nearest VAMC, or DOD facility with which the VA has a sharing agreement, with an available bed and facilitate the veteran's admission there." That is the extent to which current law would be modified with respect to the word "shall". The reason that the conferees included this language in the statement of managers was to make perfectly clear that although we have taken a major step in requiring the VA to care for these high priority categories of veterans, the VA is not expected to plan additional or expanded services or space to care for such veterans. We believe the VA does have the capacity to treat these nine categories. If such a veteran applies and there is no space, the conferees expressed the view that the VA will make every attempt to ensure that such a veteran be treated at another VA facility that provides similar services. This legislation would not change current law or practice regarding the beneficiary travel program. I wish to emphasize that the intent of having veterans referred from one hospital to another was not to increase the cost to beneficiary travel but to increase the possibilities that veterans would receive needed care as soon as possible. There is no requirement that beneficiary travel be paid in such instances.

A concern has been raised that using the word "shall" would create an entitlement to VA care that would circumvent the appropriations process. The VA's general counsel has informed us that no such entitlement would be created. I ask unanimous consent that the general counsel's "white paper" on this eligibility issue be included in the RECORD at this point.

There being no objection, the materials was ordered to be printed in the RECORD, as follows:

PROPOSED AMENDMENTS TO SECTIONS 610 AND 612—IS AN "ENTITLEMENT" CREATED

Both the House and Senate versions of the Budget Reconciliation Act (H.R. 3500 and S. 1730) contain the so called "means test/third party reimbursement" legislation which would alter the eligibility of veterans to receive VA health care benefits. Both the House and Senate bills would amend 38 U.S.C. §§ 610 and 612, to provide that the Administrator "shall furnish" hospital care and outpatient medical services to certain veterans. The Senate bill also provides that nursing home care "shall" be furnished to those same veterans. Under existing law, the Administrator "may furnish" such care. Both bills also delete existing language in sections 610 and 612 providing that care may be furnished only within the limits of VA facilities. The changes made by these bills have given rise to the question: Will certain veterans be "entitled" to receive VA health care benefits, and what does that mean?

Generally, the term "entitlement" connotes a right to receive something, or to do something, with the scope of the right varying according to the legal authority creating it. See generally Words and Phrases, Volume 14A, pages 388-395 (1952 ed) and Supp. pg. 18 (1985). Entitlements may take many forms, but this paper is primarily concerned with what may be characterized as "statutory entitlements."

A review of case law reveals that the terms "entitlement" and "statutory entitlement" are used very loosely and imprecisely by the courts. Research has not revealed an instance of a court's defining the terms specifically. However, based on a review of cases using the term "entitlement," this paper posits the following definition. "Statutory entitlement" is a right, not subject to the discretion of an agency official, to receive a payment, a good, a service, or some other right from the government on the basis of meeting eligibility criteria established by statute or implementing regulations. As discussed below, however, the identification of an interest in a benefit as a statutory entitlement does not in itself indicate that the "entitled" parties have an absolute right to, and can enforce receipt of, that benefit.

The concept of a statutory entitlement appears to embody two principal elements: first, the right must be defined in a law or regulation, and, second, the law or regulation must leave little if any discretion to government officials to determine whether or not the benefit will be provided. The term "entitlement" is most commonly used in the case law in the context of constitutional procedural due process cases involving individuals or groups seeking to show the presence of a "property interest" which cannot be abridged except by due process of law. Thus in *Goldberg* v. *Kelly*, 397 U.S. 254 (1970), the court stated that welfare benefits "are a matter of statutory entitlement for persons qualified to receive them." Id. at p. 262. In *Board of Regents* v. *Roth*, 408 U.S. 564 (1972), the court states that to have a property interest, an individual must have "a legitimate claim of entitlement." Id. at 577. The *Roth* Court clearly stated that a property interest or "entitlement" is defined by the source that created the interest. Thus, the court stated:

Thus, the welfare recipients in *Goldberg* v. *Kelly*, supra, had a claim of entitlement to welfare payments that was grounded in the statute defining eligibility for them. Id. at 577.

There is some case law to suggest that a statute or regulation which vests significant discretion in government officials in connection with provision of the benefit does not confer an entitlement. In *Ingram* v. *O'Bannon*, 534 F. Sup. 385 (E.D. Pa. 1982), a case in which plaintiffs claimed an absolute right to benefits, the court held that no entitlement existed where, despite language in the state's regulation defining eligibility for services on the basis of specific financial and medical need, other regulatory provisions vested broad discretion in Agency officials to determine how benefits would be provided. Indeed, the statutory scheme and applicable regulations in that case allowed the state to define the entitlement as permitting the decision by State officials to determine provision of the benefit under priority list which, in fact, denied the benefit to individuals otherwise meeting eligibility criteria, Id. at 389. Consequently, the Court stated, "This regulations (sic) negates any allegation that when demand surpasses availability, applicants have a legitimate expectation that the state will increase funding of the program to ensure that all applicants receive the service." Id. The statutory scheme did "not create an entitlement to the service or at most, create[d] an entitlement to receive the service as it is available." Id. Similarly, in *Riverview Investments* v. *Ottowa Community Investment Corp.*, 769 F.2d 324, 327 (6th Cir. 1985), the court held that the substantial discretion vested in State officials to administer a program (municipal bond) defeated any claim to an entitlement to have such bonds issued, even though other applicants had received the benefits of the issuance of the bonds. See also *Moore* v. *Johnson*, 582 F.2d 1228 (9th Cir. 1978). Contrast *Alexander* v. *Polk*, 572 F. Supp. 605 (E.D. Pa. 1983), a case in which plaintiffs claimed an entitlement to benefits to the extent funding is available. There the court held that an entitlement existed in a statutory supplemental food benefit program, to the extent funds were available, even though officials had authority to limit the benefit when adequate funds were not available to provide the benefit to all eligible individuals. While the *Polk* case demonstrates that the law is by no means

certain with respect to what constitutes a property interest establishing a right to due process, it does not suggest that a statutory entitlement is an absolute right to that property.

The question has been posed as to whether the proposed amendments to sections 610 and 612 of title 38, United States Code, in the House and Senate Budget Reconciliation bills, create entitlements. In determining precisely what benefits are granted by the statute, and whether the individual is statutorily entitled to them, attention must be paid to all of the statutory limitations on the grant of the benefits. Existing sections 610 and 612 use the words "may furnish" in describing the Administrator's authority to provide health care benefits to veterans. Those words are susceptible to an interpretation that the Administrator has virtually unlimited discretion to determine whether or not to provide care or services to eligible veterans. That interpretation was supported in an opinion prepared by the Office of Legal Counsel, Department of Justice, dated December 7, 1982. The proposed changes to sections 610 and 612 would certainly alter and limit the Administrator's discretion to decide not to provide care to certain categories of veterans, but the changes do not foreclose all discretion, or "entitle" every otherwise eligible veteran (who "shall" be provided care) to receive whatever care or services are deemed desirable or even determined necessary. Generally speaking, we believe the proposed change from "may" to "shall" would only mandate that if VA facilities and resources are *available* and *capable* of providing *needed* care and services, the Administrator must furnish the care and services to any eligible veteran able to present himself or herself at the VA facility to receive the care.

The major limitation on the provision of benefits is the fact that VA facilities and resources are limited. At the present time, facilities simply do not exist to provide all types of health care benefits to all veterans eligible to receive those benefits, particularly under the House bill, and both the Senate and House bill continue to impose stringent limitations on the provision of contract care in non-VA facilities. Furthermore, VA's ability to acquire or construct new medical facilities is constrained by statutory provisions. For example, any significant VA construction project must be approved by the Congress pursuant to 38 U.S.C. § 5004, before money may be appropriated for the project. Finally, as discussed below, the proposed bills do not create new spending authority (entitlement authority) such that one might argue (not necessarily successfully) that Congress must appropriate funds to construct facilities to meet the needs of all eligible veterans. Accordingly, under the House bill, for example, VA will be able to provide care and services within the limits of its facilities and resources, and eligible veterans can have no clear assurance of receiving needed care in every instance.

In addition to the basic availability of resources limitation, both the House and Senate bills grant, or leave in place a significant breadth of discretion in the Administrator to determine whether to provide all eligible veterans with health care benefits. First, the care sought by a veteran must be "needed" by the veteran (House bill) or "reasonably necessary" (Senate bill). VA regulations and manual provisions treat this eligibility criteria in essentially absolute terms, i.e., a veteran either does or does not need medical care. However, the requirement that care be needed can also be viewed, particularly under the pending House bill, (which on its face places all but non-needy, non-service-connected veterans on an equal footing as to eligibility and priority for care in VA facilities) as permitting the Administrator to assess need in relative terms, e.g., degree of urgency of need in relation to VA capabilities. Thus, if resources are extremely limited, the Administrator could conceivably determine that only limited types of health care services can be said to be "needed." If an outpatient clinic is full, perhaps only emergency services could be deemed "needed" for a new applicant.

Additionally, neither the House nor the Senate bill alters the existing language of 38 U.S.C. § 621. That section grants the Administrator authority to promulgate regulations governing, and limiting, hospital, nursing home, and domiciliary care. Section 621 is generally thought of as granting necessary authority to allow efficient administration of the medical system. However, it grants significant discretion to the Administrator to determine that care will not be provided in certain instances. In instances where VA lacks the capacity or facilities to meet the demand for health care benefits, this authority would, for example, allow the Administrator, under the House bill, to deny immediate care to certain categories of veterans, and place them on waiting lists for care in the future. (The Senate bill provides specific priority provisions, of course.)

It should also be noted that the House bill proposes to add a new subsection (g) to section 610. This new provision would explicitly recognize the Administrator's existing discretion "to determine—

(A) The appropriateness of furnishing medical services, therapies, or programs under this chapter; or

(B) In what manner they will be furnished.

A veteran seeking care from the VA can only expect to receive the care and services authorized by the law. Clearly the "entitlement" to be enjoyed by the beneficiaries of these bills is encumbered by significant limitations. Although individuals have used the word "entitlement" to describe the benefit that the House-passed measure would provide, we find no basis to conclude that individual nonservice-connected veterans, e.g., can have more than a unilateral expectation of receiving VA care whenever they need it. Although we do not foresee the likelihood that service-connected veterans under the Senate bill would be denied needed VA care, it is not clear that veterans can compel the Agency to provide care as a matter of statutory entitlement.

As a final matter, we address the question of whether the proposed changes to sections 610 and 612 would invoke any legal requirement that the Congress appropriate funds sufficient to assure that VA facilities would be constructed and resources made available to provide health care benefits to all eligible veterans who seek them. We do not believe the changes invoke any such authority.

Under the Congressional Budget Act of 1974, Congress may create what is termed "entitlement authority." Entitlement authority is defined in section 401(c) of the Act (2 U.S.C. § 651(c)(2)(C)) as the authority:

(C) to make payments (including loans and grants), the budget authority for which is not provided for in advance by appropriation Acts, to any person or government if, under the provisions of the law containing such authority, the United States is obligated to make such payments to persons or governments who meet the requirements established by such law.

The language in the above provision, "the United States is *legally obligated* to make such payments," (Emphasis added), implies that the funds must be paid to beneficiaries, and that funds for payment must be appropriated by the Congress. In our view, however, neither the proposed House or Senate changes to sections 610 and 612 would create entitlement authority, so no legal obligation can arise. The first element in the definition of entitlement authority is met in that VA health care benefits are authorized by sections 610 and 612, not by appropriations acts. However, the other statutory elements of entitlement authority are not. First, health care benefits are not payments, they are services. Second, there are limitations and areas of discretion on the provision of the health care benefits, as discussed above, not provided in the authorizing law. An individual cannot expect and is not assured of receiving the sought after benefits simply by meeting the statutory eligibility requirements.

Even if we assume that the amendments to sections 610 and 612 were to create entitlement authority, or a statutory entitlement, we question whether that would absolutely require the Congress to appropriate funds to meet the obligation. In fact, Congress might actually decide to terminate an entitlement program by failing to provide funds. Thus, in *Local 2577 AFGE* v. *Phillips*, 358 F. Supp. 60 (D.D.C. 1973), the court noted:

An authorization does not necessarily mean that a program will continue. Congress, of course, may itself decide to terminate a program before its authorization has expired, either indirectly by failing to supply funds through a continuing resolution or appropriation, or by explicitly forbidding the further use of funds for the programs . . . *Id.* at 75.

Relying on that case, our office has held that a statutory entitlement is limited by the availability of the necessary appropriations.

The Statement of Managers also includes language to highlight the intent that title XIX of the Congressional Budget and Impoundment and Control Act of 1974 would continue to apply. Under this legislation the use of the term "shall" is intended to enhance the eligibility of the specified veterans but not intended to diminish the status of all other categories of veterans eligible for care under current law. The VA would continue to be required to provide such needed care to all eligible veterans if resources have been appropriated and remain available. But the use of the term "shall" does not require that any specified level of appropriations be made and it is certainly my intent to underline that an entitlement as defined under the Congressional Budget Act has not been created.

Except for those deemed able to defray the cost of care, other non-service-connected veterans will continue to have the same eligibility for health care as under current law that for veterans age 65, and older, age would no

longer be the only factor in determining eligibility. The VA will continue to have discretionary authority to treat them on a space-available basis. Non-service-connected veterans with incomes above $20,000 for a single veteran and $25,000 for a married veteran with one dependend plus $1,000 for each additional dependent will be furnished care on the basis of an agreement to make a modest copayment, and if resources and facilities are otherwise available. The conferees categorically rejected the Administration's proposed means test and spend down theory in favor of a more equitable and less onerous approach which grants access to health-care irrespective of income.

Mr. President, under the conference agreement, outpatient care and nursing home care eligibility would remain the same as current law. I greatly regret that the House would not accept the Senate's provisions to prioritize eligibility for both inpatient and outpatient care. In my view, such an approach clearly would have provided service-connected and impoverished veterans with the highest priority for care.

Mr. President, in initiating a copayment for veterans who have been determined able to contribute a modest amount to the cost of their care, the conferees have taken a major step in redefining the parameters of VA care for certain non-service-connected veterans. It is important to remember that this country owes a great debt to veterans who served and sacrificed for their country. This legislation ensures care for veterans with service-connected disabilities and impoverished veterans. However, we also have to remember that resources are not unlimited and we face enormous deficits. The recent enactment of the so-called Gramm/Rudman balanced budget amendment certainly emphasizes the fact that the Congress and the country recognize the need to control spending and have taken an important step toward that end. I believe that this legislation responsibly meets the level of savings required of both the Senate and House Veterans' Affairs Committees.

The Administration's original proposal for a means test contained an $11,400 income cut-off for a single veteran and required a strict spend down of income by veterans above this threshold prior to becoming eligible for medical care. That approach was rejected by both the House and the Senate. Instead, we have income thresholds which are more realistic in terms of family income standards, and incorporated provisions which permit veterans with incomes over that threshold to use the VA if facilities and resources are available based on an agreement to contribute toward their care. The income threshold agreed to by the conferees combines both the Senate's across-the-board $25,000 threshold and the House's approach of having different thresholds for single and married veterans. These thresholds are clearly spelled out in the statement of managers accompanying the conference agreement.

Mr. President, under the conference agreement, a veteran being furnished hospital care and who is deemed not unable to defray the expense of care, would be required to pay the Medicare deductible, currently $492, for the first 90 days, and half of that deductible for each succeeding additional 90 days of care, within a 12-month period. The Medicare deductible would apply for each 90 days of care for veterans who are furnished VA nursing home care. The conference agreement does provide; however, that if the veteran had been transferred from a VA hospital to a nursing home, the veteran's initial $492 payment would apply for the nursing care until the expiration of the 90-day period. For outpatient and home-health care, veterans deemed able to pay would contribute a per visit payment of 20 percent of the VA average daily rate not to exceed the medicare deductible for each 90-day period. All of the inpatient payments during each 90-day period would count toward the outpatient cap. The same policy would apply regarding outpatient co-payments—they would count towards the inpatient care.

The adoption of income eligibility criteria is not only a reflection of the budgetary constraints facing the Congress, but also a commitment to continue to care for the nine categories of veterans defined by this legislation and an endorsement of the continuation of a comprehensive Va health-care system by allowing non-service-connected veterans with higher incomes to continue to have access to the VA system in return for a small partial payment.

THIRD PARTY REIMBURSEMENT

Mr. President, H.R. 3281 contains a provision, which for the first time, would achieve parity between the VA and private health care providers. This legislation would authorize prospectively reimbursement to the Federal Government under health-insurance contracts for the reasonable costs of health care and services furnished by the VA to non-service-connected veterans who have health insurance. Most health insurance plans and contracts contain exclusionary clauses which bar reimbursement to the United States for care provided by the VA. Recoveries under this provision are not intended in any way to reduce the annual appropriation for the VA health care system as all recoveries will be deposited into the U.S. Treasury. Both the House and the Senate have agreed on the basic policy on this issue and agree that a veteran who is otherwise insured must be allowed to use those insurance benefits for VA care as well as for private care.

The provisions contained in the Senate and House reconciliations bills were very similar. The conference agreement incorporates the essence of both the Senate and House provisions, several of which I would like to highlight.

The Administrator would be required to prescribe regulations which would govern the determination of the reasonable cost of care or services.

The regulations to be prescribed for determining the reasonable cost of care or services shall also provide that the determination of "reasonable cost" may not exceed an amount equal to that which the third party would pay for such care or services under prevailing rates of payment to non-Federal facilities in the same geographic area as the VA facility in which the care or services are furnished.

The establishment of a so-called third party reimbursement would not, in any way, restrict an eligible veteran's access to VA health-care, nor would it require a veteran to pay any deductible or copayment required under the terms of an insurance contract in order to receive care.

The law would also specify that a veteran's failure to pay a deductible or copayment required under the terms of an insurance contract would not preclude the Government from recovering from the third party; however, the amount of the recovery would be reduced by the amount(s) of the deductible or copayment. This provision would also authorize, subject to certain restrictions, a third party to inspect medical records of a health-plan beneficiary for whom recovery is sought, in order to enable the third party to verify that the care or services were furnished and meet the criteria generally applicable under the health-plan contract.

Finally, the VA would also be required to submit to the Congress reports on the implementation and results of the amendments made under this provision.

The third-party reimbursement provision contained in the conference agreement reflects certain recommendations made by private health insurers, concerning the constitutionality of such a provision with respect to existing insurance contracts, and the adequacy of cost-containment measures within the VA health-care system.

SERVICE-CONNECTED DISABILITY COMPENSATION COLA

Mr. President, the compromise would provide a 3.1-percent COLA to our Nation's service-connected disabled veterans and their dependents and survivors effective December 1, 1985. This COLA is the same as that provided to VA pension and Social Security recipi-

ents, also effective December 1, 1985. Due to the inability of the House and Senate to reach agreement on an omnibus compensation and veterans' benefits bill before adjournment sine die, the House and Senate Veterans' Affairs Committees have agreed to include the compensation COLA in the reconciliation bill in order not to delay any further the enactment of a COLA for service-connected veterans.

ADMINISTRATIVE REORGANIZATION

In April 1985, the VA Administrator selected McManis Associates Inc. to prepare an implementation plan for the modernization of DVB information management systems. Their plan was released on October 25, 1985. It suggested certain reforms for the modernization of the current benefits delivery system. Based on this report, the Administrator has proposed a reorganization of certain automated data processing functions. In a letter to me, as chairman of the Senate Veterans' Affairs Committee, dated November 1, 1985, (which I ask unanimous consent be inserted in the RECORD), the Administrator has requested a waiver of the "notice and wait" period required by section 210(B)(2) of title 38, United States Code. I believe giving those responsible for VA benefit payments authority over the data processing resources is a first step in the reforms necessary to improve VA data processing. I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

VETERANS ADMINISTRATION OFFICE OF ADMINISTRATOR OF VETERANS AFFAIRS,
Washington, DC, November 1, 1985.

Hon. Frank H. Murkowski,
Chairman, Committee on Veterans' Affairs, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The purpose of this letter is to report a planned administrative reorganization within the Veterans Administration (VA) involving the transfer of certain functions from the Office of Data Management and Telecommunications (ODM&T) to the Department of Veterans Benefits (DVB).

As you are aware, under the Congressional "report and wait" requirements of 38 U.S.C. § 210(b)(2), a detailed plan and justification must be submitted to the appropriate committees of Congress for certain VA administrative reorganizations involving a reduction during any fiscal year by 10 percent or more in the number of full time equivalent employees (FTEE) at a VA covered office or facility. The report must be made not later than the date on which the President submits his budget for the next fiscal year. Thereafter, no action can be taken to implement the reorganization until the first day of that fiscal year. Thereafter, no action can be taken to implement the reorganization until the first day of that fiscal year. This letter is submitted in order to satisfy the above-reporting requirement for a planned VA organizational transfer of certain automated data processing (ADP) functions as described below.

As you are aware, in April 1985, the Veterans Administration selected McManis Associates, Inc., to prepare an implementation plan to modernize the DVB benefits and services delivery systems. This plan was to be consistent with my policy statement mandating the full moderization of the Agency's data processing and communications systems so as to improve the quality of service provided to veterans and their families. The McManis study among other things found that there was limited end-user involvement in system design and development, limited systems training, and that there were inconsistent system utilization management practices. Based on these findings, I approved the McManis recommendations that DVB should have the authority, resources and responsibility for the systems development and greater operational oversight within overall agency standards and policy guidelines. Implementation of this recommendation requires the administrative reorganization which is the subject of this letter.

We propose to reorganize in order to move ADP program specialists closer to the DVB program specialists, and give DVB a greater role in ADP decisions. By giving DVB control of ADP resources, they will be able to better focus ADP expenditures on service delivery priorities. This reorganization will involve 362 ODM&T full time equivalent employees (FTEE). These organizational transfers will occur at VA Central Office (VACO), and at the Austin, Texas; Hines, Illinois; and Philadephia, Pennsylvania VA Data Processing Centers (DPC). The number of FTEE transferred as the result of this reorganization and the base 1986 ODM&T FTEE at each facility, are as follows: VACO—81/441; Austin—75/663; Hines—146/406; and Philadelphia—60/197.

The functions performed in the positions to be transferred are unique to the support of DVB programs and, after this transfer to DVB, ODM&T will no longer perform these functions. These functions, and the stations at which they are performed, are as follows: VACO—Benefits Automation Service, which designs all ADP programming for DVB, and some administrative support personnel; Austin DPC—Benefits Delivery System Division, which does programming for DVB in the areas of loan guaranty, the Beneficiary Identification and Records Location Subsystem (BIRLS), and debt collection (beginning in fiscal year 1986); Hines DPC—System Support Divisions, which handle programming for DVB benefits programs, such as Compensation and Pension, Education, and Vocational Rehabilitation, and which prepare the computer tapes for the Department of the Treasury to use in issuing benefits checks; and Philadelphia DPC—Systems Division, which does programming for VA applications. There will also be transferred, at each of the above stations, the functions of that part of the systems verification and testing element which performs systems quality control for the programming done by the benefits delivery system staff at each of these stations.

It is clear from the foregoing that this reorganization is simply an organizational transfer of employees. These employees will not be relocated to other stations. The great majority of them will experience no change in their functions, personnel status, immediate supervision, or even in the location of their workspace. Accordingly, there will be little or no cost impact as the result of this reorganization.

We believe that this reorganization is appropriate and advisable, and that it will have the desired effect of improving and making more efficient DVB benefits delivery systems by giving DVB direct control over the resources used for its ADP support. This reorganization has already been the subject of DVB briefings with staff of the House and Senate Veterans' Affairs Committees. Of course, we would be pleased to provide any additional information which you may desire concerning this reorganization.

I request your assistance in introducing, and supporting enactment of, a legislative waiver of the 38 U.S.C. § 210(b)(2) waiting period for this reorganization, so that these improvements in our organizational structure can be made as soon as possible. Suggested language for such a legislative waiver is enclosed. Absent such a waiver, we must wait until fiscal year 1987 to implement this reorganization.

I appreciate your support for our efforts to improve benefits delivery for our Nation's veterans.

Advice has been received from the Office of Management and Budget that there is no objection to the presentation of this letter and legislative proposal from the standpoint of the Administration's program.

Sincerely,

HARRY N. WALTERS,
Administrator.

Under current law the VA may not, in any fiscal year, implement a reorganization involving a more than 10-percent reduction in the number of full-time equivalent employees at any VA facility with more than 25 employees unless the Administrator, not later than the date on which the President submits the budget for that year, provides "A report containing a detailed plan and justification for the reorganization." The "notice and wait" provisions of section 210(b)(2) of title 38 would delay the implementation of the proposed reorganization until the next fiscal year. This bill would provide a waiver of the notice and wait requirement so that VA may proceed immediately with the proposed reorganization.

I strongly believe that DVB does have data processing problems which require immediate attention. This waiver would allow VA to reorganize immediately and to proceed with the process of implementing needed reforms. The General Accounting Office [GAO] is studying VA's data processing capabilities as well as the recommendations of McManis Associates. GAO has informally expressed concerns about hardware and software procurement plans recommended by the McManis study and the lack of comprehensive data processing planning on the part of the VA. I endorse the proposed reorganization in the belief that it will establish a structure conducive to reform. However, in doing so, I strongly urge the VA Administrator, Harry Walters, to work with the committee and the GAO to ensure that data processing reforms

are well thought out and carefully planned. I will be monitoring closely DVB's process in improving its data processing systems to meet the agency's and the Congress' needs for timely and accurate information in the most cost effective and efficient manner.

SAVINGS ESTIMATE

The Congressional Budget Office has indicated that total savings from the enactment of the income eligibility criteria third party reimbursement and the 3.1-percent COLA will be in excess of $1.26 billion over the next 3 years, which is more than $100 million more than our mandated reconciliation savings. These savings have been achieved without the reduction of any program or service to our Nation's veterans and will, in fact, serve as a model of the commitment to the Nation to continuing to provide needed health care to eligible veterans.

CONCLUSION

In closing, I want to note once again my thanks to my distinguished counterpart on the House Veterans' Affairs Committee, SONNY MONTGOMERY as well as the ranking minority member of this committee, ALAN CRANSTON and JOHN PAUL HAMMERSCHMIDT, the ranking members of the Senate and House Veterans' Affairs Committees. The staffs have worked hard and very closely to work through the small details as well as some rather large policy differences on certain issues, to come up with a very fair and well balanced compromise. I especially want to thank Mack Fleming, chief counsel of the House Veterans' Affairs Committee, his staff, Pat Ryan, Jack McDonnell, Victor Raymond, Arnold Moon, and Charles Peckarsky; as well as Rufus Wilson, the minority chief counsel of the House Veterans' Affairs Committee and Kingston Smith; Jon Steinberg, Senator CRANSTON's chief counsel and his fine staff, Ed Scott, Bill Brew, Babette Polzer, Nancy Billica, and Ingrid Post, who is one of the most dedicated workers I know of in the Senate. A special thanks to Bob Cover, House legislative counsel, who labored tirelessly to perfect the bill language. Last, but certainly not least, I want to thank my own fine staff headed by Anthony Principi, chief counsel, and including Julie Susman, Cathy McTighe, Cynthia Alpert, Chris Yoder, Lisa Moore, Judy Boertlein, Jody Sanders, and Kay Eckhardt. Mr. President, I urge the adoption of the conference report and final passage of the Omnibus Reconciliation Act of 1985.

Mr. President, I ask unanimous consent that the statement of managers of title XIX be included at the appropriate place in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

TITLE XIX—VETERANS' PROGRAMS

On October 24, 1985, the House passed H.R. 3500, the proposed "Omnibus Budget Reconciliation Act of 1985". Title X of the bill included the provisions of H.R. 1538, ordered reported by the House Committee on Veterans' Affairs on September 11, 1985, to satisfy its reconciliation instructions contained in section 2 of the First Concurrent Resolution on the Budget for Fiscal Year 1986 (S. Con. Res. 32).

On November 14, the Senate passed H.R. 3128, the proposed "Deficit Reduction Amendments of 1985", after striking out the House-passed text and inserting in lieu thereof the text of S. 1730, title XI of which contained the legislation reported by the Senate Committee on Veterans' Affairs to satisfy its reconciliation instructions in section 2 of the FY 1986 budget resolution.

On December 5, the House amended the Senate-passed H.R. 3128 by inserting the House-passed texts of H.R. 3500 and H.R. 3128, and requested a conference with the Senate. Title X of H.R. 3500 as it originally passed the House was redesignated as Title X (sections 1951-1982) of Division A of the House amendment to the Senate amendment to H.R. 3128.

The following material refers to the Senate amendment to H.R. 3128 as the "Senate bill", to the House amendment to the Senate amendment as the "House bill", and to title XIX of the Reconciliation Act conference report as the "conference agreement".

SUBTITLE A—HEALTH CARE

Both the House bill (section 1972) and the Senate bill (sections 1101-07) would, as discussed below, amend chapter 17 of title 38, United States Code, to revise existing eligibilities for health care furnished by the Veterans' Administration, and to establish a "health-care income threshold" for purposes of determinations of eligibility based on "inability to defray" the cost of needed care.

The conference agreement (section 19011) contains such provisions as discussed below.

HOSPITAL CARE

House bill

The House bill would amend the eligibility requirements, set forth in present section 610(a) of title 38, for veterans seeking VA hospital care. The six categories of veterans eligible for such health care under current law would be revised and restated as nine separate categories, and the separate basis of eligibility for non-service-connected veterans 65 years of age or older (without regard to income) contained in current law would be eliminated.

Under the House bill, the Administrator would be required to furnish hospital care determined by the Administrator to be necessary to:

(1) any veteran for a service-connected disability;

(2) a veteran discharged for a disability incurred or aggravated in line of duty;

(3) a veteran entitled to receive disability compensation;

(4) a veteran disabled as a result of VA treatment or vocational rehabilitation;

(5) certain Vietnam veterans exposed to certain toxic substances and veterans exposed to ionizing radiation from nuclear explosions;

(6) former prisoners of war;

(7) veterans of the Spanish American war, Mexican border period, or World War I; and

(8) veterans who are unable to defray the expenses of necessray care.

The current limitation on furnishing hospital care "within the limits of Veterans' Administration facilities" would no longer be applicable to these eight categories of eligible veterans.

A veteran would be eligible for necessary medical care under category (8) if the veteran's family's income in the 12 months preceding the application for care was not greater than 3.34 times the maximum annual rate of VA pension payable to totally disabled veterans (referred to below as the "health-care income threshold"). In determining the incomes of veterans for the purpose of this category, the administrator would be required to use the same methods and criteria used to determine annual income (including taking into account family income) for the purposes of VA improved pension eligibility under chapter 15 of title 38, United States Code. The maximum income level for health care would be increased each year by the same percentage increase applicable to the maximum pension rate. Thus, as of the time the House passed the bill, the "health care income threshold" would be $19,068 for a veteran with no dependents and $24,977 for a veteran with one dependent, plus $3,233 for each additional dependent. On December 1, 1985, the VA pension income standard increased by 3.1 percent, by virtue of present section 3112(a) of title 38, United States Code, and reference to the consumer price index.

The House bill would establish, as a ninth category of veterans eligible for hospital care, those seeking care for treatment of non-service-connected disabilities who do not fall into one of the eight other categories. Thus, this last category would consist of those veterans whose income and assets exceed the health-care income eligibility threshold. They would be required to make an annual payment equal to the Medicare deductible ($492 in 1986) in order to receive needed care. Such care could be provided only "within the limits of Veterans' Administration facilities."

The House bill would also provide that nothing in these provisions would (1) require the Administrator to furnish hospital care in a facility other than a VA facility or to furnish care to a veteran to whom another agency of a Federal, State, or local government has a duty to provide care in an institution of that government, or (2) restrict the Administrator's discretion to determine the appropriateness of furnishing medical services, therapies, or programs under chapter 17 of title 38 or in what manner they will be furnished.

Senate bill

The Senate bill would create three categories of eligibility for hospital care. Under the first category, the Administrator would be required to furnish hospital care determined to be reasonably necessary for service-connected disabilities and for any disability of veterans who have service-connected disabilities rated at 50 percent or more. This care would be required to be furnished through VA facilities or, to the extent authorized, through non-VA facilities except in the case of a veteran under incarceration as to whom the Administrator could (1) decide not to furnish care in a VA facility if to do so would not be feasible in terms of the security that would be necessary and (2) provide care under contract in a non-VA facility to the extent authorized.

Under the second category, which would remain essentially unchanged from current law (except that the separate basis of eligi-

bility for veterans 65 years of age or older would be eliminated), the Administrator would be authorized, through VA facilities or, to the extent authorized, through non-VA facilities, to furnish reasonably necessary hospital care to veterans with service-connected disabilities rated at less than 50 percent; veterans who, but for the receipt of retired pay, would be entitled to disability compensation; veterans who are eligible for compensation for disabilities incurred as VA patients or as participants in a VA vocational rehabilitation program; veterans who were discharged from military service for disabilities incurred or aggravated in the line of duty; former prisoners of war; Vietnam veterans exposed to certain toxic substances and veterans exposed to ionizing radiation from nuclear explosions; Spanish American War, Mexican border period, or World War I veterans; and veterans unable to defray the cost of necessary care.

Under the third category, the Administrator would have the authority, through VA facilities or, to the extent authorized, through non-VA facilities, to furnish, to the extent facilities and resources are otherwise available, reasonably necessary hospital care for the non-service-connected disability of a veteran not included in categories one or two whose annual family income for the calendar year preceding the veteran's application for care exceeds $25,000 and who agrees to make certain payments to the United States in connection with such care. In determining the incomes of veterans for the purpose of this category, the Administrator would be required to use the same methods and criteria used to determine annual income (including taking into account family income) for the purposes of VA improved pension eligibility. Further, the Administrator would be given authority to prescribe regulations defining the circumstances under which a non-service-connected veteran having an annual income or estate above a certain level would be ineligible for VA care

Conference agreement

The conference agreement (section 19011(a)) generally follows the House provision. It would establish two groups of VA health-care eligibilities. Under the first group, the conference agreement would require the Administrator to furnish needed hospital care through VA facilities, and authorize the Administrator to furnish needed hospital care in non-VA facilities as authorized, to the first eight categories from the House bill except that the third category from the House bill is subdivided into two categories—veterans with service-connected disabilities rated at 50 percent and above and any other veterans who have service-connected disabilities. The ninth category of veterans would consist of veterans who are unable to defray the expenses of necessary care—those who are receiving chapter 15 VA improved pension or are eligible for Medicaid or whose annual family incomes do not exceed the "Category A threshold" ($15,000 for veterans with no dependents and $18,000 for veterans with one dependent with an increase of $1,000—approximately equal to the amount of the VA pension) allowance ($999 as of December 1, 1985)—for each additional dependent). These amounts would be increased on January 1 of each year (beginning January 1, 1987) by the same percentage by which VA chapter 15 improved pension benefits are increased on the preceding December 1 (pursuant to section 3112 of title 38).

The conferees intend that, for the categories of veterans specified in section 610(a)(1) of title 38 (as revised by this section)—those to whom the Administrator is required to furnish hospital care—the VA's sole obligation with respect to needed hospital care for these veterans is (1) if a veteran is in immediate need of hospitalization, to furnish an appropriate bed at the VA facility where the veteran applies or, if none is available there, to furnish a contract bed (as authorized under current law as recodified in new section 603) or to arrange to admit the veteran to the nearest VA medical center (VAMC), or Department of Defense facility with which the VA has a sharing agreement, with an available bed, or (2) if the veteran needs non-immediate hospitalization, to (A) schedule the veteran for admission where the veteran applied, if the schedule there permits, or (B) refer the veteran for scheduling and admission to the nearest VAMC, or DOD facility with which the VA has a sharing agreement, with an available bed and facilitate the veteran's admission there. The VA, of course, as also noted above, would also retain any existing discretionary authority to furnish health-care to these veterans.

Also, if there are 2 or more veterans applying for the same bed at a particular facility on a non-emergent basis and one is seeking care for a service-connection disability or has a 50-percent-or-more service-connected disability, the conferees intend that that veteran should receive the bed. With respect to the remaining veteran, he or she, as noted above, would be scheduled for the next available bed at the VA facility where the veteran applies or, if none is available there, would be furnished a contract bed (as authorized under current law as recodified in new section 603) or arrangements would be made (1) to admit the veteran to the nearest VA medical center (VAMC), or Department of Defense facility with which the VA has a sharing agreement, with an available bed, or (2) if the veteran needs non-immediate hospitalization, to (A) schedule the veteran for admission where the veteran applied, if the schedule there permits, or (B) refer the veteran for scheduling and admission to the nearest VAMC, or DOD facility with which the VA has a sharing agreement, with an available bed and facilities the veteran's admission there. The VA, of course, as also noted above, would also retain any existing authority to furnish health-care to that veteran.

The conference agreement (section 19011(a)) would provide for a second eligibility group as to which the Administrator "may", through VA facilities and through non-VA facilities as authorized, furnish needed hospital care to the extent that resources and facilities are available, to non-service-connected veterans with incomes above $15,000 for those with no dependents and $18,000 for those with one dependent, plus $1,000 for each additional dependent. For those non-service-connected veterans with incomes above the "Category B" threshold ($20,000 for those with no dependents and $25,000 for those with one dependent, plus $1,000 for each additonal dependent), the Administrator "may", through VA facilities and through non-VA facilities as authorized, and to the extent that resources and facilities are otherwise available, furnish needed hospital care if the veteran agrees to make certain payments to the VA in connection with that care. Each of these amounts would be increased on January 1 of each year (beginning January 1, 1987) in accordance with the VA pension-COLA increase percentage.

The conference agreement further includes a provision specifying that nothing in section 610 of title 38, relating to eligibility for hospital and nursing home care (as revised by the conference agreement), requires the VA to furnish care to a veteran to whom another government entity has a legal duty to provide care in a government institution—for example, this would apply to an incarcerated veteran.

With respect to the revisions in hospital care eligibility, the conferees intend that care be furnished to service-connected disabled veterans, low-income veterans, and, to the extent resources are available, other eligible veterans.

The conferees note with approval the statements made by the Chairman and Ranking Minority Member of the Senate Committee on Veterans' Affairs during the debate on the Senate bill (pages 31955 and 31958 respectively, of the CONGRESSIONAL RECORD for November 14) with respect to the effect of the use of the word "may" in providing VA health-care eligibility (in current law and the revised eligibility provisions) from the standpoint that the term does not connote discretion, on the part of the Administration, to withhold funds appropriated for the furnishing of care or, on the part of the VA, to withhold needed care that the VA has the capacity to provide. As indicated there, and the conferees agree, the amount of care that the VA provides to eligible veterans necessarily depends upon the level of funds appropriated for that purpose.

The conferees further note that this legislation would not change current law or practice regarding the beneficial travel program.

The conferees recognize that in some cases it may not be readily determined with certainty, at the time that the veteran first applies for VA care during a calendar year, to which eligibility category the veteran belongs. Thus, where necessary to avoid delaying medical attention beyond the point at which it may be needed, the conferees intend that the VA make tentative eligibility-category determinations based on the available evidence at the time, subject to modification when a final determination can be made.

Also, in light of the uncertainties that may exist at the time of application and in view of the fact that even determination based on apparently sufficient information may need to be changed on the basis of new evidence, the conferees expect the VA to require at least those veterans applying for VA care for the first time during a calendar year to sign an agreement to make the payments required by law if it is ultimately determined, by reason of their income during the preceding calendar year and any other matters relating to eligibility, that their eligibility is contingent upon their agreeing to make such payments. Of course, the agreement should also state what those payment amounts are.

In a similar vein, the conferees note that veterans with annual incomes above the applicable income threshold for payments would generally be eligible for care or services only upon the veterans (or someone authorized to act for him or her) agreeing to pay for those services before they are furnished. However, the VA has full authority under current section 611(b) to furnish hospital care or medical services in emergency cases and to charge appropriately for such care, and the conferees stress that this

emergency authority would be applicable in the case of a veteran in this category of eligibility who is unable to execute such as agreement prior to the commencement of care. What, if any, payments the veteran would ultimately be required to make would, of course, depend on the eligibility determination made after the fact.

The conferees expect that the form used for the agreement to pay would clearly state eligibility criteria as well as potential liability.

NURSING HOME CARE

House bill

The House bill would provide that the VA "may within the limits of Veterans' Administration facilities" furnish nursing home care to the nine categories of veterans eligible for hospital care (as discussed above) under the House bill. Those veterans having incomes above the applicable "health-care income threshold" in the House bill could be furnished nursing home care if they agreed to make certain prescribed payments in connection with their care.

Senate bill

The Senate bill would provide the Administrator, through VA facilities or through non-VA facilities as authorized, "shall" furnish nursing home care determined to be reasonably necessary for a service-connected disability and "may" furnish nursing home care determined to be reasonably necessary for any veteran having hospital care eligibility under the Senate bill (as discussed above). Those having incomes above the applicable health-care income eligibility threshold in the Senate bill could be furnished nursing home care if they agreed to make certain prescribed payments in connection with their care.

Conference agreement

The conference agreement (section 19011(a)) makes no change in VA nursing home care eligibilities in current law except to provide that non-service-connected veterans with incomes above the "Category B threshold" would be eligible only upon agreeing to make certain payments in connection with their care.

DOMICILIARY CARE

House bill

The House bill contained no provision regarding eligibility for VA domiciliary care.

Senate bill

The Senate bill would authorize the Administrator to furnish reasonably necessary domiciliary care through VA facilities to veterans who are determined by the Administrator to be incapacitated from earning a living and to have no adequate means of support.

Conference agreement

The conference agreement makes no change in VA domiciliary care eligibilities in current law.

In leaving current law intact regarding domiciliary-care eligibility, the conferees are not expressing their satisfaction with the status quo. Both Committees on Veterans' Affairs plan to hold hearings next year to consider appropriate revisions to the eligibility for domiciliary care as provided by section 610(b)(2) of title 38.

OUTPATIENT TREATMENT AND HOME HEALTH SERVICES

House bill

The House bill would require the Administrator to furnish outpatient treatment to those veterans with outpatient treatment eligibility under current law, but would also specify that there is no requirement to furnish services to those non-service-connected disabled veterans with incomes that exceed the applicable health-care income eligibility threshold discussed above (under the heading "Hospital Care") unless they agree to make payment in connection with such services.

The House bill would make no change in eligibility for home health services except to provide that the eligibility of a non-service-connected veteran whose income exceeds the health-care income eligibility threshold would be contingent upon the veteran's agreement to make payment in connection with such services.

Senate bill

The Senate bill would amend current law to require the Administrator—"shall" rather than "may" as in current law—to furnish (directly or by contract) outpatient treatment and home health services determined to be reasonably necessary to any veteran for a service-connected disability and for any disability of a veteran with a service-connected disability rated at 50 percent or more, except in the case of a veteran under incarceration as to whom the Administrator could (1) decide not to furnish care in a VA facility if to do so would not be feasible in terms of the security that would be necessary and (2) provide care under contract in a non-VA facility to the extent authorized. Otherwise, the Senate bill would not modify current eligibilities for outpatient treatment and (except to increase the maximum amount that may be expended for home structural alterations from $600 to $2,500 for a veteran with a 50-percent-or-more-service-connected disability) home health services except to specify that non-service-connected disabled veterans with incomes above the applicable health-care income eligibility threshold would be eligible only upon agreeing to make payment in connection with such treatment or services and to the extent that resources and facilities are otherwise available.

Conference agreement

The conference agreement (section 19011(b)) would make no change in current law eligibilities relating to outpatient treatment or home health services (except with respect to the cap on home health structural alterations payments, described above) except to provide that non-service-connected veterans with incomes above the Category B threshold (discussed below under the heading "INCOME THRESHOLDS") would be eligible only upon agreeing to make payment in connection with such treatment or services and to the extent that resources and facilities are otherwise available.

AMOUNT OF PAYMENTS

Both the House and Senate bills contain provisions to specify the amounts that veterans with incomes above the income thresholds must agree to pay in order to be eligible for VA health care.

House bill

The House bill would establish payment requirements as follows:

Hospital care or nursing home care, or both: During any 12-month period, the lesser of the cost of furnishing the care or the amount of the inpatient Medicare deductible in effect at the beginning of the applicable 12-month period ($492 in 1986).

Outpatient treatment: For each visit (except for outpatient services furnished to complete treatment following hospitalization), the amount equal to 20 percent of the estimated average cost of an outpatient visit to a VA facility during the fiscal year in which the treatment is furnished.

During any 12-month period, a veteran would not be required to pay in total for any mode of care or combination of modes of care an amount greater than the amount of the inpatient Medicare deductible.

Senate bill

The Senate bill would establish payment requirements as follows:

Hospital care or nursing home care, or both: For each 60 days of care during an episode of care (a period beginning on the first day of hospital or nursing home care and ending at the close of the first period of 60 consecutive days thereafter during which the veteran receives neither hospital nor nursing home care), the lesser of the cost of furnishing the care or the amount of the inpatient Medicare deductible in effect when the care is furnished.

Outpatient treatment: For each visit, the amount equal to a percentage—the Percentage that Medicare generally does not pay for such treatment (20 percent at present)—of the estimated average cost of an outpatient visit in a VA facility during the fiscal year in which the treatment is furnished.

Conference agreement

The conference agreement (section 19011(a)(2) and (b)(2)(F)) contains provisions specifying, in the cases of veterans who must agree to make payments in order to be eligible for VA health care (those with incomes above the Category B level), the amounts that they must pay, as follows:

Hospital care: During any 365-day period (1) for the first 90 days of care (or part thereof), the lesser of the cost of furnishing the care or the amount of the inpatient Medicare deductible in effect at the beginning of the 365-day period, and (2) for each succeeding 90 days of care (or part thereof), the lesser of the cost of furnishing the care or one-half of the amount of that inpatient Medicare deductible.

Nursing home care: During any 365-day period, for each 90 days of care, the lesser of the cost of furnishing the care or the amount of the inpatient Medicare deductible.

Outpatient treatment: For each outpatient or home health visit, the amount equal to 20 percent of the estimated average cost of an outpatient visit to a VA facility during the fiscal year in which the treatment is furnished, but not to exceed during any 90-day period the amount of the inpatient Medicare deductible in effect at the beginning of that period.

Combination of hospital and nursing home care: In the case of a veteran who pays the inpatient-Medicare-deductible amount in connection with VA-furnished hospital or nursing home care and who, before using 90 days of the initial mode of care (hospital or nursing home) within a 365-day period, is furnished the other mode of care, the veteran would not be required to make any payment for the second mode until either (1) the number of days of hospital and nursing home care combined exceed 90, or (2) the beginning of the next 365-day period, whichever occurs first. If the veteran pays an amount equal to one-half of the inpatient-Medicare-deductible amount in connection with receiving hospital care (as when the veteran is receiving more than 90 days of hospital care in a 365-day period) and, before using 90 days of hospital care within the applicable 365-day period, re-

ceives VA-furnished nursing home care, the veteran would be required to pay one-half of the deductible amount in connection with the number of days of nursing home care that, when added to the hospital days, do not exceed 90 within that 365-day period.

Payments for combinations of outpatient treatment and hospital and nursing home care: A veteran would not be required to pay an amount greater than the inpatient Medicare deductible in connection with any combination of outpatient and inpatient care furnished during any 90-day period.

The conferees stress that the legislation makes no change in current eligibility for contract hospital, nursing home, or outpatient care and the way that eligibility is applied and intend the Administrator to ensure that expenditures for veterans eligible for care by virtue of agreeing to make payment to the VA have the lowest priority for the use of funds available for contract care as well as the lowest priority for inpatient, outpatient, and nursing home care furnished through VA facilities.

PRIORITIES

House bill

The House bill would repeal the provision, section 612(i) of title 38, requiring the Administrator to implement through regulations the priorities specified in that section for the furnishing of outpatient treatment.

Senate bill

The Senate bill would require the Administrator to prescribe regulations to ensure the implementation of priorities specified in the Senate bill in the furnishing of hospital, domiciliary, and nursing home care and medical services and would require the Administrator to ensure that no guideline, regulation, or other VA issuance has the effect of encouraging the furnishing of care or services in any way inconsistent with such priorities to a veteran whose eligibility is based on agreement to make payments.

Conference agreement

The conference agreement does not contain any such provisions related to priorities except a provision (in section 19011(b)(4)) adding veterans in receipt of VA improved pension under chapter 15 of title 38, as a new, sixth priority for outpatient care under present section 612(i).

INCOME THRESHOLDS

House bill

The House bill would amend section 622 of title 38, relating to evidence of veteran's "inability to defray the cost of necessary expenses" in connection with establishing eligibility for VA health care, so as to provide that (in additon to veterans in receipt of any VA pension benefits or eligible for Medicaid) a veteran shall generally be presumed to be "unable to defray" the cost of care if the veteran's family income for the 12-month period preceding the veteran's application for care was equal to or less than 3.34 times the maximum annual rate of improved pension payable to totally disabled veterans under chapter 15 of title 38 (as increased annually pursuant to section 3112 of title 38). Thus, this income threshold amount at the time the House bill was passed was $19,068 for veterans with no dependents and $24,977 for veterans with one dependent, plus $3,233 for each additional dependent. In determining a veteran's annual family income, the Administrator would consider the same items and sources of income and would allow the same exclusions as are considered and allowed under the improved pension program.

Senate bill

The Senate bill would amend section 622 to provide generally that (in addition to veterans in receipt of any VA pension benefits or eligible for Medicaid) a veteran shall be determined to be "unable to defray" the cost of care if, during the calendar year preceding the date of the veteran's application for care, the veteran's family income is not greater than $25,000 and would provide for that amount to be increased by the same percentage and at the same time as each cost-of-living adjustment is made in chapter 15 VA improved pension benefits pursuant to section 3112 of title 38. In determining a veteran's annual family income, the Administrator would be required to consider the same items and sources of income and to allow the same exclusions as are considered and allowed under the improved pension program.

The Senate bill would also provide the Administrator with discretionary authority, in order to avoid hardship, to increase the above-mentioned income level for a specified geographic area.

Conference agreement

The conference agreement (section 19011(c)) would amend present section 622 to provide generally that a veteran shall be determined to be unable to defray the necessary expenses of hospital care if the veteran receives VA improved pension or is eligible for Medicaid, or if, during the calendar year immediately preceding the veteran's application for care, the veteran's family income is not greater than $15,000 for a veteran with no dependents or $18,000 for a veteran with one dependent, plus $1,000 for each additional dependent.

A veteran would be considered not unable to defray the necessary expenses of care and thus liable for making certain payments for care (discussed above under the heading, "AMOUNT OF PAYMENTS") if the veteran's family income exceeds the Category B threshold—is greater than $20,000 for a veteran with no dependents or greater than $25,000 for a veteran with one dependent, plus $1,000 for each additional dependent. Each of the above amounts would be increased on January 1 of each year (beginning January 1, 1987) by the percentage that chapter 15 VA improved pension benefits are increased, pursuant to section 3112(a) of title 38, effective the preceding December 1.

In determining a veteran's annual income, the Administrator would be required to consider the same items and sources of income and to allow the same exclusions as are considered and allowed under the chapter 15 VA improved pension program.

CONSIDERATION OF ASSETS IN DETERMINING ELIGIBILITY

House bill

The House bill would provide that the Administrator may refuse to determine that the veteran is unable to defray necessary medical expenses if the veteran or the veteran's immediate family has sufficient assets so that, under all the circumstances, it is reasonable that some part of those assets be consumed for the veteran's maintenance.

Senate bill

The Senate bill would provide that the Administrator shall not determine that a veteran is "unable to defray" the cost of care if the veteran or the veteran's immediate family has sufficient assets so that, under all the circumstances, the Administrator finds it unreasonable to make that determination. In determining the amount of assets, the Administrator would be required to consider the same items as the Administrator considers in determining the amount of assets for purposes of the chapter 15 improved pension program.

Conference agreement

The conference agreement (section 19011(c)) follows the House bill. In determining a veteran's assets for this purpose, the Administrator would be required to consider the same items as the Administrator considers in determining the amount of assets for purposes of the chapter 15 VA improved pension program.

CERTAIN ADJUSTMENTS OF INCOME ELIGIBILITY DETERMINATIONS

The conference agreement (revised section 622(b) of title 38) would enable the Administrator to adjust a veteran's income threshold status where necessary in order to avoid hardship to the veteran in certain cases in which the veteran's income has dropped off substantially from the preceding calendar year amount.

REPORTS

Both the Senate bill (section 1108) and the House bill (section 1975) would require the Administrator of Veterans' Affairs to submit to the Committees on Veterans' Affairs of the Senate and the House of Representatives reports relating to the furnishing of health care to veterans after the enactment of this Act.

The conference agreement (section 19011(e)) would blend the Senate and House reporting requirements, with three annual reports due by February 1 of 1987, 1988, and 1989, and require the Administrator to include in the reports information regarding the numbers and characteristics of, and health care furnished to, veterans (and amounts of payments by them where appropriate) who are eligible for VA care by reason of any of the proposed new income threshold criteria, and the numbers of and health care furnished to veterans in each of the other categories of eligibility, with breakdowns, in the case of such veterans with service-connected disabilities, for each percentile disability rating.

TECHNICAL REVISION OF AUTHORITY TO CONTRACT FOR HOSPITAL CARE AND MEDICAL SERVICES

The Senate but not the House bill (1) would delete section 601(4)(C) of title 38, which includes within the definition of "Veterans' Administration facilities"—and thus, in conjunction with provisions in section 610 and 612, authorizes the VA to contract for hospital care or medical services with—private facilities in certain cases when VA facilities are not capable for furnishing economical care because of geographical inaccessibility or of furnishing the care of services required, and (2) replace that provision with a new section 603, which would recodify current law under section 601(4)(C), for purposes of clarity, without making any substantive change.

The conference agreement (section 19012) follows the Senate provision.

RECOVERY BY THE UNITED STATES OF THE COST OF CERTAIN HEALTH CARE AND SERVICES

Both the Senate bill (section 1111) and the House bill (section 1973) would amend present section 629 of title 38, United States Code—relating to the United States' authority to recover under workers' compensation laws or plans, from automobile accident reparation (auto no-fault) insurers, and from

crime-victim compensation programs the reasonable costs of VA-furnished non-service-connected health care to the extent that the insurer or program would be liable to a non-Federal provider—so as (1) to add authority for the United States to recover from a third party under a health-plan contract (a defined term that includes, for example, health-insurance policies) the reasonable costs of VA care furnished to a veteran who does not have a service-connected disability and is entitled to care or reimbursement for care from the insurer; (2) to require the Administrator to prescribe regulations to govern determinations of the reasonable cost of care or services; (3) expressly to authorize the Administrator to compromise, settle, or waive claims of the United States under section 629; (4) specify that money collected under section 629 shall be deposited in the Treasury; and (5) to provide for the changes in existing law made by amendments to section 629 to apply prospectively, that is, only with respect to care furnished after the date of enactment and only with respect to health-plan contracts that are entered into, renewed, or modified after the date of enactment.

The conference agreement (section 19013) contains these provisions.

The conferees note that, in revising the wording of existing provisions of section 629 pertaining to recovery under workers' compensation laws or plans, from automobile accident reparation insurers, and from crime-victim compensation programs, the conferees do not intend to make any substantive revisions in current law or in its application or to overrule any judicial interpretations of these provisions.

The Senate bill, but not the House bill, would delete from section 629(b) provisions specifying that the amount that the United States may recover under that section may not exceed the lesser of (1) the reasonable cost of the care involved as determined by the Administrator, or (2) the maximum amount specified by applicable State or local law or by any relevant contractural provision.

The conference agreement (revised section 629(a)(1) of title 38) follows the Senate provision.

The conferees agree that, in light of the provisions in section 629(a) providing for recovery by the United States of the reasonable cost of the VA-furnished care "to the extent" that the veteran (or the provider of the care) would be eligible for payment for the care had it been furnished by a non-Federal provider, the provisions being deleted are surplusage.

The Senate bill, but not the House bill, would specify, in the case of a health-plan contract containing the requirement for payment of a deductible or copayment by the veteran, (1) that the veteran's not having paid the deductible or copayment with respect to VA-furnished care does not preclude recovery under section 629, (2) that the amount that the United States may recover under section 629 shall be reduced by the appropriate deductible or copayment amount, or both, and (3) that a veteran eligible for VA care shall not be required by reason of section 629 to make any copayment or deductible payments in order to receive such care.

The conference agreement (revised section 629(a)(3)) contains these provisions.

The Senate bill, but not the House bill, would (1) require the Administrator, before prescribing the regulations for determining the reasonable cost of care or services (discussed above), to consult with the Comptroller General of the United States; (2) require the Comptroller General, within 45 days after the regulations (or any amendment to them) are prescribed, to submit to the Committees on Veterans' Affairs of the Senate and the House of Representatives the Comptroller General's comments on and recommendations regarding such regulations (or amendments); and (3) require that the regulations provide that in no event may such reasonable cost exceed an amount equal to what the third party would pay for the care or services under the prevailing rates applicable under its contracts with non-Federal facilities in the geographic area in which the VA facility that provided the care or services is located.

The conference agreement (revised section 629(c)(2)) follows the Senate amendment.

The House bill, but not the Senate bill, would provide the Administrator with express authority to enter into agreements with health-plan contractors for the purpose of determining reasonable costs.

The conference agreement does not contain this provision.

The conferees note that the Administrator is already authorized by section 213 of title 38, relating to the Administrator's authority to enter into contracts for necessary services, to enter into such agreements.

Both the Senate and the House bills would require that the medical records of a health-plan beneficiary for the cost of whose care recovery is sought be made available for the purpose of enabling the third party to verify that the care for which recovery is sought was furnished. The Senate bill, but not the House bill, would also provide that the records shall be made available under such conditions to protect their confidentiality as the Administrator shall prescribe in regulations and that the records may also be made available to permit the third party to verify that the provision of the care involved meets criteria generally applicable under the health-plan contract.

The conference agreement (revised section 629(h)) follows the Senate bill.

The Senate bill, but not the House bill, would require the Administrator to submit to the Committees on Veterans' Affairs a 6-month report and annual reports on the process for and results of the implementation of the amendments to section 629.

The conference agreement would require two such reports, one due not later than 6 months after the date of enactment and the other, to provide information through at least the end of fiscal year 1987, due not later than February 1, 1988.

MEDICARE PROVIDERS' ACCEPTANCE OF VETERANS' ADMINISTRATION BENEFICIARIES AT MEDICARE RATES

The House bill (section 1974), but not the Senate bill, would amend chapter 17 of title 38, United States Code, relating to VA health care, to insert a new section 625 to require non-Federal providers of hospital services under the Medicare program to accept VA beneficiaries on a basis similar to that on which they accept Medicare beneficiaries; to require those providers to accept VA payments made in accordance with VA regulations as payment in full; to authorize the Administrator to report violations of these requirements to the Secretary of Health and Human Services; and to authorize the Secretary to terminate a provider's participation in the Medicare program on the basis of such violations.

The conference agreement does not contain this provision.

SUBTITLE B—COMPENSATION RATE INCREASES

DISABILITY COMPENSATION

House bill

The House bill (sections 1962 through 1964) would amend chapter 11 of title 38, United States Code, relating to compensation for service-connected disability, to increase by 3.7 percent, effective December 1, 1985, the basic rates of service-connected disability compensation for veterans, the rates payable for certain severe disabilities, the dependents' allowances payable to veterans rated 30 percent or more disabled, and the annual clothing allowance for certain disabled veterans.

Senate bill

The Senate bill (section 1121) would limit the fiscal year 1986 disability compensation COLA to a maximum of 3.7 percent—the same percentage that the Congressional Budget Office projected for the fiscal year 1986 Social Security/VA pension cost-of-living adjustment at the time the Senate Veterans' Affairs Committee reported its reconciliation recommendations to the Senate Budget Committee. Thereafter, on December 2, 1985, the Senate passed S. 1887 providing (in sections 101 through 103) for a 3.1-percent increase, the same percentage as the actual percentage increase for the Social Security/VA pension cost-of-living adjustments, effective December 1, 1985.

Conference agreement

The conference agreement (sections 19031 through 19033) would increase these rates and allowances, effective December 1, 1985, by 3.1 percent.

DEPENDENCY AND INDEMNITY COMPENSATION

House bill

The House bill (sections 1965 through 1967) would amend chapter 13 of title 38, relating to dependency and indemnity compensation (DIC) for service-connected deaths, to increase by 3.7 percent, effective December 1, 1985, rates of DIC payable to the surviving spouses and children of veterans whose deaths were service connected.

Senate bill

The Senate bill (section 1121) would limit the fiscal year 1986 DIC increases to a maximum of 3.7 percent—the same percentage that the Congressional Budget Office projected for the fiscal year 1986 Social Security/VA pension cost-of-living adjustment at the time the Senate Veterans' Affairs Committee reported its recommendations to the Senate Budget Committee. S. 1887 as passed by the Senate provided for a 3.1-percent COLA.

Conference agreement

The conference agreement (sections 19034 through 19026) would amend chapter 13 to increase these rates, effective December 1, 1985, by 3.1 percent.

SUBTITLE C—MISCELLANEOUS PROVISIONS

EPIDEMIOLOGICAL STUDY OF FEMALE VIETNAM VETERANS

The House bill (section 1982), but not the Senate bill, would require the Administrator to provide for the conduct of an epidemiological study of any long-term adverse gender-specific health effects in female Vietnam veterans that may result from their exposure to Agent Orange or to other phenoxy herbicides and would authorize the Administrator to expand the scope of the study to evaluate any long-term adverse

gender-specific health effects in females resulting from other aspects of service in Vietnam. However, the Senate, on December 2, 1985, passed a similar provision in S. 1887, the "Veterans' Compensation and Benefits Improvements Act of 1985", (section 507), that would, unless determined not to be scientifically feasible, require the Administrator to provide for the conduct of a female Vietnam veterans health-experience study and permit investigation of any long-term adverse health effects which may have resulted from traumatic experiences, exposure to phenoxy herbicides (including Agent Orange), or other experience or exposure.

The conference agreement (section 19021) follows the Senate provision.

ADVISORY COMMITTEE ON NATIVE-AMERICAN VETERANS

The House bill (section 1981), but not the Senate bill, would provide for the establishment of a VA Advisory Committee on American-Indian Veterans to examine and evaluate VA programs and activities with respect to the needs of American-Indian veterans and to transmit reports on its examinations and evaluations to the Administrator of Veterans' Affairs for subsequent transmittal to the Congress. However, on December 2, 1985, the Senate passed a comparable provision in S. 1887, the "Veterans' Compensation and Benefits Improvements Act of 1985" (section 505), which would provide for the establishment of a VA Advisory Committee on Native American Veterans (including Alaska Natives).

The conference agreement (section 19022) contains such a provision, blending together aspects of the two provisions, naming the Advisory Committee the "Advisory Committee on Native-American Veterans" and specifying that representatives of American Indians and of other Native Americans each would serve on the Committee.

WAIVER OF WAITING PERIOD FOR ADMINISTRATIVE REORGANIZATION OF CERTAIN VETERANS' ADMINISTRATION AUTOMATED DATA PROCESSING ACTIVITIES

The conference agreement (section 19023) also contains a provision that would waive the waiting period prescribed by section 210(b)(2) of title 38—which provides, in part, that the VA may not in any fiscal year implement certain administrative reorganizations unless the Administrator, not later than the date on which the President submits the budget for that year, submits a report containing a detailed plan and justification for the reorganization—with respect to a reorganization, described in letters dated November 1, 1985, that were submitted to the chairman and ranking minority members of the Committees, involving the transfer of certain functions from the VA's Office of Data Management and Telecommunications to the VA's Department of Veterans' Benefits and requesting a waiver of that waiting period.

The conferees have determined that the information contained in the November 1 letters, together with other information subsequently provided to the Committees, constitutes a sufficiently detailed plan and justification (as that term is proposed to be defined by section 501 of S. 1887, as passed by the Senate on December 2, 1985) for this proposed reorganization and that the reorganization will serve to improve the operations of the VA's service and benefits delivery system. Since, under the provisions of section 210(b)(2), the reorganization would not be permitted to be implemented prior to the beginning of fiscal year 1987, the conference agreement would waive the required waiting period in order to permit the Administrator to implement this reorganization prior to October 1, 1986.

In agreeing that this statutory waiver be granted, the conferees intend that the Administrator, as part of implementing the reorganization, develop and implement plans for better coordination and integration between the Department of Medicine and Surgery and the Department of Veterans' Benefits in automated data processing modernization, and are not necessarily expressing agreement with the recommendations of the October 25, 1985, report of McManis Associates. The conferees believe that the Administrator should proceed cautiously in adopting recommendations from that report (particularly those relating to procurement). In that regard, the conferees recommend that the Administrator take full cognizance of the review being conducted by the General Accounting Office, pursuant to a request from the Chairman of the House Veterans' Affairs Committee and the Ranking Minority Member of the Senate Veterans' Affairs Committee, pertaining to certain aspects of the report.

RATIFICATION OF CERTAIN TEMPORARILY-EXPIRED AUTHORITIES

VETERANS' ADMINISTRATION REGIONAL OFFICE IN THE PHILIPPINES

The compromise agreement (section 19024(a)) contains a provision ratifying any action taken by the Administrator during the period beginning on November 1, 1985, and ending on December 3, 1985, in connection with the exercise of the Administrator's authority under section 230(b) of title 38, relating to the establishment of a regional office in the Republic of the Philippines. This authority to operate such an office expired on October 31, 1985, but was extended for three additional years by section 402 of Public Law 99-166.

CONTRACT CARE AUTHORITY IN PUERTO RICO AND THE VIRGIN ISLANDS

The compromise agreement (section 19024(b)) also contains a provision ratifying any action taken by the Administrator of Veterans' Affairs in connection with entering into any contract to provide, during the period beginning on November 1, 1985, and ending on December 3, 1985, care described in subclause (v) of section 601(4)(C) of title 38, United States Code, relating to the Administrator's authority to provide hospital care and medical services in certain noncontiguous "States" (defined in present section 101(20) to include United States Territories and possessions and the Commonwealth of Puerto Rico), including any waiver made by the Administrator of the applicability to the Commonwealth of Puerto Rico or the Virgin Islands of the restrictions described in that subclause for that period. This authority to provide such care and services also expired on October 31, 1985, but was made permanent in the case of the Virgin Islands, and was extended (with certain limitations) for an additional three years in the case of Puerto Rico, by section 102 of Public Law 99-166, enacted on December 3, 1985.

ALCOHOL AND DRUG TREATMENT AND REHABILITATION CONTRACT PROGRAM

The compromise agreement (section 19024(c)) also contains a provision ratifying any action taken by the Administrator of Veterans' Affairs in connection with entering into any contract to provide, during the period beginning November 1, 1985, and ending December 3, 1985, care described in section 620A of title 38, relating to contracts for certain care and treatment and rehabilitative services for eligible veterans suffering from alcohol or drug dependence or abuse disabilities. This authority to provide such care and services also expired on October 31, 1985, but was extended for an additional three years by section 101 of Public Law 99-166.

TITLE XIX—COMMITTEE ON VETERANS' AFFAIRS

Mr. CRANSTON. Mr. President, as the ranking minority member of the Committee on Veterans' Affairs, I would like to explain and discuss the provisions of title XIX of the pending measure, which pertain to Veterans' Administration programs, so as to provide background for my colleagues and others with an interest in the actions of our committee and our counterpart committee in the House to satisfy our reconciliation instructions as set forth in the First Concurrent Resolution on the Budget for fiscal year 1986, Senate Concurrent Resolution 32.

At the outset, I note the very difficult task that our two committees had in developing this conference agreement. We were working with very complex subject matter, and the differences between the two Houses on some issues were great. However, by virtue of long and hard negotiations between conferees and the staffs of the two committees, we were finally able to reach a compromise which is reflected in the provisions in title XIX of the pending measure.

As with all compromises, the final agreement of the conferees is not completely satisfactory to either side, but I believe that the Senate's positions and concerns were fairly vindicated. I thank my fellow Senate conferees, our committee chairman [Mr. MURKOWSKI], and our former chairman [Mr. SIMPSON]. I congratulate our colleagues in the other body who served as conferees, particularly Representative MONTGOMERY, the House committee chairman, Representative HAMMERSCHMIDT, the committee's ranking minority member, and Representative EDGAR, the chairman of the Subcommittee on Hospitals and Health Care, for their steadfast dedication to the House position.

Mr. President, at the time the reconciliation legislation was before the Senate last month, I made a detailed statement on the legislation our committee developed to meet our reconciliation instructions. I refer my colleagues and others with an interest in this background information to those remarks which begin on page S15468 of the CONGRESSIONAL RECORD of November 14, 1985.

SUMMARY OF TITLE XIX AND RECONCILIATION SAVINGS

Mr. President, as I noted when the reconciliation legislation was before the Senate in November, our committee's proposed legislation—which was included in title XI of the Senate reconciliation bill, S. 1730—was composed

of three parts, one revising VA health-care eligibility criteria, one authorizing the VA to recover from third-party insurers for care provided to veterans with health insurance and with no service-connected disabilities, and the last, placing a cap on the amount of the fiscal year 1986 VA disability compensation COLA. In the conference agreement, subtitle A of the title XIX, entitled "Health Care", contains provisions derived directly from the first two parts, subtitle B, entitled "Compensation Rate Increase," contains a compensation COLA rate increase below the cap we had set, and subtitle C, entitled "Miscellaneous Provisions", contains four additional provisions, two of a technical nature and two derived from provisions in the House-passed reconciliation measure for which the Senate had passed a counterpart provision in another measure, S. 1788.

Briefly, title XIX consists of the following elements:

Subtitle A would revise certain health-care eligibility criteria and establish a requirement for certain non-service-connected disabled veterans to make modest payments for VA care, and provide for recovery from health insurers of certain reasonable costs of VA-furnished care and services for veterans with health insurance coverage and with no service-connected disabilities;

Subtitle B would provide, effective December 1, 1985, for a 3.1-percent cost-of-living increase for fiscal year 1986 in VA disability compensation and DIC rates; and

Subtitle C would (1) require the VA to provide for the conduct of a female Vietnam veteran health-experience study, (2) establish a VA Advisory Committee on Native-American Veterans, (3) waive a waiting period for an administrative reorganization within the VA, and (4) ratify certain temporarily-expired authorities.

More specifically, the three elements which result in cost savings (two in subtitle A and one in subtitle B) fulfilling—indeed, as I have noted, exceeding substantially—our reconciliation instructions would provide as follows:

REVISION OF HEALTH-CARE ELIGIBILITY

SUBTITLE A

First, would revise VA health-care eligibility so as to direct—by using the word "shall" in describing access to VA care rather than the word "may" as used in current law—that VA-furnished hospital care be furnished to specified categories of veterans: namely, first, any veteran for a service-connected disability; second, a veteran with a service-connected disability rated at 50 percent or more; third, a veteran with a service-connected disability rated at less than 50 percent (including a veteran discharged for a disability incurred or aggravated in the line of duty or a veteran disabled as a result of VA treatment or vocational rehabilitation); fourth, a veteran who is a former prisoner of war; fifth, Vietnam veterans exposed to certain toxic substances or veterans exposed to radiation from nuclear detonations; sixth, veterans of the Spanish American War, Mexican Border period, or World War I; and seventh a veteran without a service-connected disability who meets a new, first-level income threshold, to be called the "Category A Threshold," by virtue of having annual family income no greater than $15,000 for a veteran with no dependents, and $18,000 for a veteran with one dependent, with adjustments of $1,000 for additional dependents; and would eliminate the existing eligibility of non-service-connected veterans over age 65 without regard to their ability to defray the cost of their care.

Second, would generally maintain the current law authorities to furnish hospital care through contract or free-basis arrangements with non-VA facilities and nursing home and outpatient care, either in VA or non-VA facilities as authorized, to the extent of available resources and facilities, to veterans in the categories mentioned above.

Third, would generally maintain current law authorities to furnish hospital and other forms of care, to the extent of available resources and facilities, to veterans who meet a new, second level income threshold, to be called the "Category B Threshold," by virtue of having annual family incomes no greater that $20,000 for a veteran with no dependents, and $25,000 for a veteran with one dependent, with adjustments of $1,000 for additional dependents, either in VA facilities or, as currently authorized in certain circumstances, through non-VA facilities at VA expense.

Fourth, would authorize the VA to furnish, within otherwise available space and resource capacity, care to veterans without service-connected disabilities and whose annual family incomes exceed the category B threshold who agree to make certain payments—approximating payments made under Medicare—in connection with their care.

The Congressional Budget Office estimates that the provisions relating to health-care eligibility criteria in this subtitle would generate net reconciliation savings of $49 million in budget authority [BA] and $46 million in outlays in fiscal year 1986, $93 million in BA and $87 million in outlays in fiscal year 1987, and $102 million in BA and $95 million in outlays in fiscal 1988.

THIRD-PARTY REIMBURSEMENT

Subtitle A would also authorize the United States to collect from third-party insurers the reasonable cost of care provided by the VA to non-service-connected-disabled veterans to the extent that the insurer would be liable to pay for the care if it had been furnished by a private facility. These provisions would have the effect of invalidating the so-called "exclusionary clauses" in health insurance contracts, which currently preclude payment for care furnished by Federal facilities, and would make the VA eligible to receive payment from a third party on the same basis and to the same extent that a non-VA health-care facility would be eligible. The VA's right to recover would, therefore, generally be contingent upon the agency's compliance with the terms and conditions of the law, contract, or other arrangement under which the veteran would be eligible for payment by the third party.

CBO estimates that these so-called "third-party" provisions in subtitle A would generate net BA and outlay savings of $203 million in fiscal year 1986, $353 million fiscal year 1987, and $402 million in fiscal year 1988.

VA COMPENSATION COLA

SUBTITLE B

Would provide, effective December 1, 1985, for a VA disability compensation COLA of 3.1 percent in fiscal year 1986—the same percentage COLA that was provided in fiscal year 1986 for VA pension and Social Security—as compared to 4.1 percent, as assumed in the CBO baseline.

CBO estimates that the provisions in subtitle B would produce savings of $84 million in BA and $76 million in outlays in fiscal year 1986, $102 million in both BA and outlays in fiscal year 1987, and $104 million in both BA and outlays in fiscal year 1988.

TOTAL THREE-YEAR RECONCILIATION SAVINGS

Altogether, then, CBO estimates that title XIX would produce savings of $336 million in BA and $325 million in outlays in fiscal year 1986, or $548 million in BA and $542 million in outlays in fiscal year 1987, and $608 million in BA and $601 million in outlays for fiscal year 1988, for a total 3-year savings of $1.492 billion in BA and $1.468 billion in outlays, $342 million in BA and $318 million in outlays in excess of our reconciliation instructions to save $1.15 billion in BA and outlays over those 3 years.

BACKGROUND

Mr. President, I wish to emphasize, as I did during Senate debate on the reconciliation legislation last month, that I concur wholeheartedly that there is an absolutely critical need to restrain Federal spending so as to make major reductions in the deficit. Although I did not support the conference report on the budget resolution—I voted for an alternative that would have made a deeper cut in the deficit—a majority of my colleagues in both Houses did support the conference report.

Under the budget resolution that the Congress adopted, our committee and our counterpart committee in the other body were mandated to act to find ways to achieve a specified level of savings. It is essential, in understanding our two committees' actions, to appreciate that if we had not met our obligations in this regard, the Budget Committees in our respective bodies would have done so. I want to stress that point to my colleagues and to others with an interest in this legislation.

In light of this background, I did my best to work in a cooperative fashion with the seven other members of our two committees who served as conferees on this legislation, and I believe that we succeeded in developing legislation that allows us to satisfy our reconciliation instructions in an appropriate fashion. In fact, as I have indicated already, the legislation that we have developed would save $342 million more in BA and $318 million more in outlays than the required amounts over the next 3 fiscal years, and $176 million in BA and $171 in outlays more than in either version of the legislation. Those added savings are due to the lower than anticipated inflation rate reflected in the Consumer Price Index increase as calculated for purposes of the Social Security cost-of-living adjustment [COLA] and applied in this measure to the VA compensation COLA.

I want to stress, however, that this compromise, as did the Senate measure, would achieve the mandated savings without requiring reductions in VA programs.

Specifically, in fiscal year 1986, $227 million in BA and outlay savings would come from added revenues to the Federal Government—a net of $203 million of which would be from third-party health insurers and a net of $24 million from small copayments from non-service-connected veterans with annual family incomes over the $20,000/$25,000 category B threshold in connection with their being furnished VA care. In addition, the CBO estimates that net savings of approximately $26 million in BA and $23 million in outlays would be realized as a result of non-service-connected veterans with family incomes above this Category B threshold choosing alternative sources for their health care.

The remainder of the fiscal year 1986 savings—$84 million in BA and $76 million in outlays—would come from providing a COLA of 3.1 percent in fiscal year 1986, effective December 1, 1985, in the rates of VA disability compensation paid to service-connected-disabled veterans and disability and indemnity compensation (DIC) paid to the survivors of those who have died from service-connected causes. As I've indicated already, that is the same percentage increase as the Social Security and VA pension COLA.

Thus, I believe that our two Committees have met our fiscal obligations under the Budget Resolution while continuing with our best efforts to keep the VA—and particularly the VA health-care system—strong and vital so that it can continue to meet the needs of those who answered our country's call in its hours of need.

As I noted when the reconciliation measure was before the Senate last month, this is unquestionably the most important piece of veterans' health-care legislation brought before the Congress since at least 1973, and I believe there is a need to touch on a number of aspects of the legislation incorporated in title XIX of the pending measure.

SUBTITLE A: ENTITLEMENTS AND ELIGIBILITIES FOR HEALTH CARE FROM THE VETERANS' ADMINISTRATION

Mr. President, the greatest differences between the approaches of the two Houses was in the area involving eligibility for VA health care. In discussing the final compromise in this area, I would like briefly to discuss the two approaches, why I believed the Senate's approach in this area was the better course, and how the compromise takes my concerns in this regard into account.

SENATE APPROACH

The Senate-passed provisions modified the eligibility status of two categories of veterans and established some clear, consistent statutory priorities for VA hospital, outpatient, and nursing home care.

The first category of veterans affected by the Senate legislation consisted of those veterans to whom we have always owed the primary obligation—veterans being treated for their service-connected conditions and also those veterans with service-connected disabilities rated at 50 percent or more disabling. Veterans in this latter category have been given special recognition by the Congress since 1976 when they were accorded eligibility for unlimited outpatient care and were given a top priority for receiving that care ahead of all but veterans seeking care for their service-connected disabilities. These two groups of veterans would have been given a comprehensive entitlement to VA care, including both hospital and outpatient care as well as, in some instances, contract services where necessary.

Those veterans in this category needing nursing home care for their service-connected disabilities would also have been entitled to that care at VA expense.

The second category of veterans directly affected by the Senate legislation would have been those non-service-connected veterans age 65 and older who had family incomes over $25,000 in the preceding calendar year. Veterans in this category would no longer have been automatically eligible for VA care without reference to their ability to pay for that care. Rather, they as well as non-service-connected veterans under the age of 65 with such family incomes, would have still been eligible to receive VA care but would have had to make a modest payment to the VA for it. The eligibility of this latter category of veterans under the Senate legislation would have been expressly conditioned on there being space and resources otherwise available for their care.

For veterans presently eligible for VA care who were in neither of these categories, eligibility for VA care would have remained essentially unchanged; the VA would have been authorized to furnish them with such care to the extent of available VA resources and facilities. However, a new, objective standard of eligibility based on income for non-service-connected veterans would have been established.

In connection with the veterans' health care generally, the amount of health care that can be furnished by the VA is a function of the level of funds appropriated for the purpose by the Congress. All such funds must, under the Budget Act, be made available to be spent for such purposes. Thus, the eligibility of veterans—other than those in the new entitlement categories because of their contract care entitlements as well—for care under the Senate approach would have depended on the outcome of the appropriations process, an area where those of us with a strong interest in the VA health-care system have enjoyed considerable success in the past.

In fact, during my 17 years in the Senate, during which time I have been either the chairman—for 12 years—or the ranking minority member, for the last 5—of the subcommittee or full committee with jurisdiction over the VA health-care system, I have been deeply involved in an ongoing effort to equip the VA to provide first-quality, modern medical care to veterans. Over that period, we have, through the appropriations process, added 66,000 health-care workers to the VA system. Although the vast bulk of that increase occurred in the 1970's, we have continued with our efforts in support of the system. Just this October, Chairman MURKOWSKI and I, in connection with the VA's fiscal year 1986 appropriation, managed to restore $100 million to the medical care account. However, in this time of budget deficits it is very difficult to predict the future success of such efforts.

Thus, the Senate measure provided generally for a three-level approach—entitlement for care for the principal beneficiaries of the VA system, maintenance of current eligibility generally for all other veterans presently eligi-

ble for VA care except those non-service-connected veterans with family income above $25,000 for the preceding calendar year, and eligibility for care for those in that last group if space and resources are otherwise available and certain payments are made by the veteran. I believe that this struck an appropriate balance and represented, in the last analysis, a promise we in the Congress could reasonably strive to realize in the current time of fiscal restraint.

Together with the statutory priorities proposed in the Senate measure—with the first priority being accorded to service-connected veterans receiving care for their service-connected conditions—that approach should have ensured that the VA health-care system would continue, in its present configuration, to meet its principal mission of providing needed health care to service-connected veterans and other veterans made eligible for such care.

HOUSE APPROACH

In contrast, the approach taken in the House bill did not seem reasonable to me. The apparent purpose of the House approach was to create an entitlement to hospital and outpatient care for all veterans presently eligible for VA care except for non-service-connected veterans whose family incomes in the 12 months immediately preceding their application for care are more than 3⅓ times the VA pension income standard.

I believe that this approach was flawed in several fundamental ways. First, it appeared to promise an entitlement to VA health care, without limit, for all but one category of veterans—that is, non-service-connected veterans with incomes above certain levels—for example, incomes over $19,659 in the case of veterans with no dependents and family incomes over $25,751 in the cases of those with one dependent, with $3,233 more added for each additional dependent. Thus, a married non-service-connected veteran with two children would, under the House bill, have been accorded VA health-care entitlement based on inability to defray the cost of care if his income was not greater than $32,217.

The House Committee has described the effect and intent of its bill in conflicting ways. For example, the committee chairman, Representative MONTGOMERY, issued, as committee chairman, a press release, dated September 30, 1985, which states in part:

By approving the health care provisions of the House bill, the committee assured service-connected and needy veterans for the first time that, if they need health care from the VA, it will be provided. Period.

Also, the House Committee report (H. Rept. 99-300, 99th Cong. 1st Sess. 773) contained the following statement:

Under existing law, as well as under the administration's proposal, an eligible veteran is unable to predict whether care will be available when needed. This uncertainty arises by virtue of the fact that under current law and under the Administrator's proposed means test the Administrator "may" provide care "within the limits of Veterans' Administration facilities." There is no requirement that the Administrator do so. In contrast, the committee bill would require VA to provide health care to several categories of veterans.

In contrast, the committee report contained this statement of caution and limitation about the effect and content of the House bill:

The bill would require the Department of Medicine and Surgery of the VA to plan to care for all eligible veterans under a new section 610 of title 38, United States Code. The care would be provided in the VA facility where the veteran applied for admission, or another VA medical facility within a reasonable distance.

But, this language was nowhere brought out in the House debate during consideration of the reconciliation legislation. (CONGRESSIONAL RECORD, October 23, 1985, 28626-28628.)

So, most veterans would clearly have been led to believe by press reports and other information they received that they were being guaranteed VA care by the House legislation.

In contrast, I do not believe that we in Congress can today, in good conscience, purport to be guaranteeing the VA's ability to furnish inpatient and outpatient care to all those to whom the House bill would have seemed to extend entitlement to care. And, it seems even more clear that the VA will be unable to furnish the amounts of hospital care—let alone outpatient care which is oversubscribed now—seemingly promised by the House bill in either the near- or long-term future if any of the projections prove true regarding the anticipated increase in demand for VA care that will come in the 1990's from the growing population of older veterans.

The ability of the VA system to provide care is, as I noted 1 moment ago, a function of the level of appropriations made for VA medical care. The House proposal, by its terms, could not control the outcome of the appropriations process. Its purpose would seem to have been to influence that process.

I believe, however, that it would be very unwise for Congress to suggest to all of the veterans to whom the House bill would seem to have extended entitlement that, as a result of the House-proposed legislation alone, the VA health care system would be there for them, now and in the future, whenever they may seek care. Without providing the funds—both to operate the current system with such additional staff and resources as might be needed and to repair, renovate, and modernize existing facilities, as well as to construct new facilities in those areas of the country with the greatest potential for new demand—such a result cannot be guaranteed.

I also believe the House approach was flawed to the degree that it was based on a belief that substantial increases in funding for the VA system will be forthcoming in the near future. In this time of skyrocketing Federal deficits and harsh budget realities, made more intense by the Gramm-Rudman deficit reduction legislation that was enacted last week, we will have to do everything in our collective power in our two committees just to hold onto the present VA system—just to maintain its current capacities. We cannot realistically be suggesting to America's veterans that there is room for the creation of broad new entitlements for care in a system that will almost certainly be faced with reductions in the next few years and which may well be forced by the deficit reduction process now in law to reduce its personnel by more than 5 percent over the next 3 years and possibly much more thereafter.

Another factor which highlights the flawed nature of the House approach is the lack of any merchandise in the House legislation or under current law—such as review in court—by which a veteran might seek to enforce his or her new entitlement to care. In light of the bar in section 211(a) of title 38 to court review of claims for VA benefits— a bar I am certain would apply in the case of a veteran contesting a denial of health care—the "promise" of the House approach would be unenforceable and, for the veteran denied care, empty. In this regard, it is ironic to note that the purported establishment of this "right" without "remedy" was quite deliberate. The Senate has four times passed judicial review legislation to remove this section 211(a) bar, S. 367 on July 30, 1985, S. 636 on June 15, 1983, S. 359 on September 14, 1982, and S. 330, on September 17, 1979. In the case of the first three bills the other body refused to take up that legislation just as it has with respect to S. 367 for this first session of the 99th Congress up to this point.

Mr. President, although the compromise agreement follows in many respects the House approach in the area of entitlement and eligibility for care, it was modified in a number of important ways in response to the concerns I have just outlined.

CONFERENCE APPROACH ON HEALTH CARE ELIGIBILITY

First, and most importantly, although the word "shall," rather than "may" as in current law, is used in de-

scribing the eligibility for hospital care of various categories of veterans—largely derived from the House bill—the meaning of that change in eligibility is spelled out specifically, definitively, and unambiguously by both committees in the joint explanatory statement accompanying the conference report.

In that statement, the conferees have set forth their intention regarding those veterans as to whom the Administrator "shall furnish" hospital care—any veterans for a service-connected disability; a veteran with a service-connected disability rated at 50 percent or more; a veteran with a service-connected disability rated at less than 50 percent—including a veteran discharged for a disability incurred or aggravated in the line of duty and a veteran disabled as a result of VA treatment or vocational rehabilitation; a veteran who is a former prisoner of war; Vietnam veterans exposed to certain toxic substances or veterans exposed to radiation from nuclear detonations; veterans of the Spanish American War, Mexican border period, or World War I; and veterans who are Medicaid-eligible or in receipt of chapter 15 improved VA pension and those whose family incomes are no greater than the new, first level income threshold, the $15 to $18,000 category A threshold.

As to those veterans, the conferees have stated definitively and emphatically that "the VA's sole obligation," is such a veteran is in immediate need of hospitalization, is "to furnish an appropriate bed at the VA facility where the veteran applies for care" or, if no bed is available at that VA facility, "to furnish a contract bed—as authorized under current law as recodified in new section 603—or to arrange to admit the veteran to the nearest VA medical center [VAMC], or Department of Defense facility with which the VA has a sharing agreement, with an available bed." If the veteran in one of these shall furnish categories who is seeking care is not in need of immediate hospitalization, the VA's obligation would be either to "schedule the veteran for admission where the veteran applied, if the schedule there permits," or if it does not, to "refer the veteran to the nearest VA facility, or DOD facility with which the VA has a sharing agreement, with an available bed and to facilitate the veteran's admission."

Thus, Mr. President, the apparent promise of the House bill of an unlimited entitlement to both hospital and outpatient care for a wide range of categories of veterans, including those with no service-connected disabilities and with incomes of up to more than $25,000 for a veteran with one dependent—a promise which, as I indicated earlier, I do not believe can be kept—has been recast into a far more achievable pledge with respect to hospital care only.

ENTITLEMENT OF VETERANS MEETING CATEGORY A INCOME THRESHOLD

The other major changes that have been made to the House proposal in this area to make it more workable are, first, a lowering of the income levels for those nonservice-connected veterans who would be given this form of entitlement to care—from levels of approximately $20,000 for a veteran with no dependents and $25,000 for a veteran with one dependent in the House bill, to levels of $15,000 and $18,000, respectively, with $1,000 for each dependent; and second, limiting this new form of entitlement to hospital care only, rather than to hospital and outpatient care as was provided in the House bill. This latter change was necessary because it is already clear, in many areas of the country, that the VA is unable to meet the existing demand for outpatient care. There is simply no basis for suggesting that there will be resources available to the VA to furnish outpatient care to the categories of veterans that the House sought to entitle to such outpatient care.

VETERANS AGE 65 AND OLDER

As in both the Senate and House bills, the conference agreement would provide for a change in the eligibility for VA care of nonservice-connected-disabled veterans age 65 and older who have family incomes over a certain level. Under the compromise agreement, these veterans with annual incomes—for the preceding calendar year, as in the Senate bill—of over $20,000 for veterans with no dependent, and over $25,000 of family income for those with one dependent, would no longer be automatically eligible for VA care without reference to their incomes. Rather, they, along with nonservice-connected-disabled veterans under age 65 with incomes over these level, would be required to make a modest payment to the VA—in an amount generally comparable to a corresponding deductible or copayment requirement under Medicare—in order to receive VA care. As was provided for in the Senate bill, the eligibility of these veterans with incomes above this new category B income threshold would be expressly conditioned on there being space and resources otherwise available at the VA facility where they seek care.

Another provision relating to these veterans age 65 and over which was included in the Senate bill would have established a priority for care for veterans in this age group with incomes above the $20,000 to $25,000 level ahead of veterans below that age with such incomes. Unfortunately, our House colleagues would not accept that provision and it is not included in the final agreement.

INTERMEDIATE CATEGORY OF ELIGIBILITY

The conference agreement would establish a third, intermediate category of veterans eligible for VA care in addition to the two categories that I have already described—those two being veterans with incomes no greater than the category A threshold who would be entitled to VA hospital care, and veterans with incomes above the category B threshold who would be eligible for VA care upon agreeing to make a payment to the VA in connection with their care. This new, third category would consist of those veterans with annual incomes at or above the category A, but not greater than the category B, thresholds—for a single veteran, an income above $15,000 but no greater than $20,000 and, for a veteran with one dependent, an annual family income above $18,000 but no greater than $25,000, with $1,000 added for each additional dependent. The Administrator would be authorized to provide care to these veterans within available VA resources and facilities. These veterans would make no payments in connection with their care.

DETERMINING INCOME UNDER NEW THRESHOLDS

In determining a veteran's income for the purposes of eligibility under the two new income eligibility criteria thresholds—category A and category B—the Administrator would be required to determine a veteran's annual income—taking into account family income and other assets—generally using the same methods and criteria used to determine annual income for the purposes of VA chapter 15 improved pension eligibility. This income eligibility determination would be made upon a veteran's first application for care each year on a form including income questions similar to those used for determining VA pension eligibility and would be based on the veteran's family income for the calendar year immediately preceding the application for care. Such a determination would then be applicable for the balance of the calendar year.

As I noted a moment ago, if a veteran were eligible for care only by virtue of agreeing to make a payment to the VA in connection with the needed care, the payment required would be in an amount generally comparable to a corresponding deductible for hospital care—$492 beginning in 1986—or copayment requirement for outpatient care—20 percent—under Medicare. However, the payments required under the conference agreement would be substantially less than the required payments under Medicare for episodes of inpatient hospital care beyond 60 days.

Under the conference agreement, the payment schedule would be as follows:

HOSPITAL CARE

During any 365-day period; first, for the first 90 days of care—for part thereof—the lesser of the cost of furnishing the care or the amount of the inpatient Medicare deductible in effect at the beginning of the 365-day period; and second, for each succeeding 90 days of care—or part thereof—the lesser of the cost of furnishing the care or one-half of the amount of that inpatient Medicare deductible.

NURSING HOME CARE

During any 365-day for each 90 days of care, the lesser of the cost of furnishing the care or the amount of the inpatient Medicare deductible.

OUTPATIENT TREATMENT

For each outpatient or home health visit, the amount equal to 20 percent of the estimated average cost of an outpatient visit to a VA facility during the fiscal year in which the treatment is furnished, but not to exceed during any 90-day period the amount of the inpatient Medicare deductible in effect at the beginning of that period.

COMBINATION OF HOSPITAL AND NURSING HOME CARE

In the case of a veteran who pays the inpatient-Medicare-deductible amount in connection with VA-furnished hospital or nursing home care and who, before using 90 days of the initial mode of care—hospital or nursing home—within a 365-day period, is furnished the other mode of care, the veteran would not be required to make any payment for the second mode until either: first, the number of days of hospital and nursing home care combined exceed 90; or second, the beginning of the next 365-day period, whichever occurs first. If the veteran pays an amount equal to one-half of the inpatient-Medicare-deductible amount in connection with receiving hospital care—as when the veteran is receiving more than 90 days of hospital care in a 365-day period—and, before using the 90 days of hospital care for which that payment was made within the applicable 365-day period, receives VA-furnished nursing home care, the veteran would be required to pay one-half of the deductible amount in connection with the number of days of nursing home care that, when added to the hospital days, do not exceed 90 within that 365-day period.

PAYMENTS FOR COMBINATIONS OF OUTPATIENT TREATMENT AND HOSPITAL AND NURSING HOME CARE

A veteran would not be required to pay an amount greater than the inpatient Medicare deductible in connection with any combination of outpatient and inpatient care furnished during any 90-day period.

TWO SENATE PROPOSALS NOT IN CONFERENCE AGREEMENT

Mr. President, although I am generally satisfied with the conference agreement that we worked out with the House conferees as it relates to health-care eligibility and entitlement, there were two proposed changes in the law from the Senate bill as to which I regret we were unable to gain the House conferees' agreement.

CERTAIN SERVICE-CONNECTED OUTPATIENT AND CONTRACT-CARE ENTITLEMENTS

The first of these provisions would have established a clear, comprehensive entitlement to outpatient, as well as hospital, care for veterans for their service-connected disabilities rated at 50 percent or greater and entitlement to contract outpatient care for both categories and to contract hospital care to veterans for their service-connected disabilities. I have long believed that these categories of veterans are and should be the principal beneficiaries of the VA health-care system and, as such, deserve the entitlement to care and the statutory priority for receiving that care that the Senate bill would have provided.

As I noted, however—and I must confess my surprise at this result, even though the House bill would have achieved the same result for these two categories of veterans in terms of direct VA care—we were unable to secure the support of the House conferees for this result. As a consequence, these two categories of veterans are included along with the other categories of veterans as being given the form of limited entitlement that I described as being in the conference agreement.

SPECIAL OBLIGATION TO VETERANS WITH 50-PERCENT OR MORE SERVICE-CONNECTED DISABILITIES

Nevertheless, I am pleased to note that the conference agreement does contain provisions I strongly urged to emphasize our special obligation to those veterans with service-connected disabilities rated at 50 percent or more. Specifically, these veterans are included expressly in a separate category for the entitlement to hospital care in revised section 610(a)(1)(D) of title 38—the first time that they have been given this separate recognition in the context of hospital care—and are accorded outpatient care eligibility in the provision, revised 612(a), together with veterans being treated for their service-connected conditions rather than in section 612(f), as in current law, with veterans receiving care for their non-service-connected disabilities. Their placement in section 612(a) will provide these 50 percent or more disabled veterans with eligibility for structural alterations to their residences, in connection with the provision of home health services where necessary to enable the veteran to live at home, costing up to $2,500 as opposed to the $600 limit applied to nonservice-connected veterans generally under current section 612(f) and revised section 612(f)(2).

It is my strong hope that the heightened recognition being accorded to this category of veterans in the conference agreement will be reflected in VA practices and procedures, including establishing in VA regulations a priority—which current regulations, 38 CFR 17.49, do not contain—for these veterans when they seek hospital care.

STATUTORY PRIORITIES FOR CARE

The second issue as to which I regret the outcome in the conference agreement involves the establishment of statutory priorities for VA care. The Senate bill would have added a new section 612C to title 38, United States Code, to require the Administrator to establish statutory priorities for furnishing hospital, domiciliary, and nursing home care as well as, under current law in section 612(i), medical services. The Senate bill would also have required the Administrator to prescribe regulations to ensure the provision of care and services in that priority order.

Except in cases of a medical emergency, the priorities for hospital, domiciliary, and outpatient care would have been set forth, with the first two categories being as they currently are for outpatient care: First, veterans who require treatment for service-connected disabilities and, second, veterans with service-connected disabilities rated at 50 percent or more.

Establishing these priorities as proposed in the Senate bill would have constituted an expression of congressional policy as to which veterans should receive care in situations in which there may be a scarcity of resources, situations that may well be occurring with increasing frequency beginning by the end of the decade. Unfortunately, the only change to current law that the House conferees were willing to accept involved accepting my proposal to add one additional category of veterans—those in receipt of improved VA pension under section 521 of title 38—to the existing priority listing for outpatient care in section 612(i) of title 38.

Although this is far less than I wanted or believed appropriate in terms of statutory priorities for care, it is an important result in ensuring that truly needy war-time veterans in receipt of VA pension—those, for example, with incomes of no more than $5,885 for a veteran with no dependents and with family incomes of $7,709 for a veteran with one dependent—will be given a priority for outpatient care ahead of other nonservice-connected veterans with higher incomes. With further reference to veterans in receipt of pension, I note that they, as well as veterans in receipt of Medicaid, would be automatically placed in category A in terms of their eligibility for VA care and need not complete any

separate income form to establish this eligibility.

CONTRAST WITH THE ADMINISTRATION-PROPOSED LEGISLATION

Mr. President, the conferees' final agreement regarding health-care eligibility issues can perhaps be best understood in contrast to the legislation that the Administration first proposed in connection with the fiscal year 1986 budget and submitted formally in late April.

That proposal involved an $11,400 income cutoff for a single veteran and generally provided no opportunity for such a veteran above that income level to become eligible for VA care except by spending down major portions of his or her income above the cutoff line and then, each time—I repeat, each time—VA health care was sought, demonstrating to the VA that such expenditures had in fact been made. That approach could well have resulted in the VA turning away sick veterans who actually would have been unable to afford the care they needed and who would be cared for by the VA under current law.

The effect of that proposal would have been that each non-ervice-connected veteran seeking care on the basis of being unable to defray the cost of care would have been required to establish and then reestablish income eligibility each time he or she applied for care. Indeed, the House bill would have required similarly that veterans reestablish eligibility each time they applied for care. The Administration's proposal would have been both individually demeaning and extraordinarily burdensome for the veteran seeking to qualify for eligibility on the basis of income—including many very elderly veterans—and administratively costly and difficult for the VA.

That is why I announced this past spring when the Administration plan first surfaced that I categorically rejected that kind of administratively complicated and burdensome and generally debasing approach, and I am pleased to say that the legislation developed by the conferees bears no resemblance to that Administration proposal.

The approach we are proposing in the conference agreement thus must be viewed against the backdrop of knowing that the Administration has existing authority to establish a means test and that, should Congress take no action, the VA would certainly do so along the lines of the totally unacceptable proposal that the VA had previously made.

TECHNICAL MATTERS

Finally, as I did when this legislation was before the Senate last month, I want to touch briefly on some technical matters regrading the changes relating the VA health-care eligibility proposed in this subtitle.

CONTRACT-CARE ELIGIBILITY

The first such point to a proposed change in the wording of the title 28 sections setting forth eligibility criteria with respect to hospital care, nursing home care, and outpatient treatment. Those sections currently provide eligibility for care "within the limits of Veterans' Administration facilities," which is defined to include both the VA's own facilities and certain other Government facilities as well as private facilities with which the VA may contract for hospital and outpatient care in the circumstances specified in current section 601(4)(C) of title 38. The contract authority for nursing home care is in section 620.

The Senate bill would have replaced the phrase "within the limits of Veterans' Administration facilities" with the phrase "through Veterans' Administration facilities or through non-Veterans' Administration facilities to the extent authorized in section 603 of this title" and would have reenacted the contract-care eligibility in a new section 603, taking it out of its current-law location as part of the definition—quite anomalously—of "Veterans' Administration facilities" in present section 601(4)(C), thus providing a more direct reference to the VA's contract authority. The conference agreement generally incorporates this approach with a redrafting and relocation—for example, to sections 610(a)(3), 612(a)(3), and 612(f)(3)—of the reference. The use of the new terminology—and the shifting to a new section 603 of the provisions in current law section 601(4)(C) specifying the circumstances under which contract care may be furnished—are not intended to change the effect of current law but rather to achieve greater clarity on the face of the statute regarding the extent of eligibility for contract care—often referred to as fee-basis care.

This new drafting formulation is also intended to make clear—as is the drafting, in revised section 610(a)(3) relating to nursing home care, by the use of the phrase "or as provided in section 620 of this title"—that the extent to which any fee-basis authority is provided is determined solely by what is in section 603, or section 620 as to nursing home, in conjunction with other provisions of chapter 17, and that the Administrator's general authority to contract under current section 213 is not available with respect to any of these chapter 17 health-care authorities. As was pointed out in our committee's report language (S. Rept. No. 99-146, 99th Cong., 1st Sess. 591-92), the committee construes the words "within the limits" used in current law as providing the same limitation as to the nonavailability of section 213, but believes that the new formulation is more definitive and clearer in this regard.

EMERGENCY CARE

A second technical point that I want to note regarding the provisions relating to revisions in VA health-care eligibility involves the relationship between the new requirement that some veterans have to agree to make payments in connection with their care, on the one hand, and the VA's existing authority to provide care in emergency situations, on the other. Although a veteran with annual family income above the category B income threshold would generally be eligible for care or services only upon the veteran—or someone authorized to act for him or her—agreeing to pay for those services before they are provided, the VA has full authority under current section 611(b) to furnish hospital care or medical services in emergency cases and to charge the veteran for the approximate amount of the VA's costs for furnishing such care. This emergency authority would be applicable in the case of a veteran in this new category of eligibility who for any reason is unable to execute such an agreement prior to the commencement of care, thereby permitting the VA to furnish whatever care is necessary in an emergency situation and thereafter, as appropriate, to charge the veteran for such care in accordance with the new payment amounts specified in the law to be paid in connection with being furnished VA care.

RECOVERY OF THE COST OF CERTAIN HEALTH CARE AND SERVICES FURNISHED BY THE VA

Mr. President, turning to the second major element in subtitle A of the legislation in title XIX—the section which would provide for the VA to recover from third-party health insurers for the cost of care provided to insured non-service-connected disabled veterans—these provisions generally follow the Senate approach. As I noted in my remarks last month, my position on such legislation has been clear for many years, dating back to 1979. I believe that such legislation does not make any sense from the standpoint of sound public policy.

It is clear beyond any question that the enactment of this legislation will not reduce the overall cost of VA health care; in fact, the opposite is true because this legislation would have an inflationary impact. This is so both because each unit of health care provided by the VA for which third-party recovery is sought would now have two additional administrative components attached—each paid for by taxpayers ultimately, and because the third parties' costs of processsing and responding to the claims would be passed on to those who pay health-insurance premiums as well as taxes.

It is also clear to me that the legislation constitutes a totally unwarranted Federal Government intrusion into private contractual relationships by

rewriting some of the most basic terms and conditions of marektplace commercial insurance agreements.

In this regard, I refer my colleagues and others with an interest in this legislation to the excerpts I read into the RECORD last month from a letter written by Bernard Tresnowski, the president of the Blue Cross and Blue Shield Association, in response to a Washington Post editorial on VA third-party reimbursement legislation. As I noted then, this letter—the excerpts of which begin on page 31959 of the RECORD for November 14—is about as succinct an analysis as I've ever seen of the problems with such legislation.

Mr. President, the point that I believe is so well founded that is raised against this legislation—that it violates fundamental principles of insurance—could not be made more clear than by reading revised section 629(a)(3)(A) of title 38 in the conference agreement. This provision would permit the VA to collect under an insurance contract even where the policy is expressly contingent on the insured having satisfied a deductible or paid a copayment and the insured veteran has not satisfied those requirements. Plainly and simply, this provision proposes to rewrite insurance contracts to give the VA a right to collect in situations in which other health-care entities could not. Equally as clearly, without this provision, this third-party reimbursement legislation would not work at all as to most health insurance plans.

But the savings estimate attached to this legislation and the opportunity to point a finger at someone else, the health insurance companies, and say that they are not bearing their fair share of costs made this approach irresistible. On this latter score, as I have pointed out repeatedly, no one has been able to demonstrate to my satisfaction that insurance companies have received any windfall from the exclusionary clauses. Rather, these clauses reflect standard, sound insurance theory and practice.

However, our two committees were faced with very significant reconciliation instructions, and our being credited by CBO for savings, through third-party recoveries, of $960 million over 3 years—a hopelessly optimistic projection, I might add—through the enactment of such legislation made this an option our committee "simply could not refuse."

In view of the inevitability of the enactment of some kind of legislation in this area, I did my best to attempt to help craft it in such a way as to make it as workable and as fair as possible. In this effort, I consulted closely with the VA, representatives of various third-party insurers, and others with an interest in the legislation.

I would like to highlight two very significant points that are appropriately addressed in the conference agreement.

VA COMPLIANCE WITH CONTRACT TERMS

First, the language providing for the right of recovery of the cost of care to the extent that the veteran or a non-Federal provider would be eligible to receive payment generally leaves the Federal Government's right to recover contingent upon compliance with the terms and conditions of the law, contract, or other arrangement under which the veteran would be eligible for payment by the third party. Only where the proposed legilsation specifically overrides such terms or conditions—the provision in the legislation nullifying preclusions of liability for Va care and the provision I have just cited providing for recovery despite a deductible or copayment not being met—would such requirements be voided. Thus, contract requirements conditioning the third-party's liability—such as for pre-hospitalization screening for second opinions prior to surgery or other specified utilization review procedures—would apply. Likewise, provisions imposing general limitations on the third party's liability—such as contract clauses placing specific dollar limits on payments for certain procedures, limiting a carrier's liability to a percentage of certain charges, or, as in the case of health maintenance organizations, limiting coverage to care provided in specific facilities—would apply. Our committee report language—as printed on pages 577 and 578 and pages 627 and 628 of Senate Report No. 99-146—makes these points clear.

DEPOSITING COLLECTIONS IN MISCELLANEOUS RECEIPTS

Second, VA health care appropriations are not to be reduced in anticipation of collections. Rather, revenues received will be remitted directly to the Treasury to reduce the deficit. Without this provision, which was not contained in prior administration's legislative proposals, I could and would have never agreed to this legislation since deposit of the collected revenues in the VA medical care account would lead to reductions in that appropriation being made up front based on anticipated revenues. The effect of this approach would be to hold the system hostage for a result it could in no way guarantee—that insurers would agree to these payments and that the payments would be forthcoming at certain levels, both fairly readily and expenditiously. Indeed, there continues to be significant question in my mind as to whether any appreciable revenue will be produced by these third-party provisions for several years after enactment, if even that early.

SUBTITLE B—DISABILITY COMPENSATION COST-OF-LIVING ADJUSTMENTS

Mr. President, I also want to make mention of the provisions in the pending conference agreement, which are derived from S. 1887, the proposed "Veterans' Compensation and Benefits Improvements Act of 1985," which the Senate passed on December 2, 1985. These provisions include a 3.1-percent increase in the rates of disability compensation paid to service-connected disabled veterans and the rates of DIC paid to the survivors of those who have died from service-connected causes.

The VA's service-connected Disability Compensation Program is at the very heart of our Nation's system of veterans' benefits. The priority that is attached to the needs of service-connected disabled veterans and the survivors of those who have made the ultimate sacrifice is well known and well established. The more than 2.2 million veterans who suffer from disabilities resulting from their service and the 342,000 survivors of those who died from service-connected disabilities are and will remain our committee's No. 1 priority. They are certainly mine.

Thus, Mr. President, I'm delighted that the conference agreement would provide for a compensation and DIC COLA equal to the increase being made this year in Social Security and VA pension benefits—3.1 percent. Consistent with the precedent we established last year in the VA compensation COLA bill, Public Law 98-543, as well as in the reconciliation bill, Public Law 98-369, this increase would be effective on December 1, 1985, the same date as the indexed COLA's for Social Security and VA pension. As our committee has noted many times in the past and throughout this year, we continue to be committed to maintaining this approach.

I also note that, by virtue of section 156(e)(1)(A) of Public Law 97-377, a fiscal year 1983 continuing appropriations measure enacted on December 21, 1982, the enactment of this COLA would automatically result in a 3.1-percent increase, effective on December 1, in survivors' reinstated, Social Security-like benefits paid under section 156 of Public Law 97-377 to certain surviving spouses with minor children.

LAST YEAR'S COMPENSATION COLA SHORTFALL

Mr. President, the House proposed this year that we proceed with a 3.4-percent COLA, splitting the difference between the 3.7-percent increase passed by the House and the Senate's 3.1-percent increase. The Senate insisted on the 3.1-percent increase.

It should be noted, Mr. President, that it is true that last year we did not, regrettably, increase compensation rates by exactly the same percentage as the Social Security COLA. The

Social Security COLA turned out to be 3.5 percent and the compensation COLA we enacted before we knew the CPI amount was 3.2 percent.

However, at that time we moved forward by 4 months the effective date of the COLA—from April 1, 1985, to December 1, 1984. This acceleration of the COLA was a major benefit to all compensation/DIC recipients in fiscal year 1985.

In the case of veterans with disabilities rated 10-, 20-, or 30-percent disabling, there was no dollar difference in the monthly rate between a 3.2-percent COLA and a 3.5-percent COLA. However, because the effective date was moved forward by 4 months, these veterans all received more in fiscal year 1985 than they would have otherwise had the date not been moved up. In the case of 30-percent disabled veterans, this meant $24 more in fiscal year 1985 than if the effective date had been left at April 1 and a 3.5-percent COLA had been enacted.

In the case of veterans rated 40- through 70-percent disabled, the difference between the two COLA percentages was $1 per month. However, in the case of a veteran rated 60-percent disabled, for example, the earlier effective date meant $55 more in fiscal 1985 in compensation than would have been paid with a 3.5-percent COLA increase, effective on April 1.

One last example—in the case of veterans rated 100-percent disabled, the dollar difference between the COLA's was $4 a month. The earlier effective date, however, meant $140 more in fiscal year 1985 than if a 3.5-percent COLA had been granted effective April 1, 1985.

Thus, Mr. President, in light of the effect of the earlier effective date and in consideration of the great urgency to control Federal spending, I concur in the Senate position that a 3.1-percent COLA is the appropriate adjustment.

If, in future years, there is again a disparity between the amount of the Social Security COLA and the VA compensation COLA we enact before the amount of the Social Security COLA is known, I would certainly carefully and sympathetically consider the need and justification for a restoration of the percentage-point difference to their establishing rate of a subsequent compensation increase.

SUBTITLE C—MISCELLANEOUS PROVISIONS

EPIDEMIOLOGICAL OF FEMALE VIETNAM VETERANS

Mr. President, section 19021 of the conference agreement contains a provision that would require the Administrator, unless determined not to be scientifically feasible to do so, to provide for the conduct of an epidemiological study of the health of women Vietnam veterans—a so-called Vietnam-experience study. This section was derived from a provision in the House bill and from a Senate provision in section 507 of S. 1887, the "Veterans' Compensation and Benefits Improvements Act of 1985." The Senate provision was derived from one that I first introduced in S. 1616, to require a study of any long-term adverse gender-specific health effects in female Vietnam veterans that may result from their exposure to agent orange or to other phenoxy herbicides and to authorize the Administrator to expand the scope of the study to include a so-called Vietnam-experience study evaluating any long-term adverse gender-specific health effects in females resulting from any aspect of service in Vietnam.

Mr. President, at the time I introduced S. 1616 and at the time of Senate passage of S. 1887, I discussed the need for such study in detail. I refer my colleagues to my remarks in the CONGRESSIONAL RECORD of September 10, 1985, 23229-23232, and of December 2, 1985, 33639-33641.

The Centers for Disease Control is currently conducting a large study designed to learn about the health status of Vietnam veterans in general. That study includes three major research components: An agent orange study, a Vietnam-experience study, and a selected cancers study. Although it is expected that a significant level of information regarding health issues for Vietnam veterans in general will result from this effort, the CDC-conducted study will not provide any information about the unique experiences and gender-specific concerns of women Vietnam veterans.

For this reason, since early 1984, I have been urging, along with other members of the Veterans' Affairs Committee, that the executive branch utilize existing authorities to design and undertake an appropriate study of women Vietnam veterans. I am pleased that this provision has been included in the pending legislation, and look forward to having this long-overdue study of the general and specific health status of women Vietnam veterans scientifically reviewed. If not scientifically infeasible to do so, study of health effects that may have resulted from specific factors in service—such as exposure to agent orange or other toxic substances, or traumatic experiences—would also be authorized, although not required by this provision in the conference agreement.

ADVISORY COMMITTEE ON NATIVE-AMERICAN VETERANS

Mr. President, I also want to make special mention of the provisions of the conference agreement—in section 19032—that would establish within the VA an advisory committee on Native-American veterans. These provisions are derived from the provisions of section 505 of S. 1887 as it was passed by the Senate on December 2 as well as from the provisions of section 1981 of the House bill.

Native Americans have a long and distinguished record of service in the Armed Forces of the United States. Their service and subsequent readjustment, in many cases, has taken place in the context of cultural and economic conditions different from those of many other veterans. Yet no evaluation of the particular needs of native-American veterans has ever been undertaken by the VA.

I believe that the differences between native-American veterans and their nonnative veteran counterparts and the diversity within the native-American veteran population itself merit an indepth evaluation to identify situations or needs unique to native-American veterans and to assess the effectiveness of VA programs and services designed to meet those needs. This advisory committee will be charged with such an evaluation and with the responsibility of making two reports to the Administrator—on November 1, 1986, and November 1, 1987—on the committee's findings and recommendations. The Administrator, in turn, would be required to present those reports to the Congress, together with his findings and recommendations for administrative or legislative action.

Mr. President, as the Senator from the State where more native-American veterans reside than in any other State—over 27,100 American Indians reside in California, nearly 17 percent of the total U.S. native-American veteran population—and having initiated the provision in the Senate legislation for the evaluation to be carried out by an advisory committee with native-American veteran representation on it, I pressed for inclusion of this provision in the conference agreement. I look forward to receiving and reviewing with great interest the results of the advisory committee's evaluation.

WAIVER OF WAITING PERIOD FOR ADMINISTRATIVE REORGANIZATION OF CERTAIN VA AUTOMATED DATA PROCESSING ACTIVITIES

Mr. President, section 19033 of the conference agreement contains a provision that would waive, with respect to a particular proposed VA reorganization, the waiting period prescribed by section 210(b)(2) of title 38—which provides, in part, that the VA may not in any fiscal year implement certain administrative reorganizations unless the Administrator, not later than the date on which the President submits the budget for that year, provides a report containing a detailed plan and justification for the reorganization. The particular reorganization involves the transfer of certain functions from the VA's Office of Data Management and Telecommunications to the VA's Department of Veterans' Benefits.

Mr. President, as many Senators may know, on February 1 of this year, the Administrator submitted to the

committee letters giving notice of the VA's decision to close down a wide range of VA activities at its 59 DVB regional offices and to consolidate those activities in three processing centers. The Administrator stated that his letters were submitted in accordance with section 210(b)(2).

Mr. President, that proposal and the lack of detail in the February 1 letter raised questions—many of which still remain unanswered—regarding the impact of the consolidation on the furnishing of various types of benefits and services to veterans and their dependents as well as on the employees affected. The opinion was thereafter expressed in both the Senate and the House—by myself and the chairman and ranking minority member of the House Committee on Veterans' Affairs—that the February letter was so lacking in detail as not to constitute a valid section 210(b)(2) "detailed plan and justification." In an undated opinion addressing this issue, the Acting General Counsel of the VA declined to state whether it did or did not.

In order to resolve the question of what specifically constituted a "detailed plan and justification," I introduced on June 27, joined by Senators MATSUNAGA, DECONCINI, and ROCKEFELLER, S. 1397, the proposed "Veterans' Administration Reorganization Act of 1985." This legislation set forth a definition of precisely what type of information a detailed plan and justification for a proposed reorganization must contain under section 210(b)(2). Provisions derived from this measure were incorporated into section 501 of S. 1887 as reported from the committee and were approved by the Senate on December 2.

Thus, Mr. President, despite the fact that those provisions have not yet been enacted into law and the fact that the proposed reorganization involving DVB and ODM&T in no way relates to the poorly-conceived and ill-advised proposal to consolidate regional office, I believed it was appropriate and necessary that the proposed DVB and ODM&T reorganization be supported by the kind of detailed plan and justification that section 501 of S. 1887 would expressly require, and I so notified the Administrator in a December 6 letter to him.

It was in that context that I considered and examined the Administrator's letter. So that Members can also have an opportunity to understand this proposal, I ask unanimous consent that the texts of his December 4 letter to me which is identical to the November 1 letter and of my December 6 letter to him, together with the provisions of section 501 of S. 1887, be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

VETERANS' ADMINISTRATION,
Washington, DC, December 4, 1985.

Hon. ALAN CRANSTON,
Ranking Minority Member, Committee on Veterans' Affairs, U.S. Senate, Washington, DC.

DEAR SENATOR CRANSTON: The purpose of this letter is to report a planned administrative reorganization within the Veterans Administration (VA) involving the transfer of certain functions from the Office of Data Management and Telecommunications (ODM&T) to the Department of Veterans Benefits (DVB).

As you are aware, under the Congressional "report and wait" requirements of 38 U.S.C. § 210(b)(2), a detailed plan and justification must be submitted to the appropriate committees of Congress for certain VA administrative reorganizations involving a reduction during any fiscal year by 10 percent or more in the number of full time equivalent employees (FTEE) at a VA covered office or facility. The report must be made not later than the date on which the President submits his budget for the next fiscal year. Thereafter, no action can be taken to implement the reorganization until the first day of that fiscal year. This letter is submitted in order to satisfy the above-reporting requirement for a planned VA organizational transfer of certain automated data processing (ADP) functions as described below.

As you are aware, in April 1985, the Veterans Administration selected McManis Associates, Inc., to prepare an implementation plan to modernize the DVB benefits and services delivery systems. This plan was to be consistent with my policy statement mandating the full modernization of the Agency's data processing and communications systems so as to improve the quality of service provided to veterans and their families. The McManis study among other things found that there was limited end-user involvement in system design and development, limited systems training, and that there were inconsistent system utilization management practices. Based on these findings, I approved the McManis recommendations the DVB should have the authority, resources and responsibility for the systems development and greater operational oversight within overall agency standards and policy guidelines. Implementation of this recommendation requires the administrative reorganization which is the subject of this letter.

We propose to reorganize in order to move ADP program specialists closer to the DVB program specialists, and give DVB a greater role in ADP decisions. By giving DVB control of ADP resources, they will be able to better focus ADP expenditures on service delivery priorities. This reorganization will involve 362 ODM&T full time equivalent employees (FTTE). These organizational transfers will occur at VA Central Office (VACO), and at the Austin, Texas; Hines, Illinois; and Philadelphia, Pennsylvania VA Data Processing Centers (DPC). The number of FTEE transferred as the result of this reorganization and the base 1986 ODM&T FTEE at each facility, are as follows: VACO—81/441; Austin—75/663; Hines—146/406; and Philadelphia—60/197.

The functions performed in the positions to be transferred are unique to the support of DVB programs and, after this transfer to DVB, ODM&T will no longer perform these functions. These functions, and the stations at which they are performed, are as follows: VACO—Benefits Automation Service, which designs all ADP programming for DVB, and some administrative support personnel; Austin DPC—Benefits Delivery System Division, which does programming for DVB in the areas of loan guaranty, the Beneficiary Identification and Records Location Subsystem (BIRLS), and debt collection (beginning in fiscal year 1986); Hines DPC—System Support Divisions, which handle programming for DVB benefits programs, such as Compensation and Pension, Education, and Vocational Rehabilitation, and which prepare the computer tapes for the Department of Treasury to use in issuing benefits checks; and Philadelphia DPC—Systems Division, which does programming for VA applications. There will also be transferred , at each of the above stations, the functions of that part of the system verification and testing element which performs systems quality control for the programming done by the benefits delivery system staff at each of these stations.

It is clear from the foregoing that this reorganization is simply an organizational transfer of employees. These employees will not be relocated to other stations. The great majority of them will experience no change in their functions, personnel status, immediate supervision, or even in the location of their workspace. Accordingly, there will be little or no cost impact as the result of this reorganization.

We believe that this reorganization is appropriate and advisable, and that it will have the desired effect of improving and making more efficient DVB benefits delivery systems by giving DVB direct control over the resources used for its ADP support. This reorganization has already been the subject of DVB briefings with staff of the House and Senate Veterans' Affairs Committees. Of course, we would be pleased to provide any additional information which you may desire concerning this reorganization.

I request your assistance in introducing, and supporting enactment of, a legislative waiver of the 38 U.S.C. § 210(b)(2) waiting period for this reorganization, so that these improvements in our organizational structure can be made as soon as possible. Suggested language for such a legislative waiver is enclosed. Absent such a waiver, we must wait until fiscal year 1987 to implement this reorganization.

I appreciate your support for our efforts to improve benefits delivery for our Nation's veterans.

Advice has been received from the Office of Management and Budget that there is no objection to the presentation of this letter and legislative proposal from the standpoint of the Administration's program.

Sincerely,

HARRY N. WALTERS,
Administrator.

COMMITTEE ON VETERANS' AFFAIRS,
Washington, DC, December 6, 1985.

Hon. HARRY N. WALTERS,
Administrator of Veterans' Affairs, Washington, DC.

DEAR HARRY: Thank you for your letter of November 1 in which you gave notice of a planned administrative reorganization within the VA involving the transfer of the Office of Construction (OC) to the Department of Medicine and Surgery (DM&S) and in which you request a waiver of the waiting period prescribed by section 210(b)(2) of title 38, United States Code.

As you noted, section 210(b)(2) provides, in part, that the VA may not in any fiscal year implement a reorganization involving a

more-than-10-percent reduction in the number of full-time equivalent employees at any VA facility with more than 25 employees unless the Administrator, not later than the date on which the President submits the budget for that year, provides "a report containing a detailed plan and justification for the reorganization."

As you may know, in response, in part, to what I believed was an ill-conceived and potentially damaging plan to consolidate various activities of the Department of Veterans' Benefits 59 regional offices into 3 processing centers, I introduced legislation, S. 1397, the proposed "Veterans' Administration Reorganization Act of 1985", on June 27. A principal thrust of that measure was to define for purposes of section 210(b)(2) precisely what a "detailed plan and justification" for a proposed reorganization must entail.

Provisions derived from this legislation were incorporated into the compensation cost-of-living increase bill that was ordered reported by the Committee on October 31 and passed by the Senate, as S. 1887, on December 2. Specifically, section 501 (copy enclosed) of the bill as passed would define the term "detailed plan and justification" to include at a minimum a number of specific items, including—

(1) a specification of the number and responsibilities of the employees to be added to or removed from each affected office;

(2) a description of the changes in functions that would occur at the affected offices;

(3) an explanation of the reasons why it has been determined that the reorganization is appropriate and advisable in terms of the statutory missions and long-term goals of the Veterans' Administration;

(4) a description of the effects that the reorganization may have on the provision of benefits and services to veterans and dependents of veterans (including the provision of benefits and services through offices and facilities of the VA not directly affected by the reorganization); and

(5) estimates of the implementation cost and the subsequent cost impact of implementing the reorganization.

Although this provision has not yet been enacted, I believe that it likely will be in the near future. In any event, I am not able to support a waiver of the requirement for a waiting period for a section 210(b)-covered reorganization unless the Committee is provided with at least the information that would be required under section 501 of S. 1887 as passed by the Senate. In this regard, I am particularly concerned by your statement, in requesting a waiver in your letter, that "[i]t is uncertain what the organizational change will be on FTEE and costs."

I urge you to provide the Committees with a report containing adequate detail and justification (consistent with section 501 of the Senate-passed bill) in order that we may have all the information necessary to consider meaningfully your request for a waiver of the section 210(b)(1) waiting period.

Finally, with respect to your December 4, 1985, letter reporting a planned reorganization of certain functions from the Office of Data Management and Telecommunications (ODM&T) to the Department of Veterans' Benefits (DVB), I find that letter substantially complete in terms of the information called for by section 501 of S. 1887. There are, however, a few areas that I believe require further clarification under clauses (III), (IV), and (V) of the statutory provision. These items have been called to the attention of Mr. John Vogel, Chief Benefits Director. In order for us to proceed with a legislative waiver for that DVB/ODM&T reorganization, we will need the additional information not later than Wednesday, December 11.

With warm regards,

Cordially,

ALAN CRANSTON
Ranking Minority Member

CLARIFICATION OF REQUIREMENT FOR A DETAILED PLAN AND JUSTIFICATION FOR ADMINISTRATIVE REORGANIZATION

SEC. 501. (a) Subparagraph (C) of section 210 (b)(2) is amended by inserting at the end the following new division:

"(iii) The term 'detailed plan and justification' means, with respect to an administrative reorganization, a written report which, at a minimum—

"(I) specifies the number of employees by which each covered office or facility affected is to be reduced, the responsibilities of those employees, and the means by which the reduction is to be accomplished;

"(II) identifies any existing or planned office or facility at which the number of employees is to be increased and specifies the number and responsibilities of the additional employees at each such office or facility;

"(III) describes the changes in the functions carried out at any existing office or facility and the functions to be assigned to an office or facility not in existence on the date that the plan and justification are submitted pursuant to subparagraph (A) of this paragraph;

"(IV) explains the reasons for the determination that the reorganization is appropriate and advisable in terms of the statutory missions and long-term goals of the Veterans' Administration;

"(V) describes the effects that the reorganization may have on the provision of benefits and services to veterans and dependents of veterans (including the provision of benefits and services through offices and facilities of the Veterans' Administration not directly affected by the reorganization); and

"(VI) provides estimates of the costs of the reorganization and of the cost impact of the reorganization, together with analyses supporting those estimates.".

(b)(1) Except as provided in paragraph (2), the amendment made by subsection (a) shall take effect with respect to administrative reorganizations proposed to be carried out in fiscal years beginning after fiscal year 1986.

(2) The amendment made by subsection (a) applies to the administrative reorganization referred to in the letters from the Administrator of Veterans' Affairs to the Committees on Veterans' Affairs of the Senate and the House of Representatives, dated February 1, 1985, relating to the consolidation of certain Veterans' Administration Department of Veterans' Benefits activities from 59 regional offices into three processing centers.

Mr. CRANSTON. Mr. President, the information contained in this letter was subsequently supplemented by information provided by Paul Ising, the VA's Deputy Chief Benefits Director for ADP Systems Management, to the committee's minority staff on December 9. Clarification was received regarding the statement that "[t]he great majority of them (VA employees) will experience no change in their functions, personnel status, immediate supervision, or even in the location of their workspace." In this regard, I was advised that no individual will experience a change in function or in personnel status, six individuals will experience a change in immediate supervision, and one individual will move from the second floor to the third floor within the VA's Central office.

With respect to the reasons for the determination that this reorganization is appropriate and advisable in terms of the statutory missions and long-term goals of the VA, the VA provided the following material extracted from a report prepared by McManis Associates, Inc., which developed and prepared the implementation plan to modernize DVB's service delivery systems;

In our judgment the Veterans' Administration has little choice but to undertake a major DVB modernization program. Without a major overhaul to its total information management capacity, DVB will not be able to continue to provide an acceptable level of service to veterans and their families. Uncoordinated, overlapping data bases complicate data entry and retrieval. Outmoded hardware, software, and telecommunications technologies are expensive and severely limit data access and analysis capabilities. The existing hardware in the regional offices has reached the point where it must be replaced. Over time, there has been such massive modification to the Compensation and Pension software that maintenance of that system is now enormously costly, and the agency is increasingly at risk in trying to maintain it in its present form. • • •

These recommendations were presented and approved in mid-July and provide the framework within which the modernization program will be carried out. Approval of the recommendations established the parameters to guide the implementation effort: a "modern" architecture should be developed, including appropriate decentralization of DVB systems; and DVB should assume authority and responsibility for its own benefits delivery systems. • • •

We identified two types of organization and management issues which have an impact on the effectiveness and efficiency of DVB service delivery systems. The first type relates to the process by which DVB ADP requirements have been defined and how DVB systems are designed and modified. DVB has had neither direct budget authority nor accountability for its use of ADP resources. It has been dependent upon the Office of Data Management and Telecommunications for all systems development initiatives. End users of the systems have not regularly been involved in the design or acceptance of new applications or modifications to existing applications. There has been no effective mechanism within DVB to establish priorities for systems development or enhancement, nor has there been an effective mechanism to assure ODM&T priorities were consistent with DVB priorities. Without control over the development and support of systems applications, DVB is hampered in its efforts to implement any ADP/telecommunications modernization strategy.

The second set of organizational and management issues identified are internal to DVB. Too rarely have the end users in the field offices been involved in the systems design and development process. New automated systems have been introduced and are utilized in the regional offices with limited user orientation and training. The limited involvement of field personnel in systems development has meant that the effectiveness of the system from the perspective of the veteran or the nontechnical end-user is often limited.

With respect to providing further clarification for the effects that the reorganization may have on the provision of benefits and services to veterans and dependents of veterans—including the provision of benefits and services through offices and facilities of the VA not directly affected by the reorganization—the VA further cited the McManis report as follows:

The aim of the proposed modernization effort is to utilize improved technologies on an economically justifiable basis to remove many of the obstacles to improved efficiency and service. With the changes in processing architecture and telecommunications, a number of significant changes in the way regional offices conduct business can be expected:

1. The veteran will be able to obtain information, resolve problems, and complete processing procedures with fewer stops and by dealing with fewer people.

2. Data related to the same event, procedure, or action will be recorded (entered) once. Data transfer to other systems and organizational elements will be effected electronically without the need to reenter or transcribe the data.

3. Permanent storage of most correspondence and documentation currently maintained manually on a decentralized basis (Claims Files) will be recorded electronically either in image form or as formatted data.

4. All work stations for processing, counseling, testing, and other interactions with the veteran will be supported by multifunction intelligent terminals. Direct concurrent access to the data maintained locally in the RO as well as the very large central data bases located on mainframes will be available at the workstation. This will mean that individuals will be able to perform a variety of procedures without moving from one piece of specialized computing hardware to another.

In addition, further regarding the relationship of the DVB reorganization to other components of the agency, the VA has advised that the elements of this reorganization are consistent with the three principal strategies of the VA's agencywide ADP modernization programmatic goals, including eventually providing each authorized VA employee with access to all VA data, regardless of its location in VA computer systems.

Finally, with respect to the cost of the reorganization and its cost impact, the VA has clarified that the only cost of the reorganization is the paperwork involved in processing these changes. It is not expected to be significant, but it is not measurable at this time. The VA has indicated that there may be some savings in the future in terms of increased productivity but they are long term and, at this point, unestimated.

After careful analysis of the VA's letter, together with the additional information subsequently provided by the VA, I have concluded that the VA had submitted what constitutes a sufficiently detailed plan and justification for this proposed reorganization and that the reorganization will serve to improve the operations of the VA's service and benefits system. However, since, under the provisions of section 210(b)(2), the reorganization would not be permitted to be implemented prior to the beginning of fiscal year 1987 on October 1, 1986, I have supported and the conference agreement includes a statutory waiver of the required waiting period in order to permit the Administrator to implement this reorganization at the earliest possible opportunity.

Finally, I want to express my appreciation to the VA, particularly John Vogel, Chief Benefits Director, and Paul Ising, the VA's Deputy Chief Benefits Director for ADP Systems Management, for their cooperation and assistance in providing the information necessary for the committees to consider the proposed DVB/ODM&T reorganization and act favorably to permit it to go ahead on an official basis in the near future.

STATUS OF NEGOTIATIONS REGARDING OTHER VETERANS' LEGISLATION

Before concluding my remarks on this measure, Mr. President, I want to comment on the negotiations between the House and Senate Committees on Veterans' Affairs over the numerous differences between our compensation, education, and other VA benefits measures embodied in S. 1887 and H.R. 1408, H.R. 2343, and H.R. 2344. I regret to note that those negotiations have reached an impasse over certain provisions in the Senate bill—now endorsed by the Administration—designed to improve, and enhance the fiscal stability of, the home-loan guaranty program. As a result of that impasse, it has become clear that further action on the remaining provisions of S. 1887 will not be possible this year.

Mr. President, during the Senate's consideration of S. 1887, I discussed in detail each of these provisions, and my statement on that measure appears at page S16634 of the CONGRESSIONAL RECORD for December 2 (daily edition). At this time, I want to stress my intention to continue to pursue these matters at the earliest appropriate opportunity in the second session of this Congress and my regret at our failure to be able to reach agreement on this package.

Lastly, with respect to the provisions of S. 1887 as it was passed by the Senate on December 2 that deal with the extension and improvement of the Emergency Veterans' Job Training Act of 1983 [EVJTA] I want to make special mention of the agreement that the distinguished chairman of the committee [Mr. MURKOWSKI] and I have reached with respect to these provisions. If we are not able to resolve our differences over the larger legislation early in the next session or to proceed in some other fashion to pass and enact—outside of S. 887—this EVJTA extension and improvement legislation, Senator MURKOWSKI and I have agreed to return the Senate-passed EVJTA extension legislation to the House in a separate bill by early February.

SUMMARY OUTLINE

Mr. President, for the information of my colleagues and the public, I ask unanimous consent that a summary outline of the cost-savings provisions of subtitles A and B of the conference agreement be printed in the RECORD at the conclusion of my remarks.

CONCLUSION

Mr. President, as I noted at the outset of my remarks, reaching a final compromise with out colleagues in the House on some of the issues in this legislation—especially those provisions relating to eligibility for VA health care—was a very difficult task. Together, we had a commitment to fulfilling our reconciliation obligations while protecting the VA as much as possible from harm. However, we had very different approaches as to how to reach that shared goal.

In the end, thanks to the efforts of Senators MURKOWSKI and SIMPSON and Representatives MONTGOMERY and HAMMERSCHMIDT and the other conferees—and many long hours of work by staff of both committees—we were able finally to hammer out the compromise which is before the Senate today and which I recommend to my colleagues.

I want especially to thank the minority staff of the Veterans' Affairs Committee, Bill Brew, Babette Polzer, Ed Scott, Nancy Billica, Ingrid Post, Charlotte Hughes, and Jon Steinberg, for their outstanding efforts on this bill over the last few weeks and months. My gratitude also to the Senate majority staff, Cathy McTighe, Julie Susman, and Tony Principi, for the extraordinary spirit of cooperation and dedication they exhibited in our work together over this very pressurized and trying time period.

I also thank the House staff who worked on this legislation—Pat Ryan, Jack McDonell, Vic Raymond, Arnold Moon, Jill Cochran, Mack Fleming, Rufus Wilson, and Kingston Smith from the House Committee on Veterans' Affairs, and also, Bob Cover, of the House legislative counsel's staff who, as usual, worked tirelessly and most effectively in helping to craft the final version of the legislation.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF COST-SAVINGS PROVISIONS FROM SUBTITLES A AND B

HOSPITAL CARE ELIGIBILITY

A. VA shall in VA facilities, and may in non-VA facilities as authorized in section 603, furnish needed hospital care to:

1. Veterans for service-connected disabilities
2. Service-connected disabled veterans rated at 50% or more
3. Other service-connected disabled veterans
4. POWs
5. Veterans exposed to Agent Orange or radiation
6. Veterans of World War I and earlier conflicts
7. Veterans with no service-connected disabilities who are "unable to defray the costs of needed hospital care—meaning those who are either VA improved-pension recipients or Medicaid eligible or who have incomes not exceeding $15,000 for a veteran with no dependents and $18,000 for a veteran with one dependent plus $1,000 for each additional dependent, called the "Category A" income threshold.

In connection with the foregoing, the Joint Explanatory Statement states that:

The conferees intend that care be furnished to service-connected disabled veterans, low-income veterans, and, to the extent resources are available, other eligible veterans.

The conferees intend that for categories 1-8, the VA's sole obligation is (1) if a veteran is in immediate need of hospitalization, to furnish an appropriate bed at the VA facility where the veteran applies or, if none is available there, to furnish a contract bed if authorized in section 603 or arrange to admit the veteran to the next closest VAMC, or DOD facility with which the VA has a sharing agreement, with an available bed, or (2) if the veteran needs non-immediate hospitalization, (A) schedule the veteran for admission there if the schedule there permits, or (B) refer the veteran for scheduling and admission to the next closest VAMC, or DOD facility with which the VA has a sharing agreement, with an available bed and then facilitate the veteran's admission there.

The conferees intend that, if there are two or more veterans applying for the same bed at a particular facility and one is seeking care for a service-connected disability or has a 50-percent-or-more service-connected disability, that veteran should receive the bed.

The conferees note that the legislation makes no change in the beneficiary travel program.

B. VA may, in VA facilities and in non-VA facilities as authorized in section 603, furnish needed hospital care to the extent that facilities and resources are available, to:

1. Non-service-connected veterans with incomes above the Category A income threshold.
2. Non-service-connected veterans with income above $20,000 for a veteran with no dependents and $25,000 for a veteran with 1 dependent plus $1,000 for each additional dependent—called the "Category B" income threshold—on the basis of an agreement to make a payment (similar to the Medicare deductible) in connection with such care.

In connection with the foregoing, the Joint Explanatory Statement states that the conferees intend that those veterans making payments in connection with their care would have lowest priority for inpatient, outpatient, and nursing home care.

C. In the case of a veteran whose income in the previous year is above the Category A income threshold or the Category B income threshold, the Administrator would be authorized to make an exception to place the veteran in a higher-priority category, as appropriate, on the basis of a recent, sharp drop in income to a level substantially below the Category A or B threshold.

OUTPATIENT ELIGIBILITY

Essentially no change in current law; eligibility based on hospital-care eligibility.

NURSING HOME AND DOMICILIARY CARE ELIGIBILITY

No change in current law.

PRIORITIES FOR CARE

No change in current law except to add veterans receiving VA improved pension benefits (under section 512) as a new last priority category (in section 612(i)) for outpatient care.

CONTRACT CARE

No change from eligibility in current law.

INCOME THRESHOLDS

Category A and B as set forth above with the dollar amounts increased, beginning 1/1/87, by the preceding year's Social Security/VA pension CPI.

PAYMENTS BY VETERANS

A. Hospital Care: Payment of the Medicare deductible for the first 90 days of care, and half of the deductible for each succeeding additional 90 days of care, within a 365-day period.

B. Outpatient Care: Per-visit payment of 20% of the VA average daily rate, not to exceed the Medicare deductible for any 90-day period.

C. Nursing Home Care: Payment of the Medicare deductible for each 90 days of care.

D. Combinations of Modes of Care: Payments made for either mode of inpatient care (hospital or nursing home) would be credited toward care in the other mode. Also, a veteran would not be required to pay an amount greater than the inpatient Medicare deductible in connection with any combination of outpatient and hospital or nursing home care furnished during any 90-day period.

COMPENSATION COLA

Provide for a compensation DIC/COLA at 3.1% for FY 1986.

HEALTH-INSURANCE RECOVERY

Provide for VA recovery for health insurers for non-service-connected VA care furnished to covered veterans generally to the same extent as recovery by non-federal providers would be permitted under the health insurance plan in question.

ADOPTION ASSISTANCE AND PRENATAL CARE PROVISIONS

Mr. CRANSTON. Mr. President, I am delighted that the conference committee subconference on Medicaid issues agreed to include, in the reconciliation bill, provisions relating to the adoption assistance program and the coverage of certain groups of low-income pregnant women who have previously been excluded from Medicaid. I proposed these provisions in legislation, S. 1628 and S. 7 respectively, which I introduced earlier in this session.

ADOPTION ASSISTANCE AMENDMENTS

Mr. President, the subconference included in the Finance Committee portions of the reconciliation measure three provisions relating to the adoption assistance program established under Public Law 96-272, the Adoption Assistance and Child Welfare Act of 1980.

As one of the principal Senate authors of the 1980 legislation, I have been deeply gratified by the difference that this law has made in the lives of thousands of children who might otherwise have been left to languish in foster care. HHS has reported that by fiscal year 1984 almost 12,000 children had been moved from foster care to adoptive homes under the new adoption assistance program authorized by Public Law 96-272. Experience in operating this new program, however, brought to light several problems of a technical nature with respect to continuing Medicaid coverage for these children as they moved from foster care placements into adoptive homes. Therefore, on September 11, I introduced with the distinguished Senator from Utah [Mr. HATCH] and others, legislation, S. 1628, which would make three changes in the adoption assistance program with respect to the availability of Medicaid assistance for these children. The three changes are: first, elimination of the requirement in existing law that a special-needs child receive a token adoption assistance payment that the State in which a special-needs adopted child resides, rather than the State where the adoption took place, provide Medicaid coverage; and third, clarification that Medicaid coverage can be continued during the care and an adoption decree is actually entered.

Mr. President, as I indicated in my introductory remarks on September 11—CONGRESSIONAL RECORD, 23334 on S. 1628, had the House accepted the Senate bill language in the conference in 1980, the problems relating to continuation of Medicaid between the end of foster care status and the adoption itself would not have occurred nor would the law have required a token adoption assistance payment in order for Medicaid to be available for a special-needs child whose only needs were medical. I am pleased, 5 years later, to have been able to help correct these particular problems.

Additionally, when the 1980 legislation was enacted, I had expressed my concern that it did not adequately deal with the needs of adoptive families who moved from one State to another. During hearings I chaired on the need for adoption reform legislation during the 95th and 96th Congresses, numerous witnesses testified about the problems that territorial limitations upon

then-existing State adoption assistance programs posed for their families. I was delighted when, earlier this year, the Reagan administration supported this change so that we could finally rectify this problem.

Mr. President, as I indicated at the time I introduced S. 1628, the growing, bipartisan support for these adoption initiatives begun more than a decade ago is indeed heartening. Many of those who once opposed Federal legislation to encourage adoptions have now become strong supporters and proponents of our efforts in this area. Even the Reagan administration which in 1981 and 1982 had proposed the repeal of Public Law 96-272, now supports its continuation and has launched its own special needs adoption initiative. Having been a principal author of both Federal statutes relating to adoption, Public Law 96-272 and Public Law 95-266, I welcome this support and new enthusiasm for adoption alternatives. In addition to the Senator from Utah [Mr. HATCH], S. 1628 has been cosponsored by Senators DODD, GRASSLEY, LEVIN, METZENBAUM, MOYNIHAN, RIEGLE, ROCKEFELLER, and HUMPHREY.

EXTENDING MEDICAID COVERAGE TO CERTAIN LOW-INCOME PREGNANT WOMEN

Mr. President, I am also exceedingly grateful to my good friend, the chairman of the Senate Finance Committee, the Senator from Oregon [Mr. PACKWOOD], for the Senate conferees' agreement to accept the House provisions extending Medicaid coverage to low-income pregnant women who are living with an employed spouse, but whose family income is below the AFDC income and assets eligibility standards. The Senator from Oregon and I had discussed these provisions privately when the reconciliation bill was before the Senate and he then assured me that he hoped to be able to include these provisions in the final legislation.

In January, I introduced legislation, S. 7, to close the gap in the Medicaid Program which resulted in these low-income pregnant women in a large number of States being denied the medical assistance necessary to carry their pregnancy to term and increase the likelihood of having a healthy baby. This has been an effort of mine which has gone on over a number of Congresses; each Congress we have made more progress in ensuring that low-income pregnant women are provided with the medical assistance they need during pregnancy. In the last Congress, we succeeded in Public Law 98-369 in extending Medicaid coverage to low-income pregnant women who have previously been excluded because they had no other dependent children or were living with an unemployed husband. However, provisions which would have extended the same coverage to low-income women living with an employed husband were not enacted. Enactment of the provisions in this reconciliation legislation which would extend Medicaid coverage to this group also corrects an inequity which I consider to be antifamily and antiwork. My statements explaining the history of these provisions, earlier versions of S. 7 which were introduced in the 95th, 96th, 97th, and 98th Congresses, and the cost effectiveness of providing medical assistance during pregnancy to low-income women are set forth in the CONGRESSIONAL RECORD of January 24, at 987 and July 23, 1985, at 19964. My July 23 statement includes the revised CBO cost estimates for enactment of S. 7.

Mr. President, I am very proud to say that S. 7 and my efforts in this area have always enjoyed strong support from a broad range of organizations, including child advocacy groups and health-care groups, as well as organizations with sharply differing positions on the issue of abortion. Those organizations which have endorsed S. 7 include the National Right to Life Committee, Planned Parenthood Federation of America, Children's Defense Fund, National Conference of Catholic Charities, Catholic Health Association, Association for Retarded Citizens, Family Service Association of America, Child Welfare League, National Association of Children's Hospitals and Related Institutions, California Association of Children's Hospitals, National Perinatal Association, and American Academy of Pediatrics.

Mr. President, I also want to express my appreciation to my colleagues from both sides of the aisle and with differing views on the issue of abortion, who have given their support to S. 7 and the principles it represents. Support for S. 7 represents support for an initiative that is prochoice, prolife, and profamily in a very meaningful sense. For those who support freedom of choice, nothing could be more central to that freedom of choice than the right of a low-income woman to choose to carry a pregnancy to term free from the economic pressures arising from her inability to pay for the costs of the medical care needed. For those who believe that abortion should never be permissible, making available the medical care necessary for a low-income women to carry a pregnancy to term is essential to alleviating economic pressures which might otherwise influence a decision to terminate a pregnancy.

Additionally, having been deeply involved with several of my colleagues in the efforts in the last Congress to develop the framework for a responsible and sensible approach to dealing with the so-called Baby Doe cases, I have also tried to point out the relationship between that issue and making adequate prenatal care available to all pregnant women. Although it may not be medically possible to eliminate entirely the incidence of high-risk births, there is absolutely no question that the availability of adequate care during pregnancy can be critical to reducing the likelihood that a child will be born with a serious disabling and life-threatening condition.

The cosponsors of S. 7 include Senators MOYNIHAN, MATSUNAGA, INOUYE, RIEGLE, METZENBAUM, DODD, LEVIN, KENNEDY, ANDREWS, SIMON, LEAHY, BOSCHWITZ, PROXMIRE, and ROCKEFELLER.

Again, I would like to express my appreciation to the Senator from Oregon [Mr. PACKWOOD] for his support and work on behalf of this provision, and for his commitment to helping ensure that reproductive choice includes the right to carry a pregnancy to term without the economic pressure that lack of access to medical assistance can create.

Finally, my thanks to the Senator from Texas [Mr. BENTSEN] for his efforts on the Finance Committee on behalf of both the adoption assistance provisions and the Medicaid coverage for low-income pregnant women and to the Senator from Louisiana [Mr. LONG], the ranking minority member for his support as well.

CONCLUSION

Mr. President, I am very pleased that these provisions relating to adoption assistance and medical care for low-income pregnant women have been included in this measure. I believe that both initiatives represent a significant step forward in our continuing efforts to improve the lives of countless numbers of infants, young children, and their families.

SOLE COMMUNITY HOSPITAL AMENDMENT

Mr. President, I am very pleased that S. 1730, the Consolidated Omnibus Budget Reconciliation Act of 1985, as agreed to by the conference committee includes a provision to require that certain sole community hospitals be provided with adjustments in their Medicare payments to account for services instituted after the end of the so-called base year. This provision—which derives from an amendment, amendment No. 1032 to S. 1730, that I proposed with Senator BURDICK on November 13, 1985—would correct a very serious inequity affecting Redbud Community Hospital in Clearlake, CA—and possibly a number of other sole community hospitals.

Mr. President, Redbud Hospital has been engaged in litigation for a year and a half with the Health Care Financing Administration in HHS in an attempt to obtain a fair and equitable Medicare payment rate which would take into account the three new services—intensive and cardiac care units and a new pharmacy—that the hospital instituted after the end its base year, 1982-83. As I explained during

the debate on my amendment—which appears in the RECORD for November 13, beginning on page 31733—these services were instituted after many years of planning and development and are necessary for the hospital to meet the needs of the predominantly elderly community it serves. Without financial relief to meet its resulting increased operating expenses, the hospital could very well be forced to default on its State-issued bonds or reduce its services to those who depend on it for their care.

After 18 months of proceedings, the lawsuit is still pending. In the process, the hospital has nearly exhausted its resources for continued litigation.

With this legislation, Redbud will be able to bring the litigation to a close, and receive just compensation. And the residents of Clearlake Highland will be able to have access to a full range of needed life-saving hospital services.

I would like again to thank the chairman of the Finance Committee [Mr. PACKWOOD] and the ranking minority member [Mr. LONG] for their assistance when I, along with Senator BURDICK, offered the amendment and for their support of the provision in conference. My thanks also to Bob Hoyer and Michael Stern, two absolutely splendid professionals, for their help and expertise on this matter.

Mr. McCLURE. Mr. President, the Committee on Energy and Natural Resources reached conference agreements with the House on all matters within its jurisdiction. Specifically, subconference 11 on energy programs reached agreements on provisions regarding the Strategic Petroleum Reserve, Federal Energy Conservation Shared Savings, Biomass Energy and Alcohol Fuels Loan Guarantees, and synthetic fuels. Subconference 12 reached agreements on provisions regarding uranium enrichment. And, subconference 13 reached agreement on Outer Continental Shelf issues.

These conference agreements achieve savings of $6,162 million and $6,076 million in outlays in fiscal year 1986 and $6,124 million in budget authority and $6,504 million in outlays for the 3 fiscal years 1986 through 1988. The savings exceed the committee's original targets in its reconciliation instruction.

In summary, these conference agreements are consistent with the assumptions in the budget resolution in two areas: First, they achieve savings in DOE's Strategic Petroleum Reserve Program by reducing the minimum average annual fill-rate from 159,000 to 35,000 barrels per day. Second, the conference agreement includes provisions to settle the legal dispute between the Federal Government and several States regarding the disposition of certain bonuses and rents held in escrow as of March 31, 1985. As assumed in the Senate and House committee reconciliation instructions, the conference agreement distributes 27 percent of such bonuses and rents to the affected States as well as interest accrued thereon. However, as did the Senate and House passed measures, the conference agreement also includes the disposition of other OCS revenues in dispute, specifically, royalties, both retrospectively and prospectively.

In addition, the conference agreements achieve savings in budget authority and outlays in four areas not assumed in Senate and House reconciliation instructions, which are uranium enrichment, DOE energy conservation programs, DOE biomass loan guarantees, and synthetic fuels.

STRATEGIC PETROLEUM RESERVE

The Strategic Petroleum Reserve, which was authorized in 1976, continues to be the United States' principal line of defense in the event of another severe disruption of international energy supplies. When we began the new fiscal year on October 1 there were approximately 489 million barrels of crude oil in storage.

By comparison, the conference agreement provides for a minimum fill-rate of 35,000 barrels per day through fiscal year 1988. At this reduced fill-rate, at the end of fiscal year 1986 there will be approximately 500 million barrels in storage. However, the conference agreement specifically requires that a minimum average annual fill rate of 35,000 barrels per day be maintained until 527 million barrels of oil are stored in the SPR.

This change in the minimum fill-rate will achieve fiscal year 1986 outlay savings of $1,455 million. The corresponding outlay savings over the 3-year period of fiscal years 1986 through 1988 will be $4,003 million.

Similarly, the conference agreement regarding SPR facility construction, as did the budget resolution, provides for continued expansion of SPR capacity at all sites toward the objective of filling the SPR to 750 million barrels. Under the conference agreement the available SPR capacity is expected to increase to nearly 550 million barrels by the end of fiscal year 1986. By comparison, at a minimum fill-rate of 35,000 barrels per day, or 12.8 million barrels per year, the cumulative oil fill will be below 550 million barrels through fiscal year 1988. Therefore, this agreement will not constrain in the fill-rate of 35,000 barrels per day.

URANIUM ENRICHMENT

The Senate-passed bill, as did the recommendation of the Committee on Energy and Natural Resources, established an authorization for the Department of Energy's uranium enrichment program. The effect of this authorization was to require the program to operate at no additional cost to the Treasury. In addition, the Secretary of Energy is directed to make an initial repayment to the Treasury from current revenues, if any, of excess expenditures accumulated over the past several years.

By comparison the conference agreement authorizes uranium enrichment appropriations during fiscal years 1986 through 1988 at a level equal to estimated revenues less an amount determined by the Secretary of Energy, which is to be paid to the Treasury in partial repayment of unrecovered Federal investments. In addition, any revenues in excess of expenditures are to be deposited in the Treasury in repayment of the debt identified by the Secretary in accordance with the conference agreement.

The resultant budgetary savings under the conference agreement in fiscal year 1986 are $190 million in budgetary authority and $120 million in outlays. The savings over the 3-year period 1986 through 1988 are $724 million in budget authority and $596 million in outlays.

In addition, the conferees, as was the Senate, were concerned about the impact of the recent decision of the U.S. District Court for Colorado, which could have serious long-term implications for the program and its revenue flow. Therefore, the conference agreement requires a report from the Secretary within 60 days of enactment on the effect of such court decision on DOE's uranium enrichment program and steps that may mitigate those effects.

DOE ENERGY CONSERVATION PROGRAMS

The conference agreement, as did the Senate-passed bill, authorize Federal agencies to enter into certain contracts for energy efficiency improvements in Federal buildings. Under such contracts the contractors will be paid from money saved as a result of the energy efficiency improvements installed in Federal buildings.

According to the Congressional Budget Office, this shared savings program can save the Federal Government approximately $6 million over the next 3 years, with a potential of $350 million over the next 10 years.

OUTERCONTINENTAL SHELF 8(G) REVENUES

Mr. President, the conferees also agreed on language resolving the litigation over section 8(g) of the Outer Continental Shelf Lands Act. The statement of managers explains the result of the conference, and with respect to the 8(g) issue itself, I think the conference did a remarkable job given the time limitations we were under. The agreement will resolve with finality all issues with respect to the distribution of receipts from leases within the 8(g) zone.

The Senate was able to prevail in eliminating the instant recoupment provisions of the House measure. The Senate was also able to delete unac-

ceptable provisions of the House measure which would have placed limitations on how States could spend their share of these receipts and which would have mandated a 33-percent passthrough to localities. The Senate conferees agreed to a formulation on the sharing of information which we feel adequately protects the confidentiality of certain information and which also will avoid enormous paperwork.

Consistent with the report language which had been included in the Senate, the conferees agreed to specifically exclude Federal income or windfall profits taxes from the distribution of receipts. The House agreed with the Senate position which permits the Secretary to proceed with leasing in the absence of a unitization agreement and also with the Senate position which provides some flexibility to the Secretary of the Treasury in obtaining the highest return on invested funds. The House also agreed with the Senate language on section 7 disputes involving Alaska and on the extinguishment of all claims if a State were to accept payment.

In general, Mr. President, I am happy to report that the Senate position was maintained with respect to the real issue before the conference with respect to the budget. One issue which should perhaps be mentioned is the issue of whether pre-1978 leases are included. To a great extent, as the Senator from Louisiana pointed out in the conference, the issue, if there was one, was settled in the Senate by the defeat of the Evans-Metzenbaum amendment. The House conferees raised the question as to whether the statement of managers should indicate that such leases were not included. Since the bill language was identical, statutory change was not possible. The House conferees considered and then rejected a motion to adopt such report language. As a result there should be no misinterpretation over what the language of the measure means.

There were two unrelated issues which were raised in the conference. The House had adopted an amendment to section 19 of the OCSLA with respect to State review of leasing plans. The House position would have provided an effective State veto over and Federal activities by requiring the Secretary to comply with a substantial-evidence test in rejecting any State recommendations, and then only if he were to find that the damage to the national interest outweighed the environmental consequences. It is clear that any single lease could hardly meet that test.

I regret that the Senate accepted any amendment on this section. I believe that we went further than we should have back in 1978. Because the dynamics of this budget process required it, however, we did agree to language which makes it clear that when rejecting a State recommendation, the Secretary should make a point-by-point response with his reasons. I think that is useful. The present arbitrary and capricious standard has been retained for review of the Secretary's decisions. We agreed to move the standard to section 19(c) for clarity and to specifically reference the Administrative Procedures Act so that there could be no misunderstanding. The decision is strictly that of the Secretary and there should be no implication that anyone—a Governor or a court—is to substitute its judgment for that of the Secretary, especially given the present situation in the Mideast. As a substantive matter, this amendment does not change existing law. I do agree with the procedural change which requires a point-by-point response. I think that could be read into existing law in any event, and it also seems to me to be a matter of simple courtesy.

The second nongermane issue was the so-called Buy America provision. I regret to say that the Senate conferees receded to the House on this issue. I think this is a bad amendment. It violates our international trade obligations. It will cost Americans jobs. It will increase the deficit. It will jeopardize our already imperiled energy security. It will complicate and further delay our leasing program. It will cost the taxpayers and consumers of this country money. Unfortunately once again emotion came out ahead of common sense. I think the sponsors and the rest of us will regret it.

Mr. President, with the sole exception of the last two amendments, I think that the Senate conferees have done an outstanding job and I urge my colleagues to support the work of the conference.

Under the conference agreement the resultant budget savings from this action in fiscal year 1986 are $4,501 million in budget authority and outlays, which is comparable to the committee's action and the Senate-passed bill.

SYNTHETIC FUELS

Mr. President, as I noted earlier today in my remarks on the continuing resolution for fiscal year 1986, on numerous occasions since the 1973 oil embargo I have risen to address the need for the development of a commercial synthetic fuels capability in the United States. I would refer my colleagues to that statement, rather than repeat those remarks at this time.

As we are all aware, Mr. President, the United States Synthetic Fuels Corporation was established in 1980 by the Energy Security Act to create a domestic synthetic fuels capability as an alternative to oil imports. However, the House-passed Omnibus Reconciliation Act for 1985 contained provisions terminating the Corporation, as did the House-passed continuing resolution. The Senate-passed reconciliation measure did not contain comparable provisions.

Moreover, this conference agreement contains similar provisions to those in the continuing resolution, terminating the Synthetic Fuels Corporation. As I said earlier, after considerable debate and repeated attacks by its critics, the Synthetic Fuels Corporation under this conference agreement and the continuing resolution will finally fall before the budgetary axe, at the very time that it is about to successfully achieve its statutory mission.

As I noted earlier, the position of the House prevailed in the conference, following change in the administration's position in favor of abolition of the Synthetic Fuels Corporation. The conference agreement as well as the continuing resolution, as of the date of enactment, would restrict the Board of Directors of the Corporation from making any new awards for financial assistance under the Energy Security Act after enactment of this provision, except that the Corporation and its successor (Department of Treasury) is to perform and complete the undertakings of the Corporation's existing, legally binding, awards or commitments. By the statutory terms of the conference agreement, nothing in this Act shall impair or alter the powers, duties, rights, obligations, privileges, or liabilities of the Corporation, its Board of Directors, or project sponsors in the performance and completion of the terms and undertakings of a legally binding award or commitment entered into prior to the date of enactment.

As I discussed in my remarks on the continuing resolution, this restriction also applies to changes in existing financial assistance awards or commitments of the Corporation. It is not intended, however, that this limitation on changes or modifications to existing financial awards or commitments restrict changes which may be necessary as part of normal contract monitoring or administration activities. This restriction on changes, in coordination with the rescission of funds in the Energy Security Reserve, does however limit the authority of the Board (or the Secretary) to make changes which would increase the maximum obligations authority established by the Corporation with respect to any such award or commitment.

The Corporation has entered into a legal binding financial assistance award for the Union Oil Parachute Creek Oil Shale Project which obligates the Corporation to pay up to $500 million in price guarantee payments for the production of shale oil from new improved facilities to be constructed by Union Oil Company at its

existing oil shale facility in Colorado. This award also legally commits the Corporation to use its best efforts to complete documentation of the terms of a loan guarantee, and execute the loan guarantee agreement, of up to $327 million within the $500 million in obligational authority available for the price guarantee payments. The language of the provision preserves the Corporation's obligation to complete the terms of the Union Oil loan guarantee agreement. Further, it recognizes the need for consultation with the Secretary of the Treasury on the interest rate and timing, and substantial terms of the loan guarantee and requires that the Secretary provide such consultation within 30 days of enactment of this provision.

The Board of Directors of the Corporation is continued for 60 days after the date of enactment in order to perform these and other functions, including transmission to appropriate authorization committees of the Senate and House of a report containing a review of implementation of the Corporation's business plan, which also fulfills the requirements of section 126(b)(3) of the Energy Security Act.

A further indication of the effect of these provisions on the Union agreement is reflected in my colloquy with Senator ARMSTRONG on the continuing resolution, and I refer you to those remarks earlier today.

Under both this conference agreement and the continuing resolution, within 120 days of enactment the Corporation shall terminate and transfer all its functions to the Secretary of the Treasury in accordance with the provisions of existing law.

Because the Corporation is being terminated earlier than originally envisioned by the Congress, the conference agreement provides, first, that, respect to the salaries and benefits of Directors, officers and employees of the Corporation, no officer or employee shall receive a salary in excess of the rate of basic pay payable for level IV of the executive schedule.

Second, the Director of the Office of Personnel Management shall determine the amount of compensation Directors, officers, and employees shall be legally entitled to under contracts in effect on the date of enactment. With respect to compensation and benefits not covered by contract, no change shall thereafter be allowed or permitted unless the Director of the Office of Personnel Management agrees that such change is reasonable.

While the Corporation's by-laws and written policies and procedures in effect on the date of enactment of the Act will remain in effect until changed, the Corporation will not be permitted to waive any of their requirements which are necessary for a Director, officer or employee to qualify for pension or termination benefits under the Corporation's by-laws or written personnel policies and procedures in effect on the date of enactment.

Mr. President, as I discussed earlier on the continuing resolution, this abolition of the Synthetic Fuels Corporation will go down in history as one of the major breaches of faith between the Federal Government and American industry. The losers, however, are the American people.

Because of an extraordinary national need, we asked American industry to step out to the frontier of energy development in the United States and undertake the significant technological and financial risks necessary to advance the commercial development of synthetic fuels. It was recognized that this was to be a joint effort in recognition of the risk involved. What was at stake was greater control of our energy future, and the resultant national security benefits energy independence would provide.

By our action today we may well be sacrificing the security of our energy future. Just as important, we are clearly sacrificing significant private sector investment that has been made and would likely not have been made at this time if it were not for the Federal synthetic fuels initiative that led to the creation of the Synthetic Fuels Corporation. Once again the Federal Government has failed to fulfill its commitment to the American people and to the companies that have relied on it.

Mr. President, a table summarizing these savings appears at this point in my remarks.

ESTIMATED BUDGET IMPACT OF RECONCILIATION PROVISIONS COMMITTEE ON ENERGY AND NATURAL RESOURCES

[Changes from resolution baseline, in million of dollars]

	1986	1987	1988	Total

CONCLUSION

Mr. President, these conference agreements appear in titles VIII and VII of the Consolidated Omnibus Budget Reconciliation Act of 1985.

Mr. MATTINGLY. Mr. President, I rise to express my deep concern over a provision in this reconciliation conference report relating to the recalculation of the Federal Medical Assistance Percentage [FMAP] for the Medicaid Program. I do so primarily because my home State of Georgia is seriously hurt by the provision.

Under current law, the Federal matching rate is calculated biannually. Between October 1 and November 30 of even-numbered years, the Secretary of Health and Human Services is required to promulgate the FMAP which will be in effect for the next 2 years, beginning in October of the odd-numbered years. In other words, Medicaid matching rates for fiscal years 1986 and 1987 were promulgated in the fall of 1984, to be implemented in October of this year, and it was on the basis of these rates that States have planned their budgets.

The Consolidated Omnibus Budget Reconciliation Act of 1985 as passed by the Senate contained a provision which would provide for annual recalculation of FMAP rates, beginning in 1988. Mr. President, I did not object to this provision. It was fair, it treated all States equitably, and it would not have disrupted the current calculation and budget-planning cycle, since FMAP rates were scheduled for recalculation in 1988. Unfortunately, the House-Senate conference tampered with the provision by rolling back the effective date of the recalculation to 1987. The effect of this, in my opinion, is disastrous. For one thing, it is anticipated that this alteration in the effective date costs the Federal Government about $64 million. Twenty-six States gain by this recalculation. Their windfalls vary from over $30 million to $280,000 in 1987. Thirteen States lose Federal matching dollars. My home State of Georgia, for example, is denied $13.38 million.

I want to reiterate, Mr. President, that I have no quarrel with the concept of an annual recalculation of the FMAP or of implementing the change in 1988. But I believe that this issue has been dealt with in an inappropriate and unfair manner. As I have said, this change comes in the middle of a calculation cycle, essentially changing ground rules in midcourse. States which lose substantial funding could not have anticipated that they were at risk of losing funds. They had no opportunity to present their case on this issue. But they must live with the results. I have heard from the Governor of Georgia, Joe Frank Harris, who has stressed the hardship this will be to the Medicaid Program in Georgia. He has already prepared his budget for fiscal year 1987 which he presents to the Georgia general assembly in January. This budget, of course, was based on current FMAP rates. Because of

precipitous action by the conferees, he can no longer count on the $13 million currently due the State.

Furthermore, the recalculation issue was not addressed in the House prior to conference, and the Senate did not deal with the 1987 date prior to that time. Given those facts, I question the appropriateness of the conferees' action.

The proponents of the change have argued that we must provide adequate Federal assistance to those States which benefit by the change, that is, those States whose economies have declined over the past year. I believe that equal consideration should be given to all States, based on their individual Medicaid Programs and population needs. Consider this fact, Mr. President: of the 26 States which gain from the recalculation provision—over one half of those States—14 continue to have per capita income levels higher than that of the State of Georgia. Georgia has traditionally had a per capita income level below the national average, and although the State's economy is improving, it still lags behind other States.

I want to point out as well that Georgia has always had a modest Medicaid Program. Georgia provides only 17 optional services, while other States provide as many as 31. In addition, the State has made serious and successful efforts to make its program fiscally responsible. Georgia instituted a prospective payment plan for Medicaid before the Federal Government considered and implemented such a system for the Medicare Program; it was one of the first States to have home and community-based care, a cost-effective alternative to nursing home care; and Georgia has implemented a number of other cost-containing practices such as the requirement of prior approval for elective surgery, mandatory outpatient surgery for certain procedures, restriction on emergency room use, limitation of weekend admissions to emergencies, and establishment of a cost avoidance system which anticipates ineligible claims prior to payment. Several of these practices are now being adopted by the private sector in its effort to contain rising health care costs. The point I am making, Mr. President, is that the Georgia Medicaid Program does not have fat to trim in order to compensate for the sudden, unanticipated loss of over $13 million. I find it difficult to find fairness in a half-time rules change which provides additional funding to States with more generous Medicaid Programs and higher per capita income levels while penalizing a State such as Georgia.

In 1984 I urged the Senate, and particularly my colleagues on the Finance Committee, to consider approaches which treat all States equitably and fairly when considering the Medicaid Program. In addition, I urged the initiation of a discussion of our national goals and objectives for the Medicaid Program. I vigorously renew that appeal today.

This recalculation provision is onerous for my State and for others. It is my sincere hope that we can rectify this problem next year by giving consideration to the adversely affected States and by committing ourselves to a fair-minded, even-handed treatment of all States when we deal with the Medicaid Program in the future.

Mr. BYRD. Mr. President, the conference report on the reconciliation bill on which the Senate is about to act represents a significant step toward reducing the record budget deficits created over the past 4 years. The conference agreement will reduce spending by about $69 billion over the next 3 years and raise about $14 billion in revenues over the same period. For a total deficit reduction of $83 billion over the fiscal year 1986-88 period.

This bill represents real deficit reduction, arguably the only significant, real deficit reduction bill that the Senate has enacted this year.

Mr. President, this reconciliation bill alone will not solve the deficit problems that the Nation faces. But it does show that Congress is capable of taking the necessary actions.

However, I would caution my colleagues that the budget cuts envisioned by the Gramm-Rudman amendment will be about three times greater next year than those contained in this bill. Thus, this reconciliation bill is not the end of the road, it is merely one more milestone in reducing the deficit. There is a much longer and harder road ahead of us next year.

Mr. President, there are a number of specific issues in the reconciliation bill which are of particular concern to the people of West Virginia. In general, these issues have been resolved in ways that will benefit the people of my State.

One of the provisions in this bill that especially pleases me and many of my constituents is that pertaining to the Employee Retirement Income Security Act [ERISA]. Several loopholes in the current law are closed, and additional, needed resources are provided to the pension insurance system, specifically the Pension Benefit Guaranty Corporation to care for pension beneficiaries whose plans are assumed by the PBGC due to distress of the companies for which they work or have worked.

Most important to West Virginia, the ERISA amendments are crafted in such a way that they will not disrupt the delicate steps now being taken by the Wheeling-Pittsburgh Steel Corp. to reorganize and emerge from bankruptcy. Over 4,000 jobs in West Virginia hang in the balance. I am relieved, as are those 4,000 workers, their families, and their communities, that this situation was resolved satisfactorily.

I wish to thank the conferees who were part of resolving this issue, especially the distinguished junior Senator from Ohio, Mr. METZENBAUM, and the senior Senator from Pennsylvania, Mr. HEINZ.

I would also like to thank my colleague from West Virginia, Mr. ROCKEFELLER, for helping to assure this outcome.

The conferees also adopted a provision that is a fair, reasonable, and workable solution to restore solvency to the Black Lung Trust Fund.

This compromise was developed by the joint BCOA-UMWA industry committee—composed of representatives of the major coal industry companies and the United Mines Workers of America—as an alternative to the original House and Senate proposals. It provides for a 10-percent increase in the coal excise tax coupled with a 5-year moratorium on the trust fund's interest payments.

This legislation is a responsible approach in achieving solvency of the Black Lung Trust Fund in light of the changes made in the 1981 act. The consensus legislation adopted in 1981 tightened the eligibility criteria for claims and doubled the excise tax on coal. Those amendments resulted in the rate of claims being approved dropping from 40 percent to just 3.3 percent in 1985.

I wish to commend the Senate and House conferees for their fine work this issue. In particular, I wish to commend Congressman SAM GIBBONS. I also wish to commend Senator ROCKEFELLER for this fine work in pursuit of this compromise. It is imperative to return the Black Lung Trust Fund to solvency, and I am pleased that we have taken the steps to do this in a fair and reasonable manner.

The reconciliation bill also contains provisions relating to the funding of the Superfund Program, a program designed to clean up the Nation's abandoned toxic waste dumps. Those provisions establish an equitable distribution of the burden of financing the superfund through a broad-based manufacturing excise tax and a petroleum and chemical feedstock tax. This tax structure will provide adequate resources to fund the Nation's toxic waste cleanup program without jeopardizing the competitiveness of the American chemical industry in world markets.

Mr. LAUTENBERG. Mr. President, I rise to oppose the fencing of the Superfund funding in the reconciliation bill. The funds would be collected, but not spent. They would be held back until the Superfund conference is concluded sometime next year. They would be held back from use to clean

51-059 O-87-33 (Pt. 27)

up the hundreds of toxic wastesites that plague my State and States across the country. They could be used as leverage against those members of the conference favoring strong Superfund but concerned about the fund-starved program to swallow a weaker bill. The outcome of the reconciliation conference on Superfund is very disappointing to me for these reasons.

Mr. President, while I would have preferred to see a $10 billion Superfund, I supported the taxing mechanism included in the Finance Committee's funding package. I believe in this instance that a broad-based tax is justified, because a broad-based spectrum of industry contributes to the toxic waste problem across this Nation. I withheld pushing for the inclusion of temporary Superfund tax extension pending the outcome of the reconciliation conference on the Finance package. And now, I can only express my sincere disappointment that the reconciliation conference failed to provide temporary funding for the program until we conclude the conference on the reauthorization of Superfund.

On December 10, I introduced a bill to temporarily extend the expired taxes for Superfund with the chairman of the Environment and Public Works, Senator STAFFORD, and Senators DURENBERGER, MITCHELL, BAUCUS, and MOYNIHAN. Since introduction, another nine Senators have cosponsored this measure.

Mr. President, I had planned to push the measure had the reconciliation conference failed to include a Superfund tax. In effect, the conference did fail to include a tax that will benefit the program at this critical time. By fencing the funds, the program will continue to suffer from funding constraints over the months ahead.

I am very concerned about the state Congress leaves the Superfund program in as we go home for the holidays. On September 30, the Superfund tax expired, and the program has been brought almost to a standstill. EPA has funding for the minimum of duties: administration of the program, emergency response actions and a limited number of site remedial investigation and feasibility studies. The Agency has had to fund these activities primarily by pulling back funds from site cleanups, studies, interagency agreements, and other activities.

As a result, EPA has stopped all cleanup activities at 16 New Jersey sites and over 100 sites nationwide. Because less than $180 million of the original $1.6 billion fund remains, more sites will be affected until we complete action on the Superfund conference. The Superfund tax included in the reconciliation bill does nothing to change this dismal situation, and I restate my opposition to the fencing of the tax in reconciliation and my disappointment that I did not have the opportunity to bring a temporary extension of the Superfund tax before the full Senate.

Mr. ARMSTRONG. Mr. President, how much time remains on each side?

The PRESIDING OFFICER. The Senator from Colorado has 5 minutes and 32 seconds remaining. The Senator from Louisiana has 14 minutes, and 44 seconds remaining.

Mr. ARMSTRONG. Mr. President, it is my understanding that the senior Senator from Louisiana wishes to speak. I would like to save a little time for the majority leader in the event he wishes to speak. Other than that, I have no further need to use time.

The PRESIDING OFFICER. Who yields time?

Mr. JOHNSTON. Mr. President, my senior colleague is on the way, and will be here shortly.

If no one else wants to speak at this time, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. TRIBLE). Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, I yield to my senior colleague such time as he may desire. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Louisiana has 10 minutes and 15 seconds remaining.

The distinguished senior Senator from Louisiana is recognized.

Mr. LONG. Mr. President, I do not agree with everything that is in this conference report, and I doubt many Senators agree with everything in it.

There are so many diverse provisions here, some of which even cost the Government money, though most of them will save money. On balance, this bill does what a reconciliation bill is supposed to do. It reduces the deficit by many billions of dollars.

I regret to say that it does have some provisions that are not deficit reduction provisions or reconciliation provisions. But that is a fact of life.

We have had to live with that situation in years gone by. I am sure we will have to live with it in years to come.

All factors considered, Mr. President, this bill advances the national interest, and I will be pleased to vote for the conference report.

The PRESIDING OFFICER. Who yields time?

Mr. JOHNSTON. Mr. President, if no further colleague wishes to be heard, I yield back the balance of my time.

I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ARMSTRONG. Mr. President, I will be ready to yield back in just a moment. We are awaiting the pleasure of the leader to determine if he wishes to say a word before we go to a vote.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ARMSTRONG. Mr. President, I am advised that the leader does not require time to speak.

Mr. PROXMIRE. Mr. President, will the Senator yield me 30 seconds?

Mr. ARMSTRONG. I am pleased to do that.

VAT AMENDMENT

Mr. PROXMIRE. Mr. President, the principal dispute between House and Senate reconciliation conferees concerns Senate efforts to include the Superfund's value-added tax in the conference agreement. Why did the House Members wisely object to inclusion of this tax? The answer is simple.

The House has already passed a far superior Superfund revenue provision, the Downey-Frenzel amendment, which relies primarily on increased oil and chemical feedstock taxes and a new waste-end tax for funding the program.

This amendment puts the burden right where it belongs—on the companies which generate the waste. Now I can hear my colleagues ask, "Isn't that what we did with the VAT?" No way.

The VAT is a sneaky tax, hidden from public view but real nonetheless. Yet, it adds to the cost of every product taxes but it is hard for consumers to identify. Even worse, it risks taxing industries whose processes and products are benign, causing no hazardous waste.

In contrast the Downey-Frenzel amendment adopted by the other body is perfectly straightforward—the polluters pay. And why should they not? After all, they created the mess.

But while considerations of tax fairness alone should be enough to block this provision, there are other reasons for opposing inclusion of the Superfund tax in reconciliation.

First, once Congress adopts a taxing mechanism impetus disappears for conferencing on other Superfund items. Unfortunately, many needed program reforms embodied in the House and Senate bills and could disappear.

Even worse, we risk losing the benefit of the wisdom of those of our colleagues who know this program best, but were members of the Environment

and not the Finance Committee and so did not participate in the conference.

Mr. President, I hope when the Superfund conference meets early next year this section can be improved and made more environmentally and economically sensitive.

Mr. ARMSTRONG. Mr. President, I thank the Senator from Wisconsin and the Senator from Louisiana. We are ready to go to a vote. I urge all Senators to support the motion.

The PRESIDING OFFICER. The question is on agreeing to the conference report. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maine [Mr. COHEN], the Senator from New Mexico [Mr. DOMENICI], the Senator from Minnesota [Mr. DURENBERGER], the Senator from North Carolina [Mr. EAST], the Senator from Oregon [Mr. HATFIELD], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Nevada [Mr. LAXALT], the Senator from Alaska [Mr. MURKOWSKI], the Senator from New Hampshire [Mr. RUDMAN], the Senator from Connecticut [Mr. WEICKER], are necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

I further announce that, if present and voting, the Senator from Connecticut [Mr. WEICKER] would vote "yea."

Mr. CRANSTON. I announce that the Senator from Oklahoma [Mr. BOREN], the Senator from North Dakota [Mr. BURDICK], the Senator from Connecticut [Mr. DODD], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Arkansas [Mr. PRYOR], the Senator from Maryland [Mr. SARBANES], the Senator from Mississippi [Mr. STENNIS], and the Senator from Nebraska [Mr. ZORINSKY], are necessarily absent.

I also announce that the Senator from Florida [Mr. CHILES] is absent because of illness.

I further announce that, if present and voting, the Senator from North Dakota [Mr. BURDICK] would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 78, nays 1, as follows:

[Rollcall Vote No. 379 Leg.]

YEAS—78

Abdnor	Bumpers	Dixon
Andrews	Byrd	Dole
Armstrong	Chafee	Eagleton
Baucus	Cochran	Evans
Bentsen	Cranston	Exon

Durenberger	Mathias	Zorinsky

So the conference report was agreed to.

Mr. ARMSTRONG. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

THE SCANLON NOMINATION

Mr. DOLE. Mr. President, may I have the attention of my colleagues?

Some of my colleagues have asked about what we are going to do for the balance of the evening, tomorrow, and the balance of the week. I need to find out first from the distinguished Senator from Illinois and the distinguished Senator from Wisconsin how soon we might vote on the Scanlon nomination.

Mr. PROXMIRE. I say to my good friend the majority leader that I certainly do not want to detain the Senate, but I feel very, very strongly that we should not vote on this nomination this year. I say that because, as I understand it, there has been an investigation of Mr. Scanlon requested of the Justice Department. We should have that investigation before us. It is a very serious charge, a charge of perjury; as a matter of fact, allegedly committed before a Senate committee.

For us to act on a nominee under those circumstances, it seems to me, would be a serious mistake. For that reason, I would expect to talk at very great length tonight and tomorrow until we can have some opportunity to at least get an understanding that we would try hard to get that investigation.

I say to my good friend, once we get the investigation from the Department of Justice, I would have no objection to a time limitation and a vote. But I think we ought to have that first.

Mr. DOLE. Mr. President, maybe I should know this, but I am not certain what happens to his nomination in the meantime. May I address that question to the Chair?

The PRESIDING OFFICER. The nomination will remain on the calendar.

Mr. DOLE. Would it take unanimous consent——

Mr. BYRD. Mr. President, is that the case? Would not a nomination that is before the Senate for 30 days, during a recess or otherwise, be returned to the President?

The PRESIDING OFFICER. The nomination would be returned to the executive branch unless unanimous consent is granted to keep it here.

Mr. DOLE. I did not hear the first part of the Chair's statement.

The PRESIDING OFFICER. The nomination would be returned to the executive branch unless unanimous consent is granted to keep it on the calendar of the U.S. Senate.

Mr. DOLE. Mr. President, I wonder if the distinguished Senator from Wisconsin, who has indicated we are not going to vote on it in any event, would have any objection to that, at least to keep it here to remain on the calendar to give the Senator an opportunity to look at whatever report it is? Otherwise, it goes back to the executive branch and has to be resubmitted.

Mr. PROXMIRE. Would the majority leader permit a very brief quorum? I would like to consult with Senator SIMON.

Mr. DOLE. Maybe while the Senator is doing that, I could ask another Senator a question.

THE RECONCILIATION CONFERENCE REPORT

Mr. DOLE. Mr. President, I ask of the distinguished chairman of the Committee on Finance: We have just passed the reconciliation conference report by an overwhelming vote. It is my understanding that the House side, there will be separate vote on the value-added tax which finances superfund. If they were successful in striking out whatever tax it is—maybe not value-added tax—and it came back to the Senate, what would be the Senator's disposition? I know it would be bad.

Mr. PACKWOOD. Mr. President, first, the Senator is correct. He will recall the Senate adopted the resolution and the Senator from North Carolina said we would not adopt a value-added tax and we have not.

Second, this conference conclusion was arrived at in good faith, as all conferences, and the Senate gave a great deal. We gave up coverage of Medicare employees by the States, $4 billion. We gave a great deal on black lung—more than, in my judgment, I thought we should have given—in exchange for adopting, interestingly, what is basi-

cally the House Ways and Means Committee position on the Superfund.

If the House were to accept a conference report that has been arrived at in good faith and take out the part that they did not like to give to us and keep the parts that we were not wild about giving to them but did in a bargain for exchange, then it is my intention, Mr. Leader, to stay on the floor tonight, tomorrow, and the next night, and there will be no reconciliation, period—not on this, not on Medicare, not on Medicaid, not on Outer Continental Shelf, not on anything, and reconciliation is dead.

Mr. DOLE. Is the Senator firm? [Laughter.]

Mr. President, I think those answers are fairly decisive.

THE SCANLON NOMINATION

Let me go back now to the Senator from Wisconsin and the Senator from Illinois. Since it has been made clear that we will not act on the Scanlon nomination, can we get unanimous-consent to leave it on the calendar so we might reach that agreement early next year once they have had a chance to look at the Department of Justice report?

Mr. PROXMIRE. Mr. President, I have discussed this with my colleague from Illinois. Our decision is that we have no objection, if the majority leader will agree that the nomination will not be taken up until we get the report from the Justice Department.

Mr. DOLE. Obviously, I will not have any problem with that, if that is the desire of the Senator from Wisconsin and the Senator from Illinois.

Mr. SIMON. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. SIMON. First, I want to thank my colleague from Wisconsin.

I say to the majority leader, who is in touch with the White House, that I hope that, even aside from the Justice Department, they would take another look at this nomination.

Mr. DOLE. Mr. President, I ask that further proceedings on this nomination be set aside, and I ask unanimous consent that the nomination not be returned to the President.

Mr. BYRD. What is the request?

Mr. DOLE. Mr. President, if my request did not include the implication that we would get unanimous consent to hold that nomination for more than 30 days, I intend to imply that we would hold the nomination in the remaining status quo until the Senate reconvenes on January 21 and we would not proceed to the consideration of the nomination until both Senators have had an opportunity to review the Justice Department's report.

Mr. BYRD. Mr. President, will the distinguished majority leader withhold that part of his request? Part of it was to set this aside. Will he withhold that, with respect to holding this nomination in a status quo position? Would he withhold that for now? It might be that we would agree to that, but not right at this moment.

EXECUTIVE SESSION

Mr. McCLURE. Mr. President, I understand this has been cleared on both sides of the aisle.

I ask unanimous consent that the Senate go into executive session to consider a nomination.

There being no objection, the Senate proceeded to the consideration of executive business.

Mr. McCLURE. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be discharged from further consideration of the nomination of Donna R. Fitzpatrick, and I ask for the immediate consideration of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nomination will be stated.

DEPARTMENT OF ENERGY

The assistant legislative clerk read the nomination of Donna R. Fitzpatrick, of the District of Columbia, to be Assistant Secretary for Conservation and Renewable Energy.

Mr. McCLURE. Mr. President, on December 12, 1985, the Committee on Energy and Natural Resources held a hearing to consider the nomination of Donna R. Fitzpatrick to be Assistant Secretary for Conservation and Renewable Energy of the Department of Energy. She has fully complied with the committee's rules requiring submittal of a financial disclosure report and a detailed information statement. I am prepared to recommend Ms. Fitzpatrick's confirmation.

Ms. Fitzpatrick was appointed Acting Assistant Secretary for Conservation and Renewable Energy on March 11, 1985. Prior to her appointment, she served as the Principal Deputy Assistant Secretary. Miss Fitzpatrick has also served as a consultant for the Department of Energy, and as a member of the transition team for the National Science Foundation.

The Assistant Secretary for Conservation and Renewable Energy administers research and development programs relating to alternative fuels, energy efficiency in end-use consumption, and renewable energy supplies. During her testimony before the committee, Ms. Fitzpatrick described her view of her role at the Department:

While I believe that the most effective means of obtaining real gains in energy efficiency and the use of renewable energy is through the mechanism of the marketplace, I also believe that it is important that we as a nation pursue a stable program of research and development in these fields, while retaining the flexibility to address changing needs. I am committed to providing leadership within the government and for the public to pursue every economical opportunity to improve our energy efficiency, to conserve rather than waste, and to utilize our abundant renewable resources.

Mr. President, on behalf of the Committee on Energy and Natural Resources, I recommend Senate approval of the Presidential nomination of Donna R. Fitzpatrick for the position of Assistant Secretary for Conservation and Renewable Energy.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. McCLURE. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE 1985 FARM BILL

Mr. ARMSTRONG. Mr. President, the success of our farming families in feeding this Nation and the world is one of the most outstanding achievements of our Nation.

America is the healthiest Nation on Earth. That's because our farmers provide us with the most abundant and varied food supply in the world. Not only do we give thanks for our efficient, well-developed agricultural system, the entire world does so as well. American farmers feed the world's hungry.

Producing, processing, packaging, transporting, and distributing food comprises America's single largest industry. The production of crops and livestock account for one-fifth of the Nation's gross national product and employs 23 million people, or one out of every 5 jobs in the private sector. Farming employs 3 million workers, accounting for more jobs than the combined work forces of the transportation, steel, and automobile industries. Agriculture is also the single greatest contributor to our merchandise trade balance; last year, agriculture added $19 billion to our balance of payments.

American agriculture is also one of the most technologically advanced and productive sectors of the economy. At the turn of the century, the average farmer produced enough food to feed 7 people here and abroad. By 1974,

that number had climbed to 59. Today, each farmer produces enough food for 79 people. One hour of farm labor produces 16 times as much food as it did in 1920.

As astounding as these accomplishments are, even greater progress is near. A recent report by the Office of Technology Assessment summarized the impact of technological advances that agriculture may soon adopt:

Before the turn of the century, cattle ranchers in Texas may be able to raise cattle as big as elephants. California dairy farmers may be able to control the sex of calves and to increase milk production by more than 100 percent without increasing feed intake. Major crops may be genetically altered to resist pests and disease, grow in salty soil and harsh climate, and provide their own fertilizer. And computers and electronics will be used to increase management efficiency. . . . While it may sound like science fiction, advances in biotechnology and information technology will make these technologies a reality in the next 10 to 20 years.

This tremendous agricultural system and the productivity of our farmers stands in the stark contrast to the economic conditions in agriculture today.

American agriculture is in serious trouble. Commodity prices have declined every year this decade. Land values have plummeted so low there is hardly a variable market for land sales. Export markets that once bought 40 percent of all commodities and two-thirds of the wheat crop are being lost to foreign competition. These market conditions only exacerbate farmers' greate problem: debt. nationwide, farmers hold a staggering $200 billion in debt.

For many farmers, the root of the present difficulties lie in the events of the 1970's. First, farmers, who are great energy users, suffered energy prices that tripled in a decade. Next, the soaring, double-digit inflation, the legacy of the Carter administration, further increased operating costs. Then, interest rates hit a record 21½ percent. The only protection farmers had against this triple threat was rising land prices and, in droves, farmers, on the advice of their Government and their bankers, borrowed heavily against their land.

In 1980, agriculture was dealt a severe blow by the embargo on agricultural exports to the Soviet Union, our largest export market for wheat. The United States share of the Soviet market went from 70 percent to 20 percent, and other importing nations suddenly viewed the United States as an unreliable supplier and altered their dependence on United States crops. Other food exporting nations, naturally, increased their production.

Federal farm policy hindered farmers, rather than helped them. Federal policy set in 1981 encouraged farmers to produce for the Government and not for the market. The 1981 farm bill set price and income supports at levels anticipating inflation would continue unabated. Instead, inflation fell. Congress was wrong and our loan rates and target prices were set without consideration of market supply and demand conditions. High price and income supports encouraged production here and abroad. Acreage reduction programs also sent a signal to other exporting nations to increase their production. The result has been surpluses that depress market prices. The U.S. farmer sells his product to the Government and the foreign producer takes over markets we used to serve.

If someone designed a way to kill an industry, there probably could be no more lethal way than through our commodity programs. In no other industry do we announce production and price decisions to the rest of the world and, in effect, let foreign producers systematically undercut these prices and, thereby, take over U.S. share of the markets.

A shriveled export market, excess production, high costs and high interest rates rapidly eroded farmer's cashflow. Once cash-flow eroded, many farmers could not meet mortgage payments, triggering a precipitous and unprecedented decline in the value of farmland. Today, many farmers are experiencing a debt/credit crunch caused by falling land values, high real interest rates and declining commodity prices. Lenders, painfully aware of the declining value of farm assets, are carefully weighing further extension of credit.

To find out how bad conditions are today in agriculture, one only needs to ask the farmers and ranchers themselves. A survey of farmers in Yuma and Washington counties in eastern Colorado was presented to my office last spring and showed these sample responses to the conditions in agriculture today:

It has been bad for three years, and it is not getting any better.

Depressed family life. It affects our health; can't buy enough food; forced into land and livestock sales.

We have had to borrow more on our land to pay operating expenses and we're barely hanging on by the skin of our teeth.

There is no incentive for our young people to work all their life without a future to build on.

Colorado agriculture is in trouble. A spring 1985 survey showed 17 percent of the respondents said they would not be able to remain in farming another year. Some 35 percent said they probably would be able to remain in farming another 2 to 5 years. Two-thirds of the receipts in Colorado agriculture are in the cattle industry and the livestock sector of agriculture which operates without Government support has suffered depressed economic conditions longer than other sectors of agriculture.

A more recent tragedy for agriculture in Colorado was the loss of the sugar beet industry this year due to the bankruptcy of five beet processing plants in Colorado. Sugar beets have been an integral part of Colorado agriculture since the turn of the century. Their niche was particularly important as feed for the large cattle industry, and a high value alternative crop for an agriculture dependent on too few crops. In a good year, the sugar beet crop and processing plants has added as much as $90 million to Colorado's economy. Now, rural northeastern Colorado has lost this income at the worst possible time.

Cold, hard statistics offer no insight, however, into the personal suffering farming families are experiencing. The strains and emotions of people who work so hard, with little reward or recognition, to give us an abundant, varied, and inexpensive food supply are difficult for most of us to fully understand. Now, some of these families are facing the prospect of losing their farms. The most crushing reality to the farmer may not be the impact on himself, but the knowledge that his sons and daughters may not be able to continue in farming.

What can Congress do to improve economic conditions in agriculture?

For one, it is imperative that the Federal budget deficit be reduced in order to reduce the cost of interest. The deficit requires the Federal Government to borrow money from the same markets that private citizens borrow in and thus drives up the cost of borrowing for everyone. For many farmers, the greatest cost is his interest payments and for each one point drop in interest rates, net farm income increases by 10 percent. Congress has finally taken action to insure that Federal budget deficits are reduced to zero by 1991 with the passage of the Gramm-Rudman deficit reduction bill. Congressional inaction on the budget deficits the last several years has hurt farmers more than anyone else, but now at least there is hope that deficits will ultimately be brought under control.

While providing a healthy, growing economy is the most important way the Government can help farmers, the focus in Congress is specific Federal farm policies. There are huge problems and inequities with the Federal farm program.

Rather than being part of the solution, Federal farm program create problems. For one, we have programs for such commodities, but not for others. Livestock is the largest segment of agriculture, but there is no program and, more often than not, the livestock sector suffers from the Federal farm programs for other crops. There are programs for nutritionally important crops like corn and wheat.

But, we also have programs for peanuts and honey, which have many important and nutritious uses, but are not food staples. Some programs, like dairy, we justify because of a particular quality, such as perishability, yet we don't necessarily extend programs to eggs or other commodities that are perishable. We even have programs for cotton, wool, and tobacco, which can't be eaten or what consumptive qualities they do have are harmful.

On another level, we have an entire agency at USDA to preserve our valuable soil resources in the recognition of the soil's importance to our bountiful agricultural system. The Soil Conservation Service does a good job, but their every effort is defeated by the commodity programs and the credit programs that extend benefits to farmers who plow the least productive land and the land most prone to erosion.

Even with all the talk about farm programs, they only support 25 percent of agriculture commodities. Although participation rates will be much higher this year, the fact remains that a considerable amount of agriculture production is not under a farm program. So, even if we designed the most perfect farm program we would not be able to solve the problems of most farmers.

The farm bill we are considering today does not take several steps to improve the farm programs. First, the bill contains a "sodbuster" provision that I feel is especially important in discouraging the plowout of fragile grasslands in Colorado and throughout the Nation. Over 650,000 acres of native sod, highly sensitive to wind and water erosion, have been plowed in Colorado since 1978. A typical spring in Colorado has seen 50,000 acres of fragile grasslands plowed. Even if allowed to "go back" to grass, the arid conditions make the reestablishment of sod an agonizingly slow process and not likely to be seen in our lifetime. I have introduced this legislation in Congress in each of the last 4 years and had it approved by the Senate on several different occasions, only to have the House of Representatives kill the measure or add controversial amendments that had the effect of killing it. The delay has caused thousands of acres of our soil resources to be irreparably damaged. But there are hundreds of thousands more acres that are still susceptible to damage, so I am pleased at last to see the enactment of this much needed legislation.

Next, the bill will allow loan rates to adjust to market conditions. For wheat, the loan rate will be $3 bushel in 1986 and for corn the loan rate will be $2.40 bushel. Thereafter, the loan rates can eventually drop to between 75 to 85 percent of the 5-year average market price, but cannot drop by more 5 percent a year. In general, this approach means that loan rates will not immediately drop to market clearing levels. In order to get our crops moving in the market and keep them from being stored by the Government, two special features have been added to move the crops:

The first feature is a modification of the so called "Findlay Amendment" that will allow loan rates to drop an additional 20 percent if the loan rate exceeds 110 percent of the market price. This will help move wheat and other commodities dependent on the export market and will not come at the expense of the farmer's income, since the payment limitation for deficiency payments will not be subject to this 20 percent drop in the loan rate.

The second feature, known as the marketing loan, will be employed if the the Findlay amendment is not sufficient to move our crops onto the market. This feature will allow a loan to be repaid at an amount that is as low as 70 percent of the market price. Again, this will benefit the farmer and agriculture by increasing sales, and benefit the farmer since he will not have to repay the difference between the loan rate and the market price.

The most contentious aspect of the farm bill has been the level of the target price because it is the most important aspect affecting the cost of the farm bill and it sets the level of income payments to farmers. The cost of the 1977 farm bill was $16 billion, or about $4 billion a year. Since 1981, the cost of the commodity programs has been $55 billion, or over $13 billion a year. Thus, we now almost spend in 1 year what we used to spend in 4 years on agricultural programs. In 1983 alone, we spent $19 billion on commodity programs and an additional $9 billion on the PIK Program—that's $27 billion in 1 year to support agriculture! The cost this year is about $19 billion. Under the farm bill before Congress today, the cost is estimated at $52 billion over just the first 3 years of the bill, or about $18 billion a year.

As could be expected, the debate ended up somewhere in the middle with the final bill freezing target prices for 2 years. Thereafter, the Secretary of Agriculture would have authority to reduce target prices by 2 percent in 1988 and 3 percent in 1989. For the 1990 crop, the target price could drop another 5 percent, but not go below $4 for wheat and not below $2.75 for corn.

The acreage reductions for wheat would be a maximum of 25 percent in 1986, 27.5 percent in 1987, and 30 percent for the 1988-90 crops. The minimum would be 15 percent in 1986 and the 20 percent in the remaining years of the bill. For corn and the other feed grains, the maximum acreage reduction would be 20 percent and the minimum would be 12.5 percent throughout the life of the bill.

For dairy, the program would set dairy prices in relation to the level of dairy purchases by the Government. For the first year, the price support would stay at the current level of $11.60 per hundredweight. There would also be a whole-herd buyout initiated that would last 18 months and be funded by a 40-cent-per-hundredweight assessment. After 1 year, the price support would drop by 25 cents and the assessment would drop by 25 cents. On October 1, 1987, the price support would drop another 25 cents and the assessment would end. Thereafter, if Government purchases exceed 5 billion pounds in 1 year, the price support would drop 50 cents and if Government purchases were under 2.5 billion pounds, the price support would increase by 50 cents per hundredweight.

Sugar and wool price support programs will be maintained at the current levels. For the sugar program, the 1986 sugar quota would be extended an extra 3 months. Thereafter, the sugar program would have to be operated with sugar quotas at levels to insure a "no cost" program.

There are many other important features in the bill that will help agriculture. The bill clarifies cargo preference laws in light of the court ruling earlier in the year that canceled $500 million of agricultural exports. I cosponsored legislation to exempt commercial agricultural export programs from cargo preference requirements, and am pleased to see that the bill does this. This will be of great benefit to several new export promotion programs that are included in the bill, including the export PIK and new authority for intermediate credit programs.

Beef and pork promotion boards will also be established aimed at allowing these important products to battle back from declining sales in recent years. Few realize the importance of livestock to the long-term health of agriculture. Not only does livestock account for 60 to 65 percent of agriculture income, the feeding of livestock consumes enormous quantities of feed grains that would otherwise move into surplus and add substantially to the cost of agriculture programs. Both programs will begin immediately with a refunding provision. A referendum will be held for each program within approximately 2 years to determine whether they should be continued.

Also of importance to many livestock producers and others who commonly purchase agricultural products is the inclusion of "clear title" legislation in the farm bill. This will allow the buyers of farm products to purchase an agricultural commodity without encountering the situation of paying twice for a commodity that was used to secure a loan.

A measure that I helped cosponsor to end farm program payments for 5 years for persons convicted of growing

marijuana and other controlled substances is also included in this bill. Situations now occur where a person will plant illegal crops in between rows of legal crops and qualify for Federal farm program benefits. Under current law, a person convicted for harvesting the illegal crop can be denied payments for 1 year. The 1985 farm bill expands the definition to include persons convicted of growing and planting illegal crops and lengthens the penalty period to 5 years.

Finally, a matter of importance to Colorado is a program to assure the availability of funds to control grasshoppers and Mormon crickets on Federal rangeland. Under current law, the mechanism is simply not in place to make funds available when an outbreak occurs. After Congress fights with the different agencies for several weeks to get the funds, insects have already damaged crops.

It is clear that there is much good that can result from the bill, but it will also require a record amount of spending by the Federal Government for agriculture. The cost of not approving or enacting this farm bill would be far greater, however. Without a new 4-year reauthorization of the farm programs, permanent legislation enacted in 1938 and 1949 would automatically go into effect and govern most of the agriculture commodities. This permanent law would cost the Government an estimated $50 billion a year—compared to the $50 plus billion that this bill would cost over 3 years.

The permanent legislation would also wreak havoc on agriculture. Many programs, such as the research and extension service activities would expire. Commodity programs would require Government to replace the farmer and the market in just about every decision in agriculture from pricing decisions to production and marketing decisions. Agriculture would become so dependent on the Government for its income that it would be virtually impossible to ever regain an independent agriculture based on market demand for its product. This is an alternative agriculture should not have to choose, and I believe the old laws should be repealed.

In summary, agriculture faces great financial difficulties today for reasons largely beyond the farmer's control. Forces in the economy, whether high interest rates, low commodity prices, or declining markets have worked against the farmer. Federal farm programs have also contributed to these difficulties by sending conflicting and false signals to the American farmer, while simultaneously aiding the ability of foreign producers. The 1985 farm bill removes disincentives to sodbusting, adds some flexibility to our loan rates and targets prices, and clarifies cargo preference laws. These changes will provide greater protection for our agriculture resources, help increase sales of agricultural products, and makes these changes in a slow, deliberate manner in order to protect farmer's from abrupt changes in the short-run, while heading our farm programs in the direction of a stronger, more profitable agriculture in the long run. I support the 1985 farm bill.

I wish to conclude by saying, Mr. President, that while I support this legislation and voted for it, we should be under no illusions that it will solve the serious and far-reaching financial problems that threaten the producers of nearly one-half of total U.S. agricultural production. The best that this bill can do is lend some stability to some portions of the agriculture industry during an extremely severe crisis that is afflicting virtually all of the industry.

Next year we can expect the largest participation in Government programs that we have ever had as farmers attempt to assure at least minimal profitability for their operations. This will increase production of supported commodities and aggravate the surplus problems that continue to depress commodity prices. We can also expect the costs of the program to continue to escalate as a result.

The search for a program for agriculture that really works must continue. Experience of the past indicates that Government has a poor track record in solving the problems and its programs almost inevitably lead in the direction of a socialized agriculture managed from Washington. It is my hope that the farmers themselves, through their organizations and commodity groups, will redouble their efforts to find a more practical and workable approach to restoring our most basic industry to health and vitality. Every citizen of this country has a great stake in a strong and healthy agriculture.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate go into executive session to consider nominations.

There being no objection, the Senate proceeded to the consideration of executive business.

NOMINATION OF TERRENCE M. SCANLON TO BE CHAIRMAN OF THE CONSUMER PRODUCT SAFETY COMMISSION

Mr. DOLE. Mr. President, again I renew my earlier request with reference to Mr. Scanlon, that the nominations be set aside, and I ask unanimous consent that the nomination remain in the Senate.

Mr. President, let me approach it a different way. I think we can accomplish the same result.

Mr. President, I ask unanimous consent that all nominations received by the Senate as of adjournment of the 99th Congress, 1st session, remain in the Senate status quo, with the following exceptions:

Raymond D. Lett (CCC); Raymond D. Lett, Assistant Secretary of Agriculture; Wayne Angell, Federal Reserve Board of Governors; Manuel Johnson, Federal Reserve Board of Governors; Kenneth Hill, NTSB; Richard Francis, Solar Bank; James Malone, Ambassador to Belize; William McGiness, FLRA; Barry Schreiber, Postal Board of Governors; Jeffrey Zuckerman, EEOC; Albert Moon, Federal judge; Danny Boggs, U.S. Circuit Court; Jefferson Sessions, Federal judge; Thomas McAvoy, Federal judge; Sidney Fitzwater, Federal judge; David Hansen, Federal judge; Walter Gex, Federal judge; Miriam Cederbaum, Federal judge; and Robert Bryan, Federal judge.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas?

Mr. BYRD. Mr. President, reserving the right to object, and I shall not object, this request means that the nomination of Albert Moon, to be Federal judge, will be for all intents and purposes dead because it would go back to the White House and would have to be resubmitted by the President for any action to be taken on it. Am I correct?

Mr. DOLE. The Senator is correct.

Mr. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, this would also by indirection take care of the request of the distinguished Senator from Wisconsin, the Senator from Illinois, and so on that basis they have no objection that he be retained in status quo pending review of the Justice Department report and then we can work out some agreement on when to bring it up depending on what may be in the report.

So on that basis, I ask unanimous consent that further——

Mr. DANFORTH. Mr. President, reserving the right to object, I do not think it is the understanding that there has to be some specific Justice Department report to trigger Senate consideration of the Scanlon nomination. There may or may not be. But, as I understand the unanimous-consent request, it is simply that the status quo be retained with respect to Mr. Scanlon.

I know that the Senator from Wisconsin is interested in an investigation that has been requested by two House Members and that investigation may or may not take place, may or may not lead to the report, probably will lead to at least some response by the Justice Department I would think to two Members in Congress.

But I would hope that it would be our understanding that there would be no formal action which would necessarily trigger action on the Scanlon nomination.

Obviously, beginning next year, if we ever try to take it up again, assuming we do, the Senator from Wisconsin would be able to object to consideration of his nomination or speak against it at that time.

Mr. PROXMIRE. Mr. President, may I say to the Senator from Missouri, I understand that argument that he is making. I feel that after all we do have a little leverage now, not very much, but a little bit, and I think we ought to get more than acknowledgement that we got a letter from the Department of Justice. It seems to me we should get the results of their investigation. They have been requested to make an investigation.

This is a very serious charge, perjury. They are in a position to give expert advice to the Senate far better than the GAO could. This is their job in the Justice Department. It seems to me that it is very reasonable for us to say we want a report, not just to say we got your letter and we have no objection, or something of that kind. We want a report. We want them to look into it and give us their best legal judgment.

Mr. DOLE. Mr. President, as I understand the nomination has been set aside and we are still in executive session.

The PRESIDING OFFICER. We are.

Mr. DOLE. Mr. President, I ask that we consider the nomination of Ralph E. Kennickell, Jr. to be Public Printer.

The PRESIDING OFFICER. The nomination will be stated.

GOVERNMENT PRINTING OFFICE

The assistant legislative clerk read the nomination of Ralph E. Kennickell, Jr., of Virginia, to be Public Printer.

Mr. MATTINGLY. Mr. President, I rise in support of the nomination of Ralph E. Kennickell, Jr., to be Public Printer of the United States. He has been serving in that position for more than 1 year and during that time he has clearly demonstrated that he has the necessary skill, talent, and energy to warrant confirmation by the Senate.

Ralph Kennickell is a native of Savannah, GA, and represents the third generation of his family to work at the family-owned printing company in Savannah. He proudly speaks of being reared in the tradition of a "printer's devil."

Mr. Kennickell has served this administration and this President in posts at the Treasury Department and at the Small Business Administration prior to assuming the Public Printer's duties at the Government Printing Office in December 1984. Further, as a graduate of the Citadel Military College in Charleston, SC, he served our country as a combat commander in the Mekong Delta of Vietnam during his 4-year Army tour of duty from 1967 to 1971. He was awarded both the Vietnamese Cross of Gallantry and the Bronze Star.

He has sought to create a service-oriented, cost-effective atmosphere at GPO. He is a man who takes pride in the job he does and he brings to the Public Printer's post a unique combination of experience, ability, and leadership.

I congratulate Ralph, his wife Barbara and their two sons, Ralph III and Jason, on his nomination and urge the consent of the Senate.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, will the majority leader yield?

Mr. DOLE. I yield the floor.

Mr. PROXMIRE. I just wanted to ask the majority leader if there will be any more votes tonight.

Mr. DOLE. There is a possibility. I hope I can make a judgment on that in the next few minutes.

In my view, reconciliation is very important, notwithstanding the statement by Senator PACKWOOD that he would discuss it at length if a certain provision is excluded on the House side. That is $2 billion out of $83 billion. So it seems to me we have to consider that seriously.

I intend to make a call to the White House to see what their hope or intention might be. I will try to make an announcement by 8:15 or 8:20.

Mr. PROXMIRE. I thank the Senator.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WILSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SOVIET VIOLATIONS OF EXISTING ARMS CONTROL TREATIES

Mr. WILSON. Mr. President, I am reliably informed that early next week the administration is going to release the latest in the annual reports which Congress requires of the President certifying as to Soviet violations of existing arms control treaties. I am advised that the report that will be released will examine a new issue. In addition to updating all of those that were reported in the last of these reports, that, which was issued last February, I am told that there will be violations reported in nine separate cases, as well as two probable violations, a likely violation and a potential violation.

Of the nine cases involving certifiable violations, one SALT II issue, that of Soviet concealment of the association between missiles and their launchers, will be examined for the first time. The Soviet Union apparently also has violated the SALT I interim agreement.

In addition, Soviet deployment of SS-25 ICBM's during 1985 constitutes a further violation of the SALT II prohibition on a second new type of ICBM.

Mr. President, what this report makes clear, in reaffirming the findings of the February 1985 report, is a pattern of ongoing Soviet violation of existing arms control agreements. It will also make known new potential violations. This report will relate to some substantial changes in three issues that have been examined: That relating to the Soviet SS-16 ICBM, to the Backfire bomber aerial refueling probes, and to the Backfire bomber production rate. These first two issues, you will recall, had been judged to be probable violations in the report of last February.

In these most recent studies, there is support for the conclusion, the inescapable conclusion, the tragic conclusion, that there is an ongoing pattern of Soviet noncompliance.

This report, as have those in the past, documents the Soviet Union's violation of its legal obligations, its political commitments to the SALT I ABM Treaty, and interim agreement, to the SALT II agreement, to the Limited Test Ban Treaty of 1963, to the Biological and Toxic Weapons Convention, the Geneva Protocol on Chemical Weapons, and the Helsinki Final Act. It also appears that the Soviet Union has violated provisions of the Threshold Test Ban Treaty.

Mr. President, this is true, notwithstanding the fact that the administration has sought the most unambiguous evidence before making these reports. They have concluded from the evidence that, with regard to the Biological and Toxin Weapons Convention and the Geneva Protocol on Chemical Weapons, the evidence is clear and compelling.

Mr. President, the significance of Soviet noncompliance is, I believe, painfully obvious. It is obvious that deliberate Soviet violations cast absolute doubt upon the ability of the Soviet Union to enter into, in good faith, any agreement. It is clearly a darkening of the atmosphere in which current negotiations are being conducted in Geneva and elsewhere.

These Soviet violations are calculated to produce military advantage for the Soviet Union. In short, they are violations which seek an advantage by allowing the Soviets to engage in activity which those very treaties being violated require the United States to forbear from engaging in.

It may be argued that some of these individual violations are of less importance than are others. And that is true. What is clear, Mr. President, is that any substantive violation calls into question the ability of the Soviet Union to be trusted.

And the plain fact, Mr. President, is that the Soviet Union cannot be trusted. That has not exempted us from the duty of having to go to Geneva, and elsewhere to negotiate with them. We are obliged to do so. They are the other superpower armed with the nuclear capability. But it absolutely underscores the necessity that we enter into no agreements under which Soviet performance is not absolutely verifiable. It makes emphatic the requirement that we insist that the verification by whatever means can be relied upon, and it makes clear, Mr. President, that we dare not enter into any agreements in which trust is required rather than verification.

We are well aware that ambiguities have existed in these treaties, and, of course, a mechanism was created to attempt to deal with and resolve ambiguities. The administration repeatedly reported its findings, not only to the Congress, but also to that mechanism, the standing consultative commission where SALT-related issues, including ABM issues, are to be discussed by the Soviet and the American representatives as well as through other diplomatic channels.

Indeed, the President as we all know expressly expressed not just concern to the Secretary-General at their recent meeting in Geneva. I think he made clear that the United States is chronicling these violations by the Soviet Union not as an academic exercise because Congress has insisted that the administration do so.

Our own ability to continue to abide by existing agreements is called into most serious question by Soviet violations. Tentatively we have decided that we forbear from outright repudiation but reserve the right through the doctrine of proportionate response to take whatever action is requried to safeguard American interests.

Mr. President, those who are shocked by these violations undoubtedly will ask what response have the Soviets made when we have gone to Geneva to the standing consultative commission and asked for explanation? Well, the answer is that with respect to all of the violations, the probable violations, the ambiguous situations, the Sovet Union has provided no sufficient explanation to alleviate our concerns. Instead, what they have done is continued to stonewall. They have asserted that they are in complete compliance with their obligations under existing treaties.

Mr. President, the Soviets must understand clearly that there will be a cost to them for violation of any agreement. We have not yet made clear to them that there will be, and we must do so.

Just as it does no good to enter into agreements, however high flown the language, however optimistic the thoughts expressed therein, if we cannot verify performance, so it does no good to monitor and verify performance if when there is in fact Soviet violation we impose no cost.

Indeed, if we exact no cost, agreements can prove a dangerous trap inviting Soviet violation. They can allow the Soviets impunity to violate treaties, virtually at will, at such time as they choose while we unilaterally abide by their constraints.

If the value to the Soviets in entering an agreement is to secure our forbearance from a particular activity, then the cost for their violations should be our abandonment of their obligation, and our resumption of that prohibited activity.

Mr. President, I hope that when we return in January, we will very early on give the most intense scrutiny, the most serious consideration to the full implications of this latest administration report.

Clearly, the implication is that at a time when they are urging us to enter into new agreements, the Soviets continue to violate existing treaties, and existing agreements. Their word, Mr. President, is not good. The subject matters of these treaties is too important for us to take them lightly. Indeed, they are matters of life and death. They are matters of survival of civilization as we have known it. And we cannot simply dismiss this latest report. We cannot ignore these violations. There must be a cost to the Soviet Union. And they must learn that very soon, and very emphatically.

Mr. President, I thank the Chair.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

GRAMM-RUDMAN-HOLLINGS

Mr. HOLLINGS. Mr. President, while we are pending the leadership decision to move to the next item in the Senate, we all recognize that there has been much talk relative to the budget next year and the Gramm-Rudman-Hollings balanced budget legislation.

It is understandable. Most Members of Congress don't act like they are interested in a balanced budget. So much misinformation has come out about Gramm-Rudman-Hollings that it is understandable that there is a lot of talk about cuts, frugal budgets, budgets trying to conform to pare back or to be eliminated in order to meet the requirements of Gramm-Rudman-Hollings. The phones ring off the hook that you have to cut or eliminate a particular item, like we heard and read earlier today with respect to parts of the Justice Department.

Arguing each one of those items adds to the confusion. There could well be eliminations. That would not be all bad. The President of the United States certainly has indicated that he would like to do away with agencies such as the Department of Education. That is no mystery. He indicated when he came to office that he would like to eliminate the Department of Energy; he would like to do away with the Small Business Administration. You can go on down the list of particular departments and agencies. The first budget every year is his budget. He is the one to submit it. No one should gawk in amazement that the Gramm-Rudman-Hollings initiative would require the abolition of the Departments of Education or Energy. That's Ronald Reagan—vintage 1980, and 1986.

I think the best way to bring this discussion into focus and for the understanding of the colleagues, and for the public generally who may be interested, is to place before us one particular budget approach entitled "The Deficit Reduction Plan for Fiscal Year 1987-88." I ask unanimous consent at this point to print it in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEFICIT REDUCTION PLAN FISCAL YEAR 1987–88

[In billions of dollars]

	1987	1988
Estimated deficit	190	180–190
Maximum deficit levels in Hollings-Rudman-Gramm	144	108
Required Deficit Reduction Levels	46	70–80
Potential reduction items:		
1. Freeze gross level of tax expenditures for 1 year [1]	−36	−37
Potential revenue savings:		
Freeze indexing	(−5)	(−13)
5 percent minimum corporate tax	(−8)	(−12)
Reform ITC	(−15)	(−28)
2. Defense: Allow for inflation only in fiscal year 1987 and 3 percent real growth in fiscal year 1988 [2]	−18	−18
3. Nondefense discretionary: Allow for inflation only in fiscal year 1987 and fiscal year 1988 [2]	+8	+10
4. 2-yr hiring freeze in Federal civilian levels (by attrition only; no firings)	−2	−3
5. Interest savings	4—	10
Total, reductions	−52	−58

[1] Assumes freeze in gross level of tax expenditures—not a freeze on each tax expenditure item.

[2] Assumes CBO August inflation projectons of 4.4 percent in fiscal year 1987 and 4.2 percent in fiscal year 1988.

Note.—(1) Assumes full COLA's and no reductions in means-tested programs. (2) Proposal would provide for increases in defense as follows: 1987 budget authority +13, outlays +7; 1988 budget authority +21, outlays +18. In nondefense discretionary as follows: 1987 budget authority +7, outlays +8; 1988 budget authority +7, outlays +10. (3) Budget figures based on CBO August update. (4) Estimated deficit levels assumes general programmatic assumptions in 1986 budget resolution.

Mr. HOLLINGS. Mr. President, what I have is a table that illustrates an estimated deficit for 1987 of $190 billion. You must understand that in February or by the first of March there will be a sequester, the first cut under Gramm-Rudman-Hollings, of some $11.6 billion. When you reduce the deficit now estimated for fiscal year 1987 of some $200 billion, we will sequester this $11 billion, thus resulting in the best estimate now around for a fiscal year 1987 deficit of $190 billion.

The fiscal year 1987 deficit level we must reduce that to under Gramm-Rudman-Hollings is $144 billion, which means we must reduce by $46 billion.

How do you accomplish that? In a general sense I have outlines, without trauma, an approach that would bring not just the $46 billion but some $52 billion in savings. Further, this approach would provide a reduction in fiscal year 1988 of some $58 billion, bringing our deficits into conformance with the maximum deficit levels required by the statute.

Let me talk about the specifics of reducing the deficit. We can freeze the gross level of tax expenditures and save at least $36 billion.

Everyone is talking about the pain and devastating effect of $200 billion deficits. The way the Government must borrow to exist means we are giving $1 worth of government for 75 cents. If the deficits are truly painful—and they are—we must act now to restore credibility to the economy—and to ourselves.

We can freeze that level of tax expenditures. We can freeze tax indexing, require a minimum corporate tax of 5 percent, plus a reform of the investment tax credit which was overwhelmingly agreed to—it was not in dispute between Republicans and Democrats on the House side and pretty well agreed to by our Finance Committee. We can save over $30 billion here with no agony. Now mind you, when I say freeze tax expenditures, I mean the gross level of these, not each individual tax expenditure, because right away we would hear about home mortgage interest payments, State and local taxes, charitable contributions, and the like. I favor these deductions and would oppose actions to scuttle them. So my freeze on tax expenditures would not touch all of these items.

With respect to the Department of Defense, we could allow for inflation—estimated at 4 percent.

You can talk about the 3-percent real growth goal. Perhaps at this particular time when we are waiting for further business to be conducted on the floor of the Senate, I might remind you of a conversation we had on a Sunday afternoon 4 days before we passed Gramm-Rudman-Hollings. At that time, I got the signal that we were meeting in the Vice President's room. Senators GRAMM, RUDMAN, and myself met with the distinguished Director of the Office of Management and Budget, Mr. Jim Miller.

Mr. Miller said:

OMB wants to go along with your particular program.

We had been imploring the people in the executive branch to do that all week long.

He said:

The President is going along with Gramm-Rudman-Hollings but we have to be assured of the 3 percent real growth for defense. We have to be guaranteed that is protected in this plan.

I spoke up immediately and said it was not protected in this plan. We had to politically put Social Security off limits because this Congress cannot workout its will where Social Security is concerned.

I had proposed the Social Security freeze with other distinguished colleagues over the past 3 years in our balanced budget freeze plan and that was the end, we heard, of economic sense or realistic economic plans.

To prove my point, David Broder in late November said there was a way to balance the budget rather than to adopt the traumatic Gramm-Rudman-Hollings. That way was under a Chiles-Gorton proposal. Chiles-Gorton in July was nothing more than Hollings-Exon in January, along with our distinguished Republican colleagues, Senator ANDREWS of North Dakota, and Senator KASSEBAUM from Kansas. We had a bipartisan approach of a deliberate budget freeze across the board to hold the line and stop the unresponsible run down the road to a $2 trillion debt. But no one would listen.

Well, it took 3 years but finally my friend, Mr. Broder woke up—but gave credit to others. In any event, we made it clear on that Sunday afternoon, that 3 percent for defense could not pass. Senator GRAMM also spoke up, that we would lose 40 to 45 votes and lose this chance. I said, "I know you could not pass it as far as this Senator is concerned because I will take my name off and go outside and start opposing it."

So we had a clear understanding in the Vice President's room on a Sunday afternoon before we passed Gramm-Rudman-Hollings for the first time in October. Defense spending was in the package. Thus, one proposal for defense would allow for inflation in fiscal year 1987 and 3 percent real growth in fiscal year 1988.

The executive branch knew all along from the authors themselves that there was no protection for defense, so there should not be any of that talk.

Now the President wants to put in a 10-percent increase in fiscal year 1987 for defense. He is the President. It is his budget. He has to stand behind the credibility of that budget and the rationale therein. I understand that. No one is saying he cannot do it. I am just saying he cannot put in an amount on a pledge from the Congress on Gramm-Rudman-Hollings because the pledge was otherwise and the understanding was clear.

You can have a defense budget with increases. It will be running at about $290 billion in fiscal year 1986 after sequester so you can add $12 billion or more for inflation. How one asks? By holding the line and taking on initiatives that have been directed in a rather static fashion by the Armed Services Committee, by the Budget Committee, by the Defense Appropriations Subcommittee and by the House side.

I have seen many of these exercises. There is a new procurement plan, there is a new caveat here, or there. I say with great certainty that we can cut significantly the civilian bureacracy in the Pentagon and throughout the DOD and throughout Government we can establish cost-efficiency procedures.

We have the Packard Commission appointed to do these things. But the distinguished Secretary of Defense, Mr. Weinberger, does not have to wait. He can use Gramm-Rudman-Hollings as the pressure to bring order out of chaos in the Pentagon.

Mr. President, for entitlements, my plan would allow all the COLA's—whether in the retirement programs or in means-tested programs. In other words, we can have growth in aid for dependent children, women infants and children's feeding, child nutrition, food stamps, veterans pensions, veterans compensation and all the means-

tested programs that were exempted by Gramm-Rudman-Hollings and everybody will gladly support that on both sides of the aisle.

Under my proposal, the Social Security would be taken care of.

For the nondefense discretionary programs, I believe we could allow for inflation in 1987 and 1988—thereby assuring at least the programmatic levels adopted in 1986. This means no cuts in education, training, science, space, law enforcement, transportation, highways below the levels of 1986. Unlike the President, we proceed with Government at a conservative pace—we don't eliminate it.

Finally, we could have a hiring freeze for civilians with no layoffs or firings. The total savings we would achieve after all of these actions would be $52 billion. Since we need only $46 billion—we could make a decision on whether to give the extra $6 billion to programs of high priority such as infants feeding. That is a way to save money. I know for every dollar expended on women infants' and children's feeding I save the Government $3.

It only covers half of the women and children in America that are eligible under the program. If the President were wanting to increase defense by 4 or 5 percent, it would be my move to come along and to increase some of these other programs in education and technology and hold the line on others.

But the point I want to make by this discussion is to let my colleagues know it is not impossible. Don't blame Gramm-Rudman-Hollings for big cuts because they are not necessary. But you can blame us for the discipline on the one hand and the truth on the other, because if we do not adopt the discipline, the truth will speak up for us after October 1.

We are going to have truth in budgeting. But we can kid ourselves and get all the headlines the media will give us all year long. But if it is not done, whatever we end up with is going to be cut or sequestered, in an even percentage across the board.

So the proposal I am discussing tonight assumes a freeze in the gross level of tax expenditures and not a freeze on each tax expenditure item. We assume the CBO August inflation projections of 4.4 percent in fiscal year 1987 and 4.2 percent in fiscal year 1988. We assume full COLA's and no reduction in means-tested programs. The proposal would provide for increases in defense, a budget authority increase in 1987 of $13 billion, and outlays increase of $7 billion; in 1988, a budget authority increase of $21 billion and outlays increase of $18 billion.

In nondefense discretionary, we would have a 1987 increase in budget authority of $7 billion and outlays increase of $8 billion; in 1988, budget authority increase of $7 billion and outlays increase of $10 billion. These figures are based on the CBO August update.

There is a plan. There is a target, I have not had a chance to consult with those who have been so diligent, particularly my colleague from Nebraska, whom I admire so much.

The Senator from Nebraska was facing a tough fight for reelection in 1984, but he bit the bullet and he voted for fiscal responsibility. He knew the role. He did not just come to it. As Governor, that was his track record. That has been his track record in the U.S. Senate. It was not a good political judgment to make at that time because it brought down the wrath of many of the voters and misunderstanding of what he was doing. But he has been a colleague in the front ranks here throughout our struggle on the Budget Committee to try to bring the Government back into the black.

I yield at this time to the Senator from Nebraska, Mr. President.

Mr. EXON. Mr. President, I really appreciate the kind remarks about this Senator's activities. Since a copy is being made, I would very much appreciate a copy of the Senator's suggested means of reaching Gramm-Rudman goals in the upcoming years. I suspect that the record would show that there probably are no other two Senators than my distinguished colleague from South Carolina and myself who have offered more realistic budget proposals to bring the budget into line. I think the record would also show that I parted company with my colleague and friend on Gramm-Rudman. If it works, fine. I suspect it will not work. Maybe I am wrong. I have been wrong before.

However, one of the faults I see with Gramm-Rudman is the false premise that it seems to hold, at least from the position of reality.

I would like very much if my friend could expand a little bit more on the meeting that was held at the White House yesterday when a prominent picture was taken with the main supporters and advocates of Gramm-Rudman.

If I read the newspapers correctly, and I ask my friend from South Carolina to correct me if I am wrong, in the newspaper reports I read of that meeting at the White House yesterday, the President of the United States further complicated what I thought was clearly understood as the discipline of Gramm-Rudman by saying there yesterday that there was no way he was going to stand for defense cuts, that we have to build up the defense of this country and that he had his veto pen in the top drawer as far as any revenue increases are concerned.

Was that the message that the President was giving to the Nation yesterday? If so, it was a message that was not used here, on the floor of the U.S. Senate, when the majority voted for Gramm-Rudman.

Is that what the President said yesterday? If so, is there some way that we can begin to reconcile that as a Christmas gift of understanding and appreciation for the people of America?

Mr. HOLLINGS. Well, the Senator is right, that was the message that the President gave. I would not allocate any different message other than to elaborate upon it. As I interpret it, it is much like an insurance company we had fighting for a winning slogan as they organized down in South Carolina. We came up with the slogan that "The Capital Life would surely pay if the small print on the back doesn't take it away."

The President of the United States on the matter of revenues talks just that way. He is very bold in print about "Make my day" when he is not for revenue increases. At the same time, he is praising DANNY ROSTENKOWSKI's tax reform bill which calls for $140 billion in new revenues. How does he think you lower the brackets if taxes aren't raised elsewhere?

So what they are saying, if you know how to read these insurance contracts, if you know how to read these political statements, they say I am for $140 billion for my purposes—namely, to lower the brackets; I am not for the $140 billon for your purposes, for expanded Government—or for paying our bills.

The Senator from South Carolina comes down not for a $140 billion increase in taxes but for $25 to $30 billion, as shown here, that is to get rid of the deficit—not for more government. We need the $25 to $30 billion not for tax reform but to maintain and pay for that inflationary increase in defense and generally hold the line on these other programs.

Another Senator and another President would have a different view of it, but I believe if we get a strong enough consensus we can do it—you see now what is happening with the discipline already with respect to reconciliation. Seventy-eight to one and we are falling into a discipline now of realism, because the cover of rhetoric has been removed because of Gramm-Rudman-Hollings. We are all now speaking from the same text, the same vocabulary, and we do not have to run around with Rose Garden figures, OMB figures, and all these others. We are going to have the same point of reference on these budgets and with respect to revenues, the Senator is right. The President reiterated, he said his pen was ready to do away with revenues, but he was also praising the wonderful progress that had been made in tax reform and now that we

have gotten it to the Senate side, he hopes to proceed with it.

You look at it from the Senate side or the House side or any side—inside, outside. You find the tax reform calls for $140 billion in revenues. And, yes, it calls for decreases. It is supposed to end up tax neutral. I am not trying to misrepresent tax reform. Whether it ends up that way or not is another question.

I think Congress has now put the priority on the deficit with Gramm-Rudman-Hollings. I stated so at the time we passed it. I stated it all day that Saturday when we debated it and stayed here on Sunday in September, later in November when we argued it, and also in the conference committee, I know that Senator GRAMM, for example, believes that there will never be any need for revenues. I think one of those budgets can be drawn—but it won't be passed.

But I think looking at the considered judgment, the consensus judgment of the U.S. House of Representatives and the U.S. Senate and the President of the United States about where we have been over this 5-year period of turmoil or whether to abolish the Department of Education or give an 11-percent increase to the defense budget or give it all to cost-of-living adjustments, or just what—this is pretty well in the center.

Where the Senator and I break down finally is when we get down to the bottom line of having to promulgate a budget.

I think it is a rational kind of target to aim at and you can increase it or decrease it both ways. My point is Gramm-Rudman-Hollings does not make you do it. It is your own doing. Gramm-Rudman-Hollings only triggers after the fiscal year has passed and if you pass a budget that is not in balance in accordance with the projected revenues, then comes the Gramm-Rudman-Hollings trigger which says here are the revenues for your expenditure. If the expenditures are beyond the revenues, and the deficits exceeds the maximum deficit targets then the sequester takes place. Not now; but in March of this year and October of future years.

Mr. EXON. I really appreciate the excellent explanation that has been given by the Senator from South Carolina. I am looking down the list, and I am very interested and intrigued by some of this. However, when I look at this and when I compare this with what the President is saying, it will not wash.

Mr. HOLLINGS. Will the Senator yield at that particular point about not washing?

Mr. EXON. Yes.

Mr. HOLLINGS. The Senator is right. Last year, the President's budget did not wash in the Budget Committee. It was voted down 18 to 4. The Senator and I were there and the chairman of the Budget Committee and the Republican majority voted it down the year before, 1984, when the President was running. His budget was voted down in the Hall of the House of Representatives by a vote 420 against and only 1 for it. So it did not wash in 1984. The President's budget did not wash in 1985. And as you look at this sheet of paper here in December 1985, at Christmastime, yes, the Senator is right. If the President presents a similar budget to his eliminate the Government concept it will not wash, again.

Mr. Exon. I thank my friend. It was this Senator who made the motion in the Budget Committee, as the Senator will remember, to vote on the President's budget, and the vote came out exactly as the Senator just stated on the floor of the Senate.

Mr. HOLLINGS. The Senator is right.

Mr. EXON. In looking down this list, the President certainly would not be for cutting $18 billion out of the defense budget. I suspect that he would not be in favor of freezing indexing because I am sure he would consider that a tax increase. And certainly he would not be for a 5-percent minimum corporate tax because he said his veto pen is already out. What this does, though, above everything else, it shows that during the deliberations in the Budget Committee and on the floor of the Senate, as we come up against those snapshots or triggering mechanisms that Gramm-Rudman-Hollings forces on us, there is going to be confrontation on top of confrontation, possibly misunderstanding upon misunderstanding, as to what we are or are not doing. It is going to be an interesting year next year, is it not?

Mr. HOLLINGS. It is going to be an interesting year, and I think unfortunate but very necessary confrontation. The Senator is right. The intent was to put us all in a box—the House, the Senate, the President. The Senator could not get away with this in Lincoln, NE; they would run the Senator out of town and they would run me out of town in Columbia, SC, if we as Governors had presented budgets and the activity that we have been presenting here the last 5 years in the U.S. Capitol. We just could not get away with it, and I hope Gramm-Rudman-Hollings now will have everybody into that sort of lockstep and with these various guideposts they can measure us down the budget roads to see whether we are really adhering to the discipline on the one hand or truth in budgeting on the other.

Mr. EXON. I thank my friend from South Carolina once again. Indeed, we have constructed a very interesting box. Whether it is going to be good or bad remains to be seen. I will be equally interested in the budget presentation that is made by the President in about 60 days to see how that compares with this. I suspect it will be significantly different, but I will be interested in looking at those because if we are going to give any credence to Gramm-Rudman-Hollings at all at least we have to set the parameters. And I congratulate my friend from South Carolina for being out front, as he usually is, in coming up with the first information that I have seen with regard to how one Senator, at least the Senator from South Carolina, would meet the responsibilities that he undertook as a prime mover in the Gramm-Rudman-Hollings proposal. I only say in conclusion that I agree we have constructed a box. The question comes whether the box is going to be explored.

I thank my friend from South Carolina.

Mr. HOLLINGS. I thank the distinguished Senator.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PRESSLER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROPOSED SALE OF CONRAIL

Mr. PRESSLER. Mr. President, when we resume in late Janaury, the order of business will be Conrail. The Midwestern railroads have a great deal of difficulty with the Conrail proposal.

I speak as one Senator who is very much in favor of somehow selling Conrail. But the Midwestern railroads have been concerned with the present plan because it would basically mean that a monopoly east of the Mississippi would exist. The Chicago and North Western Railroad at least has been unable to negotiate acceptable agreements for Chicago and other Midwestern gateways. The result will be that our railroads will lose traffic through diversions, and competition will decline in the Midwest if Norfolk Southern acquires Conrail.

Therefore, many of us have taken a look at the Morgan Stanley proposal, and other proposals regarding the sale of Conrail. It has been my strong feeling that the Department of Transportation and the FRA have been somewhat inflexible and insensitive to some of the problems of the smaller railroads which would be put into the position of dealing with an eastern monopoly railroad.

I am proud to say that during the upcoming recess, I shall have a series of railroad meetings in my home State; and I am happy to say that my good friend Mr. Jerry Conlon of the

Chicago and North Western Railroad will be in South Dakota to talk about some of the rail problems we have in our State.

However, aside from our particular problems, there is an overall transportation problem in moving grain out of the Midwest and moving machinery and supplies into the Midwest, and that problem involves dealing with a monopoly railroad east of the Mississippi River.

Mr. President, it is my strong feeling that railroads are best run by private enterprise; but if that private enterprise is going to be monopoly, I have a problem. There is no reason why there cannot be viable competition east of the Mississippi.

So I will join in efforts to move toward a resolution that would either provide for gateway agreements, Midwestern divestitures, or some other competitive solution.

I hope that next year we will be able to resolve this matter and be able to move toward the sale of Conrail and reach a resolution in the public interest. However, there are also some other unanswered questions about some of the related matters with Conrail.

Mr. President, the able majority leader has made it clear that Conrail will be a priority item on the Senate's agenda when we return next year. Although I objected to bringing this issue to a vote earlier this month, I made it clear that I am prepared to debate the issue when we have adequate information on the anticompetitive impacts of a Norfolk Southern/Conrail merger and the viability of the proposed divestiture.

We have explored this issue in some detail in the Commerce Committee. Chairman Danforth has done an outstanding job. But I have yet to receive an adequate answer from my continued inquiries to the Department of Justice and others. Also, because the divestiture proposal continues to change, it has been impossible to fully assess its effectiveness and viability.

Norfolk Southern and the Department of Transportation have now made a third attempt to remedy the anticompetitive consequences of the acquisition by providing for divestiture of certain lines and the grant of trackage rights to the Pittsburgh and Lake Erie Railroad and to the Guilford Transportation Industries. So far, the details of the agreements relating to the divestitures and trackage rights have not been provided to Congress or to any interested parties. Norfolk Southern has offered no explanation of this failure. The Congress cannot give its approval to a concededly anticompetitive transaction unless it has had an opportunity to examine the divestiture and trackage rights agreements that will allegedly solve the competitive problems.

There is little evidence that the divestitures and trackage rights described in the November 11, 1985, memorandum of Norfolk Southern, GTI and P&LE will solve the competitive problem created by the merger in the Midwest. Information brought to my attention shows that even after the divestitures the merger will still result in massive traffic diversions that will imperil the ability of midwestern roads to provide service, and lead to the same type of rail monopoly in the Midwest that now exists in some parts of the East. This is unacceptable to me as a midwestern Senator, and to such railroads as the Chicago and North Western which presently supplies efficient, competitive service in our part of the country.

Although they ignored the anticompetitive consequences of the merger in the Midwest, the Justice Department did, early on in the process, identify some anticompetitive problems in the Conrail service area and called for a solution by divestitures. However, even with respect to the problem markets identified by the Department of Justice last January, Congress simply has not been provided with the type of detailed information about the divestitures, or about the financial strength and plans of P&LE and Guilford which are essential in deciding whether those carriers will provide vigorous and viable competition.

I have already noted that Congress does not have the underlying divestiture and trackage rights agreements. That is only the beginning of the missing information. We have not been supplied with the detailed operating and marketing plans of Guilford or P&LE for the lines and rights to be acquired. Divestitures would be a charade if the operating and marketing plans did not contemplative vigorous competition for business in the newly acquired markets.

Perhaps most importantly, no one has come forward with detailed information regarding the financial requirements of either P&LE or Guilford, reconciled with their operation and marketing plans. Similarly, we have only the vaguest information about where P&LE and Guilford will obtain money to acquire and operate the divested properties.

Mr. President, the Department of Transportation told us that one of the principal reasons it supports the NS offer is that a stand alone Conrail, a company that has over $800 million in cash and last year earned about $500 million, is not viable in the long run. Before the Senate accepts assurances that P&LE and Guilford can provide long term viable competition to a merged Norfolk Southern/Conrail, it must inquire carefully into the financial condition and resources of these companies.

The finances of the P&LE remain a mystery. In the case of Guilford we are reassured that the estimated $55 million required will be financed by $35 million in bank debt, and a $20 million infusion of cash from its principal stockholder, Mr. Timothy Mellon.

We need to know what the present profit picture is for these companies. Are they profitable? Is the profit real, or is it the result of creative bookkeeping? We need to know the extent of the financial commitment of the backers of these companies, and about any other claims on their resources. Before the Senate accepts these divestitures as a solution to the competitive problems of the Norfolk Southern/Conrail merger, it should be sure that it is getting real rail competitors rather than a map exercise by the Justice Department.

Mr. President, I was recently provided with a disturbing article entitled "Derailing the Maine Central." It appeared in the Maine Times on November 29, 1985. Maine Central is one of three carriers owned and operated by Guilford. According to the Maine Times the Maine Central Railroad has fallen upon hard times since the Guilford acquisition in 1981. The conclusion of the article is that Maine Central profits are not based on expanding traffic but rather on substantial abandonments and circumvention of labor agreements.

The Maine Times article describes Mr. Mellon's activities, discusses Guilford's management of the Maine Central, and raises serious questions regarding the "deep pocket" commitment of Guilford to the Maine Central. In fact, the article implies that the "deep pockets" of the Maine Central have been used to support Guilford rather than the other way around.

I have no idea whether the allegations regarding Guilford management of the Maine Central are accurate. I have no personal knowledge of Mr. Mellon's other interests or activities, or what resources he is prepared to commit to the viability of an expanded Guilford system. This divestiture is relying on the personal resources and commitment of Mr. Mellon. As is the usual regulatory practice in such cases, the Senate must require disclosure to the resources from the P&LE, Guilford and Guilford's principal stockholder which are available to be committed to ensure viable competition. I intend to pursue these questions when the Senate returns.

The priniciple divestiture issue is the viability of the rail system that will be created by this divestiture. The day is long past when Congress can believe that tracks or trackage rights, and locomotives and freight cars make a viable railroad. The Penn Central had

all of that when it went into bankruptcy in June 1970. These divestitures will not solve any competitive problems if the recipients of the properties become the Penn Centrals of the late 1980's.

Mr. President, I am writing a letter to Mr. Mellon today asking him to provide Congress with a full range of information on the resources that will be available to support the expanded Guilford System. This will include past and contemplated future financial arrangements among Mr. Mellon, Guilford, the rail operations and rail supply operations controlled by Mr. Mellon. I am also requesting information on arrangements between Mr. Mellon, Guilford, the Mellon Bank and other sources of financing for the Guilford enterprises. It is my intention to report back to the Senate on these matters prior to our consideration of a Norfolk Southern acquisition of Conrail.

I ask unanimous consent that the Maine Times article entitled "Derailing the Maine Central" be placed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Marine Times, Nov. 29, 1985]

DERAILING THE MAINE CENTRAL?

Earlier this month, Maine Central Railroad took the United Transportation Union to court after the union threatened to strike over plans to lease track maintenance and switching operations to Boise Cascade at its Rumford paper mill, thus removing the jobs from the trainmen's union. The night before the court date, George Lawson, a young official of the local union, stood outside a meeting and said, "If they win tomorrow, you can kiss this railroad good-bye. Every piece of equipment they own will be leased out to non-union operators."

A few days after the strike had been averted by a court injunction, Lawson's prediction was repeated to David Fink, president of both Maine Central and its parent company, Guilford Transportation Industries. "If that's how it has to go, I'll do it," said Fink. "If economics dictate it."

In the eyes of labor, Guilford is bleeding Maine Central in order to revive its anemic sister lines, the Boston & Maine and the Delaware & Hudson. They maintain that Guilford has embarked on a program of abandoning branch lines, laying off employees, and leasing out switching operations with the ultimate aim of reducing Maine Central to a single main line railroad. Management insists that tying the three railroads together and the cost-cutting measures they have taken are simply matters of economic survival. Business is business and whatever doesn't pay for itself goes. The romance of the rail is over.

Labor and management don't agree on much these days, but one thing they might agree on is that everything changed in 1981.

Two things happened in 1981 that drastically altered the rail industry. First, the Staggers Act deregulated the railroads in the United States. Accustomed to slow change by years of Interstate Commerce Commission (ICC) protection, railroads suddenly found themselves in a free market going head-to-head with a deregulated trucking industry. Second, in June 1981, Timothy Mellon purchased Maine Central. Labor and management would probably argue whether Staggers or Mellon has had the greater effect on the new Maine Central.

At first, the publicity-shunning Mellon, then 38, was viewed by some as a wealthy do-gooder. Son of philanthropist Paul Mellon and grandson of financier Andrew Mellon, Timothy Mellon might turn out to be just the sort of deep-pocket owner who could stabilize Maine Central in the volatile new age of deregulation. Long on capital, but short on railroad experience, Mellon brought with him David Fink, his Guilford, Connecticut, neighbor and his partner in Perma Treat, a Connecticut-based railway tie firm. Mellon also brought with him a reputation as radical rich. His Sachem Fund (named after Sachem Head, where Mellon lives on the Guilford gold coast) helped finance a hospital in North Vietnam during the Vietnam War, and had supported such enterprises as a feminist law firm, the American Civil Liberties Union, and various alternative energy projects. In Burton Hersh's dynastic saga of "The Mellon Family," Timothy Mellon's stepmother described the young man as "soppy, kind-hearted, and the robber baron mixed in."

After paying $18.5 million in cash for Maine Central in 1981, Timothy Mellon then purchased the bankrupt Boston & Maine (B&M) for $24.25 million in June, 1983. In January, 1984, he picked up the ruins of the Delaware & Hudson (D&H) for a mere $500,000. All three lines were then consolidated as the rail division of Guilford Transportation Industries, Mellon's holding company based in North Billerica, Massachusetts. And it was quite a train set Timothy Mellon managed to put together in just three years; 350 locomotives, 10,000 boxcars, 4,000 employees, and 4,000 miles of track stretching from Maine to Buffalo and Washington, D.C.

Back in 1981 when Mellon took over, then-president John L. Gerity, a veteran railroad man, broke the news gently in a memo to Maine Central employees:

"Mr. Mellon . . . stated that at this time he anticipates no changes in Maine Central's management or operations. He said that he is interested in running a railroad as a railroad and it is his present intention to maintain Maine Central's identity.

"It is my belief that our new association with Mr. Mellon is good for Maine Central and Portland Terminal, our employees and customers."

It is the belief of a lot of union men that Gerity, now vice chairman of the Maine Central board, should be eating his words. The new association with Mellon, the union people say, was good for Mellon and Guilford, not Maine Central, and certainly not Maine Central employees.

As Guilford expands, Maine Central contracts. Some angry union members will insist that 2,000 jobs have been lost since Guilford took over, but there haven't been 2,000 jobs on Maine Central since before 1960, the year Maine Central stopped passenger service. Through the 1960s and 1970s, employment levels on the railroad remained steadily in the 1,200 to 1,500 range. Some union officials estimate as many as 750 jobs lost during the Guilford tenure. But company officials report a drop in Maine Central employment from 1,265 in 1981 to a projected 868 by the end of this year, 400 jobs representing a 30 percent reduction in workforce. The 30 percent cut in employment is about evenly matched by a 30 percent reduction in track mileage. This year Maine Central is abandoning some 250 of its 800 miles of track in Maine including unprofitable runs from Brunswick to Rockland, Brewer to Calais, and Steep Falls to the New Hampshire border on the so-called Mountain Division.

The job losses that most outrage union employees are those resulting from the company's new practice of leasing operations to paper mills. Last June, Maine Central turned over switching operations at Woodland to Georgia Pacific, replacing Maine Central crews with crews from Springfield Terminal Company. Springfield Terminal, though represented by the United Transportation Union, does the Woodland switching at almost half the labor cost of Maine Central Springfield Terminal is a Guilford subsidiary.

This month, Maine Central turned over switching at Boise Cascade's Rumford mill, displacing 12 Maine Central employees. Under the terms of the court action taken to avert a strike, the 12 Maine Central jobs will be protected until Federal Judge Edward Gignoux issues his final decision on the merits of the case. The company maintains that the leasing arrangement constitutes a so-called "minor dispute" under union contracts and is subject only to arbitration. The unions counter that the maneuver is a "major dispute," subject to job action.

Naturally, the leasing of track and operations looks like classic union-busting to union members and officials. Ernest Phillips, the burly boss of the United Transportation Union local, charges the leasing arrangements with paper companies are "just Guilford coming through the back door." Guilford and Maine Central officials defend such actions as necessary if the railroad is to compete in a deregulated transportation market.

"It's not the same business it was three or four years ago with the great poohbahs sitting in their offices smoking cigars and the ICC protecting them," says Guilford president David Fink.

On November 5, as Maine voters went to the polls to narrowly approve an $850,000 bond issue to purchase the track Maine Central is abandoning, David Snyder, Maine Central's general supervisor, sat in his office at the South Portland Rigby Yard and explained the economic climate that forces cutbacks, lay-offs, lease-outs, and track abandonments.

"It's a Catch-22 situation," explained Snyder. "When the Staggers Act deregulated the industry, it allowed railroads the freedom to raise and lower rates at will, but this coincided with the deregulation of the trucking industry. Rate setting in all transportation areas became very volatile. Maine tracks have always had a good traffic base from pulp and paper, but also in the '60s and '70s railroad management agreed to substantial wage increases without a commensurate increase in productivity. Because the industry was regulated [then], we were able to pass the cost along to the shippers. At that time, railroad rates were lower than truck rates.

"The big turnaround in 1980–81 when deregulation took effect was that truckers were free to haul anything, anytime, at any rate. Railroad and trucking rates were coming closer together. Labor continued to negotiate for higher wages, but the railroad is unable to recoup these increases."

All labor wants to know is, Is this company making money? And, if it is, why are union members losing their jobs? The answer to the first question is yes, Maine Central is making money. Maine Central has always been profitable, primarily because it is an origination line, hauling paper and forest products to market from the source. Origination lines traditionally make more money than over-head lines, which simply pass freight along. In the four years that Guilford has owned Maine Central, the railroad has earned $18.2 million (according to its own report, as of June, 1985).

In 1980, Maine Central showed a profit of $2.4 million; in 1981, $4.4 million; in 1982, $5.1 million; in 1983, coupled with six months of B&M operations, Guilford reported a profit of $8.6 million; in 1984, all three Guilford lines showed an overall profit of $5.2 million despite the fact that the D&H lost nearly $7 million.

But Guilford officials say these statements of earnings are not what they seem. They explain that in 1983 the ICC mandated an industry-wide accounting system change in which capital expenses are no longer deducted from earnings, but are depreciated over 30 to 40 years. What that means, they say, is that the $5.1 million Maine Central profit in 1982 is a restatement of a figure that would have been closer to $1.27 million under the old ICC accounting system.

Union officials complain that Guilford plays with these numbers to its own advantage, crying poverty at contract time, but reporting glowing success when it suits their purposes, for example when little Guilford (with net assets of $66.6 million) put in a bid of $1.2 billion for Conrail last year.

David Fink still maintains that the bid for Conrail was realistic, but many in the rail industry felt the Guilford bid was a little like Jonah proposing to swallow the whale. Still, Guilford has committed $88 million to acquiring 1,000 miles of divested track if and when Norfolk Southern (the federal Department of Transportation's choice to take over Conrail) acquires Conrail. Guilford's proposed acquisition of the so-called Western Extension (lines to Chicago and St. Louis) is a result of Justice Department concerns about anti-trust violations when Norfolk Southern and Conrail merge.

Both Maine Central and Guilford have always been profit makers. In explaining Maine Central lay-offs, Guilford management cites the high cost of railway labor, suggesting that rail unions are pricing themselves out of jobs. David Fink states that the average Maine Central employee has a salary and benefit package worth $40,000 a year. He cites cases (admittedly exceptions) of engineers making $80,000 a year, janitors making more than the Governor of Maine ($35,000).

Colin Pease, Guilford's youthful vice president for government affairs, multiplies the 400 lay-offs by the average $40,000 compensation package and comes up with $16 million, a big piece of the $18.2 million Maine Central has earned in four years. Pease says the lay-offs and cutbacks are simply a matter of "adjusting expenses to revenues." In the past, Maine Central had a reputation for making a profit by deferring maintenance. The new Maine Central appears to be making a profit by cutting labor costs. In other words, Maine Central is showing a profit because people are losing their jobs.

"Unless you take the course of sacrificing the few for the many, you're not going to be around," says Guilford's David Fink.

From the point of view of Maine Central union employees, it's more a matter of sacrificing the Maine Central to the B&M, the D&H, and perhaps the Western Extension. Union leaders and union members say that de factor or by design the leasing of switching operations and the abandonment of branch lines will result in Maine Central running just a main line operation in Maine. Since even Fink acknowledges "the spine is only as good as the vessels feeding it," Guilford is obviously gambling that the state will not allow the feeder lines it abandons to wither and die. The plan is for the state to find independent short line operators for branches like the Rockland run where there is still life. Some Maine Central employees refer to this tactic of laying responsibility for feeder lines onto the state as "corporate blackmail." Despite the fact that it would be in everyone's best interests to keep branch lines alive, many Maine Central union employees voted against the recent bond issue out of spite.

Eugene Lyden, a soft-spoken former Maine Central brakeman who is now international vice president of the United Transportation Union, is perhaps the most articulate spokesman for the labor view that Guilford has weakened Maine Central in order to strengthen the B&M and the D&H.

"I think what they've done," says Lyden, "is simply streamline the railroad. It has been dramatic in Maine because of the common ownership of the three lines. I don't think it would have happened if they owned only Maine Central."

In trying to make the case that Maine Central is essentially carrying the weaker railroads, union leaders cite statements in Guilford's own June, 1985, proposal to take over the Western Extension:

"Maine Central has a strong base of originating traffic which is moving across the Guilford System in increasing volumes to the benefit of rail customers and of B&M and D&H as well.

"Affiliation with [Maine Central] has provided access to additional, profitable traffic . . .

"Thus, Guilford has taken one profitable railroad, combined it with two larger and previously unprofitable (but completely reorganized) railroads and produced a system which is providing efficient rail service and realizing profits."

Guilford president Fink adamantly denies that Maine Central is carrying the two other lines.

"Without the long haul," says Fink, "without B&M and D&H, the maine Central would be in dire straits today. It would be at the whim of every one of its connectors.".

Staggers favors the long haul," echoes vice president Colin Pease. "Business under deregulation is long haul."

Fink and Pease characterize the consolidation of the Maine Central, Boston & Maine, and Delaware & Hudson as the consummation of an idea put forth by the ICC in the 1930s and ardently pursued in the 1970s by Frederic C. (Buck) Dumaine of the Amoskeag Corporation and the Bangor & Aroosatook Railroad. Dumaine's advances were repeatedly thwarted by Maine Central's president E. Spencer Miller.

"It was [Mr. Miller's] belief that a New England railroad—the Maine Central tied to less viable railroads—would be the downfall of the Maine Central," maintains the union's Eugene Lyden. "I think his opinion was correct."

Railroad employees claim that Guilford is bleeding Maine Central by paying overhead costs for all three lines out of Maine Central revenues—buying fuel for the D&H and locomotives for the B&M, paying Guilford executive salaries. David Fink says he is one of the few executives who are on the Maine Central payroll.

Guilford officials explain the cutbacks and layoffs as functions of mechanization and lost business, not consolidation. Business is down in 1985, says Fink, primarily because production is off in the paper industry. Paper and forest products account for roughly 60 percent of Maine Central's traffic.

"It has been business," says Fink of the lay-offs. "You've got a 20 percent loss of business. If you have no business, you don't need the labor."

Railroad jobs lost to transactions such as mergers, consolidations, and abandonments are subject to a variety of job protection agreements, so it is important that lay-offs be justified in terms of mechanization and lost business, economic forces to which job protection measures do not apply. Job protection measures such as the New York Dock Agreement and Oregon Short Line Agreement call for employers to continue the salaries of discharged employees for up to six years. The ICC has imposed the conditions of the Oregon Short Line Agreement on Maine Central's abandonment of the Rockland and Calais lines, but as those abandonments have not yet actually occurred, it remains to be seen whether employees will be terminated or transferred. Bradley Peters, Maine Central's director of human resources, will say only that job protection compensation has been and is now being paid to an unspecified number of people.

Union leaders believe that some of Maine Central's lay-offs are due to the consolidation and should be subject to job protection. Again, they cite the text of Guilford's proposal to acquire trackage from Norfolk Southern:

"In addition to consolidating the management," the document states, "Guilford has given significant attention to upgrading the physical condition and facilities of the three railroads. This upgrading has been carried out in conjunction with a program to eliminate or reduce redundant or obsolete facilities."

The document does not say redundant or obsolete jobs, but Guilford is trying to eliminate jobs they view as unnecessary through contract negotiations and arbitration. The caboose will soon be a thing of the past. The company is fighting the unions over crew size, the carrier maintaining that three men (engineer and two ground crew) are sufficient to run a train, the unions trying to hold onto four and five men to a crew. Firemen, who haven't been needed in their nominal capacities since steam gave way to diesel in the 1950s, have been kept on as engineers-in-training, but the latest trainmen's national contract allows for their eliminations through attrition. (Guilford has elected this year to deal with the union rather than abide by national agreements.)

It is axiomatic in the rail industry that economies and efficiencies are achieved following mergers or consolidations either by increasing revenues (finding more business) or reducing costs (laying people off). Labor feels that Guilford has done too much of the latter and not enough of the former. Some of the company's severest critics insist that Maine Central has actively discouraged business on lines it wants to abandon by upping rates, reducing services, or by divert-

ing and rerouting existing traffic, as in the case of the Calais branch line where Maine Central (with authorization) diverted Georgia Pacific traffic (60 percent of the line's volume) to the Canadian Pacific Railway. In such cases, labor will insist that the company didn't want to serve the customer; the company will argue that it couldn't afford to serve the customer.

David Fink says Maine Central has gone out after new business, but not always with great success. He was unable, for example, to convince Aroostook County potato farmers to ship by rail. He does believe, however, that extending Guilford's reach to Chicago and St. Louis will both create new markets for Maine goods and bring increased traffic into Maine.

Down the line, Fink sees the future of rail transport in terms of containerized cargo that can be conveniently shipped by sea, rail, and over the road (or all three). He also sees a future in intermodal transportation (rail-truck combinations) and to that end has diversified Guilford into trucking. If you can't beat'em, join'em. Traitor, say the trainmen. But then the phrase most repeated on both sides of this rail labor-management dispute is that Guilford officials "are businessmen, not railroad men," Labor uses it as condemnation. Management uses it as a statement of fact.

Guilford also operates the Boston MBTA commuter rail line on a contractural basis, and David Fink says restoring some form of passenger service to Maine is not out of the question. Guilford is currently lobbying to have Boston's North Station and South Station linked via rail (in conjunction with a major highway project aimed at relieving Boston's gridlock) in hopes of luring Amtrak (which operates out of South Station up over its lines. But to restore Boston to Main passenger service, Fink says, some form of state or federal subsidies would be required.

Despite the fact that Fink attributes most of Guilford's austerity measures to competition from truckers, he does not expect railroads to receive the kinds of government subsidies the trucking industry does ("We'd just like to see truckers pay their fair share," says Fink.

Yet Guilford is subsidized one way or another in most of the other states in which it operates, possibly to the detriment of Maine. In Massachusetts, Guilford does not have to pay fuel tax and the state maintains all overhead bridges. In Connecticut, Guilford pays no fuel tax, sales tax, right of way tax, has branch line rehabilitation subsidized, and does not have to compete with tandem trailers.

In New York, the Delaware & Hudson has received $50 million in state aid over the past 10 years. Two years ago, the D&H was awarded a $20-million grant to rehabilitate track and construct a locomotive facility. In Massachusetts, Guilford received $7 million this year to expand and improve its yard and locomotive facility in East Deerfield. Meanwhile, Maine Central's Bangor yard is gone, the Waterville yard is being phased out, and there are continuing lay-offs at the Rigby yard in South Portland.

Tied to New York's $20 million subsidy is a job protection provision that obligates Guilford to maintain the level of employment on the D&H in New York at between 800 and 1,100. New York's Department of Transportation (DOT) reports that Guilford has scrupulously met these job quotas. And in Massachusetts, a DOT spokesperson explained that the idea behind that state's $7-million aid is "keeping jobs that might have moved elsewhere."

In Maine, the recently passed bond referendum sets in motion a new state rail policy by which the state is committed to finding short line operators to lease and run abandoned feeder lines. The state will also assume half the cost of maintaining bridges and grade crossings and railroads will be exempted from a five percent sales tax on track materials.

William Fernald, who oversees all nonhighway transportation for Maine's DOT, says that Maine's efforts on behalf of rail are small compared to what some states are doing, but he feels Maine has gone as far as it should go considering that the state has no dedicated tax for rail as it does for highways.

Whether Maine Central will eventually abandon all branch lines, William Fernald can't say, but what he does say is eerily consistent with such a scenario.

"Theorizing about the future of railroads," says Fernald, "you can easily come to the conclusion that the future of railroads is high speed, frequent trains operating between major population centers, and the rest all trucking."

Currently, Maine Central has begun proceedings to abandon both a section of the Lewiston Lower Road (from Lisbon to Lewiston) and the branch line to Dover-Foxcroft. How many more lay-offs will there be on Maine Central?

"How much business am I going to lose?" replies David Fink.

Mr. PRESSLER. Mr. President, I note that my speech has not drawn Senators to the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RADIOACTIVE WASTE COMPACTS

Mr. SIMPSON. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 1083.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the title of the bill (H.R. 1083) entitled "An Act to amend the Low-Level Radioactive Waste Policy Act to improve procedures for the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste, and for other purposes.".

Resolved, That the House agree to the amendment of the Senate to the text of said bill, with an amendment as follows:

Page 33 of the Senate engrossed amendments, strike out all after line 14 over to and including line 13 on page 36.

BARNWELL SITE CLOSURE

Mr. THURMOND. Under the terms of the Southeast Interstate Low-Level Radioactive Waste Management Compact, the commercial disposal facility at Barnwell, SC, is scheduled to close by December 31, 1992. Is it the understanding of the chairman, that this closure date is preserved by this legislation?

Mr. SIMPSON. Yes. It is my understanding that the Barnwell facility will be closed by December 31, 1992, and that nothing in this legislation could be construed to prevent its closure on that date.

HIGHER THAN CLASS C WASTES

Mr. THURMOND. Is it the understanding of the Senator from Wyoming that under the terms of this legislation, higher than Class C low-level radioactive wastes are not to be disposed of in commercial low-level radioactive waste disposal facilities such as Barnwell, Beatty, or Richland and are not to be disposed of in unlicensed Federal facilities such as the Savannah River Plant, the Hanford Reservation, or the Beatty weapons arsenal?

Mr. SIMPSON. Yes. That is my understanding. (Higher than Class C low-level radioactive wastes are to be disposed in an NRC licensed facility that is not one of the commercial low-level radioactive waste facilities subject of this legislation.)

DISPOSAL CAPACITY

Mr. THURMOND. Is it the understanding of the chairman that the phrase "shall make disposal capacity available" as used in section 5(a) (1) and (2) means only that, other than as provided in other parts of section 5, the States cannot take actions intended to interfere with the disposal of the volumes of waste stated in section 5(b). Further, the phrase does not mean that the States must act affirmatively to provide for disposal of waste generated within their borders or elsewhere. Nor does it preempt the enforcement of otherwise valid State laws and regulations, undertaken for some other purpose, that incidentally restrict access—for example, clean air and water laws, packaging and inspection requirements, tax laws, et cetera.

Mr. SIMPSON. Yes. That is exactly the meaning of that phrase as used in this legislation.

Mr. SIMPSON. Mr. President, I would like to add a couple of remarks about the action taken this evening on the House side, in passing the legislation that is now pending before us.

In considering this bill, some Members raised questions about the constitutionality of the provisions contained in the Senate-passed bill, requiring States to take title and possession of low-level radioactive waste no later than January 1, 1996, if such State, or a compact region in which such State is a member, fails to provide low-level radioactive waste disposal. I should emphasize that, in my judgment, there are no constitutional defects with this approach. If, however, a State declines

to take title and possession under this provision, and asserts that the provision is unconstitutional, I should point out that the failure to comply voluntarily with the requirement that title and possession be taken—one of the principal conditions of consent to any regional compact—means that the entire compact in which such State is a member will be null and void, invalid, and cannot be implemented. Thus, a State that refuses to take title and possession under this provision does so at considerable risk that the compact will be invalid as a result.

I wonder if I could ask for the assurances from my colleagues that this is their understanding of this provision?

Mr. McCLURE. I agree with that interpretation, Mr. President.

Mr. THURMOND. That is consistent with my understanding, as well, Mr. President.

Mr. JOHNSTON. I, too, agree with the statement of the Senator from Wyoming.

Mr. SIMPSON. I should also clarify, Mr. President, the confusion that has arisen in the other body over the meaning and requirements of the language in this bill on wastes that are a Federal responsibility and the issue of the "class C institutional control rulemaking." The Senate rejected the proposal that the NRC be required to reopen its regulations for the purpose of considering whether the hazards associated with class C wastes exceeded the period of institutional control. The Senate reached the conclusion, and that conclusion is reflected in this bill, that the States are responsible for class A, B, and C wastes, and more importantly, that the Commission's existing regulations in 10 CFR part 61 provide an adequate regulatory framework for all class A, B, and C wastes. We do not intend, and in fact specifically reject in approving this bill, any implication that those regulations are inadequate or that they should be reconsidered. The Federal responsibility provision in section 3 of this bill has nothing to do with class C wastes. It is limited to those wastes above class C. Moreover, the study under section 3 is to be conducted by DOE, not the NRC, and has nothing to do with the wastes that are the responsibility of the States under this bill. Again, I reemphasize, Mr. President, that we rejected the concept of a "class C institutional control rulemaking" in this bill, and in passing this bill, disagree that any reconsideration need be given by the NRC to the part 61 regulations.

Mr. McCLURE. I concur in that statement, Mr. President.

Mr. JOHNSTON. I, too, agree with that interpretation.

Mr. THURMOND. I concur in that understanding, as well, Mr. President.

Mr. SIMPSON. Finally, Mr. President, I should emphasize that the bill before the Senate tonight, and approved earlier this evening by the House, originated in the Committees on Environment and Public Works and Energy and Natural Resources. Accordingly, the relevant legislative history for this bill are the two reports filed by these two committees, and not, as was suggested earlier this evening in the House, the reports on the House bills. In addition, I should note that the governing legislative history on this bill that we consider this evening has now been established in the respective bodies of the Congress. Any further remarks, including revised and extended remarks filed in either body, are not, in our judgment, part of the legislative history on this legislation, and should not be construed as contemporaneous legislative history, governing the manner in which this legislation should be construed. Thank you, Mr. President.

Mr. McCLURE. With respect to the House provision that was rejected by the Senate with respect to an institutional rulemaking for certain categories of class C low-level radioactive wastes, I wish to remind my colleagues that the Nuclear Regulatory Commission already has the authority—and, I might add, uses this authority—to revise any of its regulations that it judges at any time to be inadequate to protect the public health and safety.

Mr. LAUTENBERG. It is my understanding that the Environment Committee came to no conclusion regarding the adequacy of the NRC's regulatory framework under 10 CFR part 61 governing low-level radioactive waste disposal facilities.

It is also my understanding that there were remarks made in the other body this evening on this legislation suggesting that the NRC should conduct a review of its part 61 regulations. Since this provision is not included in the legislation the House passed earlier tonight, nor is it in the legislation we are now considering, I do believe we are neither requiring the NRC to conduct such a study nor suggesting that such a study is unnecessary. Is this consistent with the view of the distinguished chairman of the Environment and Public Works Committee?

Mr. STAFFORD. The distinguished Senator from New Jersey is correct. We have made no judgment as to the adequacy of these regulations. The NRC has the authority to review such regulations as it deems advisable.

Mr. EVANS. I would like to make a few additional remarks about the emergency access provisions.

I understand that the intended limitation on the use of emergency access in section 6 is to allow only one grant and one extension per generator for any particular incident related to the public health and safety. It is my understanding that if incidents which may be a threat to the public health and safety are of a substantially similar nature, the NRC should not be required to provide another grant of emergency access at another point in time. In effect, any generator or any State must choose carefully when to request the NRC for emergency access.

Mr. SIMPSON. The Senator is correct in his understanding.

Mr. EVANS. Fundamentally, it is my understanding that emergency access should be used only in rare circumstances. It should not be allowed to indirectly or directly violate the volume limitations in section 5 or to be used indiscriminately after January 1, 1993.

Furthermore, it is my understanding that the four alternatives to emergency access listed in section 6(c)(1)(B) are coequal, including the alternative of ceasing to generate low-level radioactive waste. It is my understanding this means that making a voluntary agreement with a disposal facility in a sited State should be considered fully as an alternative. Also, it is my understanding that price for disposal should not be a factor which leads the Commission to determine that a voluntary agreement is not achievable.

Mr. SIMPSON. The Senator is correct in his understanding.

Mr. LAUTENBERG. Mr. President, I thank the chairman of the Senate Environment and Public Works Committee for his reassurances. I would simply like to follow up our discussion by saying that it is my hope the NRC will review 10 CFR part 61 in regard to the guidance and licensing of a range of alternative disposal methods.

I am concerned that the current regulations are biased toward shallow land burial, which may be environmentally unsound for States with high water tables such as the States in the Northeast Compact. For that reasons, I offered an amendment when the committee took up the low-level Radioactive Waste Policy Amendments Act of 1985 that requires the NRC to publish technical guidance on alternative disposal methods within 1 year and to publish licensing requirements for these disposal methods within 2 years. This amendment, included in the bill before us, will provide the States with an unbiased full range of disposal methods from which to choose in constructing a disposal facility within their compacts.

In addition, Mr. President, I am concerned about the issue of institutional controls. It may also be appropriate for the NRC to provide additional guidance or regulation, or change the current 10 CFR part 61, to address a balance of institutional controls and engineering factors in order to adequately protect the public health and the environment for the duration of the hazard of the low-level waste deposited at waste disposal facilities.

I am particularly concerned that the NRC review the institutional control requirements for alternative disposal methods, which may require a different balance than that called for in 10 CFR part 61. I would like to point out that my concern about the NRC review of institutional control requirements in regard to alternative methods was included in the report of the Senate Environment and Public Works Committee, and was not addressed in the report of the Senate Energy and Natural Resources Committee.

Mr. SIMPSON. I move, Mr. President, that the Senate concur in the House amendment.

The motion was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HOLLINGS. Mr. President, once again earlier today I expressed my gratitude and admiration to the distinguished Senator from Wyoming, and to my senior colleague, Senator THURMOND, for the outstanding job that was done.

There is no question I started with this some 30 years ago. The Savannah River plant is located in Tuscaloosa aquifer right near an earthquake fault, and over 30 years ago I served on the regional advisory council on nuclear energy. At the time the Honorable R.M. Cooper was chairman, and later I served as Governor trying to dispose of nuclear wastes.

At that particular time we were told that due to the danger of the location that the temporary storage would only be for a period of 2 years; 2 years became 5, 5 became 10, 10 became 20, and it is now 30.

I never dreamed it would take 30 years and Christmas Eve to bring this about. So it is with tremendous admiration, respect, and gratitude that I hail the distinguished Senator from Wyoming on his leadership, and our senior Senator, Senator THURMOND, on bringing about this reconciliation and this magnificent initiative to bring about a responsible program for the storage of low-level nuclear waste in America.

Mr. THURMOND. Mr. President, it is a great day for America. This matter has been pending and worked on now for a number of years. I am very pleased that it has finally come to culmination and has been enacted into law.

Again, I want to thank Senator HOLLINGS for his kind words and his fine cooperation. I also again want to express to Senator SIMPSON and others who have been so active in this matter and providing such outstanding leadership, my deep appreciation. Without all the people who have worked on this bill, it would not have become law.

This is a wise step the Congress is taking. I am sure as time goes by, Congress will be pleased that it did take this action and it will be to the benefit of the whole Nation.

Mr. SIMPSON. Mr. President, I thank both Senators from South Carolina for their generous remarks. I thank Senator HOLLINGS for his consistent interest and support.

Let me just say one more word about Senator THURMOND. Senator THURMOND authorized me to hold the first hearing on this matter in Seattle, WA, some 3 years ago. Because of his great interest and his support, we started at the Judiciary Committee level and tonight, at this moment, we bring all that process to fruition. It could not have been done without the generous support and the continual interest and the extraordinary persistence of the Senator from South Carolina, who is a dear and generous friend. I appreciate that very much.

Mr. THURMOND. Mr. President, I wish to thank the able Senator for his kind remarks.

WILDLIFE REFUGE CENTERS

Mr. SIMPSON. Mr. President, after conferring with the Democratic leader, I ask unanimous consent that the Senate now turn to the consideration of Calendar Order No. 494, H.R. 1404, dealing with the Eastern Shore of Virginia National Wildlife Refuge.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 1404) to establish the Eastern Shore of Virginia National Wildlife Refuge and the National Fish and Wildlife Service Training Center at Cape Charles in Northampton County, Virginia.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill.

Mr. CHAFEE. Mr. President, H.R. 1404 and identical legislation (S. 585) introduced by Senator PAUL TRIBLE would establish the Eastern Shore of Virginia National Wildlife Refuge and the National Fish and Wildlife Service Training Center at Cape Charles in Northampton County, VA.

Establishment of a refuge in this area began in 1984 when the General Services Administration approved transfer of the 174-acre Cape Charles Air Station to the U.S. fish and Wildlife Service. H.R. 1404 will expand these refuge boundaries to include 396 acres owned by the Chesapeake Bay Bridge Tunnel Authority, 297 acres owned by the Wise Point Corp., plus other adjacent lands currently in State, county, and private ownership.

The lands included within this newly created Eastern Shore of Virginia National Wildlife Refuge are located on the southern end of the Delmarva Peninsula. Construction of the Annapolis Bay Bridge and Chesapeake Bay Bridge Tunnel during the past 40 years has made this area readily accessible to the populations of Washington, DC, Baltimore, and Norfolk. This increased accessibility and relatively low land prices, in turn, have made the area an attractive one for development, and recently, the Chesapeake Bay Bridge Tunnel Authority placed its 396 acres of land on the market. Fortunately, the Nature Conservancy has signed a contract to buy this property for $2.64 million to ensure that the area is preserved in its natural state. The Nature Conservancy intends to hold this land for the FWS pending authorization and appropriations of funds by Congress.

The continuing resolution, House Joint Resolution 465, provides $2.64 million in fiscal year 1986 to purchase the Bay Bridge Tunnel property. H.R. 1404 will provide the necessary authorization for the Fish and Wildlife Service to go forward with this acquisition.

The proposed refuge site is used by migrating birds to wait out unfavorable weather conditions before crossing large expanses of open water to the south. It is one of only two such major stop-over areas along the Atlantic Coast—the other is Cape May, NJ. Additionally, endangered or threatened species, such as peregrine falcons, bald eagles, and brown pelicans, utilize this habitat. Other species found in the area include least terns, black ducks, snow geese, and Atlantic brant. The proposed refuge boundaries also encompass an abundance of tidal wetlands and marshes which are important to the protection of other estuarine resources.

The National Fish and Wildlife Service Training Center will utilize, in part, facilities constructed in conjunction with the Cape Charles Air Station. It is expected that the training facility will support a broad range of Fish and Wildlife Service and non-Fish and Wildlife Service functions. The Service is the only Federal land management agency without such facilities. Annual capacity of the training center when completed is estimated at approximately 12,000 trainee-days. Current Fish and Wildlife Service training needs will require more than half of this capacity. The remaining center capacity may be used by other agencies, private organizations and educational institutions. Several major universities, including the College of William and Mary and Old Dominion University, have expressed interest in conducting environmental education programs at the refuge.

Mr. President, I believe this area will make an excellent addition to our Na-

tional Wildlife Refuge System and I urge my colleagues to support it.

Mr. WARNER. Mr. President, I rise today to associate myself with the remarks of my distinguished Virginia colleague, Senator TRIBLE, in support of his legislation, which I have cosponsored, to establish the Eastern Shore of Virginia National Wildlife Refuge in Northampton County, VA.

The purpose of this legislation is to expand the existing boundaries of the Cape Charles National Wildlife Refuge on Virginia's Eastern Shore and to utilize as a Fish and Wildlife Training Center the facilities remaining from a former Air Force base.

The continuing appropriations resolution for fiscal year 1986 which incorporates the Department of Interior and Related Agencies appropriations bill for fiscal year 1986, recommends $2.64 million to purchase additional land for the refuge to preserve the area in its natural state.

The legislation before us today authorizes the expansion of the current boundaries and utilization of existing facilities for an educational, research and training center for environmental programs.

The Secretary of Interior is authorized to acquire remaining lands and waters for the refuge by donation, easement, exchange or purchase with funds from the land and water conservation fund.

I strongly support this legislation because the Cape Charles National Wildlife Refuge preserves critical fish and wildlife habitat along the Atlantic flyway.

Specifically, the area offers food and resting habitat and acts as a "staging area" for migratory birds before they cross the Chesapeake Bay enroute south for the winter.

Endangered species, such as the peregrine falcon, bald eagle, and the brown pelican use this area.

The establishment of the Training Center utilizing existing Air Force buildings will encourage needed environmental programs that will prove valuable in aiding migratory birds, waterfowl, fish, and other endangered species native to the area or that use the refuge along their migratory route.

I congratulate my colleague Mr. TRIBLE for his hard work which led to the passage of this important legislation and urge my colleagues to support it.

Mr. TRIBLE. Mr. President, I am pleased to bring before the Senate a measure which will grant a congressional charter to the Eastern Shore of Virginia National Wildlife Refuge and National Fish and Wildlife Training Center in Northhampton County, VA.

This refuge is a unique facility. First, it protects irreplaceable migratory waterfowl habitat. Second, it will utilize the abandoned Cape Charles Air Force Base to provide a training facility for Fish and Wildlife Service personnel after renovation.

The Fish and Wildlife Service recognized the value of the base as a refuge for various species of migratory birds and acquired the property in 1984.

Cape Charles is among the most important habitats on the east coast for migratory waterfowl, raptors and songbirds, and is home for endangered and threatened species such as the peregrine falcon, bald eagle, brown pelican and five species of marine turtles. In addition, the Delmarva Peninsula is a primary flight corridor during the annual southern migration. The peninsula narrows in the south, creating a funneling effect on the birds which culminates at Cape Charles. Because of the variety of marsh and upland habitat, the area provides excellent cover and forage for the large variety and high concentration of migratory species.

In addition to the natural attributes of the area, the former air base has a variety of buildings in relatively good condition. These are being converted to refuge use.

The Fish and Wildlife Service is examining the possibility of establishing a national training center for Service personnel and a refuge law enforcement refresher course training center utilizing some of the existing buildings at the former base. Various colleges and universities have indicated interest in using these facilities for environmental studies under contract or cooperative use agreements with the Service. The bill I bring up today will establish this center in law and facilitate its development.

The Eastern Shore of Virginia National Wildlife Refuge represents an important link in the ongoing establishment of protected wildlife habitat along the east coast's barrier island chain. It will provide shelter and forage for migratory birds, unique opportunities for training and environmental studies, and economic benefits for the citizens of the Commonwealth of Virginia. I am pleased to be able to assist in the establishment of this refuge, and I welcome my colleagues' support on the measure.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the third reading.

The bill was ordered to a third reading, read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PROCEDURE FOR THE DISPOSITION OF EXTRANEOUS MATERIAL IN RECONCILIATION CONFERENCE REPORTS

Mr. SIMPSON. Mr. President, I send a resolution to the desk on behalf of Mr. ARMSTRONG, Mr. ROTH, and Mr. DOMENICI, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 286) to authorize a procedure for the disposition of extraneous material in reconciliation conference reports, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

Mr. PACKWOOD. What was it? I did not hear the clerk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 286) to authorize a procedure for the disposition of extraneous material in reconciliation conference reports, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. ROTH. Mr. President, the purpose of this resolution is to remedy a possible unintended result of the Byrd amendment to the reconciliation bill, section 1201 of the Consolidated Omnibus Budget Reconciliation Act of 1985. That provision imposes a discipline upon this body which is not imposed on the other body. Basically, it requires that Senators not place extraneous provisions in reconciliation bills and resolutions.

However, if Members of the other body are free to load up their bills and resolutions with extraneous provisions, I fear that our body will be at a disadvantage with respect to the other body. Since we cannot tell the other body how to conduct its business, the solution is to create a new Senate procedure for handling extraneous material originating in the other body and coming to us as part of a House amendment or a conference report. The situation is analogous to that in the other body when we send provisions to them which would violate their rule on germaneness if offered there rather than here.

The other body's response to that situation has been to adopt clauses 4 and 5 of rule XXVIII of the House rules. The remedy proposed here is similar. It would permit a point of order to be raised against the extraneous material in House amendments or conference reports. With respect to a House amendment, if such point of order is sustained, the effect will be like that of a successful motion to strike out the offending language, and

the Senate will be able to consider and act upon the remainder, if any, of the amendment.

With respect to a conference report, if such point of order is sustained, the effect will be like that under rule XXVIII of the House rules; the Senate will be able, for example, to request further conference or to insist on its disagreement or to recede and concur in the House amendment with an amendment incorporating the remainder of the text of the conference report or any other permissible variation which does not revive the provision deemed stricken by the successful point of order.

It should be noted that points of order may be made only with respect to two of the four categories of extraneous material in section 1201. This is because the two categories omitted are not applicable to matters to be transacted between the Houses. Moreover, it is intended that the remaining two categories be applied without reference to any instructions that may have been given to committees. Thus points of order may be raised against a provision which does not produce a change in outlays or revenues or which produces a change which is merely incidental to the nonbudgetary components of the provision.

I believe that this resolution is a necessary step to protect the prerogatives of this body. With this protection, the Byrd amendment will be able to achieve a necessary reform without disadvantaging this body.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 286) was agreed to, as follows:

S. RES. 286

Resolved, That when the Senate is considering a conference report or House amendment with respect to a reconciliation bill or reconciliation resolution pursuant to section 310 of the Budget Act, upon a point of order being made by any Senator against extraneous material meeting the definition of subsections (d)(1)(A) and (d)(1)(D) of section 1201 of the Consolidated Omnibus Budget Reconciliation Act of 1985, and such point of order is sustained, any part of such report or amendment containing such material shall be deemed stricken, but it shall be in order to continue consideration of the remainder under the Rules and practices of the Senate and applicable law. An affirmative vote of three-fifths of the Members, duly chosen and sworn, shall be required to sustain an appeal of the ruling of the Chair on a point of order raised under this resolution, as well as to waive or suspend the provisions of this resolution.

The provisions of this resolution shall remain in effect until the date of termination of section 1201 of the Consolidated Omnibus Budget Reconciliation Act of 1985.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DESIGNATION OF THE CAPTAIN JOHN FOSTER WILLIAMS COAST GUARD BUILDING, IN BOSTON, MA

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate turn to the consideration of H.R. 3931, the John Foster Williams Coast Guard Building.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 3931) to designate the General Services Administration building known as the "United States Appraiser's Stores Building" in Boston, Massachusetts, as the "Captain John Foster Williams Coast Guard Building."

The PRESIDING OFFICER. Without objection, the bill will be considered as having been read the second time at length and the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 3931) was ordered to a third reading, was read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT OF THE ALASKA NATIONAL INTEREST LANDS CONSERVATION ACT

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Energy and Natural Resources Committee be discharged from further consideration of H.R. 2651, to amend section 504 of the Alaska National Interest Land Conservation Act to promote the development of mineral wealth in Alaska, and ask unanimous consent that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 2651) to amend section 504 of the Alaska National Interest Lands Conservation Act to promote the development of mineral wealth in Alaska.

The PRESIDING OFFICER. Without objection, the bill will be considered as having been read the second time at length and the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill.

Mr. MURKOWSKI. Mr. President, today I rise in support of H.R. 2651, legislation which amends section 504 of the Alaska National Interest Lands Conservation Act of 1980 (ANILCA). The basic thrust of this legislation is to extend for a period of 1 year the statutory authorization to conduct mineral exploration in the Greens Creek unit of Admiralty Island National Monument, Alaska.

Section 504 of ANILCA provided a limited authorization for the exploration and development of prior existing valid mining claims in the Greens Creek area. Since 1980, the Noranda Mining Co., as lead operator in a joint venture with other major mineral companies, has been exploring those claims under the terms and conditions of section 504. That exploration has demonstrated that Greens Creek is an extraodinarily rich deposit of zinc, lead, silver, gold and other associated minerals; and that as much as 50 percent of the deposit lies outside the area left open for exploration in section 504. Five years of exploration has also shown that full exploration of the entire deposit can not be accomplished within the 5-year period provided by section 504. Thus the need to amend section 504 is apparent.

Earlier this session, Senator STEVENS and I introduced a bill to amend ANILCA to permit full exploration and development of the Greens Creek deposit in an environmentally sound manner. Congressman DON YOUNG sponsored companion legislation in the House. This legislation was necessary because the authorization in ANILCA to conduct mineral exploration at Greens Creek expired on December 2, 1985. It was our hope that Congress would address the merits of this issue and provide the relief needed prior to the December 2, 1985 deadline.

Action on that legislation has been held up, however, by the insistence of some that it be linked to the resolution of other perceived resource management issues on Admiralty Island. One of those issues involves 23,000 acres of prime timber land owned in fee by Shee Atika, Inc., an Alaska Native corporation created pursuant to the Alaska Native Claims Settlement Act. Since August, Shee Atika, Noranda and other parties with varied interests in Admiralty Island have been negotiating in an attempt to arrive at a comprehensive settlement of all resource management issues concerning the island.

While these negotiations have been occurring the December 2 expiration date has passed. The participants in the Greens Creek mining venture now find themselves in the position of not being able to continue exploration of

the deposit. Moreover, claims which had been staked prior to passage of ANILCA, but which had not been perfected because of the lack of time, are now invalid. To rectify this situation, albeit temporarily, the House has passed H.R. 2651.

H.R. 2651 does two things. First, it permits the Noranda joint venture to continue to hold and explore its unperfected mining claims in the Greens Creek area for an additional year. It does not, however, permit any additional claims to be perfected during this year. Consequently, the effect of the bill is to maintain the status quo as of December 1, 1985, as far as the Greens Creek deposit is concerned. Second, it authorizes, subject to several conditions, the Secretary of Agriculture to begin negotiations with Shee Atika, Inc., aimed at an agreement whereby Shee Atika would refrain from taking any action with respect to its lands on Admiralty Island, which would render those lands inappropriate for wilderness designation at some future date. In this regard, the Greens Creek issue remains linked to at least one other resource management issue on Admiralty Island.

Mr. President, I do not like the linkage that has been established between these two issues. The need to provide for full exploration and development of the Greens Creek deposit is an issue that can and should be addressed on its own merits. Nevertheless, I recognize the desire of others who insist that any interim relief for Noranda occur in conjunction with legislation which also addresses the Shee Atika issue.

In this regard I think it is important to express my views of the provisions in H.R. 2651 which concern Shee Atika. Those provisions authorize the Secretary of Agriculture to enter into an agreement with Shee Atika under which Shee Atika would refrain from logging or otherwise economically developing its lands on Admiralty Island. In essence they authorize the Secretary to buy timber harvesting rights.

The 1971 Alaska Native Claims Settlement Act [ANCSA] granted to Shee Atika, and approximately 160 other Native village corporations created by that Act, the right to select Federal lands in Alaska for fee ownership. To fulfill its entitlement, Shee Atika selected some 23,000 acres on Admiralty Island. Because Shee Atika's right to select on Admiralty Island was viciously challenged, Congress, in 1980 through section 506(c) of ANILCA, specifically conveyed the Admiralty Island acreage to Shee Atika. The point to be made here is that on two separate occasions, Congress has expressed its intent that Shee Atika should be permitted to own land on Admiralty Island. Despite this clear indication of congressional intent, Shee Atika's attempts to develop this acreage have been subject to unrelenting litigation by parties who believe that those lands should be part of the Admiralty Island National Monument.

It is these parties who now insist that the authorization to negotiate for timber harvesting rights be included in H.R. 2651. I do not favor this provision, especially in this time of deficits and budget reductions, because it suggests the Federal Government spend tax dollars to pay a private corporation to refrain from developing its privately owned land.

Nevertheless, despite serious reservations, I support H.R. 2651 and ask my colleagues to do likewise. I do this for the following reasons. First and foremost, the bill does provide much needed relief to the mining operation at Greens Creek and that is my primary objective. Second, I am convinced that the provision authorizing the purchase of timber harvesting rights will not result in any substantive agreement with Shee Atika.

That provision is not binding on Shee Atika. It merely obligates the Secretary of Agriculture to "undertake negotiations" with Shee Atika and then only if sufficient funds have actually been appropriated for that specific purpose. It does not obligate the Secretary to reach an agreement with Shee Atika. It does not require him to use Federal dollars from some other source, such as the Tongass Timber Fund, to fund any agreement. Nor does it require him to explore any means other than the payment of money for purposes of reaching such an agreement. Finally, by enacting this provision, we do not intend to prohibit Shee Atika from developing its lands or harvesting its timber on Admiralty Island during the time it may be negotiating with the Secretary. Likewise, this provision is not intended to provide any group or entity with a cause of action by which to challenge actions of the Secretary of Agriculture or Shee Atika on this issue or any other issue. In short, the provision is entirely voluntary on Shee Atika's part and only binds the Secretary to sit down at the negotiating table.

Mr. President, there is one other reason why I support H.R. 2651, By passing it we are keeping alive the process of attempting to craft a long-term settlement of resource management issues in Southeast Alaska. This is a commendable goal and one to which I am committed. I urge the Members of the Senate to support passage of H.R.2561.

Mr. METZENBAUM. Mr. President, over the last few months there has been an effort among a variety of diverse interests to achieve a settlement of several resource management issues on Admiralty Island. It is my understanding that while that effort has made enormous progress, a final agreement remains elusive.

The pending bill deals with concerns of two of the parties to the settlement talks, the Noranda Mining Co. and Shee Atika, Inc. Frankly, I am extremely reluctant to support passage of this limited bill absent a more comprehensive agreement involving all parties.

However, I understand that Noranda and Shee Atika, along with all other parties to the recent negotiations, have agreed to continue their efforts to achieve a comprehensive settlement in the coming months. Thus, I will not oppose this bill. But I would appreciate it if my colleagues from Alaska would give an assurance that there will not be an effort to pass additional legislation involving Admiralty Island until the ongoing negotiations I mentioned earlier are given a chance to succeed.

Mr. MURKOWSKI. I appreciate the concerns of the Senator from Ohio. While I do not favor linkage of the Admiralty Island issues, I recognize that these talks have been proceeding. It would not be my intention to push for additional legislation beyond the pending bill until those talks have had a chance to come to a positive conclusion. However, it goes without saying that I retain the right, indeed the obligation, to offer any legislation at any time which I believe is necessary to protect the rights and interests of the people of my State.

Mr. STEVENS. I agree with the remarks of my colleague from Alaska.

Mr. METZENBAUM. I thank the Senators for their comments.

Mr. MURKOWSKI. What is the purpose of this legislation? Does not the Secretary have adequate authority to acquire property when deemed necessary to protect the Monument?

Mr. McCLURE. The Secretary has a variety of authorities to acquire lands and this legislation does not affect those authorities. The purpose of section (k) of the legislation is simply to protect the wilderness character of the Shee Atika lands at Cube Cove while there is an ongoing process to develop a mutually acceptable exchange. The authority in section (k) is in addition to any other authority which the Secretary may have and the section (k) authority is intended to be used at the discretion of the Secretary to facilitate the use of the other authorities such as the section 1302(h) exchange provision of ANILCA.

Mr. MURKOWSKI. It is my understanding that Shee Atika has already harvested some of the timber at Cube Cove but has been precluded by ongoing litigation from removing the harvested material from the site. Would a protection agreement under section (k) allow the removal of this material?

Mr. McCLURE. There is nothing in the act which would preclude the Secretary from allowing the removal of

the already harvested material subject to reasonable requirements.

Mr. MURKOWSKI. What effect would a protection agreement with Shee Atika have on any third party interests in the Shee Atika lands at the Cube Cove?

Mr. McCLURE. A protection agreement with Shee Atika would be subject to any third party interests in existence at the time of the agreement. Also, while not expressly stated in the act, I would expect that any protection agreement negotiated with Shee Atika would (1) recognize existing third party interest; and (2) prohibit Shee Atika from further encumbering the land during the life of the agreement. The potential impact of third party interest would be one of the things that the Secretary would probably want to look at in deciding whether or not it would be in the public interest to enter into a protection agreement with Shee Atika. It would probably not be in the public interest for the Secretary to enter into a protection agreement where it is likely that a third party action will thwart the purpose of the agreement.

Mr. MURKOWSKI. From where would the Secretary obtain any funds which might be required by a protection agreement with Shee Atika?

Mr. McCLURE. The funding would be subject to appropriation by the Congress. None of the funding sources currently available to the Secretary could be used as sources of funds unless specifically appropriated by the Congress.

Mr. MURKOWSKI. I note that the last paragraph in subsection 2(b) authorizes the Secretary to negotiate protection agreements with private land owners other than Shee Atika. What is the likely impact of these additional agreements?

Mr. McCLURE. I would expect very limited additional use of this authority by the Secretary if any. As I stated earlier, it is intended that the authority granted in section (k) will be used as an adjunct to other more traditional land acquisition processes. It is intended to facilitate the use of these other authorities; not to replace them.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 2651) was ordered to a third reading, was read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CORRECTING THE ENROLLMENT OF H.R. 2100

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate turn to the consideration of House Concurrent Resolution 264, correcting the enrollment of the farm bill.

The PRESIDING OFFICER. The concurrent resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 264) to correct the enrollment of H.R. 2100.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the Senate proceeded to the consideration of the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res 264) was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ENROLLMENT CORRECTION

Mr. SIMPSON. Mr. President, finally, I ask unanimous consent that the Senate turn to the consideration of House Concurrent Resolution 263, directing the enrollment of the Compact of Free Association.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 263) to rescind the approval of H. Con. Res. 262, correcting the enrollment of H.J. Res. 187, and directing the Clerk of the House of Representatives to make a correction in the enrollment of the joint resolution H.J. Res. 187.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the concurrent resolution.

Mr. SIMPSON. Mr. President, I move the adoption of the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. 263) was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

Mr. SIMPSON. Mr. President, I thank the Democratic leader for his presence so we could continue our business. He is always very thoughtful.

Mr. BYRD. Mr. President, I thank the distinguished assistant Republican leader for his charitable remark.

Mr. SIMPSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONVENING OF THE SECOND SESSION OF THE NINETY-NINTH CONGRESS

Mr. DOLE. Mr. President, I send a join resolution to the desk and ask for its immediate consideration with reference to convening the second session of the 99th Congress.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A Senate joint resolution (S.J. Res. 255) relative to the convening of the second session of the 99th Congress.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

The Senate joint resolution (S.J. Res. 255) was considered, ordered to a third reading, was read the third time, and passed as follows:

S.J. RES. 255

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the second regular session of the Ninety-ninth Congress shall begin at 12 o'clock meridian on Tuesday, January 21, 1986.

Mr. DOLE. Mr. President, I move to reconsider the vote on the resolution.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NOTIFICATION TO THE PRESIDENT CONCERNING THE PROPOSED ADJOURNMENT OF THE SESSION

Mr. DOLE. Mr. President, I send a resolution to the desk concerning appointing a committee to notify the President of our proposed adjournment.

The PRESIDING OFFICER. The clerk will state the resolution.

The legislative clerk read as follows:

S. RES. 287

Resolved, That a committee of two Senators be appointed by the Presiding Officer to join a similar committee of the House of Representatives to notify the President of

the United States that the two Houses have completed their business of the session and are ready to adjourn unless he has some further communication to make to them.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the resolution Senate Resolution 287 was considered and agreed to.

Mr. DOLE. I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Chair appoints the Senator from Kansas [Mr. DOLE] and the Senator from West Virginia [Mr. BYRD] to join a similar committee of the House of Representatives to notify the President of the United States that the two Houses have completed their business of the session and are ready to adjourn unless he has some further communication to make to them.

THANKS OF THE SENATE TO THE VICE PRESIDENT

Mr. DOLE. Mr. President, I send a resolution to the desk expressing our thanks to the Vice President for presiding over the Senate.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 288) tendering the thanks of the Senate to the Vice President for the courteous, dignified, and impartial manner in which he has presided over the deliberations of the Senate.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the resolution (S. Res. 288) was considered and agreed to as follows:

S. RES. 288

Resolved, That the thanks of the Senate are hereby tendered to the Honorable George H. W. Bush, Vice President of the United States and President of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the first session of the Ninety-Ninth Congress.

Mr. DOLE. I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THANKS TO THE PRESIDENT PRO TEMPORE

Mr. DOLE. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. Res. 289) tendering the thanks of the Senate to the President pro tem for the courteous, dignified and impartial manner in which he has presided over the deliberations of the Senate.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. HOLLINGS. Mr. President, my distinguished senior colleague has been here and on duty in the most deliberate, persistent and dignified fashion. We in South Carolina are extremely proud of our senior Senator for the way he has conducted his duties. It is no surprise to us. As the President pro tem of the U.S. Senate, we think he has been absolutely outstanding, and I join in urging adoption of the resolution.

Mr. DOLE. Mr. President, let me indicate that the resolution came from the distinguished minority leader, Senator BYRD.

Mr. BYRD. Mr. President, I thank the distinguished majority leader.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 289) was agreed to.

The resolution reads as follows:

S. RES. 289

Resolved, That the thanks of the Senate are hereby tendered to the Honorable Strom Thurmond, President pro tempore of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the first session of the Ninety-Ninth Congress.

Mr. BYRD. Mr. President, I move to table the motion.

The motion to lay on the table was agreed to.

Mr. THURMOND. Mr. President, I wish to express my deep appreciation to the able majority leader for this resolution, and I also thank my distinguished colleague from South Carolina for his kind words, and the distinguished Democratic leader for his cooperation and the opportunity we have had to work together.

Mr. BYRD. I thank the distinguished President pro tempore.

EXPRESSION OF ADMIRATION FOR DISTINGUISHED CAREER OF SENATOR JOHN C. STENNIS

Mr. DOLE. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 290) expressing the Senate's admiration for the long and distinguished career of the Senator from Mississippi, the Honorable JOHN C. STENNIS.

The PRESIDING OFFICER. Is there objection to the presentation of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 290) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 290

Whereas, the Honorable John C. Stennis, of Mississippi, holds the honor of being the second longest-serving Senator in the history of the United States;

Whereas, the Honorable John C. Stennis, of Mississippi, has served ably and effectively as Chairman of the Armed Services Committee from 1969 to 1981;

Whereas, the Honorable John C. Stennis, of Mississippi, served on the Senate Aeronautic and Space Committee and had an integral part in moving the United States toward putting a man on the Moon and competing in interplanetary exploration;

Whereas, the Honorable John C. Stennis, of Mississippi, has shown great courage, strength, and dignity in the face of personal hardships and has been an inspiration to the Members of this Chamber and the public at large: Now, therefore, be it

Resolved, That the Senate now recognizes the long and notable career of the Honorable John C. Stennis in this Chamber, during which he has proved his reputation as a statesman of integrity and fairness and a gentleman of dignity and strength, and expresses its appreciation and gratitude for his long, faithful and outstanding service to the Country.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to table the motion.

The motion to lay on the table was agreed to.

PRINTING OF PUBLIC LAW 93-344 WITH THE RULES OF THE SENATE

Mr. BYRD. Mr. President, I ask unanimous consent that the Congressional Budget and Impoundment Control Act of 1974, Public Law 93-344, as amended, be printed as a Senate document together with the rules of the Senate, so that all these will be in one place, in one volume.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION OF APPOINTMENTS AFTER SINE DIE ADJOURNMENT

Mr. BYRD. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 291) authorizing the President of the Senate and the President of the Senate pro tem to make certain appointments after the sine die adjournment of the present session.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 291) was agreed to.

The resolution reads as follows:

Resolved, That notwithstanding the sine die adjournment of the present session of the Congress, the President of the Senate and the President of the Senate pro tempore be, and they are hereby, authorized to make appointments to commissions or committees authorized by law, by concurrent action of the two Houses, or by order of the Senate.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to table the motion.

The motion to lay on the table was agreed to.

APPOINTMENT OF MEMBERS TO THE NATIONAL GROUND WATER COMMISSION

Mr. DOLE. Mr. President, pursuant to Public Law 98-616, upon the recommendation of the Democratic leader, I appoint to be members of the National Ground Water Commission the following Senators: Senator MAX BAUCUS of Montana and Senator GEORGE MITCHELL of Maine.

COMMENDATION OF THE MAJORITY LEADER AND MAJORITY WHIP

Mr. THURMOND. Mr. President, I send to the desk a resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 292) commending the exemplary conduct of the distinguished majority leader and majority whip.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 292) was agreed to.

The resolution reads as follows:

Resolved, That the exemplary conduct of the distinguished Majority Leader, the Senator from Kansas, the Honorable Robert Dole, is deserving of the highest commendation of the Senate. The fair and just and able manner in which Senate business has been scheduled and managed is a source of pride to the Senate as a whole and the thanks of the Senate are hereby tendered to the Honorable Robert Dole, Majority Leader, United States Senate, and the majority whip, Senator Simpson for his able assistance.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to table the motion.

The motion to lay on the table was agreed to.

COMMENDATION OF THE MINORITY LEADER AND MINORITY WHIP

Mr. THURMOND. Mr. President, I send to the desk another resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 293) commending the extraordinarily cooperative conduct of the distinguished minority leader and the minority whip.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 293) was agreed to.

The resolution reads as follows:

S. RES. 293

Resolved, That the Senate extends its thanks to the distinguished Minority Leader, the Senator from West Virginia, the Honorable Robert C. Byrd. The extremely cooperative and able manner in which the Minority Leader has approached his duties as protector of the rights of the minority has been duly noted and the Senate commends the Minority Leader for his understanding, his devotion to the rules of the Senate, and for his outstanding leadership, and the minority whip, Senator Cranston, for his able assistance.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXPRESSION OF THANKS TO THE PRESIDENT PRO TEMPORE

Mr. BYRD. Mr. President, I wish to thank the distinguished President pro tem for his thoughtfulness in offering the resolution. And while I am on the floor, I also wish to thank him again for the extraordinary service that he performed during this past September upon the occasion of the visit of the Senate delegation to Moscow, where the delegation spent 3½ hours in discussions with the General Secretary, Mr. Gorbachev. I feel that the work of that delegation, indeed, helped to pave the way for the President at the subsequent summit, and also gave to the Senate a better understanding of the attitude of the new Soviet leader, and hopefully gave the Soviet leader an understanding of the attitudes of the U.S. Senate and the American people.

Mr. THURMOND. Mr. President, I wish to thank the ably Democratic leader for his kind remarks. We had a very fine trip to the Soviet Union. We gained insights. We spent 3½ hours with Mr. Gorbachev, and our delegation was ably led by the distinguished Democratic leader, Senator BYRD. He did a fine job on that trip. I think the information that we gained there and passed on to the President was very helpful to him.

Mr. BYRD. Mr. President, I think that the presence of the President pro tem of the U.S. Senate, Mr. THURMOND, added much to the stature of the delegation, and certainly helped in making an impression upon the General Secretary of the Soviet Union. I personally thank him.

APPRECIATION OF THE SENATE STAFF

Mr. THURMOND. Mr. President, I send another resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 294) tendering the thanks of the Senate to the Senate staff for the courteous, dignified and impartial manner in which they have assisted the deliberations of the Senate.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 294) was agreed to.

The resolution reads as follows:

S. RES. 294

Resolved, That the thanks of the Senate are hereby tendered to the Senate Sergeant at Arms, the Secretary of the Senate, the Secretary for the Majority, the Secretary for the Minority, and the floor staff of the two parties for the courteous, dignified, and impartial manner in which they have assisted the deliberations of the Senate during the first session of the Ninety-ninth Congress.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to table the resolution to reconsider.

The motion to lay on the table was agreed to.

ROBERT A. PECK

Mr. MOYNIHAN. Mr. President, this day I welcome and regret; welcome, because the business of the 1st session of the 99th Congress is at last over; regret, because it is the last day in which I will have Maj. Robert Peck near my side in the Senate.

Bob came to my staff 7 years ago, by way of the Yale Law School, the Loeb Fellows of Harvard University, the Green Berets, the National Endowment for the Arts, the Office of Management and Budget, and the White House. All necessary and perhaps even ample preparation for what he would face here in the Congress.

He was first my counsel to the Environment and Public Works Committee. There he served me and New York proudly and well; there he served our national heritage, as the chief staffer in the U.S. Senate concerned with the business of historic preservation and public buildings. The avenues of cities across this country are more beautiful, display their history more proudly, because Major Peck was here.

Two years ago, Bob became my administrative assistant, and he ran my office in the way I did not believe possible for the U.S. Senate: orderly, intelligently, and well.

I will miss him; I know that, and I know why. Others in the Senate, and across the Nation, will too; without appreciating why.

HARVESTING FEAR

Mr. GRASSLEY. Mr. President, we all are aware of the evil that is spread by various hate groups throughout the world, as well as in America. These groups exploit the fears and troubles of honest, well-meaning and innocent people who are struggling for answers for their problems. The hate groups transform these fears and anxieties into a violent energy that is directed upon easily distinguished groups, classes and races. History is littered with shameful, horrifying episodes resulting from this form of evil perpetrated by hate groups.

Therefore, Mr. President, you can understand my alarm and dismay to learn that a number of hate groups are working their way through my State of Iowa, exploiting the deep depression among rural communities and farm families. They are selling a simplistic, deadly answer that completely misses the reasons for Iowa's farm economy problems. They say that the farm economy is hurting because of an international Jewish conspiracy or because blacks and Jews are importing our former enemies—the Japanese, Chinese, and Vietnamese."

I have worked hard trying to explain to my colleagues in Washington the real causes for economic problems in rural America. It is true, farmers are hurt when their markets are destroyed by grain embargoes. They are hurt by trade policy that refuses to counter the unfair practices of foreign competitors. Farm markets are blasted when the U.S. Treasury Department allows the Customs Service to create loopholes to allow Brazilian ethanol into the United States without having to pay the legal tariff. Farmers are hurt by their spendthrift Congressmen and Senators who for years have let deficits pile higher and higher, helping to drive interest rates through the roof.

Farmers are hurt when OPEC drives the price of oil up, increasing the cost of the fertilizer and tractor fuel. Farmers are hurt by monetary policy that tries to restrict too severely the supply of money. Farmers are hurt by misguided consumer activists who scare Americans into thinking that our wholesome food supply causes diseases when in reality our scientists can't even come to a consensus. The nitrite fiasco and similar food scares cost Iowa pork producers billions of dollars. And this is only a fraction of the hurt caused by Federal policies.

Iowa's farm economy has not seen such turmoil since the Great Depression. People are desperate. They are struggling to make ends meet. They are distressed and angry, and they have a right to be. The only life they have ever known is crumbling before their eyes. It's no wonder they start believing the persuasive rhetoric of these hate groups. They want answers; but they must be given the truth, not lies.

So today I list the real causes for our farm problems to help Iowa farmers and small businessmen, as well as those throughout the country, recognize the propaganda fed to them by manipulative hate groups. If we lose our focus on the real sources of our problems then we lose all hope of ever recovering. We must resist the tempting, simplistic message offered by hate groups.

The conspiracies they tout are not the cause, and violence and hatred are not the answer. This is only poison to life in rural America and we must be aware of the damages that the purveyors of hate introduce to the heartland. We must speak out, just as responsible citizens and farm, church and government leaders have done.

We cannot remain silent while bigotry and hatred steal our hopes of recovery. They divert the much needed energy for positive solutions and divide communities and people who need so much to work together.

I am not ready to give up on Iowa's farm families and main street businesses. And I never intend to give up. I am going to continue to work hard at every possible opportunity to help improve our economy. Recovery is possible if we all work together. There is something, no matter how big or small, that everyone can do to make a positive contribution toward economic recovery in rural America. Let's not let unfounded conspiracy theories and hatred take that hope away from us.

THE PRIVILEGED ELITE THAT CONTROLS THE FOREIGN SERVICE

Mr. HELMS. Mr. President, it is evident to many of us in this body that there is a crisis in the career Foreign Service officer corps. That crisis is in part responsible for the difficulties which attended the passage of the FSO promotion list yesterday. The particular problem with that list, however, was only symptomatic of a broader problem which has been festering for some time.

That problem is whether the Foreign Service is a democratic institution, or whether it is controlled by an in-bred, self-serving clique that excludes the vast majority of Foreign Service officers from significant participation in decisions involving promotion, assignment, bonuses, and awards. There is disturbing evidence that such a clique exists, based upon social standing, family wealth, and personal connections—not only for advancing careers, but for protecting the careers of those among the elite group who falter.

It is ironic that the minority FSO elite, highly visible in the media and Government councils, likes to attack the few diplomatic appointments made from non-FSO ranks. The elite likes to complain that the Nation's diplomatic representation is somehow being compromised by the unprofessional conduct of supposedly amateur diplomats appointed from private life, rather than from the Foreign Service.

They like to portray non-FSO's who are appointed Ambassadors as purely political nominees who are appointed on the basis of wealth and social position, and not real competence. In contrast, we are told, the career officers corps is a group of especially talented individuals who are appointed and promoted solely on the basis of merit and proven performance. But there is evidence that what might be termed "the Ambassadorial Class" within the Foreign Service is open to the very criticism made against the outsiders.

MOST FSO'S ARE OUTSIDERS

Yes; Mr. President, the crisis is inside the Foreign Service. What the self-appointed spokesmen never point out is that the vast majority of members of the Foreign Service Corps are themselves outsiders when it comes to high level promotions, fat bonuses, and key posts. Appointments and promotions in the Foreign Service presumably are received for merit; but there is a pattern and practice in the Foreign Service which seems to ex-

clude hundreds, indeed thousands, of qualified and experienced Foreign Service officers from the principal positions of power, influence, and high remuneration in the State Department.

It is true that the Foreign Service Corps is selected by examination, and intended to be an elite group of exceptional merit. The real question is whether the promotion and posting of the officers actually proceeds on a true merit basis or whether the intention of the Foreign Service Act has been distorted by an "Old Boy and Old Girl" network constituting an elite within the elite. In other words, is the Foreign Service run by a clique that promotes, supports, and protects its members in preference to vast majority of members of the corps?

AN IVY LEAGUE RULE?

This question can perhaps be answered best by studying the most recent FSO promotion list that the State Department has sent us via the President. Of the nominees to the rank of career minister—a rank by the way that is higher both in salary and in protocol status than any other career office—71 percent were graduates of only three elite, highly expensive Ivy League universities—Princeton, Yale, and Harvard.

Similarly, the list of the most recent recipients of $20,000 cash bonuses from the State Departments has the same pattern. Five out of seven of those recipients were also graduates of the Ivy League universities—three from Harvard and one each from Dartmouth and Princeton. The recipients of the lesser awards showed a more democratic and representative distribution of undergraduate schools, with only one out of three being graduates of the Ivy League universities.

According to statistics provided to me by the State Department, of those who were certified for appointment between 1957 and 1962—the age group that is now holding the top jobs in the Department—only 6.4 percent attended Harvard and only 4.7 percent attended Princeton. But fully 29 percent of the career FSO's serving as Ambassadors attended those two schools.

Looking beyond Harvard and Princeton, we see that other statistics published by the Department of State show that 20 percent—a figure which is probably exaggerated—of the FSO's entering the corps between 1954 and 1960 were from all Ivy League schools combined. Yet 47 percent of career officers serving as Ambassadors in 1984 were graduates of those schools.

Roughly speaking, Ivy League undergraduates in the Foreign Service are two and a half times more likely to be selected as Ambassadors than their fellow junior officers who took the same rigorous written and oral examinations.

Now, of course, the Ivy League universities are considered to be very fine schools. Many of our colleagues here in the Senate are graduates of these schools. It is not my purpose to cast aspersions on these graduates. But not even graduates of the Ivy League schools would be so arrogant as to assert that only the sons and daughters of the Ivy League are qualified to serve in leadership positions in the U.S. Government.

Nevertheless, the imbalance in the distribution of top positions in the State Department suggests a situation akin to inbreeding and nepotism that is repugnant to our democratic institutions. The only other explanation would be the existence of a reverse quota system requiring a disproportionate representation for those belonging to the academic and social elite of the Eastern prestige universities. Is there some kind of unwritten Ivy League rule?

The discrimination applies not only to the competition for Ambassadorships, but to the competition for the important or more pleasant postings. For example, Ivy League graduates accounted for 67 percent of the Ambassadors in European assignments. This would be an extraordinary result to come about simply from the impartial siftings of promotion and placement panels.

THE MANAGEMENT HAMMERLOCK

In investigating this system, I was struck by the hammerlock hold that the Ivy League has on the management of the State Department. When the Under Secretary of State for Management, a Princeton man, gathers around him the six Assistant Secretaries or equivalents that comprise his top management team, only two persons in the room are not graduates of an Ivy League university.

And when the Under Secretary for Management takes their recommendations to the special secret committee of FSO's that selects their fellow FSO's for Ambassadorships, only one person in the entire room is not an Ivy League graduate. For a while earlier this year, the control of the top Foreign Service assignments at the State Department was in the following hierarchy:

The Under Secretary for Management, Princeton.

The Director General, Harvard.

The Director of Foreign Service Career Assignments, Princeton.

The Deputy Director of Foreign Service Career Assisgnments, Princeton.

It is fair, therefore, to ask: Was merit the only criterion in making their recommendations?

With that sort of personnel team in place, it is easier to understand the common impression that FSO's who went to Ivy League schools tend to do better in personnel assisgnments—and in the promotions which result from better assignments—than do FSO's who went to other schools.

If a newly appointed FSO is a graduate of Princeton, then the new FSO will be assigned as a Special Assistant to the Ambassador, or to an Assistant Secretary, or even to the Secretary, while his or her non-Ivy League colleagues are assigned the less visible, but important day-to-day work of the Department. It seems to many that—with rare exceptions—the graduates of other fine schools from the South, the Midwest, and the West are being assigned to the low visibility, perhaps deadend jobs in the consular or administrative sections, while the graduates of the Eastern elite colleges are placed on the fast track to the top of the Foreign Service.

How does this happen? The Congress has demanded from the State Department over the past three decades that it change to meet the new reality of this country. Congress has required that the real America—the America of 50 States where over 3,000 colleges and universities are educating the rising generations—be fully and equitably represented among the diplomats we send abroad to represent our country.

Apparently, pressure from Congress has resulted in an opening up of the recruitment process. But this change is only a change in the the career point at which the discrimination appears. The discrimination against those who do not have wealthy parents of the Eastern establishment bent still occurs. Now, rather than keeping out entirely the graduates of the great universities of North Carolina, or of any other State lacking the noble geographic criterion of easternliness, the gnomes of the State Department simply bring them in and then treat them as second class citizens.

ALL FSO'S CHOSEN BY EXAMINATION

Let me emphasize, Mr. President, that all Foreign Service officers are selected on the basis of a rigorous written and oral examination that, according to the State Department itself, selects only the best candidates to enter the Service.

Why, then, are the ultimate rewards of the system going overwhelmingly to such a small, self-selected and self-promoting clique? Should we rename the State Department "The Princeton Club of Foggy Bottom?"

With less than one out of four FSO's making Ambassador having attended the hundreds of fine non-Ivy League colleges and universities, perhaps it's time for real America to be represented overseas. It is time for the deserving and talented sons and daughters of American taxpayers to get a fair break in the State Department.

This is not only a question of discrimination in the public service

against American citizens who did not inherit their wealth or come from a well-to-do family; there are other discriminations inherent in the domination of a few private elite institutions over the State Department personnel system. If you are a graduate of one of these schools for the period up to the mid-1960's, an inquirer is already well informed about your sex, your race, and to a large extent your religion.

WAYS TO INDUCE REFORM

It should be our goal to open up the careers in the Foreign Service to citizens of all States and to talented individuals for all socioeconomic backgrounds and families. There are several ways to induce change in the Department of State and its inbred personnel system.

One way would be for the President to take advantage of the recent changes in the law that allow him to appoint as Chairman of the Board of the Foreign Service someone from outside the system. Such an individual could function outside of established cliques, and without implied or actual commitments to such cliques. Such a person could give a fair shake to all of the available talent within the Foreign Service. Certainly, there will be no reform if the ruling FSO cliques are allowed to sit in judgment upon themselves.

Another way to encourage reform would be to increase significantly the number of appointments of outside specialists to be Ambassadors, Assistant Secretaries, and Under Secretaries—men and women who do not represent this inbred elitist and undemocratic clique. We must not forget that there are career Foreign Service officers in the Department of Agriculture, and in Commerce, and in USIA who could contribute effectively as Ambassadors. As chairman of the Agriculture Committee, I am familiar with the work, in particular, of the agriculture attachés. Yet none of these have ever been chosen except for a very limited number of USIA officers—normally held to no more than two—who are chosen from time to time.

And of course, there are thousands of foreign policy specialists outside the Foreign Service—businessmen with experience in dealing with foreign countries, professors with particular expertise in foreign policy, and others form the various nonprofit groups involved in foreign policy and development activities—who are often better qualified than those in the Foreign Service who are being recommended to the President. To their failing, then, that they did not go to the right universities—an apparently unpardonable offense, whether caused by a youthful mistake in judgment or a lack of financial resources.

It is not too late, Mr. President, to reform the State Department to make it do its job of representing America overseas. What we have now, though, is not representative of our country's diversity nor, in fact, representative of the American social and political system. We are not an aristocracy, and we do not take well to those who aspire to the pretention of aristocrats.

Mr. President, the aristocrats of England have been forced, in most cases, to turn their mansions over to the public and to allow the public into the homes they inherited; perhaps it is time for the elitists at the State Department to turn the Department over to the American people.

JERUSALEM FELLOWSHIPS PROGRAM

Mr. MOYNIHAN. Mr. President, I am pleased to report that the Jerusalem Fellowships Program held its first reunion meeting on Monday, November 4, in New York City. The Jerusalem Fellowships Program brought over 100 North American college and graduate students to Israel this past summer. My distinguished colleague from Pennsylvania, ARLEN SPECTER, and I had the privilege of serving as honorary chairmen of the advisory committee that selected these fellowship recipients from over 1,000 worthy applicants.

The Jerusalem Fellows spent 6 weeks touring and studying in Israel. Their first night in Israel was celebrated with a gala private reception given by President and Mrs. Herzog at their Jerusalem residence. During the weeks that followed, they met individually with Prime Minister Shimon Peres, Defense Minister Yitzchak Rabin, former Defense Ministers Moshe Arens, Ariel Sharon, and Ezer Weizman, and half a dozen other leading Knesset members including former Israeli Army Chief of Staff Raphael Fitan; the first Israeli Ambassador to Egypt, Eliahu Elisear; Minister of Health Mordecai Gur; Deputy Foreign Minister Roni Milo; and Interior Minister Yitzchak Peretz. In almost every case, there was an opportunity for in-depth dialog with these individuals—an unprecedented opportunity for a study mission for college-age students to question Cabinet Ministers. In addition, the fellows met with Israeli citizens from every walk of life and from every group in that diverse society.

Eighty of the hundred Jerusalem Fellows had never been in Israel before. They had been selected on the basis of intellectual and leadership skills and I am confident that they will articulate the insights developed during this tour now that they have returned to their campuses throughout North America.

The Jerusalem Fellowships Program was sponsored by Aish HaTorah Yeshiva in Jerusalem, a unique educational institution headed by Rabbi Noach Weinberg, a leading contemporary Jewish philosopher and educator. The program's executive director was Rabbi Philip Shore. The chairman of the advisory committee is Richard Horowitz of Los Angeles, president of the North American Board of Governors of Eish HaTorah-Jerusalem. Members of the advisory committee who interviewed and selected the fellows and helped develop their itinerary include New York State Supreme Court Justice Miryan Altman; the chairman of the New York State Board of Regents, Martin Barrell; former U.S. Assistant Attorney General Alice Daniel; former chairman of the New York City Board of Higher Education, Dr. Harold Jacobs; New York attorney and communal leader, Lydia Kess; the president of Touro College, Dr. Bernard Lander; and a distinguished Member of the House of Representatives, Congressman HENRY A. WAXMAN of California.

It is obvious from the response to this summer's program that the Jerusalem fellowships has made a significant contribution toward furthering understanding of Israel among North American young people. I salute all who were involved in this magnificent project.

THE CONSTITUTIONAL CONVENTION ACT OF 1985

Mr. MOYNIHAN. Mr. President, last week, the Congress passed, and the President signed, our latest—and most ill founded—attempt to remedy the disastrous deficits given us by fiscal policies of the present administration. I am certain that few of us had in mind the Gramm-Rudman bill when we talk of Christmas folly, but that is what we have had this season.

I am not so certain that once the full implications of what we have done become clear, that the Congress will not revisit another, equally ill-conceived, idea to address the deficit: a constitutional writ requiring that every annual budget be balanced.

Such a requirement also could be imposed by a constitutional convention proposing such and its subsequent ratification by the States. To date, 32 State legislatures have called for a convention for proposing amendments, as provided for under article V of the Constitution, for just this purpose.

The earliest application on hand is from the State of Mississippi; it is more than a decade old, dated April 29, 1975. In all, 19 applications are more than 7 years old; 16 are more than 8 years old; and 4 are 10 years old or more.

(In case of fire, or other mishap, perhaps I should record that the 32 applications are stored in the third drawer of a black, four-drawer filing cabinet, in room S-221 of the Capitol, under

the supervision of the Secretary of the Senate.)

Of late, we go through the now annual exercise to see whether another two States will apply and so meet the required two-thirds of the States necessary to invoke such a convention. I make no prediction. For one thing, I do not know how long a legislature's application remains valid. Indefinitely? Article 5 is silent.

It is also important to note, Mr. President, that while these petitions for a constitutional convention nominally are part of a campaign to write a balanced budget amendment, article 5 speaks of "amendments"—plural—and there could be no containing such a convention should it take place.

We might well remember that the Philadelphia Convention assembled in 1787 because New York State was taxing firewood imported from Connecticut and other related matters. It went on to address the universe of concerns that comprise our way of government.

These are only two of the uncertainties surrounding the convening of a constitutional convention. The framers clearly believed that under certain circumstances, such a convention should have a place in our constitutional system. Unfortunately, they provided us little guidance as to what those circumstances might be.

Would it not be wise to try to address some of these matters, in a reasoned and dispassionate manner, before such answers become a political need of the moment. In this regard, I call my colleagues' attention to a bill reported by the Judiciary Committee on July 23 of this year, S. 40, the Constitutional Convention Act of 1985.

This bill provides that Congress shall call for a constitutional convention 8 months after at least two-thirds of the States have submitted, within a 7-year period, valid applications calling for a convention on the same subject. The bill also would bar the convention from proposing any amendment concerning matters different from those stated in the petitions and the concurrent resolution. S. 40 further would require the convention's presiding officer to submit any proposed amendment to Congress, which could disapprove of the amendment by concurrent resolution.

The Members of this body understand just how important are procedures in determining outcomes. Even if one disagrees with the provisions of S. 40, it is right to address the issues it raises. That is why we must consider carefully the question of how to amend the Constitution.

AFFIRMATIVE ACTION

Mr. CRANSTON. Mr. President, last week I outlined in some detail the deep concerns that I and many others in both parties, in the private sector, and in various Federal agencies, share over the future of Executive Order 11246, the 20-year-old Presidential directive mandating affirmative action efforts on the part of Federal contractors.

In my statement of December 9, 1985, at 35380 of the CONGRESSIONAL RECORD, I noted that the opposition to efforts led by the Attorney General of the United States, Edwin Meese III, to weaken critically the Executive order is bipartisan and increasingly broad in the U.S. Senate. At that time, almost two-thirds of this body had made clear such opposition. Now, 68 of my colleagues have expressed that view. I also note that our distinguished minority leader, Senator BYRD, has this last week written to the President urging that no revision to the Executive order be made.

At the end of my statement of last week, the text of a letter I coauthored to President Reagan with my good friend and colleague from California, Representative GUS HAWKINS, along with Representative JIM JEFFORDS, the chairman and the ranking minority member, respectively, of the House Committee on Education and Labor, expressing our deep concerns over the proposed amendments to the Executive order was printed in the RECORD. Our letter, dated September 17, 1985, strongly urged Mr. Reagan to take no action regarding the Executive order until there has been a full public review of any proposed changes, and an opportunity to assess their potential impact upon those who look to the Federal Government to preserve their equal employment opportunity rights. The text of two subsequent letters endorsing the statements and recommendations in the September 17 letter were also printed in the RECORD at that time.

I now request, Mr. President, that a third letter of endorsement, which has since been sent to the President, be printed in the RECORD at the conclusion of my remarks.

As I emphasized last week, the proposed revisions to the Executive order threaten to destroy the tools of progress responsible for providing to qualified minority and women workers employment opportunities that had historically been denied them. I deeply hope that the President will by rejecting these proposed revisions reaffirm the commitment of the Federal Government to ending employment discrimination.

The letter follows:

HON. RONALD W. REAGAN,
President of the United States,
Washington, DC

DEAR MR. PRESIDENT, we wish to express our support for the statements and recommendations in the letter of September 17, 1985, endorsed by 222 members of the House of Representatives and the United States Senate, strongly urging "that no action be taken on Executive Order 11246 until there has been a full public review of the proposal, and an opportunity to assess its potential impact upon those who look to the Federal Government to preserve their equal employment opportunity rights."

Sincerely,

RUSSELL B. LONG.
EDWARD ZORINSKY.
DALE BUMPERS.
GEORGE J. MITCHELL.
DAVID PRYOR.
HOWELL T. HEFLIN.

INDIANA GOODWILL AMBASSADORS

Mr. LUGAR. Mr. President, Karl Anderson, Wendy Golder, and David Large, from Frankfort Senior High School in Frankfort, IN have been invited to participate in a Youth Cultural Exchange Program in Hong Kong and the People's Republic of China in December and January. During this excursion they will run in a cross-country meet in Canton, People's Republic of China.

Programs such as this serve to improve understanding between youth in the United States and other countries. I am proud to have Karl, Wendy, and David representing the State of Indiana in their roles as goodwill ambassadors, and I want to wish each the best of luck in the cross-country meet.

AFGHANISTAN: IS IT GENOCIDE?

Mr. PROXMIRE. Mr. President, reports accusing the Soviet Union of committing genocide in Afghanistan have been circulating for some time. Now, a new United Nations report, prepared by Austrian parliamentarian and academic Felix Ermacora, entitled "Situation of Human Rights in Afghanistan," adds credence to these accusations. For the first time in the history of the United Nations, the General Assembly went on record, by a vote of 75 to 23, expressing its "profound concern" for Soviet conduct in Afghanistan well beyond what is ordinarily called human rights violations.

The Washington Post writes, "the word that comes to mind when one reads this report is genocide."

Mr. President, is the Soviet Union committing genocide in Afghanistan? This Senator would like to know.

Sadly, reports like Professor Ermacora's prove that genocide tendencies are not things of the past. These events continue to occur today. The gruesome details of murder, massacre, and mutilation remind of man's savagery and the need to prevent such human disasters from occurring in the future.

Ratification of the Genocide Convention will provide the United States with the legal authority we now lack to invoke the treaty's provisions and to call the Soviet Union to account for its behavior that is outlined in this

report. No other nation has the ability to stand up to the Soviet Union and demand accountability other than this superpower and we have a moral duty to do just that.

Mr. President, I ask unanimous consent that the editorial from the Washington Post be reprinted in the RECORD and urge my colleagues, after reviewing it, to join me in seeking prompt action to ratify this important human rights treaty.

[FROM THE WASHINGTON POST]

AFGHANISTAN: THIS IS GENOCIDE

"Human rights violations" is a phrase used so often and so casually that even the most compassionate among us can take it as routine. The quick meaning in most people's minds, we suspect, centers on police abuses, roughing and locking people up, perhaps killing some of them. Something like that is what you may expect to find in a new United Nations report entitled "Situation of Human Rights in Afghanistan."

But it's different. The second report on Afghanistan by Austrian parliamentarian and academic Felix Ermacora and a companion report on Iran mark the first time the United Nations had debated human rights in those countries on the basis of official U.N. reports. By a vote of 75 to 23 with 33 abstentions—India, lamentably, was the lone democracy holding Moscow's hand—the General Assembly registered its "profound concern." Afghanistan was singled out not just because a Third World Moslem country is the victim of aggression but also because of the terrible and deepening intensity of its ordeal.

Soviet troops with their Afghan clients have driven 4 million people out of the country and perhaps another 2 million out of their homes. Massively and indiscriminately, they bomb civilians—they bomb funerals. They destroy villages, crops and agricultural facilities. For the children, they drop cute, limb-shattering booby traps disguised as harmonicas and birds. Torture is "commonplace" and the operation of the judicial system "creates an atmosphere of insecurity and anguish." "There is apparently no health care for the majority of the population. As a consequence, the infant mortality rate has reached 300 and 400 per 1,000." Civilian deaths number "approximately 500,000."

When half the population is uprooted and a third driven into exile, when infant mortality reaches plague levels, when half a million civilians die and uncounted millions of others are maimed and malnourished, when, as Prof. Ermacora reports, the situation is getting worse, all this moves Soviet conduct well beyond what is ordinarily called "human rights violations." The word that comes to mind when one reads this report is genocide.

Soviets who talk about Afghanistan with foreigners sometimes solicit a certain sympathy for their policy dilemma and their costs. This is callous and arrogant. The people who deserve the sympathy are the Soviet Union's victims. Says a desperate Prof. Ermacora, "every hour lost is detrimental to the population"—the Afghan population. Moscow is committing one of the great crimes.

MYTH OF THE DAY: WOMEN SHOULD NOT BE REQUIRED TO REGISTER FOR THE DRAFT

Mr. PROXMIRE. Mr. President, the myth of the day is that women should not be required to register for the draft. Five years ago Congress chose to require only males to register with the selective service, thereby ignoring the clear military necessity of drawing on all available manpower resources in time of emergency. Now we are beginning to pay for allowing emotionalism to carry the day in the debate over registration. We are paying with military readiness.

Today's Army faces critical shortages in medical personnel. Reserve and National Guard units also face critical shortages of surgeons and nurses. In a military emergency, we would have no mechanism for inducting medical personnel to fill the shortage. The reason for this crisis in military readiness: 98 percent of nurses in the United States are women, and women cannot be registered for the draft.

The current policy of excluding women from draft registration is rooted in the combat exclusion policy. The logic of not registering women goes something like this: In a military emergency, demand is greatest for combat personnel; women cannot serve in combat, therefore they need not be registered for the draft.

Mr. President, this is faulty logic. We face manpower shortages in areas traditionally filled by women. In addition to drafting men for combat, we would have to draft and train additional men to serve in positions for which an already trained pool of female talent exists. Registering women to serve in noncombat positions which they are qualified for would be cost-effective, save training time, and release men for combat.

The policy of registering only men is also rooted in the misconception that general mobilization would require induction of equal numbers of men and women, thus impairing military readiness. This fear is unfounded. Congress retains the power to set requirements for conscription as well as define the exemptions for compulsory service. The Armed Forces have the authority to assign individuals according to his or her qualifications and the needs of the service.

A final great underlying fear remains regarding the impact of registering women for the draft. This fear is that registering women will send the wrong signal to the Soviets. Mr. President, it is far more likely that the Soviets, who require women to register for the draft, interpret U.S. reluctance to register women as a sign that the United States does not take womanpower seriously in times of emergency. Given our increasing reliance on women in the Armed Forces, we are sending the wrong signal to our allies and the Soviets about our confidence in the capability of our standing Armed Forces by not requiring women to register.

Mr. President, both the Soviets and our allies will recognize our commitment to a strong defense if we are willing and able to draw upon the outstanding talents and patriotic dedication of young men and women in times of crisis.

THE QUINTESSENTIAL ROLE OF THE STANDING CONSULTATIVE COMMISSION IN ARMS CONTROL

Mr. PROXMIRE. Mr. President, the Standing Consultative Commission can play a crucial role in making arms control agreements with the Soviet Union work. Why is the Standing Consultative Commission so crucial to arms control? And why should arms control be a prime reliance of the United States when we have to negotiate with a hostile and sometimes treacherous adversary? Is arms control our only option? How about it?

Should the United States forget about arms control and proceed ahead with an all-out effort to surpass and stay ahead of the Soviet Union in military capability? Should we rely on our superior economic strength, the far greater strength of our NATO allies compared to the Warsaw pact, and the sharply superior competence of United States and NATO scientific capability compared to the Soviet Union and the Warsaw pact? Or should we stop the arms race? Should we strive to negotiate arms control agreements with the Soviet Union that would end the enormous explosion of military spending on both sides? Which course is most likely to prevent the supreme catastrophe of a superpower war? What's the answer? The answer is that we have to continue to spend hundreds of billions each year on building military strength. Military strength is necessary. But it's not enough. An arms race will steadily increase hostility on both sides. And that's not all. It will impose an immense burden on our economy. It will bring us closer to war and bankruptcy so we also have to work far more effectively to negotiate arms control agreements that will win mutual compliance by both superpowers. Can we negotiate effective arms control agreements without negotiating from strength? No. We cannot. Can we afford to build a military force that will stay ahead of the Soviet Union without relying on any arms control agreement? No. In fact, no way. Arms control offers the one way we can increase our chances of preventing nuclear war without crushing our economy under an impossible burden of ever exploding military spending. Arms control also offers the

one basis of peaceful cooperation with our great potential adversary that can permit steady progress toward a reduction of the heavy burden of armaments. It can do more. Arms control can gradually build an increasing confidence in the compliance behavior of the adversary. Arms control can do this. But how? Here is the crucial question. If the Russians will cheat and violate arms control agreements, we obviously cannot and should not enter into them. Few Americans believe in unilateral disarmament. Certainly not this Senator.

For the United States to agree to an arms control treaty with the Soviet Union which the Soviet Union violates in a way that gives the Soviets a military advantage has precisely the same effect as unilateral disarmament. The agreement becomes worthless. The United States can become vulnerable. The Soviets may achieve a major, even a decisive military advantage. The cause of peace is not advanced. It is set back.

What does this mean? It means that compliance is absolutely quintessential to arms control. If the Soviet Union and the United States both comply with arms control treaties, arms control provides the way to greater national security, to a far greater chance of avoiding nuclear war and to a much lower burden of military spending. If the Soviet Union cheats the arms control agreement becomes a dangerous illusion that can undermine our national security. So how do we achieve compliance with arms control agreements? First, we must recognize that the strongest sanction for compliance with an arms control agreement with the Soviet Union is a recognition by both sides that the agreement is in the mutual interest of both countries. Second, both sides must also fully believe that the price of continuing the treaty is compliance. Both sides have to understand that the verification technology of the adversary will detect cheating. Both have to understand that the ultimate sanction against violation of the treaty is renunciation of the agreement. And both sides have to understand that the other side will renounce the treaty if it detects violations, confirms them, and is unable to persuade the other superpower to desist in its cheating.

So how do we resolve the violations or alleged violations that can bring a renunciation of the agreement? What is required? The first requirement is that both sides believe the agreement is in their national security interest. The second requirement is that both sides put their effective political power behind compliance with the treaty.

Third, both sides must develop reliable and effective verification technologies that can detect any cheating by the adversary. The fourth and final requirement is that the two parties create an agency manned by persons representing each super power with the authority to investigate alleged violations of the treaty. The United States and the Soviet Union created such an agency in 1972 in the Standing Consultative Commission or SCC. The SCC consists of 10 American members and 10 Soviet members. It has functioned in the 13 years since December of 1972 with varying success. Until 1981, it generally succeeded in either terminating violations or in allaying suspicions of violations. It has been less successful in the past 5 years. The reason for the early success and the later failure is instructive. Until 1981 both the Soviets and the United States referred allegations of violations of arms control treaties to the SCC. Both countries supported the findings of the SCC. In the past 5 years there have been much more frequent public allegations of cheating without attempting to secure compliance through the SCC. Nevertheless, even under these circumstances the SCC has served a useful purpose. It has permitted the exchange of information. It has provided a common ground for discussion of compliance behavior. But the SCC cannot enforce compliance with arms control agreements unless both superpower governments want to preserve the agreement sufficiently so they will respond constructively to charges of violations.

This Senator is convinced that the economic interests and the national security interests of both Russia and the United States can only be served in this nuclear world by arms control. Arms control requires compliance. Compliance requires a verification technology that can detect violations on either side. It also requires an investigative agency like the Standing Consultative Commission. The SCC must have the full support of both governments. If the SCC has that support, it can make the verification capability of both super powers not only a mutually respected instrument of detection, but an effective force to secure compliance.

Mr. President, the Air Force has published an extraordinary perceptive analysis of the Standing Consultative Commission in its December 4, 1985, Current News Special edition. That article was written by Sidney N. Graybeal who served as U.S. Commissioner at the Standing Consultative Commission from 1973 to 1977 and Michael Krepon, a senior associate at the Carnegie Endowment for International Peace and Director of its verification project. I ask unanimous consent that a copy of this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MAKING BETTER USE OF THE STANDING CONSULTATIVE COMMISSION

(By Sidney N. Graybeal and Michael Krepon)

Unresolved compliance problems have accumulated to the point where they have become a major impediment to the maintenance of existing agreements and the negotiation of new accords. While progress in compliance diplomacy has recently been made, major problems, such as the construction of the Krasnoyarsk radar, have not been satisfactorily resolved in the forum created by the strategic arms limitation talks [SALT] to address SALT compliance questions—the Standing Consultative Commission [SCC].

Like other negotiating bodies, the SCC has no powers of enforcement and it cannot impose sanctions; it can succeed only when the political leadership in the Soviet Union and the United States seek mutually satisfactory solutions. The SCC is a tool for Moscow and Washington to use as each sees fit. Its utility depends on effective use by both governments. Given proper instructions, high-level political support, problem-solving tactics, and sound bilateral relations, the Soviet and U.S. Commissioners can work together quite effectively. However, even the most efficacious tactics in the SCC will not bear fruit if either Commissioner is operating under unhelpful instructions, if the superpowers question each other's intentions toward past agreements, and if they do not wish to maintain the viability of those agreements.

it should therefore come as no surprise that, during the past five years, the SCC has fared no better than the general state of U.S.-Soviet relations. Nevertheless, both governments have taken care to keep the SCC channel open during periods of harsh public exchanges. Useful discussions on sensitive military subjects continued even after the Soviet Union walked out of negotiations on strategic and intermediate-range nuclear forces in 1983.

Despite its importance, very little is known about the SCC, and many misconceptions have arisen about its activities. The object of this essay is to explain the nature of the SCC and to suggest steps to improve the utility and effectiveness of its operations.

THE SCC'S MANDATE AND OPERATIONS

No arms control agreement can be written so carefully and so clearly as to prevent ambiguities and compliance questions from arising. In some instances, parties to an agreement may not wish or may not be able to arrive at precise treaty language. They may have different interpretations of their obligations under an agreement, or new military technologies may create circumstances that were not anticipated during negotiations.

Early in the SALT I negotiations, both sides recognized the need for a private forum to implement treaty provisions and to deal with ambiguities and compliance questions. As a result, there were few difficulties in drafting Article XIII of the ABM Treaty creating the SCC. The ABM Treaty, and thus the SCC, are of indefinite duration. A Memorandum of Understanding formally establishing the SCC in December 1972 extended its jurisdiction to include the Accidents Measures Agreement signed the previous year, and regulations governing the

Footnotes at end of article.

SCC's operations were drawn up the following May.

The SCC's charter, as spelled out in both the ABM and SALT II treaties, is quite broad. It empowers representatives of the U.S. and the Soviet Union to consider, among other topics, treaty compliance questions and "related situations," questions involving interference with national technical means of verification, "possible changes in the strategic situation which have a bearing" on treaty provisions, additional measures to increase the viability of existing agreements including amendments to treaty provisions, and proposals for "further limiting strategic arms." In addition, the SCC Commissioners are authorized to exchange relevant information and to draw up procedures for dismantling or destroying offensive and defensive weapon systems.[1]

The Memorandum of Understanding establishing the SCC clarifies basic organizational matters while leaving considerable discretion to the two delegations on how the SCC shall actually operate. Each side is represented by a Commissioner, a Deputy Commissioner, an Executive Officer, and members of the delegation. Commission meetings are held no less than two times per year, and may also be convened "as soon as possible, following reasonable notice, at the request of either Commissioner." The SCC makes its own regulations, and may amend them "as it deems appropriate."[2]

In current practice, the U.S. Commissioner is chosen by the unanimous recommendation of the President's National Security Adviser, the Secretaries of State and Defense, Chairman of the Joint Chiefs of Staff, Director of Central Intelligence, and Director of the Arms Control and Disarmament Agency. Since the Commissioner is granted the title of ambassador, the Senate also passes judgment on the nomination. Sessions are usually held in Geneva during the spring and fall, each session generally lasting two months in length. Special sessions can be held at any time.

While the charter of the SCC enables it to conduct negotiations and arrive at new arms control agreements, to date neither side has chosen to operate in this fashion. New areas of negotiation generate their own negotiating teams and acronyms. Nor have the two sides used the SCC to amend agreements under its jurisdiction. The SCC has concerned itself primarily with implementation and compliance questions for the SALT accords.

Implementation, of course, can be a form of negotiation, but the SCC delegations usually operate within a narrower framework than their colleagues who actually draft provisions. The primary responsibility of the SCC delegations is to make sure that basic objectives and purposes of existing agreements within their jurisdiction are being met properly. The SCC delegations are not free agents in carrying out their responsibilities. Like other negotiating agents, SCC Commissioners are on a tight rein from their capitals. Neither side is empowered to establish government policy or to go off and solve problems on its own. SCC delegations, no less than delegations negotiating new agreements, operate under carefully drafted instructions coordinated—sometimes with considerable dispute—among the relevant government agencies.

When friction within the executive branch is pronounced, instructions tend to become increasingly rigid. If, for example, government agencies can not agree on a proposed course of action, the U.S. Commissioner at the SCC is not free to suggest one to his Soviet counterpart. What flexibility the U.S. Commisisoner has relates to his choice of tactics to implement negotiating instructions.

THE SOVIET PERSPECTIVE

The Kremlin views the SCC as an important channel of government-to-government communication. Its high level of regard for the SCC has been reflected by the quality of representation on the Soviet delegation. The Soviet Union has had two Commissioners during the entire existence of the SCC, both military officers from the General Staff—General-Majors G.I. Ustinov and Viktor P. Starodubov. Neither man has been accorded the rank of Ambassador (perhaps because of their military backgrounds) although both made it clear that they were spokesmen for the U.S.S.R., like other representatives of the Soviet government abroad.

Starodubov, the Commissioner since 1979, is an adept and highly accomplished negotiator who has also served on Soviet delegations in the SALT, START, and prior SCC negotiations. The Deputy Commissioner has always come from the Ministry of Foreign Affairs. The head of the Soviet delegation in the current Geneva talks, Viktor P. Karpov, served as Deputy Commissioner for six years, followed by Vadim S. Chulitsky in 1979. The Kremlin expects issues that fall within the purview of the SCC to be raised in this forum and not elsewhere. It clearly prefers to work within the confines of the SCC rather than to engage officials with higher rank who are less suited to the tasks at hand. The Soviet Commissioner must, of course, receive authorization to proceed from Moscow, but once authorization is received, the Soviet delegation has demonstrated its willingness to have constructive exchange and to resolve compliance questions expeditiously.

AMERICAN PERSPECTIVES ON SOVIET COMPLIANCE AND THE SCC

In contrast to the official Soviet view, American attitudes toward the SCC vary greatly, usually according to one's view of the value of arms control agreements with the Soviet Union. With experts so sharply divided on this fundamental question and with the SCC operating as a closed shop, it is difficult for even interested citizens to reach an informed judgment on the SCC's effectiveness or utility. Subjective judgments come into play on both sides of these issues, with the SCC caught in the cross fire.

The Nixon, Ford, and Carter administrations were supportive of the SCC's activities and did not denigrate its effectiveness. All three Presidents declined to assert Soviet violations in their assessments of issues reviewed in the SCC during their tenure.

For example, Secretary of Defense James Schlesinger testified before the Senate Armed Services Committee in March 1975 that "We believe that the Soviet Union has been, and today is, in compliance with the terms of the SALT agreements." Schlesinger characterized problems then the subject of considerable controversy as "ambiguities which needed to be resolved," not as violations.[3] President Gerald Ford affirmed this judgement in a June 25, 1975 press conference.[4] The Carter Administration's report—issued in the context of defending the SALT II Treaty—asserted that "in every case (of a questionable practice raised by the U.S. in the SCC) the activity has ceased, or subsequent information has clarified the situation and allayed our concern."[5] SALT critics, such as Assistant Secretary of Defense Richard N. Perle, have taken a diametrically opposed view:

I have put emphasis on the failure of the SCC to resolve compliance concerns because previous Administrations, in efforts to sell unverifiable arms control agreements to Congress, have created a virtual mythology about it. The fact of the matter is that serious compliance problems have generally not been resolved by the SCC or in any other manner.[6]

Confusion about the role of the SCC is compounded by widely varying lists of Soviet "violations and circumventions" of past agreement. For example, the State Department's 1978 assessment of compliance questions and the Arms Control and Disarmament Agency's 1984 General Advisory Committee [GAC] Report cover four common SALT compliance issues, arriving at different judgments on every one of them. By the GAC's definition of what constitutes "material breaches" of binding arms control obligations, the Soviets cheated, and the SCC failed to resolve these problems. By the State Department's assessment in 1978, no material breaches took place, and the SCC played a positive role.[7]

A SALT I compliance question relating to what constituted permissible modernization of existing ICBM launchers provides a case study of how compliance judgments vary. During the SALT I negotiations, the U.S. attempted to constrain new Soviet "heavy" ICBMs by suggesting limits on missile throw-weight and volume to which the Soviet Union would not agree. Both sides eventually agreed to an imprecise formula on silo dimensions, which the U.S. hoped to strengthen by means of a unilateral statement using a volume constraint to distinguish between "light" and "heavy" ICBMs. The Soviets proceeded to disregard this interpretation by replacing SS-11 missiles with larger and far more capable SS-19s—as they had indicated they would do in the course of negotiations.

The Ford Administration did not characterize this Soviet activity as cheating. As Secretary of Defense Schlesinger testified, "If one reads the words of the agreement, the Soviets are doing something that is not precluded. It is inconsistent, quite clearly, I think, with our understanding of our own unilateral statement. But the Soviets do not feel bound by that unilateral statement."[8] The Carter Administration provided a similar explanation in its 1978 report. The GAC, however, cited the deployment of SS-19s as a "circumvention defeating the stated U.S. object and purpose of limiting the throw-weight of Soviet ICBMs."[9] According to the GAC's analysis, the U.S. intention behind the disputed provision was clear—to limit the growth of ICBM throw-weight—as was the Soviet circumvention.

THE RESULTS OF THE SCC'S WORK

The detailed records of SCC sessions remain closed to all but those with the proper clearances and the "need to know." These sensitive deliberations, along with other arms control negotiations, have been quite properly fenced off from public view. No American President, including Woodrow Wilson, has seen fit to pursue open covenants publicly arrived at. Unlike arms control negotiations, however, the principle of privacy also extends to the products of the SCC's deliberations.

A primary responsibility of the SCC has been to establish procedures for the destruc-

tion or dismantlement of certain strategic forces. Two Protocols on Procedures were agreed upon in the SCC in June 1974 governing the SALT I Interim Agreement and the ABM Treaty. A third Protocol was agreed upon in October 1976, relating to the ABM Treaty's Protocol that reduced permitted ABM sites from two to one per side.

For the most part, these classified procedures have not generated criticism, although the Reagan Administration's February 1985 noncompliance report expresses concern that the Soviets may not comply with the Interim Agreement's implementing procedures in the future.[10] In the past, these procedures prompted a compliance flap over the dismantlement of Soviet land-based missile launchers to compensate for the introduction of new sea-based launchers. In 1976, it became clear to American analysts that the Soviet Union was not going to meet this requirement. According to the 1984 GAC Report, this constituted a violation of the SALT I Interim Agreement: "Upon U.S. Inquiry, the Soviets admitted this excess, but failed to accelerate their dismantling activities." The GAC concluded that "the violation was probably not inadvertent, but rather was part of a deliberate Soviet effort to challenge U.S. arms control verification capabilities." [11]

In contrast, the 1978 State Department Report on SALT I compliance issues found that Soviet actions did not warrant the GAC's conclusions:

. . . the United States decided to raise this question with the Soviets, but before we could do so, * * * the Soviet side in the SCC acknowledged that the dismantling of 41 older ICBM launchers had not been completed in the required time period. The Soviet side explained the situation and predicted that all the dismantling actions would be completed by June 1, 1976, and agreed to the U.S. demand that no more submarines with replacement SLBM launchers begin sea trials before such completion. Both conditions were met.[12]

A fourth classified protocol worked out in the SCC implements the Accident Measures Agreement. This understanding, which was updated and expanded in June 1985, facilitates and speeds the transmission of information by means of pre-positioned messages.

Another product of SCC deliberations is known as the Agreed Statement of 1978. It was prompted by a controversial Soviet practice that may have involved testing of a Soviet air-defense system radar in an ABM mode. The ABM Treaty stipulates that parties to the agreement are not to give radars other than ABM radars the capability to counter strategic ballistic missiles or their elements in flight trajectory and not to test them in an ABM mode. However, the U.S. delegation issued a unilateral statement in the SALT I negotiations that radars used for range safety or instrumentation would be permitted.

Intermittent Soviet tests of an SA-5 radar during 1973 and 1974 eventually prompted the United States to raise this issue in the SCC in February 1975. Secretary of State Henry Kissinger explained the time lapse as due partly to the necessity to protect sources and methods of intelligence but primarily to the need to have a clear picture of Soviet practices:

The first information about any event is usually extraordinarily illusive and ambiguous, and one part of the process of the government is to refine the information until we reach a point at which senior officials can make a reasonable decision. I believe it is a good working hypothesis to assume that government is not run by conspiracy but by serious people trying to come to serious conclusions about difficult topics, especially when the charge of a violation of a formal agreement is not a minor matter to be introduced into the diplomatic discourse.[13]

According to Kissinger, seventeen days after the U.S. raised the issue at the SCC, this activity stopped, and was not resumed.[14] The SCC's 1978 Agreed Statement clarified treaty obligations regarding the use of radars in an ABM mode as well as for range safety and instrumentation purposes.[15] These obligations were further clarified in June 1985.

Supporters of the SCC cite the SA-5 radar case and the 1978 Agreed Statement as an example of the Commission's working effectively to maintain the viability of the ABM Treaty and to clarify the meaning of its provisions. President Ford and Carter did not consider Soviet SA-5 radar tests to be a violation of the ABM Treaty. Nor did the GAC Report include this episode in its bill of particulars listing seventeen "material breaches." In contrast, a number of severe critics of the ABM Treaty have concluded that Soviet SA-5 radar tests constituted a clear-cut violation of the ABM Treaty. In Richard Perle's view, "I don't think you have to be a genius to conclude they were cheating. The Standing Consultative Commission never came to that conclusion and they never would have because of their desire not to face the realities." [16]

SCC Performance Standards

The purpose of this essay is not to arbitrate the validity of contending judgments of Soviet noncompliance, but to suggest ways in which compliance questions can be handled more effectively. For those most skeptical of arms control agreements and Soviet intentions toward them, the SCC's ineffectiveness is beyond repair. For those who are more positive about the role of arms control agreements and the SCC to advance national security, there are at least two important standards to apply when gauging the SCC's effectiveness. First, the proper functioning of the SCC should result in common interpretations of binding obligations where there are none or where both sides interpret these obligations differently.

An arms control agreement, like the American Constitution, is a living document. It requires constant interpretation in order to remain viable under unforeseen circumstances or to meet unanticipated events. This is particularly true with respect to agreements governing weapon systems in fields of rapid technological advance. The Soviet Union compounds these problems by exploiting grey areas when opportunities arise.

Both sides should be playing by the same rules; otherwise, existing agreements and support for them in the United States will continually be undermined. If both sides wish to reaffirm their obligations under existing agreements and if both sides use the SCC properly, there is every reason to expect the Commissioners to be able to hammer out agreements that resolve questionable activities and establish ground rules under which both sides may operate.

Second, the public has a right to expect that common understandings reached in the SCC should clearly affirm the basic objectives and purposes of the agreement in question. In practical terms, these remedies will vary depending on the circumstances in each case. In some instances, a return to the status quo ante might be called for; in others, a complete cessation of the practice in question might be necessary; in still others, the imposition of new barriers—such as verifiable limitations on developmental and operational test practices—might preclude military advantages deriving from troubling Soviet behavior.

In the much discussed case of the SA-5 radar, for example, as soon as the evidence suggested the need for action, the SCC succeeded in bounding the problem by prompting the cessation of concurrent testing, and later by securing common understandings on permissible uses of radars in conjunction with ABM tests and for range safety and instrumentation purposes. Critics have argued that, in the time it took to raise this issue in the SCC, the Soviets could have gained the knowledge needed to give the SA-5 system an ABM capability.

This critique overlooks two important considerations. First, whatever the Soviets may have accomplished with the SA-5 radar in question, there have been no reports in the press that the SA-5 system (i.e., its radar, interceptor missile, and launcher) has been tested against any target in an ABM mode. Second, if there had been serious concern about an upgraded SA-5 system possessing a significant ABM capability, one would wonder why more resources were not devoted at the time to penetration aids for U.S. strategic ballistic missiles.

As in the case of the SA-5 radar, damage assessments and proposed SCC remedies for Soviet testing at the margins will undoubtedly vary from one observer to the next. Thus, the professional judgment of senior military officers and national security officials will be critical to an administration's selection of appropriate countermeasures, within the SCC and elsewhere.

Improving the SCC

Improvements in the SCC's operations do not require changes in the Commission's charter and regulations. These provisions are broadly drawn to provide both sides the latitude to work constructively. Since the Commission's modus operandi will always vary somewhat due to the style and personality of its Commissioners, there is no single correct way to proceed in the SCC. Numerous roads can lead to success when both parties wish to maintain the viability of existing agreements. Conversely, when each side questions the other's intentions, even brilliant tactical decisions are unlikely to produce satisfactory results.

One way to improve the utility and effectiveness of the SCC is to clarify to whom the U.S. Commissioner reports in Washington. The SCC is a bureaucratic oddity: it was created by a treaty, not by an Act of Congress. The Commissioner's role was established by the SCC's charter. He is nominated by the unanimous consent of many different bureaucracies; therefore, he has no single patron. The nature of his responsibilities as well as the interagency character of his appointment suggests that the Commissioner report directly to the President's National Security Adviser. If other responsibilities do not require the U.S. Commissoner's presence elsewhere, his office should be located with the National Security Council [NSC] staff.

The NSC's authority is critical to minimize the lengthy delays and confusion that invariably result from deep or enduring interagency disputes over the Commissioner's instructions. A direct link to the NSC would also ensure better coordination be-

tween the SCC's work and ongoing negotiations. Interested agencies would continue, as at present. to play a central role in SCC activities by participating in the formulation of the Commissioner's instructions and by being represented on the SCC delegation.

In addition, the utility and effectiveness of the SCC can be further advanced by the following list of "do's" and "don'ts."

STAY IN THE SCC CHANNEL; LOOK FOR REINFORCEMENT, NOT ESCALATION

Compliance questions should be raised first at the SCC, not at higher levels or in other forums. The SCC is best suited to address SALT compliance questions, and the Soviets can work constructively in this arena. The U.S. does not need to raise issues in back channels in order for the Kremlin to see that the U.S. government attaches extraordinary importance to those issues, since the Soviet government already attaches considerable importance to the SCC's operations. Nor would the U.S. wish to imply that issues raised first in the SCC channel are relatively unimportant.

A different set of problems can arise if issues first raised at the SCC are escalated to higher levels for resolution. These tactics can undermine the effectiveness of the SCC, occupy officials who have less time and technical expertise than the SCC staff, and result in a hardening of positions, making ultimate resolution more difficult. The flexibility of the SCC to resolve these issues is then impaired if and when de-escalation occurs.

A far better approach for the U.S. is to look for reinforcement at higher levels if problems or delays are encountered in the SCC. Private interventions by cabinet-level officials or even by the President should underline the importance the U.S. places on a satisfactory resolution, while keeping the problem within the channel best suited to resolve it.

Whenever possible, the Soviet Commissioner should be advised by his counterpart in advance of the session when a new compliance question will be raised. There is little to be gained by "surprising" the Soviets and monitoring their reactions since the Soviet delegation will have to report back to Moscow anyway and then wait for instructions. Advance notification can save time and facilitate constructive exchanges.

AVOID USING THE SCC AS A DUMPING GROUND FOR PROBLEMS THAT CAN NOT BE RESOLVED IN NEGOTIATIONS

Compliance questions will arise even when treaty partners are acting on their best behavior. Unforeseen events and technological change will generate these questions even if the practice of Soviet crowding at the margins does not. In other words, the SCC will have enough to do without becoming the depository of disputes that could not be solved in the course of treaty negotiations. Treaty texts should be as precise as possible. Where agreement can not be reached, the American Congress and public should be so advised, and Soviet deviations from the preferred U.S. interpretation should not be characterized as violations.

WHENEVER POSSIBLE, USE THE U.S. SCC DELEGATION'S EXPERTISE TO HELP AVOID TREATY LANGUAGE THAT CAN GENERATE COMPLIANCE QUESTIONS

The Soviet delegation in strategic arms control negotiations usually includes either its SCC Commissioner or his Deputy. In contrast, the American SCC delegation does not normally have the opportunity to comment on the drafting of treaty texts. The Soviet practice makes far more sense than the American system of not utilizing the expertise the U.S. has at its disposal.

The SCC Commissioner can review draft treaty texts from a unique perspective. Unlike other members of the U.S. delegation, he has had operational experience in compliance controversies that ensue from various treaty formulations. As such, the U.S. Commissioner is in a position to provide helpful suggestions to avoid potential ambiguities and compliance problems.

AVOID RAISING ISSUES IN THE SCC UNTIL THE U.S. HAS ITS FACTS STRAIGHT, AND AVOID CHARACTERIZING PROBLEMS AS VIOLATIONS UNTIL THE SCC CHANNEL HAS BEEN THOROUGHLY EXPLORED

Sometimes the collection of adequate evidence requres a maddening length of time. Once enough facts are known and can be utilized without jeopardizing sensitive intelligence "sources and methods," the issue should be raised promptly and pursued vigorously in the SCC channel. The Soviets like the U.S., will respond one way to the presentation of questions concerning compliance and another to the receipt of a bill of particulars asserting noncompliance or "violations." Once the U.S. government frames an issue as a possible, potential, or clear violation, the Kremlin will be reluctant to take positive steps that might be construed as affirmaiton of these charges. On the other hand, the Kremlin has had little difficulty explaining whatever action it takes to its own people. The choices Kremlin leaders make will hinge on their calculation of the benefits derived from the activity in question and the risks of not taking positive steps to respond to U.S. concerns. These calculations will in turn bear directly on Soviet assessments of U.S. intentions toward existing agreements and motives for raising the issue in a particular manner.

Precisely for these reasons the context of public assessments by government authorities on Soviet noncompliance is of central importance. As will be discussed below, official reports of SCC-related activities are at this point inescapable; they can also be helpful, but only if they meet far more stringent standards than those applied by individuals with political axes to grind.

The content of noncompliance reports will have much to do with Soviet reactions in the SCC and elsewhere. The Kremlin will read into premature or overstated reports an intent to set the stage for eventual withdrawal from existing agreements, rather than to contain domestic political damage and to shore up the erosion of previous agreements.

CATEGORIZE COMPLIANCE QUESTIONS WITHIN THE SCC AS TO THEIR DEGREE OF IMPORTANCE

Some compliance questions will always raise more serious concerns than others, and thus merit focused attention. Every compliance question, regardless of its military significance, should be raised in the SCC, but the Soviet side should be made aware of the relative importance the U.S. attaches to various issues. The SCC regulations expressly permit the establishment of working groups. This device can enable the Commissioners to concentrate on issues of greater importance while allowing working groups to address subsidiary questions. If technical questions can not be resolved at the working group level, they can be addressed by the Commissioners in the usual fashion, and reinforced by higher authorities as deemed appropriate.

AVOID LINKING THE RESOLUTION OF UNRELATED COMPLIANCE QUESTIONS

As former SCC Commissioner Robert W. Buchheim and Dan Caldwell have noted, "horse-trading" is a common practice in negotiating new agreements. It may also be a useful device for amending agreements. But in implementing existing agreements, very little horse-trading is desirable.[17] Sometimes linking unrelated issues may work out satisfactorily, but other times it may not. A far better approach is to address each compliance question on its merits. By adopting this standard, each side will better serve its self-interest, and the SCC will work more effectively as a result.

For the same reason, the Soviets work against themselves when they adopt a "scorecard" approach to compliance questions: whenever the U.S. raises a compliance issue, they raise a comparable issue. In private exchanges in the SCC, this tactic has little bearing on the outcome of deliberations since both sides can usually distinguish between real and cosmetic concerns. In public accusations of noncompliance, this Soviet tactic obfuscates somewhat the Reagan Administration's charges, but it also devalues the Kremlin's position on those issues about which it feels strongly.

U.S. AND SOVIET COMPLIANCE CONCERNS MAY USEFULLY BE LINKED WHEN THEY RELATE TO THE SAME OBJECTIVE OR PURPOSE OF AN AGREEMENT

When comparable Soviet allegations of U.S. noncompliance reflect serious concerns on their part, it makes sense to link the resolution of them with U.S. concerns. It will not be possible to isolate common problems in any event.

For example, both sides have raised ABM Treaty compliance issues relating to the construction of modern large phased-array radars. Each side has a common concern that these radars can undermine the objective and purpose of Article I prohibiting the parties from providing a base for a territorial defense.

Each side has also expressed concerns about the other's development of futuristic technologies that might be applicable for ballistic missile defense. Article V of the ABM Treaty prohibits each party from developing or testing ABM systems or components that are sea-based, air-based, space-based, or mobile land-based (i.e., all mobile systems). This prohibition applies to both conventional and future ABM systems or components (i.e., systems based on other physical principles). Agreed Statement D requires amendments to the treaty to accommodate the deployment of ABM systems or components based on other physical principles. However, both sides can pursue these objectives while stipulating that their development and test programs constitute less than a complete substitute for traditional ABM components—thereby making them permissible under the treaty. Test practices of this sort can raise continuous compliance questions. Unless ground rules are established governing these tests, they could undermine the objective and purpose of Article V.

In these and similar cases, common problems relating to the same treaty provisions might usefully be addressed together in the SCC. If both sides wish to reverse the erosion of the ABM Treaty, new common understandings and agreements will become necessary governing the development and testing of certain advanced technologies with direct ABM applications. Common un-

51-059 O-87-34 (Pt. 27)

derstandings and agreements will also be necessary for modern large phased-array radars.

RELEASE MORE INFORMATION ABOUT THE SCC'S ACTIVITIES AND PRODUCTS

The regulations establishing the SCC contain the stipulation that the Commission's proceedings shall be conducted in private and should not be made public "except with the express consent of both Commissioners." This provision has been adhered to by both sides, and is still valid today. SCC deliberations must remain confidential if this forum is to produce diplomatic remedies. American Commissioners have repeatedly stressed, however, that neither the U.S. nor Soviet Commissioner has a veto power over his government. In a democratic society, American Presidents have a responsibility to inform the public and the Congress of the SCC's activities in some way. While the proceedings have remained private, limited summaries of certain SCC deliberations have been released in the past.

At the start of the SCC's operations, a strict policy of secrecy was probably wise. The Soviets were unsure of the utility of this forum and wary of confidential exchanges on sensitive subjects. At this point, however, popular misconceptions about the role and record of the SCC as well as public concern over unresolved compliance problems have reached the point at which constructive factual public reports would be useful.

Reports would be constructive if they are offered in the context of problem-solving efforts in the SCC and serious negotiations to conclude new agreements. If government reports follow thorough efforts to resolve satisfactorily compliance questions in the SCC—including the use of reinforcements when necessary—and if those reports characterize compliance problems judiciously, their publication need not impair the SCC's activities. If, on the other hand, government verdicts of noncompliance are premature or based on ambiguous evidence, U.S. intentions will be widely questioned, cases where evidence is strong of Soviet misconduct will be devalued, and the SCC's ability to resolve issues will be impaired.

At this point in time, annual government reports summarizing the Soviet record of compliance should be released to the public, after the U.S. advises the Soviet Union of its intention to do so. More detailed classified versions should be transmitted to the relevant Congressional committees. These reports should indicate where the record of Soviet compliance has been good as well as where it has been problematic. The relative significance of issues raised in the SCC should be noted, and summaries of the SCC's handling of each issue should be provided. The proceedings of SCC sessions should remain classified, thus maintaining the principle of confidentiality. These reports should be prepared and transmitted to the Congress by the President's National Security Adviser, with the assistance of the U.S. Commissioner and coordination by the usual interagency process. Annual reports of this kind could defuse speculation over the purposes behind public disclosure and substitute for ad hoc compliance reporting requirements levied by the Congress.

In some cases, the public release of new SCC common understandings or agreed statements would be unwise. The products of SCC deliberations that involve sensitive weapon system characteristics, operations, and performance—such as approved dismantling or destruction procedures—should remain classified since they could raise security problems and impair fruitful private communication on other sensitive issues. However, unclassified summaries of these understandings that do not divulge sensitive information could be released. The contents of pre-positioned messages associated with the Accident Measures Agreement should also remain secret since they could be misused and pose security problems.

On the other hand, the fruits of the SCC's labors clarifying the objectives and purposes of existing agreements should be unclassified. For example, the 1978 Agreed Statement apparently does not involve any sensitive information and provides essential meaning to ABM Treaty provisions governing tests "in an ABM mode" and the uses of air-defense radars at test ranges. Anyone attempting to interpret properly treaty obligations in these areas should have access to the SCC's 1978 Agreed Statement. Similar clarifications worked out in the future should be available in their entirety to the Congress and the public.

CONCLUSION

The Standing Consultative Commission is an indispensable channel of communication between the superpowers over SALT implementation and compliance. Other channels could be used for these purposes, but none would be as ideally suited, unencumbered, or specifically authorized to do so. If something like the SCC did not exist, it would have to be created; if it falls into disrepair, existing strategic arms control agreements with the Soviet Union will be jeopardized.

Public reports of the SCC's activities and the other suggestions offered here can help the SCC delegations carry out their responsibilities for existing agreements. No suggestions will be of much value, however, if the U.S. and the Soviet Union are ambivalent about affirming the objectives and purposes of past agreements. During periods of strained political relations, negotiations over new agreements rarely proceed smoothly. While the SCC is somewhat more insulated from the ups and downs of superpower relations, it has not been immune from them. But when political relations between negotiating partners deteriorate to the point where intentions toward existing treaty obligations are called into question, the SCC cannot be an effective, problem-solving forum. If and when bilateral relations improve and both superpowers clearly signal their desire to reaffirm existing SALT commitments, the SCC can again resolve difficult compliance problems.

U.S. JUJITSU TEAM WINNER

Mr. BYRD. Mr. President, on November 2, 1985, the U.S. jujitsu team won the 1985 world karate jujitsu championships that were held in Trinidad. This is the first time that this world title has been won by the United States. On the way to gaining this world title, members of the team collected 11 trophies and medals.

The head coach and team physician for the U.S. team is Dr. L. Bruce Holbrook, a West Virginian. The following is a list of those members that make up the U.S. team and the results of the competition.

Mr. President, I congratulate the U.S. jujitsu team on winning the 1985 world karate jujitsu championship.

There being no objection, the listing was ordered to be printed in the RECORD, as follows:

U.S. JUJITSU TEAM AND RESULTS FROM THE 1985 WORLD CHAMPIONSHIPS

1. Billy Blanks, VFW Parkway, Rockland, Massachusetts 02370, Heavyweight World Champion in Fighting.

2. Curtis Jordan, 7219 McKnight Road, Pittsburgh, Pennsylvania, Middleweight World Champion in Fighting.

3. Kevin "Little K.A." Thompson, 362 South 10th Street, Newark, New Jersey, 1.

Lightweight World Champion in Fighting; 2. World Champion in Hard Style Kata.

4. John T. Jenkins, 75 Park Street, Lewiston, Maine, 1. Second Place Soft Style Kata; 2. Third Place in Heavyweight Division in Fighting; 3. Fourth Place in Weapons Kata; 4. Fifth Place in Hard Style Kata.

5. Seroj Bejanian, 23 Brighton Ave., Apt. #2, Boston, Allston, Massachusetts, First Place in Soft Style Kata.

6. James McKeough, 25 Turkey Hill Lane, Hingham, Massachusetts, Competitor.

7. Robert "Sugar" Crosson, 1106 Clarkson Ave., Brooklyn, New York, World Champion in Weapons Kata.

8. Darryl Weston, 849 Inwood Street, Pittsburgh, Pennsylvania, Team Manager.

9. Dave Weston, 849 Inwood Street, Pittsburgh, Pennsylvania, Coach.

10. Dr. L. Bruce Holbrook, 1601-A MacCorkle Ave., St. Albans, West Virginia, 1. Head Coach; 2. Team Physician; 3. International Delegate for the United States of America.

The U.S. Team also won the overall championships and was awarded the team trophy for the World Karate Jujitsu Championships.

SENATE DEMOCRATS IN 1985

Mr. BYRD. Mr. President, as the first session of the 99th Congress draws to a close, I would like to take a moment to review the contributions which Senate Democrats have made to the national debate on the critical issues facing our Nation and our world.

THE BUDGET

Perhaps no more important issue confronted the Congress in 1985 than that of reducing the record deficits amassed over the past 5 years. Since 1981, there have been three record deficits, the last being in fiscal year 1985 when $211.9 billion in red ink was added to the National Ledger.

When the Senate considered the fiscal year 1986 budget resolution, Democrats offered two major budget alternatives, both of which reduced the deficit by more than did the budget supported by the majority party. The Democratic budget proposals achieved their deficit reduction in a way that encouraged economic growth and investment in the future, while providing a strong national defense and ensuring that all persons, including some major profitable corporations that currently escape Federal income taxes, would bear their fair share of the deficit reduction burden.

Beyond offering budget alternatives, as the budget debate continued, Democrats also sought to reorder the spending priorities of the Republican budget by persistent strong support for such programs as Social Security and Medicare, education, child nutrition, economic development, basic research and scientific efforts, and assistance to family farmers. While these efforts did not always meet with complete success, they often helped to moderate excessive or misdirected spending reductions advanced by the majority. As a result, the budget that ultimately passed the Senate was fairer, more progressive, and better for our Nation's future than it otherwise would have been.

HELP FOR FARMERS

The Nation's farmers entered 1985 suffering their worst distress since the Depression of the 1930's. This distress threatened—and continues to threaten—not only individual farmers and their families, but also the entire economy of those regions of our Nation where agriculture is a central economic component. Further, we are faced with the disappearance of the family farm and with the concentration of our food and fiber production in the hands of large corporations, which may pose significant and unwelcome changes in the lifestyle and well-being of many if not all of our Nation's citizens.

Democrats first came to the aid of our farmers in February with a proposal for emergency credit assistance. The administration and its allies in Congress at first resisted the need for such aid. Yet, following nationwide media attention, and the Democratic threats to delay confirmation of Presidential Assistant Edwin Meese as Attorney General, the Republicans relented and a farm credit assistance bill finally passed the Senate.

Unfortunately the President vetoed that bill, claiming that there was no need for such assistance. But before the President's veto, Democrats had succeeded in obtaining for farmers concessions in existing credit programs that the administration previously had been unwilling to provide. Thus, Democrats were successful in prodding the administration into providing at least some needed help to farmers who were in danger of losing their farms.

Democrats demonstrated their resolve to aid America's farmers later in the session during the consideration of the 1985 farm bill, the conference report on which we just acted on Wednesday. Democrats succeeded in the Agriculture Committee in resisting the administration's and Republican Senators' efforts to bring immediate reductions in Government support—by reducing crop target prices after a 1-year freeze of current targets. The bill reported from the Agriculture Committee provided for a 4-year freeze in target prices. While this would not be a panacea for distressed farmers, it would give them some time in which to help themselves out of the economic mess created by the last 4 years of this administration's farm policies.

On the Senate floor, Democrats again successfully prevented the administration and its Senate allies from dropping back to their original plan that would cut farm income after only 1 year—at a time when many farmers already are having difficulty meeting their financial commitments. Eventually, recognizing that Democrats would not be overcome, the Republican-controlled Senate passed a more nearly adequate 2-year freeze.

DEFENSE AND ARMS CONTROL

Senate Democrats began the 99th Congress by establishing that their paramount priorities in national security would be in reforming the Pentagon's wasteful procurement process, strengthening our conventional forces, modernizing our nuclear deterrent in a manner contributing to nuclear stability and arms control, and pressing our allies to bear a fairer share of the common defense burden.

Democrats have been concerned that, over the last few years, the Soviet-American relationship has been overly characterized by harsh rhetoric and unproductive finger pointing. We have made every effort to be helpful in putting that relationship back onto a more productive track.

On the first day of the 99th Congress, the Senate demonstrated the importance it attaches to the achievement of mutual, equitable and verifiable nuclear arms control agreements between the United States and the U.S.S.R. Majority Leader ROBERT DOLE and I joined in proposing, and the Senate created, a bipartisan Senate arms control observer group to monitor the Geneva negotiations on a regular basis. It was—and remains—my hope that this group will help us to avoid a repetition of the problems of the 1970's, when three successive arms control treaties were signed by three Presidents, but never ratified by the Senate.

Through the observer group's monitoring activities, the full Senate will become more knowledgeable about the many complex issues surrounding nuclear arms control, and American negotiators will have the benefit of the Senate observer group's advice and counsel, when appropriate. I believe this will contribute subtantially to the fulfillment of the Senate's constitutional role of advice and consent with respect to any treaty that emerges from the negotiations.

The group has traveled three times to Geneva to confer with our negotiators, and to meet with the negotiators from the Soviet side, and has met weekly with representatives of the executive branch while the Geneva negotiations have been underway.

In furtherance of the effort to help build a more constructive relationship with the Soviet Union, along with President pro tempore of the Senate, Mr. THURMOND, as the vice chairman of the delegation. I led a bipartisan group of Senators—six Democrats and two Republicans—to meet the new Soviet leader, General Secretary Mikhail Gorbachev. It was our goal to help prepare President Reagan for the summit meeting—which occurred last

month in Geneva—to assess the viewpoints of the new Soviet leader, and to bring to his attention viewpoints, strongly held in the Senate, on a variety of important questions currently in dispute with the Soviets. I believe the trip was successful in accomplishing these specific goals. I was convinced before the summit that the channels of communication with the Soviets should be expanded if we are to make any progress on such vital issues as arms control, and I believe the trip to Moscow made a contribution to that end.

Too often, Mr. President, efforts to promote reasonable arms control have been viewed as contradictory to pursuit of a strong defense. I do not accept this interpretation, and I am confident that my Democratic colleagues share my view that prudent defense programs and careful arms control arrangements both are important components of our national security posture.

Senate Democrats underscored this principle in 1985 when they led this body simultaneously to support reasonable strategic nuclear modernization and a continuation of proarms control policies.

Senators GORE, BOREN, NUNN, and I and other Senators won Senate approval to deploy no more than 50 MX intercontinental ballistic missiles [ICBM's] in a vulnerable basing mode and to shift the administration's land-based missile priorities toward more survivable and effective forces.

The full Senate also endorsed my amendments to ensure full funding for the advanced technology [Stealth] bomber and advanced cruise missile, and to cap the B-1B bomber program at 100 aircraft. These amendments will result in wiser expenditure of taxpayer dollars by ensuring that they produce the most effective strategic weapons available, and that our weapons will be suitable and effective for the longest possible period of time.

Under the leadership of Democratic Senators LEAHY and BUMPERS, the Senate emphatically urged the President to continue in 1986 the United States policy of refraining from actions which would undercut the strategic arms limitation [SALT] accords as long as the Soviets show similar restraint and continue to negotiate in Geneva. That action also urged the President to pursue vigorously the issues surrounding Soviet noncompliance with some aspects of these accords.

In leading this effort, Senate Democrats recognized that abandonment of the no undercut policy in 1986 would hurt United States security more than Soveit security in the next year—because the U.S.S.R. no longer would be required to dismantle more strategic warheads than the United States as they are under SALT.

The 1st session of the 99th Congress found Senate Democrats pushing hard to eliminate waste, fraud, and abuse in defense programs. The long trail of cost overrun scandals and questionable budgeting procedures at the Pentagon has served to erode much of the national consensus underlying a vigorous defense program. Major weapons procurement process reforms were crafted under the leadership of Senators LEVIN and PRYOR. It is my hope that the reforms we secured will enhance our national security by stretching the defense dollar further and achieving better results.

Democrats also supported improvements to our conventional forces, including increases in our combat readiness accounts for aircraft flying hours, ship steaming days, unit field exercises, depot maintenance, and real property maintenance. These activities are critical to maintaining and improving our daily combat readiness.

Colleagues on this side of the aisle, especially the distinguished senior Senator from Mississippi, JOHN STENNIS, were instrumental in adding funds to strengthen our national guard and reserve forces. My own initiatives were adopted to increase funding for the Coast Guard, and to fund the important activities of the National Commission on the Merchant Marine and National Defense, established last year, in part, to study problems relating to transportation, cargo, and personnel for national defense purposes in time of war or national emergencies, and the capability of the U.S. merchant marine to meet the Nation's transportation needs in such crisis.

Led by our Democratic colleagues, Senators KENNEDY and GLENN, the full Senate rejected the administration's proposal to freeze military pay in fiscal 1986 at last year's level. A 3-percent increase was granted, effective October 1, 1985, in basic pay, basic allowance for subsistence, and basic allowance for quarters for military personnel. Our patriotic and capable military men and women deserved this pay raise for their sacrifices in the defense of our country.

There are few larger problems facing United States defense policy than the dilemma of how Americans can convince our allies, especially the Japanese, to shoulder an increased share of our mutual security burden. Our taxpayers are becoming increasingly impatient with the poor burden-sharing performances of several of our NATO allies and Japan.

This year, Senate Democrats focused their concerns on Japan, and, at my suggestion, the full Senate approved some of the strongest language to date—urging Japan to increase significantly its contributions to our security, and to its own self-defense, and requiring that Congress be notified annually of Japan's progress toward that goal.

FOREIGN POLICY

During 1985, Senate Democrats were in the forefront of initiatives to address the security and foreign policy challenges America faces in the Philippines, the Middle East, and Central America.

Senators SASSER and KERRY were early, thoughtful critics of the policies of the Philippine Government which prevent that Nation from defeating a growing Communist insurgency. That insurgency threatens the long-term existence of two of the United States most important overseas military bases.

Regarding the Middle East, Senators KENNEDY, DIXON, and CRANSTON highlighted the lack of a convincing national security justification for proposals by the administration to sell additional sophisticated weapons to Jordan and Saudi Arabia.

American policy in the Middle East must be guided by the need to build on the success of the Camp David process, and the hope it offers for comprehensive solutions in the region. The arms sales that this administration has been promoting for several years do not represent a policy which can contribute to this process.

Senate Democrats have been increasingly concerned over the activities of the Sandinista regime in Nicaragua. We believe that every effort must be made on both the political and diplomatic fronts to find a peaceful solution to our differences between the United States and Nicaragua—and, indeed, between that government and its own people. Therefore, we have consistently supported the Contadora process, and encouraged the reopening of negotiations between the United States and Nicaragua. Military options, we believe, should be kept on the back burner, and used only as a last resort. It is our hope that the Sandinista government will recognize the extreme foolishness of a military adventure leading to a direct confrontation with the United States.

During 1985, Democrats tried to negotiate with the White House on a reasonable program of overt humanitarian aid to those forces in Nicaragua that oppose the repressive Sandinista regime. Unfortunately, the administration rejected efforts to reach a reasonable compromise.

In 1985, South Africa was beset with tragic, growing violence. Senate Democrats sought actions that would focus that nation's leadership on the importance of remedial action. Democratic legislation was frustrated when Senate Republicans removed the conference report from the Senate Chamber in an unprecedented one-Senator veto. Senate Democrats successfully pressed for a return of those papers.

In the meantime, however, the administration accepted substantially all of the points raised in the Democratic legislation, and issued them as an Executive order. Thus the South African leaderhsip was made aware of the degree to which the United States hopes that nation will make meaningful remedial progress in resolving its underlying problems.

ENERGY AND ENVIRONMENT

Legislation expanding and reauthorizing the Nation's "Superfund" law was passed overwhelmingly by the Senate on September 26 of this year. The Senate bill contained a $7.5 billion program to protect the American public from the health threat posed by the thousands of abandoned toxic waste dumps located around the Nation. Democrats played an important role in improving and strengthening the Superfund legislation during deliberations in the committees, and during consideration on the floor.

Legislation reauthorizing and improving the Nation's Clean Water Act and the Safe Drinking Water Act was passed by the Senate in 1985. Democrats strongly supported these bills and made important contributions to their preparation and consideration both in committee and on the floor.

HUMAN SERVICES

The Major Child Nutrition Programs—the women, infants and children [WIC] feeding program, the summer school feeding programs, and parts of the school lunch and breakfast program—had been operating without authorization through most of the second session of the 98th and the first session of the 99th Congresses because the majority party that chairs the Agriculture Committee and determines the Senate floor schedule would not schedule the bill for action. During this time, the House of Representatives passed and sent to the Senate three bills in an attempt to prod the Senate into action. Finally, late this session, after several Democratic attempts to secure action on the bill, Senators HARKIN and KENNEDY were able to spotlight the issue sufficiently on the floor so that the Republicans agreed to offer a simple bill reauthorizing the programs. That bill passed the Senate and is in conference with the House-passed bill.

During consideration of the 1986 congressional budget, Democrats demonstrated unequivocally that it was necessary for any budget to meet Democratic objectives for education, employment, and other human resources programs if it were to receive any Democratic support. This push by Democrats assured that the budget passed by the Senate would not contain the very serious cuts in education and employment programs proposed by the President.

During the first session, also, a proposal surfaced to cut Social Security benefits by freezing its cost of living adjustments, in order to provide funds to reduce the budget deficit. Likewise, the administration proposed severe changes and cuts in the Medicare Program which would have drastically increased the amount beneficiaries must pay in order to participate in the program. All these changes were efforts to balance the budget on the backs of America's elderly.

Due to the degree of Democratic resistance in both the Senate and the House to cuts in Social Security benefits, it was clear that no conference agreement on the budget would include those cuts, and so the issue was removed from the list of budget cuts under consideration. Later, when the Gramm-Rudman-Hollings proposal was developed, the strength of Democratic support for protecting Social Security resulted in that proposal's sponsors excluding Social Security from automatic cuts. In Medicare, Democrats successfully assured removal from the Republican leadership budget of the most onerous proposals affecting out-of-pocket health care costs for the elderly and disabled.

On several occasions during the fall when we came close to exhausting the debt limit, the administration disinvested Social Security trust funds in order to provide operating cash for the Government. In reaction, Democrats acted to instruct the Treasury to restore to the trust funds any moneys and interest amounts which were lost during the time the funds were disinvested.

TRADE

In 1985, the trade deficit may reach $150 billion—beyond the record $123 billion of last year and by far the largest trade shortfall of any nation at any time in history. In 1985, the Reagan administration's high dollar and high deficit policies resulted in our becoming a debtor nation for the first time since World War I. Taken in conjunction, these grim records reveal this administration's fundamental failure to maintain America's global economic leadership. This failure translates into a loss of jobs, and a decline in our industrial base. Over the past year, traditional industries such as steel, textiles, autos, and footwear continued to suffer from administration indifference, but new technologies such as computers and related technologies have begun to feel the pinch. Instead of talking about competitiveness, the administration clings to tired rhetoric about free trade versus protectionism.

Senate Democrats made major contributions to the trade debate this year. Early in the year, I appointed Senator LLOYD BENTSEN to head a Democratic working group to examine current trade policy alternatives and recommend actions to his colleagues. That working group called for a strategic approach to trade in its April preliminary report entitled "The New Global Economy: First Steps in a United States Trade Strategy." Senator BENTSEN and his colleagues on the working group presented the case for an aggressive, realistic response to the current trade crisis. Their report was followed by introduction of "the Trade Policy Act of 1985." That legislation—endorsed by the Democratic caucus and cosponsored by all Senate Democrats—offers the framework for a tough, comprehensive approach to the challenge of global competition.

During 1985, also, Senators HOLLINGS and THURMOND brought the plight of our domestic textile industry, and the damage it has endured from foreign competition, forcefully to the attention of the Senate. Senator HOLLINGS provided persistent leadership in refusing to allow the issue to be forgotten, and remedial legislation passed both Houses of the Congress. Unfortunately, this bill—which also aided the hard-pressed domestic shoe industry—was vetoed by the President, who failed to offer any other means to help these industries and their workers who are confronting stiff foreign competition.

Through the actions of the working group and the initiatives of many Senate Democrats, we have forced the White House to begin to respond to the trade crisis. Senators MOYNIHAN, BAUCUS, and BRADLEY have introduced legislation to require adjustment in the over-valued dollar that acts as a tax on American exports. Over Republican objections, the Senate passed Senator BRADLEY's resolution calling for coordination in macroeconomic policy and concerted action with our allies to reduce the artificially bloated dollar. Within months of passage of the Bradley resolution, the administration announced that it had begun negotiations with major trading partners to realign the dollar to improve American competitiveness. Senate Replicans, responding to the pressure of Democratic legislative initiatives, have included bills by Senators BRADLEY, MOYNIHAN, LAUTENBERG, BINGAMAN, BAUCUS, and others in a new omnibus trade law bill, thus joining the Democratic call for action on trade.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States

submitting a nomination which was referred to the Committee on Commerce, Science, and Transportation.

(The nomination received today is printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE RECEIVED DURING THE RECESS

ENROLLED BILL SIGNED

Under the authority of the order of the Senate of January 3, 1985, the Secretary of the Senate, on December 18, 1985, during the recess of the Senate, received a message from the House of Representatives announcing that the Speaker had signed the following enrolled bill:

H.R. 3981. An act to extend until December 19, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program.

Under the authority of the order of the Senate of January 3, 1985, the enrolled bill was signed on December 18, 1985, during the recess of the Senate by the President pro tempore [Mr. THURMOND].

MESSAGES FROM THE HOUSE

At 11:50 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following joint resolutions, without amendment:

S.J. Res. 189. Joint resolution designating the week beginning January 12, 1986, as "National Fetal Alcohol Syndrome Awareness Week";

S.J. Res. 198. Joint resolution to designate the year of 1986 as the "Sesquicentennial Year of the National Library of Medicine"; and

S.J. Res. 235. Joint resolution to designate the week of January 26, 1986, to February 1, 1986, as "Truck and Bus Safety Week".

ENROLLED BILL AND JOINT RESOLUTION SIGNED

At 2:09 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bill and joint resolution:

S. 1918. An act to change the date for transmittal of a report; and

S.J. Res. 235. Joint resolution to designate the week of January 26, 1986, to February 1, 1986, as "Truck and Bus Safety Week".

The enrolled bill and joint resolution were subsequently signed by the President pro tempore [Mr. THURMOND].

At 2:22 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the report of the committee of further conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 465) making further continuing appropriations for the fiscal year 1986, and for other purposes.

At 3:48 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the amendments of the Senate bill to the bill (H.R. 3974) to amend title X, United States Code, to include in the death gratuity payable to survivors of a member of the Armed Forces who dies on active duty an amount equivalent to 2 months housing allowance.

The message also announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 98. Concurrent resolution to recognize the historical significance of the former Presidential yacht Sequoia, and express support for her donation to the United States Navy by the Presidential Yacht Trust.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 263. Concurrent resolution to rescind the approval of H. Con. Res. 262, correcting the enrollment of H.J. Res. 187, and directing the Clerk of the House of Representatives to make a correction in the enrollment of the joint resolution H.J. Res. 187.

The message also announced that pursuant to the provisions of section 276d of title 22, United States Code, the Speaker appoints as members of the United States Delegation to the Canada-United States Interparliamentary Group the following Members on the part of the House: Mr. BARNES, chairman, Mr. BOLAND, Mr. FASCELL, Mr. GIBBONS, Mr. HAMILTON, Mr. OBERSTAR, Mr. DONNELLY, Mr. BROOMFIELD, Mr. HORTON, Mr. STANGELAND, Mr. MARTIN of New York, and Mr. MILLER of Washington.

The message further announced that pursuant to title V of Public Law 99-180, the Speaker appoints as members of the Commission on the Ukraine Famine, the following Members on the part of the House: Mr. MICA, chairman, Mr. HERTEL, Mr. BROOMFIELD, and Mr. GILMAN.

At 4:45 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 495. Joint resolution to provide for the temporary extension of certain programs relating to housing and community development, and for other purposes.

At 6:33 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 264. Concurrent resolution to correct the enrollment of H.R. 2100.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

At 7:15 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled bills and joint resolutions:

S. 1884. An act to amend the Farm Credit Act of 1971, to restructure and reform the Farm Credit System, and for other purposes;

H.R. 1603. An act to amend the Securities Exchange Act of 1934 to authorize the Securities and Exchange Commission to subject banks, associations, and other entities that exercise fiduciary powers, to the same regulations as broker-dealers, pursuant to section 14(b) of the Securities Exchange Act of 1934;

H.R. 1784. An act to authorize appropriations for fiscal year 1986 for the operation and maintenance of the Panama Canal, and for other purposes;

H.R. 2391. An act to authorize the Administrator of General Services to collect additional contributions of money provided to him by private individuals or organizations for the Nancy Hanks Center;

H.R. 2542. An act designating the building located at 125 South State Street, Salt Lake City, Utah, as the "Wallace F. Bennett Federal Building";

H.R. 2698. An act to designate the United States Courthouse in Tuscon, Arizona, as the "James A. Walsh United States Courthouse";

H.R. 2903. An act to designate the Federal Building and United States Post Office in Philadelphia, Pennsylvania, as the "Robert C. Nix, Sr., Federal Building and United States Post Office";

H.R. 2962. An act to remove certain restrictions on the availability of office space for former speakers of the House;

H.R. 3608. An act to amend the Small Business Investment Act of 1958;

H.R. 3837. An act to extend the deadline for the submission of the initial set of sentencing guidelines by the United States Sentencing Commission, and for other purposes;

S.J. Res. 189. Joint resolution designating the week beginning January 12, 1986, as "National Fetal Alcohol Syndrome Awareness Week";

S.J. Res. 198. Joint resolution to designate the year of 1986 as the "Sesquicentennial Year of the National Library of Medicine"; and

H.J. Res. 465. Joint resolution making further continuing appropriations for the fiscal year 1986, and for other purposes.

The enrolled bills and joint resolutions, except the bill S. 1884, were subsequently signed by the President pro tempore [Mr. THURMOND].

At 8:16 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the amendment of the Senate to the title of the bill (H.R. 1083) to amend the Low-Level Radioactive Waste Policy Act to improve procedures for

the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste, and for other purposes, and that the House agrees to the amendment of the Senate to the text of the bill, with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House agrees to the amendments of the Senate to the bill (H.R. 3718) to waive the period of congressional review for certain District of Columbia acts authorizing the issuance of revenue bonds.

ENROLLED BILL SIGNED

At 10:13 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker pro tempore [Mr. WRIGHT] has signed the following enrolled bill:

H.R. 2100. An act to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to continue food assistance to low-income persons, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore [Mr. THURMOND].

At 10:27 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that pursuant to the provisions of House Resolution 349, the House rejects the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (H.R. 3128) to make changes in spending and revenue provisions for purposes of deficit reduction and program improvement, consistent with the budget process, and that the House recede from its disagreement to the amendment of the Senate to the text of the bill, and agrees thereto, with an amendment, in which it requests the concurrence of the Senate.

At 11:07 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 1840. An act to amend title 5, United States Code, to revise the authority relating to the payment of subsistence and travel allowances to Government employees for official travel; to prescribe standards for the allowability of the cost of subsistence and travel of contractor personnel under Government contracts, and for other purposes.

The message also announced that the House agrees to the amendments of the Senate to the bill (H.R. 1538) to amend title 38, United States Code, to provide a 3.4-percent increase in the rates of compensation and of dependency and indemnity compensation (DIC) paid by the Veterans' Administration, and for other purposes.

The message further announced that the House has passed the following bill and joint resolution, in which it requests the concurrence of the Senate:

H.R. 4006. An act to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Program, and to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions of current law which would otherwise expire at the end of 1985; and

H.J. Res. 496. Joint resolution providing for the convening of the 2d session of the 99th Congress.

At 1:23 a.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its clerks, announced that the House disagrees to the amendment of the Senate to the amendment of the House to the amendment of the Senate to the bill (H.R. 3128) to make changes in spending and revenue provisions for purposes of deficit reduction and program improvement, consistent with the budget process.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 267. Concurrent resolution providing for a sine die adjournment of the 1st session of the 99th Congress.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. CHAFEE, from the Committee on Environment and Public Works, without amendment:

H.R. 1404: A bill to establish the Eastern Shore of Virginia National Wildlife Refuge and National Fish and Wildlife Service Training Center at Cape Charles in Northamption County, Virginia (Rept. No. 99-226).

By Mr. ROTH, from the Committee on Governmental Affairs:

Report to accompany the bill (H.R. 3718) to waive the period of congressional review for certain District of Columbia acts authorizing the issuance of revenue bonds. (Rept. No. 99-227).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. D'AMATO:

S. 1986. A bill to amend the Securities Exchange Act of 1934; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. WALLOP (for himself and Mr. SIMPSON):

S. 1987. A bill to amend the Tariff Schedules of the United States in order to establish equitable duty rates for sodium bicarbonate; to the Committee on Finance.

By Mr. MELCHER (for himself, Mr. INOUYE, Mr. DECONCINI, Mr. BURDICK, Mr. ANDREWS, Mr. ABDNOR, and Mr. BINGAMAN):

S. 1988. A bill to establish a program for the prevention and control of diabetes among native Americans; to the Select Committee on Indian Affairs.

By Mrs. HAWKINS (for herself, Mr. THURMOND, Mr. HATCH, and Mr. DIXON):

S. 1989. A bill to open Japanese markets for United States semiconductors and establish fair conditions of trade in semiconductors; to the Committee on Finance.

By Mr. QUAYLE (for himself and Mr. KENNEDY):

S. 1990. A bill to establish an Education and Training Partnership to administer the Wagner-Peyser Act, the Job Training Partnership Act, and the Carl D. Perkins Vocational Education Act, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. ANDREWS (for himself, Mr. MELCHER, Mr. ABDNOR, Mr. BURDICK, Mr. DECONCINI, Mr. INOUYE, Mr. MURKOWSKI, and Mr. GOLDWATER):

S. 1991. A bill to extend programs under the Native American Programs Act of 1974 through fiscal year 1990; to the Select Committee on Indian Affairs.

By Mr. STEVENS (by request):

S. 1992. A bill to preserve rights of certain parties with an interest in certain vessels or fishing facilities, and for other purposes; to the Committee on Commerce, Science, and Transportation.

S. 1993. A bill to preserve the rights of certain parties with an interest in aircrafts, aircrafts parts, or vessels, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. STEVENS:

S. 1994. A bill for the relief of Pedro M. Bertulfo and his wife Amalia M. Bertulfo; to the Committee on the Judiciary.

S. 1995. A bill for the relief of David Ford; to the Committee on the Judiciary.

S. 1996. A bill for the relief of Romeo Manabat and his wife Grace Manabat; to the Committee on the Judiciary.

By Mr. WALLOP (for himself and Mr. BENTSEN):

S. 1997. A bill to amend the Internal Revenue Code of 1954 to impose a tax on the importation of crude oil and refined petroleum products; to the Committee on Finance.

By Mr. DOLE (for himself, Mr. BYRD, Mr. LONG, Mr. PACKWOOD, Mr. ZORINSKY, Mr. BENTSEN, Mr. KERRY, Mr. WARNER, Mr. LUGAR, Mr. BAUCUS, Mr. LEAHY, Mr. DURENBERGER, Mr. BRADLEY, Mr. BOSCHWITZ, Mr. HATCH, Mr. THURMOND, Mr. HOLLINGS, Mr. HEINZ, Mr. INOUYE, Mr. LAXALT, Mr. COCHRAN, Mr. HATFIELD, Mr. JOHNSTON, Mr. MATTINGLY, Mr. NUNN, Mr. PRYOR, Mr. COHEN, Mr. D'AMATO, Mr. DIXON, Mr. EXON, Mr. SIMON, Mr. HEFLIN, Mr. STAFFORD, Mr. DOMENICI, Mr. TRIBLE, Mr. MOYNIHAN, Mr. EAST, Mr. MATSUNAGA, Mr. ARMSTRONG, Mr. SYMMS, Mr. ROCKEFELLER, Mr. GORE, Mr. MCCLURE, Mr. RIEGLE, Mr. HELMS, Mr. MURKOWSKI, Mr. BURDICK, Mr. GOLDWATER, Mr. DENTON, Mr. CRANSTON, Mr. HARKIN, Mr. ANDREWS, Mr. SPECTER, Mr. KASTEN, Mr. GRASSLEY, Mr. BIDEN, and Mr. GORTON):

S.J. Res. 254. Joint resolution to designate the year of 1987 as the "National Year of

Thanksgiving"; to the Committee on the Judiciary.

By Mr. DOLE:

S.J. Res. 255. Joint resolution relative to the convening of the second session of the Ninety-Ninth Congress; considered and passed.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DOLE:

S. Res. 280. Resolution expressing the sense of the Senate regarding support by the United States for the National Union for the Total Independence of Angola (UNITA); to the Committee on Foreign Relations.

By Mr. DOLE (for himself, Mr. D'AMATO, Mr. DODD, Mrs. HAWKINS, Mr. WILSON, Mr. MATTINGLY, Mr. SYMMS, Mr. ARMSTRONG, Mr. DURENBERGER, Mr. WALLOP, Mr. GRASSLEY, Mr. PRYOR, Mr. ROTH, Mr. CHAFFEE, Mr. BRADLEY, Mr. HEINZ, Mr. MITCHELL, Mr. BAUCUS, Mr. BOREN, Mr. KASTEN, Mr. KERRY, Mr. DOMENICI, Mr. ABDNOR, Mr. CRANSTON, Mr. GARN, Mr. SIMPSON, Mr. DENTON, Mr. THURMOND, Mr. DECONCINI, Mr. NICKLES, Mr. LAXALT, Mr. SPECTER, Mr. WARNER, Mr. HOLLINGS, Mr. HECHT, Mr. ANDREWS, Mr. LUGAR, Mr. BOSCHWITZ, Mr. QUAYLE, Mr. HEFLIN, Mr. TRIBLE, Mr. HARKIN, Mr. COHEN, Mr. DIXON, Mr. COCHRAN, Mr. RUDMAN, Mr. WEICKER, Mr. MCCONNELL, Mr. ZORINSKY, Mr. HELMS, Mr. STENNIS, Mr. EAST, Mr. BUMPERS, Mr. LEVIN, Mr. HATCH, and Mr. FORD):

S. Res. 281. Resolution relating to a prospective effective date for tax reform; considered and agreed to.

By Mr. HEINZ (for Mr. DOLE (for himself and Mr. BYRD)):

S. Res. 282. Resolution to direct the Senate Legal Counsel to intervene in Representative Mike Synar v. United States of America; considered and agreed to.

By Mr. DOLE (for himself and Mr. BYRD):

S. Res. 283. Resolution relating to the Bipartisan Group of Senators designated pursuant to S. Res. 19 and S. Res. 86, 99th Congress, to act as Observers of Arms Reduction or Control Negotiations; considered and agreed to.

By Mr. STEVENS (for Mr. ROTH (for himself and Mr. NUNN):

S. Res. 284. Resolution to authorize the inspection and receipt of tax records by a subcommittee of the Committee on Governmental Affairs; considered and agreed to.

By Mr. LONG (for himself, Mr. PACKWOOD, Mr. DOLE, Mr. BYRD, Mr. DANFORTH, Mr. MOYNIHAN, Mr. BENTSEN, Mr. PRYOR, Mr. MATSUNAGA, Mr. BAUCUS, Mr. CRANSTON, Mr. DURENBERGER, and Mr. ARMSTRONG):

S. Res. 285. To commend Michael Stern for his faithful and outstanding service to the United States Senate and the Nation; considered and agreed to.

By Mr. SIMPSON (for Mr. ARMSTRONG (for himself, Mr. ROTH and Mr. DOMENICI)):

S. Res. 286. Resolution to authorize a procedure for the disposition of extraneous material in reconciliation conference reports, and for other purposes; considered and agreed to.

By Mr. DOLE:

S. Res. 287. Resolution appointing a committee to notify the President concerning the proposed adjournment of the session; considered and agreed to.

S. Res. 288. Resolution tendering the thanks of the Senate to the Vice President for the courteous, dignified, and impartial manner in which he has presided over the deliberations of the Senate; considered and agreed to.

By Mr. DOLE (for Mr. BYRD (for himself and Mr. DOLE)):

S. Res. 289. Resolution tendering the thanks of the Senate to the President Pro tempore for the courteous, dignified, and impartial manner in which he has presided over the deliberations of the Senate; considered and agreed to.

By Mr. DOLE (for himself and Mr. BYRD):

S. Res. 290. A resolution expressing the Senate's admiration for the long and distinguished career of the Senator from Mississippi, the Honorable John C. Stennis; considered and agreed to.

By Mr. BYRD:

S. Res. 291. A resolution authorizing the President of the Senate and the President of the Senate pro tempore to make certain appointments after the sine die adjournment of the present session; considered and agreed to.

By Mr. THURMOND:

S. Res. 292. A resolution to commend the exemplary conduct of the distinguished Majority Leader and Majority Whip; considered and agreed to.

S. Res. 293. A resolution to commend the extraordinarily cooperative conduct of the distinguished Minority Leader, and the Minority Whip; considered and agreed to.

S. Res. 294. A resolution tendering the thanks of the Senate to the Senate Staff for the courteous, dignified, and impartial manner in which they have assisted the deliberations of the Senate; considered and agreed to.

By Mr. KERRY (for himself, Mr. SIMON, Mr. PELL, Mr. KENNEDY, Mr. DODD, Mr. HOLLINGS, Mr. CRANSTON, Mr. SARBANES, Mr. RIEGLE, and Mr. HARKIN):

S. Con. Res. 100. A concurrent resolution expressing the sense of the Senate that the civil and political rights of Kim Dae Jung be restored and that true democracy be instituted in the Republic of Korea; to the Committee on Foreign Relations.

By Mr. SPECTER:

S. Con. Res. 101. A concurrent resolution calling for full freedom and independence for the Baltic States; to the Committee on Foreign Relations.

S. Con. Res. 102. A concurrent resolution expressing the sense of the Congress that the United States should seek, through diplomatic channels, the withdrawal of certain personnel of the Soviet Union from Estonia, Latvia, and Lithuania and the release by the Soviet Union of political prisoners of Estonian, Latvian, or Lithuanian descent; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. D'AMATO:

S. 1986. A bill to amend the Securities Exchange Act of 1934; to the Committee on Banking, Housing, and Urban Affairs.

EQUITY IN FOREIGN AND DOMESTIC CREDIT ACT

Mr. D'AMATO. Mr. President, in response to the Federal Reserve Board's [Fed] recent proposal to apply the margin requirements of section 7 of the Exchange Act to certain purchases of securities—commonly referred to as junk bonds, I introduce the "Equity in Foreign and Domestic Credit Act." This legislation is needed because the Fed cannot presently require that the provisions of the proposed interpretation be made applicable to foreign investors who acquire U.S. securities with foreign credit. The legislation is designed to end the unfair advantage presently enjoyed by foreign persons who acquire substantial positions in, or entire American corporations and are not subject to the margin requirements imposed by the Fed. These foreign purchasers are presently able to purchase U.S. securities by borrowing 100 percent of the cost of these securities from foreign lenders. At present, domestic persons and firms are at a distinct disadvantage because of the 50-percent margin requirements imposed upon them by the Federal Reserve Board under current law.

The legislation that I introduce today was discussed in the Securities Subcommittee of the Senate Banking Committee during hearings conducted in July, 1981. Little has changed since that time. Therefore, the legislation we considered then and the legislation that I introduced today arises out of a concern that these margin requirements do not reach transactions, where the acquiror of securities is not a U.S. citizen. This is troublesome both because of the potential disruption which could result from excess credit, and the fact that such investors have a competitive advantage over U.S. investors in corporate takeovers. It is my belief that if the margin requirements for U.S. investors are beneficial and are necessary, to protect the American investing public, then those same requirements are necessary to protect the U.S. investing public even if a foreign corporation is making an acquisition or tender offer.

The present inadequacy of the margin requirements was revealed by the FED's recent proposal regarding the application of margin requirements to certain transactions also prompted this legislation. On December 6, 1985, the FED approved for public comment a proposed interpretation of regulation G that would affect the financing of certain tender offers. This interpretation is scheduled to become effective December 31, 1985. Although I am not certain that I agree with the FED's interpretation which applies the margin requirements to junk bonds, I do not dispute the FED's authority to issue this interpretation. The Board's interpretation broadens considerably the scope of the existing

margin rules and therefore may be viewed as more of a rule change than a mere interpretation. The FED's action may be premature in this area because of the lack of information concerning the impact of junk bond financed transactions on the economy. I am also concerned about the FED's reversal of an initial interpretation that has such dramatic implications on the financing of certain transactions without adequate notice and with a minimal comment period. The FED should not contemplate such a major policy shift without providing adequate notice and time for comment.

I also take time issue with the FED because in some respect its proposal may go too far and in others it does not go far enough. The FED's proposed interpretation may go too far because the language of the proposal does not necessarily reflect the intent to limit the proposed interpretation to a relatively limited factual situation; specifically, shell corporations that issue debt securities in order to acquire margin stock. While the intent of the rule may be narrow, the language of the proposed interpretation is not as narrowly confined. The language of the proposal is somewhat vague and ambiguous and as a result, the proposal is potentially applicable to a broad range of transactions. I do not consider it appropriate for the FED to be empowered to determine whether the margin rules apply to takeover financing on a case-by-case basis. The FED's use of its authority in this manner imposes undue burdens on the ability to execute transactions and will have an adverse effect upon financial markets.

The FED was not able to go far enough in its proposed interpretation because a statutory change is needed to apply the margin rules to foreign purchasers who use foreign credit to purchase U.S. Securities. The legislation remedies a glaring deficiency by applying the margin rules to foreign purchasers. The effect of the FED's proposal and the present unequal application of the margin rules may be to drive corporate takeover activity off-shore beyond the reach of the FED's existing margin rules. In order to prevent the circumvention of the existing margin rules, and the FED's proposed interpretation and to correct the inequities of a system that discriminates against domestic corporations and investors, I am compelled to introduce the Equity in Foreign and Domestic Credit Act.

I ask unanimous consent that the bill, and the explanation of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1986

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This title may be cited as the "Equity in Foreign and Domestic Credit Act".

SEC. 2. (a) Section 7 of the Securities Exchange Act of 1934 (15 U.S.C. (78g) is amended—

(1) by redesignating subsection (g) as subsection (h); and

(2) by striking out subsection (f) and inserting in lieu thereof the following:

"(f)(1) It is unlawful for any person to obtain, receive, or enjoy the beneficial use of a loan or other extension of credit from any lender (without regard to whether the lender's office or place of business is in the State or the transaction occurred in whole or in part within a State) for the purpose of (A) purchasing or carrying United States securities, or (B) purchasing or carrying within the United States any other securities, if under this section or rules and regulations prescribed thereunder, the loan or other credit transaction is prohibited or would be prohibited if it has been made or the transaction had otherwise occurred in a lender's office or other place of business in a State.

"(2) For purposes of this subsection, the term 'United States security' means a security (other than an exempted security) issued by a person incorporated under the laws of any State, or whose principal place of business is within a State.

"(3) The Board of Governors of the Federal Reserve System may, in its discretion and with due regard for the purposes of this section, by rule or regulation exempt any class of persons from the application of this subsection.

"(g)(1) Any issuer of securities that are being purchased or carried in violation of this section, or of any rule or regulation promulgated under this section, and any other person who is injured or threatened with injury by reason of such a violation by any other person, in connection with—

"(A) the acquisition or carrying of the beneficial ownership of more than 5 per centum of any class of an equity security, or

"(B) any tender offer for, or request or invitation for tenders of, any class of equity security, if after consummation thereof, such other person would, directly or indirectly, be the beneficial owner of more than 5 per centum of such class,

may bring an action in the proper district court of the United States or the proper United States court of any territory or other place subject to the jurisdiction of the United States to recover damages arising from such violation or for such injury or to enjoin such a violation.

"(2) No action shall be maintained to enforce any liability created under this subsection or to rescind any contract the making or performance of which involves a violation of this section unless brought within one year after the discovery of facts constituting the violation, and three years after the occurrence of the last substantial element of the violation.

"(3) For the purposes of this subsection—

"(A) The term 'person' has the same meaning provided such term by section 13(d)(3) of this title; and

"(B) the determination of the percentage of any class of security shall be made in the same manner as is required by section 13(d)(4) of this title.".

(b) Except for purposes of section 32 of the Securities Exchange Act of 1934, the amendment made by this section takes effect on December 19, 1985, and the provisions of section 7(f) of the Securities Exchange Act of 1934, as so amended, shall apply to any purchase of securities occurring on or after such date and to the carrying of such securities on or after such date if the loan or extension of credit therefor originated on or after such date or if the loan proceeds used to purchase or carry such securities were disbursed on or after such date.

EXPLANATION OF THE BILL

The provisions of this bill seek to ensure equal application of credit and borrowing restrictions in connection with foreign acquisitions of United States securities.

Section 1 of the bill states that this Act may be cited as the "Equity in Foreign and Domestic Credit Act."

Section 2(a) strikes out subsection 7(f) of the Exchange Act and inserts a new subsection (f) and new subsection (g). Section 7(f)(1), as amended, would make it unlawful for any person (including any foreign person) to obtain, receive or enjoy the beneficial use of a loan or other extension of credit from any lender for the purpose of purchasing or carrying United States securities, or purchasing or carrying within the United States any other securities, if under the margin provisions or rules issued under those provisions, the loan or other credit transaction is prohibited or would be prohibited if it had been made to the transaction had otherwise occurred in a lender's office or place of business in the United States.

The new provision is similar to the current section 7(f)(1), except that it applies to "any person" rather than "any United States person, or any foreign person controlled by a United States person or acting on behalf of or in conjunction with such person."

Currently, Section 7 of the Exchange Act authorizes the Federal Reserve Board to set limits on the amount of margin credit that may be extended in connection with securities transactions. However, the law currently applies only to persons who borrow in the United States, or to Americans who borrow abroad for the purpose of purchasing United States securities. It does not apply to foreign purchasers of United States securities who finance their purchases with funds from foreign lenders.

Testimony in previous Congresses revealed that, in some instances, foreign firms were borrowing from foreign lenders 100 percent of the acquisition costs of U.S. securities. This placed domestic persons and firms at a distinct disadvantage, because of the 50 percent margin requirements imposed on them by the Federal Reserve Board under current law.

Although the number of foreign takeovers of United States companies has remained fairly constant since 1981, the objective of this legislation and earlier legislative proposals addressing this issue remain valid: to correct an obvious gap in current law by imposing United States margin requirements on foreign firms that borrow from foreign lenders to purchase U.S. securities.

New section 7(f)(2) defines the term "United States security" as any security issued by a person incorporated under the law of any State, or whose principal place of business is within a State. Accordingly, any security issued by a foreign corporation whose principal place of business is within the United States would be a "United States security" for purposes of this subsection.

This definition is the same as that in current section 7(f)(1)(B).

New section 7(f)(3) grants to the Federal Reserve Board, in its discretion and with due regard for the purposes of section 7, the authority to exempt any class of persons from the application of section 7(f). This new paragraph maintains existing Federal Reserve Board authority under current section 7(f)(3). Pursuant to this authority, the Federal Reserve Board would be empowered to exempt those borrowers who, because of the small size of their transactions of the insignificant impact of their transactions on United States issuers or securities markets, should not be obligated to bear the burden of assuring their compliance with margin provisions.

New subsection (g)(1) provides a private right of action on behalf of any issuer of securities that are being purchased or carried in violation of section 7 or of any rule or regulation promulgated under section 7. A private right of action also is granted on behalf of any other person who is injured or threatened with injury by reason of such violation by any other person. Application of the express private rights of action established by the new provision is limited, however, to violations in connection with: (1) the acquisition or carrying of more than 5 percent or more of any class of an equity security; or (2) any tender offer for class of equity security if, after consummation of the tender offer, such other person would, directly or indirectly, be the beneficial owner of more than 5 percent of such class.

Subsection (g)(2) specifies the statute of limitations for actions brought under new subsection (g). An action must be brought within one year after the discovery of the facts constituting the violation and within three years after the occurrence of the last substantial element of the violation.

The creation of an express private right of action under this provision should not be interpreted as impairing in any way existing implied private rights of action under other sections of the Exchange Act, including sections 13 and 14. Private rights of action may still be implied for violations of the Exchange Act, including sections 13 and 14, even though no private right of action is expressly provided. Private rights of action are a necessary supplement to Commission action to enforce these provisions.

Some courts have held that a target company may have a right of action under sections 14(d) or (e) of the Exchange Act, if there is a failure to disclose that the financing plan of the offeror may be illegal because of a violation of the margin requirements of section 7 of the Exchange Act. New section 7(g) specifies that a target company and other persons injured or threatened with injury by margin violations in connection with the acquisition of more than 5 percent of the issuer's equity securities have standing to maintain an injunctive or other action seeking relief from an acquiror's violations of the margin requirements of section 14 is also alleged. On the other hand, the legislation is not designed to accord to any potential plaintiffs a presumption of injury.

This legislation is not designed to regulate the conduct of foreign lenders. The regulation of their conduct raises a number of questions regarding the limits of U.S. jurisdiction and the consequences of such a provision on international relations. Accordingly, the bill has placed the burden of compliance on those persons who actually effect transactions in securities issued by U.S. companies—foreign borrowers. Consistent with the exclusion of foreign lenders from the scope of section 7(f), the legislation is not intended to create any new express private right of action against foreign lenders.

Section 2(b) provides that the amendments made by this bill will take effect on the date of introduction except for application of the criminal provisions of section 32 of the Exchange Act which shall be effective immediately on enactment. The amended provisions of section 7 shall apply to any purchase of securities on or after that date. In addition, they will apply to any securities carried on or after the date of introduction, if a loan or extension of credit for the securities originated on or after that date or if the proceeds of a loan used to purchase or carry the securities were disbursed on or after the effective date.

By Mr. WALLOP (for himself and Mr. SIMPSON):

S. 1987. A bill to amend the Tariff Schedules of the United States in order to establish equitable duty rates for sodium bicarbonate; to the Committee on Finance.

DUTY RATES FOR SODIUM BICARBONATE

● Mr. WALLOP. Mr. President, today I am introducing legislation to impose a 20-percent tariff on imports of sodium bicarbonate. This legislation is needed to place American producers on an equal footing with foreign manufacturers and ensure the continued health of the U.S. sodium bicarbonate industry.

Sodium bicarbonate is a food and chemical product familiar to most of us as the baking soda we use in our homes. But sodium bicarbonate also has hundreds of other industrial and pharmaceutical applications, such as fire extinguishers, tanning, animal feed, and oil and drilling rigs. In addition, two programs currently underway use sodium bicarbonate to alleviate environmental damage caused by acid rain.

Unequal international trade rules are hurting U.S. sodium bicarbonate producers. American manufacturers can't sell in foreign countries because of high import taxes and other import barriers, yet foreign manufacturers can sell freely in the United States without paying any duties.

As a result, imports of underpriced sodium bicarbonate, primarily from Mexico and West Germany, have been seriously damaging our domestic industry in recent years. Between 1981 and 1984, the volume of U.S. imports has increased over fivefold from 3,410 to 17,376 tons, and imports are projected to increase further in 1985. Imports from Mexico and West Germany, which account for nearly three-fourths of imported sodium bicarbonate, consistently undersell domestically produced material by as much as 35 percent.

Nations such as Mexico watch the United States markets in sodium bicarbonate, as some other products, to see what prices can guarantee sales in the United States and what amount of product they can ship here. The objective of earning foreign exchange can be as important as return on investment. In Mexico the capability to follow such an approach is enhanced because production comes from one producer.

The dramatic increase in imports of sodium bicarbonate has been assisted by duty-free entry into the United States. By contrast, Mexico imposes a 25-percent duty, West Germany collects a 10.1-percent duty, Canada imposes a 11-percent duty, and many Latin American countries impose duties of 30 percent and 35 percent. More seriously, Mexico also excludes almost all imports by denying the required import permits.

Because of this flood of duty-free imports, our domestic industry is suffering. U.S. manufacturers are sophisticated, efficient and competitive with producers throughout the world. Yet, because of increasing duty-free imports, U.S. producers have suffered from declining production, sales, revenues, prices, and employment at a time when the American economy as a whole has experienced a recovery.

Church & Dwight—the Nation's largest sodium bicarbonate producer and one of America's oldest companies—is a highly specialized operation whose growth has been based on this one basic product. Church & Dwight employs 600 people at its operations in New Jersey, New York, Ohio, and Wyoming, and has produced the familiar Arm & Hammer brand baking soda for almost 140 years. Its Green River, WY, plant is the world's largest. Other producers include Stauffer Chemical, which has operations in southwest Wyoming and Riverside Chemical Products in Georgia.

With the world's largest deposits of raw materials and with modern plants and technology, American sodium bicarbonate producers make the highest quality sodium bicarbonate in the world and sell it at low prices. They can compete in the United States and abroad if they are given fair treatment. However, because of unequal trade rules, U.S. producers are penalized in the world market.

The bill I am introducing today will restore fairness, encourage reciprocity, and ensure the continuation of a strong U.S. industry. By bringing U.S. duties in line with those of our competitors, a 20-percent import duty will allow U.S. companies to compete on an equal footing in the world market. In addition, a 20-percent duty will send a message to our competitors that we will not be taken advantage of, and will encourage them to open their markets and treat us fairly. Finally, a 20-percent duty will ensure the continued health of an important U.S. industry threatened by unfair trade rules.

Even with a 20-percent duty, the United States will still be more open than many other countries.

Congressman DELBERT LATTA of Ohio is introducing a similar bill in the House. I have contacted the U.S. Trade Representative's office to ask for his assistance. American sodium bicarbonate producers need our help to ensure that they are not hurt by unfair trade rules.●

By Mr. MELCHER (for himself, Mr. INOUYE, Mr. DECONCINI, Mr. BURDICK, Mr. ANDREWS, Mr. ABDNOR, and Mr. BINGAMAN):

S. 1988. A bill to establish a program for the prevention and control of diabetes among native Americans; to the Select Committee on Indian Affairs.

NATIVE AMERICAN DIABETES PREVENTION AND CONTROL ACT

Mr. MELCHER. Mr. President, today I am introducing legislation to address one of the most serious and far-reaching health problems affecting Indians, Alaskan Natives, and native Hawaiians. The incidence and prevalence of diabetes among these native Americans substantially exceeds the incidence and prevalence of diabetes among the general population in the United States. In many tribes, the incidence of diabetes exceeds 40 percent compared with 3 percent in the general U.S. population.

The consequence of this problem among the native populations is serious and long-term. Failure to prevent and control diabetes results in kidney failure, amputations, and blindness. Unless more intense and immediate steps are taken to prevent and control this disease, the costs to the Federal Government to treat the disease's long-term complications will skyrocket. Fortunately, the U.S. Indian Health Service has in place a model diabetes care program, which will be significantly strengthened and enhanced by this legislation.

The purpose of this bill is: First, to expand and coordinate Federal research programs aimed at diabetes and related complications among native Americans; second, to strengthen the Indian Health Service efforts in the treatment, prevention, and control of diabetes and related complications; and third, to achieve a reduction in the incidence of diabetes among our native populations. This bill is based upon a study conducted at the direction of the Select Committee on Indian Affairs. This study provides a preliminary sketch of the problem of diabetes among the native populations in this country, the extent of existing research programs underway to understsand the disease, and identifies ways to improve the efforts to treat, prevent and control diabetes.

The bill requires a comprehensive study by the Secretary of the Department of Health and Human Services of diabetes among the native populations, and requires the Secretary to identify and implement a program within the Indian Health Service which will, among other things, reduce the incidence of diabetes among the native populations. Further, the bill acknowledges the existing model diabetes program within the Indian Health Service and builds on this program.

The bill identifies ways to assure that prevention and treatment strategies developed by the program are disseminated widely enough to benefit all native Americans. Outreach programs, health education activities, special training for health care providers, and a uniform and comprehensive data collection system are all key parts to curbing the spread of the disease and controlling its long-term complications.

Finally the bill directs to the Department of Health and Human Services to develop a cohesive and comprehensive research program regarding diabetes and its related complications among native Americans.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1988

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Native American Diabetes Prevention and Control Act of 1985".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds that—

(1) the incident of diabetes among Native Americans (which for purposes of this Act includes Indians, Native Alaskans, and Native Hawaiians) is significantly higher than in other population groups within the United States;

(2) in several Indian tribes over 40 percent of the adults have diabetes compared with approximately 3 percent of the overall United States adult population;

(3) diabetes has become the second leading reason for outpatient visits by Native Americans to Indian Health Service facilities nationwide;

(4) serious complications of diabetes, such as kidney failure, hypertension, amputation, and blindness, are increasing in frequency among Native Americans;

(5) health care costs for treatment of diabetes and related complications among Native Americans will increase significantly in the long term unless the Department of Health and Human Services (hereinafter referred to as the "Department")—

(A) determines the cause of diabetes among Native Americans,

(B) develops early diagnosis, treatment, and prevention programs to reduce the incidence of diabetes among Native Americans, and

(C) trains, or provides for the training of, Federal and Native American health care providers in the diagnosis, treatment, and control of diabetes and related complications;

(6) a Model Diabetes Control Program exists within the Indian Health Service, consisting of seven project sites which serve only 10 percent of the Indian Health Service patients; and

(7) outreach services and the conveyance of effective treatment strategies from the model project sites need to be implemented.

(b) The purposes of this Act are—

(1) to broaden the research program of the Department relating to diabetes and related complications among Native Americans;

(2) to strengthen the efforts of the Indian Health Service for the treatment of diabetes through the implementation of a program for the prevention and control of diabetes and related complications on each Indian Reservation, for each Alaskan Native Village, and in Hawaii; and

(3) to achieve a reduction in the incidence of diabetes among Native American populations to a rate comparable to that of the general United States population.

STUDY ON DIABETES AMONG NATIVE AMERICANS

SEC. 3. (a) The Secretary of Health and Human Services (hereinafter referred to as the "Secretary") shall determine—

(1) the incidence of diabetes among Native Americans;

(2) activities the Indian Health Service should take—

(A) to reduce the incidence of diabetes among Native Americans,

(B) to provide Native Americans with guidance in the prevention, treatment, and control of diabetes,

(C) to provide early diagnosis of diabetes among Native Americans, and

(D) to ensure that proper continuing health care is provided to Native Americans who are diagnosed as diabetic; and

(3) the fiscal impact to the Federal Government of treating the long-term complications of diabetes based upon the existing prevalence and incidence of diabetes among Native Americans.

(b) The Secretary shall prepare an inventory of all health care programs and resources (public and private) within the United States that are available for the treatment, prevention, or control of diabetes among Native Americans.

(c) Within 18 months after the date of enactment of this Act, the Secretary shall prepare and transmit to the President and the Congress a report describing the determinations made under subsection (a), containing the inventory prepared under subsection (b), and describing the research activities conducted under section 6.

DIABETES CARE PROGRAM

SEC. 4. (a) Within 18 months after the date of enactment of this Act, the Secretary shall implement a program designed—

(1) to strengthen and expand the diabetes control program of the Indian Health Service;

(2) to enable all service units of the Indian Health Service to treat effectively—

(A) newly diagnosed diabetics in order to reduce future complications from diabetes,

(B) individuals who have a high risk of becoming diabetic in order to reduce the incidence of diabetes, and

(C) short-term and long-term complications of diabetes;

(3) to conduct, for Federal, tribal, and other Native American health care providers (including community health representatives), training programs concerning cur-

rent methods of prevention, diagnosis, and treatment of diabetes and related complications among Native Americans;

(4) to determine the appropriate delivery to Native Americans of health care services relating to diabetes;

(5) to develop and present health education information to Native American communities and schools concerning the prevention, treatment, and control of diabetes; and

(6) to ensure that proper continuing health care is provided to Native Americans who are diagnosed as diabetic.

(b) The Secretary shall—

(1) promote coordination and cooperation between all health care providers in the delivery of diabetes related services; and

(2) encourage and fund joint projects between Federal and tribal health care facilities and Native American communities for the prevention and treatment of diabetes.

(c)(1) The Secretary shall continue to maintain each of the following model diabetes clinics which are in existence on the date of enactment of this Act:

(A) Claremore Indian Hospital in Oklahoma;

(P) Fort Totten Health Center in North Dakota;

(C) Sacaton Indian Hospital in Arizona;

(D) Winnebago Indian Hospital in Nebraska;

(E) Albuquerque Indian Hospital in New Mexico;

(F) Terry, Princeton, and Old Town Health Centers in Maine; and

(G) Bellingham Health Center in Washington.

(2) Within 2 years after the date of enactment of this Act, the Secretary shall establish and maintain a model diabetes clinic in each of the following locations:

(A) the Navajo reservation;

(B) the Papago Reservation;

(C) Montana;

(D) Minnesota; and

(E) Hawaii.

(3) The Secretary shall develop and implement an outreach program to ensure that the achievements and benefits derived from the activities of the model diabetes clinics maintained under this section are used by all service units of the Indian Health Service in the diagnosis, prevention, and treatment of diabetes among Native Americans.

(d) The Secretary shall maintain appropriate personnel within the Indian Health Service to develop and implement the provisions of this Act and to manage and coordinate the diabetes care program of the Indian Health Service.

(e) The Secretary shall submit to the Congress an annual report outlining the activities, achievements, needs, and future goals of the diabetes care program of the Indian Health Service.

DATA COLLECTION AND ANALYSIS

SEC. 5. The Secretary shall develop and maintain a comprehensive standardized system within the Indian Health Service to collect, analyze, and report data regarding diabetes and related complications among Native Americans. Such system shall be designed to facilitate dissemination of the best available information on diabetes to Native American communities and health care professionals. Such system shall be operational within 2 years after the date of enactment of this Act.

RESEARCH

SEC. 6. The Secretary shall require each agency and unit of the Department which conducts research relating to diabetes—

(1) to give special attention to research concerning the causes, diagnosis, treatment, and prevention of diabetes and related complications among Native Americans; and

(2) to coordinate such research with all other agencies and units of the Department which conduct research relating to diabetes and related complications.

REGULATIONS

SEC. 7. The Secretary may prescribe such regulations as may be necessary to carry out the provisions of this Act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

Mr. DECONCINI. Mr. President, I join my distinguished colleague from Montana in introducing today a bill which addresses one of the most serious chronic health problems to plague our native American communities.

On June 1, 1985, I chaired a Senate Select Committee on Indian Affairs hearing on the need for disease prevention and health promotion programs on Indian reservations. The testimony of tribal, Federal, and medical research representatives spoke of an excessive incidence of diabetes among Indian peoples. This disease and its related complications wreak havoc upon a people whose physiology apparently may not be conditioned to safeguard itself against this dreaded disease. The failure to control this chronic health condition leaves in its trail devastating effects which are long term and frequently fatal. Those who are unfortunately affected by this health problem can suffer kidney failure, blindness, and limb amputations.

This bill is long past due. Enacting this legislation will mean the expansion and coordination of Federal research programs designed to study diabetes and its related complications among native Americans. We will also be strengthening the Indian Health Services capability to prevent, treat, and control the disease and its related complications. Most importantly, we will be taking steps to assure the reduction of the incidence of diabetes in the Indian community.

We need to enhance the fine work of the Indian Health Services as exemplified by the Model Diabetes Program. Our proposed legislation provides the Indian Health Services with numerous avenues for developing preventive and curative program strategies. The bill also includes provisions for a cohesive and comprehensive research program which will place emphasis on the cause, diagnosis, treatment and prevention of diabetes and related health problems among Indian peoples.

The long-term benefits of this bill are tremendous. The payback for the individual and for the Federal Government justify the immediate commitment of resources. We have made great strides in improving the health status of Native Americans in the past decade. However, we cannot overlook the simple fact that one in every five Indian person suffers from this terrible health problem. I urge my colleagues to join the Senator from Montana and me in responding to this critical need in the Native American community.

By Mrs. HAWKINS (for herself, Mr. THURMOND, Mr. HATCH, and Mr. DIXON):

S. 1989. A bill to open Japanese markets for U.S. semiconductors and establish fair conditions to trade in semiconductors; to the Committee on Finance.

SEMICONDUCTOR TRADE FAIRNESS ACT

● Mrs. HAWKINS. Mr. President, in an effort to promote the future competitiveness of the U.S. semiconductor industry and to assure our national security, today I am introducing the Semiconductor Trade Fairness Act. This much needed trade legislation provides congressional findings regarding unfair trade practices by Japan, and directs the President to take specific action to enforce the trade rights of U.S. semiconductor manufacturers.

The Government of Japan, through its anticompetitive market structure, has prohibited United States semiconductor manufacturers fair access to its market. While United States manufacturers have held 55 percent of the semiconductor market in Europe, 83 percent of the United States market, and 47 percent in all other markets, United States market share in Japan has been steadily held to 10 percent over the last 10 years. This has had a tremendous impact on the future of our semiconductor industry and our national security.

For their most recent quarters, U.S. semiconductor companies reported operating results which ranged from marginal profitability at best to major losses at worst. In aggregate, Advanced Micro Devices, Inc., reported operating losses of $180.1 million, as compared with profits of $355.8 million in the comparable quarter last year. These losses—which, on an annualized basis, would total $720.4 million—are attributable both to a substantial drop in semiconductor demand, and to the severe decline in semiconductor prices which has occurred. The semiconductor price reductions in turn can, to a large extent, be attributed to Japanese companies' pricing patterns. As W.J. Sanders III, the chairman of the board and president of Advanced Micro Devices, stated in his company's "Second Quarter Report, Fiscal Year 1986," issued November 8, 1985:

Unfortunately, we are not able to enjoy the profits of our success [as innovative developers of EPROM's]. The reason is predatory pricing by Japanese manufacturers who have targeted this market segment for domination. These companies, parts of huge conglomerates, seem prepared to "buy" market share by setting prices extremely

low—even below manfacturing costs—in order to squeeze U.S. manufacturers out of the market. This practice is called "dumping" and it is a violation of U.S. trade law. The effect of Japanese dumping has been, for example, to force the price of 256k EPROM's down from $17 at the beginning of 1985 to less than $4 in August. That is well below manufacturing cost and, as a consequence, EPROM's were responsible for more than half of AMD's operating loss during the part quarter.

The Intel Corp. "Third Quarter Report 1985," also reported that:

The most acute problem we face is in memory components. Japanese manufacturers have targeted the EPROM market and have driven prices down in an effort to capture market share without regard to profit. For example, the price of a 256K EPROM has fallen 75 percent this. . . . low prices also caused us to announce recently our withdrawal from the dynamic random access memory (dram) market.

Another reason for the losses posted by United States semiconductor companies is their lack of full access to the Japanese market. In National Semiconductor's "1985 Annual Report," Charles E. Sporck, chairman of the board of directors, noted:

[W]e support the U.S. semiconductor industry's petition for action under section 301 of the Trade Act of 1974. We ask that the President of the United States adopt as policy specific objectives, including a dramatic improvement in U.S. sales in Japan commensurate with those in other world markets. . . . U.S. producers must have fair access to that important market, if they are to remain competitive and viable in the long term.

One result of these operating losses has been a substantial decline in employment by U.S. semiconductor manufacturers. In the 10 months from December 1984 to October 1985, Dataquest, Inc., estimates that employment by U.S. semiconductor companies declined by 14 percent or 63,846 workers. The attached report by Dataquest details the extent of this employment decline by individual companies and provides similar information for Japanese semiconductor producers.

Because of the increased reliance by the U.S. Department of Defense on sophisticated systems, semiconductors have become central to our national security. Increasingly, super computers, which are the heart of our national defense, rely upon foreign manufactured high-speed semiconductors.

Because the electronics portion of the U.S. defense budget is increasing, semiconductor defense sales are projected to increase from $1 billion in 1983 to $2.45 billion. Military procurement is estimated to represented 10 percent of the end-use semiconductor market.

When the United States becomes increasingly dependent upon foreign sources for vital defense assets, our national security is in jeopardy. In the event of war, our semiconductor source and supply routes could be easily disrupted. Without domestic research and development and production of the most sophisticated semiconductors, the United States is a nation at risk with regard to our national security and international competitiveness.

I would like to invite my colleagues to join me in this effort by cosponsoring my legislation, which I am pleased to indicated has been endorsed by the Semiconductor Industry Association.●

By Mr. QUAYLE (for himself and Mr. KENNEDY):

S. 1990. A bill to establish an Education and Training Partnership to administer the Wagner-Peyser Act, the Job Training Partnership Act, and the Carl D. Perkins Vocational Education Act, and for other purposes; to the Committee on Labor and Human Resources.

EDUCATION AND TRAINING PARTNERSHIP ACT

● Mr. QUAYLE. Mr. President, today I am introducing a bill to establish an independent agency in the executive branch of the Federal Government called the Education and Training Partnership. The Partnership will administer the Job Training Partnership Act, the Wagner-Peyser Act, which authorized the Employment Service, and the Carl D. Perkins Vocational Education Act. Senator ROTH, chairman of the Committee on Governmental Affairs that has jurisdiction over this bill, has agreed to let the Subcommittee on Employment and Productivity which I chair, hold hearings on it.

My objective is to examine the administrative structure that carries out the Federal role in the labor market. Various agencies share responsibility for carrying out the Federal role. They set Federal policy, mainly through regulations, and they have related responsibilities, such as research and data collection. I am exploring how to get these Federal agencies to work more closely together, in conjunction with the private sector.

Since 1982, Congress has revised the laws governing job training, vocational education, and the Employment Service to improve the administration of these programs. The rationale for administrative reform was to make these programs more responsive to our Nation's labor market needs by increasing the involvement of the private sector and by promoting coordination among related activities at the State and local levels. Although, these changes were mandated at the State and local levels, they did not affect Federal administration.

On April 3, Senators HATCH and KENNEDY issued statements in support of my proposal to study whether the principles underlying those State and local changes also apply to the Federal Government. We want to examine whether it is desirable to improve communications among Federal agencies with related responsibilities and increase private sector involvement at the Federal level. If so, how can we do it?

Now I am coming forward with a specific plan that I hope will serve as a focal point for discussing these issues. I am pleased to have Senator KENNEDY as a cosponsor of this proposal.

The Education and Training Partnership will be headed by a Board of Directors that will be composed of nine members. Five of the nine members will be private sector representatives who will be appointed by the President with the advice and consent of the Senate. Three of the five will be representatives of employers and two will be representatives of labor. They will serve staggered, 5-year terms. One of these five private sector members will be appointed by the President to serve as Chairman.

The remaining four representatives will be the Secretaries of Labor, Education, Commerce, and Health and Human Services.

The Partnership will assume the responsibilities assigned to the Secretary of Labor under the Job Training Partnership Act [JTPA] and the Wagner-Peyser Act and the responsibilities assigned to the Secretary of Education under the Carl D. Perkins Vocational Education Act.

I would like to emphasize that this ageny will not create a new bureaucracy because the Board of Directors may delegate administrative responsibilities back to either the Secretary of Labor or to the Secretary of Education or to both. However, in order to give the Board substantial authority, it is prohibited from delegating the approval of State grant applications for JTPA, vocational education, and the Employment Service.

I plan to conduct hearings at the beginning of the next session. Comments from all interested parties are welcome and invited. To discuss this bill with a member of my staff, please contact Renee Coe at 224-6306. Her mailing address is Labor and Human Resources Committee, 428 Dirksen Senate Office Building, Washington DC 20510.

I ask unanimous consent to have the text of the bill printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1990

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Education and Training Partnership Act".

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this Act to establish an Education and Training Partnership to be headed by a Board of Directors to involve the private sector in the Federal ad-

ministration of certain education and training programs.

ESTABLISHMENT OF EDUCATION AND TRAINING PARTNERSHIP

SEC. 3. (a) There is established an Education and Training Partnership as an independent agency in the executive branch of the Federal Government.

(b)(1) The Education and Training Partnership shall be headed by a Board of Directors to be composed of 9 members as follows:

(A) Three individuals appointed by the President, by and with the advice and consent of the Senate, who are representative of employers in the United States.

(B) Two individuals who are appointed by the President, by and with the advice and consent of the Senate, who are representative of labor.

(C) The Secretary of Labor.

(D) The Secretary of Education.

(E) The Secretary of Commerce.

(F) The Secretary of Health and Human Services.

(2) The President shall select one of the members of the Board who was appointed under clause (A) or (B) of paragraph (1) to serve as Chairman.

(3) Each Secretary specified in paragraph (1) may delegate the responsibility of serving on the Board under this Act only to an officer of the Department who is appointed by the President, by and with the advice and consent of the Senate.

(c) The terms of office of the members of the Board appointed pursuant to clause (A) and (B) of subsection (b)(1) shall be 5 years, except that—

(1) members of the board first taking office shall serve as designated by the President 1 for a term of 1 year, 1 for a term of 2 years, 1 for a term of 3 years, 1 for a term of 4 years, and 1 for a term of 5 year, and

(2) any member of the Board appointed to fill a vacancy shall serve for the remainder of the term for which the predecessor of the member was appointed.

(d)(1)(A) Members of the Board who are not regular full-time employees of the United States shall, while serving on the business of the Board, be entitled to receive compensation at rates fixed, without regard to the civil service and classification laws, by the President, including traveltime, for each day they are engaged in the performance of their duties as members of the Board. Such members of the Board shall be entitled to reimbursement for travel, subsistence, and other necessary expenses incurred by them in carrying out their duties under this Act.

(B) Members of the Board who are employed by the Federal Government shall serve without compensation but shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in carrying out their duties under this Act.

(2)(A) The Chairman of the Board selected pursuant to subsection (b) of this section shall be a full-time employee of the United States.

(B) The President shall, without regard to the civil service and classification laws, fix the compensation of the Chairman of the Board.

FUNCTIONS OF THE EDUCATION AND TRAINING PARTNERSHIP

SEC. 4. There are transferred to the Education and Training Partnership, and the Board of Directors of the Education and Training Partnership shall perform, the functions of—

(1) the Secretary of Labor—

(A) under the Wagner-Peyser Act; and

(B) under the Job Training Partnership Act; and

(2) the Secretary of Education under the Carl D. Perkins Vocational Education Act.

DELEGATION

SEC. 5. (a) The Board of Directors of the Education and Training Partnership shall exercise all powers necessary to carry out the functions of the Eduction and Training Partnership under this or any other Act.

(b) The Board of Directors may delegate any function under this Act to the Secretary of Labor or to the Secretary of Education, or to both the Secretary of Labor and the Secretary of Education, except the approval of applications for grants under the provisions of law described in clauses (1) and (2) in section 4.

PERSONNEL OF THE BOARD OF DIRECTORS

SEC. 6. (a) The Board of Directors is authorized, without regard to civil service and classification laws, to appoint and fix the compensation of such officers and employees and describe their functions and duties as may be necessary to carry out the provisions of this Act.

(b) The Board of Directors may obtain the services of experts and consultants in accordance with provisions of section 3109 of title 5, United States Code.

TRANSFERS

SEC. 7. (a) All assets, liabilities, contracts, property, and records as are determined by the Director of the Office of Management and Budget to be employed, held, or used primarily in connection with any function transferred under the provisions of section 4 are transferred to the Education and Training Partnership.

(b) Only such personnel engaged in administering the provisions of law described in clauses (1) and (2) of section 4 as the Board of Directors determines are necessary to carry out its functions under this Act may be transferred by the Director of the Office of Management and Budget under this Act.

ADMINISTRATIVE PROVISIONS

SEC. 8. (a) The Board of Directors may delegate and redelegate authority to exercise the functions transferred to the Education and Training Partnership by this Act, except as provided in section 5(b), to any officer or employee of the Education and Training Partnership as the Board of Directors may designate.

(b) In order to carry out the functions of the Education and Training Partnership prescribed by this Act, the Board of Directors is authorized—

(1) to adopt, alter, and use a seal;

(2) to adopt, amend, and repeal rules and regulations governing the manner of its operations, organization, and personnel, and the performance of the powers and duties granted to or imposed upon it by law;

(3) to accept gifts or donations of services, money, or property, real, personal, or mixed, tangible or intangible;

(4) to enter into contracts or other arrangements or modifications thereof, with any government, any agency or department of the United States, or with any person, firm, association, or corporation, and such contracts or other arrangements, or modifications thereof, may be entered into without legal consideration, without performance or other bonds, and without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5);

(5) to make advance, progress, and other payments which the Board of Directors deems necessary under this Act without regard to the provisions of section 3324 of title 31, United States Code; and

(6) to take such other action as may be necessary to carry out the provisions of this Act.

(c) The Secretary of Labor and the Secretary of Education are each authorized to take such action to reduce the size of each agency, office, and division of the Department of Labor and the Department of Education, as the case may be, as necessary by reason of the transfers made by section 4 of this Act.

ANNUAL REPORT

SEC. 9. The Board of Directors shall, as soon as practicable after the end of each fiscal year, make a report in writing to the President for submission to the Congress on the activities of the Education and Training Partnership during the preceding fiscal year.

SAVINGS PROVISIONS

SEC. 10. (a) All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective in the exercise of functions which are transferred under this Act, by (A) any agency or office, or part thereof, any functions of which are transferred by this Act, or (B) any court of competent jurisdiction; and

(2) which are in effect at the time this Act takes effect;

shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Board of Directors, by any court of competent jurisdiction, or by operation of law.

(b)(1) This Act shall not affect any proceedings pending at the time this section takes effect before any agency or office, or part thereof, functions of which are transferred by this Act, except that such proceedings, to the extent that they relate to functions so transferred, shall be continued before the Board of Directors.

(2) To the extent that such proceedings do not relate to functions so transferred, such proceedings shall be continued before the agency or office, or part thereof, before which they were pending at the time of such transfer.

(3) In the case of paragraph (1) or (2) orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this Act had not been enacted. Orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or repealed by the Board of Directors, by a court of competent jurisdiction, or by operation of law.

(c)(1) Except as provided in paragraph (3)—

(A) the provisions of this Act shall not affect suits commenced prior to the date this section takes effect; and

(B) in all such suits proceedings shall be had, appeals taken, and judgments rendered, in the same manner and effect as if this Act had not been enacted.

(2)(A) No suit, action, or other proceeding commenced by or against any officer in his official capacity as an officer of any agency or office, or part thereof, functions of which are transferred by this Act, shall abate by reason of the enactment of this Act. No cause of action by or against any agency or office, or part thereof, functions of which are transferred by this Act, or by or against

any officer thereof in his official capacity shall abate by reason of the enactment of this Act.

(B) Causes of actions, suits, or other proceedings may be asserted by or against the United States or such official of the Education and Training Partnership as may be appropriate. In any litigation pending when this section takes effect, the court may at any time, on its own motion or that of any party, enter an order which will give effect to the provisions of this subsection.

(3) If before the date on which this Act takes effect, any agency or office, or officer thereof in his official capacity, is a party to a suit, and under this Act—

(A) such agency or office, or any part there of, is transferred to the Board of Directors; or

(B) any function of such agency, office, or part thereof, or officer is transferred to the Board of Directors;

then such suit shall be continued by the Board of Directors (except in the case of a suit not involving functions transferred to the Board of Directors, in which case the suit shall be continued by the agency, office, or part thereof, or officer which was a party to the suit prior to the effective date of this Act).

(d) With respect to any functions transferred by this Act and exercised after the effective date of this Act, reference in any other Federal law to any agency, office, or part thereof, or officer so transferred or functions of which are so transferred shall be deemed to mean the Board of Directors of the Education and Training Partnership in which such function is vested pursuant to this Act.

(e) This Act shall not have the effect of releasing or extinguishing any criminal prosecution, penalty, forfeiture, or liability incurred as a result of any function transferred under this Act.

(f) Orders and actions of the Board of Directors in the exercise of functions transferred under this Act shall be subject to judicial review to the same extent and in the same manner as if such orders and actions had been by the agency or office, or part thereof, exercising such functions, immediately preceding their transfer. Any statutory requirements relating to notice, hearings, action upon the record, or administrative review that apply to any function transferred by this Act shall apply to the exercise of such function by the Board of Directors.

(g) In the exercise of the functions transferred under this Act, the Board of Directors shall have the same authority as that vested in the agency or office, or part thereof, exercising such functions immediately preceding their transfer, and actions of the Board of Directors in exercising such functions shall have the same force and effect as when exercised by such agency or office, or part thereof.

DEFINITIONS

SEC. 11. For the purpose of this Act—

(1) the term "Board" means the Board of Directors of the Education and Training Partnership established under section 3 of this Act; and

(2) the term "function" includes any duty, obligation, power, authority, responsibility, right, privilege, activity, or program.

EFFECTIVE DATE

SEC. 12. (a) This Act, other than this section, shall take effect 90 days after the date of enactment of this Act or on such prior date after the effective date of this Act as the President shall prescribe and publish in the Federal Register.

(b) Notwithstanding subsection (a) of this section, any of the officers provided for in clauses (A) and (B) of section 3(b)(1) of this Act may be appointed for in the manner provided for in this Act at any time after the date of enactment of this Act. Such officer shall be compensated from the date they first take office at the appropriate rates provided for in this Act. Such compensation related expenses of such officers shall be paid from funds available for the functions to be transferred to the Education and Training Partnership under this Act.●

By Mr. ANDREWS (for himself, Mr. MELCHER, Mr. ABDNOR, Mr. BURDICK, Mr. DECONCINI, Mr. INOUYE, Mr. MURKOWSKI, and Mr. GOLDWATER):

S. 1991. A bill to extend programs under the Native American Programs Act of 1974 through fiscal year 1990; to the Committee on Indian Affairs.

NATIVE AMERICAN PROGRAMS ACT EXTENSION

● Mr. ANDREWS. Mr. President, I am pleased to introduce today a bill to extend through 1990 authorization for funding of programs under the Native American Programs Act of 1974. I introduce this legislation for myself and for Senators MELCHER, ABDNOR, BURDICK, DECONCINI, INOUYE, and GOLDWATER.

Mr. President, this legislation will assure continuation of a valuable program that enhances the ability of off-reservation groups, including rural, urban, Native Alaskan, and native Hawaiian organizations, as well as reservation based Indian tribes to engage in social and economic self-sufficiency. Under the Native American Programs Act, each tribe or off-reservation native American group has the opportunity and the responsibility to decide for itself what its major social and economic priorities are, and how they will address these areas. ANA is truly a program that promotes and endorses self-determination for native Americans.●

By Mr. STEVENS (by request):

S. 1992. A bill to preserve the rights of certain parties with an interest in certain vessels or fishing facilities, and for other purposes; to the Committee on Commerce, Science, and Transportation.

S. 1993. A bill to preserve the rights of certain parties with an interest in aircrafts, aircraft parts, or vessels, and for other purposes; to the Committee on Commerce, Science, and Transportation.

ADMINISTRATION OF THE TITLE XI LOAN GUARANTEE PROGRAM

● Mr. STEVENS. Mr. President, I am introducing two bills on behalf of the administration designed to reinstate the previous authority of the Secretaries of Transportation and Commerce to to protect the interests of the Federal Government under the Loan Guarantee Program of Title XI of the Merchant Marine Act of 1936.

Under the Title XI Loan Guarantee Program, the Federal Government guarantees obligations to finance the construction, reconstruction or reconditioning of U.S.-flag commercial vessels and fishery facilities. The Secretary of Transportation administers the program for U.S.-flag commercial vessels, and the Secretary of Commerce has similar authority with respect to fishing vessels and fishery facilities.

Prior to enactment of the Bankruptcy Reform Act of 1978, both the Secretaries had the authority to foreclose on the mortgages of debtor shipowners who had filed for bankruptcy if the foreclosure were found to be in the best interest of the United States.

As a result of the enactment of the bankruptcy reforms, the Secretary of Transportation and the Secretary of Commerce are now blocked by the automatic stay provisions of the Bankruptcy Code from foreclosing on title XI securities for vessels, and must seek relief from a stay in a formal bankruptcy procedure.

We intend to schedule hearings early next year to review both the form and the substance of these bills. A preliminary analysis indicates that Congress may need to act swiftly to remove the serious disadvantage under which the Secretaries have been operating in the administration of the Title XI Loan Guarantee Program.

Mr. President, I ask unanimous consent that the text of the bills be inserted in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 1992

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subchapter I of chapter 13 of title 11, United States Code, is amended by adding at the end thereof the following:

"§ 1308. Fishing Vessels and Facilities.

"(a) The right of a secured party with an interest arising from a preferred ship mortgage under the Ship Mortgage Act, 1920 in, or of a lessor or conditional vendor of, whether as trustee or otherwise, a vessel as defined by section 1101(b) of the Merchant Marine Act of 1936 (46 U.S.C. § 1271(b)), or the right of a secured party with an interest arising from a mortgage on, or other security interest in, a fishery facility as defined by section 1101(k) of the Merchant Marine Act of 1936 (46 U.S.C. § 1271(k)), to take possession of and foreclose on such equipment or facility in compliance with the provisions of the preferred ship mortgage, such other mortgage, security agreement, lease, or conditional sale contract, as the case may be, is not affected by section 362 or 363 of this title or by any power of the court to enjoin such taking of possession or disposition, unless—

"(1) before 60 days after the date of the order for relief under this chapter, the trustee, subject to the court's approval, agrees to preform all obligations of the

debtor that became due on or after such date under such preferred ship mortgage, mortgage, security agreement, lease, or conditional sale contract, as the case may be; and

"(2) any default, other than a default of a kind specified in section 365(b)(2) of this title under such preferred ship mortgage, mortgage, security agreement, lease, or conditional sale contract, as the case may be—

"(A) that occurred before such date is cured before the expiration of such 60-day period; and

"(B) that occurs after such date is cured before the later of-

"(i) 30 days after the date of such default; and

"(ii) the expiration of such 60-day period.

"(b) Any cure under subsection (a)(2) may only be established by payment to the secured party, lessor, or conditional vendor in full in cash of an amount equal to all sums owed, plus payments of all applicable interest.

"(c) The trustee and the secured party, lessor, or conditional vendor, as the case may be, whose right to take possession is protected under subsection (a) of this section may agree subject to the court's approval, to extend the 60-day period specified in subsection (a)(1) of this section.".

(b) The chapter analysis of chapter 13 of title 11, United States Code, is amended by adding at the end of subchapter I the following: "1308. Fishing vessels and facilities.".

S. 1993

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1110(a) of title 11, United States Code, is amended to read as follows:

"(a) The right of a secured party with a purchase-money equipment security interest in, or of a lessor or conditional vendor of, whether as trustee or otherwise, aircraft, aircraft engines, propellers, appliances, or spare parts as defined in section 101 of the Federal Aviation Act of 1958 (49 U.S.C. 1301) that are subject to a purchase-money equipment security interest granted by, leased to, or conditionally sold to, a debtor that is an air carrier operating under a certificate of convenience and necessity issued by the Department of Transportation under section 401 of the Federal Aviation Act of 1958 (49 U.S.C. 1371), to take possession of and foreclose on such equipment in compliance with the provisions of a purchase-money equipment security agreement, lease, or conditional sale contract, as the case may be, or the right of a secured party with an interest arising from a preferred ship mortgage as defined under the Ship Mortgage Act, 1920, in, or of a lessor or conditional vendor of, whether as trustee or otherwse, a vessel as defined by section 1101(b) of the Merchant Marine Act of 1936 (46 App. U.S.C. 1271(b)), or the right of a secured party with an interest arising from a mortgage on, or other security interest in, a fishery facility as defined in section 1101(k) of the Merchant Marine Act of 1936 (46 App. U.S.C. 1271(k)), or of a party with a security interest under any state law applicable to such vessel or facility while under construction, including, but not limited to equipment and appurtenances relating thereto, to take possession of and foreclose on such vessel or facility, or vessel or facility under construction, in compliance with the provisions of the preferred ship mortgage, such other mortgage, other security interest, lease or conditional sale contract, as the case may be, is not affected by section 362 or 363 of this title or by any power of the court to enjoin such taking of possession or disposition, unless—

"(1) before 60 days after the date of the order for relief under this chapter, the trustee, subject to the court's approval, agrees to perform all obligations of the debtor that become due on or after such date under such preferred ship mortgage, mortgage, security agreement, lease, or conditional sale contract, as the case may be; and

"(2) any default, other than a default of a kind specified in section 365(b)(2) of this title, under such preferred ship mortgage, mortgage, security agreement, lease, or conditional sale contract, as the case may be—

"(A) that occurred before such date is cured before the expiration of such 60-day period; and

"(B) that occurs after such date is cured before the later of—

"(i) 30 days after the date of such default; and

"(ii) the expiration of such 60-day period.

"Any cure under subsection (a)(2) may only be established by payment to the secured party, lessor, or conditional vendor in full in cash of an amount equal to all sums owed, plus payment of all applicable interest."●

By Mr. STEVENS:

S. 1994. A bill for the relief of Pedro M. Bertulfo and his wife, Amalia M. Bertulof; to the Committee on the Judiciary.

RELIEF OF PEDRO BERTULFO AND HIS WIFE, AMALIA M. BERTULFO

● Mr. STEVENS. Mr. President, I am introducing today a private relief bill for Pedro and Amalia Bertulfo.

Pedro served honorably on behalf of the Allied Forces in the Philippines during World War II. In return for this service, Mr. Bertulfo was promised U.S. citizenship for himself and his family. Congress passed the Second War Powers Act of 1942 expressly to liberalize the requirements for citizenship for aliens, such as Mr. Bertulfo, who served honorably on behalf of the Allied cause. However, due to incomplete efforts to implement the legislation, Mr. Bertulfo was never able to take advantage of this opportunity.

Amalia and Pedro have been residents of Alaska for several years, but are not eligible for citizenship. This bill is necessary to fulfill the promise of citizenship made to Mr. Bertulof in return for his service in the Philippines in World War II.●

By Mr. STEVENS:

S. 1995. A bill for the relief of David Ford; to the Committee on the Judiciary.

RELIEF OF DAVID FORD

● Mr. STEVENS. Mr. President, I rise today to introduce a private bill for the relief of David Ford.

Mr. Ford has been a resident of the United States for 5 years. When he entered this country, he was married to a U.S. citizen. His application for resident status was denied, however, because he falls within a statutory exclusion. An uncontested charge—brought against him in a New Zealand court in 1973—which resulted in only a $300 fine, has defeated his efforts. The difficulties he experienced in trying to obtain resident status eventually led to the dissolution of his marriage.

There is no administrative remedy available to Mr. Ford. He will not be able to achieve resident status without a private bill. He provides a useful service to the small community in which he lives—being a trained holistic health practitioner. Many people in his community have written me praising David's moral character, and his contributions to their community. I feel it is appropriate to grant Mr. Ford permanent resident status.●

By Mr. STEVENS:

S. 1996. A bill for the relief of Romeo Manabat and his wife Grace Manabat; to the Committee on the Judiciary.

RELIEF OF ROMEO MANABAT AND HIS WIFE GRACE MANABAT

● Mr. STEVENS. Mr. President, I am introducing today a private relief bill for Romeo and Grace Manabat.

This couple is being threatened with deportation because they were married when they immigrated to the United States. Romeo was allowed to immigrate to this country under the second preference—as an unmarried son of a legally admitted resident alien. During the delay between his application and the date Romeo was allowed to immigrate he and Grace were married. Romeo entered the United States in 1980. Grace followed shortly. Their resident status is now being challenged, however, because they were married at the time of their entry.

Many members of both of their families have immigrated to the United States. Romeo and Grace have provided valuable contributions to their community. They have proven hard-working, and, in fact, provide support for Romeo's father.

Removing them from the community would prove a great hardship to both themselves and their family. Without the relief which would be provided by this bill, however, this result is almost inevitable. I feel that the Manabats deserve this assistance.●

By Mr. WALLOP (for himself and Mr. BENTSEN):

S. 1997. A bill to amend the Internal Revenue Code of 1954 to impose a tax on the importation of crude oil and refined petroleum products; to the Committee on Finance.

EXCISE TAX ON IMPORTED CRUDE OIL AND REFINED PETROLEUM PRODUCTS

● Mr. WALLOP. Mr. President, today as a matter of energy policy, and not

as a matter of revenue, I rise to introduce a formula for an imported energy excise tax. I have long struggled with the merits and difficult problems which may result from taxation of energy imports. It seems that, in Congress, there is never a good time to develop thoughtful and lasting energy policy: When energy is in plentiful supply, we won't focus on energy policy; when there is a shortage, we move too quickly to fix blame and punish whatever wrongdoer the witch hunt turns up.

Through the introduction of this bill, my cosponsors and I call for hearings and careful consideration of our energy policies at this time of temporary energy price volatility. The formula presented in this bill I feel makes more sense as a matter of energy policy than do many other alternatives. I am not yet convinced that an energy excise tax is the only, nor even an appropriate, course for implementation of energy policy. I am certain, however, that unless we address such policy in the discussions regarding taxation of energy imports, we will cause the Federal Government to enter an abyss from which it will be difficult to retreat. It could cause economic and energy inefficiencies from which our people may never recover.

The United States of America currently imports about 30 percent of its total energy needs. For a time after the Iranian energy crisis, development of new domestic production and conservation measures, along with the development of alternative sources of energy, caused a reduction in the percentage of our imports. From a peak of 47 percent import reliance in 1977, we were able to reduce reliance to a low of 28 percent in 1982. Once again, imports are increasing and, all estimates are that import reliance in the year 2000 will be upward of 45 percent. This trend, and falling world oil prices, indicate that we are again slipping into the blissful quagmire of undue reliance on imported energy sources.

Forty-two percent of America's energy needs are supplied by oil. The oil industry, from exploration to product delivery, is a high-risk, capital-intensive business, a business where multimillion-dollar investments become worthless overnight. It is a popular windmill for many of the tilting knights whose kingdom is Congress hallowed chambers. But it is an industry whose success in the development and delivery of energy, impacts the everyday lives of each citizen of this great Nation.

The current trends in government taxation and regulation will not advance energy security. In fact they apparently are designed, if at all, to increase reliance on foreign sources. During the tax reform hearings we learned the oil industry bears the highest tax burden among all other industries, when you combine the tax impacts of the income and Superfund taxes, the deceitfully named windfall profits tax, and the various State environmental and severance taxes. Compounding this, the current tax reform proposal now before the House proposes to eliminate percentage depletion, and impinge on the deductibility of intangible drilling costs. Thus, the costs of discovering reserves to replace our depleting proven resources will increase, boding ill for our Nation's continued energy independence.

Last week we read about the divisions and dessension within OPEC. Americans, I think heaved a sigh of relief as we watched the cartel, that has since the early 1970's had so much influence in our everyday lives, fall in disarray. Our preferred perception is that OPEC's demise is forever. Americans are an optimistic people and chose not to look forward and plan for the avoidance of future crises, but rather assume that the future will take care of itself, comforted by a bizarre twist of logic which says in effect "the future is not what it used to be!" Today, now, is the time to enter into far reaching energy policies. Policies which will protect our ability to provide the American people with the future energy independence which is so key to our everyday life, the stability of our economy and our ability to protect our cherished democracy.

OPEC's impotence is temporary. It will reign strong again. I commend for your reading the warning of Mohammed Akacem, an economist at the Saudi Fund for Development in Riyadh, which appeared in the Wall Street Journal, November 11, 1985. In that article, Mr, Akacem outlined a strategy for the recovery of OPEC. As early as the end of this decade, the poorer oil producing countries will have depleted their resources to the point that six Persian Gulf petroleum producing countries will possess a significant portion of the world oil reserves. He states that these gulf producing states will then be in a position to better control the market through "strategic flooding" if necessary. In addition, the new unity which will result among the remaining OPEC powers because of common religion and natural resource-based economies, will make it easier for them to agree on policy and share information that will allow a "relatively slow depletion rate" and "a stable growth of oil prices over time."

To ignore both the disruptive and inflationary results of our past failures in energy planning and the current warnings from OPEC and our own energy experts would be irresponsible. To the extent we jeopardize the security of our freedoms, I believe it to be criminally negligent. The structure of our Government makes it difficult to define long-term policy in terms of more than a few years. But energy policy demands statesman-like forward thinking.

There are many reasons to believe that the current world oil markets present us with a rare opportunity to develop a strategic and innovative long-term energy policy for our Nation. Our failure to examine and take advantage of opportunities now available to us assure that we will again see the time when foreign powers restrict the freedoms and economic opportunities of our people by restricting access to energy.

Today, I introduce an imported oil excise tax which is designed to assist in the implementation of sound energy policy. I personally adamantly reject any import fee whose purpose is merely revenue. All our experience indicate we will find ourselves incapable of weaning the money spenders from the energy policy cow—whatever wisdom indicates to the contrary.

Under the formula presented in this bill, an energy policy price will establish the minimum survival value which a barrel of crude oil, or refined product equivalent should bring on the domestic market. Maintaining a survival price on oil, the building block of energy pricing, has the potential benefits of sustaining reasonable levels of exploration, production, and refining of our traditional energy sources, as well as providing the economic incentives necessary to stimulate further development of alternative sources of energy, fuel switching and conservation. This excise tax seeks to be a stabilizing influence on the supply reliability of energy in America. We hope to prevent the crises in which inevitably we find ourselves when there are large fluctuations of price and supply in the markets of a basic commodity.

For purposes of the bill, I have approximated the energy policy price at $22. Hearings should indicate the appropriate survival standard. $22 is a good deal lower than the current price and perhaps lower than prices may fall though estimates vary considerably lower than that. At this moment no price standard should be fixed in concrete.

Once the energy policy price is established, the oil excise tax would float with the world price of oil. The excise tax would be collected in an amount equal to the difference between the energy policy price and the world oil price.

Thus, if the energy policy price were determined to be $22 and the world price was $20, then the oil excise tax would be $2 per barrel, adjusted for weight and quality.

There should be a differential for imported petroleum products. America's refiners are subjected to environmental requirements not placed on their foreign competition, and to the

extent that these can be quantified and equalized within the excise tax we should do so. In addition we will need to consider how and if application of the fee should be adjusted to encourage retrofitting of our domestic refineries.

I propose this excise tax now because oil prices are weak and will, for a time, continue to fall. Some estimates are that the price of oil will drop to below $20 per barrel by spring and that there will be an oil glut during the foreseeable future as the OPEC members fight economic and domestic problems, and indeed wars, with petrodollars, and the Third World producers try to resolve their debts with increased production.

A carefully structured survival price stabilized by this import fee could be an important tool in the development and implementation of a sound domestic energy policy. But such an excise tax is not without its potential problems. The excise tax must be designed in a fashion which will not result in continued and direct involvement of the Government in regulation of energy prices, nor should it result in a windfall to our domestic energy—be they oil, coal, or alternative—producers or refiners. Under the terms of my bill, the excise tax would automatically terminate when survival targets are reached in the world market. If not carefully designed an oil import fee should be attacked as inflationary or protectionist, both being unacceptable results.

We will need to consider the impact of such a tax on the world oil markets, upon which many of our allies depend. I should also point out that many of those same nations are now considering oil import fees themselves. In addition, as the world's largest energy importer, we must be concerned for the excise tax's impact on OPEC itself and on the debtor nations many of which are our close allies and friends.

Some exemptions may be merited. The bill provides for an exemption for heating oil, to well help minimize regional distortions but that is not without risk. The determination and definition of what heating oil should be exempt will not be an easy task, and I expect the hearing process to aid us in this area. In my judgment, we should consider exemptions for feedstocks used in exports, process fuels, and liquid natural gas.

Energy policy is beginning to get the attention of many of our colleagues and several oil import fee structures have been introduced. I will adamantly oppose any fee that may be enacted because of its revenue-raising abilities, and whose structure is not based on sound energy policy. I intend to chair hearings in the Energy and Agriculture Taxation Subcommittee of the Finance Committee and join Senator BOREN in requesting that the chairman of the full Finance Committee hold hearings. This matter is jointly within the jurisdiction of the Finance and Energy and Natural Resources Committees, the latter, chaired by my good friend Senator MCCLURE. I would welcome the involvement of members of both committees, and other interested Members in discussing and designing sound policy. Mr. President, I call upon this body to join me and my most welcomed cosponsors in consideration of our current energy planning opportunities, and our responsibilities in providing for America's future energy security.●

● Mr. BENTSEN. Mr. President, I am pleased to join the distinguished Senator from Wyoming [Mr. WALLOP] in introducing this bill to improve the energy policy of our country.

The essential import of this bill is to establish a floor price for energy in this country. It accomplishes such a price by levying an import fee on oil that varies according to the prevailing world oil price. The bill sets a trigger price of $22 per barrel under which the U.S. oil price would not be permitted to fall. When the world price falls below that price, the import fee would become effective and would be equivalent to the difference between the world price and $22 per barrel.

It is essential for American energy producers and users to be able to rely on stable energy prices. If energy producers know that prices in this country will not plummet, they will not be deterred from undertaking the risky investments in new production that are necessary to make our country energy independent. Similarly, if energy users know that prices will not plummet, they will be willing to undertake investments in energy conservation and in energy-saving machinery and processes.

This bill will help ensure that our economy will not be at the mercy of foreign energy producers. The more we rely on someone else's oil, the more we allow them to influence and even direct our own economy. Even though we are experiencing a temporary surplus in oil production, the United States continues to import nearly one-third of our domestic energy needs. If we fall into the trap of relying on foreign supplies for our oil needs, we will once again be subject to dramatic swings in oil prices set by others.

Another aspect of this approach to energy policy is its possible effects on the world oil market. The normal expectation over the past several decades is that when the oil market is glutted and prices are soft, U.S. demand will pick up, thereby firming up prices. Under this bill, that won't happen. When world oil prices fall below $22, that decline will not be felt in this country. That could mean that world prices could continue to decline instead of being firmed up by an increase in demand, and that could spell further trouble for OPEC.

It is particularly important to proceed with legislation of this type at this time. The oil market is glutted, OPEC is in disarray, and prices are falling. We cannot allow the whole market to be propped up by a large increase in U.S. demand in response to falling prices. Rather, we must prevent that from happening and do what we can to contribute to the decline in world oil prices.

We of course cannot ignore the effect of legislation like this on the budget deficit. It has been estimated that a $10 per barrel tax on crude oil and oil products would raise about $18 billion per year for the Treasury. Senator WALLOP and I certainly do not expect this tax to reach that magnitude, but the point is that for every dollar of tax, a substantial contribution is made toward reducing the Federal deficits.

Last Mr. President, let me say that we will continue to refine our efforts in proposing an oil import fee. This bill leaves many of the specifics undecided. We will have to have hearings on this early next year. I am pleased that the Senator from Wyoming is taking a lead on this matter and I look forward to working with him and others in the months ahead on this issue.●

By Mr. DOLE (for himself, Mr. BYRD, Mr. LONG, Mr. PACKWOOD, Mr. ZORINSKY, Mr. BENTSEN, Mr. KERRY, Mr. WARNER, Mr. LUGAR, Mr. BAUCUS, Mr. LEAHY, Mr. DURENBERGER, Mr. BRADLEY, Mr. BOSCHWITZ, Mr. HATCH, Mr. THURMOND, Mr. HOLLINGS, Mr. HEINZ, Mr. INOUYE, Mr. LAXALT, Mr. COCHRAN, Mr. HATFIELD, Mr. JOHNSTON, Mr. MATTINGLY, Mr. NUNN, Mr. PRYOR, Mr. COHEN, Mr. D'AMATO, Mr. DIXON, Mr. EXON, Mr. SIMON, Mr. HEFLIN, Mr. STAFFORD, Mr. DOMENICI, Mr. TRIBLE, Mr. MOYNIHAN, Mr. EAST, Mr. MATSUNAGA, Mr. ARMSTRONG, Mr. SYMMS, Mr. ROCKEFELLER, Mr. GORE, Mr. MCCLURE, Mr. RIEGLE, Mr. HELMS, Mr. MURKOWSKI, Mr. BURDICK, Mr. GOLDWATER, Mr. DENTON, Mr. CRANSTON, Mr. HARKIN, Mr. ANDREWS, Mr. SPECTER, Mr. KASTEN, Mr. GRASSLEY, Mr. BIDEN, and Mr. GORTON):

S.J. Res. 254. Joint resolution to designate the year of 1987 as the "National Year of Thanksgiving;" to the Committee on the Judiciary.

NATIONAL YEAR OF THANKSGIVING

Mr. DOLE. Mr. President, the distinguished minority leader, Mr. BYRD and I are introducing a joint resolution to proclaim 1987 as the "National Year

of Thanksgiving." We are joined in this effort by 55 of our colleagues on both sides of the aisle. This joint resolution has been of great interest to the National Committee on the Year of Thanksgiving. A similar joint resolution was introduced in the House earlier this year, and has strong bipartisan support in the other body.

ANNIVERSARY OF THANKSGIVING AS A NATIONAL HOLIDAY

The New Year, 1986, represents the 45th anniversary of Thanksgiving as a national holiday. The timing of Thanksgiving Day in the United States varied a great deal until, on December 26, 1941, Congress declared that it should be celebrated on the fourth Thursday of November each year.

Since that time, all Americans have joined together on this day in giving thanks for the rich national heritage that we share. The United States is a land blessed with almost unlimited personal freedom, unknown in some parts of the world. Believe it or not, the idea of setting aside a special day once a year to express gratitude and give thanks did not originate with the Pilgrims, who survived the winter of 1620 in Plymouth Colony in Massachusetts. Actually, the celebration of a regular day of Thanksgiving can be traced back to early Greek and Roman history.

However, Thanksgiving Day has special meaning for people in this country. Compared to other nations, we are a young country that has grown with the passage of time into one of the most powerful nations on Earth. We are also blessed with a great abundance of human talent and natural resources. Our form of Government has weathered the vicissitudes of history with great adaptability. It has been emulated by other nations, who have watched its success from abroad.

BICENTENNIAL OF THE U.S. CONSTITUTION

Mr. President, the year 1987 will be the 200th anniversary of the U.S. Constitution. On September 17, 1987, the convention of the Constitution of the United States adjourned with a document ready to be ratified by the States. A Commission on the Bicentennial of the Constitution was established by the Congress in 1983 (Public Law 98-101).

The Constitution of the United States remains a living document, capable of adapting to the changes of a modern world and historical events that were probably beyond the foresight of our Founding Fathers. However, they still planned well for this country's future 200 years later. Twentieth century political developments have, at times, tested the resilience of the Government of this country at home and abroad, but the inherent balance of powers has weathered the storms well.

If anything, the provisions of the Constitution, have been clarified and strengthened over the centuries. It is time to celebrate the lasting legacy given us by Thomas Jefferson, John Quincy Adams and the other men who helped create our form of government, 1987 will include a year-long celebration, with local communities celebrating the bicentennial of the U.S. Constitution in their own way.

The year 1987 will also mark the beginning of the 100th Congress. We look forward to the next 2 years and all that can be accomplished to further enhance the history of this great Nation.

I ask unanimous consent that the text of this joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordred to be printed in the RECORD, as follows:

S.J. Res. 254

Whereas the celebration of a Thanksgiving season has been a national tradition observed by the people of the United States from the days of the early settlers to the present time;

Whereas many of the great leaders of the Nation, including Presidents George Washington and Abraham Lincoln, recognized the importance of setting aside a time of Thanksgiving, and Presidential proclamations have established the last Thursday of November as a day of Thanksgiving;

Whereas in 1941, Thanksgiving was established as a permanent national holiday;

Whereas in 1987, the United States will celebrate the bicentennial of the United States Constitution and the opening of the one-hundredth Congress;

Whereas The United States Constitution has adapted to changing times and remains a living document;

Whereas it is appropriate to give thanks for the everyday freedom that the people of the United States so often take for granted;

Whereas the people of the United States should take time to appreciate a land of plenty, a Nation of vast human and natural resources; and

Whereas the people of the United States should better understand the history of the rich American heritage: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the year 1987 is designated as the "National Year of Thanksgiving", and the President is authorized and requested to issue a proclamation calling upon the governors of the several States, the chief officials of local governments, and the people of the United States to observe such year with appropriate ceremories and activities.

ADDITIONAL COSPONSORS

S. 837

At the request of Mr. GLENN, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of S. 837, a bill to amend the Social Security Act to protect beneficiaries under the health care programs of that act from unfit health care practitioners, and otherwise to improve the anti-fraud provisions of that act.

S. 1134

At the request of Mr. COHEN, the name of the Senator from Iowa [Mr. GRASSLEY] was added as a cosponsor of S. 1134, a bill to amend title 5, United States Code, to provide administrative civil penalties for false claims and statements made to the United States by certain recipients of property, services, or money from the United States, by parties to contracts with the United States, or by Federal employees, and for other purposes.

S. 1544

At the request of Mr. ROTH, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 1544, a bill to extend the Trade Adjustment Assistance Program to place such program on a sound financial basis and to reform such program to emphasize the retraining of workers.

S. 1647

At the request of Mr. ROTH, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 1647, a bill to amend the Tariff Act of 1930 to enhance the protection of intellectual property rights.

S. 1855

At the request of Mr. QUAYLE, the name of the Senator from Mississippi [Mr. COCHRAN] was added as a cosponsor of S. 1855, a bill to revise the provisions of the Public Health Service Act relating to health planning.

S. 1860

At the request of Mr. DANFORTH, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 1860, a bill to amend the Trade Act of 1974 to eliminate barriers and distortions to trade, to provide authority for a new round of trade negotiations, to promote U.S. exports, and for other purposes.

S. 1919

At the request of Mr. BUMPERS, his name was added as a cosponsor of S. 1919, a bill to establish a task force to examine the issues associated with abuse of the elderly.

At the request of Mr. ANDREWS, the names of the Senator from Rhode Island [Mr. PELL], the Senator from Kansas [Mr. DOLE], and the Senator from Utah [Mr. GARN] were added as cosponsors of S. 1919, supra.

S. 1923

At the request of Mr. THURMOND, the name of the Senator from Illinois [Mr. DIXON] was added as a cosponsor of S. 1923, a bill to provide for additional bankruptcy judges.

S. 1948

At the request of Mr. WEICKER, the names of the Senator from Hawaii [Mr. INOUYE] and the Senator from North Dakota [Mr. ANDREWS] were added as cosponsors of S. 1948, a bill to assure that high quality services are furnished to developmentally disabled

individuals and mentally ill individuals in residential facilities and by providers of home and community-based services which receive funds under the Medicare or Medicaid Programs, and to amend the Developmental Disabilities Assistance and Bill of Rights Act to require that residential programs meet Medicaid standards.

S. 1966

At the request of Mrs. KASSEBAUM, the names of the Senator from Michigan [Mr. RIEGLE], the Senator from Arkansas [Mr. BUMPERS], and the Senator from Mississippi [Mr. STENNIS] were added as cosponsors of S. 1966, a bill to provide for efficient and equitable use of operating rights at congested airports, and for other purposes.

SENATE JOINT RESOLUTION 220

At the request of Mr. MATTINGLY, the name of the Senator from Alabama [Mr. DENTON] was added as a cosponsor of Senate Joint Resolution 220, a joint resolution to provide for the designation of September 19, 1986, as "National POW/MIA Recognition Day."

SENATOR JOINT RESOLUTION 241

At the request of Mr. DOLE, the names of the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Indiana [Mr. LUGAR], the Senator from North Dakota [Mr. BURDICK], the Senator from South Carolina [Mr. HOLLINGS], and the Senator from Virginia [Mr. WARNER] were added as cosponsors of Senate Joint Resolution 241, a joint resolution designating the week beginning on May 11, 1986, as "National Asthma and Allergy Awareness Week."

SENATE JOINT RESOLUTION 244

At the request of Mr. DECONCINI, the name of the Senator from New Jersey [Mr. BRADLEY] was added as a cosponsor of Senate Joint Resolution 244, a joint resolutoin to designate October 8, 1986, as "National Fire Fighters Day."

SENATE JOINT RESOLUTION 252

At the request of Mr. PELL, the names of the Senator from Arkansas [Mr. BUMPERS], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Connecticut [Mr. DODD], the Senator from Massachusetts [Mr. KERRY], and the Senator from Colorado [Mr. HART] were added as cosponsors of Senate Joint Resolution 252, a joint resolution requesting the President of the United States to negotiate controls upon and the early prohibition of nuclear explosions.

SENATE RESOLUTION 276

At the request of Mr. LAUTENBERG, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of Senate Resolution 276, a resolution expressing the sense of the Senate regarding the Federal air traffic control system.

SENATE RESOLUTION 278

At the request of Mr. SARBANES, his name was added as a cosponsor of Senate Resolution 278, a resolution to disapprove the freeze on funds for the Office of Juvenile Justice and Delinquency Prevention.

At the request of Mr. BYRD, the names of the Senator from Delaware [Mr. BIDEN], the Senator from Alabama [Mr. HEFLIN], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Arizona [Mr. DECONCINI], the Senator from Georgia [Mr. NUNN], the Senator from Tennessee [Mr. SASSER], the Senator from Arkansas [Mr. BUMPERS], the Senator from New York [Mr. MOYNIHAN], the Senator from Vermont [Mr. LEAHY], the Senator from Hawaii [Mr. INOUYE], and the Senator from Mississippi [Mr. STENNIS] were added as cosponsors of Senate Resolution 278, supra.

At the request of Mr. SPECTER, the names of the Senator from Ohio [Mr. METZENBAUM], the Senator from Maryland [Mr. MATHIAS], the Senator from Florida [Mrs. HAWKINS], the Senator from New Jersey [Mr. BRADLEY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Ohio [Mr. GLENN], the Senator from Missouri [Mr. EAGLETON], the Senator from Massachusetts [Mr. KERRY], the Senator from Tennessee [Mr. GORE], the Senator from Michigan [Mr. LEVIN], the Senator from Nevada [Mr. LAXALT], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Michigan [Mr. RIEGLE], the Senator from Iowa [Mr. GRASSLEY], the Senator from Connecticut [Mr. DODD], the Senator from Maine [Mr. MITCHELL], the Senator from Iowa [Mr. HARKIN], and the Senator from Hawaii [Mr. MATSUNAGA] were added as cosponsors of Senate Resolution 278, supra.

At the request of Mr. BINGAMAN, his name was added as a cosponsor of Senate Resolution 278, supra.

SENATE CONCURRENT RESOLUTION 100—RELATING TO THE CIVIL AND POLITICAL RIGHTS ON KIM DAE JUNG

Mr. KERRY (for himself, Mr. SIMON, Mr. PELL, Mr. KENNEDY, Mr. DODD, Mr. HOLLINGS, Mr. CRANSTON, Mr. SARBANES, Mr. RIEGLE, and Mr. HARKIN) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 100

Whereas, the Senate finds that one of the primary purposes of the foreign assistance programs of the United States shall be that of fostering the growth of democratic institutions, the holding of free, fair and honest elections, the respect for freedom of speech and freedom of the press, and the protection of individual civil rights and liberties through the functioning of an independent judiciary;

Whereas, the people of the United States have been more than generous in their commitment to the security and economic well-being of the Republic of Korea since its founding in 1948;

Whereas, this commitment resulted in the loss of the lives of 54,346 Americans servicemen and 103,248 American wounded during the Korean War;

Whereas, the American people have contributed more than $19 billion in economic and military assistance to the Republic of Korea since 1948 and continue to provide financial resources to support the presence of 40,000 American servicemen on Korean soil;

Whereas, recent developments including the indictments of Members of the National Assembly and a resurgence in the use of torture against prominent journalists and other democratic leaders are cause for grave concern over the government's commitment to basic democratic principles;

Whereas, the right to due process for the people of the Republic of Korea is virtually non-existent and an independent and impartial judicial system, for all intents and purposes, does not function; and

Whereas, the prospects for any relaxation in tensions between the North and South is undermined by political instability in the Republic of Korea; Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That Congress finds and declares that the primary purpose of United States assistance to the Republic of Korea shall be to promote the return to true democracy in the Republic of Korea and to that end Congress places the highest priority on:

(1) replacing the current climate of intimidation, abuses of basic human rights and civil liberties, and other anti-democratic actions with an atmosphere of dialogue and trust between the Government of the Republic of Korea and the democratic opposition in that country in an effort to place events of 1980 behind the people of the Republic of Korea;

(2) the full restoration of the political and individual rights of Kim Dae Jung and all others whose political rights are being restricted; and

(3) the peaceful and fully democratic transfer of Presidential power in the Republic of Korea in the 1988 elections should be open to all who are committed to the democratic process.

Mr. KERRY. Mr. President, considerable attention has been focused throughout this year on the deteriorating social, economic, and political situation in the Philippines. The harshness and repression of the 20-year rule of Ferdinand Marcos has sown the seeds of a Communist insurgency which continues to gather strength with each passing day.

For those of us committed to the flourishing of democracy around the world, The Philippines crisis is cause for grave concern. Equally disconcerting is the growing crisis in the Republic of South Korea where yet another dictatorship continues its crackdown on legitimate democratic forces in that country. While the situation in the Republic of Korea has not commended the attention as has the Philippines, that country could be the next crisis area in the Far East. This will be par-

ticularly so if the democratic forces of that country continue to be frustrated by that government's continued crackdown on democratic rights.

That is the reason for my submission today of this concurrent resolution expressing the sense of the Congress that the civil and political rights of Kim Dae Jung be restored and that true democracy be instituted in the Republic of Korea. I am pleased to be joined in this effort by Senators PAUL SIMON, CLAIBORNE PELL, EDWARD KENNEDY, CHRISTOPHER DODD, FRITZ HOLLINGS, ALAN CRANSTON, PAUL SARBANES, DONALD RIEGLE, and TOM HARKIN.

As was reported in the October 20, 1985, edition of the New York Times, the political situation in the Republic of South Korea has taken a turn for the worse in recent months, precipitating expressions of concern on the part of the administration.

According to the Times report:

> In recent months, the authoritarian Government of President Chun Doo Hwan has swung away from relatively tolerant policies of the previous two years toward a new crackdown on dissidents. Students accused of being pro-Communist have been arrested. Teachers have been dismissed for writing magazine articles labeled as seditious. Three journalists were detained and beaten recently by security agents. Judges deemed overly sympathetic to activists have been reassigned.
>
> Perhaps the most vivid example of the Government's hard line was a plan to create reorientation centers for students regarded as left-wing radicals. This idea smacked of re-education camps to many people, and Mr. Chun was forced to back down before fierce political opposition. Among the critics—tactful in public, more aggressive in private—were United States diplomats and State Department officials in Washington. . . .

This crackdown comes at a time when Korean democratic opposition leader, Kim Dae Jung, continues to be denied his basic rights. Kim Dae Jung is a great friend of the United States who is staunchly anti-Communist and one of the greatest advocates of democracy we have in that area of the world.

Kim returned to his homeland in February of this year to rejoin the Korean democratic leadership and to help build a new democratic opposition party. Since his return, he has intermittently been under house arrest; he can neither become a member of a political party nor encourage others to do so; and he cannot vote, campaign, nor run for political office. He remains under a suspended 17½-year sentence on charges that the State Department maintains were fabricated in 1980.

Several hundred other political prisioners and former political prisoners suffer from the same fundamental restrictions which have been imposed on Kim Dae Jung. Until they are lifted, democracy has no genuine opportunity in the Republic of South Korea.

That is why we are submitting this concurrent resolution which details our concerns for democracy in a country which has been a close ally of the United States since its founding in 1948. We believe it is important for the millions of Koreans striving for democracy to have a clear message from the American people that we share their convictions and their aspirations.

Just as it is important for United States credibility around the world that democracy be restored in the Philippines, we believe that the democratic forces in the Republic of Korea deserve our support as well. As is the case with the Philippines, the United States has had a unique relationship with the Republic of South Korea. Some 54,346 American servicemen gave their lives in the Korean war to prevent a Communist takeover of that country and 103,248 of our countrymen were wounded in that struggle. The American people have contributed more than $19 billion in economic and military assistance to the Republic since 1948 and we continue to provide financial resources to support the presence of 40,000 American servicemen on Korean soil. Our commitment to the security of the Republic has been unswerving.

Because of this unique relationship, we believe the United States has a particular obligation to support the democratic forces in the Republic of South Korea—forces which share our own values and aspirations. And we believe the most important contribution the Congress can make at this time is to call upon the Government of the Republic of Korea to reinstate the political and individual rights of Kim Dae Jung.

If there is one thing I learned from my experience in Vietnam it is that the United States cannot save governments which are unwilling to save themselves. We cannot create legitimacy for elites whose own people are given little reason to accord them ligitimacy.

There are so many parallels between the Philippines and the Repubic of Korea. The Philippines crisis was born in 1972 when President Ferdinand Marcos, denied by the Constitution from seeking another term in office, declared martial law. The pretext was a Communist threat, allegedly exacerbated by politically chaotic conditions of the time. Washington even welcomed—as necessary to combat the threat of communism—the demise of what at one time was to have been America's "showcase for democracy" in the Far East.

In 1972, the Communist New People's Army could field only a handful of poorly armed guerrillas in the field. Yet, in the intervening 13 years, as the Marcos regime moved systematically to dismantle most democratic institutions and set about plundering the Philippines economy for the benefit of a few cronies, the insurgency grew commensurate with the abuses. Yet, as long as the illusion of stability prevailed, four American administrations ignored this unconscionable betrayal of the Filipino people.

While it is disturbing and cause for alarm, it is also understandable that the Filipino variation of Marxism/Maoism has increasing appeal, just as it has had in so many other Third World countries. In the status quo, the average Filipino sees only a future of corruption, repression, and grinding poverty. It is small wonder that by capturing the moral high ground of social and economic reform, and individual justice, that the NPA has become an increasingly attractive alternative for a growing number of Filipinos.

It has been a hard lesson to learn, but perhaps we may yet gain something from the Philippines experience that can assist us in addressing the growing crisis in the Republic of Korea. We should have realized from the very beginning that our security interests in the Philippines should have been secondary to what should have been our priority concern 13 years ago—the maintenance of democracy in that country.

In the Republic of South Korea, the democratic opposition fights for free and fair elections in a country whose survival we have guaranteed for 36 years. To sit idly by in silence while the democratic opposition in that country is crushed under the heel of authoritarian rule only invites a Korean version of the Philippines crisis.

Now is the time to act in the case of the Republic of South Korea. The democratic forces in that country need to hear us loud and clear that their well-being is of priority concern for the American people. We need to be unequivocally clear that we have not turned our back on the forces of democracy and have not abandoned them to the vissitudes of a repressive regime. To make our voices heard now will not be soon enough. But at least it will not be too late.

Mr. President, I intended to use this concurrent resolution as the vehicle for pursuing major hearings on the Senate Committee on Foreign Relations on the situation in the Republic of Korea when we return in January.

I ask unanimous consent that a number of articles addressing the situation in the Republic of Korea be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Times, Oct. 7, 1985]

AFTER PAUSE, SEOUL RENEWS CRACKDOWN ON DISSENT

(By Clyde Haberman)

SEOUL, South Korea—The authoritarian Government of President Chun Doo Hwan has begun a new crackdown on dissidents, with a long string of political arrests, indictments, dismissals and even beatings in the last few months.

Officials insist they have not abandoned "liberalization" policies begun more than a year ago. Nevertheless, foreign diplomats and political analysts say the Government has clearly swung toward a hard line after a period in which it seemed to show a greater tolerance for dissent.

Opponents of President Chun say they fear he may tighten controls still further and possibly even go back to the harsh policies that characterized his Government after he seized power in a military coup five years ago.

Perhaps the most graphic symbol of the latest crackdown is a bill that was drafted in early August to create special "reorientation" centers for South Korean college students judged to be left-wing radicals.

SIX MONTHS OF 'GUIDANCE'

The detention centers were to operate outside the normal judicial system. Committees of lawyers and professors would determine whether students should be sent away for up to six months of "guidance and enlightenment" on acceptable political behavior.

"Students should not be active in politics," Education Minister Sohn Jae Suk said in an interview. "They should study and prepare themselves for the future."

But the reaction against the proposal was angry and swift.

The chief political opposition party denounced the bill as an "evil law" and pledged to fight against it in the National Assembly. Dissident activists likened the reorientation centers to the "re-education camps" set up in some Communist countries. One young man in the southwestern city of Kwangju immolated himself in protest.

Even members of Mr. Chun's ruling Democratic Justice Party were unhappy. Two prominent critics, one of them the party's legislative floor leader, were replaced.

BILL WITHDRAWN, BUT NOT DEAD

Because of the unexpectedly harsh criticism, the Government soon withdrew the legislation. But officials say the proposal is not dead, and Mr. Sohn warns that it will be reintroduced if student protests surge again this fall.

Demonstrators are not the only Government targets, however.

At the end of August, two senior editors and a reporter for the newspaper Dong-A Ilbo were detained and beaten by officers of the National Security Planning Agency, formerly known as the Korean Central Intelligence Agency. They were picked up after publication of an article the Government considered "diplomatically sensitive." The incident was widely interpreted as a warning to all journalists.

During the summer, the Government branded a student group called Sammintu as pro-Communist, and arrested or charged 86 of its members. Thirteen were charged with violating the severe National Security Law. If convicted they could be sentenced to death.

STUDENTS ACCUSED OF SPYING

Twenty-two other people, most of them students, were arrested this month and accused of belonging to two North Korean espionage rings. Separate raids led to the arrest of 66 others in June.

For five days in August, the police put South Korea's best-known dissident politician, Kim Dae Jung, under house arrest to keep him from attending a convention of the main opposition party.

In August, Mr. Sohn's ministry ordered local education boards to dismiss 15 elementary- and high-school teachers for writing "seditious" magazine articles. Hundreds of books and other publications have been banned as subversive.

The Education Ministry also removed Lee Hyu Jae as president of Seoul National University, South Korea's most prestigious, after he refused to expel seven student activists.

Three judges regarded as too "soft" on demonstrators were transferred from Seoul to provincial posts.

In the most recent incident, two opposition members of the National Assembly were indicted two weeks ago on charges of inciting anti-Government demonstrators at Korea University.

ALTERNATING TOUGHNESS

For many years successive South Korean governments have alternated between relatively hard and soft policies toward political opponents, although tolerance for dissent has never been high, even in the best of times. That tendency has continued under President Chun.

When he seized control in 1980, he imposed martial law, arresting dissidents, banning hundreds of politicians and virtually forbidding any criticism of him or his policies. Over the last two years, however, some of the more stringent controls had been lifted.

Officials withdrew police officers from campuses, which are traditional havens of protest, and announced that they would return only if school administrators said demonstrations were out of control. Recently, however, the police have begun again to enter campuses to stop student protests.

University professors and journalists who have been forced out of their jobs soon after Mr. Chun took over were permitted to go back last year. Ousted college students were readmitted.

Gradually, blacklisted politicians were reinstated.

GAINS BY OPPOSITION PARTY

Last January many of them formed the New Korea Democratic Party, a hard-line opposition force compared with its relatively tame predecessors. Only a few weeks after it came into existence the party won a surprisingly large number of seats in National Assembly elections.

The elections did not alter the true balance of power in South Korea; essentially, the legislature remains a rubber-stamp body. But its character changed. An emboldened opposition has turned it into a forum for demands for change, and Mr. Chun seems willing to allow many critical comments to appear in the regulated press.

But lately, hard-liners seem to have won out once more in the Blue House, the official presidential residence. Now, Mr. Chun seems prepared to allow criticism if it stays in the National Assembly.

Mr. Chun's critics say his policies toward dissidents keep changing because his main interest in finding ways to keep things quiet as he approaches several critical deadlines.

This week South Korea, which has a $45 billion foreign debt, is acting as host to a meeting of the World Bank and the International Monetary Fund. Next year, the Asia Games will be held in Seoul, and in 1988 the Olympic Games are to take place here. Domestic tranquillity, or the appearance of it, is essential, many South Koreans say.

"Chun has continuously failed to control South Korean politics," Kim Dae Jung said. "So now he is not confident enough to deal with our politics in a moderate way."

A Protestant clergyman put it more bluntly. "I think the Government is panicking," he said.

RALLYING POINT FOR OPPOSITION

If Mr. Chun chooses to press the Campus Stabilization Bill, some analysts feel he could create a rallying point for disparate opposition camps.

The Government position is that the proposed law is "lenient" because it provides for reorientation, not jail or expulsion. It is "designed not to control and punish students subject to its provisions but to properly guide and protect them," an official statement said.

But even usually sympathetic people reject this argument. Among those who attacked the legislation, albeit obliquely, was the United States Ambassador Richard L. Walker.

In remarks made in mid-August, on the anniversary of Korea's liberation from Japan in 1945, the Ambassador said, "The opinions of men are not a legitimate subject for rule by civil government."

[From the New York Times, Oct. 20, 1985]

SOUTH KOREA ACCUSED OF TORTURING DISSIDENTS

(By Kendall J. Wills)

A London-based human rights organization and members of a South Korean opposition group accused South Korean Government officials last week of torturing political prisoners in order to obtain false confessions of espionage and antistate activities, crimes that carry the death penalty.

Relatives of some of the prisoners made similar assertions in a tape recording that was brought out of South Korea last week by a member of the opposition group, the National Youth Alliance for Democracy.

The State Department spokesman, Bernard Kalb, said Friday that the Reagan Administration was aware of "credible reports" that three Korean journalists and a youth activist had been subjected to torture by Korean security officials. Calling the incidents "deplorable," Mr. Kalb said, "We have made known to the Korean Government our concern."

A spokesman at the South Korean Embassy in Washington, Park Johngseh, said he could not comment on the allegations of torture.

Amnesty International, the human rights organization, said in a statement that 23 South Koreans were detained in September for purportedly instigating protests and other activities against the Government.

Since the arrests, the group said it had received "frequent reports that political suspects are ill-treated after their arrest to force them to sign 'confessions' that are used in court to secure their conviction, although both torture and the use of statements obtained under duress as evidence in

court are prohibited by the 1980 Constitution."

Sim Kisop, a member of the Youth Alliance who recently returned to the United States from South Korea, said he visited prisoners' relatives at the National Council of Churches' office in Seoul, where the allegations of torture were recorded. Mr. Sim said that lawyers for some of the prisoners had asked that the cases be brought to trial while the torture wounds were still visible. He said the defendants were arrested under the National Security Act, but that most of them had not been publicly charged with a crime.

According to a transcript of the tape recording, In Jae Keun, the wife of one of the prisoners, said she saw her husband at the prosecutor's office in Seoul on Sept. 26. The husband, Kim Keun Tae, was being helped by prison guards because he was having difficulty walking, Mrs. In said. She said her husband told her he was beaten, tied up, given electric shocks and forced to swallow water laced with red peppers and salt.

Mr. Kim, 38 years old, was arrested Sept. 4 by the Police Anti-Communist Bureau and was forced to sign a statement saying he was an agent for North Korea's President, Kim Il Sung, according to Mr. Sim. Mr. Kim is a founder and former chairman of the National Youth Alliance for Democracy, which has been critical of President Chun Doo Hwan.

Other prisoners who were reportedly tortured include Ho In Hoe, a 23-year-old student activist; Ahn Sang Gun, 35, a former resident of Frankfurt, where he edited a Korean-language newspaper; Lee Chin Suk, 35, an assistant professor at Taegu University and several students who attended universities in the United States.

SOUTH KOREA POLICE DETAIN KIM

SEOUL, South Korea, Oct. 19 (Reuters)—The police today confined a leading opposition politician, Kim Dae Jung, to his home to prevent him from attending a news conference where colleagues charged that South Korean dissidents had been tortured, his aides said.

They said more than 100 police officers were posted outside Mr. Kim's house. A police official had told Mr. Kim that the action was to stop him from breaking the law.

The former presidential candidate, 59 year old, who returned from two years of exile in the United States in February, is barred from political activity because of a suspended 20-year jail sentence for sedition.

CHUN MOVES TO CURB S. KOREAN DISSENT

(By Sam Jameson)

SEOUL, South Korea.—There are more than 400 political prisoners, the police have returned to college campuses and government agents are raiding bookstores and art galleries.

For four years after seizing power in 1980, President Chun Doo Hwan relied on repression to stay in power. Then, early last year, he began to tolerate a measure of dissent. Now, a new crackdown is under way.

A test of how far the confrontation between Chun and his critics might go will probably come this month, when more than 8,000 bankers, central bank presidents and finance ministers from around the world gather here for an International Monetary Fund conference. Chun's critics see the meeting as a chance to discredit him.

The chief targets of the new crackdown are on the campuses—the 2,000 to 3,000 activists among the nation's 950,000 college students. Also feeling the lash are teachers, artists, writers and workers.

Even Chun's supporters have not been spared. He fired Justice Minister Kim Suk Hui after disorder broke out in a courtroom where 20 students were on trial for taking part in the seizure last May of the U.S. Information Service library here. The students are scheduled to be sentenced Wednesday.

Chun also ousted Lee Hyun Jae, president of Seoul National University, after Lee—before the court reached a verdict—refused to expel the eight students from his university who were among the 20.

Foreign analysts are not sure why Chun has changed tactics again.

Last year, student demonstrations erupted in February when Chun withdrew plainclothes policemen from the campuses freed 360 jailed students and reinstated 1,373 others who had been expelled. This year the demonstrations increased and became more violent.

Still, they had not involved great numbers of people, usually fewer than 50. Nor had they disrupted the studies or other students or led to public unrest.

A longtime foreign resident here, who asked not to be identified by name, said he believes that the generals Chun relies on for support insisted on the crackdown to choke off demands that the military get out of politics. But a Western diplomat, who also requested anonymity, said the reason is simpler than that.

"Chun lacks a strategic plan and has no political ability," the diplomat said, "so when things got heated up, the only thing left to fall back on was the hard-line approach."

A year ago, after Chun had loosened the screws, human-rights advocates said there were only 91 dissenters in prison, the lowest number since 1972. Recently, as South Korea's prisons have been filled with political prisoners, repression has returned to the level of 1980, when Chun seized power.

The crackdown has given the students a rallying point—demanding the release of their colleagues. Most observers think it also has increased the chance of more violence.

Chun's new, hard-line approach was underscored on Sept. 19 when two opposition members of the National Assembly, Park Chan Jong and Chough Soon Hyung, were charged with violating a law that bans unauthorized assemblies. Park was also charged with inciting an illegal demonstration; he could be sent to prison for up to 10½ years.

The charges brought the ruling party into sharp confrontation with the opposition New Korea Democratic Party, which immediately began a boycott of the National Assembly, demanding that the government withdraw the charges. But Chun's party insisted that the two legislators apologize for what it called attempting to instigate student unrest.

The turning point in Chun's policy came with the seizure of the U.S. library by 72 students, who demanded that the United States apologize for allegedly authorizing Chun's use of South Korean troops in May, 1980, to put down an insurrection in the city of Kwangju. The students finally agreed to leave the library after three days, without receiving a U.S. apology, and the government released all but 20.

Then, in June and July, the government arrested 137 students in the first mass arrests since 1980. It also instructed the courts to resume stiff jail sentences after a year and a half of relative leniency; demonstrators had been getting off with only a few days in jail.

Two judges who persisted in showing leniency for student demonstrators were reassigned to minor rural courts.

In August, it appeared that Chun was ready to declare all-out war on the students. His Democratic Justice Party announced plans to convene a special session of the National Assembly to enact a "campus stabilization bill" calling for ideological "reorientation" of campus troublemakers without formal arrest or trial.

The party described the bill as an effort to avoid stigmatizing students with formal arrest records. But Chun's critics assailed it as a pretext for establishing what they called concentration camps.

The bill would also have authorized seven-year sentences for adults guilty of instigating unauthorized student activity, a provision that was widely regarded as giving carte blance for the arrest of opposition politicians.

In the end, Chun ordered the bill set aside. A forceful speech on Aug. 15 by U.S. Ambassador Richard L. Walker is believed to have played a role in his decision. Walker said, in part: "Americans insist that intellectual and religious freedom must be the foundation for legitimate rule."

Western diplomats said they think that allowing direct election of Chun's successor—as opposed to the present electoral college arrangement—would defuse campus unrest, if not eliminate the demonstrations altogether. So far, however, Chun has shown no sign of yielding to, or compromising with, the opposition on its demands for free elections.

DOCUMENT: PROTEST STATEMENT OF THE DONG-A REPORTERS; SEPT. 1, 1985

DEFINITION OF OUR POSITION

We, the members of the editorial bureau of the DongA Daily, rise against the recent violence done by the government authorities over our colleagues. Between August 30 and September 1, our chief editor, Lee Chae-Kyu; the editor on political affairs, Lee Sang-Ha: a reporter on political affairs, Kim Chung-Sik, were dragged by intelligence agents and beaten up. This fact stirred our rage.

Here, we define that the Korean government's violating reporters' human rights is no other than a serious threat to the Press itself. We also accept that part of the responsibility is our pessimism of a long time toward free press and expression.

Therefore, we demand to stop this illegal action, to provide an understandable explanation of the recent series of events, and to take a proper step. In addition, we confirm our determination to report immediately any illegal action officially executed like the present case.

Finally, we are fully determined to protect and improve our right of self-defense for Free Press and Free Expression.—The Whole Personnel of the Editorial Bureau of DongA Daily Newspaper.

SENATE CONCURRENT RESOLUTION 101—FULL FREEDOM AND INDEPENDENCE FOR THE BALTIC STATES

Mr. SPECTER submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 101

Whereas the United States, since its inception, has been committed to the principle of self-determination;

Whereas this essential moral principle is also affirmed in the Charter of the United Nations;

Whereas the Union of Soviet Socialist Republics is, according to its Constitution, a voluntary federation of autonomous republics;

Whereas the three Baltic Republics (the Republic of Lithuania, the Republic of Latvia, and the Republic of Estonia) did not become member republics of the Union of Soviet Socialist Republics voluntarily, but rather were occupied militarily by Russian Armed Forces in the early days of World War II and subsequently incorporated by force into the Union of Soviet Socialist Republics and have since been governed by governments approved by, and subservient to, the Government of the Union of Soviet Socialist Republics;

Whereas the ethnic makeup of the Baltic peoples (the Lithuanians, Latvians, and Estonisans) is distinctly foreign in language, culture, common traditions, and religion from that of the Russian people;

Whereas, by deportation and dispersion of the native populations of the Baltic States of Siberia and by a massive colonization effort in which Russian colonists replace the displaced native peoples, the Soviet Union threatens complete elimination of the Baltic peoples as a culturally, geographically, and politically distinct and ethnically homogeneous population;

Whereas, despite such treatment, the spirit of the citizens of the Baltic States is not broken and the desire of the citizens of the Baltic States for national independence remains unabated;

Whereas the United States has consistently refused to recognize the unlawful Soviet occupation of the Baltic States and has continued to maintain diplomatic relations with representatives of the independent Republics of Lithuania, Latvia, and Estonia; and

Whereas the United Nations and the United States delegation to the United Nations have consistently upheld the right of self-determination of the people of those countries in Asia and Africa that are, or have been, under foreign imperialist rule: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that—

(1) the President and the Secretary of State should take all necessary steps to bring the Baltic States question before the United Nations and to urge that the United Nations request the Soviet Union—

(A) to withdraw all Russian and other non-native troops, agents, colonists, and controls from the Republics of Lithuania, Latvia, and Estonia, and

(B) to return all Baltic exiles from Siberia and from prisons and labor camps in the Soviet Union;

(2) until the Baltic States become independent, the Secretary of State should, through such channels as the United States Information Agency and other information agencies of the United States Government, do his utmost to bring the matter of the Baltic States to the attention of all nations by means of special radio programs and publications;

(3) the United States should not agree to the recognition, by any international conference, of the Soviet Union's unlawful annexation of Lithuania, Latvia, and Estonia, and it should remain the policy of the United States not to recognize in any way the annexation of the Baltic States by the Soviet Union;

(4) the President should require that all government map publishers, and should request that all private map publishers, show, on all maps of Europe, the Republics of Lithuania, Latvia, and Estonia as independent states, with footnote explaining that the military occupation and forced incorporation into the Soviet Union of Lithuania, Latvia, and Estonia has never been recognized by the United States;

(5) the right of self-determination should be returned to the peoples of Lithuania, Latvia, and Estonia through free elections conducted under the auspices of the United Nations after Soviet withdrawal from the Baltic States; and

(6) the right of self-determination should be made a prime political objective of the United Nations and should be accorded through free elections under the auspices of the United Nations to all peoples now involuntarily subjugated to Soviet communism.

SENATE CONCURRENT RESOLUTION 102—RELATING TO WITHDRAWAL OF SOVIET PERSONNEL FROM THE BALTIC STATES

Mr. SPECTER submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 102

Whereas the United States does not recognize the illegal annexation by the Soviet Union of the Baltic nations of Estonia, Latvia, and Lithuania;

Whereas the United States as a member of the United Nations has pledged to uphold the ideals of the United Nations Charter and "to take joint and separate action" to promote "universal respect for, and observance of, human rights and fundamental freedoms for all without distinction as to race, sex, language, or religion";

Whereas during the 83rd Congress, the Select Committee to Investigate Communist Aggression of the House of Representatives thoroughly investigated the seizure of the Baltic nations by the Soviet Union and, in its Third Interim Report, concluded that the "evidence is overwhelming and conclusive that Estonia, Latvia, and Lithuania were forcibly occupied and illegally annexed by the Union of Soviet Socialist Republics";

Whereas the United States, as a signatory to the Final Act of the Conference on Security and Cooperation in Europe, endorsed Principle VIII, concerning equal rights and self-determination of peoples, which states "all peoples always have the right, in full freedom, to determine, when and as they wish, their internal and external political status, without external interference, and to pursue as they wish their political, economic, social and cultural development" and the "participating States . . . also recall the importance of the elimination of any form of violation of this principle"; and

Whereas the House of Representatives in the 96th Congress, by adopting H. Con. Res. 200, reaffirmed the United States policy concerning the Baltic nations and thereby urged positive actions: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that the President should—

(1) enter into discussions with the Soviet Union—

(A) for the withdrawal of all non-Estonian, non-Latvian, and non-Lithuanian military, political, administrative, and police personnel from Estonia, Latvia, and Lithuania, respectively, and

(B) for the release of political prisoners of Estonian, Latvian, or Lithuanian nationality from prisons, labor camps, psychiatric institutions, and other detention centers within the Soviet Union and their return to Estonia, Latvia, and Lithuania, respectively;

(2) instruct the United States delegation to each review meeting of the Conference on Security and Cooperation in Europe to seek consideration of the following matters:

(A) the illegal annexation of Estonia, Latvia, and Lithuania by the Soviet Union, and

(B) the denial of self-determination and territorial integrity of Estonia, Latvia, and Lithuania by the Soviet Union; and

(3) make every effort to gain the support and cooperation of all nations to achieve the objectives of the discussions under paragraph (1) and the consideration of the matters under paragraph (2).

Mr. SPECTER. Mr. President, today, I am offering two concurrent resolutions which are the companions of House Concurrent Resolutions 65 and 66 submitted by Congressman YOUNG of Florida.

I submit these concurrent resolutions in response to an initiative by the Pennsylvania House of Representatives. The Pennsylvania House of Representatives' resolution poignantly expresses the hopes of thousands of Estonian, Latvian, and Lithuanian Americans that their homelands may one day be free of Soviet domination, and urges the United States Congress to express these hopes to the U.S.S.R.

The first concurrent resolution I am submitting today calls for full freedom and independence of the Baltic States. The second one expresses the sense of the Congress that the United States should seek, through diplomatic channels, the withdrawal of certain personnel of the Soviet Union from Estonia, Latvia, and Lithuania, and the release by the Soviet Union of political prisoners of Estonian, Latvian, and Lithuanian descent.

Since the United States has pledged to uphold and promote the ideals of universal respect for, and observance of, human rights, fundamental freedoms and the self-determination of all peoples, it is important that we try to eliminate any form of violation of these ideals.

SENATE RESOLUTION 280—EXPRESSING SUPPORT FOR THE NATIONAL UNION FOR THE TOTAL INDEPENDENCE OF ANGOLA (UNITA)

Mr. DOLE submitted the following resolution; which was referred to the Committee on Foreign Relatons:

S. RES. 280

Whereas the National Union for the Total Independence of Angola (hereafter in this resolution referred to as "UNITA") led by Dr. Jonas Malheiro Savimbi, represents the view and wishes of a large part of Angolans;

Whereas UNITA was denied the legitimate role in the politicial life of Angola envisioned for it in the Alvor Accord of 1975, an agreement among all political elements in Angola which called for free and fair elections in Angola, when the Marxist Popular Movement for the Liberaton of Angola (hereafter in this resolution referred to as the "MPLA") faction, backed by the Soviet and Cuban troops, illegally seized power in Angola;

Whereas since that time UNITA has waged a courageous and effective guerrilla war, with the support of a large part of the Angolan population, aimed at pressuring the MPLA to live up to its commitments under the Alvor Accord, permit free and fair elections in Angola, and remove Soviet and Cuban forces from Angola;

Whereas that struggle has achieved such success that many independent observers have concluded that, in free and fair elections, UNITA and Savimbi would likely enjoy the support of a large part of the Angolan population;

Whereas the MPLA, faced with the possibility that the popularly supported forces of UNITA could militarily defeat the forces of the MPLA, has introduced even larger numbers of Soviet and Cuban forces, so that more than 35,000 such troops and advisers are now in Angola;

Whereas this Cuban and Soviet intervention represents the most blatant foreign intervention in the post-colonial history of Africa;

Whereas the civil war in Angola, caused primarily by the illegal acts of the MPLA and waged increasingly by Cuban and Soviet troops, has led to widespread suffering for the people of Angola;

Whereas the MPLA, at the urging and with the extensive involvement of Soviet and Cuban troops and advisers, has recently undertaken a major offensive utilizing massive new shipments of modern arms from the Soviet Union and Cuba, aimed at wiping out UNITA;

Whereas UNITA has temporarily blunted that offensive, reestablishing a practical stalemate in the military situation;

Whereas the MPLA nonetheless may seek and obtain even more modern and extensive armaments and perhaps even more combat troops from its Communist suppliers and will launch further attacks on UNITA, leading to more suffering among, and greater suppression of, the Angolan people;

Whereas the MPLA, despite being offered the opportunity to seek a solution to these problems through negotiations in which the United States Government has sought to play a facilitating role, has refused to take any meaningful steps to lessen its dependency on Soviet and Cuban forces, to end the civil war, or to grant UNITA and its followers their legitimate place in the political life of Angola;

Whereas the only practical way in the foreseeable future to achieve a viable solution to the problems within Angola would be for the MPLA to effect the removal of Soviet and Cuban forces and to enter into direct and meaningful negotiations with UNITA concerning the political future of Angola; and

Whereas the main barrier to such a solution has been and is the refusal of the MPLA and its Communist allies to agree to meaningful negotiations aimed at bringing it into effect: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) the legitimate aspirations of the people of Angola for democracy, justice, peace, and freedom from foreign interference deserve the support of the United States;

(2) UNITA and its leader, Dr. Jonas Malheiro Savimbi, which represent the political aspirations of a large number of the Angolan people, have the right to play a commensurate role in the political life of Angola;

(3) UNITA and Savimbi deserve the political and moral support of the people of the United States and freedom-loving people everywhere, in demanding and struggling for that right;

(4) the MPLA has violated the rights of the Angolan people through its illegal seizure of power and suppression of the population;

(5) the MPLA, further, has compromised the sovereignty of the Angolan nation by introducing large numbers of Cuban and Soviet forces into Angola;

(6) the growing intensity of the civil war, suffering of the Angolan people, presence of foreign forces in Angola, and failure of the MPLA to respond to diplomatic initiatives calling for the elimination of foreign forces and free and fair elections in Angola have given new urgency to efforts to deal effectively with the Angolan situation;

(7) the MPLA should agree promptly to a process of meaningful negotiations, to include direct and good-faith negotiations with UNITA, aimed at ending the presence of Soviet and Cuban forces in Angola, terminating the civil war, and setting up an administration which respects the rights and reflects the wishes of the Angolan people, with a mandate to organize free and fair elections for a new government; and

(8) if the MPLA, during the current rainy season in Angola, continues to be intransigent, by—

(A) refusing to engage in good faith negotiations, including negotiations with UNITA, aimed at eliminating the presence of foreign forces and reaching a just political settlement in Angola, or

(B) continuing its preparations for a new military offensive,

then the Senate would support the provision early in 1986 of material assistance to UNITA and would impose economic sanctions against those sectors of the Angolan economy which provide resources to support the Cuban troop presence.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

SENATE RESOLUTION 281—RELATING TO THE PROSPECTIVE EFFECTIVE DATE FOR TAX REFORM

Mr. DOLE (for himself, Mr. D'AMATO, Mr. DODD, Mrs. HAWKINS, Mr. WILSON, Mr. MATTINGLY, Mr. SYMMS, Mr. ARMSTRONG, Mr. DURENBERGER, Mr. WALLOP, Mr. GRASSLEY, Mr. PRYOR, Mr. ROTH, Mr. CHAFEE, Mr. BRADLEY, Mr. HEINZ, Mr. MITCHELL, Mr. BAUCUS, Mr. BOREN, Mr. KASTEN, Mr. KERRY, Mr. DOMENICI, Mr. ABDNOR, Mr. CRANSTON, Mr. GARN, Mr. SIMPSON, Mr. DENTON, Mr. THURMOND, Mr. DECONCINI, Mr. NICKLES, Mr. LAXALT, Mr. SPECTER, Mr. WARNER, Mr. HOLLINGS, Mr. HECHT, Mr. ANDREWS, Mr. LUGAR, Mr. BOSCHWITZ, Mr. QUAYLE, Mr. HEFLIN, Mr. TRIBLE, Mr. HARKIN, Mr. COHEN, Mr. DIXON, Mr. COCHRAN, Mr. RUDMAN, Mr. WEICKER, Mr. MCCONNELL, Mr. ZORINSKY, Mr. HELMS, Mr. STENNIS, Mr. EAST, Mr. BUMPERS, Mr. LEVIN, Mr. HATCH, and Mr. FORD) submitted the following resolution; which was considered and agreed to:

S. RES. 281

Whereas the Senate will require adequate time to consider tax reform legislation proposed by the President and the House of Representatives, and to prepare legislation which will maximize fairness and long-term economic growth and minimize short-term economic disruption; and

Whereas, it is likely that such action will not be completed before August 1986; and

Whereas, the tax legislation as prepared in the House of Representatives by the Committee on Ways and Means contains effective dates of January 1, 1986 and earlier; and

Whereas, it is unreasonable to expect taxpayers to comply with fundamental changes in the tax laws before they are enacted and they can be certain what those changes will be; and

Whereas, uncertainty as to the future of particular tax provisions is causing taxpayers either to delay decisions that they otherwise would make or to rush into transactions that, absent tax considerations, they would enter into at a more appropriate time: Therefore, be it

Resolved that it is the sense of the Senate that the effective date of any fundamental tax reform legislation should generally be January 1, 1987 while recognizing that appropriate transition rules may be necessary to avoid unintended adverse effects both on taxpayers and the United States Treasury and recognizing further that retroactive effective dates may be necessary to extend certain provisions which expire before January 1, 1987.

SENATE RESOLUTION 282—AUTHORIZING REPRESENTATION BY THE SENATE LEGAL COUNSEL

Mr. HEINZ (for Mr. DOLE, for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to:

S. RES. 282

Whereas, in the case of *Representative Mike Synar* v. *United States of America*, Civil Action No. 85-3945, pending in the United States District Court for the District of Columbia, the constitutionality of the Balanced Budget and Emergency Deficit Control Act of 1985, Public Law 99-177, has been placed in issue;

Whereas, the statement of the President, on signing the Balanced Budget and Emergency Deficit Control Act of 1985, questions the constitutionality of several of its provisions of expresses the hope of the President that these constitutional questions will be promptly resolved;

Whereas, pursuant to section 274 of the Balanced Budget and Emergency Deficit Control Act of 1985 each House of Congress shall have the right to intervene in an action to determine the constitutionality of the Act;

Whereas, pursuant to sections 703(c), 706(a), and 713(a) of the Ethics in Government Act of 1978, 2 U.S.C §§ 288b(c), 288e(a), and 288*l*(a) (1982), the Senate may direct the Senate Legal Counsel to intervene in the name of the Senate in any legal action in which the powers and responsibilities of Congress under the Constitution are placed in issue: Now, therefore, be it

Resolved, That the Senate Legal Counsel is directed to intervene in the name of the Senate in the case of *Representative Mike Synar* v. *United States of America*.

SEC. 2. That during the adjournment of the Congress the Senate Legal Counsel is authorized to intervene or to appear as amicus curiae in the name of the Senate in other cases in which the constitutionality of the Balanced Budget and Emergency Deficit Control Act of 1985, Public Law 99-177, is placed in issue: *Provided*, That the Joint Leadership Group authorizes the Senate Legal Counsel to intervene or to appear as amicus curiae in the name of the Senate in such other cases.

SENATE RESOLUTION 283—BIPARTISAN OBSERVERS TO ARMS REDUCTION OR CONTROL NEGOTIATIONS

Mr. DOLE (for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to:

S. RES. 283

Resolved, That S. Res. 86, agreed to February 28, 1985, is amended as follows:

(a) Page 2, line 2, add: "The Chairman for Administrative purposes is the Senator from Alaska, Ted Stevens. The other members of the Senate Observer Group shall include the Senator from Massachusetts, Edward Kennedy; the Senator from Wyoming, Malcolm Wallop; the Senator from New York, Daniel Patrick Moynihan; the Senator from Virginia, John Warner; the Senator from Oklahoma, Don Nickles; the Senator from Tennessee, Al Gore; the Majority Leader, Robert Dole, ex officio; and the Minority Leader, Robert C. Byrd, ex officio. Only Senators appointed as members of the Group may participate in official travel and activities of the Group. In the event that the Majority Leader or Minority Leader does not travel on an official trip of the Observer Group, he may designate one other Senator not a member of the Group to travel and participate in the activities of the Group in his stead. Any vacancy occurring in the Senate Arms Control Observer Group shall be filled in the same manner in which the original appointment was made."

(b) Page 2, line 11: After the period, insert "Payments made under this section for receptions, meals and food-related expenses shall be authorized, however, only for those actual expenses incurred by the Senate Observer Group in the course of conducting its official duties and functions: *Provided*, That notwithstanding any other provision of this Resolution, such amounts received as reimbursement for such expenses shall not exceed $6,000 in any fiscal year. Amounts received as reimbursement for such food expenses shall not be reported as income, and the expenses so reimbursed shall not be allowed as a deduction under Title 26 of the U.S. Code."

(c) The amendment made by subsection (a) is effective with respect to expenditures incurred on or after February 28, 1985.

Page 3, line 9, add the following new section: "(d) All foreign travel of the Group shall be authorized solely by the Majority and Minority Leaders, upon the recommendation of the Administrative Chairman. Participation by staff, members in authorized foreign travel by the Group, access to all official activities and functions of the group during such travel, and access to all classified briefings and information made available to the Group during such travel, shall be limited exclusively to delegation members with appropriate clearances. No travel or other funding shall be authorized by any Committee of the Senate for the use of staff other than delegation staff, in regard to above mentioned activities, without the written authorization of the Majority Leader and the Minority Leader to the Chairman of such Committee."

SENATE RESOLUTION 284—RELATING TO INSPECTION OF TAX RECORDS BY A SUBCOMMITTEE OF THE COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. STEVENS (for Mr. ROTH, for himself and Mr. NUNN) submitted the following resolution; which was considered and agreed to:

S. RES. 284

Whereas, the Permanent Subcommittee on Investigations of the Senate Committee on Governmental Affairs is conducting an investigation of the handling by the Department of Justice, the Department of Labor, and the Federal Bureau of Investigation of a Labor fraud investigation of Jackie Presser, president of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America;

Whereas, allegations have been made that various federal agencies, including the Internal Revenue Service, may have conducted other investigations involving Mr. Presser and other individuals that may related to the handling of the recent investigation and declined prosecution of Mr. Presser;

Whereas, in order to conduct its investigation of the handling of the labor fraud investigation of Mr. Presser it is necessary for the Permanent Subcommittee on Investigations to inspect and receive tax returns, return information, and tax-related material held by the Secretary of the Treasury consisting of investigatory files pertaining to certain named individuals;

Whereas, information necessary for such investigation cannot reasonably be obtained from any other source; and

Whereas, under sections 6103(f) and 6104(a)(2) of the Internal Revenue Code of 1954, as amended, a committee of the Senate has the right to inspect tax returns and return information if such committee is specifically authorized to investigate tax returns and return information by a resolution of the Senate: Now, therefore, be it

Resolved, That the Permanent Subcommittee on Investigations of the Senate Committee on Governmental Affairs is specifically authorized, in conducting its investigation of the handling by the Department of Justice, the Department of Labor, and the Federal Bureau of Investigation of a labor fraud investigation of Jackie Presser, to inspect and receive for the tax years 1970-1985 and tax return, return information, or other tax-related material held by the Secretary of the Treasury consisting of investigatory files pertaining to Jackie Presser, William Presser, Frank Fitzsimmons, and Harry Hall, aka Haler, aka Haller, aka Helfgot.

SENATE RESOLUTION 285—COMMENDING MIKE STERN FOR HIS SERVICE TO THE SENATE

Mr. LONG (for himself, Mr. PACKWOOD, Mr. DOLE, Mr. BYRD, Mr. DANFORTH, Mr. MOYNIHAN, Mr. BENTSEN, Mr. PRYOR, Mr. MATSUNAGA, Mr. BAUCUS, Mr. DURENBERGER, and Mr. ARMSTRONG) submitted the following resolution; which was considered and agreed to:

S. RES. 285

Whereas Michael Stern has faithfully served the Senate of the United States as Staff Director and as Minority Staff Director of the Committee on Finance, and the Senate wishes to express its appreciation for his seventeen years of dedicated service to the Senate and to the Nation;

Whereas Michael Stern has discharged the important duties and responsibilities of his position with great distinction;

Whereas Michael Stern has helped guide the Committee on Finance through an extraordinarily active and challenging period of its history;

Whereas the loyalty, judgment, exceptional service, and continuing dedication of Michael Stern have earned for him respect, gratitude, and affection: Now, therefore, be it

Resolved, That the Senate of the United States commends Michael Stern for his faithful and outstanding service to the Senate and the Nation.

SEC. 2. The Secretary of the Senate shall transmit a copy of the resolution to Michael Stern.

SENATE RESOLUTION 286—RELATING TO EXTRANEOUS MATERIAL IN RECONCILIATION CONFERENCE REPORTS

Mr. SIMPSON (for Mr. ARMSTRONG, for himself, Mr. ROTH, and Mr. DOMENICI] submitted the following resolution; which was considered and agreed to:

S. RES. 286

Resolved, That when the Senate is considering a conference report or House amendment with respect to a reconciliation bill or reconciliation resolution pursuant to section

310 of the Budget Act, upon a point of order being made by any Senator against extraneous material meeting the definition of subsections (d)(1)(A) and (d)(1)(D) of section 1201 of the Consolidated Omnibus Budget Reconciliation Act of 1985, and such point of order is sustained, any part of such report or amendment containing such material shall be deemed stricken, but it shall be in order to continue consideration of the remainder under the Rules and practices of the Senate and applicable law. An affirmative vote of three-fifths of the Members, duly chosen and sworn, shall be required to sustain an appeal of the ruling of the Chair on a point of order raised under this resoution, as well as to waive or suspend the provisions of this resolution.

The provisions of this resolution shall remain in effect until the date of termination of section 1201 of the Consolidated Omnibus Budget Reconciliation Act of 1985.

SENATE RESOLUTION 287—COMMITTEE TO NOTIFY THE PRESIDENT OF THE PROPOSED ADJOURNMENT OF THE SENATE

Mr. DOLE submitted the following resolution; which was considered and agreed to:

S. RES. 287

Resolved, That a committee of two Senators be appointed by the Presiding Officer to join a similar committee of the House of Representatives to notify the President of the United States that the two Houses have completed their business of the session and are ready to adjourn unless he has some further communication to make to them.

SENATE RESOLUTION 288—EXPRESSING THE THANKS OF THE SENATE TO THE VICE PRESIDENT

Mr. DOLE submitted the following resolution; which was considered and agreed to:

S. RES. 288

Resolved, That the thanks of the Senate are hereby tendered to the Honorable George H.W. Bush, Vice President of the United States and President of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the first session of the Ninety-Ninth Congress.

SENATE RESOLUTION 289—EXPRESSING THE THANKS OF THE SENATE TO THE PRESIDENT PRO TEMPORE

Mr. DOLE (for Mr. BYRD, for himself, and Mr. DOLE) submitted the following resolution; which was considered and agreed to:

S. RES. 289

Resolved, That the thanks of the Senate are hereby tendered to the Honorable Strom Thurmond, President pro tempore of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the first session of the Ninety-Ninth Congress.

SENATE RESOLUTION 290—EXPRESSING THE ADMIRATION OF THE SENATE FOR THE LONG AND DISTINGUISHED CAREER OF SENATOR JOHN C. STENNIS

Mr. DOLE (for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to:

S. RES. 290

Whereas, the Honorable John C. Stennis, of Mississippi, holds the honor of being the second longest-serving Senator in the history of the United States;

Whereas, the Honorable John C. Stennis, of Mississippi, has served ably and effectively as Chairman of the Armed Services Committee from 1969 to 1981;

Whereas, the Honorable John C. Stennis, of Mississippi, served on the Senate Aeronatic and Space Committee and had an integral part in moving the United States toward putting a man on the Moon and competing in interplanetary exploration;

Whereas, the Honorable John C. Stennis, of Mississippi, has shown great courage, strength, and dignity in the face of personal hardships and has been an inspiration to the Members of this Chamber and the public at large; Now, therefore, be it

Resolved, That the Senate now recognizes the long and notable career of the Honorable John C. Stennis in this Chamber, during which he has proved his reputation as a statesman of integrity and fairness and a gentleman of dignity and strength, and expresses its appreciation and gratitude for his long, faithful and outstanding service to the Country.

SENATE RESOLUTION 291—AUTHORIZING CERTAIN APPOINTMENTS AFTER SINE DIE ADJOURNMENT OF THE PRESENT SESSION

Mr. BYRD submitted the following resolution; which was considered and agreed to:

S. RES. 291

Resolved, That notwithstanding the sine die adjournment of the present session of the Congress, the President of the Senate and the President of the Senate pro tempore be, and they are hereby, authorized to make appointments to commissions or committees authorized by law, by concurrent action of the two Houses, or by order of the Senate.

SENATE RESOLUTION 292—COMMENDING THE CONDUCT OF THE MAJORITY LEADER AND THE MAJORITY WHIP

Mr. THURMOND submitted the following resolution; which was considered and agreed to:

S. RES. 292

Resolved, That the exemplary conduct of the distinguished Majority Leader, the Senator from Kansas, the Honorable Robert Dole, is deserving of the highest commendation of the Senate. The fair and just and able manner in which Senate business has been scheduled and managed is a source of pride to the Senate as a whole and the thanks of the Senate are hereby tendered to the Honorable Robert Dole, Majority Leader, United States Senate, and the majority whip, Senator Simpson for his able assistance.

SENATE RESOLUTION 293—COMMENDING THE CONDUCT OF THE MINORITY LEADER AND THE MINORITY WHIP

Mr. THURMOND submitted the following resolution; which was considered and agreed to:

S. RES. 293

Resolved, That the Senate extends its thanks to the distinguished Minority Leader, the Senator from West Virginia, the Honorable Robert C. Byrd. The extremely cooperative and able manner in which the Minority Leader has approached his duties as protector of the rights of the minority has been duly noted and the Senate commends the Minority Leader for his understanding, his devotion to the rules of the Senate, and for his outstanding leadership, and the minority whip Alan Cranston, for his able assistance.

SENATE RESOLUTION 294—TENDERING THE THANKS OF THE SENATE TO THE SENATE STAFF

Mr. THURMOND submitted the following resolution; which was considered and agreed to:

S. RES. 294

Resolved, That the thanks of the Senate are hereby tendered to the Senate Sergeant at Arms, the Secretary of the Senate, the Secretary for the Majority, the Secretary for the Minority, and the floor staff of the two parties for the courteous, dignified, and impartial manner in which they have assisted the deliberations of the Senate during the first session of the Ninety-ninth Congress.

AMENDMENTS SUBMITTED

LOW-LEVEL RADIOACTIVE WASTE DISPOSAL COMPACTS

THURMOND (AND OTHERS) AMENDMENT NO. 1429

Mr. THURMOND (for himself, Mr. SIMPSON, Mr. STAFFORD, Mr. BENTSEN, Mr. MCCLURE, Mr. JOHNSTON, Mr. EVANS, Mr. HELMS, Mr. HART, Mr. DOMENICI, Mr. HOLLINGS, Mr. HECHT, Mr. BRADLEY, Mr. GOLDWATER, and Mr. DENTON) proposed an amendment to the bill (H.R. 1083) to amend the Low-Level Radioactive Waste Policy Act to improve procedures for the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste, and for other purposes; as follows:

TITLE I—LOW-LEVEL RADIOACTIVE WASTE POLICY AMENDMENTS ACT OF 1985

SEC. 101. SHORT TITLE.

This Title may be cited as the "Low-Level Radioactive Waste Policy Amendments Act of 1985."

SEC. 102. AMENDMENT TO THE LOW-LEVEL RADIOACTIVE WASTE POLICY ACT.

The Low-Level Radioactive Waste Policy Act (42 U.S.C. 2021b et seq.) is amended by striking out sections 1, 2, 3, and 4 and inserting in lieu thereof the following:

"SECTION 1. SHORT TITLE.

"This Act may be cited as the 'Low-Level Radioactive Waste Policy Act'".

"SEC. 2. DEFINITIONS.

"For purposes of this Act:

"(1) AGREEMENT STATE.—The term 'agreement State' means a State that—

"(A) has entered into an agreement with the Nuclear Regulatory Commission under section 274 of the Atomic Energy Act of 1954 (42 U.S.C. 2021); and

"(B) has authority to regulate the disposal of low-level radioactive waste under such agreement.

"(2) ALLOCATION.—The term 'allocation' means the assignment of a specific amount of low-level radioactive waste disposal capacity to a commercial nuclear power reactor for which access is required to be provided by sited States subject to the conditions specified under this Act.

"(3) COMMERCIAL NUCLEAR POWER REACTOR.—The term 'commercial nuclear power reactor' means any unit of a civilian light-water moderated utilization facility required to be licensed under section 103 or 104b. of the Atomic Energy Act of 1954 (42 U.S.C. 2133 or 2134(b)).

"(4) COMPACT.—The term 'compact' means a compact entered into by two or more States pursuant to this Act.

"(5) COMPACT COMMISSION.—The term 'compact commission' means the regional commission, committee, or board established in a compact to administer such compact.

"(6) COMPACT REGION.—The term 'compact region' means the area consisting of all States that are members of a compact.

"(7) DISPOSAL.—The term 'disposal' means the permanent isolation of low-level radioactive waste pursuant to the requirements established by the Nuclear Regulatory Commission under applicable laws, or by an agreement State if such isolation occurs in such agreement State.

"(8) GENERATE.—The term 'generate', when used in relation to low-level radioactive waste, means to produce low-level radioactive waste.

"(9) LOW-LEVEL RADIOACTIVE WASTE.—The term 'low-level radioactive waste' means radioactive material that—

"(A) is not high-level radioactive waste, spent nuclear fuel, or byproduct material (as defined in section 11e.(2) of the Atomic Energy Act of 1984 (42 U.S.C. 2014(e)(2))); and

"(B) the Nuclear Regulatory Commission, consistent with existing law and in accordance with paragraph (A), classifies as low-level radioactive waste.

"(10) NON-SITED COMPACT REGION.—The term 'non-sited compact region' means any compact region that is not a sited compact region.

"(11) REGIONAL DISPOSAL FACILITY.—The term 'regional disposal facility' means a non-federal low-level radioactive waste disposal facility in operation on January 1, 1985, or subsequently established and operated under a compact.

"(12) SECRETARY.—The term 'Secretary' means the Secretary of Energy.

"(13) SITED COMPACT REGION.—The term 'sited compact region' means a compact region in which there is located one of the regional disposal facilities at Barnwell, in the State of South Carolina; Richland, in the State of Washington; or Beatty, in the State of Nevada.

"(14) STATE.—The term 'State' means any State of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.

"Section 3. *Responsibilities for Disposal of Low-Level Radioactive Waste.*

SECTION 3(a)(1) STATE RESPONSIBILITIES.—Each State shall be responsible for providing, either by itself or in cooperation with other States, for the disposal of—

(A) low-level radioactive waste generated within the State (other than by the federal government) that consists of or contains class A, B, or C radioactive waste as defined by section 61.55 of title 10, Code of Federal Regulations, as in effect on January 26, 1983;

(B) low-level radioactive waste described in subparagraph (A) that is generated by the federal government except such waste that is—

(i) owned or generated by the Department of Energy;

(ii) owned or generated by the United States Navy as a result of the decommissioning of vessels of the United States Navy; or

(iii) owned or generated as a result of any research, development, testing, or production of any atomic weapon; and

(C) low-level radioactive waste described in subparagraphs (A) and (B) that is generated outside of the State and accepted for disposal in accordance with sections 5 or 6.

(2) No regional disposal facility may be required to accept for disposal any material—

(A) that is not low-level radioactive waste as defined by section 61.55 of title 10, Code of Federal Regulations, as in effect on January 26, 1983, or

(B) identified under the Formerly Utilized Sites Remedial Action Program.

Nothing in this paragraph shall be deemed to prohibit a State, subject to the provisions of its compact, or a compact region from accepting for disposal any material identified in subparagraphs (A) or (B).

(b)(1) The federal government shall be responsible for the disposal of—

(A) low-level radioactive waste owned or generated by the Department of Energy;

(B) low-level radioactive waste owned or generated by the United States Navy as a result of the decommissioning of vessels of the United States Navy;

(C) low-level radioactive waste owned or generated by the federal government as a result of any research, development, testing, or production of any atomic weapon; and

(D) any other low-level radioactive waste with concentrations of radionuclides that exceed the limits established by the Commission for class C radioactive waste, as defined by section 61.55 of title 10, Code of Federal Regulations, as in effect on January 26, 1983.

(2) All radioactive waste designated a federal responsibility pursuant to subparagraph (b)(1)(D) that results from activities licensed by the Nuclear Regulatory Commission under the Atomic Energy Act of 1954, as amended, shall be disposed of in a facility licensed by the Nuclear Regulatory Commission that the Commission determines is adequate to protect the public health and safety.

(3) Not later than 12 months after the date of enactment of this Act, the Secretary shall submit to the Congress a comprehensive report setting forth the recommendations of the Secretary for ensuring the safe disposal of all radioactive waste designated a federal responsibility pursuant to subparagraph (b)(1)(D). Such report shall include—

(A) an identification of the radioactive waste involved, including the source of such waste, and the volume, concentration, and other relevant characteristics of such waste;

(B) an identification of the federal and non-federal options for disposal of such radioactive waste;

(C) a description of the actions proposed to ensure the safe disposal of such radioactive waste;

(D) a description of the projected costs of undertaking such actions;

(E) an identification of the options for ensuring that the beneficiaries of the activities resulting in the generation of such radioactive wastes bear all reasonable costs of disposing of such wastes; and

(F) an identification of any statutory authority required for disposal of such waste.

(4) The Secretary may not dispose of any radioactive waste designated a federal responsibility pursuant to paragraph (b)(1)(D) that becomes a federal responsibility for the first time pursuant to such paragraph until ninety days after the report prepared pursuant to paragraph (3) has been submitted to the Congress.

"Section 4. Regional Compacts for Disposal of Low-Level Radioactive Wastes.

"(a) IN GENERAL.—

"(1) FEDERAL POLICY.—It is the policy of the federal government that the responsibilities of the States under section 3 for the disposal of low-level radioactive waste can be most safely and effectively managed on a regional basis.

"(2) INTERSTATE COMPACTS.—To carry out the policy set forth in paragraph (1), the States may enter into such compacts as may be necessary to provide for the establishment and operation of regional disposal facilities for low-level radioactive waste.

"(b) APPLICABILITY TO FEDERAL ACTIVITIES.—

"(1) IN GENERAL.—

"(A) ACTIVITIES OF THE SECRETARY.—Except as provided in subparagraph (B), no compact or action taken under a compact shall be applicable to the transportation, management, or disposal of any low-level radioactive waste designated in section 3(a)(1)(B) (i)(iii).

"(B) FEDERAL LOW-LEVEL RADIOACTIVE WASTE DISPOSAL OF AT NON-FEDERAL FACILITIES.—Low-level radioactive waste owned or generated by the federal government that is disposed of at a regional disposal facility or non-federal disposal facility within a State that is not a member of a compact shall be subject to the same conditions, regulations, requirements, fees, taxes, and surcharges imposed by the compact commission, and by the State in which such facility is located, in the same manner and to the same extent as any low-level radioactive waste not generated by the federal government.

"(2) FEDERAL LOW-LEVEL RADIOACTIVE WASTE DISPOSAL FACILITIES.—Any low-level radioactive waste disposal facility established or operated exclusively for the disposal of low-level radioactive waste owned or generated by the federal government shall not be sub-

ject to any compact or any action taken under a compact.

"(3) EFFECT OF COMPACTS ON FEDERAL LAW.—Nothing contained in this Act or any compact may be construed to confer any new authority on any compact commission or State—

"(A) to regulate the packaging, generation, treatment, storage, disposal, or transportation of low-level radioactive waste in a manner incompatible with the regulations of the Nuclear Regulatory Commission or inconsistent with the regulations of the Department of Transportation;

"(B) to regulate health, safety, or environmental hazards from source material, byproduct material, or special nuclear material;

"(C) to inspect the facilities of licensees of the Nuclear Regulatory Commission;

"(D) to inspect security areas or operations at the site of the generation of any low-level radioactive waste by the federal government, or to inspect classified information related to such areas or operations; or

"(E) to require indemnification pursuant to the provisions of chapter 171 of title 28, United States Code (commonly referred to as the Federal Tort Claims Act), or section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) (commonly referred to as the Price-Anderson Act), whichever is applicable.

"(4) FEDERAL AUTHORITY.—Except as expressly provided in this Act, nothing contained in this Act or any compact may be construed to limit the applicability of any federal law or to diminish or otherwise impair the jurisidiction of any federal agency, or to alter, amend, or otherwise affect any federal law governing the judicial review of any action taken pursuant to any compact.

"(5) STATE AUTHORITY PRESERVED.—Except as expressly provided in this Act, nothing contained in this Act expands, diminishes, or otherwise affects State law.

"(c) RESTRICTED USE OF REGIONAL DISPOSAL FACILITIES.—Any authority in a compact to restrict the use of the regional disposal facilities under the compact to the disposal of low-level radioactive waste generated within the compact region shall not take effect before each of the following occurs:

"(1) January 1, 1986; and

"(2) the Congress by law consents to the compact.

"(d) CONGRESSIONAL REVIEW.—Each compact shall provide that every 5 years after the compact has taken effect the Congress may by law withdraw its consent.

"Section 5. Limited Availability of Certain Regional Disposal Facilities During Transition and Licensing Periods.

"(a) AVAILABILITY OF DISPOSAL CAPACITY.—

"(1) PRESSURIZED-WATER AND BOILING WATER REACTORS.—During the seven-year period beginning January 1, 1986 and ending December 31, 1992, subject to the provisions of subsections (b) through (g), each State in which there is located a regional disposal facility referred to in paragraphs (1) through (3) of subsection (b) shall make disposal capacity available for low-level radioactive waste generated by pressurized water and boiling water commercial nuclear power reactors in accordance with the allocations established in subsection (c).

"(2) OTHER SOURCES OF LOW-LEVEL RADIOACTIVE WASTE.—During the seven-year period beginning January 1, 1986 and ending December 31, 1992, subject to the provisions of subsections (b) through (g), each State in which there is located a regional disposal facility referred to in paragraphs (1) through (3) of subsection (b) shall make disposal capacity available for low-level radioactive waste generated by any source not referred to in paragraph (1).

"(3) ALLOCATION OF DISPOSAL CAPACITY—

"(A) During the seven-year period beginning January 1, 1986 and ending December 31, 1992, low-level radioactive waste generated within a sited compact region shall be accorded priority under this section in the allocation of available disposal capacity at a regional disposal facility referred to in paragraphs (1) through (3) of subsection (b) and located in the sited compact region in which such waste is generated.

"(B) Any state in which a regional disposal facility referred to in paragraphs (1) through (3) of subsection (b) is located may, subject to the provisions of its compact, prohibit the disposal at such facility of low-level radioactive waste generated outside of the compact region if the disposal of such waste in any given calendar year, together with all other low-level radioactive waste disposed of at such facility within that same calendar year, would result in that facility disposing of a total annual volume of low-level radioactive waste in excess of 100 per centum of the average annual volume for such facility designated in subsection (b): *Provided, however,* That in the event that all three States, in which regional disposal facilities referred to in paragraphs (1) through (3) of subsection (b) act to prohibit the disposal of low-level radioactive waste pursuant to this subparagraph, each such State shall, in accordance with any applicable procedures of its compact, permit, as necessary, the disposal of additional quantities of such waste in increments of ten per centum of the average annual volume for each such facility designated in subsection (b).

(C) Nothing in this paragraph shall require any disposal facility or State referred to in paragraphs (1) through (3) of subsection (b) to accept for disposal low-level radioactive waste in excess of the total amounts designated in subsection (b).

"(4) CESSATION OF OPERATION OF LOW-LEVEL RADIOACTIVE WASTE DISPOSAL FACILITY.—No provision of this section shall be construed to obligae any State referred to in paragraphs (1) through (3) of subsection (b) to accept low-level radioactive waste from any source in the event that the regional disposal facility located in such state ceases operations.

"(b) LIMITATIONS.—The availability of disposal capacity for low-level radioactive waste from any source shall be subject to the following limitations:

"(1) BARNWELL, SOUTH CAROLINA.—The State of South Carolina, in accordance with the provisions of its compact, may limit the volume of low-level radioactive waste accepted for disposal at the regional disposal facility located at Barnwell, South Carolina to a total of 8,400,000 cubic feet of low-level radioactive waste during the 7-year period beginning January 1, 1986 and ending December 31, 1992 (as based on an average annual volume of 1,200,000 cubic feet of low-level radioactive waste).

"(2) RICHLAND, WASHINGTON.—The State of Washington, in accordance with the provisions of its compact, may limit the volume of low-level radioactive waste accepted for disposal at the regional disposal facility located at Richland, Washington to a total of 9,800,000 cubic feet of low-level radioactive waste during the 7-year period beginning January 1, 1986 and ending December 31, 1992 (as based on an average annual volume of 1,400,000 cubic feet of low-level radioactive waste).

"(3) BEATTY, NEVADA.—The State of Nevada, in accordance with the provisions of its compact, may limit the volume of low-level radioactive waste accepted for disposal at the regional disposal facility located at Beatty, Nevada to a total of 1,400,000 cubic feet of low-level radioactive waste during the 7-year period beginning January 1, 1986, and ending December 31, 1992 (as based on an average annual volume of 200,000 cubic feet of low-level radioactive waste).

"(C) COMMERCIAL NUCLEAR POWER REACTOR ALLOCATIONS.—

"(1) AMOUNT.—Subject to the provisions of subsections (a) through (g) each commercial nuclear power reactor shall upon request receive an allocation of low-level radioactive waste disposal capacity (in cubic feet) at the facilities referred to in subsection (b) during the 4-year transition period beginning January 1, 1986, and ending December 31, 1989, and during the 3-year licensing period beginning January 1, 1990, and ending December 31, 1992, in an amount calculated by multiplying the appropriate number from the following table by the number of months remaining in the applicable period as determined under paragraph (2).

Reactor type	4-yr. transition period		3-yr. transition period	
	In-sited region	All other locations	In-sited region	All other locations
PWR	1,027	871	934	685
BWR	2,300	1,951	2,091	1,533

"(2) METHOD OF CALCULATION.—For purposes of calculating the aggregate amount of disposal capacity available to a commercial nuclear power reactor under this subsection, the number of months shall be computed beginning with the first month of the applicable period, or the sixteenth month after receipt of a full power operating license, whichever occurs later.

"(3) UNUSED ALLOCATIONS.—Any unused allocation under paragraph (1) received by a reactor during the transition period or the licensing period may be used at any time after such reactor receives its full power license or after the beginning of the pertinent period, whichever is later, but not in any event after December 31, 1992, or after commencement of operation of a regional disposal facility in the compact region or State in which such reactor is located, whichever occurs first.

"(4) TRANSFERABILITY.—Any commercial nuclear power reactor in a State or compact region that is in compliance with the requirements of subsection (e) may assign any disposal capacity allocated to it under this subsection to any other person in any such State or compact region. Such assignment may be for valuable consideration and shall be in writing, copies of which shall be filed at the affected compact commissions and States, along with the assignor's unconditional written waiver of the disposal capacity being assigned.

"(5) UNUSUAL VOLUMES.—

"(A) The Secretary may, upon petition by the owner or operator of any commercial nuclear power reactor, allocate to such reactor disposal capacity in excess of the amount calculated under paragraph (1) if the Secretary finds and states in writing his

reasons for so finding that making additional capacity available for such reactor through this paragraph is required to permit unusual or unexpected operating, maintenance, repair or safety activities.

"(B) The Secretary may not make allocations pursuant to subparagraph (A) that would result in the acceptance for disposal of more than 800,000 cubic feet of low-level radioactive waste or would result in the total of the allocations made pursuant to this subsection exceeding 11,900,000 cubic feet over the entire seven-year interim access period.

"(6) Limitation.—During the seven-year interim access period referred to in subsection (a), the disposal facilities referred to in subsection (b) shall not be required to accept more than 11,900,000 cubic feet of low-level radioactive waste generated by commercial nuclear power reactors.

"(d)(1) SURCHARGES.—The disposal of any low-level radioactive waste under this section (other than low-level radioactive waste generated in a sited compact region) may be charged a surcharge by the State in which the applicable regional disposal facility is located, in addition to the fees and surcharges generally applicable for disposal of low-level radioactive waste in the regional disposal facility involved. Except as provided in subsection (e)(2), such surcharges shall not exceed—

"(A) in 1986 and 1987, $10 per cubic foot of low-level radioactive waste;

"(B) in 1988 and 1989, $20 per cubic foot of low-level radioactive waste; and

"(C) in 1990, 1991, and 1992, $40 per cubic foot of low-level radioactive waste.

"(2) MILESTONE INCENTIVES.—

"(A) ESCROW ACCOUNT.—Twenty-five per centum of all surcharge fees received by a State pursuant to paragraph (1) during the seven-year period referred to in subsection (a) shall be transferred on a monthly basis to an escrow account held by the Secretary. The Secretary shall deposit all funds received in a special escrow account. The funds so deposited shall not be the property of the United States. The Secretary shall act as trustee for such funds and shall invest them in interest-bearing United States Government Securities with the highest available yield. Such funds shall be held by the Secretary until—

"(i) paid or repaid in accordance with subparagraphs (B) or (C); or

"(ii) paid to the State collecting such fees in accordance with subparagraph (F).

"(B) PAYMENTS.—

"(i) JULY 1, 1986.—The twenty-five per centum of any amount collected by a State under paragraph (1) for low-level radioactive waste disposed of under this section during the period beginning on the date of enactment of the Low-Level Radioactive Waste Policy Amendments Act of 1985 and ending June 30, 1986, and transferred to the Secretary under subparagraph (A), shall be paid by the Secretary in accordance with subparagraph (D) if the milestone described in subsection (e)(1)(A) is met by the State in which such waste orginated.

"(ii) JANUARY 1, 1988.—The twenty-five per centum of any amount collected by a State under paragraph (1) for low-level radioactive waste disposed of under this section during the period beginning July 1, 1986 and ending December 31, 1987, and transferred to the Secretary under subparagraph (A), shall be paid by the Secretary in accordance with subparagraph (D) if the milestone described in subsection (e)(1)(B) is met by the State in which such waste originated (or its compact region, where applicable).

"(iii) JANUARY 1, 1990.—The twenty-five per centum of any amount collected by a State under paragraph (1) for low-level radioactive waste disposed of under this section during the period beginning January 1, 1988 and ending December 31, 1989, and transferred to the Secretary under subparagraph (A), shall be paid by the Secretary in accordance with subparagraph (D) if the milestone described in subsection (e)(1)(C) is met by the State in which such waste originated (or its compact region, where applicable).

"(iv) The twenty-five per centum of any amount collected by a State under paragraph (1) for low-level radioactive waste disposed of under this section during the period beginning January 1, 1990 and ending December 31, 1992, and transferred to the Secretary under subparagraph (A), shall be paid by the Secretary in accordance with subparagraph (D) if, by January 1, 1993, the State in which such waste originated (or its compact region, where applicable) is able to provide for the disposal of all low-level radioactive waste generated within such State or compact region.

"(C) FAILURE TO MEET JANUARY 1, 1993 DEADLINE.—If, by January 1, 1993, a State (or, where applicable, a compact region) in which low-level radioactive waste is generated is unable to provide for the disposal of all such waste generated within such State or compact region—

"(i) each State in which such waste is generated, upon the request of the generator or owner of the waste, shall take title to the waste, shall be obligated to take possession of the waste, and shall be liable for all damages directly or indirectly incurred by such generator or owner as a consequence of the failure of the State to take possession of the waste as soon after January 1, 1993 as the generator or owner notifies the State that the waste is available for shipment; or

"(ii) if such State elects not to take title to, take possession of, and assume liability for such waste, pursuant to clause (i), twenty-five per centum of any amount collected by a State under paragraph (1) for low-level radioactive waste disposed of under this section during the period beginning January 1, 1990 and ending December 31, 1992 shall be repaid, with interest, to each generator from whom such surcharge was collected. Repayments made pursuant to this clause shall be made on a monthly basis, with the first such repayment beginning on February 1, 1993, in an amount equal to one thirty-sixth of the total amount required to be repaid pursuant to this clause, and shall continue until the State (or, where applicable, compact region) in which such low-level radioactive waste is generated is able to provide for the disposal of all such waste generated within such State or compact region or until January 1, 1996, whichever is earlier.

If a State in which low-level radioactive waste is generated elects to take title to, take possession of, and assume liability for such waste pursuant to clause (i), such State shall be paid such amounts as are designated in subparagraph (B)(iv). If a State (or, where applicable, a compact region) in which low-level radioactive waste is generated provides for the disposal of such waste at any time after January 1, 1993 and prior to January 1, 1996, such State (or, where applicable, compact region) shall be paid in accordance with subparagraph (D) a lump sum amount equal to twenty-five per centum of any amount collected by a State under paragraph (1): *Provided, however,* That such payment shall be adjusted to reflect the remaining number of months between January 1, 1993 and January 1, 1996 for which such State (or, where applicable, compact region) provides for the disposal of such waste. If a State (or, where applicable, a compact region) in which low-level radioactive waste is generated is unable to provide for the disposal of all such waste generated within such State or compact region by January 1, 1996, each State in which such waste is generated, upon the request of the generator or owner of the waste, shall take title to the waste, be obligated to take possession of the waste, and shall be liable for all damages directly or indirectly incurred by such generator or owner as a consequence of the failure of the State to take possession of the waste as soon after January 1, 1996 as the generator or owner notifies the State that the waste is available for shipment.

"(D) RECIPIENTS OF PAYMENTS.—The payments described in subparagraphs (B) and (C) shall be paid within thirty days after the applicable date—

"(i) if the State in which such waste originated is not a member of a compact region, to such State;

"(ii) if the State in which such waste originated is a member of the region, to the compact commission serving such State.

"(E) USES OF PAYMENTS.—

"(i) LIMITATIONS.—Any amount paid under subparagraphs (B) or (C) may only be used to—

"(I) establish low-level radioactive waste disposal facilities;

"(II) mitigate the impact of low-level radioactive waste disposal facilities on the host state;

"(III) regulate low-level radioactive waste disposal facilities; or

"(IV) ensure the decommissioning, closure, and care during the period of institutional control of low-level radioactive waste disposal facilities.

"(ii) REPORTS.—

"(I) RECIPIENT.—Any State or compact commission receiving a payment under subparagraphs (B) or (C) shall, on December 31 of each year in which any such funds are expended, submit a report to the Department of Energy itemizing any such expenditures.

"(II) DEPARTMENT OF ENERGY.—Not later than six months after receiving the reports under subclause (I), the Secretary shall submit to the Congress a summary of all such reports that shall include an assessment of the compliance of each such State or compact commission with the requirements of clause (i).

"(F) PAYMENT TO STATES.—Any amount collected by a State under paragraph (1) that is placed in escrow under subparagraph (A) and not paid to a State or compact commission under subparagraphs (B) and (C) or not repaid to a generator under subparagraph (C) shall be paid from such escrow account to such State collecting such payment under paragraph (1). Such payment shall be made not later than 30 days after a determination of ineligibility for a refund is made.

"(G) PENALTY SURCHARGES.—No rebate shall be made under this subsection of any surcharge or penalty surcharge paid during a period of noncompliance with subsection (e)(1).

"(e) REQUIREMENTS FOR ACCESS TO REGIONAL DISPOSAL FACILITIES.—

"(1) REQUIREMENTS FOR NON-SITED COMPACT REGIONS AND NON-MEMBER STATES.—Each non-sited compact region, or State that is not a member of a compact region that does not have an operating disposal facility, shall comply with the following requirements:

"(A) By July 1, 1986, each such non-member State shall ratify compact legislation or, by the enactment of legislation or the certification of the Governor, indicate its intent to develop a site for the location of a low-level radioactive waste disposal facility within such State.

"(B) By January 1, 1988—

"(i) each non-sited compact region shall identify the State in whch its low-level radioactive waste disposal facility is to be located, or shall have selected the developer for such facility and the site to be developed, and each compact region or the State in which its low-level radioactive waste disposal facility is to be located shall develop a siting plan for such facility providing detailed procedures and a schedule for establishing a facility location and preparing a facility license application and shall delegate authority to implement such plan; and

"(ii) each non-member State shall develop a siting plan providing detailed procedures and a schedule for establishing a facility location and preparing a facility license application for a low-level radioactive waste disposal facility and shall delegate authority to implement such plan.

"(iii) The siting plan required pursuant to this paragraph shall include a description of the optimum way to attain operation of the low-level radioactive waste disposal facility involved, within the time period specified in this Act. Such plan shall include a description of the objectives and a sequence of deadlines for all entities required to take action to implement such plan, including, to the extent practicable, an identification of the activities in which a delay in the start, or completion, of such activities will cause a delay in beginning facility operation. Such plan shall also identify, to the extent practicable, the process for (1) screening for broad siting areas; (2) identifying and evaluating specific candidate sites; and (3) characterizing the preferred site(s), completing all necessary environmental assessments, and preparing a license application for submission to the Nuclear Regulatory Commission or an Agreement State."

"(C) By January 1, 1990—

"(i) a complete application (as determined by the Nuclear Regulatory Commission or the appropriate agency of an agreement State) shall be filed for a license to operate a low-level radioactive waste disposal facility within each non-sited compact region or within each non-member State; or

"(ii) the Governor (or, for any State without a Governor, the chief executive officer) of any State that is not a member of a compact region in compliance with clause (i), or has not complied with such clause by its own actions, shall provide a written certification to the Nuclear Regulatory Commission, that such State will be capable of providing for, and will provide for, the storage, disposal, or management of any low-level radioactive waste generated within such State and requiring disposal after December 31, 1992, and include a description of the actions that will be taken to ensure that such capacity exists.

"(D) By January 1, 1992, a complete application (as determined by the Nuclear Regulatory Commission or the appropriate agency of an agreement State) shall be filed for a license to operate a low-level radioactive waste disposal facility within each non-sited compact region or within each non-member State.

"(E) The Nuclear Regulatory Commission shall transmit any certification received under subparagraph (C) to the Congress and publish any such certification in the Federal Register.

"(F) Any State may, subject to all applicable provisions, if any, of any applicable compact, enter into an agreement with the compact commission of a region in which a regional disposal facility is located to provide for the disposal of all low-level radioactive waste generated within such State, and, by virtue of such agreement, may, with the approval of the State in which the regional disposal facility is located, be deemed to be in compliance with subparagraphs (A), (B), (C), and (D).

"(2) PENALTIES FOR FAILURE TO COMPLY.—

"(A) BY JULY 1, 1986.—If any State fails to comply with subparagraph (1)(A)—

"(i) any generator of low-level radioactive waste within such region or non-member State shall, for the period beginning July 1, 1986, and ending December 31, 1986, be charged 2 times the surcharge otherwise applicable under subsection (d); and

"(ii) on or after January 1, 1987, any low-level radioactive waste generated within such region or non-member State may be denied access to the regional disposal facilities referred to in paragraphs (1) through (3) of subsection (b).

"(B) BY JANUARY 1, 1988.—If any non-sited compact region or non-member State fails to comply with paragraph (1)(B)—

"(i) any generator of low-level radioactive waste within such region or non-member State shall—

"(I) for the period beginning January 1, 1988, and ending June 30, 1988, be charged 2 times the surcharge otherwise applicable under subsection (d); and

(II) for the period beginning July 1, 1988, and ending December 31, 1988, be charged 4 times the surcharge otherwise applicable under subsection (d); and

"(ii) on or after January 1, 1989, any low-level radioactive waste generated within such region or non-member State may be denied access to the regional disposal facilities referred to in paragraphs (1) through (3) of subsection (b).

"(C) BY JANUARY 1, 1990.—If any non-sited compact region or non-member State fails to comply with paragraph (1)(C), any low-level radioactive waste generated within such region or non-member State may be denied access to the regional disposal facilities referred to in paragraphs (1) through (3) of subsection (b).

"(D) By January 1, 1992.—If non-sited compact region or non-member State fails to comply with paragraph (1)(D), any generator of low-level radioactive waste within such region or non-member State shall, for the period beginning January 1, 1992 and ending upon the filing of the application described in paragraph (1)(D), be charged 3 times the surcharge otherwise applicable under subsection (d).

"(3) DENIAL OF ACCESS.—No denial or suspension of access to a regional disposal facility under paragraph (2) may be based on the source, class, or type of low-level radioactive waste.

"(4) RESTORATION OF SUSPENDED ACCESS; PENALTIES FOR FAILURE TO COMPLY.—Any access to a regional disposal facility that is suspended under paragraph (2) shall be restored after the non-sited compact region or non-member State involved complies with such requirement. Any payment of surcharge penalties pursuant to paragraph (2) for failure to comply with the requirements of subsection (e) shall be terminated after the non-sited compact region or non-member State involved complies with such requirements.

"(f)(1) ADMINISTRATION.—Each State and compact commission in which a regional disposal facility referred to in paragraphs (1) through (3) of subsection (b) is located shall have authority—

"(A) to monitor compliance with the limitations, allocations, and requirements established in this section; and

"(B) to deny access to any non-federal low-level radioactive waste disposal facilities within its borders to any low-level radioactive waste that—

"(i) is in excess of the limitations or allocations established in this section; or

"(ii) is not required to be accepted due to the failure of a compact region or State to comply with the requirements of subsection (e)(1).

"(2) AVAILABILITY OF INFORMATION DURING INTERIM ACCESS PERIOD.—

"(A) The States of South Carolina, Washington, and Nevada may require information from disposal facility operators, generators, intermediate handlers, and the Department of Energy that is reasonably necessary to monitor the availability of disposal capacity, the use and assignment of allocations and the applicability of surcharges.

"(B) The States of South Carolina, Washington, and Nevada may, after written notice followed by a period of at least 30 days, deny access to disposal capacity to any generator or intermediate handler who fails to provide information under subparagraph (A).

"(C) PROPRIETARY INFORMATION.—

"(i) Trade secrets, proprietary and other confidential information shall be made available to a State under this subsection upon request only if such State—

"(I) consents in writing to restrict the dissemination of the information to those who are directly involved in monitoring under subparagraph (A) and who have a need to know;

"(II) accepts liability for wrongful disclosure; and

"(III) demonstrates that such information is essential to such monitoring.

"(ii) The United States shall not be liable for the wrongful disclosure by any individual or State of any information provided to such individual or State under this subsection.

"(iii) Whenever any individual or State has obtained possession of information under this subsection, the individual shall be subject to the same provisions of law with respect to the disclosure of such information as would apply to an officer or employee of the United States or of any department or agency thereof and the State shall be subject to the same provisions of law with respect to the disclosure of such information as would apply to the United States or any department or agency thereof. No State or State officer or employee who receives trade secrets, proprietary information, or other confidential information under this Act may be required to disclose such information under State law.

"(g) NONDISCRIMINATION.—Except as provided in subsections (b) through (e), low-level radioactive waste disposed of under this section shall be subject without discrimination to all applicable legal requirements of the compact region and State in

which the disposal facility is located as if such low-level radioactive waste were generated within such compact region.

"SEC. 6. EMERGENCY ACCESS.

"(a) IN GENERAL.—The Nuclear Regulatory Commission may grant emergency access to any regional disposal facility or nonfederal disposal facility within a State that is not a member of a compact for specific low-level radioactive waste, if necessary to eliminate an immediate and serious threat to the public health and safety or the common defense and security. The procedure for granting emergency access shall be as provided in this section.

"(b) Request for Emergency Access.—Any generator of low-level radioactive waste, or any Governor (or, for any State without a Governor, the chief executive officer of the State) on behalf of any generator or generators located in his or her State, may request that the Nuclear Regulatory Commission grant emergency access to a regional disposal facility or a non-federal disposal facility within a State that is not a member of a compact for specific low-level radioactive waste. Any such request shall contain any information and certifications the Nuclear Regulatory Commission may require.

"(c) DETERMINATION OF NUCLEAR REGULATORY COMMISSION.—

"(1) REQUIRED DETERMINATION.—Not later than 45 days after receiving a request under subsection (b), the Nuclear Regulatory Commission shall determine whether—

"(A) emergency access is necessary because of an immediate and serious threat to the public health and safety or the common defense and security; and

"(B) the threat cannot be mitigated by any alternative consistent with the public health and safety, including storage of low-level radioactive waste at the site of generation or in a storage facility obtaining access to a disposal facility by voluntary agreement, purchasing disposal capacity available for assignment pursuant to section 5(c) or ceasing activities that generate low-level radioactive waste.

"(2) REQUIRED NOTIFICATION.—If the Nuclear Regulatory Commission makes the determinations required in paragraph (1) in the affirmative, it shall designate an appropriate non-federal disposal facility or facilities, and notify the Governor (or chief executive officer) of the State in which such facility is located and the appropriate compact commission that emergency access is required. Such notification shall specifically describe the low-level radioactive waste as to source, physical and radiological characteristics, and the minimum volume and duration, not exceeding 180 days, necessary to alleviate the immediate threat to public health and safety or the common defense and security. The Nuclear Regulatory Commission shall also notify the Governor (or chief executive officer) of the State in which the low-level radioactive waste requiring emergency access was generated that emergency access has been granted and that, pursuant to subsection (e), no extension of emergency access may be granted absent diligent State action during the period of the initial grant.

"(d) TEMPORARY EMERGENCY ACCESS.—Upon determining that emergency access is necessary because of an immediate and serious threat to the public health and safety or the common defense and security, the Nuclear Regulatory Commission may at its discretion grant temporary emergency access, pending its determination whether the threat could be mitigated by any alternative consistent with the public health and safety. In granting access under this subsection, the Nuclear Regulatory Commission shall provide the same notification and information required under subsection (c). Absent a determination that no alternative consistent with the public health and safety would mitigate the threat, access granted under this subsection shall expire 45 days after the granting of temporary emergency access under this subsection.

"(e) EXTENSION OF EMERGENCY ACCESS.—The Nuclear Regulatory Commission may grant one extension of emergency access beyond the period provided in subsection (c), if it determines that emergency access continues to be necessary because of an immediate and serious threat to the public health and safety or the common defense and security that cannot be mitigated by any alternative consistent with the public health and safety, and that the generator of low-level radioactive waste granted emergency access and the State in which such low-level radioactive waste was generated have diligently though unsuccessfully acted during the period of the initial grant to eliminate the need for emergency access. Any extension granted under this subsection shall be for the minimum volume and duration the Nuclear Regulatory Commission finds necessary to eliminate the immediate threat to public health and safety or the common defense and security, and shall not in any event exceed 180 days.

"(f) RECIPROCAL ACCESS.—Any compact region or State not a member of a compact that provides emergency access to non-Federal disposal facilities within its borders shall be entitled to reciprocal access to any subsequently operating non-federal disposal facility that serves the State or compact region in which low-level radioactive waste granted emergency access was generated. The compact commission or State having authority to approve importation of low-level radioactive waste to the disposal facility to which emergency access was granted shall designate for reciprocal access an equal volume of low-level radioactive waste having similar characteristics to that provided emergency access.

"(g) APPROVAL BY COMPACT COMMISSION.—Any grant of access under this section shall be submitted to the compact commission for the region in which the designation disposal facility is located for such approval as may be required under the terms of its compact. Any such compact commission shall act to approve emergency access not later than 15 days after the receiving notification from the Nuclear Regulatory Commission, or reciprocal access not later than 15 days after receiving notification from the appropriation authority under subsection (f).

"(h) LIMITATIONS.—No State shall be required to provide emergency or reciprocal access to any regional disposal facility within its borders for low-level radioactive waste not meeting criteria established by the license or license agreement of such facility, or in excess of the approved capacity of such facility, or to delay the closing of any such facility pursuant to plans established before receiving a request for emergency or reciprocal access. No State shall, during any 12-month period, be required to provide emergency or reciprocal access to any regional disposal facility within its borders for more than 20 percent of the total volume of low-level radioactive waste accepted for disposal at such facility during the previous calendar year.

"(i) VOLUME REDUCTION AND SURCHARGES.—Any low-level radioactive waste delivered for disposal under this section shall be reduced in volume to the maximum extent practicable and shall be subject to surcharges established in this Act.

"(j) DEDUCTION FROM ALLOCATION.—Any volume of low-level radioactive waste granted emergency or reciprocal access under this section, if generated by any commercial nuclear power reactor, shall be deducted from the low-level radioactive waste volume allocable under section 5(c).

"(k) AGREEMENT STATES.—Any agreement under section 274 of the Atomic Energy Act of 1954 (42 U.S.C. 2021) shall not be applicable to the determinations of the Nuclear Regulatory Commission under this section.

"SEC. 7. RESPONSIBILITIES OF THE DEPARTMENT OF ENERGY.

"(a) FINANCIAL AND TECHNICAL ASSISTANCE.—The Secretary shall, to the extent provided in appropriations Act, provide to those compact regions, host States, and nonmember States determined by the Secretary to require assistance for purposes of carrying out this Act—

"(1) continuing technical assistance to assist them in fulfilling their responsibilities under this Act. Such technical assistance shall include, but not be limited to, technical guidelines for site selection, alternative technologies for low-level radioactive waste disposal, volume reduction options, management techniques to reduce low-level waste generation, transportation practices for shipment of low-level wastes, health and safety considerations in the storage, shipment and disposal of low-level radioactive wastes, and establishment of a computerized data-base to monitor the management of low-level radioactive wastes; and

"(2) through the end of fiscal year 1993, financial assistance to assist them in fulfilling their responsibilities under this Act

"(b) REPORTS.—The Secretary shall prepare and submit to the Congress on an annual basis a report which (1) summarizes the progress of low-level waste disposal siting and licensing activities within each compact region, (2) reviews the available volume reduction technologies, their applications, effectiveness, and costs of a per unit volume basis, (3) reviews interim storage facility requirements, costs, and usage, (4) summarizes transportation requirements for such wastes on an inter- and intra-regional basis, (5) summarizes the data on the total amount of low-level waste shipped for disposal on a yearly basis, the proportion of such wastes subjected to volume reduction, the average volume reduction attained, and the proportion of wastes stored on an interim basis, and (6) projects the interim storage and final disposal volume requirements anticipated for the following year, on a regional basis.

"SEC. 8. ALTERNATIVE DISPOSAL METHODS.

"(a) Not later than 12 months after the date of enactment of the Low-Level Radioactive Waste Policy Amendments Act of 1985, the Nuclear Regulatory Commission shall, in consultation with the States and other interested persons, identify methods for the disposal of low-level radioactive waste other than shallow land burial, and establish and publish technical guidance regarding licensing of facilities that use such methods.

(b) Not later than 24 months after the date of enactment of the Low-Level Radioactive Waste Policy Amendments Act of 1985, the Commission shall, in consultation with the States and other interested persons, identify and publish all relevant tech-

nical information regarding the methods identified pursuant to subsection (a) that a State or compact must provide to the Commission in order to pursue such methods, together with the technical requirements that such facilities must meet, in the judgment of the Commission, if pursued as an alternative to shallow land burial. Such technical information and requirements shall include, but need not be limited to, site suitability, site design, facility operation disposal site closure, and environmental monitoring, as necessary to meet the performance objectives established by the Commission for a licensed low-level radioactive waste disposal facility. The Commission shall specify and publish such requirements in a manner and form deemed appropriate by the Commission.

"SEC. 9. LICENSING REVIEW AND APPROVAL

"In order to ensure the timely development of new low-level radioactive waste disposal facilities, the Nuclear Regulatory Commission or, as appropriate, agreement States, shall consider an application for a disposal facility license in accordance with the laws applicable to such application, except that the Commission and the agreement state shall—

"(1) not later than 12 months after the date of enactment of the Low-Level Radioactive Waste Policy Amendments Act of 1985, establish procedures and develop the technical capability for processing applications for such licenses;

"(2) to the extent practicable, complete all activities associated with the review and processing of any application for such a license (except for public hearings) no later than 15 months after the date of receipt of such application; and

"(3) to the extent practicable, consolidate all required technical and environmental reviews and public hearings.

"SEC. 10. RADIOACTIVE WASTE BELOW REGULATORY CONCERN.

"(a) Not later than 6 months after the date of enactment of the Low-Level Radioactive Waste Policy Amendments Act of 1985, the Commission shall establish standards and procedures, pursuant to existing authority, and develop the technical capability for considering and acting upon petitions to exempt specific radioactive waste streams from regulation by the Commission due to the presence of radionuclides in such waste streams in sufficiently low concentrations or quantities as to be below regulatory concern.

"(b) The standards and procedures established by the Commission pursuant to subsection (a) shall set forth all information required to be submitted to the Commission by licensees in support of such petitions, including, but not limited to—

"(1) a detailed description of the waste materials, including their origin, chemical composition, physical state, volume, and mass; and

"(2) the concentration or contamination levels, half-lives, and identities of the radionuclides present.

Such standards and procedures shall provide that, upon receipt of a petition to exempt a specific radioactive waste stream from regulation by the Commission, the Commission shall determine in an expeditious manner whether the concentration or quantity of radionuclides present in such waste stream requires regulation by the Commission in order to protect the public health and safety. Where the Commission determines that regulation of a radioactive waste stream is not necessary to protect the public health and safety, the Commission shall take such steps as may be necessary, in an expeditious manner, to exempt the disposal of such radioactive waste from regulation by the Commission.

"SEC. 11. REGULATION OF COMMERCIAL LOW-LEVEL WASTE SITES UNDER RCRA.

"(a) Not later than 90 days after the date of enactment of the Low-Level Radioactive Waste Policy Amendments Act of 1985, the Nuclear Regulatory Commission and the Administrator of the Environmental Protection Agency (hereinafter in this section referred to as 'the Administrator') shall jointly identify and publish in the Federal Register a list of all substances identified or listed as hazardous waste under section 3001 of the Solid Waste Disposal Act and subject to regulation under that Act that are low-level radioactive waste subject to section 3(a) of this Act or are being disposed of at low-level radioactive waste disposal facilities licensed by the Commission or by an Agreement State pursuant to an agreement with the Commission under section 274 of the Atomic Energy Act (42 U.S.C. 2021). For each such substance, the Commission and the Administrator shall jointly identify the source of generation, the volume, concentration, composition, hazard, and other relevant characteristics of such substance, and the facility or facilities at which such substance is currently or has recently been disposed of. Such list shall be periodically reviewed and revised as necessary.

"(b) If the Nuclear Regulatory Commission and the Administrator determine that disposal (or treatment and disposal) of a substance identified under subsection (a) at a facility meeting only—

"(1) the requirements of subtitle C of the Solid Waste Disposal Act, or

"(2) the requirements established by the Nuclear Regulatory Commission for the licensing and regulation of the disposal of low-level radioactive waste;

is adequate to protect public health and safety and to protect human health and the environment, disposal (or treatment and disposal) of such substance at such a facility shall constitute compliance with the requirements for proper disposal of such substance and for the licensing and regulation of such facility with respect to the disposal (or treatment and disposal) of such substance under both subtitle C of the Solid Waste Disposal Act and the Atomic Energy Act.

"(c)(1) Not later than 180 days after the date of publication in the Federal Register of the list of hazardous wastes identified pursuant to subsection (a) that may not be disposed of (or treated and disposed of) at a facility identified pursuant to subsection (b), the Administrator shall identify what specific requirements, if any, based on subtitle C of the Solid Waste Disposal Act, in addition to those established by the Commission for the licensing and regulation of low-level radioactive waste disposal facilities, are necessary for the disposal (or treatment and disposal) of each such substance to protect human health and the environment. The Administrator shall promptly transmit such identification to the Nuclear Regulatory Commission, together with a statement of the basis for such judgment and the views of the Administrator on the consistency of such requirements with the Atomic Energy Act, including the requirements established by the Commission for the licensing and regulation of low-level radioactive waste disposal facilities subject to this Act.

"(2) Not later than 90 days after receipt of information transmitted under paragraph (1), the Nuclear Regulatory Commission shall review and evaluate such information and, after considering the views of the Administrator, shall make a determination as to whether the requirements identified under paragraph (1) are not inconsistent with the Atomic Energy Act, including the requirements established by the Commission for the licensing and regulation of low-level radioactive waste disposal facilities subject to this Act. Where the Commission determines that such requirements are not inconsistent with the Atomic Energy Act, including the requirements established by the Commission for the licensing and regulation of low-level radioactive waste disposal facilities subject to this Act, not later than 90 days after such determination, the Commission shall take such steps as might be necessary, either in rulemaking or in individual licensing procedures for specific facilities, to impose such requirements on each such facility that proposes to accept any substance identified pursuant to subsection (a) for which such requirements are applicable. A facility in compliance with such modified requirements shall be deemed to be in compliance with subtitle C of the Solid Waste Disposal Act.

"(3) If the Commission determines under paragraph (2) that any requirements identified by the Administrator under paragraph (1) cannot be applied at a particular facility in a manner not inconsistent with the Atomic Energy Act, including the requirements established by the Commission for the licensing and regulation of low-level radioactive waste disposal facilities subject to this Act, the Commission is authorized to prohibit the disposal of substances for which such requirements are identified by the Administrator as necessary at such facility or in any low-level radioactive waste disposal facility licensed and regulated by the Commission or by an Agreement State.

"(d) For the purposes of judicial review, the identification of a facility under subsection (b), the imposition of requirements or failure to impose requirements in accordance with subsection (c)(2), and the prohibition of disposal under subsection (c) shall be considered final agency actions.".

TITLE II—OMNIBUS LOW-LEVEL RADIOACTIVE WASTE INTERSTATE COMPACT CONSENT ACT

SEC. 201. SHORT TITLE.

This Title may be cited as the "'Omnibus Low-Level Radioactive Waste Interstate Compact Consent Act".

Subtitle A—General Provisions

SEC. 211. CONGRESSIONAL FINDING.

The Congress hereby finds that each of the compacts set forth in subtitle B is in furtherance of the Low-Level Radioactive Waste Policy Act.

SEC. 212. CONDITIONS OF CONSENT TO COMPACTS.

The consent of the Congress to each of the compacts set forth in subtitle B—

(1) shall become effective on the date of the enactment of this Act;

(2) is granted subject to the provisions of the Low-Level Radioactive Waste Policy Act, as amended; and

(3) is granted only for so long as the regional commission, committee, or board established in the compact complies with all of the provisions of such Act.

SEC. 213. CONGRESSIONAL REVIEW.

The Congress may alter, amend, or repeal this Act with respect to any compact set

forth in subtitle B after the expiration of the 10-year period following the date of the enactment of this Act, and at such intervals thereafter as may be provided in such compact.

Subtitle B—Congressional Consent to Compacts

SEC. 221. NORTHWEST INTERSTATE COMPACT ON LOW-LEVEL RADIOACTIVE WASTE MANAGEMENT.

The consent of Congress is hereby given to the states of Alaska, Hawaii, Idaho, Montana, Oregon, Utah, Washington, and Wyoming to enter into the Northwest Interstate Compact on Low-level Radioactive Waste Management, and to each and every part and article thereof. Such compact reads substantially as follows:

"NORTHWEST INTERSTATE COMPACT ON LOW-LEVEL RADIOACTIVE WASTE MANAGEMENT

"ARTICLE I—POLICY AND PURPOSE

"The party states recognize that low-level radioactive wastes are generated by essential activities and services that benefit the citizens of the states. It is further recognized that the protection of the health and safety of the citizens of the party states and the most economical management of low-level radioactive wastes can be accomplished through cooperation of the states in minimizing the amount of handling and transportation required to dispose of such wastes and through the cooperation of the states in providing facilities that serve the region. It is the policy of the party states to undertake the necessary cooperation to protect the health and safety of the citizens of the party states and to provide for the most economical management of low-level radioactive wastes on a continuing basis. It is the purpose of this compact to provide the means for such a cooperative effort among the party states so that the protection of the citizens of the states and the maintenance of the viability of the states' economies will be enhanced while sharing the responsibilities of radioactive low-level waste management.

"ARTICLE II—DEFINITIONS

"As used in this compact:

"(1) 'Facility' means any site, location structure, or property used or to be used for the storage, treatment, or disposal of low-level waste, excluding federal waste facilities;

"(2) 'Low-level waste' means waste material which contains radioactive nuclides emitting primarily beta or gamma radiation, or both, in concentrations or quantities which exceed applicable federal or state standards for unrestricted release. Low-level waste does not include waste containing more than ten (10) nanocuries of transuranic contaminants per gram of material, nor spent reactor fuel, nor material classified as either high-level waste or waste which is unsuited for disposal by near-surface burial under any applicable federal regulations;

"(3) 'Generator' means any person, partnership, association, corporation, or any other entity whatsoever which, as a part of its activities, produces low-level radioactive waste;

"(4) 'Host state' means a state in which a facility is located.

"ARTICLE III—REGULATORY PRACTICES

"Each party state hereby agrees to adopt practices which will require low-level waste shipments originating within it borders and destined for a facility within another party state to conform to the applicable packaging and transportation requirements and regulations of the host state. Such practices shall include:

"(1) Maintaining an inventory of all generators within the state that have shipped or expect to ship low-level waste to facilities in another party state;

"(2) Periodic unannounced inspection of the premises of such generators and the waste management activities thereon;

"(3) Authorization of the containers in which such waste may be shipped, and a requirement that generators use only that type of container authorized by the state;

"(4) Assurance that inspections of the carriers which transport such waste are conducted by proper authorities, and appropriate enforcement action taken for violations;

"(5) After receiving notification from a host state that a generator within the party state is in violation of applicable packaging or transportation standards, the party state will take appropriate action to assure that such violations do not recur. Such action may include inspection of every individual low-level waste shipment by that generator.

Each party state may impose fees upon generators and shippers to recover the cost of the inspections and other practices under this article. Nothing in this article shall be construed to limit any party state's authority impose additional or more stringent standards on generators or carriers than those required under this article.

"ARTICLE IV—REGIONAL FACILITIES

"(1) Facilities located in any party state, other than facilities established or maintained by individual low-level waste generators for the management of their own low-level waste, shall accept low-level waste generated in any party state if such waste has been packaged and transported according to applicable laws and regulations.

"(2) No facility located in any party state may accept low-level waste generated outside of the region comprised of the party states, except as provided in article V.

"(3) Until such time as paragraph (2) of article IV takes effect, facilities located in any party state may accept low-level waste generated outside of any of the party states only if such waste is accompanied by a certificate of compliance issued by an official of the state in which such waste shipment originated. Such certificate shall be in such form as may be required by the host state, and shall contain at least the following:

"(A) The generator's name and address;

"(B) A description of the contents of the low-level waste container.

"(C) A statement that the low-level waste being shipped has been inspected by the official who issued the certificate or by his agent or by a representative of the United States Nuclear Regulatory Commission, and found to have been packaged in compliance with applicable Federal regulations and such additional requirements as may be imposed by the host state;

"(D) A binding agreement by the state of origin to reimburse any party state for any liability or expense incurred as a result of an accidental release of such waste during shipment or after such waste reaches the facility.

"(4) Each party state shall cooperate with the other party states in determining the appropriate site of any facility that might be required within the region comprised of the party states, in order to maximize public health and safety while minimizing the use of any one (1) party state as the host of such facilities on a permanent basis. Each party state further agrees that decisions regarding low-level waste management facilities in their region will be reached through a good faith process which takes into account the burdens borne by each of the party states as well as the benefits each has received.

"(5) The party states recognize that the issue of hazardous chemical waste management is similar in many respects to that of low-level waste management. Therefore, in consideration of the State of Washington allowing access to its low-level waste disposal facility by generations in other party states, party states such as Oregon and Idaho which host hazardous chemical waste disposal facilities will allow access to such facilities by generators within other party states. Nothing in this compact shall be construed to prevent any party state from limiting the nature and type of hazardous chemical or low-level wastes to be accepted at facilities within its borders or from ordering the closure of such facilities, so long as such action by a host state is applied equally to all generators within the region comprised of the party states.

"(6) Any host state may establish a schedule of fees and requirements related to its facility, to assure that closure, perpetual care, and maintenance and contingency requirements are not, including adequate bonding.

ARTICLE V—NORTHWEST LOW-LEVEL WASTE COMPACT COMMITTEE

"The governor of each party state shall designate one (1) official of that state as the person responsible for administration of his compact. The officials so designated shall together comprise the northwest low-level waste compact committee. The committee shall meet as required to consider matters arising under this compact. The parties shall inform the committee of existing regulations concerning low-level waste management in their states, and shall afford all parties a reasonable opportunity to review and comment upon any proposed modifications in such regulations. Notwithstanding any provision of article IV to the contrary, the committee may enter into arrangements with states provinces, individual generators, or regional compact entities outside the region comprised of the party states for access to facilities on such terms and conditions as the committee may deem appropriate. However, it shall require a two thirds (⅔) vote of all such members, including the affirmative vote of the member of any party state in which a facility affected by such arrangement is located, for the committee to enter into such arrangement.

"ARTICLE VI—ELIGIBLE PARTIES AND EFFECTIVE DATE

"(1) Each of the following states is eligible to become a party to this compact: Alaska, Hawaii, Idaho, Montana, Oregon, Utah, Washington, and Wyoming. As to any eligible party, this compact shall become effective upon enactment into law by that party, but it shall not become initially effective until enacted into law by two (2) states. Any party state may withdraw from this compact by enacting a statute repealing its approval.

"(2) After the compact has initially taken effect pursuant to paragraph (1) of this article, any eligible party state may become a party to this compact by the execution of an executive order by the governor of the state. Any state which becomes a party in this manner shall cease to be a party upon the final adjournment of the next general or regular session its legislature or July 1, 1983, whichever occurs first, unless the com-

pact has by then been enacted as a statute by that state.

"(3) Paragraph (2) of article IV of this compact shall take effect on July 1, 1983, if consent is given by Congress. As provided in public law 96-573, Congress may withdraw its consent to the compact after every five (5) year period.

"ARTICLE VII—SEVERABILITY

"If any provision of this compact, or its application to any person or circumstances, is held to be invalid, all other provisions of this compact, and the application of all of its provisions to all other persons and circumstances, shall remain valid; and to this end the provisions of this compact are severable."

SEC. 22. CENTRAL INTERSTATE LOW-LEVEL RADIOACTIVE WASTE COMPACT.

The consent of Congress is hereby given to the states of Arkansas, Iowa, Kansas, Louisiana, Minnesota, Missouri, Nebraska, North Dakota, and Oklahoma to enter into the Central Interstate Low Level Radioactive Waste Compact, and to each and every part and article thereof. Such compact reads substantially as follows:

"CENTRAL INTERSTATE LOW-LEVEL RADIOACTIVE WASTE COMPACT

"ARTICLE I. POLICY AND PURPOSE

"The party states recognize that each state is responsible for the management of its non-Federal low-level radioactive wastes. They also recognize that the Congress, by enacting the Low-Level Radioactive Waste Policy Act (Public Law 96-573) has authorized and encouraged states to enter into compacts for the efficient management of wastes. It is the policy of the party states to cooperate in the protection of the health, safety and welfare of their citizens and the environment and to provide for and encourage the economical management of low-level radioactive wastes. It is the purpose of this compact to provide the framework for such a cooperative effort; to promote the health, safety and welfare of the citizens and the environment of the region; to limit the number of facilities needed to effectively and efficiently manage low-level radioactive wastes and to encourage the reduction of the generation thereof; and to distribute the costs, benefits and obligations among the party states.

"ARTICLE II. DEFINITIONS

"As used in this compact, unless the context clearly requires a different construction:

"a. 'Commission' means the Central Interstate Low-Level Radioactive Waste Commission;

"b. 'disposal' means the isolation and final disposition of waste;

"c. 'extended care' means the care of a regional facility including necessary corrective measures subsequent to its active use for waste management until such time as the regional facility no longer poses a threat to the environment or public health;

"d. 'facility' means any site, location, structure or property used or to be used for the management of waste;

"e. 'generator' means any person who, in the course of or as incident to manufacturing, power generation, processing, medical diagnosis and treatment, biomedical research, other industrial or commercial activity, other research or mining in a party state, produces or processes waste. 'Generator' does not include any person who receives waste generated outside the region for subsequent shipment to a regional facility;

"f. 'host state' means any party state in which a regional facility is situated or is being developed;

"g. 'low-level radioactive waste' or 'waste' means, as defined in the Low-Level Radioactive Waste Policy Act (Public Law 96-573), radioactive waste not classified as: High-level radioactive waste, transuranic waste, spent nuclear fuel, or byproduct material as defined in section 11 e.(2) of the Atomic Energy Act of 1954, as amended through 1978.

"h. 'management of waste' means the storage, treatment or disposal of waste;

"i. 'notification of each party state' means transmittal of written notice to the Governor, presiding officer of each legislative body and any other person designated by the party state's Commission member to receive such notice;

"j. 'party state' means any state which is a signatory party to this compact;

"k. 'person' means any individual, corporation, business enterprise, or other legal entity, either public or private;

"l. 'region' means the area of the party states;

"m. 'regional facility' means a facility which is located within the region and which has been approved by the Commission for the benefit of the party States;

"n. 'site' means any property which is owned or leased by a generator and is contiguous to or divided only by a public or private way from the source of generation;

"o. 'state' means a state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands or any other territorial possession of the United States;

"p. 'storage' means the holding of waste for treatment or disposal; and

"q. 'treatment' means any method, technique or process, including storage for radioactive decay, designed to change the physical, chemical or biological characteristics or composition of any waste in order to render such waste safe for transport or management, amenable for recovery, convertible to another usable material, or reduced in volume.

"ARTICLE III. RIGHTS AND OBLIGATIONS

"a. There shall be provided within the region one or more regional facilities which together provide sufficient capacity to manage all wastes generated within the region. It shall be the duty of regional facilities to accept compatible wastes generated in and from a party state, and meeting the requirements of this Act, and each party state shall have the right to have the wastes generated within its borders managed at such facility.

"b. To the extent authorized by Federal law and host State law, a host state shall regulate and license any regional facility within its borders and ensure the extended care of such facility.

"c. Rates shall be charged to any user of the regional facility set by the operator of a regional facility and shall be fair and reasonable and be subject to the approval of the host state. Such approval shall be based upon criteria established by the Commission.

"d. A host state may establish fees which shall be charged to any user of a regional facility and which shall be in addition to the rates approved pursuant to section c. of this Article, for any regional facility within its borders. Such fees shall be reasonable and shall provide the host state with sufficient revenue to cover any costs associated with such facilities. If such fees have been reviewed and approved by the Commission and to the extent that such revenue is insufficent, all party states shall share the costs in a manner to be determined by the Commission.

"e. To the extent authorized by Federal law, each party state is responsible for enforcing any applicable Federal and state laws and regulations pertaining to the packaging and transportation of waste generated within or passing through its borders and shall adopt practices that will ensure that waste shipments originating within its borders and destined for a regional facility will conform to applicable packaging and transportation laws and regulations.

"f. Each party state has the right to rely on the good faith performance of each other party state.

"g. Unless authorized by the Commission, it shall be unlawful after January 1, 1986, for any person:

"1. To deposit at a regional facility, waste not generated within the region;

"2. to accept, at a regional facility, waste not generated within the region;

"3. to export from the region, waste which is generated within the region; and

"4. to transport waste from the site at which it is generated, except to a regional facility.

"ARTICLE IV. THE COMMISSION

"a. There is hereby established the Central Interstate Low-Level Radioactive Waste Commission. The Commission shall consist of one voting member from each party state to be appointed according to the laws of each state. The appointing authority of each party state shall notify the Commission in writing of the identity of its member and any alternates. An alternate may act on behalf of the member only in the absence of such member. Each state is responsible for the expenses of its member of the Commission.

"b. Each Commission member shall be entitled to one vote. Unless otherwise provided herein, no action of the Commission shall be bonding unless a majority of the total membership casts its vote in the affirmative.

"c. The Commission shall elect from among its membership a chairman. The Commission shall adopt and publish, in convenient form, by-laws and policies which are not inconsistent with this compact.

"d. The Commission shall meet at least once a year and shall also meet upon the call of the chairman, by petition of a majority of the membership or upon the call of a host state member.

"e. The Commission may initiate any proceedings or appear as an intervenor or party in interest before any court of law, or any Federal, state or local agency, board or commission that has jurisdiction over any matter arising under or relating to the terms of the provisions of this compact. The Commission shall determine in which proceedings it shall intervene or otherwise appear and may arrange for such expert testimony, reports, evidence or other participation in such proceedings as may be necessary to represent its views.

"f. The Commission may establish such committees as it deems necessary for the purpose of advising the Commission on any and all matters pertaining to the management of waste.

"g. The Commission may employ and compensate a staff limited only to those persons necessary to carry out its duties and functions. The Commission may also contract

with and designate any person to perform necessary functions to assist the Commission. Unless otherwise required by the acceptance of a Federal grant, the staff shall serve at the Commission's pleasure irrespective of the civil service, personnel or other merit laws of any of the party states or the Federal government and shall be compensated from funds of the Commission.

"h. Funding for the Commission shall be as follows:

"1. The Commission shall set and approve its first annual budget as soon as practicable after its initial meeting. Party states shall equally contribute to the Commission budget on an annual basis, an amount not to exceed $25,000 until surcharges are available for that purpose. Host states shall begin imposition of the surcharges provided for in this section as soon as practicable and shall remit to the Commission funds resulting from collection of such surcharges within 60 days of their receipt; and

"2. Each state hosting a regional facility shall annually levy surcharges on all users of such facilities, based on the volume and characteristics of wastes received at such facilities, the total of which:

"(A) Shall be sufficient to cover the annual budget of the Commission; and

"(B) shall be paid to the Commission, provided, however, that each host state collecting such surcharges to cover the administrative costs of collection, and that the remainder be sufficient only to cover the approved annual budget of the Commission.

"i. The Commission shall keep accurate accounts of all receipts and disbursements. An independent certified public accountant shall annually audit all receipts and disbursements of Commission funds and submit an audit report to the Commission. Such audit report shall be made a part of the annual report of the Commission required by this Article.

"j. The Commission may accept for any of its purposes and functions any and all donations, grants of money, equipment, supplies, materials, and services, conditional or otherwise from any person and may receive, utilize and dispose of same. The nature, amount and conditions, if any, attendant upon any donation or grant accepted pursuant to this section, together with the identity of the donor, grantor or lender, shall be detailed in the annual report of the Commission.

"k. (1) Except as otherwise provided herein, nothing in this compact shall be construed to alter the incidence of liability of any kind for any act, omission, course of conduct, or on account of any casual or other relationships. Generators, transporters of waste, owners and operators of facilities shall be liable for their acts, omissions, conduct or relationships in accordance with all laws relating thereto.

"(2) The Commission herein established in a legal entity separate and distinct from the party states and shall be so liable for its actions. Liabilities of the Commission shall not be deemed liabilities of the party states. Members of the Commission shall not be personally liable for actions taken by them in their official capacity.

"l. Any person or party state aggrieved by a final decision of the Commission may obtain judicial review of such decisions in the United States District Court in the District wherein the Commission maintains its headquarters by filing in such court a petition for review within 60 days after the Commission's final decision. Proceedings thereafter shall be in accordance with the rules of procedure applicable in such court.

"m. The Commission shall:

"1. Receive and approve the application of a non-party state to become a party state in accordance with Article VII;

"2. submit an annual report, and otherwise communicate with, the Governors and the presiding officers of the legislative bodies of the party states regarding the activities of the Commission;

"3. hear and negotiate disputes which may arise between the party states regarding this compact;

"4. require of and obtain from the party states, and non-party states seeking to become party states, data and information necessary to the implementation of Commission and party states' responsibilities;

"5. approve the development and operation of regional facilities in accordance with Article V;

"6. notwithstanding any other provision of this compact, have the authority to enter into agreements with any person for the importation of waste into the region and for the right of access to facilities outside the region for waste generated within the region. Such authorization to import or export waste requires the approval of the Commission, including the affirmative vote of any host state which may be affected;

"7. revoke the membership of a party state in accordance with Articles V and VII;

"8. require all party states and other persons to perform their duties and obligations arising under this compact by an approprite action in any forum designated in section e. of Article IV; and

"9. take such action as may be necessary to perform its duties and functions as provided in this compact.

"ARTICLE V. DEVELOPMENT AND OPERATION OF REGIONAL FACILITIES

"a. Following the collection of sufficient data and information from the states, the Commission shall allow each party state the opportunity to volunteer as a host for a regional facility.

"b. If no state volunteers or if no proposal identified by a volunteer state is deemed acceptable by the Commission, based on the criteria in section c. of this Article, then the Commission shall publicly seek applicants for the development and operation of regional facilities.

"c. The Commission shall review and consider each applicant's proposal based upon the following criteria:

"1. The capability of the applicant to obtain a license from the applicable authority;

"2. the economic efficiency of each proposed regional facility, including the total estimated disposal and treatment costs per public foot of waste;

"3. financial assurances;

"4. accessibility to all party states; and

"5. such other criteria as shall be determined by the Commission to be necessary for the selection of the best proposal, based on the health, safety and welfare of the citizens in the region and the party states.

"d. The Commission shall make a preliminary selection of the proposal or proposals considered most likely to meet the criteria enumerated in section c. and the needs of the region.

"e. Following notification of each party state of the results of the preliminary selection process, the Commission shall:

"1. Authorize any person whose proposal has been selected to pursue licensure of the regional facility or facilities in accordance with the proposal originally submitted to the Commission or as modified with the approval of the Commission; and

"2. require the appropriate state or states or the U.S. Nuclear Regulatory Commission to process all applications for permits and licenses required for the development and operation of any regional facility or facilities within a reasonable period from the time that a completed application is submitted.

"f. The preliminary selection or selections made by the Commission pursuant to this Article shall become final and receive the Commission's approval as a regional facility upon the issuance of license by the licensing authority. If a proposed regional facility fails to become licensed, the Commission shall make another selection pursuant to the procedures identified in this Article.

"g. The Commission may, by two-thirds affirmative vote of its membership, revoke the membership of any party state which, after notice and hearing, shall be found to have arbitrarily or capriciously denied or delayed the issuance of a license or permit to any person authorized by the Commission to apply for such license or permit. Revocation shall be in the same manner as provided for in section e. of Article VII.

"ARTICLE VI. OTHER LAWS AND REGULATIONS

"a. Nothing in this compact shall be construed to:

"1. Abrogate or limit the applicability of any act of Congress or diminish or otherwise impair the jurisdiction of any Federal agency expressly conferred thereon by the Congress;

"2. prevent the application of any law which is not otherwise inconsistent with this compact;

"3. prohibit or otherwise restrict the management and waste on the site where it is generated if such is otherwise lawful;

"4. affect any judicial or administrative proceeding pending on the effective date of this compact;

"5. alter the relations between, and the respective internal responsibilities of, the government of a party state and its subdivisions; and

"6. affect the generation or management of waste generated by the Federal government or federal research and development activities.

"b. No party state shall pass or enforce any law or regulation which is inconsistent with this compact.

"c. All laws and regulations or parts thereof of any party state which are inconsistent with this compact are hereby declared null and void for purposes of this compact. Any legal right, obligation, violation or penalty arising under such laws or regulations prior to enactment of this compact shall not be affected.

"d. No law or regulation of a party state or of any subdivision or instrumentality thereof may be applied so as to restrict or make more costly or inconvenient access to any regional facility by the generators of another party state than for the generators of the state where the facility is situated.

"ARTICLE VII. ELIGIBLE PARTIES, WITHDRAWAL, REVOCATION, ENTRY INTO FORCE, TERMINATION

"a. This compact shall have as initially eligible parties the states of Arkansas, Iowa, Kansas, Louisiana, Minnesota, Missouri, Nebraska, North Dakota and Oklahoma. Such initial eligibility shall terminate on January 1, 1984.

"b. Any state may petition the Commission for eligibility. A petitioning state shall become eligible for membership in the com-

pact upon the unanimous approval of the Commission.

"c. An eligible state shall become a member of the compact and shall be bound by it after such state has enacted the compact into law. In no event shall the compact take effect in any state until it has been entered into force as provided for in section f. of this Article.

"d. Any party state may withdraw from this compact by enacting a statute repeating the same. Unless permitted earlier by unanimous approval of the Commission, such withdrawal shall take effect five-years after the Governor of the withdrawing state has given notice in writing of such withdrawal to each Governor of the party states. No withdrawal shall affect any liability already incurred by or chargeable to a party state prior to the time of such withdrawal.

"e. Any party state which fails to comply with the terms of this compact or fulfill its obligations hereunder may, after notice and hearing, have its privileges suspended or its membership in the compact revoked by the Commission. Revocation shall take effect one year from the date such party state receives written notice from the Commission of its action. The Commission may require such party state to pay to the Commission, for a period not to exceed five-years from the date of notice of revocation, an amount determined by the Commission based on the anticipated fees which the generators of such party state would have paid to each regional facility and an amount equal to that which such party state would have contributed in accordance with section d. of Article III, in the event of insufficient revenues. The Commission shall use such funds to ensure the continued availability of safe and economical waste management facilities for all remaining party states. Such state shall also pay an amount equal to that which such party state would have contributed to the annual budget of the Commission if such party state would have remained a member of the compact. All legal rights established under this compact of any party state which has its membership revoked shall cease upon the effective date of revocation; however, any legal obligations of such party state arising prior to the effective date of revocation shall not cease until they have been fulfilled. Written notice of revocation of any state's membership in the company shall be transmitted immediately following the vote of the Commission, by the chairman, to the Governor of the affected party state, all other Governors of the party states and the Congress of the United States.

"f. This compact shall become effective after enactment by at least three eligible states and after consent has been given to it by the Congress. The Congress shall have the opportunity to withdraw such consent every five-years. Failure of the Congress to withdraw its consent affirmatively shall have the effect of renewing consent for an additional five-year period. The consent given to this compact by the Congress shall extend to any future admittance of new party states under sections b. and c. of this Article and to the power to ban the exportation of waste pursuant to Article III.

"g. The withdrawal of a party state from this compact under section d. of this Article or the revocation of a state's membership in this compact under section 3. of this Article shall not affect the applicability of this compact to the remaining party states.

"h. This compact shall be terminated when all party states have withdrawn pursuant to section d. of this Article.

"ARTICLE VIII. PENALTIES

"a. Each party state, consistent with its own law, shall prescribe and enforce penalties against any person for violation of any provision of this compact.

"b. Each party state acknowledges that the receipt by a regional facility of waste packaged or transported in violation of applicable laws and regulations can result in sanctions which may include suspension or revocation of the violator's right of access to the regional facility.

"ARTICLE IX. SEVERABILITY AND CONSTRUCTION

"The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is declared by a court of competent jurisdiction to be contrary to the Constitution of any participating state or of the United States or the applicability thereof to any government, agency, person or circumstances is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person or circumstance shall not be affected thereby. If any provision of this compact shall be held contrary to the Constitution of any state participating therein, the compact shall remain in full force and effect as to the state affected as to all severable matters. The provisions of this compact shall be liberally construed to give effect to the purpose thereof.".

SEC. 223. SOUTHEAST INTERSTATE LOW-LEVEL RADIOACTIVE WASTE MANAGEMENT COMPACT.

In accordance with section 4(a)(2) of the Low-Level Radioactive Waste Policy Act (42 U.S.C. 2021d(a)(2)), the consent of the Congress is hereby given to the States of Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia to enter into the Southeast Interstate Low-Level Radioactive Waste Management Compact. Such compact is substantially as follows:

SOUTHEAST INTERSTATE LOW-LEVEL RADIOACTIVE WASTE MANAGEMENT COMPACT

ARTICLE I

POLICY AND PURPOSE

There is hereby created the Southeast Interstate Low-Level Radioactive Waste Management Compact. The party States recognize and declare that each state is responsible for providing for the availability of capacity either within or outside the State for disposal of low-level radioactive waste generated within its borders, except for waste generated as a result of defense activities of the federal government or federal research and development activities. They also recognize that the management of low-level radioactive waste is handled most efficiently on a regional basis. The party states further recognize that the Congress of the United States by enacting the Low-Level Radioactive Waste Policy Act (Public Law 96-573), has provided for and encouraged the development of low-level radioactive waste compacts as a tool for disposal of such waste. The party states recognize that the safe and efficient management of low-level radioactive waste generated within the region requires that sufficient capacity to dispose of such waste be properly provided.

It is the policy of the party states to: enter into a regional low-level radioactive waste management compact for the purpose of providing the instrument and framework for a cooperative effort; provide sufficient facilities for the proper management of low-level radioactive waste generated in the region; promote the health and safety of the region; limit the number of facilities required to effectively and efficiently manage low-level radioactive waste generated in the region; encourage the reduction of the amounts of low-level waste generated in the region; distribute the costs, benefits, and obligations of successful low-level radioactive waste management equitably among the party states; and ensure the ecological and economical management of low-level radioactive wastes.

Implicit in the Congressional consent to this compact is the expectation by Congress and the party states that the appropriate federal agencies will actively assist the Compact Commission and the individual party states to this compact by:

1. Expeditious enforcement of federal rules, regulations, and laws;

2. imposing sanctions against those found to be in violation of federal rules, regulations, and laws;

3. timely inspection of their licensees to determine their capability to adhere to such rules, regulations, and laws;

4. timely provision of technical assistance to this compact in carrying out their obligations under the Low-Level Radioactive Waste Policy Act, as amended.

ARTICLE 2

DEFINITIONS

As used in this compact, unless the context clearly requires a different construction;

1. 'Commission' or 'Compact Commission' means the Southeast Interstate Low-Level Radioactive Waste Management Commission.

2. 'Facility' means a parcel of land, together with the structure, equipment, and improvements thereon or appurtenant thereto, which is used or is being developed for the treatment, storage, or disposal of low-level radioactive waste.

3. 'Generator' means any person who produces or processes low-level radioactive waste in the course of, or as an incident to, manufacturing, power generation, processing, medical diagnosis and treatment, research, or other industrial or commercial activity. This does not include persons who provide a service to generators by arranging for the collection, transportation, storage, or disposal of wastes with respect to such waste generated outside the region.

4. 'High-level waste' means irradiated reactor fuel, liquid wastes from reprocessing irradiated reactor fuel, and solids into which such liquid wastes have been converted, and other high-level radioactive waste as defined by the U.S. Nuclear Regulatory Commission.

5. 'Host state' means any state in which a regional facility is situated or is being developed.

6. 'Low-level radioactive wastes' or 'waste' means radioactive waste not classified as high-level radioactive waste, transuranic waste, spent nuclear fuel, or by-product material as defined in Section 11e, (2) of the Atomic Energy Act of 1954, or as may be further defined by Federal law or regulation.

7. 'Party state' means any state which is a signatory party to this compact.

8. 'Person' means any individual, corporation, business enterprise, or other legal entity (either public or private).

9. 'Region' means the collective party states.

10. 'Regional facility' means (1) a facility as defined in this article which has been

designated, authorized, accepted, or approved by the Commission to receive waste or (2) the disposal facility in Barnwell County, South Carolina, owned by the State of South Carolina and as licensed for the burial of low-level radioactive waste on July 1, 1982, but in no event shall this disposal facility serve as a regional facility beyond December 31, 1992.

11. 'State' means a state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, or any other territorial possession of the United States.

12. 'Transuranic wastes' means waste material containing transuranic elements with contamination levels as determined by the regulations of (1) the U.S. Nuclear Regulatory Commission or (2) any host state, if it is an agreement state under Section 274 of the Atomic Energy Act of 1954.

13. 'Waste management' means the storage, treatment, or disposal of waste.

ARTICLE 3

RIGHTS AND OBLIGATIONS

The rights granted to the party states by this compact are additional to the rights enjoyed by sovereign states, and nothing in this compact shall be construed to infringe upon, limit, or abridge those rights.

(A) Subject to any license issued by the U.S. Nuclear Regulatory Commission or a host state, each party state shall have the right to have all wastes generated within its borders stored, or disposed of, as applicable, at regional facilities and, additionally, shall have the right of access to facilities made available to the region through agreements entered into by the Commission pursuant to article 4(e)(9). The right of access by a generator within a party state to any regional facility is limited by its adherence to applicable state and federal law and regulation.

(B) If no operating regional facility is located within the borders of a party state and the waste generated within its borders must therefore be stored, treated, or disposed of at a regional facility in another party state, the party state without such facilities may be required by the host state or states to establish a mechanism which provides compensation for access to the regional facility according to terms and conditions established by the host state or states and approved by a two-thirds vote of the Commission.

(C) Each party state must establish the capability to regulate, license, and ensure the maintenance and extended care of any facility within its borders. Host states are responsible for the availability, the subsequent post-closure observation and maintenance, and the extended institutional control of their regional facilities in accordance with the provisions of Article 5, Section (b)

(D) Each party state must establish the capability to enforce any applicable federal or state laws and regulations pertaining to the packaging and transportation of waste generated within or passing through its borders.

(E) Each party state must provide to the Commission on an annual basis any data and information necessary to the implementation of the Commission's responsibilities. Each party state shall establish the capability to obtain any data and information necessary to meet its obligation.

(F) Each party state must, to the extent authorized by federal law, require generators within its borders to use the best available waste management technologies and practices to minimize the volumes of waste requiring disposal.

ARTICLE 4

THE COMMISSION

(A) There is hereby created the Southeast Interstate Low-Level Radioactive Waste Management Commission ('Commission' or 'Compact Commission'). The Commission shall consist of two voting members from each party state to be appointed according to the laws of each state. The appointing authorities of each state must notify the Commission in writing of the identity of its members and any alternates. An alternate may act on behalf of the member only in the member's absence.

(B) Each commission member is entitled to one vote. No action of the Commission shall be binding unless a majority of the total membership cast their vote in the affirmative, or unless a greater than majority vote is specifically required by any other provision of this compact.

(C) The Commission must elect from among its members a presiding officer. The Commission shall adopt and publish, in convenient form, bylaws which are consistent with this compact.

(D) The Commission must meet at least once a year and also meet upon the call of the presiding officer, by petition of a majority of the party states, or upon the call of a host state. All meetings of the Commission must be open to the public.

(E) The Commission has the following duties and powers:

1. To receive and approve the application of a nonparty state to become an eligible state in accordance with the provisions of Article 7(b).

2. To receive and approve the application of a nonparty state to become an eligible state in accordance with the provisions of Article 7(c).

3. To submit an annual report and other communications to the Governors and to the presiding officer of each body of the legislature of the party states regarding the activities of the Commission.

4. To develop and use procedures for determining, consistent with consideration for public health and safety, the type and number of regional facilities which are presently necessary and which are projected to be necessary to manage waste generated within the region.

5. To provide the party states with reference guidelines for establishing the criteria and procedures for evaluating alternative locations for emergency or permanent regional facilities.

6. To develop and adopt, within one year after the Commission is constituted as provided in Article 7(d) procedures and criteria for identifying a party state as a host state for a regional facility as determined pursuant to the requirements of this article. In accordance with these procedures and criteria, the Commission shall identify a host state for the development of a second regional disposal facility within three years after the Commission is constituted as provided for in Article 7(d), and shall seek to ensure that such facility is licensed and ready to operate as soon as required but in no event later than 1991.

In developing criteria, the Commission must consider the following; the health, safety, and welfare of the citizens of the party states; the existence of regional facilities within each party state; the minimization of waste transportation; the volumes and types of wastes generated within each party state; and the environmental, economic, and ecological impacts on the air, land, and water resources of the party states.

The Commission shall conduct such hearings, require such reports, studies, evidence, and testimony, and do what is required by its approved procedures in order to identify a party state as a host state for a needed facility.

7. In accordance with the procedures and criteria developed pursuant to Section (e)(6) of this Article, to designate, by a two-thirds vote, a host state for the establishment of a needed regional facility. The Commission shall not exercise this authority unless the party states have failed to voluntarily pursue the development of such facility. The Commission shall have the authority to revoke the membership of a party state that willfully creates barriers to the siting of a needed regional facility.

8. To require of and obtain from party states, eligible states seeking to become party states, and nonparty states seeking to become eligible states, data and information necessary to the implementation of Commission responsibilities.

9. Notwithstanding any other provision of this compact, to enter into agreements with any person, state, or similar regional body or group of states for the importation of waste into the region and for the right of access to facilities outside the region for waste generated within the region. The authorization to import requires a two-thirds majority vote of the Commission, including an affirmative vote of both representatives of a host state in which any affected regional facility is located. This shall be done only after an assessment of the affected facility's capability to handle such wastes.

10. To act or appear on behalf of any party state of states, only upon written request of both members of the Commission for such state or states as an intervenor or party in interest before Congress, state legislatures, any court of law, or any federal, state, or local agency, board, or commission which has jurisdiction over the management of wastes. The authority to act, intervene, or otherwise appear shall be exercised by the Commission, only after approval by a majority vote of the Commission.

11. To revoke the membership of a party state in accordance with Article 7(f).

F. The Commission may establish any advisory committees as it deems necessary for the purpose of advising the Commission on any matters pertaining to the management of low-level radioactive waste.

G. The Commission may appoint or contract for and compensate such limited staff necessary to carry out its duties and functions. The staff shall serve at the Commission's pleasure irrespective of the civil service, personnel, or other merit laws of any of the party states or the federal government and shall be compensated from funds of the Commission. In selecting any staff, the Commission shall assure that the staff has adequate experience and formal training to carry out such functions as may be assigned to it by the Commission. If the Commission has a headquarters it shall be in a party state.

H. Funding for the Commission must be provided as follows:

1. Each eligible state, upon becoming a party state, shall pay twenty-five thousand dollars to the Commission which shall be used for costs of the Commission's services.

2. Each state hosting a regional disposal facility shall annually levy special fees or surcharges on all users of such facility, based upon the volume of wastes disposed of at such facilities, the total of which:

a. must be sufficient to cover the annual budget of the Commission;

b. must represent the financial commitments of all party states to the Commission;

c. must be paid to the Commission;

Provided, however, That each host state collecting such fees or surcharges may retain a portion of the collection sufficient to cover its administrative costs of collection and that the remainder be sufficient only to cover the approved annual budgets of the Commission.

3. The Commission must set and approve its first annual budget as soon as practicable after its initial meeting. Host states for disposal facilities must begin imposition of the special fees and surcharges provided for in this section as soon as practicable after becoming party states and must remit to the Commission funds resulting from collection of such special fees and surcharges within sixty days of their receipt.

I. The Commission must keep accurate accounts of all receipts and disbursements. An independent certified public accountant shall annually audit all receipts and disbursement of Commission funds and submit an audit report to the Commission. The audit report shall be made a part of the annual report of the Commission required by Article 4(e)(3).

J. The Commission may accept for any of its purposes and functions any and all donations, grants of money, equipment, supplies, materials, and services (conditional or otherwise) from any state, or the United States, or any subdivision or agency thereof, or interstate agency, or from any institution, person, firm, or corporation, and may receive, utilize, and dispose of the same. The nature, amount, and condition, if any, attendant upon any donation or grant accepted pursuant to this section, together with the identity of the donor, grantor, or lender shall be detailed in the annual report to the Commission.

K. The Commission is not responsible for any costs associated with:

(1) the creation of any facility,

(2) the operation of any facility,

(3) the stabilization and closure of any facility,

(4) the post-closure observation and maintenance of any facility, or

(5) the extended institutional control, after post-closure observation and maintenance of any facility.

(L) As of January 1, 1986, the management of wastes at regional facilities is restricted to wastes generated within the region, and to wastes generated within nonparty states when authorized by the Commission pursuant to the provisions of this compact. After January 1, 1986, the Commission may prohibit the exportation of waste from the region for the purposes of management.

M. 1. The Commission herein established is a legal entity separate and distinct from the party states capable of acting in its own behalf and is liable for its actions. Liabilities of the Commission shall not be deemed liabilities of the party states. Members of the Commission shall not personally be liable for action taken by them in their official capacity.

2. Except as specifically provided in this compact, nothing in this compact shall be construed to alter the incidence of liability of any kind for any act, omission, course of conduct, or on account of any causal or other relationships. Generators and transporters of wastes and owners and operators of sites shall be liable for their acts, omissions, conduct, or relationships in accordance with all laws relating thereto.

ARTICLE 5

DEVELOPMENT AND OPERATION OF FACILITIES

A. Any party state which becomes a host state in which a regional facility is operated shall not be designated by the Compact Commission as a host state for an additional regional facility until each party state has fulfilled its obligation, as determined by the Commission, to have a regional facility operated within its borders.

B. A host state desiring to close a regional facility located within its borders may do so only after notifying the Commission in writing of its intention to do so and the reasons therefor. Such notification shall be given to the Commission at least four years prior to the intended date of closure. Notwithstanding the four-year notice requirement herein provided, a host state is not prevented from closing its facility or establishing conditions of its use and operations as necessary for the protection of the health and safety of its citizens. A host state may terminate or limit access to its regional facility if it determines that Congress has materially altered the conditions of this compact.

C. Each party state designated as a host state for a regional facility shall take appropriate steps to ensure that an application for a license to construct and operate a facility of the designated type is filed with and issued by the appropriate authority.

D. No party state shall have any form of arbitrary prohibition on the treatment, storage, or disposal of low-level radioactive waste within its borders.

ARTICLE 6

OTHER LAWS AND REGULATIONS

(A) Nothing in this compact shall be construed to:

(1) Abrogate or limit the applicability of any act of Congress or diminish or otherwise impair the jurisdiction of any federal agency expressly conferred thereon by the Congress.

(2) Abrogate or limit the regulatory responsibility and authority of the U.S. Nuclear Regulatory Commission or of an agreement state under Section 274 of the Atomic Energy Act of 1954 in which a regional facility is located.

(3) Make inapplicable to any person or circumstance any other law of a party state which is not inconsistent with this compact.

(4) Make unlawful the continued development and operation of any facility already licensed for development or operation on the date this compact becomes effective, except that any such facility shall comply with Article 3, Article 4, and Article 5 and shall be subject to any action lawfully taken pursuant thereto.

(5) Prohibit any storage or treatment of waste by the generator on its own premises.

(6) Affect any judicial or administrative proceeding pending on the effective date of this compact.

(7) Alter the relations between, and the respective internal responsibilities of, the government of a party state and its subdivisions.

(8) Affect the generation, treatment, storage, or disposal of waste generated by the atomic energy defense activities of the Secretary of the United States Department of Energy or federal research and development activities as defined in Public Law 96-573.

(9) Affect the rights and powers of any party state and its political subdivisions to regulate and license any facility within its borders or to affect the rights and powers of any party state and its political subdivisions to tax or impose fees on the waste managed at any facility within its borders.

B. No party shall pass any law or adopt any regulation which is consistent with this compact. To do so may jeopardize the membership status of the party state.

C. Upon formation of the compact no law or regulation of a party state or of any subdivision or instrumentality thereof may be applied so as to restrict or make more inconvenient access to any regional facility by the generators of another party state than for the generators of the state where the facility is situated.

D. Restrictions of waste mangement of regional facilities pursuant to Article 4 shall be enforceable as a matter of state law.

ARTICLE 7

ELIGIBLE PARTIES; WITHDRAWAL; REVOCATION; ENTRY INTO FORCE; TERMINATION

A. This compact shall have as initially eligible parties the States of Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia.

B. Any state not expressly declared eligible to become a party state to this compact in Section (A) of this Article may petition the Commission, once constituted, to be declared eligible. The Commission may establish such conditions as it deems necessary and appropriate to be met by a state wishing to become eligible to become a party state to this compact pursuant to such provisions of this section. Upon satisfactorily meeting the conditions and upon the affirmative vote of two-thirds of the Commission, including the affirmative vote of both representatives of a host state in which any affected regional facility is located, the petitioning state shall be eligible to become a party state to this compact and may become a party state in the manner as those states declared eligible in Section (a) of this Article.

C. Each state eligible to become a party state to this compact shall be declared a party state be declared a party state upon enactment of this compact into law by the state and upon payment of the fees required by Article 4(H)(1). The Commission is the judge of the qualifications of the party states and of its members and of their compliance with the conditions and requirements of this compact and the laws of the party states relating to the enactment of this compact.

D. 1. The first three states eligible to become party states to this compact which enact this compact into law and appropriate the fees required by Article 4(H)(1) shall immediately, upon the appointment of their Commission members, constitute themselves as the Southeast Low-Level Radioactive Waste Management Commission; shall cause legislation to be introduced in Congress which grants the consent of Congress to this compact; and shall do those things necessary to organize the commission and implement the provisions of this compact.

2. All succeeding states eligible to become party states to this compact shall be declared party states pursuant to the provisions of Section (C) of this Article.

3. The consent of Congress shall be required for the full implementation of this compact. The provisions of Article 5 Section (D) shall not become effective until the effective date of the import ban authorized by Article 4, Section (L) as approved by Congress. Congress may by law withdraw its consent only every five years.

E. No state which holds membership in any other regional compact for the management of low-level radioactive waste may be considered by the Compact Commission for eligible state status or party state status.

F. Any party state which fails to comply with the provisions of this compact or to fulfill the obligations incurred by becoming a party state to this compact may be subject to sanctions by the Commission, including suspension of its rights under this compact and revocation of its status as a party state. Any sanction shall be imposed only upon the affirmative vote of at least two-thirds of the Commission members. Revocation of party state status may take effect on the date of the meeting at which the Commission approves the resolution imposing such sanction, but in no event shall revocation take effect later than ninety days from the date of such meeting. Rights and obligations incurred by being declared a party state to this compact shall continue until the effective date of the sanction imposed or as provided in the resolution of the Commission imposing the sanction.

The Commission must, as soon as practicable after the meeting at which a resolution revoking status as a party state is approved, provide written notice of the action, along with a copy of the resolution, to the Governors, the Presidents of the Senates, and the Speakers of the Houses of Representatives of the party states, as well as chairman of the appropriate committees of Congress.

G. Any party state may withdraw from the compact by enacting a law repealing the compact; provided, that if a regional facility is located within such a state, such regional facility shall remain available to the region for four years after the date the Commission receives notification in writing from the governor of such party state of the rescission of the compact. The Commission, upon receipt of the notification, shall as soon as practicable provide copies of such notification to the Governors, the Presidents of the Senates, and the Speakers of the Houses of Representatives of the party states as well as the chairman of the appropriate committees of Congress.

H. This compact may be terminated only by the affirmative action of Congress or by the rescission of all laws enacting the compact in each party state.

ARTICLE 8

PENALTIES

A. Each party state, consistenly with its own law, shall prescribe and enforce penalties against any person not an official of another state for violation of any provisions of this compact.

B. Each party state acknowledges that the receipt by a host state of waste packaged or transported in violation of applicable laws and regulations can result in the imposition of sanctions by the host state which may include suspension or revocation of the violator's right of access to the facility in the host state.

ARTICLE 9

SEVERABILITY AND CONSTRUCTION

The provisions of this compact shall be severable and if any phrase, clause, sentence, or provision of this compact is declared by a court of competent jurisdiction to be contrary to the Constitution of any participating state or of the United States, or the applicability thereof to any government, agency, person, or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any other government, agency, person, or circumstance shall not be affected thereby. If any provision of this compact shall be held contrary to the Constitution of any State participating therein, the compact shall remain in full force and effect as to the state affected as to all severable matters. The provisions of this compact shall be liberally construed to give effect to the purposes thereof.

SEC. 224. CENTRAL MIDWEST INTERSTATE LOW-LEVEL RADIOACTIVE WASTE COMPACT.

In accordance with section 4(a)(2) of the Low-Level Radioactive Waste Policy Act (42 U.S.C. 2021d(a)(2)), the consent of the Congress hereby is given to the States of Illinois and Kentucky to enter into the Central Midwest Interstate Low-Level Radioactive Waste Compact. Such compact is substantially as follows:

"ARTICLE I, POLICY AND PURPOSE

"There is created the Central Midwest Interstate Low-Level Radioactive Waste Compact.

"The states party to this compact recognize that the Congress of the United States, by enacting the Low-Level Radioactive Waste Policy Act (42 U.S.C. 2021), has provided for and encouraged the development of low-level radioactive waste compacts as a tool for managing such waste. The party states acknowledge that Congress declared that each state is responsible for providing for the availability of capacity either within or outside the state for the disposal of low-level radioactive waste generated within its borders, except for waste generated as a result of certain defense activities of the federal government or federal research and development activities. The party states also recognize that the management of low-level radioactive waste is handled most efficiently on a regional basis; and, that the safe and efficient management of low-level radioactive waste generated within the region requires that sufficient capacity to manage such waste be properly provided.

"a) It is the policy of the party states to enter into a regional low-level radioactive waste management compact for the purpose of:

"1) providing the instrument and the framework for a cooperative effort;

"2) providing sufficient facilities for the proper management of low-level radioactive waste generated in the region;

"3) protecting the health and safety of the citizens of the region;

"4) limiting the number of facilities required to manage low-level radioactive waste generated in the region effectively and efficiently;

"5) promoting the volume and source reduction of low-level radioactive waste generated in the region;

"6) distributing the costs, benefits and obligations of successful low-level radioactive waste management equitably among the party states and among generators and other persons who use regional facilities to manage their waste;

"7) ensuring the ecological and economical management of low-level radioactive waste, including the prohibition of shallow-land burial of waste; and

"8) promoting the use of above-ground facilities and other disposal technologies providing greater and safer confinement of low-level radicactive waste than shallow-land burial facilities.

"b) Implicit in the Congressional consent to this compact is the expectation by the Congress and the party states that the appropriate federal agencies will actively assist the Compact Commission and the individual party states to this compact by:

"1) expeditious enforcement of federal rules, regulations and laws;

"2) imposition of sanctions against those found to be in violation of federal rules, regulations and laws; and

"3) timely inspection of their licensees to determine their compliance with these rules, regulations and laws.

ARTICLE II. DEFINITIONS

"As used in this compact, unless the context clearly requires a different construction:

"a) 'Commission' means the Central Midwest Interstate Low-Level Radioactive Waste Commission.

"b) 'Decommissioning' means the measures taken at the end of a facility's operating life to assure the continued protection of the public from any residual radioactivity or other potential hazards present at a facility.

"c) 'Disposal' means the isolation of waste from the biosphere in a permanent facility designed for that purpose.

"d) 'Eligible state' means either the State of Illinois or the Commonwealth of Kentucky.

"c) 'Extended care' means the continued observation of a facility after closure for the purpose of detecting a need for maintenance, ensuring environmental safety, and determining compliance with applicable licensure and regulatory requirements and includes undertaking any action or clean-up necessary to protect public health and the environment from radioactive releases from a regional facility.

"f) 'Facility' means a parcel of land or site, together with the structures, equipment and improvements on or appurtenant to the land or site, which is used or is being developed for the treatment, storage or disposal of low-level radioactive waste.

"g) 'Generator' means a person who produces or possesses low-level radioactive waste in the course of or incident to manufacturing, power generation, processing, medical diagnosis and treatment, research, or other industrial or commercial activity and who, to the extent required by law, is licensed by the U.S. Nuclear Regulatory Commission or a party state, to produce or possess such waste.

"h) 'Host state' means any party state that is designated by the Commission to host a regional facility, provided that a party state with a total volume of waste recorded on low-level radioactive waste manifests for any year that is less than 10 percent of the total volume recorded on such manifests for the region during the same year shall not be designated a host state.

"i) 'Institutional control' means those activities carried out by the host state to physically control access to the disposal site following transfer of control of the disposal site from the disposal site operator to the state or federal government. These activities must include, but need not be limited to, environmental monitoring, periodic surveillance, minor custodial care, and other necessary activities at the site as determined by the host state, and administration of funds to cover the costs for these activities. The period of institutional control will be determined by the host state, but institutional control may not be relied upon for more than 100 years following transfer of control of the disposal site to the state or federal government.

"j) 'Long-term liability' means the financial obligation to compensate any person for medical and other expenses incurred from damages to human health, personal injuries suffered from damages to human health and damages or losses to real or personal property, and to provide for the costs for accomplishing any necessary corrective action or clean-up on real or personal property caused by radioactive releases from a regional facility.

"k) 'Low-level radioactive waste' or 'waste' means radioactive waste not classified as (1) high-level readioactive waste, (2) transuranic waste, (3) spent nuclear fuel, or (4) byproduct material as defined in Section 11e. (2) of the Atomic Energy Act of 1954.

"1) 'Management plan' means the plan adopted by the Commission for the storage, transportation, treatment and disposal of waste within the region.

"m) 'Manifest' means a shipping document identifying the generator of waste, the volume of waste, the quantity of radionuclides in the shipment, and such other information as may be required by the appropriate regulatory agency.

"n) 'Party state' means any eligible state which enacts the compact into law and pays the membership fee.

"o) 'Person' means any individual, corporation, business enterprise or other legal entity, either public or private, and any legal successor, representative, agent or agency of that individual, corporation, business enterprise, or legal entity.

"p) 'Region' means the geographical area of the party states.

"q) 'Regional facility' means a facility which is located within the region and which is established by a party state pursuant to designation of that state as a host state by the Commission.

"r) 'Shallow-land burial' means a land disposal facility in which radioactive waste is disposed of in or within the upper 30 meters of the earth's surface; however, this definition shall not include an enclosed, engineered, strongly structurally enforced and solidified bunker that extends below the earth's surface.

"s) 'Site' means the geographic location of a facility.

"t) 'Source reduction' means those administrative practices that reduce the radionuclide levels in low-level radioactive waste or that prevent the generation of additional low-level radioactive waste.

"u) 'State' means a state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands or any other territorial possession of the United States.

"v) 'Storage' means the temporary holding of waste for treatment or disposal.

"w) 'Treatment' means any method, technique or process, including storage for radioactive decay, designed to change the physical, chemical or biological characteristics or composition of any waste in order to render the waste safer for transport or management, amenable to recovery, convertible to another usable material or reduced in volume.

"x) 'Volume reduction' means those methods including, but not limited to, biological, chemical, mechanical and thermal methods used to reduce the amount of space that waste materials occupy and to put them into a form suitable for storage or disposal.

"y) 'Waste management' means the source and volume reduction, storage, transportation, treatment or disposal of waste.

"ARTICLE III. THE COMMISSION

"a) There is created the Central Midwest Interstate Low-Level Radioactive Waste Commission. Upon the eligible states becoming party states, the Commission shall consist of two voting members from each state eligible to be a host state, one voting member from any other party state, and an ex officio non-voting member who is a member of the County Board of or who is a County Commissioner of each host county. The Governor of each party state shall notify the Commission in writing of its members and any alternates.

"b) Each Commission member is entitled to one vote. No action of the Commission is binding unless a majority of the total membership casts its vote in the affirmative.

"c) The Commission shall elect annually from among its members a chairperson. The Commission shall adopt and publish, in convenient form, by-laws and policies that are not inconsistent with this compact, including procedures that conform with the provisions of the Federal Administrative Procedure Act (5 U.S.C. ss. 500 to 559) to the greatest extent practicable in regard to notice, conduct and recording of meetings; access by the public to records; provision of information to the public; conduct of adjudicatory hearings; and issuance of decisions.

"d) The Commission shall meet at least once annually and shall also meet upon the call of the chairperson or a Commission member.

"e) All meetings of the Commission and its designated committees shall be open to the public with reasonable advance notice. The Commission may, by majority vote, close a meeting to the public for the purpose of considering sensitive personnel or legal strategy matters. However, all Commission actions and decisions shall be made in open meetings and appropriately recorded. A roll call may be required upon request of any member or the presiding officer.

"f) The Commission may establish advisory committees for the purpose of advising the Commission on any matters pertaining to waste management, waste generation and source and volume reduction.

"g) The Office of the Commission shall be in the first state eligible to be a host state. The Commission may appoint or contract for and compensate such staff necessary to carry out its duties and functions. The staff shall serve at the Commission's pleasure with the exception that staff hired as the result of securing federal funds shall be hired and governed under applicable federal statutes and regulations. In selecting any staff, the Commission shall assure that the staff has adequate experience and formal training to carry out the functions assigned to it by the Commission.

"h) All files, records and data of the Commission shall be open to reasonable public inspection and may be copied upon payment of reasonable fees to be established where appropriate by the Commission, except for information privileged against introduction in judicial proceedings. Such fees may be waived or shall be reduced substantially for not-for-profit organizations.

"i) The Commission may:

"1) Enter into an agreement or contract with any person, state or group of states for the right to use regional facilities for waste generated outside of the region and for the right to use facilities outside the region for waste generated within the region. No person may use a regional facility for waste generated outside the region unless both a majority of the members of the Commission and all members from the host state in which any affected regional facility is located vote in favor of permitting such use. No person in the region may use a storage, treatment or disposal facility outside the region without prior Commission approval. No such agreement or contract shall be valid unless specifically approved by a law enacted by the legislature of the host state.

"2) Approve the disposal of waste generated within the region at a facility other than a regional facility.

"3) Appear as an intervenor or party in interest before any court of law or any federal, state or local agency, board or commission in any matter related to waste management. In order to represent its views, the Commission may arrange for any expert testimony, reports, evidence or other participation.

"4) Review the emergency closure of a regional facility, determine the appropriateness of that closure, and take whatever actions are necessary to ensure that the interests of the region are protected, provided that a party state with a total volume of waste recorded on low-level radioactive waste manifests for any year that is less than 10 percent of the total volume recorded on such manifests for the region during the same year shall not be designated a host state or be required to store the region's waste. In determining the 10 percent exclusion, there shall not be included waste recorded on low-level radioactive waste manifests by a person whose principal business is providing a service by arranging for the collection, transportation, treatment, storage or disposal of such waste.

"5) Take any action which is appropriate and necessary to perform its duties and functions as provided in this compact.

"6) Suspend the privileges or revoke the membership of a party state.

"j) The Commission shall:

"1) Submit an annual report to, and otherwise communicate with, the governors and the appropriate officers of the legislative bodies of the party states regarding the activities of the Commission.

"2) Hear, negotiate, and, as necessary, resolve by final decision disputes which may arise between the party states regarding this compact.

"3) Adopt and amend, as appropriate, a regional management plan that plans for the establishment of needed regional facilities.

"4) Adopt an annual budget.

"k) Funding of the budget of the Commission shall be provided as follows:

"1) Each state, upon becoming a party state, shall pay $50,000 to the Commission which shall be used for the administrative costs of the Commission.

"2) Each state hosting a regional facility shall levy surcharges on each user of the regional facility based upon its portion of the total volume and characteristics of wastes managed at that facility. The surcharges collected at all regional facilities shall:

"A) be sufficient to cover the annual budget of the Commission; and

"B) be paid to the Commission, provided, however, that each host state collecting surcharges may retain a portion of the collection sufficent to cover its administrative costs of collection.

"1) The Commission shall keep accurate accounts of all receipts and disbursements. The Commission shall contract with an independent certified public accountant to annually audit all receipts and disbursements of Commission funds and to submit an audit report to the Commission. The audit report

shall be made a part of the annual report of the Commission required by this Article.

"m) The Commission may accept for any of its purposes and functions and may utilize and dispose of any donations, grants of money, equipment, supplies, materials and services from any state of the United States (or any subdivision or agency thereof), or interstate agency, or from any institution, person, firm or corporation. The nature, amount and condition, if any, attendant upon any donation or grant accepted or received by the Commission together with the identity of the donor, grantor, or lender, shall be detailed in the annual report of the Commission. The Commission shall establish guidelines for the acceptance of donations, grants, equipment, supplies, materials and services and shall review such guidelines annually.

"n) The Commission is not liable for any cost associated with any of the following:

"1) the licensing and construction of any facility;

"2) the operation of any facility;

"3) the stabilization and closure of any facility;

"4) the extended care of any facility;

"5) the institutional control, after extended care of any facility or

"6) the transportation of waste to any facility.

"o) The Commission is a legal entity separate and distinct from the party states and is liable for its actions as a separate and distinct legal entity. Members of the Commission are not personally liable for actions taken by them in their official capacity.

"p) Except as provided under Sections (n) and (o) of this Article, nothing in this compact alters liability for any action, omission, course of conduct or liability resulting from any casual or other relationships.

"q) Any person aggrieved by a final decision of the Commission, which adversely affects the legal rights, duties or privileges of such person, may petition a court of competent jurisdiction, within 60 days after the Commission's final decision, to obtain judicial review of said final decision.

"ARTICLE IV. REGIONAL MANAGEMENT PLAN

"The Commission shall adopt a regional management plan designed to ensure the safe and efficient management of waste generated within the region. In adopting a regional waste management plan the Commission shall:

"a) Adopt procedures for determining, consistent with consideration of public health and safety, the type and number of regional facilities which are presently necessary and which are projected to be necessary to manage waste generated within the region.

"b) Develop and adopt policies promoting source and volume reduction of waste generated within the region.

"c) Develop alternative means for the treatment, storage and disposal of waste, other than shallow-land burial or under ground injection well.

"d) Prepare a draft regional management plan that shall be made available in a convenient form to the public for comment. The Commission shall conduct one or more public hearings in each party state prior to the adoption of the regional management plan. The regional management plan shall include the Commission's response to public and party state comment.

"ARTICLE V. RIGHTS AND OBLIGATIONS OF PARTY STATES

"a) Each party state shall act in good faith in the performance of acts and courses and conduct which are intended to ensure the provision of facilities for regional availability and usage in a manner consistent with this compact.

"b) Other than the provisions of Article V(f), each party state has the right to have all wastes generated within borders managed at regional facilities subject to the provisions contained in Article IX(b) and IX(c). All party states have an equal right of access to any facility made available to the region by any agreement entered into by the Commission pursuant to Article III(i)(1).

"c) Party states or generators may negotiate for the right of access to a facility outside the region and may export waste outside the region subject to Commission approval under Article III(i)(1).

"d) To the extent permitted by federal law, each party state may enforce any applicable federal and state laws, regulations and rules pertaining to the packaging and transportation of waste generated within or passing through its borders. Nothing in this Section shall be construed to require a party state to enter into any agreement with the U.S. Nuclear Regulatory Commission.

"e) Each party state shall provide to the Commission any data and information the Commission requires to implement its responsibilities. Each party state shall establish the capability to obtain any data and information required by the Commission.

"f) Waste originating from the Maxey Flats nuclear waste disposal site in Fleming County, Kentucky shall not be shipped to the regional facility for storage, treatment or disposal. Disposition of these wastes shall be the sole responsibility of the Commonwealth of Kentucky and shall not be subject to the provisions of this compact.

"ARTICLE VI. DEVELOPMENT AND OPERATION OF FACILITIES

"a) Any party state may volunteer to become a host state, and the Commission may designate that state as a host state.

"b) If all regional facilities required by the regional management plan are not developed pursuant to Section (a), or upon notification that an existing regional facility will be closed, the Commission may designate a host state.

"c) A party state shall not be selected as a host state for any regional facility unless that state's total volume of waste recorded on low-level radioactive waste manifests for any year is more than 10 percent of the total volume recorded on such manifests for the region during the same year. In determining the 10 percent exclusion, there shall not be included waste recorded on low-level radioactive waste manifests by a person whose principal business is providing a service by arranging for the collection, transportation, treatment, storage or disposal of such waste.

"d) Each party state designated as a host state is responsible for determining possible facility locations within its borders. The selection of a facility site shall not conflict with applicable federal and host state laws, regulations and rules not inconsistent with this compact and shall be based on factors including, but not limited to, geological, environmental, engineering and economic viability of possible facility locations.

"e) Any party state designated as a host state may request the Commission to relieve that state of the responsibility to serve as a host state. The Commission may relieve a party state of this responsibility only upon a showing by the requesting party state that no feasible potential regional facility site of the type it is designated to host exists within its borders.

"f) After a state is designated a host state by the Commission, it is responsible for the timely development and operation of a regional facility.

"g) To the extent permitted by federal and state law, a host state shall regulate and license any facility within its borders and ensure the extended care of that facility.

"h) The Commission may designate a party state as a host state while a regional facility is in operation if the Commission determined that an additional regional facility is or may be required to meet the needs of the region.

"i) Designation of a host state is for a period of 20 years or the life of the regional facility which is established under that designation, whichever is shorter. Upon request of a host state, the Commission may modify the period of its designation.

"j) A host state may establish a fee system for any regional facility within its borders. The fee system shall be reasonable and equitable. This fee system shall provide the host state with sufficient revenue to cover any costs including, but not limited to the planning, siting, licensure, operation, preclosure corrective action or clean-up, monitoring, inspection, decommissioning, extended care and long-term liability, associated with such facilities. This fee system may provide for payment to units of local government affected by a regional facility for costs incurred in connection with such facility. This fee system may also include reasonable revenue beyond the costs incurred for the host state, subject to approval by the Commission. The fee system shall include incentives for source or volume reduction and may be based on the hazard of the waste. A host state shall submit an annual financial audit of the operation of the regional facility to the Commission.

"k) A host state shall ensure that a regional facility located within its borders which is permanently closed is properly decommissioned. A host state shall also provide for the extended care of a closed or decommissioned regional facility within its borders so that the public health and safety of the state and region are ensured, unless, pursuant to the federal Nuclear Waste Policy Act of 1982, the federal government has assumed title and custody of the regional facility and the federal government thereby has assumed responsibility to provide for the extended care of such facility.

"l) A host state intending to close a regional facility located within its borders shall notify the Commission in writing of its intention and the reasons. Notification shall be given to the Commission at least five years prior to the intended date of closure. This Section shall not prevent an emergency closing of a regional facility by a host state to protect its air, land and water resources and the health and safety of its citizens. However, a host state which has an emergency closing of a regional facility shall notify the Commission in writing within three working days of its action and shall, within 30 working days of its action, demonstrate justification for the closing.

"m) If a regional facility closes before an additional or new facility becomes operational, waste generated within the region may be shipped temporarily to any location agreed on by the Commission until a regional facility is operational, provided that the region's waste shall not be stored in a party state with a total volume of waste recorded

on low-level radioactive waste manifests for any year which is less than 10 percent of the total volume recorded on such manifests for the region during the same year. In determining the 10 percent exclusion, there shall not be included waste recorded on low-level radioactive waste manifests by a person whose principal business is providing a service by arranging for the collection, transportation, treatment, storage or disposal of such waste.

"n) A party state which is designated as a host state by the Commission and fails to fulfill its obligations as a host state may have its privileges under the compact suspended or membership in the compact revoked by the Commission.

"o) The host state shall create an 'Extended Care and Long-Term Liability Fund' and shall allocate sufficient fee revenues, received pursuant to Article VI(j), to provide for the costs of:

"1) decommissioning and other procedures required for the proper closure of a regional facility;

"2) monitoring, inspection and other procedures required for the proper extended care of a regional facility;

"3) undertaking any corrective action or clean-up necessary to protect human health and the environment from radioactive releases from a regional facility; and

"4) compensating any person for medical and other expenses incurred from damages to human health, personal injuries suffered from damages to human health and damages or losses to real or personal property, and accomplishing any necessary corrective action or clean-up on real or personal property caused by radioactive releases from a regional facility; the host state may allocate monies in this Fund in amounts as it deems appropriate to purchase insurance or to make other similar financial protection arrangements consistent with the purposes of this Fund; this Section shall in no manner limit the financial responsibilities of the site operator pursuant to Article VI(p) and the party states, or any other states which contract to dispose of wastes at the regional facility, pursuant to Article VI(q).

"p) The operator of a regional facility shall purchase an amount of property and third-party liability insurance deemed appropriate by the host state, pay the necessary periodic premiums at all times and make periodic payments to the Extended Care and Long-Term Liability Fund as set forth in Article VI(o) for such amounts as the host state reasonably determines is necessary to provide for future premiums to continue such insurance coverage, in order to pay the costs of compensating any person for medical and other expenses incurred from damages to human health, personal injuries suffered from damages to human health and damages or losses to real or personal property, and accomplishing any necessary corrective action or clean-up on real or personal property caused by radioactive releases from a regional facility. In the event of such costs resulting from radioactive releases from a regional facility, the host state should, to the maximum extent possible, seek to obtain monies from such insurance prior to using monies from the Extended Care and Long-Term Liability Fund.

"q) All party states, or any other states which contract to dispose of wastes at the regional facility, shall be liable for the cost of extended care and long-term liability in excess of monies available from the Extended Care and Long-Term Liability Fund, as set forth in Article VI(o) and from the property and third-party liability insurance as set forth in Article VI(p). A party state may meet such liability for costs by levying surcharges upon generators located in party state. The extent of such liability for such party state shall be based on the proportionate share of the total volume of waste placed in the regional facility by generators located in each such party state. Such liability shall be joint and several among the party states with a right of contribution between the party states. However, this Section shall not apply to a party state with a total volume of waste recorded on low-level radioactive waste manifests for any year that is less than 10 percent of the total volume recorded on such manifests for the region during the same year.

"ARTICLE VII. OTHER LAWS AND REGULATIONS

"a) Nothing in this compact:

"1) abrogates or limits the applicability of any act of Congress or diminishes or otherwise impairs the jurisdiction of any federal agency expressly conferred thereon by the Congress;

"2) prevents the enforcement of any other law of a party state which is not inconsistent with this compact;

"3) prohibits any storage or treatment of waste by the generator on its own premises;

"4) affects any administrative or judicial proceeding pending on the effective date of this compact;

"5) alters the relations between the respective internal responsibility of the government of a party state and its subdivisions;

"6) affects the generation, treatment, storage or disposal of waste generated by the atomic energy defense activities of the Secretary of the U.S. Department of Energy or successor agencies or federal research and development activities as defined in 42 U.S.C. 2021;

"7) affects the rights and powers of any party state or its political subdivisions, to the extent not inconsistent with this compact, to regulate and license any facility or the transportation of waste within its borders or affects the rights and powers of any state or its political subdivisions to tax or impose fees on the waste managed at any facility within its borders;

"8) requires a party state to enter into any agreement with the U.S. Nuclear Regulatory Commission; or

"9) alters or limits liability of transporters of waste and owners and operators of sites for their acts, omissions, conduct or relationships in accordance with applicable laws.

"b) For purposes of this compact, all state laws or parts of laws in conflict with this compact are hereby superseded to the extent of the conflict.

"c) No law, rule, regulation, fee or surcharge of a party state, or of any of its subdivisions or instrumentalities, may be applied in a manner which discriminates against the generators of another party state.

"d) No person who provides a service by arranging for collection, transportation, treatment, storage or disposal for waste generated outside the region shall be allowed to dispose of such waste at a regional facility unless specifically approved by the Commission pursuant to the provisions of Article III(i)(1).

"ARTICLE VII, ELIGIBLE PARTIES, WITHDRAWAL, REVOCATION, ENTRY INTO FORCE, TERMINATION

"a) Eligible parties to this compact are the State of Illinois and Commonwealth of Kentucky. Eligibility terminates on April 15, 1985.

"b) An eligible state becomes a party state when the state enacts the compact into law and pays the membership fee required in Article III(k)(1).

"c) The Commission is formed upon the appointment of Commission members and the tender of the membership fee payable to the Commission by the eligible states. The Governor of Illinois shall convene the initial meeting of the Commission. The Commission shall cause legislation to be introduced in the Congress which grants the consent of the Congress to this compact, and shall take action necessary to organize the Commission and implement the provision of this compact.

"d) Other than the special circumstances for withdrawal in Section (f) of this Article, either party state may withdraw from this compact at any time by repealing the authorizing legislation, but no withdrawal may take effect until 5 years after the governor of the withdrawing state gives notice in writing of the withdrawal to the Commission and to the governor of the other state. Withdrawal does not affect any liability already incurred by or chargeable to a party state prior to the time of such withdrawal. Any host state which grants a disposal permit for waste generated in a withdrawing state shall void the permit when the withdrawal of that state is effective.

"e) This compact becomes effective July 1, 1984, or at any date subsequent to July 1, 1984, upon enactment by the eligible states. However, Article IX(b) shall not take effect until the Congress has by law consented to this compact. The Congress shall have an opportunity to withdraw such consent every 5 years. Failure of the Congress affirmatively to withdraw its consent has the effect of renewing consent for an additional 5 year period. The consent given to this compact by the Congress shall extend to the power of the region to ban the shipment of waste into the region pursuant to Article III(i)(1) and to prohibit exportation of waste generated within the region pursuant to Article III(i)(1).

"f) A state which has been designated a host state may withdraw from the compact. The option to withdraw must be exercised within 90 days of the date the governor of the designated state receives written notice of the designation. Withdrawal becomes effective immediately after notice is given in the following manner. The governor of the withdrawing state shall give notice in writing to the Commission and to the governor of each party state. A state which withdraws from the compact under this Section forfeits any funds already paid pursuant to this compact. A designated host state which withdraws from the compact after 90 days and prior to fulfilling its obligations shall be assessed a sum the Commission determines to be necessary to cover the costs borne by the Commission and remaining party states as a result of that withdrawal.

"ARTICLE IX PENALTIES

"a) Each party state shall prescribe and enforce penalities against any person who is not an official of another state for violation of any provision of this compact.

"b) Unless otherwise authorized by the Commission pursuant to Article III(i), after January 1, 1986 it is a violation of this compact:

"1) for any person to deposit at a regional facility waste not generated within the region;

"2) for any regional facility to accept waste not generated within the region;

"3) for any person to export from the region waste which is generated within the region; or

"4) for any person to dispose of waste at a facility other than a regional facility.

"c) Each party state acknowledges that the receipt by a host state of waste packaged or transported in violation of applicable laws, rules or regulations may result in the imposition of sanctions by the host state which may include suspension or revocation of the violator's right of access to the facility in the host state.

"d) Each party state has the right to seek legal recourse against any party state which acts in violation of this compact.

"ARTICLE X. SEVERABILITY AND CONSTRUCTION

"The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is declared by a court of competent jurisdiction to be contrary to the Constitution of any participating state of the United States, or if the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person or circumstances shall not be affected thereby. If any provision of this compact shall be held contrary to the Constitution of any state participating therein, the compact shall remain in full force and effect as to the state affected as to all severable matters.".

SEC. 225. MIDWEST INTERSTATE LOW-LEVEL RADIOACTIVE WASTE MANAGEMENT COMPACT.

The consent of Congress is hereby given to the States of Iowa, Indiana, Michigan, Minnesota, Missouri, Ohio, and Wisconsin to enter into the Midwest Interstate Compact on Low-level Radioactive Waste Management. Such compact is as follows:

"ARTICLE I. POLICY AND PURPOSE

"There is created the Midwest Interstate Low-level Radioactive Waste Compact.

"The states party to this compact recognize that the Congress of the United States, by enacting the Low-Level Radioactive Waste Policy Act (42 U.S.C. 2021 to 2021d), has provided for and encouraged the development of low-level radioactive waste compacts as a tool for managing such waste. The party states acknowledge that the Congress has declared that each state is responsible for providing for availability of capacity either within or outside the state for the disposal of low-level radioactive waste generated within its borders, except for waste generated as a result of certain defense activities of the federal government or federal research and development activities. The party states also recognize that the management of low-level radioactive waste is handled most efficiently on a regional basis; and, that the safe and efficient management of low-level radioactive waste generated within the region requires that sufficient capacity to manage such waste be properly provided.

"a. It is the policy of the party states to enter into a regional low-level radioactive waste management compact for the purpose of:

"1. Providing the instrument and framework for a cooperative effort;

"2. Providing sufficient facilities for the proper management of low-level radioactive waste generated in the region;

"3. Protecting the health and safety of the citizens of the region;

"4. Limiting the number of facilities required to effictively and efficiently manage low-level radioactive waste generated in the region;

"5. Encouraging the reduction of the amounts of low-level radioactive waste generated in ther region;

"6. Distributing the costs, benefits and obligations of successful low-level radioactive waste management equitably among the party states, and among generators and other persons who use regional facilities to manage their waste; and

"7. Ensuring the ecological and economical management of low-level radioactive wastes.

"b. Implicit in the Congressional consent to this compact is the expectation by the Congress and the party states that the appropriate federal agencies will actively assist the Compact Commission and the individual party states to this compact by:

"1. Expeditious enforcement of federal rules, regulations and laws;

"2. Imposition of sanctions against those found to be in violation of federal rules, regulations and laws; and

"3. Timely inspection of their licensees to determine their compliance with these rules, regulations and laws.

"ARTICLE II DEFINITIONS

"As used in this compact, unless the context clearly requires a different construction:

"a. "Care" means the continued observation of a facility after closure for the purposes of detecting a need for maintenance, ensuring environmental safety, and determining compliance with applicable licensure and regulatory requirements and including the correction of problems which are detected as a result of that observation.

"b. "Commission" means the Midwest Interstate Low-Level Radioactive Waste Commission.

"c. "Decommissioning" means the measures taken at the end of a facility's operating life to assure the continued protection of the public from any residual radioactivity or other potential hazards present at a facility.

"d. "Disposal" means the isolation of waste from the biosphere in a permanent facility designed for that purpose.

"e. "Eligible state" means a state qualified to be a party state to this compact as provided in Article VIII.

"f. "Facility" means a parcel of land or site, together with the structures, equipment and improvements on or appurtenant to the land or site, which is used or is being developed for the treatment, storage or disposal of low-level radioactive waste.

"g. "Generator" means any person who produces or possesses low-level radioactive waste in the course of or incident to manufacturing, power generation, processing, medical diagnosis and treatment, research, or other industrial or commercial activity and who, to the extent required by law, is licensed by the U.S. Nuclear Regulatory Commission or a party state, to produce or possess such waste. Generator does not include a person who provides a service by arranging for the collection, transportation, treatment, storage or disposal of wastes generated outside the region.

"h. "Host state" means any state which is designated by the Commission to host a regional facility.

"i. "Low-level radioactive waste" or "waste" means radioactive waste not classified as high-level radioactive waste, transuranic waste, spent nuclear fuel or by-product material as defined in Section 11(e)(2) of the Atomic Energy Act of 1954 (42 U.S.C. 2014).

"j. "Management plan" means the plan adopted by the Commission for the storage, transportation, treatment and disposal of waste within the region.

"k. "Party state" means any eligible state which enacts the compact into law.

"l. "Person" means any individual, corporation, business enterprise or other legal entity either public or private and any legal successor, representative, agent or agency of that individual, corporation, business enterprise, or legal entity.

"m. "Region" means the area of the party states.

"n. "Regional facility" means a facility which is located within the region and which is established by a party state pursuant to designation of that state as a host state by the Commission.

"o. "Site" means the geographic location of a facility.

"p. "State" means a state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands or any other territorial possession of the United States.

"q. "Storage" means the temporary holding of waste for treatment or disposal.

"r. "Treatment" means any method, technique or process, including storage for radioactive decay, designed to change the physical, chemical or biological characteristics or composition of any waste in order to render the waste safer for transport or management, amenable to recovery, covertible to another usable material, or reduced in volume.

"s. "Waste management" means the storage, transportation, treatment, or disposal of waste.

"ARTICLE III. THE COMMISSION

"a. There is hereby created the Midwest Interstate Low-Level Radioactive Waste Commission. The Commission consists of one voting member from each party state. The Governor of each party state shall notify the Commission in writing of its member and any alternates. An alternate may act on behalf of the member only in that member's absence. The method for selection and the expenses of each Commission member shall be the responsibility of the member's respective state.

"b. Each Commission member is entitled to one vote. No action of the Commission is binding unless a majority of the total membership cast their vote in the affirmative.

"c. The Commission shall elect annually from among its members a chairperson. The Commission shall adopt and publish, in convenient form, bylaws, and policies which are not inconsistent with this compact, including procedures which substantially conform with the provisions of federal law on administrative procedure compiled at 5 U.S.C. 500 to 559 in regard to notice, conduct and recording of meetings; access by the public to records; provision of information to the public; conduct of adjudicatory hearings; and issuance of decisions.

"d. The Commission shall meet at least once annually and shall also meet upon the call of the chairperson or a Commission member.

"e. All meetings of the Commission shall be open to the public with reasonable advance notice. The Commission may, by majority vote, close a meeting to the public for the purpose of considering sensitive personnel or legal strategy matters. However, all

Commission actions and decisions shall be made in open meetings and appropriately recorded.

"f. The Commission may establish advisory committees for the purpose of advising the Commission on any matters pertaining to waste management.

"g. The office of the Commission shall be in a party state. The Commission may appoint or contract for and compensate such limited staff necessary to carry out its duties and functions. The staff shall serve at the Commission's pleasure with the exception that staff hired as the result of securing federal funds shall be hired and governed under applicable federal statutes and regulations. In selecting any staff, the Commission shall assure that the staff has adequate experience and formal training to carry out the functions assigned to it by the Commission.

"h. The Commission may:

"1. Enter into an agreement with any person, state, or group of states for the right to use regional facilities for waste generated outside of the region and for the right to use facilities outside the region for waste generated within the region. The right of any person to use a regional facility for waste generated outside of the region requires an affirmative vote of a majority of the Commission, including the affirmative vote of the member of the host state in which any affected regional facility is located.

"2. Approve the disposal of waste generated within the region at a facility other than a regional facility.

"3. Appear as an intervenor or party in interest before any court of law or any federal, state or local agency, board or commission in any matter related to waste management. In order to represent its views, the Commission may arrange for any expert testimony, reports, evidence or other participation.

"4. Review the emergency closure of a regional facility, determine the appropriateness of that closure, and take whatever actions are necessary to ensure that the interests of the region are protected.

"5. Take any action which is appropriate and necessary to perform its duties and functions as provided in this compact.

"6. Suspend the privileges or revoke the membership of a party state by a two-thirds vote of the membership in accordance with Article VIII.

"i. The Commission shall:

"1. Receive and act on the petition of a nonparty state to become an eligible state.

"2. Submit an annual report to, and otherwise communicate with, the governors and the appropriate officers of the legislative bodies of the party states regarding the activities of the Commission.

"3. Hear, negotiate, and, as necessary, resolve by final decision disputes which may arise between the party states regarding this compact.

"4. Adopt and amend, by a two-thirds vote of the membership, in accordance with the procedures and criteria developed pursuant to Article IV, a regional management plan which designates host states for the establishment of needed regional facilities.

"5. Adopt an annual budget.

"j. Funding of the budget of the Commission shall be provided as follows:

"1. Each state, upon becoming a party state, shall pay $50,000 or $1,000 per cubic meter of waste shipped from that state in 1980, whichever is lower, to the Commission which shall be used for the administrative costs of the Commission;

"2. Each state, hosting a regional facility shall levy surcharges on all users of the regional facility based upon its portion of the total volume and characteristics of wastes managed at that facility. The surcharges collected at all regional facilities shall:

"(a) Be sufficient to cover the annual budget of the Commission; and

"(b) Represent the financial commitments of all party states to the Commission; and

"(c) Be paid to the Commission, provided, however, that each host state collecting surcharges may retain a portion of the collection sufficient to cover its administrative costs of collection, and that the remainder be sufficient only to cover the approved annual budget of the Commission.

"k. The Commission shall keep accurate accounts of all receipts and disbursements. The Commission shall contract with an independent certified public accountant to annually audit all receipts and disbursements of Commission funds, and to submit an audit report to the Commission. The audit report shall be made part of the annual report of the Commission required by this Article.

"1. The Commission may accept for any of its purposes and functions and may utilize and dispose of any donations, grants of money, equipment, supplies, materials and services from any state or the United States (or any subdivision or agency thereof), or interstate agency, or from any institution, person, firm or corporation. The nature, amount and condition, if any, attendant upon any donation or grant accepted or received by the Commission together with the identity of the donor, grantor or lender, shall be detailed in the annual report of the Commission.

"m. The Commission is not liable for any costs associated with any of the following:

"1. The licensing and construction of any facility,

"2. The operation of any facility,

"3. The stabilization and closure of any facility,

"4. The care of any facility,

"5. The extended institutional control, after care of any facility, or

"6. The transportation of waste to any facility.

"n. 1. The Commission is a legal entity separate and distinct from the party states and is liable for its actions as a separate and distinct legal entity. Liabilities of the Commission are not liabilities of the party states. Members of the Commission are not personally liable for actions taken by them in their official capacity.

"2. Except as provided under sections m. and n.1. of this article, nothing in this compact alters liability for any act, omission, course of conduct or liability resulting from any casual or other relationships.

"o. Any person aggrieved by a final decision of the Commission may obtain judicial review of such decision in any court of competent jurisdiction by filing in such court a petition for review within 60 days after the Commission's final decision.

"ARTICLE IV. REGIONAL MANAGEMENT PLAN

"The Commission shall adopt a regional management plan designed to ensure the safe and efficient management of waste generated within the region. In adopting a regional waste management plan the Commission shall:

"a. Adopt procedures for determining, consistent with considerations for public health and safety, the type and number of regional facilities which are presently necessary and which are projected to be necessary to manage waste generated within the region;

"b. Develop and consider policies promoting source reduction of waste generated within the region;

"c. Develop and adopt procedures and criteria for identifying a party state as a host state for a regional facility. In developing these criteria, the Commission shall consider all the following:

"1. The health, safety, and welfare of the citizens of the party states.

"2. The existence of regional facilities within each party state.

"3. The minimization of waste transportation.

"4. The volumes and types of wastes generated within each party state.

"5. The environmental, economic, and ecological impacts on the air, land, and water resources of the party states.

"d. Conduct such hearings, and obtain such reports, studies, evidence and testimony required by its approved procedures prior to identifying a party state as a host state for a needed regional facility;

"e. Prepare a draft management plan, including procedures, criteria and host states, including alternatives, which shall be made available in a convenient form to the public for comment. Upon the request of a party state, the Commission shall conduct a public hearing in that state prior to the adoption of the management plan. The management plan shall include the Commission's response to public and party state comment.

"ARTICLE V. RIGHTS AND OBLIGATIONS OF PARTY STATES

"a. Each party state shall act in good faith in the performance of acts and courses of conduct which are intended to ensure the provision of facilities for regional availability and usage in a manner consistent with this compact.

"b. Each party state has the right to have all wastes generated within its borders managed at regional facilities subject to the provisions contained in Article IX.c. All party states have an equal right of access to any facility made available to the region by any agreement entered into by the Commission pursuant to Article III.

"c. Party states or generators may negotiate for the right of access to a facility outside the region and may export waste outside the region subject to Commission approval under Article III.

"d. To the extent permitted by federal law, each party state may enforce any applicable federal and state laws, regulations and rules pertaining to the packaging and transportation of waste generated within or passing through its borders. Nothing in this section shall be construed to require a party state to enter into any agreement with the U.S. Nuclear Regulatory Commission.

"e. Each party state shall provide to the Commission any data and information the Commission requires to implement its responsibilities. Each party state shall establish the capability to obtain any data and information required by the Commission.

"ARTICLE VI. DEVELOPMENT AND OPERATION AND FACILITIES

"a. Any party state may volunteer to become a host state, and the Commission may designate that state as a host state upon a two-thirds vote of its members.

"b. If all regional facilities required by the regional management plan are not developed pursuant to section a., or upon notification that an existing regional facility will

be closed, the Commission may designate a host state.

"c. Each party state designated as a host state is responsibile for determining possible facility locations within its borders. The selection of a facility site shall not conflict with applicable federal and host state laws, regulations and rules not inconsistent with this compact and shall be based on factors including, but not limited to, geological, environmental and economic viability of possible facility locations.

"d. Any party state designated as a host state may request the Commission to relieve that state of the responsibility to serve as a host state. The Commission may relieve a party state of this responsibility only upon a showing by the requesting party state that no feasible potential regional facility site of the type it is designated to host exists within its borders.

"e. After a state is designated a host state by the Commission, it is responsible for the timely development and operation of a regional facility.

"f. To the extent permitted by federal and state law, a host state shall regulate and license any facility within its borders and ensure the extended care of that facility.

"g. The Commission may designate a party state as a host state while a regional facility is in operation if the Commission determines that an additional regional facility is or may be required to meet the needs of the region. The Commission shall make this designation following the procedures established under Article IV.

"h. Designation of a host state is for a period of 20 years or the life of the regional facility which is established under that designation, whichever is longer. Upon request of a host state, the Commission may modify the period of its designation.

"i. A host state may establish a fee system for any regional facility within its borders. The fee system shall be reasonable and equitable. This fee system shall provide the host state with sufficient revenue to cover any cost, including but not limited to the planning, siting, licensure, operation, decommissioning, extended care and long-term liability, associated with such facilities. This fee system may also include reasonable revenue beyond costs incurred for the host state, subject to approval by the Commission. A host state shall submit an annual financial audit of the operation of the regional facility to the Commission. the fee system may include incentives for source reduction and may be based on the hazard of the waste as well as the volume.

"j. A host state shall ensure that a regional facility located within its borders which is permanently closed is properly decommissioned. A host state shall also provide for the care of a closed or decommissioned regional facility within its borders so that the public health and safety of the state and region are ensured.

"k. A host state intending to close a regional facility located within its borders shall notify the Commission in writing of its intention and the reasons. Notification shall be given to the Commission at least five years prior to the intended date of closure. This section shall not prevent an emergency closing of a regional facility by a host state to protect its air, land and water resources and the health and safety of its citizens. However, a host state which has an emergency closing of a regional facility shall notify the Commission in writing within three working days of its action and shall, within 30 working days of its action, demonstrate justification for the closing.

"l. If a regional facility closes before an additional or new facility becomes operational, waste generated within the region may be shipped temporarily to any location agreed on by the Commission until a regional facility is operational.

"m. A party state which is designated as a host state by the Commission and fails to fulfill its obligations as a host state may have its privileges under the compact suspended or membership in the compact revoked by the Commission.

"ARTICLE VII. OTHER LAWS AND REGULATIONS

"a. Nothing in this compact:

"1. Abrogates or limits the applicability of any act of Congress or diminishes or otherwise impairs the jurisdiction of any federal agency expressly conferred thereon by the Congress;

"2. Prevents the enforcement of any other law of a party state which is not inconsistent with this compact;

"3. Prohibits any storage or treatment of waste by the generator on its own premises;

"4. Affects any administrative or judicial proceeding pending on the effective date of this compact;

"5. Alters the relations between and the respective internal responsibility of the government of a party state and its subdivisions;

"6. Affects the generation, treatment, storage or disposal of waste generated by the atomic energy defense activities of the Secretary of the U.S. Department of Energy or successor agencies or federal research and development activities as described in section 31 of the Atomic Energy Act of 1954 (42 U.S.C. 2051); or

"7. Affects the rights and powers of any party state or its political subdivisions to the extent not inconsistent with this compact, to regulate and license any facility or the transportation of waste within its borders or affects the rights and powers of any party state and its political subdivisions to tax or impose fees on the waste managed at any facility within its borders.

"8. Requires a party state to enter into any agreement with the U.S. Nuclear Regulatory Commission.

"9. Alters or limits liability of transporters of waste, owners and operators of sites for their acts, omissions, conduct or relationships in accordance with applicable laws.

"b. For purposes of this compact, all state laws or parts of laws in conflict with this compact are hereby superseded to the extent of the conflict.

"c. No law, rule or regulation of a party state or of any of its subdivisions or instrumentalities may be applied in a manner which discriminates against the generators of another party state.

"ARTICLE VIII. ELIGIBLE PARTIES, WITHDRAWAL, REVOCATION, ENTRY INTO FORCE, TERMINATION

"a. Eligible parties to this compact are the states of Delaware, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Virginia and Wisconsin. Eligibility terminates on July 1, 1984.

"b. Any state not eligible for membership in the compact may petition the Commission for eligibility. The Commission may establish appropriate eligibility requirements. These requirements may include but are not limited to, an eligibility fee or designation as a host state. A petitioning state becomes eligible for membership in the compact upon the approval of the Commission, including the affirmative vote of all host states. Any state becoming eligible upon the approval of the Commission becomes a member of the compact in the same manner as any state eligible for membership at the time this compact enters into force.

"c. An eligible state becomes a party state when the state enacts the compact into law and pays the membership fee required in Article III.j.1.

"d. The Commission is formed upon the appointment of Commission members and the tender of the membership fee payable to the Commission by three party states. The Governor of the first state to enact this compact shall convene the initial meeting of the Commission. The Commission shall cause legislation to be introduced in the Congress which grants the consent of the Congress to this compact, and shall take action necessary to organize the Commission and implement the provision of this compact.

"e. Any party state may withdraw from this compact by repealing the authorizing legislation but no withdrawal may take effect until five years after the Governor of the withdrawing state gives notice in writing of the withdrawal to the Commission and to the Governor of each party state. Withdrawal does not affect any liability already incurred by or chargeable to a party state prior to the time of such withdrawal. Any host state which grants a disposal permit for waste generated in a withdrawing state shall void the permit when the withdrawal of that state is effective.

"f. Any party state which fails to comply with the terms of this compact or fails to fulfill its obligatons may have its privileges suspended or its membership in the compact revoked by the Commission in accordance with Article III.h.6. Revocation takes effect one year from the date the affected party state receives written notice from the Commission of its action. All legal rights of the affected party state established under this compact cease upon the effective date of revocation but any legal obligations of that party state arising prior to revocation continue until they are fulfilled. The chairperson of the Commission shall transmit written notice of a revocation of a party state's membership in the compact immediately following the vote for the Commission to the governor of the affected party state, all other Governors of the party states and the Congress of the United States.

"g. This compact becomes effective upon enactment by at least three eligible states and consent to this compact by Congress. The Congress shall have an opportunity to withdraw such consent every five years. Failure of the Congress to affirmatively withdraw its consent has the effect of renewing consent for an additional five year period. The consent given to this compact by the Congress shall extend to any future admittance of new party states under sections b. and c. of this article and to the power of the Commission to ban the shipment of waste from the region pursuant to Article III.

"h. The withdrawal of a party state from this compact under section e. of this article or the suspension or revocation of a state's membership in this compact under section f. of this article does not affect the applicability of this compact to the remaining party states.

"i. A state which has been designated by the Commission to be a host state has 90 days from receipt by the Governor of written notice of designation to withdraw from the compact without any right to receive

refund of any funds already paid pursuant to this compact, and without any further payment. Withdrawal becomes effective immediately upon notice as provided in section e. of this article. A designated host state which withdraws from the compact after 90 days and prior to fulfilling its obligations shall be assessed a sum the Commission determines to be necessary to cover the costs borne by the Commission and remaining party states as a result of that withdrawal.

"ARTICLE IX PENALTIES

"a. Each party state shall prescribe and enforce penalties against any person who is not an official of another state for violation of any provision of this compact.

"b. Unless otherwise authorized by the Commission pursuant to Article III.h. after January 1, 1986, it is a violation of this compact:

"1. For any person to deposit at a regional facility waste not generated within the region;

"2. For any regional facility to accept waste not generated within the region;

"3. For any person to export from the region waste which is generated within the region; or

"4. For any person to dispose of waste at a facility other than a regional facility.

"c. Each party state acknowledges that the receipt by a host state of waste packaged or transported in violation of applicable laws, rules and regulations may result in the imposition of sanctions by the host state which may include suspension or revocation of the violator's right of access to the facility in the host state.

"d. Each party state has the right to seek legal recourse against any party state which acts in violation of this compact.

"ARTICLE X. SEVERABILITY AND CONSTRUCTION

"The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is declared by a court of competent jurisdiction to be contrary to the Constitution of any participating state or of the United States or the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person or circumstance shall not be affected thereby. If any provision of this compact shall be held contrary to the Constitution of any state participating therein, the compact shall remain in full force and effect as to the state affected as to all severable matters.".

SEC. 226. ROCKY MOUNTAIN LOW-LEVEL RADIOACTIVE WASTE COMPACT.

In accordance with section 4(a)(2) of the Low-Level Radioactive Waste Policy Act (42 U.S.C. 2021d(a)(2)), the consent of the Congress hereby is given to the States of Arizona, Colorado, Nevada, New Mexico, Utah, and Wyoming to enter into the Rocky Mountain Interstate Low-Level Radioactive Waste Compact.

Such compact is substantially as follows:

ROCKY MOUNTAIN LOW-LEVEL RADIOACTIVE WASTE COMPACT

ARTICLE I. FINDINGS AND PURPOSE

(a) The party states agree that each state is responsible for providing for the management of low-level radioactive waste generated within its borders, except for waste generated as a result of defense activities of the federal government or federal research and development activities. Moreover, the party states find that the United States Congress, by enacting the "Low-Level Radioactive Waste Policy Act" (P.L. 96-573), has encouraged the use of interstate compacts to provide for the establishment and operation of facilities for regional management of low-level radioactive waste.

(b) It is the purpose of the party states, by entering into an interstate compact, to establish the means for cooperative effort in managing low-level radioactive waste; to ensure the availability and economic viability of sufficient facilities for the proper and efficient management of low-level radioactive waste generated within the region while preventing unnecessary and uneconomic proliferation of such facilities; to encourage reduction of the volume of low-level radioactive waste requiring disposal within the region; to restrict management within the region of low-level radioactive waste generated outside the region; to distribute the costs, benefits and obligations of low-level radioactive waste management equitably among the party states; and by these means to promote the health, safety and welfare of the residents within the region.

ARTICLE II. DEFINITIONS

As used in this compact, unless the context clearly indicates otherwise:

(a) "Board" means the Rocky Mountain low-level radioactive waste board;

(b) "Carrier" means a person who transports low-level waste;

(c) "Disposal" means the isolation of waste from the biosphere, with no intention of retrieval, such as by land burial;

(d) "Facility" means any property, equipment or structure used or to be used for the management of low-level waste;

(e) "Generate" means to produce low-level waste;

(f) "Host state" means a party state in which a regional facility is located or being developed;

(g) "Low-level waste" or "waste" means radioactive waste other than:

(i) Waste generated as a result of defense activities of the federal government or federal research and development activities;

(ii) High-level waste such as irradiated reactor fuel, liquid waste from reprocessing irradiated reactor fuel, or solids into which any such liquid waste has been converted;

(iii) Waste material containing transuranic elements with contamination levels greater than ten (10) nanocuries per gram of waste material;

(iv) By-product material as defined in Section 11e.(2) of the "Atomic Energy Act of 1954," as amended November 8, 1978; or

(v) Wastes from mining, milling, smelting or similar processing of ores and mineral-bearing material primarily for minerals other than radium.

(h) "Management" means collection, consolidation, storage, treatment, incineration or disposal;

(i) "Operator" means a person who operates a regional facility;

(j) "Person" means an individual, corporation, partnership or other legal entity, whether public or private;

(k) "Region" means the combined geographic area within the boundaries of the party states; and

(l) "Regional facility" means a facility within any party state which either:

(i) has been approved as a regional facility by the board; or

(ii) is the low-level waste facility in existence on January 1, 1982, at Beatty, Nevada.

ARTICLE III

RIGHTS, RESPONSIBILITIES, AND OBLIGATIONS

(a) There shall be regional facilities sufficient to manage the low-level waste generated within the region. At least one (1) regional facility shall be open and operating in a party state other than Nevada within six (6) years after this compact becomes law in Nevada and in one (1) other state.

(b) Low-level waste generated within the region shall be managed at regional facilities without discrimination among the party states; provided, however, that a host state may close a regional facility when necessary for public health or safety.

(c) Each party state which, according to reasonable projections made by the board, is expected to generate twenty percent (20%) or more in cubic feet except as otherwise determined by the board of the low-level waste generated within the region has an obligation to become a host state in compliance with subsection (d) of this article.

(d) A host state, or party state seeking to fulfill its obligation to become a host state, shall:

(i) Cause a regional facility to be developed on a timely basis as determined by the board, and secure the approval of such regional facility by the board as provided in Article IV before allowing site preparation or physical construction to begin;

(ii) Ensure by its own law, consistent with any applicable federal law, the protection and preservation of public health and safety in the siting, design, development, licensure or other regulation, operation, closure, decommissioning and long-term care of the regional facilities within the state;

(iii) Subject to the approval of the board, ensure that charges for management of low-level waste at the regional facilities within the state are reasonable;

(iv) Solicit comments from each other party state and the board regarding siting, design, development, licensure or other regulation, operation, closure, decommissioning and long-term care of the regional facilities within the state and respond in writing to such comments;

(v) Submit an annual report to the board which contains projections of the anticipated future capacity and availability of the regional facilities within the state, together with other information required by the board; and

(vi) Notify the board immediately if any exigency arises requiring the possible temporary or permanent closure of a regional facility within the state at a time earlier than was projected in the state's most recent annual report to the board.

(e) Once a party state has served as a host state, it shall not be obligated to serve again until each other party state having an obligation under subsection (c) of this article has fulfilled that obligation. Nevada, already being a host state, shall not be obligated to serve again as a host state until every other party state has so served.

(f) Each party state:

(i) Agrees to adopt and enforce procedures requiring low-level waste shipments originating within its borders and destined for a regional facility to conform to packaging and transportation requirements and regulations. Such procedures shall include but are not limited to:

(A) Periodic inspection of packaging and shipping practices;

(B) Periodic inspections of waste containers while in the custody of carriers; and

(C) Appropriate enforcement actions with respect to violations.

(ii) Agrees that after receiving notification from a host state that a person in the party state has violated packaging, shipping or transportation requirements or regulations,

it shall take appropriate action to ensure that violations do not recur. Appropriate action may include but is not limited to the requirement that a bond be posted by the violator to pay the cost of repackaging at the regional facility and the requirement that future shipments be inspected;

(iii) May impose fees to recover the cost of the practices provided for in paragraph (i) and (ii) of this subsection;

(iv) Shall maintain an inventory of all generators within the state that may have low-level waste to be managed at a regional facility; and

(v) May impose requirements or regulations more stringent than those required by this subsection.

ARTICLE IV. BOARD APPROVAL OF REGIONAL FACILITIES

(a) Within ninety (90) days after being requested to do so by a party state, the board shall approve or disapprove a regional facility to be located within that state.

(b) A regional facility shall be approved by the board if and only if the board determines that:

(i) There will be, for the foreseeable future, sufficient demand to render operation of the proposed facility economically feasible without endangering the economic feasibility of operation of any other regional facility; and

(ii) The facility will have sufficient capacity to serve the needs of the region for a reasonable period of years.

ARTICLE V. SURCHARGES

(a) The board shall impose a "compact surcharge" per unit of waste received at any regional facility. The surcharge shall be adequate to pay the costs and expenses of the board in the conduct of its authorized activities and may be increased or decreased as the board deems necessary.

(b) A host state may impose a "state surcharge" per unit of waste received at any regional facility within the state. The host state may fix and change the amount of the state surcharge subject to approval by the board. Money received from the state surcharge may be used by the host state for any purpose authorized by its own law, including but not limited to costs of licensure and regulatory activities related to the regional facility, reserves for decommissioning and long-term care of the regional facility and local impact assistance.

ARTICLE VI. THE BOARD

(a) The "Rocky Mountain low-level radioactive waste board", which shall not be an agency or instrumentality of any party state, is created.

(b) The board shall consist of one (1) member from each party state. The governor shall determine how and for what term its member shall be appointed, and how and for what term any alternate may be appointed to perform that member's duties on the board in the member's absence.

(c) Each party state is entitled to one (1) vote. A majority of the board constitutes a quorum. Unless otherwise provided in this compact, a majority of the total number of votes on the board is necessary for the board to take any action.

(d) The board shall meet at least once a year and otherwise as its business requires. Meetings of the board may be held in any place within the region deemed by the board to be reasonably convenient for the attendance of persons required or entitled to attend and where adequate accommodations may be found. Reasonable public notice and opportunity for comment shall be given with respect to any meeting; provided, however, that nothing in this subsection shall preclude the board from meeting in executive session when seeking legal advice from its attorneys or when discussing the employment, discipline or termination of any of its employees.

(e) The board shall pay necessary travel and reasonable per diem expenses of its members, alternates, and advisory committee members.

(f) The board shall organize itself for the efficient conduct of its business. It shall adopt and publish rules consistent with the compact regarding its organization and procedures. In special circumstances the board, with unanimous consent of its members, may take actions by telephone; provided, however, that any action taken by telephone shall be confirmed in writing by each member within thirty (30) days. Any action taken by telephone shall be noted in the minutes of the board.

(g) The board may use for its purposes the services of any personnel or other resources which may be offered by any party state.

(h) The board may establish its offices in space provided for that purpose by any of the party states, or, if space is not provided or is deemed inadequate, in any space within the region selected by the board.

(i) Consistent with available funds, the board may contract for necessary personnel services to carry out its duties. Staff shall be employed without regard for the personnel, civil service, or merit laws of any of the party states and shall serve at the pleasure of the board. The board may provide appropriate employee benefit programs for its staff.

(j) The board shall establish a fiscal year which conforms to the extent practicable to the fiscal years of the party states.

(k) The board shall keep an accurate account of all receipts and disbursements. An annual audit of the books of the board shall be conducted by an independent certified public accountant, and the audit report shall be made a part of the annual report of the board.

(l) The board shall prepare and include in the annual report a budget showing anticipated receipts and disbursements for the ensuing year.

(m) Upon legislative enactment of this compact, each party State shall consider the need to appropriate seventy thousand dollars ($70,000.00) to the board to support its activities prior to the collection of sufficient funds through the compact surcharge imposed pursuant to subsection (a) of article V of this compact.

(n) The board may accept any donations, grants, equipment, supplies, materials or services, conditional or otherwise, from any source. The nature, amount and condition, if any, attendant upon any donation, grant or other resources accepted pursuant to this subsection, together with the identity of the donor or grantor, shall be detailed in the annual report of the board.

(o) In addition to the powers and duties conferred upon the board pursuant to other provisions of this compact, the board:

(i) Shall submit communications to the governors and to the presiding officers of the legislatures of the party states regarding the activities of the board, including an annual report to be submitted by December 15;

(ii) May assemble and make available to the governments of the party states and to the public through its members information concerning low-level waste management needs, technologies and problems;

(iii) Shall keep a current inventory of all generators within the region, based upon information provided by the party states;

(iv) Shall keep a current inventory of all regional facilities, including information on the size, capacity, location, specific wastes capable of being managed and the projected useful life of each regional facility;

(v) May keep a current inventory of all low-level waste facilities in the region, based upon information provided by the party states;

(vi) Shall ascertain on a continuing basis the needs for regional facilities and capacity to manage each of the various classes of low-level waste;

(vii) May develop a regional low-level waste management plan;

(viii) May establish such advisory committees as it deems necessary for the purpose of advising the board on matters pertaining to the management of low-level waste;

(ix) May contract as it deems appropriate to accomplish its duties and effectuate its powers, subject to its projected available resources; but no contract made by the board shall bind any party state;

(x) Shall make suggestions to appropriate officials of the party states to ensure that adequate emergency response programs are available for dealing with any exigency that might arise with respect to low-level waste transportation or management;

(xi) Shall prepare contingency plans, with the cooperation and approval of the host state, for management of low-level waste in the event any regional facility should be closed;

(xii) May examine all records of operators of regional facilities pertaining to operating costs, profits or the assessment or collection of any charge, fee or surcharge;

(xiii) Shall have the power to sue; and

(xiv) When authorized by unanimous vote of its members, may intervene as of right in any administrative or judicial proceeding involving low-level waste.

ARTICLE VII. PROHIBITED ACTS AND PENALTIES

(a) It shall be unlawful for any person to dispose of low-level waste within the region, except at a regional facility; provided, however, that a generator who, prior to January 1, 1982, had been disposing of only his own waste on his own property may, subject to applicable federal and state law, continue to do so.

(b) After January 1, 1986, it shall be unlawful for any person to export low-level waste which was generated within the region outside the region unless authorized to do so by the board. In determining whether to grant such authorization, the factors to be considered by the board shall include, but not be limited to, the following:

(i) The economic impact of the export of the waste on the regional facilities;

(ii) The economic impact on the generator of refusing to permit the export of the waste; and

(iii) The availability of a regional facility appropriate for the disposal of the waste involved.

(c) After January 1, 1986, it shall be unlawful for any person to manage any low-level waste within the region unless the waste was generated within the region or unless authorized to do so both by the board and by the state in which said management takes place. In determining whether to grant such authorization, the factors to be considered by the board shall include, but not be limited to, the following:

(i) the impact of importing waste on the available capacity and projected life of the regional facilities;

(ii) the economic impact on the regional facilities; and

(iii) the availability of a regional facility appropriate for the disposal of the type of waste involved.

(d) It shall be unlawful for any person to manage at a regional facility any radioactive waste other than low-level waste as defined in this compact, unless authorized to do so both by the board and the host state. In determining whether to grant such authorization, the factors to be considered by the board shall include, but not be limited to, the following:

(i) the impact of allowing such management on the available capacity and projected life of the regional facilities;

(ii) the availability of a facility appropriate for the disposal of the type of waste involved;

(iii) the existence of transuranic elements in the waste; and

(iv) the economic impact on the regional facilities.

(e) Any person who violates subsection (a) or (b) of this article shall be liable to the board for a civil penalty not to exceed ten (10) times the charges which would have been charged for disposal of the waste at a regional facility.

(f) Any person who violates subsection (c) or (d) of this article shall be liable to the board for a civil penalty not to exceed ten (10) times the charges which were charged for management of the waste at a regional facility.

(g) The civil penalties provided for in subsections (e) and (f) of this article may be enforced and collected in any court of general jurisdiction within the region where necessary jurisdiction is obtained by an appropriate proceeding commenced on behalf of the board by the attorney general of the party state wherein the proceeding is brought or by other counsel authorized by the board. In any such proceeding, the board, if it prevails, is entitled to recover reasonable attorney's fees as part of its costs.

(h) Out of any civil penalty collected for a violation of subsection (a) or (b) of this article, the board shall pay to the appropriate operator a sum sufficient in the judgment of the board to compensate the operator for any loss of revenue attributable to the violation. Such compensation may be subject to state and compact surcharges as if received in the normal course of the operator's business. The remainder of the civil penalty collected shall be allocated by the board. In making such allocation, the board shall give first priority to the needs of the long-term care funds in the region.

(i) Any civil penalty collected for a violation of subsection (c) or (d) of this article shall be allocated by the board. In making such allocation, the board shall give first priority to the needs of the long-term care funds in the region.

(j) Violations of subsection (a), (b), (c), or (d) of this article may be enjoined by any court of general jurisdiction within the region where necessary jurisdiction is obtained in any appropriate proceeding commenced on behalf of the board by the attorney general of the party state wherein the proceeding is brought or by other counsel authorized by the board. In any such proceeding, the board, if it prevails, is entitled to recover reasonable attorney's fees as part of its costs.

(k) No state attorney general shall be required to bring any proceeding under any subsection of this article, except upon his consent.

ARTICLE VIII. ELIGIBILITY, ENTRY INTO EFFECT, CONGRESSIONAL CONSENT, WITHDRAWAL, EXCLUSION

(a) Arizona, Colorado, Nevada, New Mexico, Utah, and Wyoming are eligible to become parties to this compact. Any other state may be made eligible by unanimous consent of the board.

(b) An eligible state may become a party state by legislative enactment of this compact or by executive order of its governor adopting this compact; provided, however, a state becoming a party by executive order shall cease to be a party state upon adjournment of the first general session of its legislature convened thereafter, unless before such adjournment the legislature shall have enacted this compact.

(c) This compact shall take effect when it has been enacted by the legislatures of two (2) eligible states. However, subsections (b) and (c) of article VII shall not take effect until Congress has by law consented to this compact. Every five (5) years after such consent has been given, Congress may by law withdraw its consent.

(d) A state which has become a party state by legislative enactment may withdraw by legislation repealing its enactment of this compact; but no such repeal shall take effect until two (2) years after enactment of the repealing legislation. If the withdrawing state is a host state, any regional facility in that state shall remain available to receive low-level waste generated within the region until five (5) years after the effective date of the withdrawal; provided, however, this provision shall not apply to the existing facility in Beatty, Nevada.

(e) A party state may be excluded from this compact by a two-thirds (⅔) vote of the members representing the other party states, acting in a meeting, on the ground that the state to be excluded has failed to carry out its obligation under this compact. Such an exclusion may be terminated upon a two-thirds (⅔) vote of the members acting in a meeting.

ARTICLE IX. CONSTRUCTION AND SEVERABILITY

(a) The provisions of this compact shall be broadly construed to carry out the purposes of the compact.

(b) Nothing in this compact shall be construed to affect any judicial proceeding pending on the effective date of this compact.

(c) If any part or application of this compact is held invalid, the remainder, or its application to other situations or persons, shall not be affected.

SEC. 227. NORTHEAST INTERSTATE LOW-LEVEL RADIOACTIVE WASTE MANAGEMENT COMPACT.

In accordance with section 4(a)(2) of the Low-Level Radioactive Waste Policy Act, the consent of the Senate is hereby given to the States of Connecticut, New Jersey, Delaware, and Maryland to enter into the Northeast Interstate Low-Level Radioactive Waste Management Compact. Such compact is substantially as follows:

ARTICLE I. POLICY AND PURPOSE

There is hereby created the Northeast Interstate Low-Level Radioactive Waste Management Compact. The party states recognize that the Congress has declared that each state is responsible for providing for the availability of capacity, either within or outside its borders for disposal of low-level radioactive waste generated within its borders, except for waste generated as a result of atomic energy defense activities of the federal government, as defined in the Low-Level Radioactive Waste Policy Act (P.L. 96-573, "The Act"), or federal research and development activities. They also recognize that the management of low-level radioactive waste is handled most efficiently on a regional basis. The party states further recognize that the Congress of the United States, by enacting the Act has provided for and encouraged the development of regional low-level radioactive waste compacts to manage such waste. The party states recognize that the long-term, safe and efficient management of low-level radioactive waste generated within the region requires that sufficient capacity to manage such waste be properly provided.

In order to promote the health and safety of the region, it is the policy of the party states to: enter into a regional low-level radioactive waste management compact as a means of facilitating an interstate cooperative effort, provide for proper transportation of low-level waste generated in the region, minimize the number of facilities required to effectively and efficiently manage low-level radioactive waste generated in the region, encourage the reduction of the amounts of low-level waste generated in the region, distribute the costs, benefits, and obligations of proper low-level radioactive waste management equitably among the party states, and ensure the environmentally sound and economical management of low-level radioactive waste.

ARTICLE II. DEFINITIONS

As used in this compact, unless the context clearly requires a different construction:

a. "commission" means the Northeast Interstate Low-Level Radioactive Waste Commission established pursuant to Article IV of this compact;

b. "custodial agency" means the agency of the government designated to act on behalf of the government owner of the regional facility;

c. "disposal" means the isolation of low-level radioactive waste from the biosphere inhabited by man and his food chains;

d. "facility" means a parcel of land, together with the structures, equipment and improvements thereon or appurtenant thereto, which is used or is being developed for the treatment, storage or disposal of low-level waste, but shall not include on-site treatment or storage by a generator;

e. "generator" means a person who produces or processes low-level waste, but does not include persons who only provide a service by arranging for the collection, transportation, treatment, storage or disposal of wastes generated outside the region;

f. "high-level waste" means 1) the highly radioactive material resulting from the reprocessing of spent nuclear fuel, including liquid waste produced directly in reprocessing and any solid material derived from such liquid waste that contains fission products in sufficient concentration; and 2) any other highly radioactive material determined by the federal government as requiring permanent isolation;

g. "host state" means a party state in which a regional facility is located or being developed;

h. "institutional control" means the continued observation, monitoring, and care of the regional facility following transfer of control of the regional facility from the operator to the custodial agency;

i. "low-level waste" means radioactive waste that 1) is neither high-level waste nor transuranic waste, nor spent nuclear fuel, nor by-product material as defined in section 11e(2) of the Atomic Energy Act of 1954 as amended; and 2) is classified by the federal government at low-level waste, consistent with existing law; but does not include waste generated as a result of atomic energy defense activities of the federal government, as defined in P.L. 96-573, or federal research and development activities;

j. "party state" means any state which is a signatory party in good standing to this compact;

k. "person" means as individual, corporation, business enterprise or other legal entity, either public or private and their legal successors;

l. "post-closure observation and maintenance" means the continued monitoring of a closed regional facility to ensure the integrity and environmental safety of the site through compliance with applicable licensing and regulatory requirements; prevention of unwarranted intrusion, and correction of problems;

m. "region" means the entire area of the party states;

n. "regional facility" means a facility as defined in this section which has been designated or accepted by the Commission;

o. "state" means a state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands or any other territory subject to the laws of the United States;

p. "storage" means the holding of waste for treatment or disposal;

q. "transuranic waste" means waste material containing radionuclides with an atomic number greater than 92 which are excluded from shallow land burial by the federal government;

r. "treatment" means any method, technique or process, including storage for decay, designed to change the physical, chemical or biological characteristics or composition of any waste in order to render such waste safer for transport or disposal, amendable for recovery, convertible to another usable material or reduced in volume;

s. "waste" means low-level radioactive waste as defined in this section;

t. "waste management" means the storage, treatment, transportation, and disposal, where applicable, of waste.

ARTICLE III. RIGHTS AND OBLIGATIONS

a. There shall be provided within the region one or more regional facilities which, together with such other facilities as may be made available to the region, will provide sufficient capacity to manage all wastes generated within the region.

1. Regional facilities shall be entitled to waste generated within the region, unless otherwise provided by the Commission. To the extent regional facilities are available, no waste generated within a party state shall be exported to facilities outside the region unless such exportation is approved by the Commission and the affected host state(s).

2. After January 1, 1986, no person shall deposit at a regional facility waste generated outside the region, and further, no regional facility shall accept waste generated outside the region, unless approved by the Commission and the affected host state(s).

b. The rights, responsibilities and obligations of each party state to this compact are as follows:

1. Each party state shall have the right to have all wastes generated within its borders managed at regional facilities, and shall have the right of access to facilities made available to the region through agreements entered into by the Commission pursuant to Article IV(i)(11). The right of access by a generator within a party state to any regional facility is limited by the generator's adherence to applicable state and federal laws and regulations and the provisions of this compact.

2. To the extent not prohibited by federal law, each party state shall institute procedures which will require shipments of low-level waste generated within or passing through its borders to be consistent with applicable federal packaging and transportation regulations and applicable host state packaging and transportation regulations for management of low-level waste; provided, however, that these practices shall not impose unreasonable, burdensome impediments to the management of low-level waste in the region. Upon notification by a host state that a generator, shipper, or carrier within the party state is in violation of applicable packaging or transportation regulations, the party state shall take appropriate action to ensure that such violations do not recur.

3. Each party state may impose reasonable fees upon generators, shippers, or carriers to recover the cost of inspections and other practices under this compact.

4. Each party state shall encourage generators within its borders to minimize the volume of waste requiring disposal.

5. Each party state has the right to rely on the good faith performance by every other party state of acts which ensure the provisions of facilities for regional availability and their use in a manner consistent with this compact.

6. Each party state shall provide to the Commission any data and information necessary for the implementation of the Commission's responsibilities, and shall establish the capability to obtain any data and information necessary to meet its obligation as herein defined.

7. Each party state shall have the capability to host a regional facility in a timely manner and to ensure the post-closure observation and maintenance, and institutional control of any regional facility within its borders.

8. No non-host party state shall be liable for any injury to persons or property resulting from the operation of a regional facility or the transportation of waste to a regional facility; however, if the host state itself is the operator of the regional facility, its liability shall be that of any private operator.

c. The rights, responsibilities and obligations of a host state are as follows:

1. To the extent not prohibited by federal law, a host state shall ensure the timely development and the safe operation, closure, post-closure observation and maintenance, and institutional control of any regional facility within its borders.

2. In accordance with procedures established in Articles V and IX, the host state shall provide for the establishment of a reasonable structure of fees sufficient to cover all costs related to the development, operation, closure, post-closure observation and maintenance, and institutional control of a regional facility. It may also establish surcharges to cover the regulatory costs, incentives, and compensation associated with a regional facility; provided, however, that without the express approval of the Commission, no distinction in fees or surcharges shall be made between persons of the several states party to this compact.

3. To the extent not prohibited by federal law, a host state may establish requirements and regulations pertaining to the management of waste at a regional facility; provided, however, that such requirements shall not impose unreasonable impediments to the management of low-level waste within the region. Nor may a host state or a subdivision impose such restrictive requirements on the siting or operation of a regional facility that, along or as a whole, they serve as unreasonable barriers or prohibitions to the siting or operation of such a facility.

4. Each host state shall submit to the Commission annually a report concerning each operating regional facility within its borders. The report shall contain projections of the anticipated future capacity and availability of the regional facility, a financial audit of its operations, and other information as may be required by the Commission; and in the case of regional facilities in institutional control or otherwise no longer operating, the host states shall furnish such information as may be required on the facilities still subject to their jurisdiction.

5. A host state shall notify the Commission immediately if any exigency arises which requires the permanent, temporary, or possible closure of any regional facility located therein at a time earlier than projected in its most recent annual report to the Commission. The Commission may conduct studies, hold hearings, or take such other measures to ensure that the actions taken are necessary and compatible with the obligations of the host state under this compact.

ARTICLE IV. THE COMMISSION

a. There is hereby created the Northeast Interstate Low-Level Radioactive Waste Commission. The Commission shall consist of one member from each party state to be appointed by the Governor according to procedures of each party state, except that a host state shall have two members during the period that it has an operating regional facility. The Governor shall notify the Commission in writing of the identity of the member and one alternate, who may act on behalf of the member only in the member's absence.

b. Each Commission member shall be entitled to one vote. No action of the Commission shall be binding unless a majority of the total membership cast their vote in the affirmative.

c. The Commission shall elect annually from among its members a presiding officer and such other officers as it deems appropriate. The Commission shall adopt and publish, in convenient form, such rules and regulations as are necessary for due process in the performance of its duties and powers under this compact.

d. The Commission shall meet at least once a year and shall also meet upon the call of the presiding officer, or upon the call of a party state member.

e. All meetings of the Commission shall be open to the public with reasonable prior public notice. The Commission may, by majority vote, close a meeting to the public for the purpose of considering sensitive personnel or legal matters. All Commission actions and decisions shall be made in open meetings and appropriately recorded. A roll call vote may be required upon request of any party state or the presiding officer.

f. The Commission may establish such committees as it deems necessary.

g. The Commission may appoint, contract for, and compensate such limited staff as it

determines necessary to carry out its duties and functions. The staff shall serve at the Commission's pleasure irrespective of the civil service, personnel or other merit laws of any of the party states or the federal government and shall be compensated from funds of the Commission.

h. The Commission shall adopt an annual budget for its operations.

i. The Commission shall have the following duties and powers:

1. The Commission shall receive and act on the application of a non-party state to become an eligible state in accordance with Article VII(e).

2. The Commission shall receive and act on the application of an eligible state to become a party state in accordance with Article VII(b).

3. The Commission shall submit an annual report to and otherwise communicate with the governors and the presiding officer of each body of the legislature of the party states regarding the activities of the Commission.

4. Upon request of party states, the Commission shall mediate disputes which arise between the party states regarding this compact.

5. The Commission shall develop, adopt and maintain a regional management plan to ensure safe and effective management of waste within the region, pursuant to Article V.

6. The Commission may conduct such legislative or adjudicatory hearings, and require such reports, studies, evidence and testimony as are necessary to perform its duties and functions.

7. The Commission shall establish by regulation, after public notice and opportunity for comment, such procedural regulations as deemed necessary to ensure efficient operation, the orderly gathering of information, and the protection of the rights of due process of affected persons.

8. In accordance with the procedures and criteria set forth in Article V, the Commission shall accept a host state's proposed facility as a regional facility.

9. In accordance with the procedures and criteria set forth in Article V, the Commission may designate, by a two-thirds vote, host states for the establishment of needed regional facilities. The Commission shall not exercise this authority unless the party states have failed to voluntarily pursue the development of such facilities.

10. The Commission may require of and obtain from party states, eligible states seeking to become party states, and non-party states seeking to become eligible states, data and information necessary for the implementation of Commission responsibilities.

11. The Commission may enter into agreements with any person, state, regional body, or group of states for the importation of waste into the region and for the right of access to facilities outside the region for waste generated within the region. Such authorization to import requires a two-thirds majority vote of the Commission, including an affirmative vote of the representatives of the host state in which any affected regional facility is located. This shall be done only after the Commission and the host state have made an assessment of the affected facilities' capability to handle such wastes and of relevant environmental, economic, and public factors, as defined by the appropriate regulatory authorities.

12. The Commission may, upon petition, grant an individual generator or group of generators in the region the right to export wastes to a facility located outside the region. Such grant of right shall be for a period of time and amount of waste and on such other terms and conditions as determined by the Commission and approved by the affected host states.

13. The Commission may appear as an intervenor or party in interest before any court of law, federal, state or local agency, board or commission that has jurisdiction over the management of wastes. Such authority to intervene or otherwise appear shall be exercised only after a two-thirds vote of the Commission. In order to represent its views, the Commission may arrange for any expert testimony, reports, evidence or other participation as it deems necessary.

14. The Commission may impose sanctions, including but not limited to, fines, suspension of privileges and revocation of the membership of a party state in accordance with Article VII. The Commission shall have the authority to revoke, in accordance with Article VII(g), the membership of a party state that creates unreasonable barriers to the siting of a needed regional facility or refuses to accept host state responsibilities upon designation by the Commission.

15. The Commission shall establish by regulation criteria for and shall review the fee and surcharge systems in accordance with Articles V and IX.

16. The Commision shall review the capability of party states to ensure the siting, operation, post-closure observation and maintenance, and institutional control of any facility within its borders.

17. The Commission shall review the compact legislation every five years prior to federal congressional review provided for in the Act, and may recommend legislative action.

18. The Commission has the authority to develop and provide to party states such rules, regulations and guidelines as it deems appropriate for the efficient, consistent, fair and reasonable implementation of the compact.

j. There is hereby established a Commission operating account. The Commission is authorized to expend monies from such account for the expenses of any staff and consultants designated under section (g) of this Article and for official Commission business. Financial support of the Commission account shall be provided as follows:

1. Each eligible state, upon becoming a party state, shall pay $70,000 to the Commission, which shall be used for administrative cost of the Commission.

2. The Commission shall impose a "commission surcharge" per unit of waste received at any regional facility as provided in Article V.

3. Until such time as at least one regional facility is in operation and accepting waste for management, or to the extent that revenues under paragraphs (1) and (2) of this section are unavailable or insufficient to cover the approved annual budget of the Commission, each party state shall pay an apportioned amount of the difference between the funds available and the total budget in accordance with the following formula:

(a) 20 percent in equal shares;

(b) 30 percent in the proportion that the population of the party state bears to the total population of all party states, according to the most recent U.S. census;

(c) 50 percent in the proportion that the waste generated for management in each party state bears to the total waste generated for management in the region for the most recent calendar year in which reliable data are available, as determined by the Commission.

k. The Commission shall keep accurate accounts of all receipts and disbursements. An independent certified public accountant shall annually audit all receipts and disbursements of Commission accounts and funds and submit an audit report to the Commission. Such audit report shall be made a part of the annual report of the Commission required by Article IV(i)(3).

l. The Commission may accept, receive, utilize and dispose for any of its purposes and functions any and all donations, loans, grants of money, equipment, supplies, materials and services (conditional or otherwise) from any state or the United States or any subdivision or agency thereof, or interstate agency, or from any institution, person, firm or corporation. The nature, amount and condition, if any, attendant upon any donation, loans, or grant accepted pursuant to this paragraph, together with the identity of the donor, grantor, or lender, shall be detailed in the annual report of the Commission. The Commission shall by rule establish guidelines for the acceptance of donations, loans, grants of money, equipment, supplies, materials and services. This shall provide that no donor, grantor or lender may derive unfair or unreasonable advantage in any proceeding before the Commission.

m. The Commission herein established is a body corporate and politic, separate and distinct from the party states and shall be so liable for its own actions. Liabilities of the Commission shall not be deemed liabilities of the party states, nor shall members of the Commission be personally liable for action taken by them in their official capacity.

1. The Commission shall not be responsible for any costs or expenses associated with the creation, operation, closure, post-closure observation and maintenance, and institutional control of any regional facility, or any associated regulatory activities of the party states.

2. Except as otherwise provided herein, this compact shall not be construed to alter the incidence of liability of any kind for any act, omission, or course of conduct. Generators, shippers and carriers of wastes, and owners and operators of sites shall be liable for their acts, omissions, conduct, or relationships in accordance with all laws relating thereto.

n. The United States district courts in the District of Columbia shall have original jurisdiction of all actions brought by or against the Commission. Any such action initiated in a state court shall be removed to the designated United States district court in the manner provided by Act of June 25, 1948 as amended (28 U.S.C. § 1446). This section shall not alter the jurisdiction of the United States Court of Appeals for the District of Columbia Circuit to review the final administrative decisions of the Commission as set forth in the paragraph below.

o. The United States Court of Appeals for the District of Columbia Circuit shall have jurisdiction to review the final administrative decisions of the Commission.

1. Any person aggrieved by a final administrative decision may obtain review of the decision by filing a petition for review within 60 days after the Commission's final decision.

2. In the event that review is sought of the Commission's decision relative to the

designation of a host state, the Court of Appeals shall accord the matter an expedited review, and, if the Court does not rule within 90 days after a petition for review has been filed, the Commission's decision shall be deemed to be affirmed.

3. The courts shall not substitute their judgment for that of the Commission as to the decisions of policy or weight of the evidence on questions of fact. The Court may affirm the decision of the Commission or remand the case for further proceedings if it finds that the petitioners has been aggrieved because the finding, inferences, conclusions or decisions of the Commission are:

a. in violation of the Constitution of the United States;

b. in excess of the authority granted to the Commission by this compact;

c. made upon unlawful procedure to the detriment of any person;

d. arbitrary or capricious or characterized by abuse of discretion or clearly unwarranted exercise of discretion.

4. The Commission shall be deemed to be acting in a legislative capacity except in those instances where it decides, pursuant to its rules and regulations, that its determinations are adjudicatory in nature.

ARTICLE V. HOST STATE SELECTION AND DEVELOPMENT AND OPERATION OF REGIONAL FACILITIES

a. The Commission shall develop, adopt, maintain, and implement a regional management plan to ensure the safe and efficient management of waste within the region. The plan shall include the following:

1. a current inventory of all generators within the region;

2. a current inventory of all facilities within the region, including information on the size, capacity, location, specific waste being handled, and projected useful life of each facility;

3. consistent with considerations for public health and safety as defined by appropriate regulatory authorities, a determination of the type and number of regional facilities which are presently necessary and projected to be necessary to manage waste generated within the region;

4. reference guidelines, as defined by appropriate regulatory authorities, for the party states for establishing the criteria and procedures to evaluate locations for regional facilities.

b. The Commission shall develop and adopt criteria and procedures for reviewing a party state which volunteers to host a regional facility within its borders. These criteria shall be developed with public notice and shall include the following factors: the capability of the volunteering party state to host a regional facility in a timely manner and to ensure its post-closure observation and maintenance, and institutional control; and the anticipated economic feasibility of the proposed facility.

1. Any party state may volunteer to host a regional facility within its borders. The Commission may set terms and conditions to encourage a party state to volunteer to be the first host state.

2. Consistent with the review required above, the Commission shall, upon a two-thirds affirmative vote, designate a volunteering party state to serve as a host state.

c. If all regional facilities required by the regional management plan are not developed pursuant to section (b), or upon notification that an existing facility will be closed, or upon determination that an additional regional facility is or may be required, the Commission shall convene to consider designation of a host state.

1. The Commission shall develop and adopt procedures for designating a party state to be a host state for a regional facility. The Commission shall base its decision on the following criteria:

a. the health, safety and welfare of citizens of the party states as defined by the appropriate regulatory authorities;

b. the environmental, economic, and social effects of a regional facility on the party states;

The Commission shall also base its decision on the following criteria:

c. ecomonic benefits and costs;

d. the volumes and types of waste generated within each party state;

e. the minimization of waste transportation; and

f. the existence of regional facilities with the party states.

2. Following its established criteria and procedures, the Commission shall designate by a two-thirds affirmative vote a party state to serve as a host state. A current host state shall have the right of first refusal for a succeeding regional facility.

3. The Commission shall conduct such hearings and studies, and take such evidence and testimony as is required by its approved procedures prior to designating a host state. Public hearings shall be held upon request in each candidate host state prior to final evaluation and selection.

4. A party state which has been designated as a host state by the Commission and which fails to fulfull its obligations as a host state may have its privileges under the compact suspended or membership in the compact revoked by the Commission.

d. Each host state shall be responsible for the timely identification of a site and the timely development and operation of a regional facility. The proposed facility shall meet geologic, environmental and economic criteria which shall not conflict with applicable federal and host state laws and regulations.

1. To the extent not prohibited by federal law, a host state may regulate and license any facility within its borders.

2. To the extent not prohibited by Federal law, a host state shall ensure the safe operation, closure, postclosure observation and maintenance, and institutional control of a facility, including adequate financial assurances by the operator and adequate emergency response procedures. It shall periodically review and report to the Commission on the status of the post-closure and institutional control funds and the remaining useful life of the facility.

3. A host state shall solict comments from each party state and the Commission regarding the siting, operation, financial assurances, closure, post-closure observation and maintenance, and institutional control of a regional facility.

e. A host state intending to close a regional facility within its borders shall notify the Commission in writing of its intention and reasons therefore.

1. Except as otherwise provided, such notification shall be given to the Commission at least five years prior to the scheduled date of closure.

2. A host state may close a regional facility within its borders in the event of an emergency or if a condition exists which constitutes a substantial threat to public health and safety. A host state shall notify the Commission in writing within three days of its action and shall, within 30 working days, show justification for the closing.

3. In the event that a regional facility closes before an additional or new facility becomes operational, the Commission shall make interim arrangements for the storage or disposal of waste generated within the region until such time that a new regional facility is operational.

f. Fees and surcharges shall be imposed equitably upon all users of a regional facility, based upon criteria established by the Commission.

1. A host state shall, according to its lawful administrative procedures approve fee schedules to be charged to all users of the regional facility within its borders. Except as provided herein, such fee schedules shall be established by the operator of a regional facility, under applicable state regulations, and shall be reasonable and sufficient to cover all costs related to the development, operation, closure, post-closure observation and maintenance, institutional control of the regional facility. The host state shall determine a schedule for contributions to the post-closure observation and maintenance, and institutional control funds. Such fee schedules shall not be approved unless the Commission has been given reasonable opportunity to review and make recommendations on the proposed fee schedules.

2. A host state may, according to its lawful administrative procedures, impose a state surcharge per unit of waste received at any regional facility within its borders. The state surcharge shall be in addition to the fees charged for waste management. The surcharge shall be sufficient to cover all reasonable costs associated with administration and regulation of the facility. The surcharge shall not be established unless the Commission has been provided reasonable opportunity to review and make recommendations on the proposed state surcharge.

3. The Commission shall impose a commission surcharge per unit of waste received at any regional facility. The total monies collected shall be adequate to pay the costs and expenses of the Commission and shall be remitted to the Commission on a timely basis as determined by the Commission. The surcharge may be increased or decreased as the Commission deems necessary.

4. Nothing herein shall be construed to limit the ability of the host state, or the political subdivision in which the regional facility is situated, to impose surcharges for purposes including, but not limited to, host community compensation and host community development incentives. Such surcharges shall be reasonable and shall not be imposed unless the Commission has been provided reasonable opportunity to review and make recommendations on the proposed surcharge. Such surcharge may be recovered through the approved fee and surcharge schedules provided for in this section.

ARTICLE VI. OTHER LAWS AND REGULATIONS

a. Nothing in this compact shall be construed to abrogate or limit the regulatory responsibility or authority of the U.S. Nuclear Regulatory Commission or of an Agreement State under Section 274 of the Atomic Energy Act of 1954, as amended.

b. The laws or portions of those laws of a party state that are not inconsistent with this compact remain in full force.

c. Nothing in this compact shall make unlawful the continued development and operation of any facility already licensed for development or operation on the date this compact becomes effective.

d. No judicial or administrative proceeding pending on the effective date of the compact shall be affected by the compact.

e. Except as provided for in Article III(b)(2) and (c)(3), this compact shall not affect the relations between and the respective internal responsibilities of the government of a party state and its subdivisions.

f. The generation, treatment, storage, transportation, or disposal of waste generated by the atomic energy defense activities of the federal government, as defined in P.L. 96-573, or federal research and development activities are not affected by this compact.

g. To the extent that the rights and powers of any state or political subdivision to license and regulate any facility within its orders and to impose taxes, fees, and surcharges on the waste managed at that regional facility do not operate as an unreasonable impediment to the transportation, treatment or disposal of waste, such rights and powers shall not be diminished by this compact.

h. No party state shall enact any law or regulation or attempt to enforce any measure which is inconsistent with this compact. Such measures may provide the basis for the Commission to suspend or terminate a party state's membership and privileges, under this compact.

i. All laws and regulations, or parts thereof of any party state or subdivision or instrumentality thereof which are inconsistent with this compact are hereby repealed and declared null and void. Any legal right, obligation, violation or penalty arising under such laws or regulations prior to the enactment of this compact, or not in conflict with it, shall not be affected.

j. Subject to Article III(c)(2), no law or regulation of a party state or subdivision or instrumentality thereof may be applied so as to restrict or make more costly or inconvenient access to any regional facility by the generators of another party state than for the generators of the state where the facility is situated.

k. No law, ordinance, or regulation of any party state or any subdivision or instrumentality thereof shall prohibit, suspend, or unreasonably delay, limit or restrict the operation of a siting or licensing agency in the designation, siting, or licensing of a regional facility. Any such provision in existence at the time of ratification of this compact is hereby repealed.

ARTICLE VII. ELIGIBLE PARTIES, WITHDRAWAL, REVOCATION, ENTRY INTO FORCE, TERMINATION

a. The initially eligible parties to this compact shall be the eleven states of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont. Initial eligibility will expire June 30, 1984.

b. Each state eligible to become a party state to this compact shall be declared a party state upon enactment of this compact into law by the state, repeal of all statutes or statutory provisions that pose unreasonable impediments to the capability of the state to host a regional facility in a timely manner, and upon payment of the fees requred by Article IV(j)(1). An eligible state may become a party to this compact by an executive order by the governor of the state and upon payment of the fees required by Article IV(j)(1). However, any state which becomes a party state by executive order shall cease to be a party state upon the final adjournment of the next general or regular session of its legislature, unless this compact has by then been enacted as a statute by the state and all statutes and statutory provisions that conflict with the compact have been repealed.

c. The compact shall become effective in a party state upon enactment by that state. It shall not become initially effective in the region until enactment into law by three party states and consent given to it by the Congress.

d. The first three states eligible to become party states to this compact which adopt this compact into law as required in Article VII(b) shall immediately, upon the appointment of their Commission members, constitute themselves as the Northeast Interstate Low-Level Radioactive Waste Commission. They shall cause legislation to be introduced in the Congress which grants the consent of the Congress to this compact, and shall do those things necessary to organize the Commission and implement the provisions of this compact.

1. The Commission shall be the judge of the qualifications of the party states and of its members and of their compliance with the conditions and requirements of this compact and of the laws of the party states relating to the enactment of this compact.

2. All succeeding states eligible to become party states to this compact shall be declared party states pursuant to the provisions of section (b) of this Article.

e. Any state not expressly declared eligible to become a party state to this compact in section (a) of this Article may petition the Commission to be declared eligible. The Commission may establish such conditions as it deems necessary and appropriate to be met by a state requesting eligibility as a party state to this compact pursuant to the provisions of this section, including a public hearing on the application. Upon satisfactorily meeting such conditions and upon the affirmative vote of two-thirds of the Commission, including the affirmative vote of the representatives of the host states in which any affected regional facility is located, the petitioning state shall be eligible to become a party state to this compact and may become a party state in the same manner as those states declared eligible in section (a) of this Article.

f. No state holding membership in any other regional compact for the management of low-level radioactive waste may become a member of this compact.

g. Any party state which fails to comply with the provisions of this compact or to fulfill its obligations hereunder may have its privileges suspended or, upon a two-thirds vote of the Commission, after full opportunity for hearing and comment, have its membership in the compact revoked. Revocation shall take effect one year from the date the affected party state receives written notice from the Commission of its action. All legal rights of the affected party state established under this compact shall cease upon the effective date of revocation, except that any legal obligations of that party state arising prior to revocation will not cease until they have been fulfilled. As soon as practicable after a Commission decision suspending or revoking party state status, the Commission shall provide written notice of the action and a copy of the resolution to the governors and the presiding officer of each body of the state legislatures of the party states, and to chairmen of the appropriate committees of the Congress.

h. Any party state may withdraw from this compact by repealing its authorization legislation, and all legal rights under this compact of the party state cease upon repeal. However, no such withdrawal shall take effect until five years after the governor of the withdrawing state has given notice in writing of such withdrawal to the Commission and to the governor of each party state. No withdrawal shall affect any liability already incurred by or chargeable to a party state prior to that time.

1. Upon receipt of the notification, the Commission shall, as soon as practicable, provide copies to the governors and the presiding officer of each body of the state legislatures of the party states, and to the chairmen of the appropriate committees of the Congress.

2. A regional facility in a withdrawing state shall remain available to the region for five years after the date the Commission receives written notification of the intent to withdraw or until the prescheduled date of closure, whichever occurs first.

i. This compact may be terminated only by the affirmative action of the Congress or by the repeal of all laws enacting the compact in each party state. The Congress may by law withdraw its consent every five years after the compact takes effect.

1. The consent given to this compact by the Congress shall extend to any future admittance of new party states under sections (b) and (e) of this Article.

2. The withdrawal of a party state from this compact under section (h) or the revocation of a state's membership in this compact under section (g) of this Article shall not affect the applicability of the compact to the remaining party states.

ARTICLE VIII. PENALTIES

a. Each party state, consistent with federal and most state regulations and laws, shall enforce penalties against any person not acting as an official of a party state for violation of this compact in the party state. Each party state acknowledges that the shipment to a host state of waste packaged or transported in violation of applicable laws and regulations can result in the imposition of sanctions by the host state. These sanctions may include, but are not limited to, suspension or revocation of the violator's right to access to the facility in the host state.

b. Without the express approval of the Commission, it shall be unlawful for any person to dispose of any low-level waste within the region except at a regional facility; provided, however, that this restriction shall not apply to waste which is permitted by applicable federal or state regulations to be discarded without regard to its radioactivity.

c. Unless specifically approved by the Commission and affected host state(s) pursuant to Article IV, it shall be a violation of this compact for: 1) any person to deposit at a regional facility waste not generated within the region; 2) any regional facility to accept waste not generated within the region; and 3) any person to export from the region waste generated within the region.

d. Primary responsibility for enforcing provisions of the law will rest with the affected state or states. The Commission, upon a two-thirds vote of its members, may bring action to seek enforcement or appropriate remedies against violators of the provisions and regulations for this compact as provided for in Article IV.

ARTICLE IX. COMPENSATION PROVISIONS

a. The responsibility for ensuring compensation and clean-up during the operational

and post-closure periods rests with the host state, as set forth herein.

1. The host state shall ensure the availability of funds and prodecures for compensation of injured persons, including facility employees, and property damage (except any possible claims for diminution of property values) due to the existence and operation of a regional facility, and for clean-up and restoration of the facility and surrounding areas.

2. The state may satisfy this obligation by requiring bonds, insurance, compensation funds, or any other means or combination of means, imposed either on the facility operator or assumed by the state itself, or both. Nothing in this article alters the liability of any person or governmental entity under applicable state and federal laws.

b. The Commission shall provide a means of compensation for persons injured or property damaged during the institutional control period due to the radioactive and waste management nature of the regional facility. This responsibility may be met by a special fund, insurance, or other means.

1. The Commission is authorized, at its discretion, to impose a waste management surcharge, to be collected by the operator or owner of the regional facility; to establish a separate insurance entity, formed by but separate from the Commission itself, but under such terms and conditions as it decides, and exempt from state insurance regulation; to contract with this company or other entity for coverage; or to take any other measures, or combination of measures, to implement the goals of this section.

2. The existence of this fund or other means of compensation shall not imply any liability by the Commission, the non-host party states, or any of their officials and staff, which are exempted from liability by other provisions of this compact. Claims or suits for compensation shall be directed against the fund, the insurance company, or other entity, unless the Commission, by regulation, directs otherwise.

c. Not withstanding any other provisions, the Commission fund, insurance, or other means of compensation shall also be available for third party relief during the operational and post-closure periods, as the Commission may direct, but only to the extent that no other funds, insurance, tort compensation, or other means are available from the host state or other entities, under section a. of this Article or otherwise; provided, that this Commission contribution shall not apply to clean-up or restoration of the regional facility and its environs during the operational and post-closure period.

d. The liability of the Commission's fund, insurance entity, or any other means of compensation shall be limited to the amount currently contained therein; provided that the Commission may set some lower limit to ensure the integrity and availability of the fund or other entity for liability.

ARTICLE X. SEVERABILITY AND CONSTRUCTION

The provisions of this compact shall be severable, and if any phrase, clause, sentence or provision of this compact is declared by a federal court of competent jurisdiction to be contrary to the Constitution of the United States or the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any other government, agency, person or circumstance shall not be affected thereby. The provisions of this compact shall be liberally construed to give effect to the purposes thereof.

Amend the title so as to read: "To amend the Low-Level Radioactive Waste Policy Act to improve procedures for the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste; to grant the consent of the Congress to certain interstate compacts on low-level radioactive waste; and for other purposes.".

DISTRICT OF COLUMBIA REVENUE BONDS

METZENBAUM AMENDMENT NO. 1430

Mr. BYRD (for Mr. METZENBAUM) proposed an amendment to the bill (H.R. 3718) to waive the period of congressional review for certain District of Columbia acts authorizing the issuance of revenue bonds; as follows:

On page 3 strike lines 17 through 20.

On page 3 strike "5" on lines 121 and 24 and insert in lieu thereof "4".

On page 4 strike "5" on line 2 and insert in lieu thereof "4".

CHANGES IN LAW AFFECTING COAST GUARD

DANFORTH AMENDMENT NO. 1431

Mr. DOLE (for Mr. DANFORTH) proposed an amendment to the bill (H.R. 2466) to make miscellaneous changes in law affecting the U.S. Coast Guard, and for other purposes; as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

That subtitle II of title 46, United States Code, is amended as follows:

(1) In section 2101(14)(C), strike "Material" and substitute "Materials".

(2) Section 2101(21) is amended as follows:

(A) In subclause (A)(ii), strike "crewmember." and substitute "crewmember or other individual engaged in the business of the vessel who has not contributed consideration for carriage on board the vessel.".

(B) Strike subclause (B)(v)-(vii) and substitute the following:

"(v) a guest on board a vessel being operated only for pleasure who has not contributed consideration for carriage on board; or

"(vi) an individual on board a towing vessel of at least 50 gross tons who has not contributed consideration for carriage on board.".

(C) At the end, add the following new subclause:

"(F) on a sailing school vessel, means an individual carried on the vessel except—

"(i) the owner or representatives of the owner;

"(ii) the master or a crewmember engaged in the business of the vessel who has not contributed consideration for carriage and who is paid for services;

"(iii) an employee of the owner of the vessel engaged in the business of the owner, except when the vessel is operating under a demise charter;

"(iv) an employee of the demise charterer of the vessel engaged in the business of the demise charterer;

"(v) a guest on board the vessel who has not contributed consideration for carriage on board; or

"(vi) a sailing school instructor or sailing school student.",

(D) Strike "or a sailing school vessel," in clause (B).

(3) In section 3302(i)(5), strike "charter" and substitute "charterer".

(4) At the end of section 3302, add the following new subsection:

"(k) Only the boiler, engine, and other operating machinery of a steam vessel that is a recreational vessel of not more than 65 feet overall in length are subject to inspection under section 3301(9) of this title.".

(5)(A) Section 3304 is amended as follows:

(i) In the section catchline, strike "Carrying" and substitute "Transporting".

(ii) In subsection (a), strike "carrying cargo that carries" and "vessel." and substitute "transporting cargo that transports" and "vessel if the vessel is otherwise subject to inspection under this chapter.", respectively.

(iii) In subsection (b), strike "Before an individual in addition to the crew is carried" and substitute "Except when subsection (e) of this section applies, before an individual in addition to the crew is transported".

(iv) In subsection (c), strike "The privilege" and substitute "A privilege".

(v) Add at the end the following new subsection:

"(e) The Secretary may by regulation allow individuals in addition to the crew to be transported in an emergency or under section 2304 of this title.".

(B) In item 3304 in the analysis of chapter 33, strike, "Carrying" and substitute "Transporting".

(6) In section 3318(f), before clause (1), strike "then" wherever it appears and substitute "than".

(7)(A) Section 3503 is amended as follows:

(i) Insert "(a)" at the beginning of the section.

(ii) Strike the last sentence and substitute "Before November 1, 1993, this section does not apply to a vessel in operation before January 1, 1968, and operating only on the inland rivers.".

(iii) Add at the end the following:

"(b)(1) When a vessel is exempted from the fire-retardant standards of this section—

"(A) the owner or managing operator of the vessel shall notify prospective passengers that the vessel does not comply with applicable fire safety standards due primarily to the wooden construction of passenger berthing areas;

"(B) the owner or managing operator of the vessel may not disclaim liability to a passenger for death, injury, or any other loss caused by fire due to the negligence of the owner or managing operator; and

"(C) the penalties provided in section 3504(c) of this title apply to a violation of this subsection.

"(2) The Secretary shall prescribe regulations under this subsection on the manner in which prospective passengers are to be notified.".

(B) Until the regulations required by clause (7) of this section become effective, the owner or managing operator shall notify prospective passengers in all promotional literature and on each ticket that the vessel does not comply with those standards due

primarily to the wooden construction of passenger berthing areas.

(8) In section 3714(a)(4), strike "charter" and substitute "charterer".

(9) Section 4308 is amended by striking "operator" wherever it appears and substituting "individual in charge".

(10) In section 7111, strike "Part" and substitute "part".

(11) In section 7312(e), strike "able seaman-limited" and substitute "able seamen-limited".

(12) Section 8104(k) is amended by striking "watchers" and substituting "watches".

(13) In section 8502(a)(4)(A), strike "Part" and substitute "part".

(14) Chapter 89 is amended as follows:

(A) In item 8903 in the chapter analysis, strike "Uninspected" and substitute "Self-propelled, uninspected".

(B) In the catchline of section 8903, strike "Uninspected" and substitute "Self-propelled, uninspected".

(C) In the text of section 8903, strike "An" and substitute "A self-propelled,".

(15) In section 10709(a)(1), before clause (A)—

(A) strike "then $1,500 in value, and" and substitute "than $1,500 in value, the court,"; and

(B) strike "wages, the court" and substitute "wages,".

(16) Section 12122(a) is amended by adding at the end the following sentence: "Each day of a continuing violation is a separate violation.".

(17) In section 13102(a)(4), strike "coordinate carrying the State" and substitute "coordinate carrying out the State".

(18) Section 13104(b) is amended by inserting after "Secretary" the words "for State recreational boating safety programs".

(19) Chapter 111 is amended as follows:

(A) At the end of the chapter analysis, add the following new item:

"11112. Master's lien for wages.".

(B) At the end of the chapter, add the following new section:

"S11112. Master's lien for wages

"The master of a documented vessel has the same lien against the vessel for the master's wages and the same priority as any other seaman serving on the vessel.".

SEC. 2. (a) The Coast Guard may enter into a lease in excess of one fiscal year to acquire a site on the State pier in New Bedford, Massachusetts, for construction of maintenance assistance team and vessel support facilities on that pier.

(b) Any lease under this section is effective only to the extent that amounts are provided for in apporpriations laws.

(c) Notwithstanding section 322 of the Act of June 30, 1932 (40 U.S.C. 278a), and beginning in fiscal year 1986, the Coast Guard may spend appropriated amounts for the construction of fixed facilities and improvements on that portion of the State pier leased from Massachusetts for the use of a maintenance assistance team and Coast Guard vessels.

SEC. 3. Notwithstanding any other law, the Coast Guard Yard, Curtis Bay, Maryland, and the Coast Guard Aircraft Repair and Supply Center, Elizabeth City, North Carolina, are exempt from the statutory and administrative personnel ceilings through September 30, 1988.

SEC. 4. The body of water known as Lawyer's Ditch located at block 5000 in the city of Newark, County of Essex, New Jersey, is declared to be a nonnavigable waterway of the United States within the meaning of the General Bridge Act of 1946 (33 U.S.C. 525 et seq.).

SEC. 5. Notwithstanding the last sentence of section 81 of title 14 of the United States Code, the Coast Guard may not, except for the installation of fixed aids to navigation, carry out by contract the determination of the location, or the placement, or aids to maritime navigation in the Intercoastal Waterway in New Jersey.

SEC. 6. The Coast Guard may enter into any agreement or letter of intent with a municipal utility within the Seventeenth Coast Guard District to provide electricity to a Coast Guard facility without complying with the provisions of section 14 of Public Law 98-557.

SEC. 7. (a) There is established a National Offshore Vessel Operators Safety Advisory Committee (hereinafter in this section referred to as the "Committee"). The Committee shall advise, consult with, and make recommendations to the Secretary of the department in which the Coast Guard is operating (hereinafter in this section referred to as the "Secretary") on matters relating to the safety aspects of offshore oil, gas, and other mineral operations subject to regulation by the Secretary. The Secretary shall, whenever practicable, consult the Committees concerning proposed or desirable actions affecting the safety of such offshore operations. Any advice or recommendation made by the Committee to the Secretary shall reflect the independent judgment of the Committee on the matter concerned. The Committee is authorized to make available to Congress any information, advice, and recommendations which the Committee is authorized to give to the Secretary. The Committee shall meet at the call of the Secretary, but in any event not less than once during each calendar year. All proceedings of the Committee shall comply with the Federal Advisory Committee Act (5 U.S.C. App. 1 et seq.).

(b)(1) The Committee shall consist of fifteen members who have particular expertise, knowledge, and experience regarding the transportation and other technology, equipment, and techniques that are used, or are being developed for use, in the exploration for, or the recovery of, offshore oil, gas, or other mineral resources, as follows:

(A) Two members representing enterprises engaged in the production of oil, gas, or other mineral resources, except that not more than one member may represent companies included on the list of restricted joint bidders prepared by the Department of the Interior;

(B) Two members representing enterprises specializing in offshore drilling;

(C) Two members representing enterprises specializing in the supply of offshore oil, gas, or other mineral exploration or recovery operations by water;

(D) Three members representing general support services for offshore oil and gas activities, including construction, diving, geophysical, and helicopter services;

(E) Two members representing individuals employed in offshore operations;

(F) Two members representing environmental interests; and

(G) Two members representing the general public.

(2) The Secretary shall appoint the members of the Committee after first soliciting nominations by notice published in the Federal Register. The Secretary may request the head of any other Federal agency or department to designate a representative to advise the Committee on matters within the jurisdiction of that agency or department.

(3) The Committee shall elect, by majority vote at its first meeting, one of the members of the Committee as the Chairman and one of the members as the Vice Chairman. The Vice Chairman shall act as Chairman in the absence or incapacity of, or in the event of a vacancy in, the Office of the Chairman.

(4) Terms of members appointed to the Committee shall be for three years, except that the terms of those members first appointed under subsection (c)(1)(A), (B), and (C) shall be for two years. The Secretary shall, not less often than once a year, publish notice in the Federal Register for solicitation of nominations for membership on the Committee.

(c)(1) Members of the Committee who are not officers or employees of the United States shall serve without pay and members of the Committee who are officers or employees of the United States shall receive no additional pay on account of their service on the Committee. While away from their homes or regular places of business, members of the Committee may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code. The Secretary shall furnish to the Committee an executive secretary and such secretarial, clerical, and other services as are considered necessary for the conduct of its business. There are authorized to be appropriated such sums as may be necessary to implement the provisions of this section.

(2) Unless extended by subsequent Act of Congress, the Committee shall terminate five years from the date of enactment of this section.

SEC. 8. Bayou Lafourche, in the State of Lousiana, between Canal Boulevard, city of Thibodaux, Parish of Lafourche and the Southern Pacific Railroad bridge crossing the bayou, city of Thibodaux, Parish of Lafourche, is hereby declared to be a nonnavigable waterway of the United States within the meaning of the General Bridge Act of 1946 (33 U.S.C. 525 et seq.)

SEC. 9. Notwithstanding sections 12105, 12106, 12107 and 12108 of title 46, United States Code, and section 27 of the Merchant Marine Act, 1920 (46 U.S.C. App. 883), as applicable on the date of enactment of this Act, the Secretary of the department in which the Coast Guard is operating may issue a certificate of documentation for the following vessels: Marilyn, Maryland registration number MD 3533 AA; Royal Star, Michigan registration number MC 9707 J; Alaskan Shores, United States official number 603879; Shearwater, United States official number 260827; Gypsy Rose, California registration number CF 4291 HF; Eliminator, United States official number 507572; Puka Kai, United States official number 677462; Lobster House, Panama registration number 494 Pext; Jane E., Bahamian official number 315924; and Diane M., Bahamian official number 315925, except that such vessels Jane E. and Diane M. may be operated under such documentation only in the waters of the Atlantic Ocean and the Gulf of Mexico.

SEC. 10. Any use of expenditures of funds by the Coast Guard related to the alternation of the Burlington, Northern Railroad Bridge at mile 6.9 on the Willamette River in Portland, Oregon shall be subject to the first six sections of the Act of March 3, 1931 (40 U.S.C. 276a through 276a-5).

SEC. 11. Section 2(a) of the Act entitled "An Act to facilitate increase enforcement by the Coast Guard of laws relating to the

importation of controlled substances, and for other purposes", approved September 15, 1980 (21 U.S.C. 955b(a)), is amended by inserting immediately before the period the following:", except that an event otherwise qualifying as an arrangement under such section does not lose that qualification by the fact that consent to, or the terms of, such arrangement are communicated by radio, telephone, or other similar means, or by how specific such arrangement is as to the vessel to which such arrangement applies".

SEC. 12. The Coast Guard may enter into a cost-sharing arrangement with the City of Cape May, New Jersey under which the City of Cape May will provide necessary roadway improvement on and along Pennsylvania Avenue between Pittsburg and Buffalo Avenues, as abutted by housing owned by the Coast Guard. For purposes of entering into such an arrangement, the Coast Guard may expend from previously-appropriated funds an amount not to exceed $200,000 on a nonrecurring basis.

SEC. 13. Section 2103 of title 46, United States Code, is amended by striking all after "subtitle" the third time it appears and substituting". The Secretary may prescribe regulations to carry out the provisions of this subtitle.".

SEC. 14. Section 4370(a) of the Revised Statutes of the United States (46 U.S.C. App. 316(a)) is amended—

(1) by striking all from "a certificate of registry," through "the Act of June 7, 1918, as amended (U.S.C., 1934 edition, Supp. IV, title 46, sec. 288)," and substituting "a certificate of documentation issued under sections 12106 or 12107 of title 46, United States Code,"; and

(2) by striking "a vessel of foreign registry, or a vessel in distress," and substituting "a vessel in distress".

SEC. 15. Section 3 of the Shipping Act of 1984 (46 U.S.C. App. 1702) is amended—

(1) in paragraph 6, (A) by striking the period at the end of subparagraph (B) and substituting a comma, and (B) by adding at the end thereof the following: "except that the term does not include a common carrier engaged in ocean transportation by ferry boat, ocean tramp, or chemical parcel-tanker. As used in this paragraph, 'chemical parcel-tanker' means a vessel whose cargo-carrying capability consists of individual cargo tanks for bulk chemicals that are a permanent part of the vessel, that have segregation capability with piping systems to permit simultaneous carriage of several bulk chemical cargoes with minimum risk of cross-contamination, and that has a valid certificate of fitness under the International Maritime Organization Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk."; and

(2) in paragraph (18), by striking all from the semi-colon and substituting a period.

SEC. 16. (a) As used in this section, the term—

(1) "commercial fishing industry vessel" means a fishing vessel, fish processing vessel, or fish tender vessel, as those terms are defined in section 2101 of title 46, United States Code;

(2) "Committee" means the Commercial Fishing Industry Vessel Safety Advisory Committee established in subsection (b) of this section; and

(3) "Secretary" means the Secretary of the department in which the Coast Guard is operating.

(b) There is established a Commercial Fishing Industry Vessel Safety Advisory Committee as an advisory committee of the United States Government reporting to the Secretary.

(c)(1) The Committee shall advise, consult with, and make recommendations to the Secretary on matters relating to commercial fishing industry vessels, including—

(A) navigation safety;

(B) safety equipment and procedures;

(C) marine insurance;

(D) vessel design, construction, maintenance, and operation; and

(E) personnel qualifications and training.

(2) The Secretary, and the Secretary of Commerce, shall use the information, advice, and recommendations of the Committee in consulting with other agencies and the public or in formulating policy regarding commercial fishing industry vessels.

(3) The Committee shall meet at the call of the Secretary, but not less often than once during each calendar year.

(4) Any advice or recommendation made by the Committee shall reflect the independent judgment of the Committee on the matter concerned.

(5) The Committee may make available to Congress any information, advice, and recommendations which the Committee is authorized to give to the Secretary.

(d)(1) The Committee shall consist of seventeen members with particular expertise, knowledge, and experience regarding the commercial fishing industry, as follows:

(A) ten members from the commercial fishing industry who reflect a regional and representational balance, and have experience in the operation of commercial fishing industry vessels, or have experience as a crew member or processing line worker on a commercial fishing industry vessel;

(B) two members from each of the following:

(i) underwriters engaged in insuring commercial fishing industry vessels; and

(ii) the general public, including, whenever possible, a member of a national organization composed of commercial fishing industry vessel and marine insurance interests; and

(C) one member from each of the following—

(i) naval architects or marine surveyors;

(ii) manufacturers of fishing industry vessel equipment; and

(iii) education or training professionals related to commercial fishing industry vessel safety or personnel qualifications.

(2) At least once each year, the Secretary shall publish a notice in the Federal Register and in newspapers of general circulation in coastal areas soliciting nominations for membership on the Committee. After timely notice is published, the Secretary shall appoint the members of the Committee. A member may be reappointed to any number of terms.

(3) The term of a member is three years, except that—

(A) initially, one-third of the members shall serve a term of one year and one-third of the members shall serve a term of two years, to be determined by lot at the first meeting of the Committee;

(B) initially, terms may be adjusted to coincide with the Government's fiscal year; and

(C) if a vacancy occurs, the Secretary shall appoint a member to fill the remainder of the vacated term.

(4) The Committee shall elect one of its members as the Chairman and one of its members as the Vice Chairman. The Vice Chairman shall act as Chairman in the absence or incapacity of, or in the event of a vacancy in the office of, the Chairman.

(5) The Secretary and the Secretary of Commerce shall, and any other interested agency may, designate a representative to participate as an observer with the Committee. These representatives shall, as appropriate, report to and advise the Committee on matters relating to commercial fishing industry vessels under the jurisdiction of their respective departments. The Secretary's designated representative shall act as executive secretary for the Committee and perform the duties specified in section 10(c) of the Federal Advisory Committee Act (5 U.S.C. App. 10(c)).

(e)(1) The Secretary shall, whenever practicable, except regarding issues which could compromise national security, consult with the Committee concerning the following actions affecting commercial fishing industry vessels—

(A) proposing legislation;

(B) proposing or publishing a regulation;

(C) authorizing or conducting research or a study; or

(D) taking any other major action of the United States Government relating to the Committee's purpose and duties as set forth in subsection (c)(1) of this section.

(2) Consultation with the Committee shall be deemed to satisfy all requirements of title 46, United States Code, for consulting with representatives of the private sector having experience in the operation of commercial fishing industry vessels.

(f)(1) Except as otherwise provided in paragraph (3) of this subsection, a member of the Committee, when attending meetings of the Committee or when otherwise engaged in the business of the Committee, shall serve without pay. While away from their homes or regular places of business, members of the Committee may be allowed travel or transportation expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code.

(2) Any payment made under this subsection shall not render a member of the Committee a member of the uniformed services (as defined in section 101(3) of title 37, United States Code), or an officer or employee of the United States for any purpose.

(3) A member of the Committee who is a member of the uniformed services or an officer or employee of the United States may not receive additional pay on account of such member's service on the Committee, but a member of the Committee who is a member of the uniformed services shall be allowed travel or transportation expenses under section 5703 of title 5, United States Code, unless such member is otherwise entitled to such expenses under any other provision of law.

(4) The Secretary shall furnish the Committee an executive secretary and such secretarial, clerical and other services as are necessary for the conduct of the Committee's business.

(g)(1) The Committee shall terminate on September 30, 1991.

(2) Two years prior to the date of its termination, the Committee shall submit to the Congress its recommendation as to whether the Committee should be renewed and continued beyond such termination date.

(h) There are authorized to be appropriated such amounts as may be necessary to carry out the provisions of this section.

SEC. 17. Notwithstanding the provisions of the Act entitled "An Act to authorize the

Secretary of Commerce to sell two obsolete vessels to Coast Line Company and for other purposes", approved June 3, 1980 (Public Law 96-260; 94 Stat. 435), the Secretary of Transportation shall permit the vessels Pictor, United States official number 243529, Procyon, United States official number 244022, and Zelima, United States official number 248207, to be scrapped in the foreign market if—

(1) the purchaser of such vessels and the country in which such vessels are to be scrapped are acceptable to the Secretary of Transportation; and

(2) the seller of any such vessel agrees in writing to reimburse the United States a reasonable amount, acceptable to the Secretary of Transportation, of not less than one-half of the profits realized from such sale.

SEC. 18. Notwithstanding any other provision of law or any agreement with the United States Government, the vessels Paul Bunyan, United States official number 602272 and John Henry, United States official number 599294, may be sold to a foreign purchaser or purchasers if—

(1) the person desiring to sell the vessel submits to the Secretary of Transportation and the Secretary of the Navy a written offer under which the Secretary of Transportation may elect to acquire either or both vessels for the National Defense Reserve Fleet or the Secretary of the Navy may elect to acquire either or both vessels for the Ready Reserve Fleet, under the same terms and conditions as those offered by the foreign purchaser or purchasers; and

(2) neither Secrtary elects to acquire the vessel within 60 days after the date on which a written offer is submitted to the Secretaries under paragraph (1) of this subsection.

SEC. 19. The Port of Huston Authority bridge over Greens Bayou approximately two and eight-tenths miles upstream of the confluence of Greens Bayou, Texas and the Houston Ship Channel is declared to be a lawful bridge for all purposes of the Act entitled "An Act to provide for the alteration of certain bridges over navigable waters of the United States, for the apportionment of the cost of such alterations between the United States and the owners of such a bridge, and for other purposes", approved June 21, 1940 (33 U.S.C. 511 et seq.). The Secretary of the department in which the Coast Guard is operating is authorized to reimburse the owner of the bridge for work done prior to the date of enactment of this section that would be the responsibility of the United States under the Act of June 21, 1940 (33 U.S.C. 511 et seq.) if performed after the date of enactment of this section, except that such reimbursement shall not exceed $450,000.

SEC. 20. Notwithstanding any other provision of law or of prior contract with the United States, the United States flag tug Moir, official Coast Guard number 60018, shall not be subject to the requirements of section 506 of the Merchant Marine Act, 1936 (46 U.S.C. App. 1156).

CIVILIAN TRAVEL EXPENSES

STEVENS (AND WARNER) AMENDMENT NO. 1432

Mr. DOLE (for Mr. STEVENS, for himself and Mr. WARNER) proposed an amendment to the bill (S. 1840) to amend titles 5 and 39, United States Code, to revise the authority relating to the payment of subsistence allowances to Government employees for periods of official travel, and for other purposes; as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. This Act may be cited as the "Federal Civilian Employee and Contractor Travel Expenses Act of 1985".

TITLE I—TRAVEL EXPENSES OF FEDERAL CIVILIAN EMPLOYEES

SEC. 101. Section 5701(4) of title 5, United States Code, is amended to read as follows:

"(4) 'per diem allowance' means a daily payment instead of actual expenses for subsistence and fees or tips to porters and stewards;".

SEC. 102. (a) Section 5702 of title 5, United States Code, is amended by striking out subsections (a), (b), (c), and (d) and inserting in lieu thereof the following:

"(a)(1) Under regulations prescribed pursuant to section 5707 of this title, an employee, when traveling on official business away from the employee's designated post of duty, or away from the employee's home or regular place of business (if the employee is described in section 5703 of this title), is entitled to any one of the following:

"(A) a per diem allowance at a rate not to exceed that established by the Administrator of General Services for travel within the continental United States, and by the President or his designee for travel outside the continental United States;

"(B) reimbursement for the actual and necessary expenses of official travel not to exceed an amount established by the Administrator for travel within the continental United States or an amount established by the President or his designee for travel outside the continental United States; or

"(C) a combination of payments described in subparagraphs (A) and (B) of this paragraph.

"(2) Any per diem allowance or maximum amount of reimbursement shall be established, to the extent feasible, by locality.

"(3) For travel consuming less than a full day, the payment prescribed by regulation shall be allocated in such manner as the Administrator may prescribe.

"(b)(1) Under regulations prescribed pursuant to section 5707 of this title, an employee who is described in subsection (a) of this section and who abandons the travel assignment prior to its completion—

"(A) because of an incapacitating illness or injury which is not due to the employee's own misconduct is entitled to reimbursement for expenses of transportation to the employee's designated post of duty, or home or regular place of business, as the case may be, and to payments pursuant to subsection (a) of this section until that location is reached; or

"(B) because of a personal emergency situation (such as serious illness, injury, or death of a member of the employee's family, or an emergency situation such as fire, flood, or act of God), may be allowed, with the approval of an appropriate official of the agency concerned, reimbursement for expenses of transportation to the employee's designated post of duty, or home or regular place of business, as the case may be, and payments pursuant to subsection (a) of this section until that location is reached.

"(2)(A) Under regulations prescribed pursuant to section 5707 of this title, an employee who is described in subsection (a) of this section and who, with the approval of an appropriate official of the agency concerned, interrupts the travel assignment prior to its completion for a reason specified in subparagraph (A) or (B) of paragraph (1) of this subsection, may be allowed (subject to the limitation provided in subparagraph (B) of this paragraph)—

"(i) reimbursement for expenses of transportation to the location where necessary medical services are provided or the emergency situation exists,

"(ii) payments pursuant to subsection (a) of this section until that location is reached, and

"(iii) such reimbursement and payments for return to such assignment.

"(B) The reimbursement which an employee may be allowed pursuant to subparagraph (A) of this paragraph shall be the employee's actual costs of transportation to the location where necessary medical services are provided or the emergency exists, and return to assignment from such location, less the costs of transportation which the employee would have incurred had such travel begun and ended at the employee's designated post of duty, or home or regular place of business, as the case may be. The payments which an employee may be allowed pursuant to subparagraph (A) of this paragraph shall be based on the additional time (if any) which was required for the employee's transportation as a consequence of the transportation's having begun and ended at a location on the travel assignment (rather than at the employee's designated post of duty, or home or regular place of business, as the case may be).

"(3) Subject to the limitations contained in regulations prescribed pursuant to section 5707 of this title, an employee who is described in subsection (a) of this section and who interrupts the travel assignment prior to its completion because of an incapacitating illness or injury which is not due to the employee's own misconduct is entitled to payments pursuant to subsection (a) of this section at the location where the interruption occurred.".

(b) Section 5702 of such title is further amended by redesignating subsection (e) as subsection (c).

SEC. 103. (a) Subchapter I of chapter 57 of title 5, United States Code, is amended by inserting after section 5706 the following new section:

"§ 5706a. Subsistence and travel expenses for threatened law enforcement personnel

"(a) Under regulations prescribed pursuant to section 5707 of this title, when the life of an employee who serves in a law enforcement, investigative, or similar capacity, or members of such employee's immediate family, is threatened as a result of the employee's assigned duties, the head of the agency concerned may approve appropriate subsistence payments for the employee or members of the employee's family (or both) while occupying temporary living accommodations at or away from the employee's designated post of duty.

"(b) When a situation described in subsection (a) of this section requires the employee or members of the employee's family (or both) to be temporarily relocated away from the employee's designated post of duty, the head of the agency concerned may approve transportation expenses to and from such alternate location.".

(b) The analysis for chapter 57 of title 5, United States Code, is amended by inserting after the item pertaining to section 5706 the following new item:

"5706a. Subsistence and travel expenses for threatened law enforcement personnel.".

SEC. 104. Section 5707 of title 5, United States Code, is amended—

(1) by inserting "(1)" immediately after "(a)";

(2) by inserting the following at the end of subsection (a):

"(2) Regulations promulgated to implement section 5702 or 5706a of this title shall be transmitted to the appropriate committees of the Congress and shall not take effect until 30 days after such transmittal."; and

(3) by inserting at the end thereof the following new subsection:

"(c)(1) The Administrator of General Services shall periodically, but at least every 2 years, submit to the Director of the Office of Management and Budget an analysis of estimated total agency payments for such items as travel and transportation of people, average costs and duration of trips, and purposes of official travel; and of estimated total agency payments for employee relocation. This analysis shall be based on a sampling survey of agencies each of which spent more than $5,000,000 during the previous fiscal year on travel and transportation payments, including payments for employee relocation. Agencies shall provide to the Administrator the necessary information in a format prescribed by the Administrator and approved by the Director.

"(2) The requirements of paragraph (1) of this subsection shall expire upon the Administrator's submission of the analysis that includes the fiscal year that ends September 30, 1991.".

SEC. 105. Section 5724a title 5, United States Code, is amended—

(1) by striking out "instead of" each place it appears in subsections (a)(1) and (a)(2) and inserting in lieu thereof "or";

(2) by striking out "maximum per diem rates prescribed by or under section 5702 of this title" each place it appears and inserting in lieu thereof "maximum payment permitted under regulations which implement section 5702 of this title"; and

(3) by striking out "average daily rates" in subsection (a)(3) and inserting in lieu thereof "daily rates and amounts".

SEC. 106. (a) Subchapter II of chapter 57 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 5734. Travel, transportation, and relocation expenses of employees transferred from the Postal Service.

"Notwithstanding the provisions of any other law, officers and employees of the United States Postal Service promoted or transferred under section 1006 of title 39, United States Code, from the Postal Service to an agency (as defined in section 5721 of this title), for permanent duty may be authorized travel, transportation, and relocation expenses and allowances under the same conditions and to the same extent authorized by this subchapter for other transferred employees within the meaning of this chapter.".

(b) The analysis for chapter 57 of title 5, United States Code, is amended by inserting after the item relating to section 5733 the following new item:

"5734. Travel, transportation, and relocation expenses of employees transferred from the Postal Service.".

SEC. 107. (a) Section 7(e) of the Technology Assessment Act of 1972 (2 U.S.C. 476(e)) is amended by striking out "a per diem in lieu of subsistence at not to exceed the rate prescribed in sections 5702 and" and inserting in lieu thereof "payments when traveling on official business at not to exceed the payment prescribed in regulations implementing section 5702 and in".

(b) Section 636(g)(2) of the Foreign Assistance Act of 1961 (22 U.S.C. 2396(g)) is amended by striking out "5702(c)" and inserting in lieu thereof "5702".

(c) Section 4941(d)(2)(G)(vii) of the Internal Revenue Code of 1954 (26 U.S.C. 4941(d)(2)(G)(vii)) is amended by striking out "5702(a)" and inserting in lieu thereof "5702".

(d) Section 456(a) of title 28, United States Code, is amended by striking out "a per diem allowance for travel at the rate which the Director establishes not to exceed the maximum per diem allowance fixed by section 5702(a) of title 5, or in accordance with regulations which the Director shall prescribe with the approval of the Judicial Conference of the United States, reimbursement for his actual and necessary expenses of subsistence not in excess of the maximum amount fixed by section 5702 of title 5" and inserting in lieu thereof the following: "payments for subsistence expenses at rates or in amounts which the Director establishes, in accordance with regulations which the Director shall prescribe with the approval of the Judicial Conference of the United States and after considering the rates or amounts set by the Administrator of General Services and the President pursuant to section 5702 of title 5".

(e) Section 326(b) of title 31, United States Code, is amended by striking out "rates" and inserting in lieu thereof "rates and amounts".

(f) Section 6 of Public Law 90-67 (42 U.S.C. 2477) is amended by striking out "rates" and inserting in lieu thereof "rates and amounts".

TITLE II—TRAVEL EXPENSES OF GOVERNMENT CONTRACTORS

SEC. 201. The Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) is amended by adding at the end thereof the following new section:

"TRAVEL EXPENSES OF GOVERNMENT CONTRACTORS

"SEC. 24. Under any contract with any executive agency, costs incurred by contractor personnel for travel, including costs of lodging, other subsistence, and incidental expenses, shall be considered to be reasonable and allowable only to the extent that they do not exceed the rates and amounts set by subchapter I of chapter 57 of title 5, United States Code, or by the Administrator of General Services or the President (or his designee) pursuant to any provision of such subchapter. This section shall be implemented in regulations prescribed as a part of the single system of Government-wide procurement regulations as defined in section 4 of this Act.".

SEC. 202. The Administrator for Federal Procurement Policy, in consultation with the Secretary of Defense and the Administrator of General Services, shall undertake a study to determine whether limitations should be placed on payments by executive agencies to Government contractors for costs incurred by contractor employees for transportation and relocation. The Administrator for Federal Procurement Policy shall submit within 180 days after the enactment of this Act a report thereon to the appropriate committees of the Congress.

TITLE III—EFFECTIVE DATE

SEC. 301. (a) The Administrator of General Services shall promulgate regulations implementing the amendments made by sections 101, 102, 103, 104, and 106 of this Act not later than 150 days after the date of enactment of this Act. The amendments made by title I of this Act shall take effect on the effective date of such regulations, or 180 days after the date of enactment of this Act, whichever occurs first.

(b) The amendments made by section 201 of this Act shall take effect 30 days after the effective date of the amendments made by title I.

Amend the title so as to read as follows: "To amend title 5, United States Code, to revise the authority relating to the payment of subsistence and travel allowances to Government employees for official travel; to prescribe standards for the allowability of the cost of subsistence and travel of contractor personnel under Government contracts; and for other purposes.".

VETERANS' COMPENSATION RATE INCREASE AND JOB TRAINING AMENDMENTS OF 1985

MURKOWSKI AMENDMENT NO. 1433

Mr. DOLE (for Mr. MURKOWSKI) proposed an amendment to the bill (H.R. 1538) to amend title 38, United States Code, to provide a 3.4 percent increase in the rates of compensation and dependency and indemnity compensation [DIC] paid by the Veterans' Administration, and for other purposes; as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Veterans' Compensation Rate Increase and Job Training Amendments of 1985".

TITLE I—DISABILITY COMPENSATION AND DEPENDENCY AND INDEMNITY COMPENSATION RATE INCREASES

SEC. 101. DISABILITY COMPENSATION.

(a) IN GENERAL.—Section 314 of title 38, United States Code, is amended—

(1) by striking out "$66" in subsection (a) and inserting in lieu thereof "$68";

(2) by striking out "$122" in subsection (b) and inserting in lieu thereof "$126";

(3) by striking out "$185" in subsection (c) and inserting in lieu thereof "$191";

(4) by striking out "$266" in subsection (d) and inserting in lieu thereof "$274";

(5) by striking out "$376" in subsection (e) and inserting in lieu thereof "$388";

(6) by striking out "$474" in subsection (f) and inserting in lieu thereof "$489";

(7) by striking out "$598" in subsection (g) and inserting in lieu thereof "$617";

(8) by striking out "$692" in subsection (h) and inserting in lieu thereof "$713";

(9) by striking out "$779" in subsection (i) and inserting in lieu thereof "$803";

(10) by striking out "$1,295" in subsection (j) and inserting in lieu thereof "$1,335";

(11) by striking out "$1,609" and "$2,255" in subsection (k) and inserting in lieu thereof "$1,659" and "$2,325", respectively;

(12) by striking out "$1,609" in subsection (l) and inserting in lieu thereof "$1,659";

(13) by striking out "$1,774" in subsection (m) and inserting in lieu thereof "$1,829";

(14) by striking out "$2,017" in subsection (n) and inserting in lieu thereof "$2,080";

(15) by striking out "$2,255" each place it appears in subsection (o) and (p) and inserting in lieu thereof "$2,325";

(16) by striking out "$968" and "$1,442" in subsection (r) and inserting in lieu thereof "$998" and "$1,487", respectively;

(17) by striking out "$1,449" in subsection (s) and inserting in lieu thereof "$1,494"; and

(18) by striking out "$280" in subsection (t) and inserting in lieu thereof "$289";

(b) SPECIAL RULE.—The Administrator of Veterans' Affairs may adjust administratively, consistent with the increases authorized by this section, the rates of disability compensation payable to persons within the purview of section 10 of Public Law 85-857 who are not in receipt of compensation payable pursuant to chapter 11 of title 38, United States Code.

SEC. 102. ADDITIONAL COMPENSATION FOR DEPENDENTS.

Section 315(1) of title 38, United States Code, is amended—

(1) by striking out "$79" in clause (A) and inserting in lieu thereof "$81";

(2) by striking out "$132" and "$42" in clause (B) and inserting in lieu thereof "$136" and "$43" respectively;

(3) by striking out "$54" and "$42" in clause (C) and inserting in lieu thereof "$56" and "$43", respectively;

(4) by striking out "$64" in clause (D) and inserting in lieu thereof "$66";

(5) by striking out "$143" in clause (E) and inserting in lieu thereof "$147";

(6) by striking out "$120" in clause (F) and inserting in lieu thereof "$124";

SEC. 103. CLOTHING ALLOWANCE FOR CERTAIN DISABLED VETERANS.

Section 362 of title 38, United States Code, is amended by striking out "$349" and inserting in lieu thereof "$360".

SEC. 104. DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING SPOUSES.

Section 411 of title 38, United States Code, is amended—

(1) by striking out the table in subsection (a) and inserting in lieu thereof the following:

"Pay grade	*Monthly rate*	*Pay grade*	*Monthly rate*
E-1	*$491*	*W-4*	*$703*
E-2	*505*	*O-1*	*621*
E-3	*518*	*O-2*	*640*
E-4	*552*	*O-3*	*686*
E-5	*566*	*O-4*	*725*
E-6	*578*	*O-5*	*799*
E-7	*607*	*O-6*	*900*
E-8	*640*	*O-7*	*973*
E-9	*[1] 669*	*O-8*	*1,067*
W-1	*621*	*O-9*	*1,145*
W-2	*645*	*O-10*	*[2] 1,255*
W-3	*664*		

"[1] If the veteran served as sergeant major of the Army, senior enlisted advisor of the Navy, chief master sergeant of the Air Force, sergeant major of the Marine Corps, or master chief petty officer of the Coast Guard, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $722.

"[2] If the veteran served as Chairman of the Joint Chiefs of Staff, Chief of Staff of the Army, Chief of Naval Operations, Chief of Staff of the Air Force, Commandant of the Marine Corps, or Commandant of the Coast Guard, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $1,345.";

(2) by striking out "$55" in subsection (b) and inserting in lieu thereof "$57";

(3) by striking out "$143" in subsection (c) and inserting in lieu thereof "$147"; and

(4) by striking out "$70" in subsection (d) and inserting in lieu thereof "$72".

SEC. 105. DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN.

Section 413 of title 38, United States Code, is amended—

(1) by striking out "$240" in clause (1) and inserting in lieu thereof "$247";

(2) by striking out "$345" in clause (2) and inserting in lieu thereof "$356";

(3) by striking out "$446" in clause (3) and inserting in lieu thereof "$460"; and

(4) by striking out "$446" and "$90" in clause (4) and inserting in lieu thereof "$460" and "$93", respectively.

SEC. 106. SUPPLEMENTAL DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN.

Section 414 of title 38, United States Code, is amended—

(1) by striking out "$143" in subsection (a) and inserting in lieu thereof "$147";

(2) by striking out "$240" in subsection (b) and inserting in lieu thereof "$247"; and

(3) by striking out "$122" in subsection (c) and inserting in lieu thereof "$126".

SEC. 107. EFFECTIVE DATE.

The amendments made by this title shall take effect as of December 1, 1985.

TITLE II—VETERANS' JOB TRAINING AMENDMENTS

SEC. 201. EMERGENCY VETERANS' JOB TRAINING ACT AMENDMENTS.

(a) SHORT TITLE.—(1) The first sentence of section 1 of Public Law 98-77 (29 U.S.C. 1721 note) is amended to read as follows: "This Act may be cited as the 'Veterans' Job Training Act'.".

(2) Any reference in any Federal law to the Emergency Veterans' Job Training Act of 1983 shall be deemed to refer to the Veterans' Job Training Act.

(b) ELIGIBILITY.—Section 5(a)(1)(B) of the Veterans' Job Training Act, as redesignated by subsection (a), is amended by striking out "fifteen of the twenty" and inserting in lieu thereof "10 of the 15".

(c) COUNSELING.—Section 14 of such Act is amended—

(1) by inserting "(a)" before "The"; and

(2) by adding at the end the following new subsection:

"(b) The Secretary—

"(1) shall provide for a program under which periodic (not less than monthly) contact is maintained with each veteran participating in a program of job training under this Act for the purposes of avoiding unnecessary termination of employment, referring the veteran to appropriate counseling if necessary, and facilitating the veteran's successful completion of such program; and

"(2) after consultation with the Administrator, shall provide for a program of counseling services designed to resolve difficulties that may be encountered by veterans during their training under this Act and shall advise all veterans and employers participating under this Act of the availability of such services and other related counseling services and assistance and encourage them to request such services and assistance whenever appropriate.".

(d) AUTHORIZATION OF APPROPRIATIONS.—Section 16 of such Act is amended—

(1) by inserting "and $65,000,000 for fiscal year 1986" after "1985"; and

(2) by striking out "1987" and inserting in lieu thereof "1988".

(e) TOLLING OF CERTAIN PERIOD.—Section 17 of such Act is amended—

(1) by striking out "Assistance" and inserting in lieu thereof "(a) Except as provided in subsection (b), assistance";

(2) in clause (1), by striking out "February 28, 1985" and inserting in lieu thereof "January 31, 1987";

(3) in clause (2), by striking out "July 1, 1986" and inserting in lieu thereof "July 31, 1987"; and

(4) by adding at the end the following new subsection:

"(b) If funds for fiscal year 1986 are appropriated for the purpose of making payments to employers under this Act but are not both so appropriated and made available by the Director of the Office of Management and Budget to the Veterans' Administration on or before February 1, 1986, for such purpose, assistance may be paid to an employer under this Act on behalf of a veteran if the veteran—

"(1) applies for a program of job training under this Act within 1 year after the date on which funds so appropriated are made available to the Veterans' Administration by the Director; and

"(2) begins participation in such program within 18 months after such date.".

(f) EFFECTIVE DATE.—(1) Except as provided in paragraph (2), the amendments made by this section shall take effect on the date of the enactment of this Act.

(2) The amendment made by subsection (e)(2) shall take effect on February 1, 1986.

SEC. 202. COORDINATION.

(a) IN GENERAL.—In carrying out section 1516(b) of title 38, United States Code, the Administrator of Veterans Affairs shall take all feasible steps to establish and encourage, for veterans who are eligible to have payments made on their behalf under such section, the development of training opportunities through programs of job training consistent with the provisions of the Veterans' Job Training Act (as redesignated by section 201(a)(1) of this Act) so as to utilize programs of job training established by employers pursuant to such Act.

(b) DIRECTIVE.—In carrying out such Act, the Administrator shall take all feasible steps to ensure that, in the cases of veterans who are eligible to have payments made on their behalf under both such Act and section 1516(b) of title 38, United States Code, the authority under such section is utilized, to the maximum extent feasible and consistent with the veteran's best interests, to make payments to employers on behalf of such veterans.

Amend the title so as to read: "An Act to amend title 38, United States Code, to provide a 3.1-percent increase in the rates of disability compensation and of dependency and indemnity compensation paid by the Veterans' Administration; to make improvements in veterans' job training programs; and for other purposes."

DISAPPROVING THE FREEZE ON FUNDS FOR JUVENILE JUSTICE AND DELINQUENCY PREVENTION

BIDEN (AND OTHERS) AMENDMENT NO. 1434

Mr. BYRD for Mr. BIDEN (for himself, Mr. HEFLIN, Mr. HOLLINGS, Mr. DECONCINI, Mr. NUNN, Mr. LAUTEN-

BERG, Mr. SASSER, Mr. BUMPERS, Mr. MOYNIHAN, Mr. LEAHY, Mr. INOUYE, and Mr. STENNIS) proposed an amendment to the resolution (S. Res. 278) to disapprove the freeze on funds for the Office of Juvenile Justice and Delinquency Prevention; as follows:

The first section of the resolution is amended by striking the period at the end thereof and inserting in lieu thereof:

"the Office of Justice Programs, the Bureau of Justice Assistance, the National Institute of Justice, the Bureau of Justice Statistics, the Victims of Crime Act programs, and the Regional Information Sharing System Programs".

EXTENSION OF CERTAIN TAXES

PACKWOOD AMENDMENT NO. 1435

Mr. PACKWOOD proposed an amendment to the bill (H.R. 4006) to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program, and to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions of current law which would otherwise expire at the end of 1985; as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. EXTENSION OF INCREASE IN TAX ON CIGARETTES.

Subsection (c) of section 283 of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to increase in tax on cigarettes) is amended by striking out "and before December 20, 1985" and inserting in lieu thereof "and before March 15, 1986".

SEC. 2. EXTENSION OF TRADE ADJUSTMENT ASSISTANCE PROGRAM.

Section 285 of the Trade Act of 1974 (19 U.S.C. note preceding section 2271) is amended by striking out "December 19, 1985" and inserting in lieu thereof "March 14, 1986".

SEC. 3. EXTENSION OF BORROWING AUTHORITY UNDER THE RAILROAD UNEMPLOYMENT INSURANCE ACT.

Section 10(d) of the Railroad Unemployment Insurance Act is amended by striking out "December 19, 1985" each place it appears and inserting in lieu thereof "March 14, 1986".

SEC. 4. EXTENSION OF MEDICARE PHYSICIAN PAYMENT PROVISIONS.

Section 5 of the Emergency Extension Act of 1985 (Public Law 99-107) is amended by striking out subsection (a), and by striking out "December 19, 1985" in subsection (c) and inserting in lieu thereof "March 14, 1986".

Amend the title by striking out "December 14, 1985" and inserting in lieu thereof "March 14, 1986".

ADDITIONAL STATEMENTS

BUDGET SCOREKEEPING REPORT

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate a current budget scorekeeping report brought up to date as of December 18, 1985, prepared by the Congressional Budget Office. This report also serves as the scorekeeping report for purposes of section 311 of the Congressional Budget Act.

Since the last report, Congress has cleared for the President's signature the Food Security Act of 1985, H.R. 2100. Also, the President has vetoed the Textile and Apparel Trade Enforcement Act of 1985, H.R. 1562.

I ask that the material be printed in the RECORD.

The material follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, December 19, 1985.

Hon. PETE V. DOMENICI,
Chairman, Committee on the Budget, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The attached report shows the effects of Congressional action on the budget for fiscal year 1986. The estimated totals of budget authority, outlays, and revenues are compared to the appropriate or recommended levels contained in the most recent budget resolution, S. Con. Res. 32. This report meets the requirements for Seante scorekeeping of Section 5 of S. Con. Res. 32 and is current through December 18, 1985. The report is submitted under Section 308(b) and in aid of Section 311(b) of the Congressional Budget Act.

Since my last report Congress has cleared for the President's signature the Food Security Act of 1985, H.R. 2100, changing budget authority and outlay estimates. The President has vetoed the Textile and Apparel Trade Enforcement Act, 1985, H.R. 1562, changing estimated revenue.

With best wishes,
Sincerely,

JAMES BLUM
(For Rudolph G. Penner.)

CBO WEEKLY SCOREKEEPING REPORT FOR THE U.S. SENATE, 99TH CONGRESS, 1ST SESSION, AS OF DECEMBER 18, 1985

[Fiscal year 1986—In billions of dollars]

	Budget authority	Outlays	Revenues	Debt subject to limit
Current level [1]	1,070.0	986.3	793.1	1,899.7
Budget resolution, Senate Concurrent Resolution 32	1,069.7	967.6	795.7	[2] 2,078.7
Current level is:				
Over resolution by	.3	18.7		
Under resolution by			2.6	179.0

[1] The current level represents the estimated revenue and direct spending effects (budget authority and outlays) of all legislation that Congress has enacted in this or previous sessions or sent to the President for his approval. In addition, estimates are included of the direct spending effects for all entitlement or other programs requiring annual appropriations under current law even though the appropriations have not been made. The current level excludes the revenue and direct spending effects of legislation that is in earlier stages of completion, such as reported from a Senate Committee or passed by the Senate. Thus, savings from reconciliation action assumed in Senate Concurrent Resolution 32 will not be included until Congress sends the legislation to the President for his approval. The current level of debt subject to limit reflects the latest U.S. Treasury information on public debt transactions.

[2] The current statutory debt limit is $2,078.7 billions.

IMPACT OF GRAMM-RUDMAN

● Mr. HART. Mr. President, today's newspapers are full of evidence that the real impact of Gramm-Rudman is likely to differ greatly from the expectations of those who voted for it, and likely to meet or even exceed the fears of those of us who opposed it. First there is the report the President is intent on using Gramm-Rudman—not to achieve balanced cuts in Federal spending, not to achieve the budget priorities most Americans share—but to eliminate essential domestic programs while allowing his defense buildup to continue without limit.

Even more instructive is the excellent editorial that appears in today's New York Times by Mark Green, president of the Democracy Project, a public policy institute in New York City. Mr. Green details how Gramm-Rudman's so-called sequester budget cuts are likely to affect vital programs in New York: 166 fewer buses, 2,800 apartments not rehabilitated, 15,700 poor students unable to obtain Pell grants for attending the City University of New York, the State University of New York, or other schools. Most of all, Mr. Green achieves the difficult task of explaining in clear, human terms the central flaw of Gramm-Rudman: Its failure to establish budget priorities and then pay for them. Mr. Green writes:

Money from spina bifida research will be cut by the same percentage as money for F-16 aircraft. Imagine if your bank, trying to limit your family's debts, chopped a fixed percentage from each of your checks, whether they went to pay the rent or buy fine wines. Priorities are now a thing of the past, having given way to the cool calculus of political deniability.

Mr. President, I heartily recommend Mr. Green's analysis to my colleagues, and I ask that his article be printed in the RECORD.

The material follows:

WHY THE BUDGET LAW IS "HORRENDOUS"—BAD FOR NEW YORK

(By Mark Green)

America is now a nation governed by clerks and computers. In perhaps the greatest abdication since the Duke of Windsor chose Wallace Simpson over the throne, Congress last week turned the power of the purse over to the Federal bureaucracy by passing the Gramm-Rudman deficit reduction plan. The consequences for New York State will be harsh.

Gramm-Rudman requires a five-year series of spending slashes. Congress approved the plan with no Senate hearings and without any official estimates of its impact. Most Senators and Representatives—including Senator Alfonse M. D'Amato and 14 members of the New York Congressional delegation—said, in effect, "Don't tell me what the damage is, just show me where to sign."

In less than four months, the first automatic cut, of $11.7 billion, will take place. A preliminary calculation by the staff of the House Budget Committee shows that some 4.6 percent of the nonexempt domestic programs will have to go. Let's assume that New York State's share of the Federal budget remains constant. What will Gramm-Rudman do to programs New Yorkers care about?

Mass transit. Our state, which gets nearly 16 percent of all Federal mass-transit money, will lose more than $26.5 million, the equivalent of 166 new buses, in 1986. By 1987, we'll lose $133 million.

Housing. In 1986, at a time when the failure of New York's housing market is apparent for all to see, we stand to lose enough Federal low-rent-housing funds to rehabilitate 2,800 apartments. By 1987, the costs will be $166 million.

Education. The first automatic cut alone will threaten Pell Grant financing for more than 15,700 poor college students, 90 percent of whom attend the City University of New York or the State University of New York. By 1987, $88 million will be lost.

The effect on national and international programs will be equally severe. Vital military training and manpower programs will be salvaged to protect the Pentagons favorite hardware purchases. Israel stand to lose roughly $172 million this spring along.

Instead of owning up to the choice they made, lawmakers have concocted a scheme to render their budget decisions untraceable. Under Gramm-Rudman, the Federal bureaucracy will now automatically impose across-the-board budget cuts in nonexempt programs. So money for spina bifida research will be cut by the same percentage as money for F-16 aircraft. Imagine if your bank, trying to limit your family's debts, chopped a fixed percent from each of your checks, whether they went to pay the rent or to buy fine wines. Priorities are now a thing of the past, having given way to the cool calculus of political deniability.

Who will do this arbitrary cutting? America's Government of clerks and computers is lead by a troika—the heads of the Congressional Budget Office, the Office of Management and Budget and the General Accounting Office—which will now program computers with the Gramm-Rudman five-year plan.

How many City University students will get college loans next year? Don't ask your Senator, talk to a bureaucrat at the General Accounting Office. Who will decide how much trade adjustment money there is for Buffalo workers hit by foreign competition? Don't write to your Congressman, he can't run the numbers. What about the city's bridges and tunnels? Sorry, the computer is down.

The worst thing about Gramm-Rudman is that it obscures Congress's misguided choices about the next five years. Thus, if Congress had the guts to slow or reverse the $30 billion to $40 billion annual increase in tax preferences for special interests, it could avoid some of the harshest medicine it is making New York swallow.

"To govern is to choose," said President John F. Kennedy. Next year, instead of choices, the automatic budget-gutting machine will go into high gear. Senators and Representatives have authorized a program of devastating cuts that they would never have signed for their names to if they had to own up to what was really in the bill. Accountability has given way to arithmetic.●

ANTITRUST EXEMPTIONS FOR NATIONAL FOOTBALL LEAGUE

● Mr. GORE. Mr. President, during the past few weeks the Senate has begun to address the issue of proposed new antitrust exemptions for the National Football League, embodied in S. 259.

As I have stated on the floor of the Senate, and during hearings of the Commerce and Judiciary Committees, the fundamental problem we face in expanding NFL antitrust immunity is the league's unwillingness to expand

to those cities which are clearly ready to support an NFL team.

During this debate, the proponents of S. 259 have cited a resolution signed early this year by a number of mayors in support of the bill. Memphis is one of the cities represented on that resolution. However, noting that the resolution was issued long before the implications of the bill and later revisions became entirely clear, Memphis Mayor Richard C. Hackett has clarified for the record the position of Memphis on S. 259.

I would like to take this opportunity to provide my colleagues with Mayor Hackett's December 6 clarification on this matter, and I ask that his letter to me be printed in the RECORD.

The letter follows:

CITY OF MEMPHIS,
Memphis, TN, December 6, 1985.

Hon. ALBERT GORE, Jr.,
U.S. Senate,
Washington, DC.

DEAR SENATOR GORE: I am in complete agreement that Senate Bill 259 should not be passed without a commitment by the National Football League to expand in a reasonable timeframe.

Any inference that my position is not in complete support of your actions is inaccurate. I did sign a petition earlier this year offered to me by Mayor George Latimer of St. Paul to encourage support of legislation to "clarify federal law with respect to team stability and revenue sharing within professional sports leagues." But, at no time did I understand the legislation to address the issue of expansion. I think it is entirely appropriate the legislation aimed at addressing the problems of cities faced with the potential loss of major league sports operations to include a promise of expansion to some of those markets not currently served by professional sports leagues.

Please let me know of anything I can do to be of assistance to you on this matter.

Sincerely,

RICHARD C. HACKETT.●

SALUTE TO SHELDON CAMPBELL

● Mr. WILSON. Mr. President, my home town of San Diego recently grieved at the passing of Sheldon Campbell, the president of the Zoological Society, which operates the world famous San Diego Zoo and Wild Animal Park. Mr. Campbell's love affair with the San Diego Zoo began when he was a boy and continued all his life; indeed, he was attending a meeting on zoo business at the time of his death on Monday.

I will miss Sheldon Campbell. He personified the "spirit of giving," that greatest of virtues of which we are so often reminded during this holiday season. For decades, Mr. Campbell selflessly volunteered his time and energy to the zoo.

Sheldon Campbell loved wildlife for its own sake, as well as for the joy that it can bring to people, and in no small part because of his devotion and his guidance, the San Diego Zoo has brought joy to the lives of millions, as it did to his.

At this point I would like to have printed in the RECORD the San Diego Union's account of Mr. Campbell's life and death, by staff writer Gina Lubrano, which appeared on December 17, 1985, and the Union's editorial tribute to Mr. Campbell which appeared on the following day:

The article follows:

SHELDON CAMPBELL COLLAPSES, DIES

Sheldon Campbell, whose love affair with the San Diego Zoo began when he was a boy and took him to the presidency of the Zoological Society, died yesterday after collapsing at a finance meeting of the society. He was 66.

Zoo officials said Campbell was about 15 minutes late for the noon meeting, explaining that he had been delayed by a phone call, and collapsed shortly afterward. Trustees and employees applied cardiopulmonary resuscitation and called paramedics, who took him to Mercy Hospital. Doctors worked on him for 27 minutes before pronouncing him dead at 1:27 p.m.

Norman Greene, a hospital spokesman, said Campbell died of cardiopulmonary arrest.

Campbell was to have stepped down this month after three years as president of the society, which operates the Zoo and the San Diego Wild Animal Park. Tonight, he was to preside at his last board meeting. He also was to be presented with a "declaration of appreciation" lauding his accomplishments on behalf of the Zoo and the Wild Animal Park.

Zoo officials canceled a party last evening for donors in celebration of a new society publication, "Wild in the City, the Best of Zoonooz." They also canceled the social portion of tonight's board meeting and ordered the flag flown at half staff.

Douglas Myers, the Zoological Society's executive director, described the San Diego native as a tireless worker on behalf of the society. Although he was not paid for his work, Campbell devoted full time to the role, Myers said.

"That's the love he had for this place," he said. "I think the Zoo probably brought him some of his happiest moments."

"He's one of the legends that makes the San Diego Zoo great," Myers said. "He definitely will be missed and remembered by all."

Campbell, a retired stockbroker, a writer and a natualist, often regaled Zoo employees of his escapades at the Zoo as a youngster, said Carole Towne, director of marketing, and Marjorie Shaw, editor of Zoonooz.

One of his favorite stories was about how he and the late Charles Shaw, who later was to become curator of reptiles and assistant director of the Zoo, climbed a fence to get into the Zoo and were evicted. The two young men were taken under wing by C.B. "Si" Perkins, then curator of reptiles, who "reformed" them, putting them to work scrubbing the backs of tortoises. The youngsters apparently were hooked on zoo work.

Campbell also told about how he was expelled from the Zoo in the late 1930s by former Zoo director Belle Benchley over an article he wrote for The San Diego Sun, which was purchased in 1939 by the Evening Tribune, now The Tribune. The story was about a lizard and was accompanied by a photograph showing it to be much larger and more threatening than it was, Towne explained.

Although Campbell was blamed for that photograph he was innocent, according to author Robert Wade, a longtime friend. "Even then, he would bend over backward to be accurate about wildlife," said Wade, explaining that someone else selected the photograph.

By 1966, all was forgotten and long forgiven. That year, Campbell was appointed chairman of ZOO50, a citizens committee that worked on the society's golden jubilee.

Events that year included the serious—an international conservation conference—and the whimsical—the world's longest birthday cake.

Two years later, he was named a trustee of the society, and in his 17 years on the board he served on and was chairman of numerous committees.

In the declaration of appreciation prepared for tonight's meeting, Zoo officials had planned to honor Campbell for devoting his "considerable speaking and writing talents in representing the society at all levels, from international wildlife conferences to mass media interviews to one-to-one consultations with our members and the public."

They also noted his journeys around the world on behalf of the society, particularly to China in 1984 to establish a relationship with Chinese zoos and wildlife organizations. Those efforts resulted in a loan to the San Diego Zoo of Chinese golden monkeys, their first exhibit outside Asia. He hoped one day to obtain the loan of the endangered giant pandas.

Myers and other Zoo officials also credited Campbell with making major contributions toward changes at the Zoo. Under his leadership, the society developed its "Diamond Edge" plan that calls for sweeping changes by 1991, the society's 75th anniversary. The proposal addresses the philosophy and structure of the Zoo and the park.

Campbell was a graduate of Roosevelt Junior High School and San Diego High School and had a short career as a newspaperman. He served in the U.S. Army Signal Corps during World War II and earned his bachelor's degree at what is now San Diego State University and his master's at Stanford University.

In 1951, after working as an assistant instructor in English at Stanford while doing graduate work, he joined Rohr Corp. as a personnel assistant. When he left in 1960, he was director of manager development and training. He then became an account executive at the securities firm of Lester, Ryons and Co. He was a general partner when he left in 1967 to become vice president and then senior vice president at Roberts, Scott and Co.

In 1974, he became vice president of Wagenseller and Durst, retiring in 1980, when he decided to devote full time to writing.

Working with notes left by his friend Shaw, who died in 1971, Campbell completed "Snakes of the West." The book was published in 1974. Four years later, Campbell's book, "Lifeboats to Ararat," was published.

In 1979 he was named SDSU alumnus of the year in arts and letters. Two years later he was elected to Phi Beta Kappa as an alumnus of SDSU.

He was a member of numerous wildlife organizations, a fellow of the Explorer's Club, served on the board of the Wildlife Preservation Trust International and a former trustee of the San Diego Natural History Society.

Campbell is survived by his wife, Florence, a daughter, Kim Molina of San Diego, a son, Gregory of Portland, and a grandson.

Cremation is planned and services at the Zoo are pending. The family suggests donations to the Zoo.

SHELDON CAMPBELL

For much of his life, Sheldon Campbell worked tirelessly for the San Diego Zoo. Hence, there is a tragic appropriateness that he should suffer a fatal collapse during his last day as president of the Zoological Society.

A native of San Diego and a graduate of Roosevelt High and San Diego State, Mr. Campbell was appointed to the Zoo board in 1968 following his outstanding contributions to the society's golden jubilee.

Mr. Campbell proved to be an indispensable member of the board during his 17-year tenure, helping the Zoo gain increasing prominence through his public relations savvy and considerable zoological knowledge.

He was instrumental, for example, in arranging an exchange program between the Zoo and the China Wildlife Conservation Association. And enduring legacy is his book *Lifeboats to Ararat*, a seminal work on captive breeding.

Not content to rest on the laurels of the internationally acclaimed Zoo, and eager to build toward the future, Mr. Campbell made significant contributions to "Diamond Edge," a strategic five-year plan for the continued economic and zoological development of the Zoo.

Most significantly, Mr. Campbell's devotion to the Zoo since his teens personifies the dedicated volunteer spirit that is a major factor in the Zoo's world renown. His selfless, tireless efforts have placed him among a select group of San Diegans whose contributions of time, money, and self have crated a wondrous civic landscape that includes Balboa Park, Mission Bay, our museums, symphony, and opera.

The Zoo in particular and our community in general are much better places because of Sheldon Campbell. His death diminishes San Diegans in a special way.●

NOTICE OF DETERMINATIONS BY THE SELECT COMMITTEE ON ETHICS

● Mr. RUDMAN. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The select committee has received a request for a determination under rule 35 which would permit Mr. David Hill, a member of the staff of Senator PHIL GRAMM, to participate in a program in Taiwan, sponsored by the Chinese Culture University, in early January 1986.

The committee has determined that participation by Mr. Hill in the program in Taiwan, at the expense of the Chinese Culture University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Senator PETE WILSON to participate in a conference in Geneva, Switzerland, entitled "Security and Prospects for Disarmament in Europe," sponsored by the French Institute of International Relations, from December 16–18, 1985.

The committee has determined that participation by Senator WILSON in the conference in Geneva, Switzerland, at the expense of the French Institute of International Relations, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Ms. Valerie Baldwin, a staff member of the Governmental Affairs Subcommittee on Energy, Nuclear Proliferation and Government Processes, to participate in a program in Taiwan, sponsored by Soochow University, from December 27, 1985 through January 6, 1986.

The committee has determined that participation by Ms. Baldwin in the program in Taiwan, at the expense of Soochow University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Ms. Ruth Cymber of the staff of Senator PHIL GRAMM and Ms. Eve Lubalin of the staff of Senator FRANK LAUTENBERG to participate in an educational seminar, sponsored by the Leonard Davis Institute for International Relations of the Hebrew University of Jerusalem in conjunction with Project Interchange, in Israel, from January 6 through January 16, 1986.

The committee has determined that participation by Ms. Cymber and Ms. Lubalin in the seminar in Israel, at the expense of the Leonard Davis Institute for International Relations of the Hebrew University of Jerusalem, in conjunction with Project Interchange, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Alexander Polinsky-Lav, a member of the staff of Senator DAVE DURENBERGER, to participate in a program, sponsored by Soochow University, in Taiwan, from December 27, 1985 through January 7, 1986.

The committee has determined that participation by Mr. Polinsky-Lav in the program in Taiwan, at the expense of Soochow University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Tod O. Neuenschwander, a member of the staff of Senator JAMES A. MCCLURE, to participate in a program, sponsored by Tunghai University, in Taiwan, from December 31, 1985 through January 9, 1986.

The committee has determined that participation by Mr. Neuenschwander in the program in Taiwan, at the expense of Tunghai University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Claude Allen, a staff member of the Foreign Relations Committee, to participate in a program, sponsored by Soochow University, in Taiwan, from December 27, 1985 through January 7, 1986.

The committee has determined that participation by Mr. Allen in the program in Taiwan, at the expense of Soochow University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Patrick J. Sullivan, a staff member of the Committee on Energy and Natural Resources, to participate in a program, sponsored by Tunghai University, in Taiwan, from December 31, 1985 through January 9, 1986.

The committee has determined that participation by Mr. Sullivan in the program in Taiwan, at the expense of Tunghai University, is in the interest of the Senate and the United States.●

ELDERLY ABUSE ACT OF 1985—S. 1919

● Mr. BUMPERS. Mr. President, I am pleased to lend my support to S. 1919, a bill to establish a 17-member task force to investigate elderly abuse. The need for the task force is clear. Although several congressional committees have held fact-finding hearings on elderly abuse, we still have only rough estimates of the amount of abuse that occurs annually, and public awareness of this nationwide problem is limited.

The simple introduction and discussion of his legislation improves public awareness of the physical, psychlogical, and financial mistreatment of the elderly by family members or other caretakers. Although women are the most frequently abused senior citizens, no race, class, or sex is immune from elderly abuse. Detection of elderly abuse is especially difficult because of the fear of reprisal, shame, and guilt of the elderly.

The proposed task force is valuable because it is a partnership of public and private sector and States and the Federal Government. The task force would be comprised of the Secretary of Health and Human Services, the Director of the National Institute on Aging, five representatives from health and senior citizen organizations having experience in elderly abuse

matters, and one representative from each of the 10 regions in the United States as set forth by the Office of Management and Budget. The 10 individuals would currently be involved with the administration of a State aging services program.

The task force would make a final report on its findings and recommendations in 9 months. The report would include recommendations on what can be done to address the problem of elderly abuse both administratively and legislatively.

The task force will provide us with a comprehensive body of information on elderly abuse and will suggest solutions to this tragedy. I believe this is a wise first step for the Congress to take to combat the abuse of America's senior citizens.●

JOHN J. CREEDON: HEED THE TEACHER

● Mr. DURENBERGER. Mr. President, John H. Creedon, chairman of the board of Metropolitan Life Insurance Co., is a business leader who understands the importance of investing in the future. In the following interview with the journal, Financier, Mr. Creedon reflects the concerns of a growing number of thoughtful Americans about the declining quality of the Nation's schools, and the need to address this problem while there is still time.

At Mr. Creedon's direction, Metropolitan recently surveyed teachers for their views on the educational system's ills. What they found was a profession demoralized by low pay and a growing reputation for mediocrity. According to Creedon, "Experienced teachers are leaving. Often they are being replaced and if they are, it is not by the caliber of teacher we require if our children are to have the best possible education."

But more than just talking about the problem, Creedon and Metropolitan are doing something about it. As an outgrowth of its survey, Metropolitan's foundation has initiated a Future Teacher and Scholarship Program to attract promising college students into the teaching profession. It has also joined the New York City Partnership in which a company adopts a local school and provides teaching and administrative help. The partnership's goal is to provide every high school graduate with a job.

Clearly, our children are our most important economic resource. This year's youngsters will be the workers we will depend upon tomorrow to keep America competitive in an increasingly global economy, to finance the massive retirement needs of the baby boom generation, and to pass on to future generations the American dream of upward economic mobility. The education of children, whose growing distress has been well documented of late, should be of vital concern to any farsighted businessman. It is heartening to see men such as John Creedon leading the corporate community toward a greater acceptance of responsibility in this essential area.

Mr. President, I ask that Williard Rappleye's interview with Mr. John J. Creedon in November's Financier be printed in the RECORD.

The material follows:

[From the November 1985 Financier]

JOHN J. CREEDON: HEED THE TEACHER

(By Willard C. Rappleye Jr.)

Amid heightened national concern over the quality of public education, Metropolitan Life has focused on the teacher as key to the solution, through its second annual survey of the profession, President John Creedon explains in an interview. Attracting better personnel, keeping them, and above all, raising the level of respect for the vital contribution they make, he insists, is essential for the health and progess of the country's school system.

The primary interest of the Metropolitan Life Foundation has long been health care, Mr. Creedon says, with education a second area of major interest, along with United Way, civic affairs, and cultural affairs. Until fairly recently, most of its activity in education had been in matching gifts and specific activities with universities and medical schools.

"But we felt that we might do more, creatively, in education, since there seemed to be so many problems," he recalls. "As you probably know there have been 180 different studies undertaken in the last three years on different aspects of the problem of education in this country, especially at the primary and secondary school levels; but we found that one of the areas where there had not been enough attention paid was among the teahers themselves."

Metropolitan had already had considerable exposure to problems of the schools, stemming from its concern with health, focused on drug abuse among the young. It supported three programs by WQED in Pittsburgh, called The Chemical People, that revealed the extent of the use of drugs and alcohol in the schools, and offered suggestions on how to deal with them by forming community groups.

"It all kind of ties in," he suggests. "We got from health care into alcohol and drugs in the schools. And then, as part of the same thrust, we got into the question of just how much business can do. It is really only a limited amount. After all, it is a public school system, paid for by taxpayer dollars. The business community can't support the system.

"On the other hand, it can't ignore it, either," he maintains. "I think it has to be supportive and helpful."

One way Metropolitan thought it could be helpful would be to learn about the problem from a primary source—the teachers themselves.

IMPORTANT PERSPECTIVE WAS MISSING

"Any rush to reform carries its own dangers," Mr. Creedom explains. "One danger is that we overlook important considerations. Not many of us—legislators, business executives, even deans of schools of education—can understand the problems of the schools from the inside. Well-informed and well-intended as we may be, it is the teachers who are on the front lines. And as the debate over what should be done to improve our schools went on, it became clear that an important perspective was missing—that of the classroom teacher.

"Nobody had done a survey to ask them their opinions on what needed to be done. So, almost two years ago, we decided to ask them.

"In back of all this is a conviction on my part that the public-school education system is a critical factor in the success of our country. If that system goes down, we're all going down.

"Aside from my strong personal conviction about its importance, in our national competitiveness in the world environment, I felt it was something to which Metropolitan Life, as leading company in New York and in the country, should contribute—a big issue we should do something with. So we decided to do the survey, hired the Lou Harris Organization, and went to it.

"Inherent in the approach we took is a recognition that the teacher is the key to a successful school system. Nothing profound about that—it is obvious.

"But if you look at what has happened to the teaching profession in the last 25 years, it has come way down. You can reflect on your own experience.

"When I was a boy I went to Catholic schools, where they had nuns, who if they were paid anything were paid very little, but who were devoted teachers. And in the public schools you had mostly women teachers, and relatively few really dedicated men—but all of them wanted to teach, more than anything else.

"For the women, they had practically no other career opportunities. They really could not go anywhere else. So if you had a bright daughter, you encouraged her to become a teacher.

"Today, a whole world has opened to women, and they are not a captive group any more. To a great extent that is what has happened to the teaching profession. They don't have the same supply of motivated bright people, and the system started to take what it could get. I think the standards have gone way down.

ONLY ADVANCE IS ON LEAVING

"The bitter truth," Mr. Creedon declares, "is that, while we may call teaching a profession, we treat teachers as if they signed on for a rather low-level job where the only hope of advancement comes with leaving.

"Experienced teachers are leaving. Often, they are not being replaced and if they are, it is not by the caliber of teacher we require if our children are to have the best possible education.

"I think what business can do—and maybe the Survey will encourage more of us to do it—is to be supportive of teachers, and their professional aspirations, and recognize how important that is.

"Most other competitive countries don't have the problems that we do in our school system. In Japan teachers are up on a pedestal, very highly regarded. So are they in Europe.

"A big part of the problem here is that they don't feel respected. There is some speculation to the point that in our day the teacher tended to be better educated than the parents of the children, so she would be respected because she had done something that the parents hadn't done.

"Today that frequently is not true. The level of education of many people has improved, and the parents tend generally to be

more critical of teachers, whom they believe come from the lower college ranks."

The Survey, he believes, contributes to understanding, "and helps focus on the problem. It is significant, I think, that 74% of teachers who have seriously considered leaving the profession report that they stayed because they derive great satisfaction from their work. Clearly, we have a core of dedicated, caring professionals. We cannot discuss educational reform without listening to the teachers. To do so would be an injustice to them—and to us. They recognize that the system is in trouble and they want to do what they can to help."

INDEPENDENCE AND RESPONSIBILITY

The results indicate that teachers "are worried about a lot more than just low pay," he notes. "They are worried about not having the materials they need to do their jobs well, they are worried about working conditions that hamper their efforts, and they are worried about a lack of independence and responsibility commensurate with professional standing.

"The fact is that we are facing a severe teacher shortage," Mr. Creedon emphasizes. The recent Committee for Economic Development report estimates that we will need 1.3 million teachers by the 1990.

"Al Shanker, President of the American Federation of Teachers, told me the other day, that in order to meet the needs we face for teachers between now and 1990, the public school system would have to get at least 50% of all college graduates who had SAT scores in excess of 1,000.

"He also said that there won't be a teacher shortage, because what will happen is that they will put anybody in the job."

One outgrowth of the Survey, Mr. Creedon says, is a Metropolitan Life Foundation Future Teacher and Scholarship program. "We are trying to identify bright young people who have completed two years of college and are thinking about becoming teachers. We will support them for their final two years if they agree to become teachers when they graduate."

"Another is a program of roundtables with the CED in five major cities for members of the teaching professions, the political administrations, and members of business, just to have a dialugue about the problems of the schools in that city, and what can be done.

NOT HUGE SUMS OF MONEY

"One thing we are doing through the New York City Partnership is to arrange for every high school to have a company adopt it—in some way establish a relationship where they will either go in and teach, or help with the administration—above all, go in and find out what the problems are, find out what they can do to help. There are not huge sums of money involved—just taking an interest, recognizing the importance of it, trying to do something about it."

He accepts the fact that the results will be "very hard to measure. How can we say whether it has improved or not? The Surveys themselves, as we continue them, will give us some indication of whether or not the situation is improving, whether or not teachers begin to feel better about themselves.

"I don't think the Survey itself will attract more teachers," Mr. Creedon acknowledges. "I think a lot of other things have to be done.

"It seems to me that part of the effort on the part of business has to be a recognition that our schools are important to business as such, not only as a matter of corporate responsibility, but also as a matter of economics, because the people who will be our employees in the future are the people who will be coming out of the public schools. That's our market, and if they are not given the skills and training and the ability to learn in those schools, they won't have it.

"So it's a matter of self-preservation, in a way.

"It's a multifaceted problem that has to be approached in many ways. Look at what Ross Perot has done in Texas. He's changed the whole school system down there—changed the curriculum, compensation levels, career ladders. I don't know how that's going to work out, how far one should go.

"And it's not just one individual or one company. Bill Woodside at American Can is interested (Financier, May).

"The New York Partnership is interested. I was Chairman of their Summer Jobs program this year, which is certainly related. We got 31,462 young people into Summer jobs, almost all of them out of the city's high schools. And what we're talking about in the Partnership is whether we could guarantee a job to every graduate of a New York high school. We're working on it, and we feel it's within reach.

"Now, that sounds greater than it is," Mr. Creedon points out, "because not an awful lot of kids graduate; and among those who do, many go on to college. But this program—and I think it's a great approach—is that to every graduate of a high school in New York who wants a job, we will guarantee a job.

PARTICIPATION IN DIFFERENT FORMS

"What I am saying is that I don't view this as just Metropolitan going out alone to solve this problem; but I do view our work as a recognition that corporations both as a matter of conscience—corporate responsibility—and as a selfish matter, have to recognize the problem and be willing to participate in the solution in some way, and that can take different forms.

"I think it needs to take the form that the teacher is key. Unless we can attract teachers into the profession, and keep them in the profession, our public school system is in real trouble."

SUMMARY OF THE METROPOLITAN LIFE SURVEY

The findings of the 1985 Survey reveal that schools will lose many more teachers in the near future, unless effective measures are taken to attract talented people into the profession and contain the nationwide exodus of teachers to other professions:

51% of all teachers currently teaching in American schools say they have seriously considered leaving the profession to enter some other occupation.

74% of those who have seriously considered leaving the profession say the main reason they have stayed is the satisfaction of teaching. That satisfaction is derived mainly from their relationship with students (40%) or from seeing students mature (23%).

The main reason why teachers consider leaving are poor salaries and poor working conditions, 62% and 41%, respectively.

The most serious problem secondary school teachers confront is a lack of basic skills among students (80%). Majorities of secondary school teachers also cite drinking and drugs.

The most serious problem cited by elementary teachers is overcrowded classes, by 49%.

Teachers experience great stress. 36% of teachers say they experience great stress several days a week in comparison to 27% of all American adults (according to another Louis Harris survey).

Majorities of teachers also believe that the educational system would benefit from having business organize campaigns to build public and legislative support.●

GUADALCANAL REUNION: A COLORADAN'S REMEMBRANCE

● Mr. HART. Mr. President, this year marks a number of historically significant anniversaries. Many of them commemorate times of celebration or despair which occurred during the Second World War.

In August, for example, we remembered an event which ended an era of death and destruction. It was 40 years ago that the bombing of Hiroshima and Nagasaki brought the war in the Pacific Theatre to a long-awaited conclusion and ushered in the permanent peril of the nuclear age.

Recently, in my own State of Colorado, a group of marines, airmen, and sailors who helped wage and win the battle of Guadalcanal gathered in Colorado Springs 43 years later to remember that fierce and difficult engagement. This immensely important victory, in the minds of many, represented a turning point in the Pacific war.

One veteran of Guadalcanal, my friend Jim Ward, recorded his thoughts, and the experiences of others with whom he fought, in an evocative remembrance titled, "Guadalcanal Revisited." Jim was gracious enough to share with me his salute to the bravery, courage and patriotism of the soldiers who fought that battle with him. It is a lively account of a part of our history with which many of our colleagues are, of course, familiar.

In tribute, Mr. President, to the acts of heroism and valor which made that victory possible, and with thanks to Jim Ward for his creative work, I ask that the full text of "Guadalcanal Revisited" be printed in the CONGRESSIONAL RECORD at this point.

The statement follows:

GUADALCANAL REVISITED

(By Jim Ward)

They were the apotheosis of courage, hope and salvation for a nation and world tired of brave defeats and senseless retreats.

They were the Marines of Guadalcanal who stormed ashore on August 7th, 1942 rifles at high port and laughed at themselves when no enemy challenged their assault.

They were much older Marines when they turned the island over to their Army buddies some two months later after enduring a continuous man killing struggle against overwhelming odds. But they were never overwhelmed.

They were the sailors of the American fleet who stood up against a vastly superior Navy and lost more men than any other service in the battle.

They were the Cactus Air Force who flew round-the-clock missions off Henderson Field and defeated an alleged invincible Japanese air force.

They were the motley crew of Navajo radio men who transmitted front line information in a language indicipherable to the enemy.

They were the PT boat skippers, the bomber and fighter crews, the valiant coast watchers, the Melanisian scouts and saviours of downed pilots. These were the men who won the battle that ended Japanese domination of the Pacific in World War II and sealed their doom.

Some 600 of these veterans, who had gotten the word, came together early this week to commemorate their participation in a battle that historians now declare was a turning point in World War II. It was the beginning of the end of the Japanese dream to establish a Greater Eastern Sphere of Prosperity which meant control by the Japanese over the Pacific.

They came to Colorado Springs for this 43rd Anniversary of their battle and told tall tales, remembered old friends and looked for familiar faces of people they knew so many years ago.

Including the ghost of their own younger selves who seemed as remote as the island they conquered and whose presence conquered them forever.

Names sprang to mind and touched long dead memories.

Kahili, Tenaru, Savo Bay, Kolombangara, the Slot, Henderson Field, Bloody Ridge.

Other names filled the air of warriors worth remembering . . . Chesty Puller, Lou Diamond, the Sullivan Brothers, Ching Lee, Archy Vandergrift, Old Patch, Manilla John Bassilone, Mitch Paige and a hundred more.

And they remembered the hardware of that battle . . . The Springield .03, the Avengers, Dauntless and Wildcats and the Higgins boats and LST's and LCIs and many more.

Historian Samuel Eliot Morrison said "Guadalcanal was not so much a name as an emotion evoking a sense perception of the putrescent reek of the jungle, the sharp ache of hunger or the pulpy feeling of water-logged flesh, or those clanging, bellowing, stuttering battles—land, sea and air which were fought, night and day, to determine whether America or Japan would possess a ramshackle airfield set in the middle of 2500 square miles of malarial wilderness."

The aging men who attended the reunion in Colorado Springs could identify with what Morrison said. Malaria struck more than fifty percent of all the land soldiers and marines who served there.

"I got 70-20 vision in one eye and am damn near blind in the other" said one aging Marine, "they say it could have been caused by the high malaria fever but who knows?"

Did they realize that their victory at Guadalcanal was the linchpin to the greater victory that followed over the Japanese armed forces. Some did, but most reacted like an ex-Marine who said, "All you think of is staying alive and covering your butt." One of the men who fought through the desperate hours of near defeat and uncertain victory was Sergeant Robert Leckie whose histories of the Guadalcanal Campaign and the war in the Pacific are models for future historians.

He wrote: "Guadalcanal was the place at which the tide in the Pacific War turned against Japan." "After Coral Sea and Midway, I still had hope," said Captain Toshikazu Ohmae, operations officer of the Japanese Eighth Fleet," but after Guadalcanal I felt we could not win."

The Admiral commanding the Guadalcanal Reinforcement Force summed up the battle more succinctly, "There is no question that Japan's doom "was sealed with the closing of the struggle for Guadalcanal."

The larger question that intrigues historians today is how it was possible for a raggedy band of American marines, airmen and sailors, ill equipped and outnumbered, to beat the Japanese who had spread terror throughout the Allied forces and had defeated and destroyed the best that Britain, the Dutch and French could throw at them?

The men who attended the reunion of Veterans of the Guadalcanal Campaign did not have any answers to these heavy questions. They were content to let the chair-bound military historians figure it out.

They were mainly interested in finding a familiar face or hearing a familiar story.

"I was there when Lou Diamond dropped a mortar down the stack of a Japanese destroyer," said one Marine recalling the legendary Congressional Medal of Honor winner who was the model of the go-to-hell battler. He refused to salute officers because he claimed the Nation's highest award as a privilege above rank.

There were stories of ships being sunk under sailors and planes that were cannabilized to get planes in the air to stave off the incessant bombing raids of the enemy.

And there was humor which became a kind of hidden weapon for the besieged Marines.

"I was a machine gunner and my Sergeant assigned me the job of picking bugs out of the rice we captured," recalls Duke Hallock from Detroit, then after a few days he said, "Duke just dump it in the pot the way it is cause it might be nutritious."

Hallock watched with other Marines as the Navy withdrew and Japanese ships smashed their precious supplies to smithereens on the beach.

There was a dramatic reunion at the Antlers Hotel in Colorado Springs when Patsi Lee, a Chinese matron married to an American named Fusano from St. Louis, met the two men who saved her life when she was found by natives as a six year old in the battle of the Canal.

"How lucky I am to meet and thank these men who saved my life," said the tear stained nurse as she embraced former Navy corpsmen Glen Holzer and Don Herrett.

The story was lost amid the larger carnage of Guadalcanal but it remains a poignant episode of now even the horrors of war cannot obliterate the larger well springs of humanity.

Father Gehring, the Padre of Guadalcanal, tells the story. "The natives found this little Chinese girl who was badly wounded by the Japanese and brought her to the Marines with the message, "Give her to priest man". She was turned over to Corpsman Glen Holzer who gave her first aid and then turned her over to Don Herrett who was assigned to the medical tent where she was treated and turned over finally to Father Gehring.

The priest partitioned off part of his tent and tended the young girl and finally had her shipped to a mission in one of the rear islands out of harm's way. He eventually adopted her and provided for her education in America where she became a nurse and married an American citizen.

The two corpsmen who saved her were lost in the hubbub of war. There was a picture of the two corpsmen and little Patsy shortly before the August 1st reunion. The picture was carried by a California newspaper with the caption, "Who are these two Marines?"

When Holzer saw it he called his buddy Don Herrett and said, "Those Marines are now taking credit for this action so let's go there and give them the word." And so the reunion occured before hundreds of teary veterans.

It is hard for today's average John Citizen to appreciate what Guadalcanal meant to Americans in that historic date of August 7, 1942 when the Marines landed at the Canal and her sister Island Tulagi.

A measure of this emotion was expressed when the vets were attending a dinner at the Flying W Ranch and the owner took the microphone to welcome them. He explained that he rarely does that chore, leaving it to his trained entertainment staff, but had to tell how he felt. "Nobody who was alive then will ever forget the boost we got when those young Marines landed on Guadalcanal and how it gave us all heart to believe we could win that war. So I welcome these brave men and ask you to cheer them on."

The crowd responded heartily and later when guests were asked to identify where they came from, a young Japanese family stood up and proudly declared they were from Japan, causing some wry exchanges between the veterans.

How did they beat the most formidible army then challenging the combined military forces of three nations and winning?

"We did not even have flight training when we reached Ewa, Hawaii and trained in dive bombers for the Canal invasion," said one airman from VMTB 232 which was the first element of the Cactus Air Force to land on Henderson Field in August of 1942.

The pilots were recent graduates of flight school and their commander, Major Richard Mangrum was an Old Corps pilot who inspired his raw recruits by his own courage and devotion to the squadron.

"He was like God and we would have followed him anywhere," said one aging ex-Marine aerial gunner who recalled the time Mangrum joined up with the flight after a raid on enemy shipping and his fellow airmen informed him his bomb was still in its rack. Mangrum turned back and made a single handed attack against the Japanese fleet.

Time and the largeness of other military operations have dwarfed the significance of the Battle of Guadalcanal and this irritates some of the participants.

They point out that it was the lessons learned in amphibious warfare that made possible other campaigns including the invasion of Europe.

They tell you that the survivors of the Canal became the nucleus of the expanding Marine divisions, naval fighting ships, air squadrons and specialized forces that conquered Japan.

The Japanese proudly boasted of their special spiritual strength with a dedication to the Emperor as the element that made them invincible in 350 years of battle. The Marines and other fighters on the Island proved that a more potent force of democratic belief in humanity coupled with tough training could triumph.

"The duty of a soldier is not to die for his country but to help the other so-and-so die for his" was the motto of the Marines. They were most accommodating to the frenzied horde of enemy soldiers attacking pell mell with cries of "Banzai."

Guadalcanal destroyed the superman image of the Japanese who faced defeat after an incredible string of victories against the British in Singapore, Burma and the China Sea. Against the Dutch in the East Indies and the French in Indo China. And against the Americans at Pearl Harbor and the Philippines.

The Japanese soldier was being touted as a superior warrior. The Japanese Zero was said to be the best fighter in the air. The Japanese fleet was experienced and better equipped than the American fleet, and assumed the Master of the Pacific.

All these things were partially true but Americans responded with ingenuity and courage at Guadalcanal and changed all that.

Their victory was the psychological edge that inspired the forces of a nation staggering after a series of unremitting defeats and started them on the road to victory that never changed.

Looking over the crowded ballroom as former Coastwatcher Martin Clemens regaled the troops with his reminiscences, on the final night of the reunion, the picture was that of a special kind of men.

They were all white because that is the way wars were fought then. The Honor Guard from Ft. Carson was made up of two black soldiers and they seemed right in place with the old vets.

They were hesitant to a point of shyness as many had never attended a reunion before and they acted like guests trying to find their host. It might have been a trick of memory of who these men had been and what they had accomplished, but they looked more handome, more courageous and proud and more grateful for the blessings of freedom and liberty which they helped salvage and enshrine.

Ambassador Clemens reached for the meaning of the day by paraphrasing Shakespeare's King Henry V exhortation to his troops which says that future generations would be deprived of the glory of serving with such valiant company.

But maybe the meaning of the boys of Guadalcanal was summed up by Colonel Thomas who passed on the definition of courage to Clemens during the battle when he said, "Courage is doing the thing that has to be done."

And the marines, soldiers, airmen and sailors who served in that fierce battlefield between August 7, 1942 and February 17, 1943 did what had to be done with grand style.

(Jim Ward, was part of the relief force at Guadalcanal and participated in campaigns in New Georgia, Bouganville and New Britain. He is now a private investigator in Denver, Colorado.)●

BARRIERS TO U.S. EXPORTS

● Mr. CHAFEE. Mr. President, the U.S. Trade Representative, in a report last summer to the Congress on foreign industrial targeting, concluded that our existing trade laws do not give the President adequate authority to seek the elimination of foreign anticompetitive practices which prevent market access for U.S. exports.

On November 20 I introduced S. 1862, measures to eliminate barriers to and distortions of trade, to address this very concern. This bill would amend section 301 of the Trade Act of 1974 to define unreasonable practices in that statute to include anticompetitive practices which serve as barriers to our competitive exports.

Nontariff barriers in the form of nonenforcement of antimonopoly laws are the reason some U.S. exports have long had difficulty penetrating the Japanese market. This has been true for U.S. exports of textiles and apparel, steel, semiconductors, soda ash and no doubt countless others.

The case of soda ash, the basic raw material for glass, is illustrative. In 1983 the Japan Fair Trade Commission, at the urging of the U.S. Government, found that their domestic soda ash producers had clearly violated their own monopoly laws. The major Japanese trading companies maintain an intricate link between producers and distributors. Many Japanese marketing companies refuse to represent U.S. suppliers. No punishment, damages or other measures have been taken to enforce the findings of the Japan FTC.

The Japanese system of marketing, which gives the trading companies power in selling finished products and buying raw materials, places the U.S. soda ash industry in an impossible position unless Japan's antimonopoly laws are enforced. This occurs despite the competitiveness of our industry. We have the largest reserves, the lowest costs, the world's most efficient production methods using half the energy, half the manpower required by plants elsewhere in the world and state-of-the-art technology.

Anticompetitive practices have also served as a barrier to access for the U.S. semiconductor industry in Japan. Japanese semiconductor firms—essentially a cartel—have a long history of acting collectively to block foreign penetration. The Japanese Government targeted and formally protected its semiconductor industry in the 1960's and 1970's, in order for the industry to achieve technological parity with the United States. After heavy pressure from the U.S. Government, the Japanese Government agreed in the 1970's to liberalize semiconductor and computer imports and investment.

At the same time, however, that this so-called liberalization was taking place, the Japanese Government encouraged the industry to form collusive interfirm relationships for the research, development, production, and sale of semiconductors and computers, essentially to nullify the practical effect of liberalization. This restrictive market structure remains in place today and continues to restrict U.S. semiconductor sales in Japan. U.S. market share in Japan is about the same today as it was when the industry there was formally protected.

The situation has been similar for the steel and textile industries for years. Despite market liberalization in the 1960's, trading companies refused to handle imports from the United States, Korea, Taiwan, and other countries because of the pressure they received from Japanese steel and textile manufacturers. As a result, developing-country producers like Taiwan, Korea, and Hong Kong, which have natural markets in Japan for their steel, textile, and apparel production, have always had to concentrate their marketing efforts on the United States, resulting in the tremendous import penetration and job loss complained of by our domestic industries today.

The legislation I introduced is designed to deal with these practices when we discover them, prevent irreparable damage to American industry, and ensure us market access. The bill requires the U.S. Trade Representative to take action—either negotiation of a settlement with the offending government or retaliation—in response to a finding of burdensome anticompetitive practices. As a nation we must respond swiftly to these types of nontariff barriers which prevent our products access to lucrative markets. This legislation would accomplish that goal.

In recent testimony before the Finance Committee on the distinction between fair and unfair trade, Prof. Harry First of New York University Law School discussed anticompetitive practices as unfair trade practices. Another recent article in the Journal of Commerce discusses the way in which Japan uses cartels to protect weak industries from stronger foreign competition. I ask that this testimony and the article be printed in the RECORD.

The material follows:

DISTINGUISHING BETWEEN "FAIR" AND "UNFAIR" TRADE PRACTICES OF FOREIGN COUNTRIES

(By Harry First)

Mr. Chairman and members of the Committee. I am submitting this Statement in the hope that I can assist the Committee in its effort to set an overall framework for United States trade policy. My area of specialization is antitrust law,[1] and over the past several years I have become increasingly concerned about the application of antitrust principles in an increasingly internationalized economy. In 1983-1984 I was a Fulbright Research Fellow in Japan and a Visiting Professor on the Faculty of Law of Sophia University in Tokyo. During that period I engaged in research on the content and enforcement of Japan's antitrust law; this study enabled me to gain a greater appreciation of how antitrust enforcement relates directly to US concerns over foreign trade and trade policy.

My research subsequently came to the attention of the American Natural Soda Ash Company ("ANSAC"), a Webb-Pomerene Association whose purpose is to enable US soda ash firms to compete more effectively aboard. ANSAC believes, as do I, that greater attention to the enforcement of foreign antitrust laws must be an important component of US policy. Accordingly, ANSAC requested that I prepared this Statement to elaborate on this view.

My statement is divided into three parts. In Part I, I discuss the importance of focusing on private unfair trade practices and the failure of foreign governments to invoke their own laws to stop these activities. In Part II, I suggest that US antitrust law offers some useful guidance in determining what practices should be considered "unfair." In Part III, I offer some tentative suggestions on how the United States might increase the enforcement of foreign antitrust law by foreign governments.

I

I begin with an often neglected point. Trade is carried out by business firms, not by governments. Although there is, in each country, a varying amount of governmental involvement with these firms, including, of course, outright ownership, this should not obscure the importance of examining the behavior of business firms as distinct from the behavior of government. Business firms around the world make numerous decisions which may have a significant impact on the ability of US firms to compete: these decisions can involve the purchasing of inputs, the pricing and distribution of outputs, mergers and consolidations, point ventures, the acquisition and licensing of technology, the participation in industry groups which set standards or establish the "rules of trade."

In recent years our trade policy has been concerned with such activities mainly to the extent that we could connect them to government action. Indeed, the press release calling for these hearings requests comment on how to distinguish between "fair" and "unfair" trade in the context of a legislative focus "on the 'unfair' trade practices of foreign nations" (emphasis added). This focus leads us, first, to overestimate the importance of foreign government ministries in controlling trade; and, second, to underestimate the significance of collusive behavior by private firms, which can at times effectively control foreign markets to the detriment of US firms and all consumers. The result is a deflection of our trade policy. When ministries like Japan's Ministry of International Trade and Industry (MITI) bemoan their lack of power to control today's markets we are left with no remedy other than to disagree with their assessment and ascribe to government a power which it might not have.

This brings me to my second, and even more neglected, point. To say that the conduct of foreign private firms might be at least as significant a barrier to foreign trade as foreign government policy does not mean that government policy is irrelevant to private action. On the contrary, there is a very significant relation between government policy and private firm behavior, but it is a relation we miss because it does not occur. This is the failure of foreign governments to enforce their own antitrust-type laws, laws which, if enforced, could open markets to competition. Governmental willingness to allow cartels to, for example, exclude foreign competitors, or fix high resale prices, or jointly cut prices to gain control of an industry, is just as much government policy as any decision to grant the industry a subsidy or tariff protection. Indeed, the economic benefits to the private firms are precisely the same.

Our disinterest in foreign antitrust enforcement springs from a number of factors. For one, I think we underestimate how many governments have adopted antitrust provisions. Antitrust laws have been adopted by a majority of the twenty-four members of the Organization for Economic Cooperation and Development (OECD), a group which includes not only Western European countries, but Japan, Australia, and New Zealand. The European Community has a transnational antitrust law, established in the Treaty of Rome in 1957. Other members of the antitrust club include countries as diverse as Korea, Taiwan, Argentina, Brazil and India.[2] Although many of these laws may have been adopted with US encouragement, we should not therefore assume that these antitrust laws must be legal orphans in their new foreign countries. The opposite, in fact, is true. Each country has placed its own stamp on its antitrust laws; in some countries, such as Japan, the legislatures have strengthened the original provisions. We thus need not feel embarrassed about urging these countries to enforce their own laws.

Another reason for our disinterest is that we have lost sight of how the antitrust laws can be used *for* business. The growth in foreign antitrust legislation was in part a post-World War II phenomenon, responsive to the lessons learned at the time. We saw that the private cartel movement had been allied with the growth of totalitarianism;[3] and that cartels hurt not only consumers but also deprived businesspeople of economic autonomy.[4] These concerns have faded from our view. Today, US antitrust enforcement policy views antitrust as being more often harmful than helpful to the economy or to business firms.

Current devotion to a laissez-faire antitrust policy, however, assumes a relatively open economic system. Whatever the truth of that in the US, foreign economic systems are often not vary open, particularly to outside competition. A case in point is the soda ash market in Japan. In 1983 Japan's Fair Trade Commission brought a proceeding against four Japanese firms which manufacture synthetic soda ash and import natural soda ash into Japan (the "Soda Ash Cartel case").[5] This was one of those rare cases in which Japan's government, after prodding from the US Embassy in Tokyo, took antitrust action against a cartel of Japanese competitors. This cartel had been restricting imports of natural soda ash for a decade. In the year following entry of the FTC's order, soda ash imports increased from 58,000 tons to 126,000 tons. This was testimony to the usefulness of foreign antitrust law enforcement to US business in opening markets—as well as the usefulness to Japanese consumers who were now able to buy the preferred product.

The Soda Ash Cartel case is one of the few examples where we have forced a foreign government to alter its policy of weak antitrust enforcement and police the conduct of private firms. It is also an example of how it may be as difficult to get an uncooperative government to enforce its antitrust laws as it is to get it to change other government policies which protect markets and hinder competition. It turns out that the relief order the FTC entered in the case was distressingly inadequate. The United States Trade Representative's most recent National Trade Estimates Report shows that the US industry's share of the market will decline from 17 percent in 1984 to 15 percent in 1985, and the US government must once again ask Japan's FTC to enforce adequately its antitrust law in this area. Thus, the Soda Ash cartel case stands as continuing testimony to how the combination of clearly private cartel behavior can interact with passive government enforcement, thereby creating an "unfair trade practice of a foreign nation."

II

We have spent nearly 100 years in the United States trying to distinguish "fair" and "unfair" trade practices, trying to decide what might be beyond the bounds of permissible competition. All too often in this debate the term "fair" has been a code word for protectionism. There were twenty-three volumes of Codes of "Fair Competition" adopted between 1933 and 1935 under the National Industrial Recovery Act, codes which reflected "the businessman's ethical principle that the price cutter is a 'chiseler.'[6] The "Fair Trade" movement sought to relieve small retailers from price competition by allowing resale price fixing; this departure from normal antitrust principles lasted nearly 40 years.[7] Thus, the usual antitrust view is that what some sellers perceive as "unfair" competition is really only hard competition.

"Fairness" having been given a bad name, some would perfer to delete the concept from antitrust consideration. I would take a different view. I believe that our antitrust experience shows the importance of retaining some concept of "fairness" in the operation of our economic system; but this experience also suggests the limits of the concept. More to the point here, both lessons may usefully be applied on the international level, where the concept of "fairness" similarly is threatening to become a code word for protectionism.

1. We have not had notable success in formulating a generic difinition of "fairness" in domestic antitrust legislation. When Congress enacted the Federal Trade Commission Act in 1914 it gave the FTC power to enjoin "unfair methods of competition," preferring this broad approach to specifically designating certain practices as illegal. Our experience indicates, however, that the FTC has stayed fairly close to business practices considered "anticompetitive" under traditional antitrust standards. Even when the Supreme Court affirmed the Commission's power to apply its mandate "like a court of equity" and consider "public values" beyond those of the antitrust laws, the Commission did not seize the opportunity.[8]

2. Rather than a broad generic approach to "fairness," we do better with a focus on fairness as it relates to specific practices in a system of marketplace competition. Of course, we still need some overall guidance for the concept of fairness. Dirlam and Kahn, in their book *Fair Competition*, suggest that "[f]air competiton is supposed to promote efficiency, and it is hoped that rules of fairness will ensure the preservation of competition itself."[9] This guide thus encompasses two benchmarks for fairness—the promotion of efficiency and the maintenance of a competitive process. The rules we adopt for international competition should seek efficient outcomes through the competitive process. They should be directed at providing the opportunity for all sellers to reach the market, so that competition "on the merits" can occur and the most efficient producers succeed.[10]

3. Without providing a laundry list of every practice which U.S. courts have found to be anticompetitive, I think that there are certain practices which have historically been condemned because they "deprive . . . rivals of a fair opportunity to compete."[11]

a. Boycotts—where members of an industry try to exclude competitors by jointly refusing to deal with them or by jointly using their power to coerce others to refuse to deal with them;[12]

b. Exclusive Dealing—where a significant percentage of a market is foreclosed to outside suppliers by virtue of longterm supply contracts,[13] or by virtue of ownership integration;[14]

c. Tying and Reciprocal Dealing—where sellers (tying) or buyers (reciprocity) condition sales or purchases on the acceptance of a less-desired additional product;[15]

d. Bottleneck and Monopolistic Refusals to Deal—where a monopoly buyer or seller uses it market power in the monopolized segment of the market to adversely affect competition at a potentially competitive level;[16]

e. Predatory Attempts to Monopolize—where a monopoly seller, or group of sellers, attempt to exclude an equally efficient competitor from the market, with the intent thereafter to obtain monopoly profits.[17]

4. There are, of course, many governmental policies affecting trade which do not deal directly with opportunities to compete, but can give protected firms and advantage over U.S. competitors; examples include tariffs, subsidies (whether through direct expenditures or indirectly through the tax system), access to technology, and government procurement. Whether these advantages are "unfair" often depends on the extent to which US firms receive similar advantages in US markets; this is the subject of much dispute, and our own practices often weaken our arguments against them in other countries. The antitrust view of fairness is not subject to a similar charge. All firms operating in the US are entitled to, and receive, these protections. Private cartels face severe restrictions if they attempt to exclude competitors from markets. Application of antitrust rules in foreign countries, under legislation similar to our own, can produce a fairer trading system in which we ask only the same opportunity to compete that we offer others here.

III

"Fair trade" is trade in markets where private firms are adequately policed by government to insure all the opportunity to compete. Fairness relates to the process of competition. It does not insure results.

Once we see the connection between private anticompetitive behavior and governmental policy which tolerates such behavior, several approaches suggest themselves. At a minimum, US trade negotiators must put antitrust enforcement on the agenda of trade talks. I am pleased to see that this is being done in Japan with regard to several specific issues. This approach should now be generalized by paying greater attention to private firm behavior in those countries whose markets have been difficult to penetrate.

The step after trade negotiations is trade legislation. Obviously, this presents difficult problems, both in assessing the adequacy of foreign antitrust enforcement in light of concerns over excessive intrusion into sovereign law enforcement prerogatives; and in deciding what U.S. sanctions are appropriate. Proposals to include inadequate antitrust enforcement under Section 301 of the Trade Act of 1974 are certainly one possibility. Whatever the approach, however, care must be taken to write legislation directed at specific practices rather than a generalized directive that foreign countries enforce their antitrust laws. The core unfair competitive practices described above would be a good start, and would avoid the trap of condemning nothing while appearing to condemn all.

Concentrating attention on private cartels and foreign antitrust enforcement will not solve all unfair trade problems. Industries which find it difficult to compete—whether because of unfavorable exchange rates, high labor costs, or inferior technology—will not be helped by being given a fair opportunity to compete in foreign markets. This approach will help only those U.S. firms whose products can be successful in foreign markets. These are our winners. We should give them all the help we can.

JAPAN'S ANTITRUST POLICY: IMPACT ON IMPORT COMPETITION

(By Harry First*)

The thesis of this paper is that the failure of Japan's Fair Trade Commission to more vigorously enforce Japan's Antimonopoly Act has adversely affected the ability of imports to compete effectively in Japan. This policy of inaction is government policy. Just like tariffs or targeting, it deserves the attention of those interested in opening Japan's markets to U.S. firms as fully as U.S. markets are open to Japanese firms.

On March 11, 1983, the Fair Trade Commission issued a "Recommendation Decision" involving four firms which manufacture synthetic soda ash and import natural ash. Under the Antimonopoly Act, a Recommendation Decision is the minimal formal level of FTC procedure; it represents a "finding" by the FTC that the Act has been violated, but this finding is made prior to the initiation of any formal complaint or hearing. The decision sets out recommended appropriate remedial measures, along with the facts supporting the Commission's findings.

The FTC found that the four soda ash companies had violated Section 3 of the Antimonopoly Act, which prohibits unreasonable restraints of trade, that is, agreements which affect price or limit output. These are the facts according to the FTC: The four defendants are the only soda ash manufacturers in Japan. In 1973, following liberalization of soda ash imports, the defendants entered into a memorandum agreement to prevent "disorderly importation" of inexpensive natural soda ash. They established a joint venture, along with seven trading companies, to build and operate a silo facility to receive and store natural soda ash. They then agreed to import natural soda ash, appointing four of the trading companies to handle the actual import arrangements, and the other three to distribute the ash from the silo to the defendants. The silos were made available only for soda ash imported by the four defendants through the trading companies. Equal commissions were paid to each of the trading companies regardless of the actual amount of import and domestic sales. The silo company, with a 30,000 ton capacity, began operations in 1975.

Although the four defendants agreed on an initial allocation of imports among themselves, they also met each December to set the total imports for the following year. Further, the 1973 memorandum provided that in the event additional U.S. companies wished to export natural soda ash to Japan "as new entrants," the four defendants "would cope with the problem jointly." Such an event occurred in 1979. At that time the defendants caused an alternation in the import-distribution system, switching trading company assignments around so that two new entrants could be served by one of the trading companies which was currently acting as importer (and was part-owner of the silo company).

The Recommendation Decision required the defendants, inter alia, to end the agreement on import quantities, allocations, price, and distribution channels. They were also required to "not unreasonably restrict" usage of the silos. The defendants accepted the decision. Data provided by the FTC show that imports of soda ash went from approximately 58,000 tons in 1982 to 126,000 tons in 1983; another report predicted an additional 40 percent increase for 1984.

On its face, the Soda Ash case demonstrates how a decision to require Japanese firms to follow Japanese law can aid foreign firms, giving them the opportunity to compete in Japan's markets that Japanese law is supposed to guarantee. If all the case showed, however, was a vigorous FTC policing an aberrant situation by knocking a few firms back into line, then the case would not deserve much examination. In fact, what this case shows is the timidity of antitrust enforcement. What it suggests is an unwillingness to really deal with restraints on import competition, restraints which go far beyond the soda ash agreement.

To see this point, we need to return to the beginning of the story. The memorandum was signed in 1973; the Recommendation Decision was not entered until 1983. What finally triggered FTC interest? It was not the use of its substantial investigative power. Rather, it was a complaint from the U.S. Embassy acting on complaints voiced by U.S. producers.

Next, we need to look at who was not charged—the trading companies. It is hard to avoid the conclusion that they were

Footnotes at end of article.

active co-conspirators. They were co-venturers in the silo company. They were importing soda ash on behalf of U.S. firms, and then selling it to the U.S. firms' competitors (all the defendants were manufacturers of synthetic soda ash). The importing trading companies accepted the import quota agreed upon by the four defendants. Each of the seven then split commissions equally without regard to individual sales, thereby diminishing incentive to increase the sales of any particular U.S. competitor. Finally, when new U.S. entrants appeared, the trading companies simply swapped clients rather than break the quota system.

Next, we need to examine the competition story set out in the FTC complaint. Why was the agreement among the four companies effective in restraining import competition? After all, the four were not the only consumers of natural soda ash; in fact, only two of them used soda ash in their manufacturing processes. Soda ash is used in a variety of industries—bottle and window glass, soap, crude oil refining. All these manufacturers were required to pay higher factor prices; presumably, they would have preferred the lower prices offered by U.S. importers. Why could not the U.S. firms have simply avoided the four defendants (and their trading companies) and dealt directly with these customers?

One explanation might be the silo facility.[2] Perhaps it was an "essential facility," access to which would be required to compete effectively. Although it seems likely that use of the facility would have made it easier for new firms to enter the Japanese markets, there is no indication either that seller-provided storage was a requirement for successful sales, or that it would have been impossible for importers to build their own storage facility.

The more likely explanation lies outside the story told in the FTC decision. Apparently, the defendants, producers of synthetic soda ash, threatened their customers with a future refusal to deal, telling them that they would not sell to those who now purchased from the importers, if import supply became unstable in the future. Without this threatened refusal to deal, the defendants could not have controlled the actions of their customers, whose normal business interests would have led them to seek cheaper supplies. These joint refusals to deal violate Section 19 of the Antimonopoly Act.[3] Failure to specifically charge the defendants on this ground, like the failure to charge the trading companies, weakens the impact of the decree. The defendants were left free to employ their most effective weapon against their competitors.

There is a final important gap in remedy. The 1977 amendment to the Antimonopoly Act made a surcharge mandatory under the following circumstance: Whenever a firm "effects an unreasonable restraint of trade . . . which pertains to the price of goods . . . or results in affecting the price of such goods . . . by curtailing the volume of supply. . . ." This, of course, is exactly what the FTC found in the Soda Ash case. But it did not impose the mandatory surcharge, nor did it explain its reasons for ignoring this statutory requirement.

Given all that the FTC did *not* do, it should not be surprising that complaints are again surfacing about the behavior of the soda ash companies. In the year following entry of the decree, Japanese newspaper reporters began telling the Commission of renewed threats by the defendents to refuse to deal with those who buy imports; the U.S.-Japan Trade Study Group made a similar report.[4] So far, however, the FTC has not done anything to deal with these allegations.

The Soda Ash case suggests the role which antitrust enforcement could play in assuring competitive access to Japan's markets. It also shows how, even in a case in which enforcement appears vigorous, enforcement is in fact far short of what the law would allow. Of course, often the FTC is not even this vigorous. It is prone to allow defendants to escape with a warning, as it did in its 1984 decision regarding an agreement among domestic synthetic rubber manufacturers to restrict imports of synthetic rubber from Taiwan.[5] Further, there is a strong belief in the business community in Japan that agreements to restrict imports, backed by threatened refusals to deal, are quite prevalent. The U.S.-Japan Trade Study Group Report states that "Japanese businessmen acknowledge that such pressure is fairly commonly applied by Japanese firms. . . ." [6] Published reports of this pressure have surfaced in the petro-chemical, fertilizer, and caustic soda industries.[7] So far, the FTC has not acted.

As important as this kind of enforcement would be, however, concerted refusals to deal with low-priced imports is not the only area of weak enforcement which affects import competition. I would like to suggest several other areas in which a change in FTC behavior could have a procompetitive effect which could benefit the position of imports.

First is the Commission's failure to pay more attention to the market for legal services, especially with regard to foreign lawyers. At present, Japan's government has attempted to deflect U.S. criticism of Japan's refusal to allow U.S. lawyers to advise clients in Japan by taking the position that this question is one for the Japan Federation of Bar Associations, a private trade association of lawyers. As might be expected, the Federation has not embraced the principle of opening its markets to new competitors.

The problem of allowing foreign lawyers to "practice law" in Japan has become enmeshed in issues of reciprocity, in the debate over whether having more lawyers in Japan will have an adverse effect on Japanese society, and even in negotiations over trade frictions. Lost in this debate has been concern with competition policy. Near total exclusion of foreign lawyers and law firms not only adversely affects these sellers of legal services. Decrease in the number of competitors affects consumer choice. All lawyers' services are not a deadweight loss to society despite the usual criticisms of lawyers, it should not be forgotten that they do act to facilitate economic transactions, and that they can be useful in assisting clients who wish to achieve their business objectives. If foreign lawyers are most likely to serve the submarket of international business clients, it may well be that an increase in supply and competition in this market will lead to an increased ability of these firms to engage in economic transactions in Japan, and to penetrate Japan's markets.

Whether new entrant law firms would assist the entry of new imports, or represent current competitors (whether Japanese or foreign) intent on blocking them, is not clear. What is clear, however, is that the FTC has not articulated the policies favoring competition in this area. Normal competitive analysis would at least be skeptical of cartel control over entry of competing lawyer and would predict gains at least in the primary lawyers market.[8] The Federation of Bar Associations does not appear to have any legally granted antitrust immunity. An investigation of the Federation's behavior might at least prod the Federation to adopt a more procompetitive policy. Instead, the FTC has left the matter to the parties "for negotiation."

This leads to a broader category of economic policy areas in which the FTC could improve the access of foreign firms to Japan's markets. It could act as "advocate for competition" in those matters of economic policy which have been given to other Ministries. This role would represent a change from the FTC's current posture of being a ministry which directs business, whether through guidance or orders, to end anticompetitive behavior; but it would not be inconsistent with the Commission's willingness to study issues of market structure and economic behavior. The role of "advocate for competition" should not be narrowly conceived in terms of advocate for foreign competition; rather the FTC should pursue a mission of seeking to increase competition generally in Japan's economy in much the same way that the U.S. Department of Justice's Antitrust Division does. Pursuit of this affirmative role, of course, would include import competition. Indeed, in many areas, imports are the most likely potential entrants.

There are many recent examples of policy issues in which an active FTC role might affect the competitive position of imports. These examples include: legislative battles over the proper structure for a privatized NTT and Japan Tobacco and Salt Monopoly Corporation; foreign access to VAN systems; the entry of commercial banks and securities brokers into the trust banking business; the type and length of protection for computer software programs. These are significant economic issues over which the FTC does not have direct jurisdiction; but the FTC's institutional posture as an advocate for competition might lead others to pay more attention to the impact on competition of their decisions.

The Commission has occasionally taken such an approach,[9] but, unfortunately, rather than acting as advocate for competition, the Commission's usual approach has been to close ranks with other Ministries when foreign criticism arises relating to opportunities to compete. This approach is exemplified by the Commission's 1983 Report on "Trade Frictions," in which it found virtually no competitive problems which particularly face foreign firms. The FTC's approach was one of looking for discriminatory barriers, rather than asking more general questions relating to the degree of competition in the markets studied. The general approach of advocate for competition, however, would have uncovered competitive problems, whose solution could benefit foreign and domestic competitors.

FOOTNOTES

* Professor of Law, New York University School of Law. The author would like to thank Richard W. Rabinowitz, Esq., for his helpful comments on an earlier draft.

[1] See U.S.-Japan Trade Study Group, Progress Report: 1984, at 69 (1984).

[2] The importance of the silo facility is developed in Rapp, infra.

[3] Pursuant to section 19, which forbids "unfair trade practices," the FTC has designated sixteen types of practices which fall into this category. Designation 1 covers concerted horizontal refusals to deal "without proper justification." Designation 2

covers unilateral refusals to deal under circumstances which are "unjust." Designation 11 forbids "unjustly dealing" with another party on condition that the party "shall not deal with a competitor, thereby tending to reduce transaction opportunities" for the competitor. Although it is not clear the extent to which the FTC requires proof of anticompetitive impact in such refusals (judged, for example, by the market share of the firms threatening the refusal), it would appear that the Soda Ash cartel did have sufficient market power to adversely affect competition through its threatened refusal to deal.

JAPAN'S CARTELS PROTECT WEAK INDUSTRIES

(By A.E. Cullison)

TOKYO.—Ever since the Japanese began to accumulate massive annual surpluses with their trading partners early in this decade, government officials and economists in the United States and Europe have been criticizing Japan for maintaining a wide range of industrial cartels to protect their weaker sectors from foreign competition. Such criticism is bound to increase in the future as Japan's surpluses continue to expand.

Whether or not it is an accurate view, U.S. and European economists insist that if it were not for Japan's 431 officially recognized and highly protective cartels, their countries would be in a position to sell more of their manufactured goods in Japanese markets. This seems a reasonable assumption.

Therefore, the argument goes, if only Japan's Fair Trade Commission would assert itself and exercise its authority by eliminating some of the more blatant cartels it just might prove possible to provide somewhat greater access to foreign products. Another reasonable assumption.

Nevertheless, most economic analysts in Tokyo agree that it would prove diabolically difficult for the FTC, such as it is, to remove a reasonable number of domestic cartels that today protect 103 different products and services throughout the country.

Unfortunately for the FTC's authorities, the Japanese government has never permitted them to enjoy an adequate budget. Their investigative staff is always seriously undermanned and this is no accident. From the point of view of Japanese business and the country's business-oriented bureaucrats, the FTC—if not done away with entirely—should be kept as weak as possible.

Further aggravating for those who would like to see the cartels removed, is the fact that most of these defense mechanisms are not based upon Japan's Anti-Monopoly Law but on other commerical laws that provide for the Anti-Monopoly Law's exceptional applications.

If these together were not sufficient to discourage the FTC as it attempts to promote fair competition in the marketplace, it should be noted that in the past certain completely illegal cartels have turned up, leading some foreign economists to suspect that a number of secret industrial arrangements exist right now in Japan to further restrain competition.

Not all of these cartels—both legal and illegal—restrict the possibilities of foreign manufactured goods becoming competitive in Japan's markets. But a considerable number do.

And it is particularly those cartels, which defend the Japanese industries involved from competitive imports, that stand the best chance of surviving for a long time, despite the best efforts of the nearly impotent FTC.

However, FTC officials have been bitterly stung by charges in Washington and other Western capitals that they are at best ineffective. As a result, they now claim that they intend to tighten controls on the cartels. But it is duly noted that the FTC talks of tightening controls on the cartels and not phasing them out one by one as they should.

Certainly, Japan's FTC is not talking about clamping down on those cartels outside the Anti-Monopoly Law, at least not just yet. This is mainly because these laws outside the Anti-Monopoly Law are aimed at promoting stabilized growth or structural reforms in those industries that remain uncompetitive and are more or less marginal.

In effect, most of the industries in Japan protected by these notorious cartels are being bailed out by the Japanese government despite the fact that this policy is contradictory to Tokyo's insistence on the values of free trade and elimination of protectionist policies in other countries.

Put another way, by permitting so many cartels, the Tokyo government is massively intervening in the market mechanism and preventing foreign imports from gaining a foothold in those specific sectors where non-Japanese goods are most competitive, and have the best chance of gaining market penetration. ●

HEALTH FAIRS

● Mr. GORE. Mr. President, I am an enthusiastic supporter of Health Fairs and have sponsored the House and Senate Health Fairs for the last 5 years. Health Fairs give people an opportunity to gain vital health screening and health education services at no cost. It is a program that benefits all through a partnership of corporations, the media, and volunteer organizations.

In a recent edition of the AMA Journal, an article was interpreted by some to be critical of the Health Fair movement. The author of that article was deeply concerned that his article might have given a false impression and set the record straight in a letter to the president of the Health Fair organization, Jack Marshall. I ask to have the letter reprinted below.

Health Fairs have been of enormous benefit to Capitol Hill employees and millions of Americans across the country. The Health Fair movement has enormous potential and is worthy of our strong endorsement.

The letter follows:

INSTITUTE FOR HEALTH RESEARCH,
HARVARD COMMUNITY HEALTH
PLAN, HARVARD UNIVERSITY,
Boston, MA, November 4, 1985.

JACK A. MARSHALL,
President, National Health Screening Council for Volunteer Organizations, Kensington, MD.

DEAR MR. MARSHALL: Thank you very much for your letter of October 30. I am, indeed, distressed to learn that my analysis of health fairs, published in the Journal of the American Medical Association last month, has resulted in any negative impressions of NHSCVO or of the health fair movement in general. This letter is intended to help correct any such misimpression.

Throughout my research on health fairs, I remained greatly impressed with NHSCVO and with other major leaders and sponsors in the health fair movement. The professionalism, enthusiasm, caution, and willingness to engage in self-examination that I saw especially at NHSCVO marks, in my view, an organization of the highest integrity. In what I regard as the first major phase of development for health fairs—the growth phase—your organization's leadership has been creative and highly effective, and has doubtless resulted in improved health for many participants. It is all the more remarkable that this growth has been achieved with basically volunteer workers and on a minimal budget. Your contributors' dollars have gone farther with NHSCVO than they could have in most other health-related enterprises.

During this important developmental phase, I believe that NHSCVO has been appropriately broad in searching for forms of education and screening which engage people's attention in health fairs. My research was directed toward the future development of health fairs, now that they constitute an enterprise of sufficient magnitude to focus efforts more clearly on the most efficacious procedures.

Concern over the amount of screening that is now being done at health fairs did not originate with my research. Indeed, your own staff have been attempting for some time to refine guidelines for screening based upon the best available medical research. I intended my research to support, and be continuous with, NHSCVO's own efforts to improve health fairs based on your extensive experience and sound goals. My conclusions are not far from those which I heard from many leaders in the health fair movement; namely, that it is now time to focus health fair screening efforts on a smaller number of tests and conditions, while, at the same time, continuing to develop health fairs as settings for effective health education and life-style interventions.

The exact choice of screening procedures to retain in health fairs involves difficult judgments, and depends strongly on the demographics of the participant populations. In many cases, we do not have enough information in health care research to make strong recommendations, and I see NHSCVO as potentially able and willing to play a key role in facilitating the collection of screening and follow-up data permitting us all to learn more about when and how to screen. Here, too, I found during my re-

search a supportive and intellectually rigorous set of interests within your staff.

In understanding the thrust of my evaluation, it is also important to realize that I did not deal at all with the most significant role that health fairs play; namely, the education of participants in matters related to their own life-style and health care choices. We badly need sound educational vehicles in this country to supplement the admittedly low level of effort in education that is currently present in much of our health care system. NHSCVO has been, and should remain, a key player in developing community-based health education efforts.

NHSCVO is probably the finest volunteer organization which I have ever had the pleasure of getting to know, and I regard its efforts in the health fair movement to date with the highest respect. My *JAMA* paper was meant to stimulate some detailed scrutiny of screening strategies in health fairs—which NHSCVO had already begun on its own—and not at all to decrease the level of interest in or support for the health fair movement in general. Your sponsors should continue their good work, your contributors can be proud of what you have done and will do, and your participants will benefit from the education and, in the future, targeted screening which they can receive at the fairs you sponsor. Anyone who construes my paper to constitute an assault on the health fair as a concept is the victim of gross misinterpretation.

Please feel free to share this letter with anyone you wish, including those whose comments on my paper suggest that they have misinterpreted me. In addition, I hope that you will feel free to call on me in the future for advice or clarification.

Best wishes,

DONALD M. BERWICK, M.D.,
Vice President, for Quality of Care Measurement.●

NOTICE OF DETERMINATIONS BY THE SELECT COMMITTEE ON ETHICS

● Mr. RUDMAN. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The select committee has received a request for a determination under rule 35 which would permit Mr. W. Proctor Jones, a member of the staff of the Committee on Appropriations, to participate in a program in Taiwan, sponsored by the Chinese Culture University, from January 1, 1986, to January 10, 1986.

The committee has determined that participation by Mr. Jones in the program in Taiwan, at the expense of the Chinese Culture University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. David Griswold, a member of the staff of Senator JOHN H. CHAFEE, to participate in a program in Taiwan, sponsored by Soochow University, from December 27, 1985, to January 5, 1986.

The committee has determined that participation by Mr. Griswold in the program in Taiwan, at the expense of Soochow University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 which would permit Mr. Mark Haynes, a member of the staff of the Committee on Environment and Public Works, to participate in a program in Taiwan, sponsored by Tunghai University, from January 5, 1986, to January 12, 1986.

The committee has determined that participation by Mr. Haynes in the program in Taiwan, at the expense of Tunghai University, is in the interest of the Senate and the United States.●

THE THREAT OF NUCLEAR WAR

● Mr. LEVIN. Mr. President, prior to the Geneva summit, the Washtenaw County, MI Women's Action for Nuclear Disarmament [WAND] presented me a copy of a letter they sent to President Reagan, and a petition signed by over 5,000 people deeply concerned by the threat of a nuclear war.

During this season of hope and good will, I want to share with my colleagues the letter and message WAND sent to the President. While their message is one of hope, it is also one of deep anxiety. As their letter states, the signers are united in their "concern for the lives of our children and the future of their world."

The summit has been concluded, but the ongoing effort to find a path to a safer world must continue. During these holidays, we should rededicate ourselves to seeking ways to ensure our planet's survival.

The text of the letter follows:

WASHTENAW COUNTY WOMEN'S ACTION FOR NUCLEAR DISARMAMENT, INC.,
Washtenaw County, MI.

President RONALD REAGAN,
The White House,
Washington, DC.

DEAR PRESIDENT REAGAN: These petitions were signed as a gesture of hope and extreme concern. They were circulated by the Washtenaw County chapter of the national organization of WAND, Women's Action for Nuclear Disarmament. Our group is made up of several hundred people, mainly women with children, all of us united in our concern for the lives of our children and the future of the world. Most are not what we would have called radicals in the 60's: many have never done anything "political" in their lives until they found WAND and realized many people were sharing their fears.

Over the course of two and a half months more than 5,000 people signed this petition to send to you. People of all ages signed and, since Ann Arbor is a place where visitors come from all over, people from all over the country signed. We decided to make this a brief project. Otherwise we could have collected many thousands of signatures, but we felt the message would be the same either way. Almost everyone who was asked was very eager to sign. In addition, our children made a wonderful 40-foot long illustrated petition of their own. They are extremely concerned about nuclear war and wanted you to know. We can't bear to part with the banner but plan to make a book of photographs based on their drawings and will send you a copy when it is done.

Our group is fairly new and we have found that many people just do not realize the threat to us all that is posed by nuclear weapons. No one would be unaffected in a nuclear war, no one would be safe. Our food, our atmosphere, our way of life would not survive. Many millions would be killed. These are facts which we believe all Americans should understand and we feel our leaders should be the ones to explain them to us. It is so easy to listen to comforting messages, and so very dangerous. We will lull ourselves right into oblivion.

You have the most important job that any American president has ever had, and that is to save our planet. When you and Secretary General Gorbachev meet in November, we pray that your meeting will be the beginning of some concrete steps to reduce and finally eliminate nuclear weapons. We now have enough to destroy life on earth 67 times over. Just one Trident submarine has the firepower of 6 World War IIs. We don't need any more submarines or any more nuclear weapons.

WAND's motto is "Children Ask the WORLD of Us." This world is shared by all of us, ours to use for as long as we are here, entrusted to our care to preserve for future generations. It is not ours to destroy just as life is not ours to destroy. We think again and again about our children, children of people we love. All those children who did not choose to be born into a world of nuclear weapons. American and Russian, man and woman, we must do what we can for them and for ourselves or we will surely all perish together.

Respectfully,

SHARRON SINGLETON,
President,
Washtenaw County WAND.
SUSAN ELSE WYMAN,
Chairperson,
Petition Campaign.●

RETIREMENT FUND SAFEGUARDS

● Mr. ROTH. Mr. President, this morning's Washington Times carried a column by the chairman of the Subcommittee on Civil Service, Post Office, and General Services of the Governmental Affairs Committee, TED STEVENS, dealing with the impact on the financial community of the recently passed Senate bill providing a retirement system for those Federal employees hired after December 31, 1983.

I commend this column to you for I believe it will put to rest the concern of some that the financial structure of this Nation may be unduly influenced by the sizable amount of funds contained in the retirement thrift plan. I submit for the RECORD the complete text of the column by the senior Senator from Alaska which appeared in the

December 19 edition of the Washington Times.

The material follows:

RETIREMENT FUND SAFEGUARDS

(By Ted Stevens)

In early November the Senate voted 96-1 to pass legislation establishing a new federal retirement program.

The legislation generally calls for a three-tiered retirement program for new federal employees.

The third tier is a tax-deferred voluntary savings program where employees who contribute to the plan find their contributions matched by the government. This is similar to a 401(k) plan provided by private industry, which is a form of tax-deferred savings.

The monies from the third tier are pooled in one large fund, managed by a board, composed of government and employee representatives, much like any private-company pension plan, and invested in private industry.

Recently, arguments have surfaced that the board potentially could manipulate assets of the retirement fund for political purposes. Clearly, such arguments show that their proponents do not understand the legislation.

The structure of the investment plans in the retirement legislation precludes any possibility of political manipulation. The Senate would not have passed the legislation which near-unanimity if manipulation of monies were possible.

Currently all federal retirement funds are invested in government securities. In the new federal retirement plan, the thrift-plan fund can be invested in three separate funds: a government-securities fund; a fixed-income fund; and a stock-index fund.

Who chooses where the monies are invested?

The board?

No.

Individual employees?

Yes.

Employees essentially choose how much of the total fund is allocated to the specific investment funds, but can the board manipulate where monies are invested within the individual funds?

No.

The government securities fund is composed of special issues of the Treasury. The fixed-income fund will include non-federal securities that guarantee a fixed-rate of return, such as guaranteed interest contracts with insurance companies or certificates of deposit with banks.

The stock-index fund operates by allocating funds to individual stocks within a stock index, at a ratio which is identical to the value of a particular stock to the value of the index as a whole.

For example, if the board chose the Standard & Poor's 500 Index for the fund, monies would be allocated to individual stocks, not by the board's—or anyone else's—discretion, but rather by the value of individual stock compared to the whole index. As the stocks in the index changed in value, so would the allocations from the fund.

The committee report accompanying this legislation stated the following: "Hence no individual or group of individuals [is] capable of manipulating investments. The committee finds the innate structure of the investment funds precludes political manipulation. In each case, the fund is essentially self-managed."

An alternative approach to investing pension-plan funds was proposed which would have permitted employees individually to choose their investment vehicles, comparable to individual retirement accounts (IRAs). The committee that reported the legislation considered this approach and rejected it for a number of reasons.

First: No known private-sector employer provides such a free-wheeling scheme. Instead, the approach in this legislation is patterned after private practice.

Second: Because individual institutions occasionally go bankrupt, employees investing their retirement accounts in such institutions could lose their benefits. An employer who provides a retirement plan for employees bears some responsibility for assuring the plan's integrity. That is why Congress enacted the Employee Retirement Income Security Act, applicable to private pension programs. Under the legislation, pooling employee money and diversifying such money among fixed-income instruments and through a stock index ensures its protection.

Third: There are literally thousands of qualified institutions which would bombard employees with promotional advertising for their services.

Fourth: It would be difficult to administer.

Fifth: This "retail" or "voucher" approach would give up the economic advantage of this group's wholesale purchasing power derived from the group's large size. In that case, employees individually would get less for their money.

Investment of pension funds through the vehicles provided in this legislation is common practice. The investment scheme precludes potential manipulation of pension monies, while granting employees a secure and flexible approach to retirement planning.●

MARTIN LUTHER KING, JR.

● Mr. SARBANES. Mr. President, on January 20, 1986, Americans all across the country will mark the first observance of the Martin Luther King, Jr., birthday national holiday. This marks the culmination of almost 18 years of effort to recognize Dr. King as one of our Nation's great leaders, a giant figure in the evolving history of the United States.

As a cosponsor of the legislation enacted in 1983 which authorized the holiday, I am proud that the State of Maryland has celebrated January 15, the actual birthday of Martin Luther King, as a legal holiday since 1974. This year for the first time, citizens in every State will join in observing the birthday as a time of commemoration, reflection, and peace.

Also this year, I hope to see enactment of legislation which I have introduced to authorize the establishment of a Martin Luther King Memorial on Federal land in the District of Columbia. I urge my colleagues who have not already done so to join in cosponsoring this measure.

The memorial is a project of Alpha Phi Alpha, Inc., the oldest black fraternity in the United States, and as such, will be established at no cost to the United States. Alpha Phi Alpha, of which Dr. King was a member, having joined on June 22, 1952, at Sigma chapter in Boston, MA, will coordinate the design and funding of the monument. The Department of the Interior, in consultation with the National Capital Park and Planning Commission and the Commission on Fine Arts, shall select the site and approve the design. The Secretary of the Interior's National Capital Memorial Advisory Committee, on November 14, 1985, voted unanimously to recommend approval of the project, after hearing testimony from representatives of Alpha Phi Alpha and receiving my statement.

The idea of a Martin Luther King, Jr. Memorial in the Nation's Capital is entirely fitting. What we hope visitors to the monument, and especially the thousands of young people who come to the District of Columbia every year, will come to understand is that it recognizes not only the enormous contribution of this great leader, but also two very basic principles for the healthy functioning of our society.

One is that change, even very fundamental change, is to be achieved through nonviolent means; that this is the path down which we should go as a nation in resolving some of our most difficult problems.

And the other basic principle is that the reconciliation of the races, the inclusion into the mainstream of American life of all its people, is essential to the fundamental health of this Nation. Dr. King preached, taught, and practiced these essential principles.

The memorial, like the holiday we will observe in January, will serve to remind us of the importance of Martin Luther King's dream which he articulated so dramatically in August 1963 in the march on Washington speech at the Lincoln Memorial, one of the most significant events in our Nation's history:

I have a dream that one day on the red hills of Georgia, sons of former slaves and sons of former slaveowners will be able to sit down together at the table of brotherhood.

He went on to say:

I have a dream that my four little children will one day live in a nation where they will not be judged by the color of their skin but by the content of their character.

Eighteen years after his death, America is still striving toward the fulfillment of Martin Luther King's vision. The national holiday we observe in 1986 and the National King Memorial we are working to establish not only pays tribute to him but also confirms the Nation's commitment to rededicating itself to the principles of justice and equality which Dr. King's life exemplified.●

INDIANA SMALL BUSINESSES

● Mr. LUGAR. Mr. President, today, I would like to share with the Senate the outstanding achievements of nine Indiana small businesses as reported in the December 1985, issue of Inc. magazine. These nine businesses are among a list of the 500 fastest growing private companies in the United States, and three of the companies are among the top 25 fastest growing companies. The significant growth of these companies is an indication of their commitment to quality and service and also reflects upon Indiana's favorable business climate and high level of small business support.

Every year, Inc. ranks the 500 fastest growing private companies in America on the basis of sales, employment, profitability, and growth. Nine Indiana businesses are included in this ranking. These include America Trans Air, Indianapolis, IN; North American Roofing, Carmel, IN; General Microcomputer, South Bend, IN; E&A Industries, Indianapolis, IN; DISC, Indianapolis, IN; PURE, Indianapolis, IN; Ram Graphics, Alexandria, IN; Fastec Industrial, Elkhart, IN; and Diversified Systems, Indianapolis, IN.

Two of these companies deserve special mention. America Trans Air was founded in 1973 by its current president, Capt. J. George Mikelsons, who built the company into one of the world's most successful private carriers. In 1981, ATA became a charter airline-operating flights both domestically and worldwide. In their continuing efforts to meet the travel needs of the marketplace, ATA recently received approval to serve certain commercial domestic routes. ATA did more than $139 million in sales in 1984, and experienced almost 21,000 percent growth in sales between 1980 and 1984. America Trans Air ranked seventh overall on the list.

North American Roofing, a roofing contractor in Carmel, IN, has also experienced dramatic growth and was ranked 10th on the list overall. North American Roofing has grown from a 12-person operation in 1980 to 200 employees in 1984. Their sales of $11 million in 1984 represents almost an 11000-percent growth in sales from 1980.

Critics have charged that America's job-generation reflects the replacement of high-productivity jobs with low-productivity, low-wage jobs. However, with respect to these Hoosier business concerns, the dramatic growth in employment has been accompanied by an equally dramatic increase in labor productivity. Average sales per employee for these Hoosier businesses rose from $49,426 in 1980 to $250,720 in 1984, a gain of over 500 percent.

Last year, small business provided a livelihood for over half our population and jobs for 45 percent of the Nation's total non-farm work force. That translates into jobs for over 45 million Americans. The quality management and dedicated work force of these diverse Indiana companies have strengthened our country's economic base. Their entrepreneurial spirit has fostered economic growth and job creation, and exemplifies the success of our competitive free enterprise system.

The success of these companies also demonstrates the favorable business climate Indiana has developed. In October, 1984, another Inc. article chose Indiana as the No. 1 State for business community support and implementation of measures to create a better environment for the growth and development of small businesses. State support was defined in terms of whether or not the States had small business assistance offices, ombudsmen, Governor's advisory councils, legislative committee's, statewide conferences, and procurement set-asides for small business. Indiana ranked near the top in all these areas and first overall.

This unmatched excellence exhibited by the Indiana State government and these Indiana businesses merits attention. I applaud their efforts and wish them continued success.●

THE 25TH ANNIVERSARY OF THE UNIVERSITY OF MEDICINE AND DENTISTRY OF NEW JERSEY

● Mr. BRADLEY. Mr. President, I am pleased to offer my congratulations to the University of Medicine and Dentisty of New Jersey as they celebrate their silver anniversary. As a State institution, the UNDNJ has provided educational opportunities in dentistry and dental care to all New Jersey residents. Education is the chief priority. Their services range from continuing education for practicing dentists to toothbrush training for school age youngsters. The UMDNJ was the first successful dental program in New Jersey and it has grown into the State's greatest resource for dental education and research. With its new facilities in Newark, the New Jersey Dental School's prestige and population has increased throughout its 25 years. Today, this reputable institution offers doctoral degrees in dental medicine in addition to postgraduate specialty training. I hope the UNDNJ-New Jersey Dental School continues to expand in their research and educational capabilities. I applaud their efforts and their remarkable achievements on the occasion of their silver anniversary.●

JUVENILE INDIAN DRUG AND ALCOHOL ABUSE PREVENTION

● Mr. MURKOWSKI. Mr. President, I am gratified that S. 1298, the juvenile Indian drug and alcohol abuse prevention bill has passed the Senate. As an original cosponsor of this bill, I am convinced that it is a much needed piece of legislation. S. 1298 authorizes the Indian Health Service to implement needed programs to treat and prevent alcohol and drug abuse among American Indians and Alaska Natives.

In hearings held in Washington, DC, and throughout the country including Alaska, the devastating impact of drugs and alcohol has been clearly underscored. At the hearing held in October of this year in Anchorage, AK, the Alaska Federation of Natives testified that alcohol and drug abuse threatens the very survival of Alaska Native people and the traditional way of life. The latest Indian Health Service statistics show that Indian and Alaska Native mortality related to alcoholism is 5.6 times higher than the national average. The manifestations of substance abuse are also revealed in very high incidences of domestic violence, suicides, accidental deaths, and child abuse.

Despite overwhelming evidence that alcohol and drug abuse is the No. 1 health problem of American Indians and Alaska Natives, our hearings also revealed that there are embarrassingly few Federal programs in place to deal with this problem. I learned through our hearing in Alaska that the Indian Health Service does not operate a single juvenile drug treatment center in Alaska. In fact, the Alaska Area Indian Helath Service allocates less than 1 percent of its resources for substance abuse.

Because of the seriousness of this health problem and because it is glaringly evident that neither the Indian Health Service nor the Bureau of Indian Affairs has adequately responded to it, I am very pleased that the juvenile Indian drug and alcohol prevention bill is going to receive favorable consideration in the Senate and I intend to keep working to insure that it becomes law.

Mr. President, I commend the able efforts of the Chairman of the Select Committee on Indian Affairs, Senator ANDREWS, for pursuing this legislation. I also take this opportunity to express my appreciation of Mary Jane Wrenn of the committee staff who worked so hard on this bill, and who assisted me in our Anchorage hearing.●

MARTIN LUTHER KING DAY

● Mr. BUMPERS. Mr. President, on October 19, 1983, I spoke on the Senate floor and asked my colleagues to endorse, without further delay, the bill that would name a holiday in honor of Dr. Martin Luther King, Jr. I was a proud cosponsor of the bill we enacted. As we near the first official observance of the holiday, I rise to

challenge my colleagues, and the Nation as a whole, to remember Dr. King and the principles for which he stood.

Dr. King's struggle was an American struggle, a patriotic quest for social justice and racial equality. He challenged Americans to realize that the promises of "justice" and the "blessings of liberty" guaranteed by our great Constitution are meaningless unless applied equally to all. Moreover, in an era of turmoil and frustration, he steadfastly advocated nonviolent resistance to bring about change. Dr. King appealed to the decency of America and his words brought out the best in all of us. One life, even one that tragically lasts only 39 years, can dramatically change the course of human events. Dr. King sharply changed the course of American history.

On the coming first observance of the King Holiday, it is not enough simply to remember Dr. King. We must commit ourselves to the principles for which he stood—equality, peace, justice and compassion. Mr. President, the Martin Luther King, Jr. Federal Holiday Commission is circulating a pledge card, asking that on January 20, 1986, we pledge ourselves to "Loving, not hating; Showing understanding, not anger; Making peace, not war." I have signed and submitted my pledge card, and I ask every American to join me in this commitment. If somehow we could all make and keep such a pledge, our world would be a radically different place in which to live.

I also want to take the opportunity to commend Arkansas Cultural Enterprises, Inc., for its effort to make the Dr. Martin Luther King, Jr. Holiday a success.

A.C.E. is a nonprofit group organized in 1985 to foster cultural and ethnic identity and pride. On the first official observance of the King Holiday, the organization will hold a commemorative brunch, the first of what will become an annual event. Georgia State Senator Julian Bond will give the Keynote address, and A.C.E. will give awards to three Arkansans for their contributions to promoting equal rights.

A.C.E. is working with Arkansas' Martin Luther King, Jr. Holiday Commission. I am a member of the Arkansas Commission, and we are working in close concert with the Federal Holiday Commission which was also established this year. I am certain that Arkansas Cultural Enterprise's commemorative brunch will be a success, and I want to congratulate them for this fine event.●

RECOGNIZING CONTRIBUTIONS OF CARL TURNER

● Mr. BINGAMAN. Mr. President, as you know, during 1985 the 50th anniversary of the Rural Electrification Administration was observed with great acclaim and gratitude for all the good things which have been made possible because of its creation. It seems appropriate to me, Mr. President, that as this year closes, I should offer a few words of praise for one of Rural Electric's most deserving workers, Carl Turner of New Mexico.

Mr. Turner is the executive manager of the New Mexico Rural Electrification Cooperative Association. Because of his untiring efforts on behalf of the work of the association, he was recently given the Pioneer Award and Medallion by the National Rural Electrification Cooperative Association. This award is recognition not only of his service to the people of New Mexico but to the people of rural America for his years of work on their behalf. The people who work with him know of his devotion and tenacity in the cause of those issues involving all rural electric cooperatives. We in Congress who have heard him as an advocate for the movement know those same qualities in him and respect his earnest and forthright approach.

The Pioneer Award acknowledges work well done and I am very pleased to add my voice to those which have been raised to congratulate Carl Turner. His professional life has been dedicated to the goal of providing service to the people who need it the most—a goal we all appreciate.●

ANNIVERSARY OF THE BHOPAL DISASTER

● Mr. LAUTENBERG. Mr. President, December marks the anniversary of the Bhopal chemical disaster. One year ago, over 2,000 Indian citizens perished and another 200,000 sustained frightening injuries in what was the worst industrial accident in history.

In the year that has followed, chemical accidents have received front page attention, and the chemical industry, Congress, EPA, and local officials have struggled to understand the implications of Bhopal.

Mr. President, Bhopal was not an aberration of Third World management and technology. There is a common thread linking Bhopal to the United States in the many investigations and reports that have followed the Bhopal disaster. The message in these reports is quite simple: More attention must be paid to safety considerations in process design, operating procedures, and proper maintenance of equipment. Workers, residents, and emergency response personnel must be better informed about the chemical hazards that surround them.

Unfortunately, these chemical hazards are present across our country. A draft EPA report reported on this fall by the New York Times lists nearly 7,000 significant chemical releases over the past 5 years in just a handful of States. These releases have taken a tremendous toll: 139 deaths, 1,500 injuries, and the evacuation of over 200,000 citizens.

As a result, public support is growing for full disclosure of chemical hazards through the enactment of strong community right-to-know programs.

Congress has responded to this concern. Both the Senate and the House Superfund bills include provisions addressing community right-to-know and emergency planning and response. Provisions that I sponsored as a member of the Senate Environment and Public Works Committee would establish the first national inventory of chemicals handled by plants across the country. An important, and controversial, requirement of the inventories in both the Senate and House bills is the reporting of routine, as well as accidental, releases of toxic chemicals into the environment. While I anticipate spirited debate on these provisions, I am hopeful that the Senate-House conference on Superfund will include strong right-to-know and emergency response provisions, and look forward to beginning the conference when Congress returns in January.

Mr. President, the provisions included in Superfund represent important progress, but they are only the first steps in what promises to be a debate that will continue for years. More difficult questions remain to be answered. How do we come to grips with the factors causing these chemical releases? To what extent will industry voluntarily take on the responsibility to put a stop to dangerous accidental and routine chemical releases? To what extent must Congress step in and enact new legislation to regulate the chemical industry. These are all questions that we must tackle next year when we turn our attention to reauthorization of the Clean Air Act and other environmental legislation.

Mr. President, EPA has just formally released a list of 400 acutely hazardous chemicals and guidance for community right-to-know and emergency response programs. This is an important first step, but it must not be the last. More must be done.

EPA proposes to turn this list over to the States and localities without requirements that business disclose information about these chemicals. EPA expects communities to take it from there, and find out what safety equipment or emergency response plans exist at a plant. EPA expects communities to find out how chemicals are handled and transported, and find out

where they are stored on-site and if they are released into the environment.

This program is entirely voluntary. It leaves the locks on the plant gates. It deprives communities of their right-to-know what chemicals exist within their borders. And it deprives us of a national data base.

There is an important role for the Federal Government. And that is why I have pursued amendments to the Superfund that would call on EDP to share these responsibilities with our communities.

Mr. President, I would like to take this opportunity to recognize the excellent contribution that Stuart Diamond of the New York Times has made to this debate over the past year. Stu traveled to India immediately after the Bhopal disaster. He traveled to Institute, WV, following the aldicarb oxime release in August at Union Carbide's sister plant. Since then, he has continued to pursue related issues, soliciting response from a broad cross-section of those involved in and affected by the chemical industry. Through his reporting and insight, we have a clearer picture of what happened in Bhopal and Institute. We can better understand how these accidents relate to chemical hazards across our country. And we have a balanced portrayal of the response in Congress and the Environmental Protection Agency.

Mr. President, I inserted an excellent series of articles on Bhopal by Stuart Diamond into the CONGRESSIONAL RECORD during the Superfund debate earlier this year. Today I ask unanimous consent that a more recent series of articles by Mr. Diamond, written by November and December, associated with emergency response and community-right-to-know issues be printed in the RECORD at the conclusion of my remarks. The focus of the first three articles is on a list of acutely hazardous chemicals and emergency response guidance proposed by EPA. The last article addresses issues related to safety in the chemical industry.

U.S. NAMES 403 TOXIC CHEMICALS THAT POSE RISK IN PLANT ACCIDENTS

(By Stuart Diamond)

The Environmental Protection Agency has concluded that 403 highly toxic chemicals, produced, sold and used throughout the United States, pose potentially serious health dangers to the public in a chemical plant accident.

At least 577 companies at thousands of locations handle these chemicals, according to an analysis of chemical industry data by The New York Times. Some of these chemicals are produced and stored in the billions of pounds near populated areas, while some are so toxic that leaks of only a few pounds could cause injuries to people near plants, the agency said.

The E.P.A. list and its associated documents, obtained from Government officials, are the first major step in a Federal effort to measure the potential for toxic chemical accidents. The documents which took months to prepare, explain how municipalities can determine whether these chemicals are handled in their midst, and offer suggestions for minimizing the prospects of major chemical accidents like those in Bhopal, India, and Institute, W.Va., in the last year.

Some of the material is to be made public this morning in a four-hour teleconference among Federal, state and local government officials and chemical company executives.

"For the first time, people will be able to identify where chemical risk exsits in their communities," Lee M. Thomas, the E.P.A. Administrator said in an interview.

Just how much risk lease substances pose to the public is as yet uncertain. Federal officials stress that the list of chemicals alone is not sufficient to assess the chance of a serious accident. The agency leaves it to residents to determine how much of the chemicals are stored at nearby plants, what the safety equipment and emergency response plans are and whether people live close enough to be harmed in an accident.

"A community should not be unduly alarmed if it funds, within its boundaries, chemicals which meet the criteria" for danger, the agency says. Nonetheless, it says, all the chemicals on the list are considered "immediately dangerous to life and health," and "can cause death or injury in the event of an accidental release into the air."

Moreover, the list does not contain all the important toxic chemicals used in the United States, Government officials say. Only chemicals for which health studies have been conducted—perhaps 20 percent of all the chemicals in commerce—appear on the list, E.P.A. officials said. The agency provided criteria to be used in further investigations of chemicals.

A spokesman for the Chemical Manufacturers Association, Thomas J. Gilroy, said last night, "The agency's objectives, protecting the public, are the same as ours." He said he could not comment on the list because he had not seen it.

MANY SUBSTANCES ON LIST

The substances identified by the agency include cyanides, acids, industrial gases, medical products, metals solvents, plasticizers and chemical intermediates—those used in the manufacture of other chemicals.

Some are widely used materials like sulfuric acid, chlorine and formaldehyde. But others are not usually thought of as toxic materials: pharmaceuticals like vitamins D and K, amphetamine and bacitracin, which are very toxic in large manufacturing quantities.

There are also chemical warfare and tear gas agents; compounds of lead mercury and cadmium; pesticides like parquat, endrin and lindane, and chemical intermediates like methyl isocyanate, which leaked at Bhopal, killing more than 2,000 people and injuring more than 200,000.

The heaviest concentrations of plants that handle the toxic chemicals are in New Jersey, Texas, Louisiana, West Virginia, the Midwest and California. But plants that handle these substances are situated in almost all parts of the country, from Connecticut to Nevada, New Hampshire to Washington State. Some of the companies that handle the largest numbers of the toxic chemicals are in the New York metropolitan area, including some on Long Island, in Brooklyn and northern New Jersey.

LARGE AND SMALL COMPANIES

Large companies like the Dow Chemical Company, Du Pont and the Union Carbide Corporation, whose pesticide plants in Bhopal and Institute caused the widely publicized accidents, often manufacture large volumes of toxic materials, but the handlers of the widest variety of toxic chemicals include many small and medium-sized companies.

The Aldrich Chemical Company in Milwaukee, with $35 million in annual sales, handled the widest variety, 97 of the toxic chemicals. The Aceto Chemical Company in Flushing, Queens, was second with 67, and four of the top 10 were in the Plainview and Smithtown region of Long Island. The Crescent Chemical Company in Hauppauge, L.I., handles more pesticides than any other company on the list, according to the analysis of chemical industry data.

Some of those companies produce relatively small quantities of toxic chemicals for sale to research and high technology concerns. But chemical experts said in interviews that some companies produced dozens of those chemicals, which together pose a significant threat in an accident.

MEASURING RISK OF CHEMICALS

Equations provided in the E.P.A. documents to determine what constitutes a potentially dangerous amount for each chemical make it clear that very small quantities may still pose threats. With chlorine, for example, as little as two-and-a-half pounds could be dangerous to someone 200 feet from a leak.

Some of the chemicals on the list are 10 times as toxic as chlorine, and many are highly unstable.

The E.P.A. suggests that municipalities form groups of local officials, experts, industry executives and ordinary citizens to seek out facilities where toxic chemicals may be used. Cooperation by chemical companies is voluntary, but Mr. Thomas said toxic waste legislation now pending in Congress will require companies to provide information on chemical storage if needed for emergency planning.

Mr. Gilroy of the Chemical Manufacturers Association said yesterday that his group would urge chemical companies to cooperate in such inquiries.

But interviews with chemical company executives last week revealed disparities in how much the companies would disclose about their operations. David R. Harvey, the president of Aldrich, said, "Our general policy is we don't make statements on chemicals we produce."

By contrast, Dr. Ervin Colton, the president of Cerac Inc., which is just down the street from Aldrich in Milwaukee, disclosed the amounts at his plant of each of the 18 chemicals on the E.P.A. list that Cerac handles. That included a few hundred pounds each of cobalt and nickel, 100 pounds of vanadium pentoxide and 15 pounds each of various mercury compounds. "We will absolutely share such information with the public," he said.

CARBIDE REDUCING INVENTORIES

Some of the large chemical companies have begun programs to reduce the amounts of very toxic chemicals they store. Robert E. Pyle, vice president at Union Carbide for chemicals and plastics, has recently reduced companywide inventories of very toxic chemicals by 74 percent. Company officials had independently identified nearly all of the 37 chemicals on the E.P.A. list that Carbide handles, he said.

But industry and Government sources said the E.P.A.'s criteria for potentially dangerous amounts of chemicals may create

some difficulties. Few producers of chlorine, for example, can store as little as two-and-a-half pounds, they said. About 27.7 billion pounds of chlorine are produced each year in this country at more than 60 locations, according to SRI International, a research concern, and at least that many additional companies store it. Commercial quantities may be 100 times greater than the danger level cited by the E.P.A.

Mr. Pyle said it may be necessary to add safety equipment or even stop making some chemicals in certain locations. "We're all going to have to share in mitigating the risk," he said.

The E.P.A. also advises communities to search for toxic chemicals in outside the chemical industry. Many of the toxic materials are purchased from producers by relatively small distribution companies that sell them to users. Some utilities handle toxic chemicals, like the Tennessee Valley Authority, which deals with three sulfur compounds, and Commonwealth Edison in Illinois, which handles vanadium pentoxide.

Bell Laboratories handles the pesticides warfarin and zinc phosphite, according to the analysis of the chemical industry data. The General Electric Company deals with hydrochloric acid and phosgene, a World War II weapon now used in production of pesticides, plastics and dyes, among other products.

STEPS FOR MUNICIPALITIES

The agency suggests that municipalities seek such information by consulting several industry sourcebooks, each listing thousands of chemicals and hundreds of producers and distributors.

They also urge municipalities to ask how the chemicals are handled, what safety precautions are taken, how close they are to the edges of the plant and how they are shipped to or from the site.

The agency also plans to distribute detailed profiles of the chemicals on its list, including handling procedures.

For each chemical, the agency provided equations so that localities can calculate what quantity would pose a lethal threat to areas surrounding a plant based on distance from a leak.

State officials say they are concerned that the high number of chemicals on the list will overwhelm local resources in seeking out the most important risk. "We just don't think we can go to all 168 towns in Connecticut and provide help to each of them," said Charles J. Zieminski, an official in the state's Department of Environmental Protection.

Mr. Thomas of the E.P.A. also expressed some concern that localities will lose momentum as time passes. "This must be more than one-time effort," he said.

LARGE NUMBER OF PESTICIDES

The largest group of chemicals on the list, about 140, are pesticides and pesticide components. Included on the list is nicotine, used in various pesticides as well as in tobacco products.

There are about 15 cyanide compounds on the list, including potassium cyanide, acrylonitrile (vinyl cyanide) and hydrogen cyanide. Acryinotrile is handled in about 50 places, including several locations in New Jersey. About 2.2 billion pounds is produced each year, largely in Texas.

Besides sulfuric acid, the mostly widely produced chemical in the United States, the list also includes ammonia, the third most widely produced, and nitric acid, which ranked 11th. Common industrial gases like bromine, fluorine, phosphine and sulfer dioxide are also on the list.

There are about 90 chemical intermediates, which are used to make other substances. Many are relatively unknown, as was methyl isocyanate, the chemical that leaked at Bhopal. Some of the more well-known intermediates on the list are hydrogen peroxide, nitrobenzene and phenol. The E.P.A. said in its document that some of the most widely used substances were included even though they are less toxic than some other chemicals because of the greater potential for leaks.

The list also contains some food, flavor and fragrance chemicals, and seven chemical warfare agents.

EPA Program on Toxic Chemicals Is Criticized

(By Stuart Diamond)

The Environmental Protection Agency's program for safer handling of dangerous chemicals came under fire yesterday from some legislators who attacked its voluntary nature and from some companies that said they sold quantities too small for concern.

The program includes the identification of 403 toxic chemicals that could cause injury or death from chemical plant accidents. At least 577 companies handle those chemicals at thousands of locations, according to an analysis of the list by The New York Times. The agency relies on municipalities to find the plants handling the chemicals and on chemical plants to disclose the information and make any changes to reduce excessive risks.

James J. Florio, Democrat of New Jersey, criticized those voluntary aspects. "This program hopes for the good will of the people running the plants and that people in the towns will have enough expertise to understand the chemicals," said Mr. Florio, chairman of the House Energy and Commerce Subcommittee on Commerce, Transportation and Tourism, which oversees the enforcement of various major environmental laws.

DIFFERING STANDARDS FEARED

In an interview, he said that even if such programs worked, they would result in different safety standards in different communities. "There will be no uniformity," he said.

E.P.A. officials and chemical industry executives have said that the chemical industry is so large and diverse that it is difficult, if not impossible, to have uniform standards, as there are with nuclear power plants. The Chemical Manufacturers Association, an industry group, has a program to encourage companies to cooperate with local communities in emergency planning.

Some of the companies that handle the most toxic chemicals are small concerns that sell sample quantities to laboratories and universities. Chemical experts said that the total inventory of the many small individual quantities could be significant in an explosion or fire. But some of the companies said they should not be lumped with the giant concerns that often store millions of pounds of toxic chemicals.

"We are more like a drugstore than a giant chemical plant," said Arthur J. Turco, president of the Crescent Chemical Company in Hauppauge, L.I.

Problems at Chemical Plants Raise Broad Safety Concerns

(By Stuart Diamond)

The type of management, training, equipment and response problems that characterized last December's gas leak disaster in Bhopal, India, exist in many American chemical plants, according to recent inspections and studies of the American chemical industry by a variety of experts.

These problems, confirmed in interviews with 130 people over the past six weeks, have prompted growing apprehension about safety compromises at hundreds, perhaps thousands, of places handling toxic chemicals.

Such concern is rising even as the Government and chemical industry are taking steps to improve. Last week, for example, it was disclosed that the Environmental Protection Agency had identified 403 highly toxic chemicals that could cause injury or death in a major accident, although not all are so potent as the one at Bhopal. The list was meant to help states and localities find potentially hazardous sites, prepare for emergencies and reduce risks.

An analysis by The New York Times found that 577 companies in thousands of locations handle such chemicals.

Just to measure the risks of major accidents, let alone reduce them, is a task beyond the resources of many localities, and concern has increased as a result, government officials said.

DIFFICULTIES IN THE DETAILS

The experts interviewed recently—industry consultants, government regulators, company executives and others—said there was insufficient information available to say precisely where the most serious problems might be, how likely a major accident was, or how many deaths or injuries might result. But they agreed that there were more safety weaknesses at smaller companies than at the larger ones.

Some of these problems came to public attention in August, when The Times disclosed new research concluding that emergency relief equipment was inadequate to handle an uncontrolled reaction in as many as 50,000 production processes at chemical plants.

It has since become clear, however, that the shortcomings go well beyond emergency relief equipment and touch nearly all aspects of the industry's operation, many chemcial experts said.

This broad new concern is a significant change from the weeks after the Bhopal accident, when most American chemical executives and experts pointed to the best worker safety record in manufacturing and thousands of leaks that did not result in injury as proof that neither the industry nor the public need to be alarmed about a disaster here. United States chemical facilities, they said, were generally more advanced than those in developing countries.

But many experts now believe that the safety record has masked important problems, creating a false sense of security.

"This country has been very lucky it has not had a major chemical accident killing a lot of people," said Roger J. Batstone, a chemical engineer who developed lists of hazardous chemicals for Britian and the World Bank and was consulted by American officials.

"There have been many warnings," he said. "Those who try to minimize the hazards are totally wrong. And if there aren't many changes in the next couple of years,

there probably will be a major accident here."

Industry executives, while objecting to the tone of such remarks, acknowledge safety weaknesses. "We have an outstanding worker safety for record, but we have been weakest in protecting against a major accident involving the public," said George J. Sella, chairman of the Chemical Manufacturers Association and of the American Cyanamid Company.

"In the past, such accidents' were considered so improbable that it was not believed necessary to build in the protection mechanisms for them," said Mr. Sella, a chemical engineer. He said there was now "great awareness" about the need to improve emergency plans and add safety equipment.

The recent rise in concern began on Aug. 11, when a chemical leaked at a Union Carbide pesticide plant in Institute, W.Va., injuring 135 people. The accident, while not nearly so severe as the one in Bhopal, where more than 2,000 people died, showed the same kinds of human and equipment failures in a similar plant, and it happened while the Institute plant was under intense scrutiny by regulators and the industry.

Since then, audits of plants by companies and government officials have found patterns of accidents and failures that experts say pose a previously unforeseen risk to the public.

Many of the troubles have been relatively small: values operating incorrectly; overpressurized tanks; broken gauges left unrepaired. But there have been thousands of failures, often leaking toxic chemicals into the air, sometimes injuring dozens of nearby residents.

"Institute was a turning point, especially on top of Bhopal," said Robert D. Kennedy, president of Union Carbide's chemicals and plastics group. "A year ago, a one-in-a-million shot was unthinkable," he said. "Now it's thinkable. It can happen here; it can happen anywhere. It causes us to rethink everything we do."

Mr. Sella agreed, "Mr. Kennedy is 100 percent accurate," he said.

As a result of such concern, the Federal Government has expanded its interest in chemicals beyond longstanding public concerns about toxic waste sites and small, routine leaks that could cause cancer or other disease. In the past, Federal inspectors say, they almost never seriously considered the possibility of major accidents.

"Our concern about acute hazards has heightened considerably in the past year and especially since Institute," Lee M. Thomas, the E.P.A. Administrator, said in an interview. He urged "far greater awareness on the part of plant management about process system safety."

How can the risks of accidents be reduced? Those interviewed said improvement was needed in these areas:

Information. Many chemical companies have been reluctant to tell the public what hazards their plants contain. "In case after case, employers have claimed that every substance they make is a trade secret," said Margaret Seminario, a safety expert for the American Federation of Labor and Congress of Industrial Organizations.

Emergency plans. Most chemical plants and the communities around them are ill-equipped to cope with toxic accidents. John M. Jones, an official of the Dow Chemical Company who heads an industrywide effort to formulate emergency plans, said it would take two years for the average community to make adequate preparations for chemical emergencies.

Management. Safety varies widely among chemical plants because of management; cost is a main factor. "For too many companies, there is no profit in safety," said Richard H. Mays, who heads enforcement at the Environmental Protection Agency.

Training. Few chemical plants have training simulators, common among airlines and in some other industries. "In some companies, training frankly stinks," said A. Ben Clymer, a New Jersey training consultant who recently surveyed 77 plants.

Risk analysis. Relatively few chemical companies do detailed risk assessments to find and improve equipment and procedures most likely to fail. Thus while the industry says intuitively that the risk of a major accident is very small, there is little information to settle the issue.

Audits this year by Illinois officials found that 8 percent of the state's biggest chemical facilities were poor in hazard control, management, operations and emergency planning. "Too many facilities did poorly," said Roger A. Kanerva, a state environmental manager. He added, however, that some plants were clearly excellent.

Regulation. No Federal agency is charged with preventing major chemical plant accidents. There is wide disagreement on the use of regulations.

ACCIDENT HISTORIES: EXPERTS WORRY

A search through accident histories turns up many mishaps that worry experts.

In October 1982, for example, human error and equipment failure sent chlorine arching into the sky from a plant in Niagara Falls, N.Y., owned by E.I. du Pont de Nemours & Company. It came down on a crowded stadium a mile away, where a high school football game was being played. There were 76 injuries and one death, a Federal report said. "A lot of football players were falling down on the field," said Robert A. Armbrust, a state engineer familiar with the mishap.

Arthur J. Fossa, air toxics director for New York State, said plant operators did not discover the leak for 30 minutes, after which they properly operated valves they earlier misused.

Improvements were made at that plant, but accidents happen almost daily around the country. An unreleased E.P.A. study obtained last month by the New York Times listed 6,928 chemical accidents since 1980, involving 139 deaths and nearly 1,500 injuries. It was a partial listing.

Among the accidents, a pesticide leak injured 161 people in New Jersey. A nitric acid explosion killed 3 people and injured 61 in Mississippi. A solvent leak injured 40 in Queens. Ammonia, widely used for cooling, killed 4 people in San Antonio and injured more than 270 in bakeries, ice cream factories, warehouses and other businesses in many states.

About 35 incidents had important elements of Bhopal: a toxic chemical leak from a storage tank involving operator error. Other American accidents had one or more other Bhopal failures: inadequate instruments, relief equipment, training, emergency planning and safety expenditures; and workers who disbelieved or ignored alarms.

As recently as Oct. 21 a storage tank leak at an Exxon plant in Bayway, N.J. spread dilute hydrogen sulfide over hundreds of square miles. Temperature and pressure gauges that could have issued warnings were not tied to the control room. Safety devices did not destroy all the toxic gas, which caused some nausea. County officials did not reach the site for 30 minutes; state officials were not reached for two and a half hours, Exxon's chronology shows. Hydrogen sulfide is on the E.P.A. list of toxic chemicals.

SIZE OF INDUSTRY HAMPERS EFFORTS

Efforts to monitor chemical plants and reduce the chances of a major accident have been hampered by the industry's sheer size.

The United States has 12,000 chemical manufacturing plants, 400,000 major chemical storage facilities and several million businesses that use or store smaller but still potentially dangerous amounts of toxic chemicals, including hospitals, dry cleaners, paint outlets and food warehouses.

A study by the Congressional Research Service earlier this year found that there were more than 6,300 plants that manufacture chemicals and allied products in the 25 largest metropolitan areas and that 75 percent of Americans lived in these areas. Northern New Jersey had the most plants: 800. There were also 92 in Manhattan, 101 in Brooklyn, 28 in the Bronx, 79 in Queens, 68 in Nassau County, 77 in Suffolk County, 54 in Westchester County and 68 in Fairfield County, Conn.

Yet little or nothing is publicly known about two-thirds of the 54,000 chemicals in commercial use, according to the National Academy of Sciences. This is particularly true of chemicals created in intermediate stages of manufacturing, such as the methyl isocyanate that leaked at Bhopal and the aldicarb oxime at Institute. Many are not specifically regulated.

"We just can't get everything," said John B. Miles Jr., head of field inspection at the Federal Occupational Safety and Health Administration. "We try to start with the highest risk, but we may not get to a plant for 10 years. It's a big, difficult problem."

The chemical industry has started programs to improve safety voluntarily. One is the Community Awareness and Emergency Response program of the Chemical Manufacturers Association, which urges companies to work with localities to develop emergency plans. Another is the Center for Chemical Plant Safety of the American Institute of Chemical Engineers, involved in distributing technical information to improve safety in processing.

"There is a sharing of knowledge, and also peer pressure," said Gordon D. Strickland, deputy technical director of the manufacturers' association.

But such chemical risk experts as Joseph R. Fiksel of the consulting concern Arthur D. Little Inc., say the commitment to safety and improvements varies widely across the industry.

"The dozen top companies are all pretty much taking aggressive action to control risks," Mr. Fiksel said. "But most of the second-tier companies are taking a wait-and-see attitude. Many don't have the financial clout to make changes. And the mom-and-pop shops are generally doing nothing."

Most experts said better information is the starting point in reducing risks.

The E.P.A. list of 403 chemicals aims to help localities collect information on where the materials are stored, and in what amounts, and thereby assess the risks. But many companies have routinely refused to disclose such information, and some still balk at doing so, saying that the information could give competitors an economic advantage.

A New Jersey law that requires inventory disclosure, among other things, has been

fought in court this year by that state's chemical producers.

"We are probably not willing to share inventory information" with the public, said Kent R. Davis, safety director of Dow Chemical U.S.A.

In contrast, Bruce W. Karrh, vice president for safety at Du Pont, said, "Our policy is to tell localities what materials we produce, the amounts and the hazards." Otto Sturzenegger, chairman of the Ciba-Geigy Corporation's United States operations, agreed: "If communities wish to be properly prepared, they have to know what amounts we have."

Today the Occupational Safety and Health Administration begins requiring companies to provide health information to workers. But efforts in Congress to force companies to provide more data have stalled.

Meanwhile, local battles continue. In Montgomery Township, N.J., Johnson & Johnson Baby Products declined for several months this year to publicly identify the 300,000 gallons of chemicals it planned to store, saying the information was proprietary.

Town experts identified the major one as acrylic acid by studying the chemical properties the company provided. The acid is common and toxic.

In response to local pressure, said Robert V. Andrews, a company spokesman, Johnson & Johnson acknowledged last month that it would store the chemical and two others.

LOCALITIES SEEK EMERGENCY PLANS

Once toxic chemicals are identified, the next step, planning for emergencies, is also a new topic for many localities, said Robert S. Wilkerson, chief of technological hazards for the Federal Emergency Management Agency. "A relatively small percentage of localities sought training in hazardous chemicals before last December," Mr. Wilkerson added. "A lot of fire departments subscribe to the saying 'If you don't know, don't go.'"

The task includes amassing and understanding complex information, developing models of chemical dispersion, buying equipment and holding drills. The estimated cost ranges from a few thousand dollars for a small site to more than $1 million for a large one.

Federal officials say localities will have to pay for much of it, but local officials say money is scarce. "Many areas will not be able to afford what is needed," said S. William Becker of the Association of Local Air Pollution Control Officials.

DEPENDING ON MANAGERS

Prevention, experts say, is better than the best emergency response plan, which only helps reduce the damage after an accident. But that depends on plant managers. Some companies, such as Du Pont, the Monsanto Company and the Union Carbide Corporation, have decreased risk by drastically cutting storage of toxic chemicals. Some plants have vapor recovery systems, double-walled tanks and computers that continually adjust reactions.

But Dr. J. Charles Forman, executive director of the American Institute of Chemical Engineers, said the problem was considerably more difficult for small companies. "A marginal plant facing a safety improvement of 15 to 20 percent of its original cost can quickly drop into a negative position," he said. "Every time you want something, you have to submit it to the cold light of financial review."

A study by Mr. Clymer, the training consultant, found that only 22 of 77 plants had full computer control of their production processes to help curb runaway reactions.

Dr. Forman's point is borne out by Elmer A. Fike, a partner of Fike Chemicals, Inc., a 45-employee company in Nitro, W.Va. "Computer process controls are out of the question," Mr. Fike said. "We just can't spend that kind of money."

But not all safety is costly. Frank B. Friedman, vice president for safety at the Occidental Petroleum Corporation, said the workers who operate plant equipment were often unable to get safety concerns to executives because of bureaucratic barriers. "That has nothing to do with resources or size, but how you manage," he said.

Irwin S. Zonis, president of Essex Industrial Chemicals, remembered a runaway reaction in a storage tank at one of its plants in Baltimore. The reaction blew out some equipment, causing a leak that injured 15 nearby residents in September 1984. The chemical, benzyl chloroformate, becomes very reactive as temperatures rise, but the tank holding it had no temperature gauge and was in fact being heated by mechanical stirring. "We were very fortunate that no one was killed," Mr. Zonis said. "The operation should never have been approved by management."

The variation in management is evident in worker training.

The best company programs, experts say, include a month of classes in safety principles and two-week refresher courses yearly. The worst have no classroom or refresher training, said David C. Pathe, a chemical engineer and training expert in Sea Girt, N.J. "They say, 'Here's your safety gear—we wear it when things go wrong,'" Mr. Pathe said.

Mr. Clymer said his survey of 77 plants using chemical processing equipment had found that only 10 percent of operators got annual refresher courses. Some plants, such as the Mobil Oil Corporation's in Paulsboro, N.J., have 100 days of training for new operators, he said, while others have less than 5 days.

Richard E. Edgington, chairman of the health and safety committee of the A.F.L.-C.I.O. in Oregon, asserted that such a plant is operated in Portland, Ore., by the Pennwalt Corporation.

Mr. Edgington, a member of the plant's labor-management safety panel, said it had three days of training for new operators, including a 90-minute safety briefing. Safety procedures are followed only about 60 percent of the time, he said, largely because of the press of production, worker inexperience and failure of middle management to enforce the rules. Some mishaps have resulted in injuries, he said.

A Pennwalt spokesman contended that the plant was safer than Mr. Edgington indicated but did not dispute the training figures.

A union survey of 400 locals last year at various companies' plants throughout the country indicated wide concern over training.

"This union believes that a Bhopal-type disaster could occur in this country in a chemical plant employing our union members," said David W. Ortlieb, health and safety director of the International Chemical Workers Union. He said intensive operator training for runaway reactions was unusual. The union has 65,000 members.

A big problem at some plants, several experts said, is work on overnight shifts and weekends. The Bhopal and Institute accidents and a 1974 cyclohexane explosion that killed 28 people in Flixborough, England, all occurred on such shifts.

One way often used to improve training is with simulators: full-size control consoles on which accident scenarios are posed for operators to control.

"With a simulator, you can let an operator practice handling an accident over and over," Mr. Clymer said. "Response becomes quicker and more accurate. It is practice an operator could not get otherwise, and in a real accident he is calmer and less frightened, because he has seen it before."

But simulators, common in the airline and nuclear power industries, are rare in the chemical industry. Lawrence P. Ricci of Atlantic Simulation, the largest supplier of chemical training simulators, said there were only about 150 plants with simulators for operators of chemical process equipment. That covers less than 10 percent of the major facilities, he said.

Mr. Davis of Dow Chemical said, "More of our resources must be directed toward training people."

Of a dozen experts interviewed on training, only one, Mr. Strickland of the Chemical Manufacturers Association, said training was adequate. "There is no serious problem with training in the industry," he said.

DEBATE ON ROLE OF GOVERNMENT

Factoring all the elements of chemical plant safety into one equation is called risk analysis. It involves calculating the failure rates of each part of the system—equipment, procedures and humans—and determining possible sequences of failure.

Risk analysis has been practiced for years by airlines and nuclear plants, said Alvin M. Weinberg, a former director of the Oak Ridge National Laboratory who is a risk expert. But the chemical industry, he said, "is way way behind."

In Britain, by contrast, the analysis is done by even small chemical plants using personal computers, said Mr. Batstone of the World Bank. "Europe is 10 years ahead of this country in hazard evaluation," he said.

The World Bank requires safety equipment more advanced than in the United States for the plants the bank finances in developing countries.

Mr. Mays of the Environmental Protection Agency says chemical companies should be required to audit their plants and analyze their risks, particularly in order to force weaker companies to improve. Such a requirement was part of a settlement earlier this year with the Diamond Shamrock Corporation under which the company agreed to pay a $900,000 fine for violating Federal notification procedures on the introduction of new chemicals.

"These audits are too important to leave to the voluntary action of individual corporate management," he said. New Jersey officials are starting to require audits of risk, and the Occupational Safety and Health Administration has begun a pilot program to inspect 80 plants for potential runaway reactions. Some governmental officials propose criminal penalties for violations involving leaks.

Fred Millar of the Environmental Policy Institute, a Washington-based lobbying and research group, suggests a tax on chemical plants to pay for inspection programs. Los Angeles has just started such a program and plans to collect $1.5 million a year.

But neither the industry nor top officials of the Environmental Protection Agency have come out in favor of mandatory pro-

grams. Milton Russell, the agency's Assistant Administrator for Policy, said it was hard to regulate plant safety in an industry with thousands of different processes and substances. He said the threat of increased liability from lawsuits was a powerful factor in persuading chemical companies to improve.

Mr. Thomas, the E.P.A. Administor, said be was considering ways to force more safety through existing regulations, such as requiring more detailed reporting of accidents or ordering safety reviews at higher levels in chemical companies.

Indeed, many experts say that regulation cannot guarantee safety, only a will to be safe can. "You can't regulate or legislate a management commitment to safety," said Mr. Karrh of Du Pont. "The company must value it."

But some say a broad commitment will not be easy to secure.

"The Institute accident occurred with hundreds of regulators looking at the plant and top management obsessed with it," said Thomas N. Gladwin, a chemical management expert at the New York University Graduate School of Business Administration. "It was where all the industry's capabilities and motivation should have been applied. It tells me that commitment to plant safety does not reach the whole industry."

"The culture of many companies must be changed," he added. "What they value, what they pay attention to, how they promote. One would have thought Bhopal would have caused those changes. It is clear that it will take a lot longer."

[The New York Times, Nov. 19, 1985]

E.P.A. Issues Advice on Avoiding Toxic Accidents

(By Stuart Diamond)

East Rutherford, NJ.—The Environmental Protection Agency today began an effort to help states, municipalities, chemical companies and unions avoid a major chemical accident like the one in Bhopal, India, last December.

Ten thousand officials, watching television monitors here and in 200 other cities, heard detailed instructions from officials in Washington on how localities can find highly toxic chemicals in their midst, assess and reduce excessive risks and plan for emergencies.

A total of 403 toxic chemicals "immediately dangerous to life and health" have been identified by the E.P.A., and the agency plans to disclose these chemicals next month along with detailed information on how to handle them. An analysis by The New York Times of the list, obtained from Government officials, indicates that at least 577 companies in thousands of locations around the nation produce, store or use the substances.

Many of the 75 people here praised the initiative, although some expressed concern that state and local governments would need a lot of extra money for training, equipment and personnel.

"The E.P.A. program, with all its publicity, will give a lot more impetus and vigor to efforts by state and local officials to plan for chemical emergencies," said Lieut. James A. Arena, chief of the Emergency Services Bureau for the New Jersey State Police.

But James F. Ross, chief of Emergency Response Preparedness for the New Jersey Department of Environmental Protection, said, "Without funding, some townships will find it particularly difficult" to locate the toxic chemicals and devise appropriate emergency plans.

E.P.A. officials said they had no money to offer for items like extra emergency equipment, but said they would provide more than 120 aids to train state and local personnel around the country. "We realize that everybody would like to have additional dollars, but the money just is not available," said Jack W. McGraw, the E.P.A.'s Deputy Assistant Administrator for emergency response.

Some of the chemical company officials who attended the session said they are especially interested in the identities of the 403 chemicals, so they can perform more detailed inspections of their plants and prepare for public questions about them. Most praised the program.

PEOPLE WANT TO KNOW

"It's almost inevitable that people today want to know what's happening in local chemical plants," said Dr. David R. Gaskill, a safety expert from the Mobil Chemical Co. "And it's prudent for us to look at our inventories of these chemicals, and perhaps reduce them."

The E.P.A. document contained methods for measuring dangerous quantities of various chemicals in an accident, and tables for determining how far from chemical plants those dangers would extend. It urges that municipalities form committees that would include local officials, fire marshals, residents near chemcial facilities, workers, medical personnel, journalists, educators, company executives and chemical experts.

The document also gives localities lists of questions to ask chemical companies like. "If you have a leak, what do you do?" In addition, it suggests people ask what measures plants have taken to prevent chemicals accidents, how their toxic chemicals are stored, and how they ship chemicals to and from the site.

The agency recommends that localities find out what kind of medical and emergency preparations chemical companies have made on their sites, as well as the quality of their systems for notifying surrounding areas of emergencies.

EMPHASIS ON COORDINATION

At various intervals, viewers from around the country expressed concern by telephone about monetary help.

But Mr. McGraw said in an interview that the success of the agency's program depended less on money than on improving coordination among officials preparing for chemical emergencies.

The need for coordination was echoed by Leonard Ledbetter, commissioner of the Department of Natural Resources for Georgia. He said that while his agency had two helicopters and 24 trained people, "the nitty-gritty is that we have not properly coordinated with local officials who responds first to a local emergency."

Mr. Ledbetter also said the importance of the E.P.A. program was to enable states and localities to begin determining the areas with the most toxic chemicals.

He said it would be "irresponsible" for municipalities to try to close down operating facilities, since, he contended, their operation had been officially sanctioned. But he added that new knowledge of the most toxic chemicals would enable zoning officials to reduce the risks from current chemcal facilities and to situate future plants in areas where they would pose much less risk.

MESHING WITH EXISTING PLANS

Mr. Ross, the New Jersey environmental official, said his state already had an extensive emergency response system, as do some other states, particularly in areas around nuclear plants. He said he was concerned whether the E.P.A. toxic chemical program could be properly integrated into New Jersey's existing program, but added that other areas without such extensive plans could benefit greatly from the E.P.A.'s suggestions.

He expressed additional concern that under the plan the chemical companies can voluntarily decide whether to give localities information about the toxic chemicals they produce. Some companies may simply refuse, he said.

"We have found that the smaller companies, the one or two tanker companies, are more defensive," Mr. Ross said. "Unlike the Du Ponts and the Exxons, they don't have large communications and safety structures. They are interested only in moving stock and saving expenses."

Mr. McGraw said the E.P.A. hopes that amendments attached to toxic waste legislation, which would require chemical companies to provide such information, will be approved by Congress.

E.P.A. Lists Dangers of More Than 400 Chemicals

(By Stuart Diamond)

The Federal Government today is to release for the first time detailed information on just how dangerous more than 400 highly toxic chemicals could be to communities in the event of an accident.

A New York Times analysis of the information shows that dozens of chemicals produced in the millions of pounds each year could pose serious health risks if only a few pounds escaped from a plant as gas, dust or droplets that carried to nearby homes or businesses.

Many chemicals on the list, compiled by the Environmental Protection Agency, are at least as dangerous as methyl isocyanate, the substance that leaked in Bhopal, India, last December, killing more than 2,000 people and injuring 200,000, the analysis found. Some of the chemicals, including some of the most widely used acids and industrial gases, can be dangerous in amounts of less than a pound at a distance of 200 feet after an accident, the data show.

A list of the 403 very toxic chemicals was obtained and was published last month by The Times, which found that at least 577 companies in nearly every state handled the substances. But without the new data, which also describe uses of the chemicals and guidelines for evacuation, communities were unable to assess the danger posed by quantities stored locally or to reduce risk, officials said.

The list, which reduces the number of chemicals to 402, is being officially released today. The health data, which run 900 pages, were obtained Friday by The Times.

MILLIONS LIVE NEAR SITES

Although millions of people live near plants handling those chemicals, experts say, few would be exposed to dangerous quantities unless an accident occurred under conditions in which wind and humidity would cause the chemical to move toward populations and disperse slowly. Those risks are considered quite small by most chemical experts and Government officials. But after the accident at Bhopal and many much

smaller ones in the United States, the industry, the Federal Government and communities have begun a major attempt to identify the risks and reduce them.

The chemicals posing health problems in quantities of less than five pounds include sulfuric acid, the nation's most widely produced chemical. Manufacturers in the United States have the capacity to produce 111 billion pounds of that chemical a year, trade publications say. Also in that range of potency are chlorine and formaldehyde, both widely produced.

The list also includes many less familiar that can pose great risks. Among the most toxic is phosgene, a dye and pesticide component used as a weapon in World War I. It is now stored widely by the ton, and more than two billion pounds can be produced each year. A leak of 6.5 ounces of phosgene is considered dangerous at 200 feet, and a leak of six pounds would probably be fatal at that distance under some circumstances, the documents show.

A solvent, carbon disulfide, is so flammable "vapors may be ignited by contact with an ordinary light bulb," the report says. Lithium hydride, a catalyst used in making ceramics and electronic tubes, forms dust clouds that can spontaneously catch fire in air and "may explode on contact" with heat, the report says.

The new data enable communities to calculate the amount of various chemicals that the E.P.A. calls "immediately dangerous to life and health." That amount would help officials to judge whether quantities produced or stored are enough to justify more rigorous prevention or emergency planning, the E.P.A. said.

The report recites health problems for hundreds of pages: nerve, lung and eye damage; vomiting; kidney and liver damage; muscle collapse; coma; death. Damage can occur by inhalation, absorption through the skin, ingestion or all three. "A small drop in the eye may cause death," it says of TEPP, a rat poison.

"May cause death or permanent injury after very short exposures to small quantities," it says of selenium oxychloride, a solvent.

The materials can be spread widely by fire or explosion, it says.

"This document will enable communities to learn more about what's in their midst, how to handle it and how to lower the risk of catastrophe by emergency response and planning," said George F. Wirth, an engineer who headed the E.P.A. program.

Community officials have said they are unprepared for a major chemical accident, and some of the E.P.A. data sheets underscore that thought. "The normal full protective clothing and breathing apparatus available to the average fire department," it said, "will not provide adequate protection" against many chemicals.

COMPOUND CAN PENETRATE CLOTHING

One of them, acrylonitrile, a common plasticizing compound, can penetrate the typical protective clothing of firefighters and cause death, the report said. So can hydrogen cyanide, used in photographic processes, and nickel carbonyl, used in electronics. For each of these chemicals the report said: "Material is too dangerous to expose firefighters. A few whiffs of vapor could cause death."

For dozens of the substances, evacuations within a half mile are required after a leak, the report says; for some others, the evacuation zone is more than two miles.

The knowledge of the potential for severe health damage from relatively tiny amounts of chemicals often produced in huge quantities is bound to produce conflicts between communities and nearby chemical companies, chemical experts said.

"I think when people learn about these things, they will become very upset," said Peter F. Green, a staff member of the Oregon Legislature's committee on hazardous materials.

Dr. Eileen K. Silbergeld, director of toxic chemicals at the Environmental Defense Fund, a research and litigation group based in Washington, said localities would probably pressure companies to reduce inventories even further than they have since Bhopal.

"The natural call by the public will be to ban these chemicals as the realization grows around the country that the storage depots are everywhere," said Dr. Silbergeld. Redesigning plants to reduce inventories would be a cheaper alternative, she said.

The chemical industry has offered to help communities reduce risks, but some say it would be virtually impossible to change production processes so that the amounts of toxic chemicals are reduced to anywhere near the lowest danger levels.'

"If we have a plant producing 300 tons of chlorine a day, we can't very well operate with a two-pound inventory," said Frank B. Friedman, a vice president of the Occidental Petroleum Corporation.

Occidental has three major chlorine facilities, in Niagara Falls, N.Y., Tacoma Wash., and Taft, La. The typical tank car is 100 tons, he said. "You have to be able to fill several of those each day," Mr. Friedman said.

Of particular conern is phosgene. Its delayed symptoms may leave victims unaware for 24 hours than they have inhaled a serious or lethal dose. In Lockport, N.Y., the Van De Mark Chemical Co. has a capacity of eight million pounds. In Deepwater, N.J., the Du Pont Co. has a capacity of 80 million pounds.

"If someone next door to me had phosgene, I'd be concerned," said Mr. Wirth of the E.P.A. "A community might say it had no idea so much was stored. Well, they will now. It will be up to local industries to negotiate satisfactory solutions with communities."●

CANADA'S ACID RAIN PROGRAM

● Mr. STAFFORD. Mr. President, earlier this week, the Province of Ontario announced a major new acid rain program requiring acid-causing emissions in Ontario to be reduced by 67 percent from 1980 levels. This program implements Ontario's portion of the Comprehensive Acid Rain Control Program that the Canadian federal government announced earlier this year.

The new Ontario program will require dramatic reductions in emissions at the Inco Smelter at Sudbury, the Falconbridge Smelter at Sudbury, the Ontario Hydro utility, and the Algoma iron plant. Under the program, the Inco plant would be required to cut sulphur dioxide emissions from its 1984 level of 683 kilotons to 265 kilotons by 1994, a reduction in actual emission levels of more than 63 percent. Ontario Hydro's 1984 emissions of 444 kilotons of sulphur dioxide will be cut to 175 kilotons over the next 10 years, more than 60 percent. Similar controls will be imposed on Falconbridge, Algoma, and other emission sources in the province.

These reductions are in addition to those achieved earlier in the province. At Inco, for example, emissions at the Sudbury smelter dropped between 1965 and 1983 from 6,500 tons of sulphur dioxide per day to 1,950 tons per day, a cut of 62 percent. The further reductions announced yesterday will mean that by 1994 Inco will be emitting sulphur dioxide at less than 11 percent the level it emitted in the late 1960's.

I am told by the government of Ontario that the program is a hard and fast commitment backed by provincial regulations adopted by the government last week. The government says these regulations are not appealable, so the affected companies have no choice but to comply. I also am informed that the negotiations leading up to adoption of the new program were extremely tough, with long, hard hours of bargaining.

Mr. President, if what I am told is accurate, not only is the new program good news for Canada; it is also good news for the United States. The Ontario cuts alone will mean a reduction of some 5 to 10 percent in acidic deposition that affects the New England region, according to their estimates. When the entire Canadian federal program is taken into account, they project that the benefits to New England are approximately twice that level.

Beyond the tangible emissions reductions for the Northeast, I believe there are other reasons to be cheered by the new Ontario program. Early next year, the Senate Committee on Environment and Public Works will continue hearings on the control of acid rain. I hope the committee can complete action on and report acid rain control legislation to the Senate floor early in the year. The Canadians have committed to a strong and comprehensive Acid Rain Control Program. I very much hope that the United States will do the same.

Mr. President, I request that the article on this program which appeared in the December 18, 1985, New York Times be printed in the RECORD.

The article follows:

ONTARIO ANNOUNCES PROGRAM TO SHARPLY CURTAIL ACID RAIN

(By Philip Shabecoff)

WASHINGTON, Dec. 17.—Ontario Province in Canada, in a step that would significantly reduce acid rain in New York State and New England, announced a program today to curtail sulfur dioxide pollution sharply.

At a news conference in Toronto that was shared with Washington by closed circuit television, Environment Minister Jim Brad-

ley of Ontario, said the province's four biggest industrial sources of sulfur dioxide had been ordered to reduce their emissions to 665,000 metric tons by 1994 from 1.9 million metric tons.

Ontario's action is part of an overall Canadian program to reduce the sources of acid rain. In Canada, the provinces have the major responsibility for environmental protection.

Sulfur dioxide is a major cause of acid rain, the name given to air pollution caused by the burning of fossil fuels that changes chemically in the atmosphere and falls to earth, often far from its point of origin, as acidic rain, snow, fog or dust. Acid rain has been found to destroy freshwater life in some lakes and streams, particularly in the eastern United States and Canada. There is debate on whether it damages forests and threatens human health.

LARGEST SOURCE IS CITED

The four sources ordered to reduce sulfur emissions include the Inco Ltd. smelter in Sudbury, which is known to be the largest source of sulfur dioxide pollution on the continent.

The other companies involved are Ontario Hydro, which operates coal-fired power plants in southern Ontario, the Falconbridge Ltd. smelter in Sudbury, and the Algoma Steel Corporation facility in Algoma.

Mr. Bradley said that the program would reduce acid rain in New York's Adirondack Mountains and in New Hampshire by about 8 percent and to a somewhat lesser extent in other parts of the northern United States.

He also said: "The effects of Ontario's acid rain production on U.S. states and other parts of Canada is minimal when compared to the effect U.S. acid rain has on us. Half of all the acid rain destroying Ontario's environment came from the U.S."

Complaints from Canada over acid rain originating in the United States have been a sore point in relations. The two Governments appointed special envoys this year to negotiate a solution to the problem and their proposal is expected early next year.

Industry officials in the United States and some Government officials here have complained that Canada has done less than this country to reduce the pollution that causes acid rain.

The Edison Electric Institute, a trade association of the private power industry, has issued a statement saying that power plants in this country have spent many billions of dollars and have made significant reductions in sulfur emissions despite a dramatic growth in the burning of coal.

Environmental groups praised Ontario's program as an important step.

Senator George J. Mitchell, Democrat of Maine, said that Ontario "has now done more in a single day to reduce acid rain than the Reagan Administration has done in five years."

The Administration has said that more needs to be learned about the causes and effects of acid rain before costly controls are mandated.●

GRAY MARKET LEGISLATION

● Mr. INOUYE. Mr. President, I am pleased to join my colleague from New Hampshire in rising to announce we have reached an agreement on legislation to regulate the automobile gray market. Extensive negotiations have gone into this compromise, and the assistance of the Commerce Committee has been invaluable. This legislation is quite comprehensive in an attempt to provide a solution to the diverse issues involved in the gray market. I feel it is the best approach practicable and addresses the major problems which plague the gray market, especially with regard to motor vehicle safety. It also assures that gray market importers are put on an even playing field with authorized auto dealers by requiring that they pay the gas guzzler tax and CAFE penalty. It also provides that the setup and maintenance of the gray market system does not cost the taxpayer anything, as all costs are borne by the gray marketers through user fees.

Mr. RUDMAN. The Senator from Hawaii is accurate in stating that after hours of negotiation we have agreed to a workable compromise with respect to the automobile gray market. I would like to thank my colleague for his assistance and contribution in this matter. As with all compromise packages, probably no one is completely happy with all the provisions contained therein. Nonetheless, I am pleased that we have arrived at a satisfactory resolution of this matter. By keeping the gray market open, I feel this legislation maximizes consumer choice and preserves competition in this market. This proposal also addresses the concern of the Senator from Hawaii that clear and enforceable safety guidelines be established which cover the gray market.

Mr. INOUYE. My colleague and I have worked long and hard to reach this compromise, and I have been informed by Senator RUDMAN that with this agreement as a substitute to the gray market provision in the NHTSA authorization bill, he is willing to move to expeditious floor consideration of this bill. Senator DANFORTH informs us that he will push for prompt consideration of the bill when the Senate reconvenes in January, and I am certain we will do all we can to assist him in this regard.

Mr. RUDMAN. My colleague is correct that, based on this agreement, a summary of which follows this colloquy, I would be pleased to bring the NHTSA bill to the floor for prompt consideration.

I ask that the summary be printed in the RECORD.

The summary follows:

RUDMAN-INOUYE GRAY MARKET COMPROMISE

I. Vehicle may be imported into US under bond if:

A. Importer and modifier are registered with DOT:

Fees to be assessed annually by DOT as necessary to cover costs of this program.

Facilities doing modifications must be registered with DOT. DOT shall assess fees to cover costs.

Secretary to establish requirements for registration and for revocation of registration for failure to meet requirements. Requirements include: record keeping, inspection of records and facilities, payment of gas guzzler tax and CAFE penalty. (Importer to be treated as manufacturer in both cases except that the importer is not eligible for the small volume exemption. Thus, with respect to CAFE, penalty to be assessed based soley on the fleet of the importer.)

B. Vehicle is determined to be capable of meeting safety standards:

Secretary to make determinations as to whether car is capable of meeting standard either because:

It is substantially similar to U.S. model car and can be readily modified to meet all applicable Federal safety standards; or

Importer provides test data clearly demonstrating that car is or can be modified to meet all applicable safety standards—this option only available in the case where there is no substantially similar U.S. model vehicle.

An importer will petition the Secretary to make a determination with respect to a particular model. Once a determination is made for any vehicle, any importer can bring in that car under that determination so long as it is modified in accordance with procedures described in the petition and importer certifies that to be the case.

Secretary to establish by regulation the information required in such petitions including a description of the modification to be made and evidence that such modification does not appear to create a safety defect.

Each petition will not be subject to rulemaking, however, the Secretary shall make petitions public and shall consider any information submitted by any interested parties.

Determinations published in Federal Register. Any appeal by a petitioner in the case of a negative determination also published in Register with an opportunity for further input by interested parties.

II. Importer may not sell or register vehicle until:

A. Importer certifies that vehicle was modified in accordance with procedures described in a petition for an approved determination and meets all applicable federal safety standards;

B. Importer has labeled vehicle stating its gray market status and obligations of importer;

C. Secretary has approved certification (Secretary must act within 30 days); and

D. Importer has established fuel economy rating and labeled vehicle regarding gas guzzler tax assessed for that vehicle.

III. Inspections/tests: Secretary to periodically conduct inspections and tests (including destructive tests) of vehicles to determine compliance, and shall inspect all facilities within one year from effective date.

IV. Recall:

A. Importer responsible for notice, recall and repair. A gray market car will be presumed to have any safety defect that is reported in a car to which it is substantially similar—unless proven otherwise

B. Secretary to establish by regulation requirements to ensure that the importer is financially able to carry out his responsibilities

C. Procedure established to ensure that original manufacturer provides necessary information and parts for recall

V. Exemptions:

A. Military and foreign service employees: except that such individuals must still bring cars into compliance with safety standards

B. Foreign diplomats

V. Study/tests/evaluation:
A. Annual GAO study beginning July 1987
B. DOT study after 36 months
C. Congress to make any appropriate modifications based on findings
VI. Effective date:
A. Secretary to promulgate regulations within 8 months from enactment. If the Secretary has not promulgated regulations within 8 months, civil action may be brought against the Secretary
B. Once regulations are effective, there is a 3-month grace period during which determinations will be made. Within 3-month period, once a determination is made, it is effective for that model vehicle.●

ACTION VITAL TO U.S. TRADE DEFICIT

● Mr. LEVIN. Mr. President, once againg, the Reagan administration has failed to take aggressive action to safeguard U.S. interests in international trade. The Wall Street Journal reported on December 7, 1985, that the Reagan administration had decided to retaliate against Japan for refusing to eliminate barriers against American leather and leather footwear goods. But when my staff contacted the U.S. Trade Representative's office to inquire what specific actions the President was going to take, we were told that the President had backed away from retaliatory action after receiving a personal plea from Prime Minister Nakasone. That inaction is a double negative: If President Reagan will not take strong measures on a single trade barrier costing the United States approximately $277 million, how can we expect him to take comprehensive action to attack the massive $50 billion deficit in United States-Japan trade?

At the same time, the Congress has not done nearly enough, either. Our only action on this issue this session was passage of the textile and shoe legislation, which the President vetoed yesterday. I am deeply disappointed the Senate did not consider broad trade legislation this session, although everyone seems to agree that the escalating trade deficit is a major threat to the health of the U.S. economy. And while we wait, the trade deficit continues to grow.

On the plus side, the majority leader this week delivered a rousing speech on the trade imbalance with Japan in which he said:

> This Senator believes it is time to take stronger action to address the problem. We indicated to the officials we met with in Japan that there was a brief window of opportunity to take meaningful action to open Japanese markets and to address the concerns we raised. That window is about to slam shut and no real measurable improvement has been achieved.

This was not just another trade speech delivered by a Member of Congress. It was a commitment by the most powerful Member of the Senate to enacting strong legislation which attacks the trade deficit with Japan, and it should shake up the Japanese.

But the Japanese have so far successfully disregarded warnings by Members of Congress that legislation will be enacted to reduce the trade deficit. The most recent example was last week's report that the Japanese Government has decided to allow Japanese automobile manufacturers to ship an unlimited number of cars to the U.S. market next year. This decision, if the report proves to be accurate, would follow a year of explosive growth in Japanese exports to the United States, coupled with foot dragging in the negotiations to open up Japanese markets to our goods. Japan's automobile exports to the United States have increased by nearly 25 percent this year over last year, which means that $4 billion more of additional cars and trucks made in Japan have entered our markets in 1985 than last year.

Japan cannot be so naive as to believe that the United States will continue to be taken advantage of like this. Trade is supposed to be a two-way street, but Japan is overloading its side of the street and they've got "ONE WAY" signs on the other. The Japanese, while talking two-way trade, have increasingly flooded our markets and maintained barricades around their own. Prime Minister Nakasone of Japan has declared his determination to lower the United States-Japan trade deficit and exhorted his countrymen to buy American. But, if all restraints on their auto exports are dropped, the lopsided nature of our trading relationship is bound to get worse.

An estimated 25,000 U.S. jobs are lost for every $1 billion of our trade deficit. The estimated $50 billion trade deficit with Japan this year thus has cost 1.25 million United States jobs. Concrete steps to reduce our trade deficit are long overdue. Our trade policy must concentrate on eliminating other countries' unfair barriers against our products and on restricting imports into this country if necessary to reduce the trade deficit. We must take the kind of tough action recently embodied in an amendment I introduced to the textile bill which would have required the 1986 trade deficit with Japan to be reduced by the amount of United States exports blocked by Japan through unfair trade barriers. Legislation such as this would force the administration to reduce the trade deficit regardless of its free trade philosophy.

This focus on Japanese barriers against United States products is more than justified. Japan has unfairly erected many direct and indirect barriers against our products. If ever there was any doubt on this point, a recent report prepared by the U.S. Trade Representative on National Trade Estimates of 1985, which is required by section 303 of the Trade and Tariff Act of 1984, should have erased it. The report gives an extensive list of trade barriers used by other countries against American exports. Although this report does not give an aggregate cost of the barriers, it highlights the major barriers and the estimated cost whenever possible.

The elaborate structure of mechanisms employed by Japan to restrict the exports of the United States and other countries continues to evolve. Not only are there many formal trade barriers which the Japanese fiercely protect, but also a maze of product approval standards and procedures which potential United States exporters find terrible frustrating. These include product requirements that emphasize design characteristics rather than performance qualities, inadequate advance knowledge of the standards and inspection procedures to be applied, exclusion of foreign manufacturers from participation in the establishment and promulgation of product standards, requirements that product approval be obtained through resident Japanese companies, and a general requirement that all product testing and approval occur in Japan.

Although some progress has been made in reducing formal trade restrictions such as tariffs and quotas, Japan stubbornly resists a comprehensive reduction in its informal trade barriers. Not long ago I asked the Japanese Embassy why the Japanese pay $1,227 per ton for domestically grown rice when United States farmers can produce and export rice to Japan for about $390 per ton. Prime Minister Nagasone replied that rice is a very special product in Japan and that Japan, for national security reasons, should produce enough rice domestically to satisfy its own demand. He recognized that this policy involved certain costs and the costs are very high. For example, the cost of food is 70 percent higher in Tokyo than in New York City, and there is overproduction of rice but a scarcity of other foods.

Beef, timber, and citrus products are prime examples of United States products facing Japanese barriers. A combination to tariff quotas and product-standard requirements have severely reduced the potential for sales of these products in Japan. Tariffs have averaged as high as 40 percent on United State beef and citrus exports to Japan. This is particularly troublesome since the United States has a pronounced comparative costs advantage in these products.

Japan's Government-controlled tobacco and salt monopoly has managed to restrict the United States share of tobacco to 2 percent of the Japanese market through a combination of high tariffs, distribution and advertising restrictions and investment restraints. Inconsistencies in product-additive

regulations have curtailed U.S. dried fruit exports, and excessively strict product-packaging requirements have been used to restrict the exports of fruit juice concentrates. Processed food exports have had to meet excessive ingredient and product formula disclosure requirements. United States apples, apricots, cherries, peaches, nectarines, pears and plums have been totally excluded from Japan on the grounds of plant health requirements. Such exclusions are especially restrictive in cases where identical plant diseases already exist in Japan.

Although the United States has a favorable balance of trade with Japan in pharmaceutical and medical devices, United States companies continue to complain about Japan's requirements that research studies be conducted only with Japanese citizens, and that United States companies undergo expensive duplicate tests on their products. United States firms face interminable delays in gaining the required government approvals, and unclear notification procedures for product modifications.

United States telecommunications companies are fed up with Japan's procurement and product testing requirements which make it extremely difficult for United States companies to break into Japan's telecommunications market. One of the major problems has been that the testing is conducted by an association of Japanese companies, Nippon Telegraph and Telephone [NTT], the Communications Association of Japan, and Kosuai Denshin Denwa [KDD]. No foreign members have been permitted to participate in the process of equipment testing, and thus far, the United States share of the Japanese telecommunications market has been insignificant and limited to less sophisticated technological exports. And the same is true with electronics, forest products, and so forth, and so forth—the list is very long.

What has been the cost of Japan's unfair trade barriers? The most recent estimate by the Department of Commerce indicates that the combined cost in lost sales opportunities in Japan is approximately $18.7 billion. Excluding the costs of unrealized investments and services, the most significant merchandise trade costs are: Wood products ($3.4 billion); tobacco ($2.2 billion); refined oil ($2.3 billion); computers ($1.8 billion); electronic components ($1.4 billion); and chemicals ($1.5 billion).

In my judgment, the trade deficit is such a serious problem that it calls for a combination of aggressive internal and external economic adjustments which should be addressed both bilaterally and multilaterally.

The magnitude of the U.S. merchandise trade deficit—which will most likely exceed $150 billion in 1985—means that the United States cannot afford the luxury of ignoring trade restrictions placed on U.S. exports by our primary trading partners.

Some argue that market forces alone will in the long-run correct our international trade imbalances. Unfortunately, if the U.S. passively waits for long-run market corrections, more U.S. auto, steel, the textile workers will be thrown into unemployment lines, the legion of dislocated producers and bankrupt farmers will grow, and even high-technology industries will not escape the ravages of unfair international trade.

The time is long past for the United States to take actions that will send an unmistakable message to our major trading partners who continue to protect their domestic markets, a message that the United States intends to protect itself from unfair trade practices and the out-of-control trade deficit. Indeed, a major contribution of the United States since the 1930's has been to gradually move the free world toward a free trade environment. However, when free trade is not practiced by all of our major trading partners, those countries that practice free trade are penalized. That is exactly the position the United States finds itself in today.

Mr. President, we must continue to press for effective action to reduce the trade deficit. I am hopeful that the majority leader's assurances about early action on trade legislation in the second session of the 99th Congress will mean that process has finally begun in earnest.●

PASTOR AND MRS. THOMAS COURTS

● Mr. RIEGLE. Mr. President, on Friday, November 29, 1985, Pastor and Mrs. Thomas Courts, of my hometown of Flint, celebrated their retirement after 40 years of service to the Vermont Christian Church.

In 1945, Pastor Courts founded the Vermont Christian Church in the home of friends. In 1951, as the result of untiring efforts and dedication by Pastor and Mrs. Courts, the church moved into their permanent home. Since then, the building has been remodeled and expanded. In 1979, their new church was built.

Mr. President, Pastor and Mrs. Courts are very special people, deserving of our thanks. For over 40 years, both have given completely of themselves to their church, their family and their community. They have enriched the lives of thousands of Flint citizens with their caring, love, and dedication. On this joyous occasion, I wish them every happiness.

THE EFFECT OF GRAMM-RUDMAN

Mr. BYRD. Mr. President, last Thursday, the Congress adopted the Gramm-Rudman amendment to the debt limit bill. In its eagerness of disguise the fact that it was raising the Nation's debt ceiling to over $2 trillion—double what it was when this administration took control of the Federal budget—the Congress created a Pandora's box.

Unfortunately, the realization of what may be contained in that box is only now beginning to dawn on many of Gramm-Rudman's supporters. I would like to review for my colleagues one of the more serious implications of the Gramm-Rudman process that will begin next month.

Early next year, the Defense budget—a budget on which an enormous amount of time and effort has been spent—will be rewritten by a mathematical formula specified in the Gramm-Rudman amendment. That formula requires a reduction in defense outlays of up to $5.8 billion in the current fiscal year.

That means that after laboring to decide the best way to appropriate nearly $300 billion in Pentagon spending this year, the automatic sequestering process established by Gramm-Rudman could reduce that amount as much as $15 billion or more in obligational authority in order to achieve the nearly $6 billion reduction in outlays that is required.

But it does not stop there, Mr. President. At the very time that these cuts are going into effect, the Congress will begin the complex task of determining the appropriate level of defense spending for fiscal year 1987. Unless Congress has reduced the deficit projected for that year to $144 billion or lower by September 1986, the Gramm-Rudman sequestering process again kicks in—only this time with potentially more serious consequences.

While no one currently can predict with any accuracy the fiscal year 1987 deficit, it is hardly inconceivable that it could range between $180 billion and over $200 billion. To a considerable degree, whether it reaches that level or not depends on actions that may occur between now and then, such as enactment of a reconciliation conference report for fiscal year 1986—and of a reconciliation bill for fiscal year 1987.

But if the projected deficit for fiscal year 1987 is within that range next September, then the amount of the Gramm-Rudman sequestration could be $40 to $70 billion. That amount is required by the statute to be divided evenly between defense and nondefense programs. Thus, the fiscal year 1987 Defense budget could be subjected to $20 to $35 billion in outlay reductions. This could translate into a re-

duction in budget authority of perhaps $40 to $70 billion that year. This enormous cut could yield as much as 10 percent negative real growth, or more.

The magnitude of these reductions is highlighted by the following observations:

The Gramm-Rudman cuts in fiscal year 1986 could mean 7 to 9 percent negative real growth in defense spending this year;

The amount of budget authority that might be cut by Gramm-Rudman in fiscal year 1987 is two to four times greater than the average annual reduction of $17.9 billion that Congress has made in the five Defense budgets submitted by this administration;

If cuts of this magnitude are made in fiscal year 1987, the resulting level of budget authority for Defense activities could be substantially lower than the level President Carter projected he would spend in fiscal year 1985 (about $296 billion).

The prospect of large negative real growth should be contrasted with a recent authoritative report by retired military and civilian Defense officials. That report concluded that, even if there were 1.5 percent positive real growth in defense spending each year through 1990, the military would have to choose between expanding its force structure as planned—with a severe reduction in daily combat readiness and a return to the days of the alleged "hollow" army—or cutting back the overall size of our forces to maintain combat readiness.

WHAT DO THE GRAMM-RUDMAN CUTS MEAN FOR NATIONAL SECURITY?

Reductions in the fiscal year 1987 Defense budget which might be required under Gramm-Rudman are so large that they pose fundamentally different questions about the Nation's defense posture than those usually faced by Congress in annual budget deliberations. The issues no longer principally will be whether we buy 150 or 180 F-16 fighter aircraft, or whether we freeze or raise military pay, in any one budget year. The questions raised by Gramm-Rudman in fiscal year 1987, and thereafter, may challenge the very military, foreign policy and philosophical foundations of our present national security posture.

At the very least, Congress may have to address the following questions:

First, can this Nation maintain its present treaty and historical commitments to defend so many regions throughout the world, or will it have to reduce those commitments, and if so, which ones? For example, can we afford a credible defense of the Persian Gulf? Is an expanded military involvement in Central America affordable? Are we foreclosing involvement in Africa, particularly Angola—or in Southeast Asia, particularly Thailand? Can we maintain our troop levels even in the NATO theatre?

Second, can we afford to maintain our strategic triad or will we be required to reconfigure those forces by placing more reliance on certain nuclear delivery systems and less on other such weapons? Can we afford Midgetman? Can we afford two new manned bombers? How can we afford SDI without abandoning other major strategic weapons? By reconfiguration, will we have to rethink our traditional deterrence doctrine?

Third, can we continue to afford the All Volunteer Force, or will we have to return to some form of conscription as part of a universal national service plan? Should we reduce our active forces, or continue to restrain their growth, and rely even more on our National Guard/Reserve components?

Fourth, can we obtain increased defense contributions from our allies to relieve us of certain defense missions?

Fifth, can arms control reduce our military requirements while maintaining our security?

I wonder if any of the sponsors or supporters of the Gramm-Rudman plan envisioned the kinds of choices its enactment may force the Nation to make about its national security. As I said at the outset, the Congress has created a Pandora's box, the contents of which are only beginning to emerge.

This is but one example of the basic flaw in the Gramm-Rudman approach to budgeting. There are a number of others already coming into view, and over time, I predict many more will emerge. But it is even clearer to me now than it was a few days ago that the Congress will rue the day that it ever saw, much less passed, the Gramm-Rudman amendment.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. STEVENS). The clerk will call the roll.

The assistant legislative clerk proceded to call the roll.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATUS REPORT

Mr. ARMSTRONG. While we are waiting, I am not quite sure what business will transpire next. But while the leader works on that, I thought I might take a moment to explain to my colleagues what has transpired in the House, and make a couple of observations about the proceedings there.

As you all know, the House has adopted a rule the effect of which is to alter the conference report on the reconciliation bill previously agreed to by the Senate, and has returned the bill to us in an amended form.

In my view this is a most improvident action for the other body to take for a couple of reasons: First of all, because they run a heavy risk that the ultimate effect of this action will be to make it impossible to pass a reconciliation bill in which case some $66 billion in savings will be lost.

In my judgment there are two reasons why the other body took this action.

I was in the Chamber when it occurred and talked to a number of our colleagues in the other body. I discussed it with them for I guess an hour or so in little informal groups around the Chamber. There were two major themes that I heard raised over and over again.

One was they did not like the value-added tax. Well, as Senators will recall, I do not like the value-added tax either. I tried to explain to Members of the House that this was a package. There were some good things in there, some things I did not care for, but that on balance there was a lot more good than bad, and they were making a big mistake to pass up savings of a very large magnitude because of a disagreement over a relatively small element of the package which is the value-added tax.

The other great theme running through the Chamber as this was under discussion was, well, it is all moot because the President is going to veto the bill.

Since this is a matter that the Senator from Louisiana and I discussed briefly in the early evening, I want to say my assurance was that the President would not veto that based on my evaluation that the field position, Presidential history, the economics of the bill, and other considerations were not shared by others apparently including the Director of OMB who spent most of the evening calling Members of the other body and telling them if indeed this bill were passed that the President would veto it, and would do so with great enthusiasm and relish.

I am still not so sure that is true because were this bill to be presented to him either in the form that it has now been adopted by the Senate or in the form passed by the House, it would in my estimation be a foolishly irresponsible act for the President to veto it.

I do not think when he actually looked at it and focused on it that he would do such a thing.

I do not want to take too much time. I want to explain why because this is a matter when this thing all falls apart there are going to be a lot of people who will go back and try to decide who is at fault, who is to blame, what happened, where did things go off the rails after we spent all year trying to get savings, ane end up with some $66

billion savings in it. Why did we not finally get it enacted?

The reason I do not think the President personally would have ever vetoed this bill is very simple, because the savings which are made by this reconciliation bill will occur anyway. Ultimately, they will occur under Gramm-Rudman, but under the Gramm-Rudman formula half of those savings will be made out of the defense function. I do not think that is what the President would want. I think he would feel, if he reflected upon it carefully, the savings as they are made in this reconciliation bill are not only far more responsible but far more in accord with his sense of priorities.

So despite what the Director of OMB may be telling people, I do not believe in the ultimate analysis the President will veto the bill.

In any case, I judge the leader is now ready to proceed. I do not want to delay any further. I want to express my regret to what has happened, the hope we are going to be able to retrieve it, and somehow arrive at an agreeable reconciliation bill that the two Houses can pass and send to the President. And, if that happens, I for one will contact the White House and urge it be signed.

OMNIBUS BUDGET RECONCILIATION ACT

Mr. PACKWOOD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 3128.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That pursuant to the provisions of H. Res. 349, the House rejects the conference report on the bill (H.R. 3128) entitled "An Act to make changes in spending and revenue provisions for purposes of deficit reduction and program improvement, consistent with the budget process.".

Resolved, That the House recede from its disagreement to the amendment of the Senate to the text of the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the provisions of the conference report on the bill, with the provisions of Subtitle B of Title XIII (Superfund and Its Revenue Sources) stricken.

Mr. PACKWOOD. Mr. President, I move that the Senate concur in the House amendment with the language of the conference report on said bill as a substitute.

The PRESIDING OFFICER. The question is on the motion.

Mr. CHAFEE. Could the Senator explain exactly what that means?

Mr. PACKWOOD. Yes. We are sending back to the House the conference report as passed by the Senate.

Mr. CHAFEE. Sending back to the House the Senate——

Mr. PACKWOOD. We are sending back to the House the conference report that the House and the Senate originally agreed upon, and that we passed.

Mr. CHAFEE. Thank you.

Mr. EXON. One further question. If I understand it—and I direct my question to the Senator—this reportedly in essence is taking the same measure that we sent them before, and sending it back over to them.

Mr. PACKWOOD. Exactly.

Mr. EXON. That is another way to state it.

Mr. DOLE. They did not understand it the first time. [Laughter.]

Mr. EXON. The majority leader said they did not understand it the first time. Let us hope that is not the result.

Mr. PACKWOOD. I can assure my good friend from Nebraska that I hold the other body in the highest esteem but the majority leader's explanation of the problem carries some greater improvement.

Mr. JOHNSTON. Will the Senator yield for a question?

This reconciliation has the so-called extenders in it.

Mr. PACKWOOD. That is correct.

Mr. JOHNSTON. And the Senator is aware that the freestanding extenders are not likely to pass in this body tonight. Did the Senator get that hint from the drift of things?

Mr. PACKWOOD. Is that a drift I get from the Senator from Louisiana or somebody else?

Mr. JOHNSTON. The Senator may get it directly from me.

Mr. PACKWOOD. I do not know if any freestanding extenders are going to pass tonight or not. I think there will be some freestanding extenders offered. If the Senator from Louisiana is saying there will be no other bills passed tonight other than this report that we now sent out or are about to send out, that is in the power of the Senator from Louisiana to achieve.

Mr. JOHNSTON. I just wanted the message really to get to the House, that turning down reconciliation will not be quite as cheap as some may think it might be.

Mr. PACKWOOD. I thank my good friend from Louisiana. I hope that his psychology works.

The PRESIDING OFFICER. The question is on the motion.

The motion was agreed to.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. DOLE. Mr. President, let me indicate to my colleagues that I am not in a position to indicate what we are going to be doing a little later on.

I hope we can come to some resolution. Let me also indicate to my House colleagues, not that they do not understand it, but we hope they understand it better——[Laughter.]

The second time because we believe we have an opportunity here to send the President a rather large savings package.

I am not excited about the tax on finances either. But neither am I excited about being here at 20 minutes to 11 with not much light at the end of the tunnel at this point. I hope that we can resolve our difference. I hope also that we can indicate to our colleagues in the next 20 or 30 minutes how much longer we will be here this evening.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. DOLE. Mr. President, I move that the Senate stand in recess subject to the call of the Chair.

The motion was agreed to; and, at 11:31 p.m., the Senate took a recess, subject to the call of the Chair.

The Senate reassembled at 11:49 p.m., when called to order by the Presiding Officer [Mr. HELMS].

EXTENSION OF CERTAIN TOBACCO EXCISE TAXES AND OTHER EXTENSIONS

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Senate turn to the consideration of H.R. 4006, a tax extension bill at the desk.

The PRESIDING OFFICER. Is there objection? Hearing none——

Mr. JOHNSTON. Mr. President, reserving the right to object, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, I withdraw my reservation.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 4006) to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program and to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions of current law which would otherwise expire at the end of 1985.

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 1435

(Purpose: Extension of certain expiring provisions)

Mr. PACKWOOD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Oregon [Mr. PACKWOOD] proposes an amendment numbered 1435.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. EXTENSION OF INCREASE IN TAX ON CIGARETTES.

Subsection (c) of section 283 of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to increase in tax on cigarettes) is amended by striking out "and before December 20, 1985" and inserting in lieu thereof "and before March 15, 1986".

SEC. 2. EXTENSION OF TRADE ADJUSTMENT ASSISTANCE PROGRAM.

Section 285 of the Trade Act of 1974 (19 U.S.C. note preceding section 2271) is amended by striking out "December 19, 1985" and inserting in lieu thereof "March 14, 1986".

SEC. 3. EXTENSION OF BORROWING AUTHORITY UNDER THE RAILROAD UNEMPLOYMENT INSURANCE ACT.

Section 10(d) of the Railroad Unemployment Insurance Act is amended by striking out "December 19, 1985" each place it appears and inserting in lieu thereof "March 14, 1986".

SEC. 4. EXTENSION OF MEDICARE PHYSICIAN PAYMENT PROVISIONS.

Section 5 of the Emergency Extension Act of 1985 (Public Law 99-107) is amended by striking out subsection (a), and by striking out "December 19, 1985" in subsection (c) and inserting in lieu thereof "March 14, 1986".

Mr. PACKWOOD. Mr. President, this is a total substitute for the extension that the House sent to us. It extends four existing programs through March 15, 1986: Cigarette tax at 16 cents a pack, trade adjustment assistance, Medicare physician freeze, and railroad unemployment borrowing authority.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1435) was agreed to.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. THURMOND. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is before the Senate and open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed for a third reading and the bill to be read a third time.

The bill (H.R. 4006), as amended, was read the third time, and passed.

The title was amended so as to read:

Amend the title so as to read:

To extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Program.

Mr. PACKWOOD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. DOLE. Mr. President, I move that the Senate stand in recess subject to the call of the Chair.

The motion was agreed to and at 11:53 p.m., the Senate took a recess, subject to the call of the Chair.

The Senate reassembled at 2:02 a.m., when called to order by the Presiding Officer (Mr. ARMSTRONG).

[The following proceedings occurred after midnight:]

Mr. DOLE. Mr. President, parliamentary inquiry. This is Friday, December 20.

The PRESIDING OFFICER. The Senator is correct.

RECESS UNTIL 11 A.M.

Mr. DOLE. Mr. President, I move that the Senate stand in recess until 11 a.m. today.

The motion was agreed to; and, at 2:03 a.m., the Senate recessed until 11 a.m., today, Friday, December 20, 1985.

NOMINATIONS

Executive nominations received by the Senate December 19, 1985:

INTERSTATE COMMERCE COMMISSION

Paul H. Lamboley, of Nevada, to be a member of the Interstate Commerce Commission for a term expiring December 31, 1989, reappointment.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 19, 1985:

GOVERNMENT PRINTING OFFICE

Ralph E. Kennickell, Jr., of Virginia, to be Public Printer.

DEPARTMENT OF THE INTERIOR

James R. Richards, of Virginia, to be Inspector General, Department of the Interior.

U.S. INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Thomas A. Bolan, of New York, to be a Member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 1988.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

DEPARTMENT OF ENERGY

Donna R. Fitzpatrick, of the District of Columbia, to be an Assistant Secretary of Energy (Conservation and Renewable Energy).

Mary L. Walker, of Maryland, to be an Assistant Secretary of Energy (Environment, Safety and Health).

EXTENSIONS OF REMARKS

A THREAT TO THE DENVER & RIO GRANDE RAILROAD

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. WIRTH. Mr. Speaker, I would like to share with our colleagues an article published in the Denver Post on December 4 telling the story of the Denver & Rio Grande Western Railroad [D&RG]. The D&RG is a regional rail carrier in Colorado and Utah that finds its very existence threatened by a proposed merger of two of the Nation's largest rail lines.

As the article describes, the proposed merger of the Southern Pacific and the Atchison, Topeka & Santa Fe Railroads directly threatens to leave the D&RG "landlocked." With track in only two States, the D&RG must have track usage rights from other, larger railroads to compete.

For many years, the Rio Grande has served the State of Colorado with distinction. It provides my home State with a crucial linkage, allowing Colorado shippers to transport their goods to the west coast efficiently and affordably. The Rio Grande and its future health and competitiveness is essential to the long-term economic well-being of Colorado.

I recommend the article to my colleagues, and request that it be reprinted below:

[From the Denver Post, Dec. 4, 1985]

RIO GRANDE TACKLES BIG BOYS

The Denver & Rio Grande Western Railroad would like to remain the little railroad that could.

Faced with a proposed merger of two giant lines that might threaten its existence as a regional carrier, the Rio Grande is leading a fight that could have repercussions for the rest of the industry.

With its own track in just two states, Colorado and Utah, the Rio Grande has branched out to serve shippers as far away as California and Oregon to the west and Kansas City, Mo., to the east.

The trick, familiar to many smaller railroads, was to find larger carriers that would agree to share their track.

LIFELINE JEOPARDIZED

But now the lifeline to the west provided by one of those bigger carriers, the Southern Pacific Transportation Co., may be jeopardized.

Southern Pacific's proposed merger with the Atchison, Topeka & Santa Fe Railway could result in much higher charges for using the track, says the Rio Grande, making its rates uncompetitive.

The merged carrier might even neglect portions of the track in consolidating its own operations, the Rio Grande fears.

And the Southern Pacific might also stop routing most of its own shipments over the smaller line's tracks, cutting an important source of revenue.

The Rio Grande has responded to the threat in novel ways.

It has petitioned the Interstate Commerce Commission, which must rule on the merger, for the right to buy more than 1,200 miles of Southern Pacific track.

And it has attracted the support of an unusually large number of major shippers, concerned about the increasing concentration of the industry and the impact that is having on the rates they pay.

Without the right to buy Southern Pacific track—and a related request to the ICC for the right to continue to use other portions of the Southern's line—the Rio Grande would die a slow death, top executives of the Denver-based carrier contend.

They cite a number smaller regional railroads, including the Milwaukee Road, that were dealt fatal blows by mergers.

Among other advantages the bigger carriers can offer discounts on large-volume shipments.

"If we don't get the rights, we're in the meat grinder," said W.J. Holtman, chairman and president of Rio Grande Industries, parent of the scrappy railroad.

The company is privately owned by Phillip F. Anschutz, a Colorado industrialist who made his fortune in oil and gas and acquired the railroad last year.

The line, the nation's 18th-largest, had operating revenues of $358.4 million and net income of $23.1 million in 1984.

TOUGH CHALLENGE

Holtman added that even if the commission gave the railroad what it wanted it faced a tough challenge:

It would still have to compete with the Union Pacific, the huge carrier in the West that was formed in 1982 by the merger of the Union Pacific with two other lines, the Missouri Pacific and the Western Pacific.

Holtman and his staff were worried about that merger, too.

The ICC, however, ended up giving the Rio Grande a key part of its request for track-usage rights, granting it the right to use the Missouri Pacific's line from Pueblo to Kansas City, Mo.

This enabled the smaller carrier to continue to offer service to shippers from the West Coast to the Middle West through what is known as the central rail corridor.

In the new proposed merger, the Rio Grande and three other smaller railroads that have failed requests for track-usage rights—the Kansas City Southern, the Missouri-Kansas-Texas, and the Texas-Mexican—are in a stronger position to get what they want from the ICC than in the past.

One reason is that many large corporations that are major shippers have become more concerned about keeping the smaller railroads viable.

Michael D. Petruccelli, the general traffic manager at PPG Industries of Pittsburgh, said that since 1980, when the Staggers Act deregulated the railroad industry, the number of major railroads has shrunk from 13 to 7.

As these giant systems emerge, he said, the smaller railroads sometimes provide their only "head-to-head competition."

Besides being supported by PPG, the Rio Grande's ICC petition is backed by such large companies as United States Steel Corp., American Home Foods, Cargill Inc., Ford Motor Co., and Miller Brewing Co.

The unusual nature of the proposed merger has added to the shippers' concern.

Most previous rail mergers involved systems that connected end to end.

But the 12,319-mile Sante Fe and the 13,270-mile Southern Pacific are largely parallel lines, often serving the same markets.

In addition to other routes, both carriers have lines running from southern California to the Southwest, through the southern rail corridor, and from the Southwest to the Midwest.

The two are owned by the Sante Fe Southern Pacific Corp., a holding company formed in December 1983 from the merger of the railroads' parent companies. The railroads are being operated separately pending the ICC's decision.

Because of the parallel lines, the proposal has brought the first opposition from the Justice Department to a rail merger since 1970.

In a brief filed with the ICC, the department argues that a merger will create a monopoly situation in many markets.

The Rio Grande contends that if the merger is allowed without conditions, the Southern Pacific no longer will have an incentive to use it as a connecting route in the central corridor.

Instead, the small line argues, the Southern Pacific would route its traffic by way of the southern corridor.

Such a fear is unwarranted, said Robert E. Gehrt, director of public relations for the Sante Fe Southern Pacific Corp., who added that the Southern Pacific would continue to route shipments from the Northwest over the Rio Grande lines because it is the more efficient route.

TEYON McCOY WELCOMED TO THE UNIVERSITY OF MARYLAND BASKETBALL PROGRAM

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. DYSON. Mr. Speaker, I would like to bring to the attention of my colleagues the upcoming addition of Teyon McCoy to the University of Maryland basketball program.

While some of us in Maryland may not be familiar with Teyon's sharp shooting and dominating defense, his heroics are well known by high school basketball players and coaches throughout the State of Indiana. At 6'1", Teyon plays point guard—a position well-suited to his extraordinary quickness and superb ball-handling skills.

Hailing from Bishop Noll High School in Hammond, IN, Teyon is the proud recipient of the BC All-Star Camp Outstanding Player Award and the leading candidate for "Mr. Basketball" in Indiana.

As Teyon prepares to tackle both books and basketball at the University of Maryland, I wish him, as well as his future teammates, great success.

Congratulations Teyon. And congratulations Coach Driesell for providing the people of Maryland with so many years of exciting basketball. The University of Maryland basketball program has been Maryland and the Washington, DC area.

THE BAHA'IS NEED OUR HELP

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. PORTER. Mr. Speaker, last week at a special White House program commemorating International Human Rights Day, President Reagan cited Iran's religious persecution of Baha'is as one of the saddest and most serious human rights violations in the world today. He referred to the tragic experience of the Baha'is in condemning religious and racial discrimination, genocide, and torture.

The U.N. General Assembly also recently condemned Iran's human rights record in a resolution citing the Islamic regime's actions against the Baha'is. This action was the first time the United Nations debated and voted on Iran's human rights practices.

Mr. Speaker, I would like to commend the President and the U.N. General Assembly for the attention they have recently given to the Baha'is. Hundreds of Baha'is have suffered at the hand of the dangerous Khomeini regime and the community of 300,000 is living in constant pressure and fear. Time is essential and it is time that we go forward with all actions condemning the Iranian Government until the Baha'is are able to practice their own religion freely and are entitled to their basic human rights.

I would like to share with my colleagues the text of the speech that the President delivered commemorating International Human Rights Day and a statement made by Los Angeles Judge James F. Nelson, chairman of the American Baha'i community, upon presenting the President with a commemorative plate for his support of the Baha'is in Iran.

REMARKS OF THE PRESIDENT AT SIGNING CEREMONY FOR INTERNATIONAL HUMAN RIGHTS DAY

The PRESIDENT. Thank you very much. (Applause.) Thank you. Please, sit down. And I wish I knew where the light on this thing turned on. I can't find it, so I'll do it in the dark. (Laughter.) Well, good afternoon and welcome to the White House.

Today we mark the 37th anniversary of the signing of the Universal Declaration of Human Rights, a document to which virtually every nation on Earth subscribes. It's a day for us to take stock, to survey the globe with an eye not so much in—to words, as to actual deeds; to measure the world against the noble assertions of the Universal Declaration and to reaffirm our commitment to the cause of human dignity.

America has, since its founding, been a refuge for those suffering under the yoke of oppression. A belief in the dignity of man and government by the consent of the people lies at the heart of our national character and the soul of our foreign policy. I had the pleasure of explaining that to a gentleman in Geneva not too long ago. (Laughter.) But, here, the difference is our documents, such as the Constitution, say we, the people, will allow government to do the following things.

Today more than ever we're proud to be champions of freedom and human rights the world over. So in observing Human Rights Day, we celebrate our commitment to the beliefs and moral teachings on which our own nation is founded; a belief in liberty, in the dignity of man, and in the inalienable rights of free men and women to choose their destinies. We have not hesitated when these rights and freedoms have been threatened.

Last month on Veteran's Day, I visited the graves of our soliders who gave their lives so that the rest of us might know the blessings of peace and freedom. Our sons, brothers, and fathers also lie in cemeteries and fields from Flanders to Manila under undying testimony to our determination that these rights shall not perish.

We've learned from history that the cause of peace and human freedom is indivisible. Respect for human rights is essential to true peace on Earth. Governments that must answer to their peoples do not launch wars of aggression. That's why the American people cannot close their eyes to abuses of human rights and injustice, whether they occur among friend or adversary or even on our own shores. And we must be particularly appalled that, on the threshold of the 21st Century, when man has made gigantic strides in opening the universe of space and finding cures for dread diseases, millions of our fellow men still suffer the grossest abuses. There are regimes, some friendly, some adversarial, that engage in frequent violations of human rights. There are other regimes which by their very nature are built upon the denial of human rights and the subordination of the individual to the state.

In Afghanistan and Cambodia, for example, alien dictatorships with the support of foreign occupation troops, subject their peoples to unceasing warfare. Today, six years after the Soviet invasion of Afghanistan, up to 120,000 Soviet troops remain. They have slaughtered innocent women and children. They have employed poison gas. And they have loaded toys with small explosives, an attempt to demoralize the people by crippling Afghan children. Some 3.5 million Afghans, fully one-fourth of the pre-war population, have been forced to flee to Pakistan and Iran.

The communist rulers of Vietnam have launched vicious attacks upon Cambodian refugees, refugees who were fleeing a communist regime in Cambodia itself, which led to the deaths of up to one-quarter of the entire Cambodian population.

In Ethiopia, a Marxist government has used famine to punish large segments of its own population. Vice President Bush visited a camp for Ethiopian refugees in the Sudan last March. Men and women of all ages were dying. But the Vice President told me, there's something unbearably painful about seeing the eyes of the children, the huge, sad eyes of starving children. And the peoples and governments of the democracies have responded generously to those pleas with tangible evidence of our concern.

In the Western Hemisphere, where so much progress toward democracy has been made, Cuba stands out as the country where institutionalized totalitarianism has consistently violated the rights of the citizens.

Unfortunately the Sandinista regime in Nicaragua seems determined to embark on the same course.

On three continents we see brave men and women risking their lives in anti-communist battles for freedom. We cannot and will not turn our backs on them. This year the House of Representatives has heeded their call and voted aid to the freedom fighters in Cambodia, Afghanistan, and Nicaragua, and repealed a ban on aid to freedom fighters in Angola.

Elsewhere we have seen considerable progress toward observance of human rights. In El Salvador, Grenada and Honduras freely selected—or elected governments, I should say—represent the best hope of their peoples for the future.

And just over the last weekend, a new civilian president was elected in Guatemala—that's the first time in 15 years. We laud those achievements. But our concern remains for those who are still captive and oppressed. This is where our voices just speak for justice, for the force of world opinion can and does make a difference.

One of the more tragic cases today is that of the Baha'i, whose leaders are with us today. The government of Iran is engaged in rampart religious persecution, especially against the Baha'is. Since 1979, 198 Baha'is have been put to death, 767 are imprisoned, some 10,000 made homeless, and over 25,000 forced to flee their country. Only the continued world outcry can help bring an end to their suffering.

In South Africa the inhuman policy of apartheid continues. The declaration of a state of emergency has given the police in that country essentially unlimited powers to silence critics of the government. Thousands of South African citizens have been detained without cause—or charge, I should say, and denied even elementary judicial protection. I have said that apartheid is abhorrent, it's time that the government of South Africa took steps to end it, and to reach for compromise and reconciliation to end the turmoil in that strife-torn land.

In Chile and the Philippines too, we've shown our strong concern when our friends deviate from established democratic traditions. In Eastern Europe, the hopes and aspirations of millions of people for religious freedoms, civil rights, remain alive despite years of repression. The Solidarity Labor Union is still outlawed in Poland and the Polish regime has once again moved to restrict the few freedoms that its people still enjoy. In Romania, religious persecution includes the destruction of Bibles, while in Bulgaria, the repression of the Turkish minority and the Islamic faith are witness to the unyielding denial of the basic freedoms of speech, assembly, religion in this region.

I addressed human rights in my meetings with General Secretary Gorbachev, and I made it very clear to him that human rights are an abiding concern of the American people. We had a long and confidential discussion and at the conclusion of our meetings, we declared in a joint statement that humanitarian issues would be resolved in a humanitarian spirit. Americans will be

watching hopefully to see whether that pledge is observed.

Make no mistake about it, human rights will continue to have a profound effect on the United States-Soviet relationship as a whole, because they are fundamental to our vision of an enduring peace. President Lincoln once called America the last, best hope of man on earth. Mr. Lincoln's remark has special poignancy today when American determination and strength are central to the peace and freedom of the entire democratic world. It is therefore incumbent upon us to work for the expansion of freedom throughout the world.

In this great effort, my friends, I deeply believe we have a good cause for hope. Evidence of the triumph of the ideal of freedom and respect for human rights can be seen in every corner of the globe, and this is because freedom is not only morally right, but practical and beneficial.

Indeed, governments that rest upon the consent of the governed and the rule of law are more successful in fulfilling their people's aspirations for a better life.

Democratic government and economic freedom have turned a number of small nations into economic giants. It even appears to have roused a giant nation from its economic slumber.

Permit me in closing to return to Mr. Lincoln:

"What defined America, what gave our nation its purpose and mission," he once said, "was something in that Declaration of Independence giving liberty not alone to the people of this country, but hope to the world. It was that which gave promise that in due time, the weights should be lifted from the shoulders of all men."

Well, let us always be true to that distinctly American cause. Let us never cease to work and pray that the weights should be lifted from the shoulders of all men.

Thank you and God bless you, and I will now sign the proclamation designating December 10th as Human Rights Day and December 15th, 1985 as Bill of Rights Day, and the week beginning today is now recognized officially as Human Rights Week. (Applause.)

(The bill is signed.)

Judge NELSON. Mr. President, you have mentioned in your remarks the relentless persecution of the Baha'is in Iran, and though the Mullahs of that country may choose to perpetuate these atrocities, they must know that because of you and the voices that you will encourage to speak out against it, these cannot now be perpetrated, except in the full light of public opinion. For this, we are deeply and eternally grateful.

We are aware also, Mr. President, that this is not a one-dimensional commitment; that in addition, you are morally and spiritually committed to the establishment of the peace we all want among the nations of the world—peace, the most pressing of all issues facing humanity today and for which the Baha'is ardently pray and that this country will help lead the world out of its current predicament.

Therefore, Mr. President, in recognition of your devotion to human rights, the National Spiritual Assembly presents to you on behalf of the 100,000 American Baha'is, a commemorative plate, and in recognition of your continuous commitment to world peace, we have the honor, Mr. President, to transmit to you from the Universal House of Justice, the international governing body of the Baha'is of the world, a statement on world peace.

Thank you, Mr. President.

The PRESIDENT. Thank you very much. Well, thank you very much and thank all of you for what you're doing in this.

I had the pleasure of quoting a statement of Thomas Jefferson to my colleague there in Geneva and he called it after he had heard it, "Very profound," when Thomas Jefferson said, "If the people know all the facts, the people will never make a mistake." So you, the people, and all of us together I think can continue to be a tide that will prove irresistible. Thank you all very much. (Applause.)

HELPING OUT ARGENTINA

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. GARCIA. Mr. Speaker, in yesterday's New York Times, Mr. Jefferson Morley of the New Republic wrote an excellent essay on why the United States should loudly praise Argentina for bringing to trial former military leaders. His point that the Argentina example is a good one for all Latin American nations, particularly those in Central America trying to establish democracy, is well taken. Hopefully, the White House will heed Mr. Morley's message.

I am inserting his essay in the RECORD for my colleague's perusal:

ARGENTINA'S TRIAL, LATIN TRIBULATIONS

(By Jefferson Morley)

The conviction last week of five Argentine military commanders for waging a "dirty war" against their own people is obviously an encouraging precedent for democracy in Latin America. But democrats elsewhere in the hemisphere, especially in Central America, who have endured similar reigns of terror still find hopes of human rights trials elusive. Not the least of their burdens is the legacy of Reagan Administration policy.

The Argentine death squads bequeathed their modus operandi to the death squads of Central America. The wave of state violence that began in Argentina in 1976—and killed at least 9,000 people before it ran its course—struck El Salvador and Guatemala in 1979 and after. The cars without license plates, the kidnappings, the assassinations, the torture and the disappearances—all were methods tried first in Argentina and later borrowed by the Central Americans.

The arraignment of high-ranking military officers who oversaw this Central American terrorism would go a long way toward establishing democracy in the region. From the start, there has been plentiful evidence that the violence in Central America—as in Argentina—has been largely directed from the highest levels of government. The problem is that many of the prime suspects have enjoyed the blessings of the Reagan Administration.

In February 1981, Secretary of State Alexander M. Haig, Jr., called for resumption of United States aid to Argentina on the grounds that it had made "dramatic, dramatic improvements" in human rights. Jeane J. Kirkpatrick, the United States' chief delegate to the United Nations, held friendly meetings with a host of Argentine officers. Gen. Roberto Eduardo Viola, who was one of the five sent to prison last week, was warmly welcomed at the White House in March 1981.

General Viola's counterparts in Central America received similar aprobation in the first half of President Reagan's term. The Reagan Administration seemed to have no qualms about doing business with Roberto D'Aubuisson, the right-wing leader said to have close ties to the Salvadoran death squads. The Administration allowed Argentine Army advisers to train anti-Sandinista insurgents in kidnapping, assassination and torture. In December 1982, President Reagan himself downplayed the death squad rampages in Guatemala.

None of this softness on terrorism has been lost on the democrats in Central America—and it surely gives them pause. After all, if President Reagan regarded mere criticism of the Guatemalan generals as a "bum rap" three years ago, how could he possibly believe that a formal indictment of those same generals would be justified today?

In some cases, the attitude in Washington may even endanger Central American moderates. A Central American who publicly calls for prosecution of military officers involved in death squads knows in any case that he may be their next victim. On top of this, indifference, if not hostility, from the United States makes it all the more prudent to keep silent.

The Assistant Secretary of State for Inter-American Affairs, Elliott Abrams, has told foreign reporters that the Administration will support Central Americans whether they "decide to have a 100 percent amnesty" for officers involved in rights abuses or "decide to try everyone." The trouble—as Mr. Abrams himself has admitted on other occasions—is that Central American leaders have not been able even to discipline their military subordinates, much less put them on trial.

A Congressional resolution, supported by the Administration, could clarify the United States' position. Such a resolution would hail Argentina for its impartial and unflinching approach to its own trial. The resolution should also state that any Latin American government that followed the Argentine example would enjoy the support of the people of the United States and, if desired, the assistance of their Government. This would underline the United States position that democracy consists not just of elections but of the rule of law.

TOM WINEBRENNER—32 YEARS OF VALUABLE SERVICE

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. EDWARDS of California. Mr. Speaker, Republican House Members do not have a monopoly on affection and admiration for Tom Winebrenner. We Democrats consider him one of us too, and we shall miss him very much.

In a partisan, adversarial atmosphere, which of necessity the House of Representatives must be, there is always need for the peacemaker, the reliable person both sides like and trust. Having such a person dulls the partisanship, makes the legislature work better, to the benefit of the public.

Tom Winebrenner has been that sort of person for all of his 32 valuable years of service in the House of Representatives. I can personally certify this truth for 23 of the 32 years, because that's how long I have had the privilege of knowing Tom.

Those of us whose offices are in the Rayburn Building or whose committees meet in Rayburn always seem to wait until the last minute to rush over to the House Chamber when the bells ring for a vote. We always look for Tom as we hurry through the entrance doors, and in a few succinct words Tom describes the vote. When the issue is clear and, if asked, Tom will politely say "Your vote is Aye, Mr. Edwards" and he's never been wrong yet.

Mr. Speaker, it's always poignant when we lose a fine institution around these historical rooms, and Tom is an institution, a useful and creative one, and so we'll be sad.

But we're sad for ourselves, not Tom, because he leaves us for exciting new work, and he leaves us with happy memories and a warm feeling for a dear friend who gave us so much.

CELEBRATING DAVID KARP'S BIRTHDAY AND HIS LOVE OF AMERICA

HON. MATTHEW F. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. MCHUGH. Mr. Speaker, the end of a congressional session is a time of frenetic activity, a time which requires great commitment and dedication. During these last days of the present session, I have become aware that on January 14, 1986, while Congress is not in session, a wonderful gentleman—who has in abundance those qualities of commitment and dedication—will be celebrating his 91st birthday.

I am speaking of my dear friend David Karp of Kerhonkson, NY, a man who has spent a lifetime loving America, honoring her achievements, and celebrating her freedoms and possibilities. During World War I, David served with distinction as a radio officer in the North Atlantic theater at a time when wireless telegraphy was in its infancy, and he was honored for his meritorious service. In later life, he remained proud of his service experiences and participated in veterans organizations and activities. He has been active in civic affairs, and is a former president of the Kerhonkson Lions Club.

As he and his devoted wife Lillian prepared to celebrate America's Bicentennial Year in 1976, David decided to sum up his vision of America's place in history by writing a stirring poem entitled "The American Spirit of Freedom." It is his beautiful gift to America, and in this season of grateful gift giving, I would like to share his gift with my colleagues by reprinting it in the RECORD. I know my colleagues join me in wishing David Karp a birthday celebration filled with great happiness and a future filled with many blessings for him and his family.

"THE AMERICAN SPIRIT OF FREEDOM"

Arise, America! . . . —Time does not wait,
Vigilance holds your freedom's fate.
Stand by your leaders in this global strife,
Alert to the noblest adventure in life.
Remember the great immortals of yore.
Behold their truths, lest ye march to war!

First came the Prophet, all-wise and divine,
Whose ethics remain an eternal shrine.
He preached this law on Sinai the Mount,
From "The Commandments," most sacred fount;
But the wrath of Cain re-echoed deeper
The cry, "Am I my brother's keeper?"

"I WAS,

Then from the East, a Shepherd appeared,
With doctrines sublime, beloved, revered:
Of a Golden Rule and Brotherhood,
Of a Kingdom come, through earthly good,
Whose precepts helped lay the cornerstone,
"Man does not live by bread alone."

Take Heed, America! . . . —Pause to reflect
Nature's immutable cause and effect.
Study man's struggle on history's page,
From Genesis, to the Space-Nuclear Age.
Outlaw, conquer, and forever eclipse
"The four horsemen of the Apocalypse."

I AM

Now, you are summoned to Judgement Hall,
Where Statesmen gathered to Freedom's call.
May your decisions wipe out all tears,
Heralding Peace for the next thousand years:
A Peace with honor, for those 'neath the sod,
Who died to uphold "Liberty under God."

Have Faith, America! . . . —Lift up thy gaze,
To His mysterious heavenly ways.
Probe "Man's inhumanity to man."
Question Destiny's ultimate plan.
Thus, as you ponder its purpose and scope,
Reason reveals this "rainbow of hope!"

I WILL BE,"

Democracy's heart shall ever be strong,
With courage to smite an aggressor's wrong.
Each citizen will have, a duty and right,
With training, directed, preserving its might;
That nations may keep "Four Freedoms" unfurled,
The symbols of Justice,—ONE GOD,—ONE WORLD!

STATE DEPARTMENT'S NEW ASSISTANT SECRETARY FOR HUMAN RIGHTS, RICHARD SCHIFTER

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. GILMAN. Mr. Speaker, along with several Members of Congress, I have called attention to the ceremony held in the White House this year commemorating Human Rights Day on December 10. Among other things I have inserted into the CONGRESSIONAL RECORD the full text of President Reagan's speech to assembled White House guests on that occasion. And I have called attention to the contrast between that ceremony and the scuffle which occurred in Moscow's Pushkin Square when a few heroic activists in that city tried to celebrate Human Rights Day peacefully. As set forth in the graphic eyewitness account provided by the Washington Post of December 11, the KGB moved in quickly taking the demonstrators away for interrogation. The vivid contrast between those two Human Rights Days speaks volumes as to the state of human rights in the U.S.A. and the U.S.S.R.

There has since come to my attention another Human Rights Day speech which also merits our consideration, the remarks delivered during the December 10th White House ceremony by the State Department's new Assistant Secretary for Human Rights and Humanitarian Affairs, Richard Schifter. Secretary Schifter took over his new human rights assignment about 2 months ago, after serving as head of the U.S. delegation to the U.N. Human Rights Commission and deputy U.S. representative in the U.N. Security Council and a distinguished career in the private practice of law.

As his remarks reveal, Mr. Schifter arrived here as a boy, a refugee from Hitler, in 1938. His parents hoped to follow him, but they never made it. I found his speech a moving testament to the cause of human rights, worldwide. I believe Dick Schifter is eminently qualified to hold his present position, not only from the viewpoint of his education and professional experience, but also as a tragic human rights victim very early in his life. His remarks should be welcome news to those who fear that our Nation does not adhere to a uniform human rights policy, applicable to all parts of the world.

Accordingly, I urge my colleagues, interested in the human rights cause, to read Dick Schifter's speech, keeping in mind his words: "It is my objective that my performance in this position will serve as a fitting memorial for my father and mother."

I know that many of my colleagues join with me in wishing Dick Schifter the best of success in his new undertaking, and that we look forward to continuing to work with him to achieve our common goals.

Mr. Schifter's speech follows:

REMARKS OF RICHARD SCHIFTER, ASSISTANT SECRETARY OF STATE FOR HUMAN RIGHTS AND HUMANITARIAN AFFAIRS, ON HUMAN RIGHTS DAY AT THE WHITE HOUSE, DECEMBER 10, 1985

The custom of celebrating the anniversary of the adoption of the Universal Declaration of Human Rights by holding a ceremony under White House auspices has by now become so well established that we may consider it a tradition. It has become equally traditional that remarks by the incumbent Assistant Secretary of State for Human Rights and Humanitarian Affairs are part of the ceremony.

I want at the outset to pay tribute to the accomplishments of my predecessor. Under the guidance of Elliott Abrams, United States human rights policy crystallized and became an essential, coherent and consistent ingredient of the United States Government's approach to foreign affairs. My task in that office, as I see it, is to build on the foundation laid by Elliott Abrams.

The position of Assistant Secretary of State for Human Rights and Humanitarian Affairs is a truly unique one. No other coun-

try in the world has elevated the person responsible for conducting human rights policy on the international scene to so high a level in its foreign policy establishment. Given the significance thus accorded to the position and, further, given the fact that this is my first opportunity to speak at an event of this kind, I want to use this opportunity to say a few words about the views and convictions which I have brought to this job.

Reporters who have interviewed me since my nomination was announced have asked whether my background has something to do with my decision to accept this position. The answer is: "Of course."

If you were to proceed to a reference library for newspapers and periodicals and were to get the New York Times of December 16, 1938, you will find in it a story on the arrival in New York harbor of yet another boatload of refugees from Hitler's Germany. The story is illustrated with a photograph. It was taken on the deck of the arriving ship. It is a picture of a group of these refugees looking out at the Statue of Liberty. One of these refugees gazing out at that great symbol of American freedom was a youngster who decades later was to become the third person to serve in the United States Government as Assistant Secretary of State for Human Rights and Humanitarian Affairs.

Many such boatloads arrived in those days. Another one of them, which had reached the United States a few weeks earlier, had numbered among its members a younster of about the same age who was then known as Heinz Kissinger.

I had come to the United States alone. Under the immigration laws then in effect, my father and mother had been placed on the visa waiting list. They had bid me good bye as I had embarked for my journey to the United States, in the expectation that we would see each other again soon.

That was not to be. Their last message to me, dated July 1942, and transmitted through the International Committee of the Red Cross, came from a place called Maidan-Tatarski. According to available records, the ghetto of Maidan-Tatarski was, to use the terminology of that period, liquidated in November 1942.

I recall reading a poem once about the victims of those times. It speaks of the millions for whom there was no funeral ceremony, no grave, no monument to mark their final resting place. The poem speaks of the cloud that emanates from the smoke stack near the crematorium and of the grave, the final resting place, in the sky.

It is my objective that my performance in this position will serve as a fitting memorial for my father and mother.

Let me also add in this context, that the President has called for Senate action on the Genocide Convention. It is my hope that the important symbolic act of United States adherence to that Convention will indeed take place in the near future.

What I believe I am able to bring to the job of Assistant Secretary of State for Human Rights is an ability to look at the world through the eyes of a victim. What a victim looks for is help, rescue, improvement in the conditions of life. What the victim does not need are pious declarations or thundering denunciations whose only effect is to make the persons uttering these declarations or denunciations feel psychologically satisfied. It is essential, I believe, that we continue a human rights policy which is result-oriented and avoids grandstanding.

Though the head of the Human Rights Bureau has the opportunity to influence policy and to exercise a certain amount of discretion, it is clear that his performance must harmonize with the general policy outlook of the Administration in which he serves.

As I have had the opportunity to represent the United States since January 1981 in international organizations concerned with human rights, I am well acquainted with our policy approach and have no doubt that my own inclinations are in full harmony with the human rights policy of this Administration. These policies, in turn, reflect the deeply-felt beliefs of the American people. My experience in recent years has served only to confirm the impression which I have held heretofore, that no other country exceeds ours in its altruism in the field of international affairs.

I would not want to suggest that we do not weigh our security interests or economic concerns as we make our foreign policy decisions. We must, and we do. But I believe that we, more than anyone else, are prepared to subordinate these narrower objectives to purely humanitarian considerations and that we do so irrespective of the political outlook of the government which is guilty of human rights violations.

Let me underline this last point most emphatically. Only this morning, on a television show, I was asked the question that is posed so often, whether we limit our human rights concerns to countries in the Soviet sphere and look the other way when human rights violations take place in countries with which we have better relations. The answer to this question, as I have already said, is that we concern ourselves with human rights violations everywhere. Now that I am no longer in the private practice of law, I do not keep a precise record any more as to the matters on which I spend my time minute-by-minute. But I can tell you nevertheless that in the six weeks that I have been on my present job, I have spent more time working on human rights problems in countries outside the Soviet sphere than on the problems that emanate from the Soviet bloc.

The reason for that difference is simple to explain. We naturally gravitate in our activities toward those situations where we can do some good in the near future. We can obviously do the greatest immediate good in a country that is likely to pay attention to an intercession on our part. Our time is then spent setting forth the fact as to the violation in question, formulating our expression on concern, determining the proper channel for communicating that concern and then communicating it. That is what is known as "quiet diplomacy." It is quiet only in that it is not made public. But it can be most emphatic and I can assure you it most often is just that. All along in choosing the words and in choosing the channel, we keep a single goal in view: to achieve the desired result.

Only where quiet diplomacy has failed or where there is no chance of even starting such a process do we resort to publicity. Obviously, the less friendly a country is toward us, the less likely that it will listen to our private entreaties. That is why it might indeed appear as if our human rights activities focus on the Soviet bloc when, in truth, we are concerned with all human rights violations.

As to this concern, there are no partisan divisions in our country. I have noted earlier that our government acts the way it does on human rights issues because in our democracy government expresses the will of the people and an affirmative human rights policy is what the American people expect of their government. The United States human rights policy, unique as it is on the international scene, truly reflects the spirit of the great civilization which the founders of this country built on the North American continent.

A final comment would be appropriate about the man from whom you will soon hear in person, the man whose word is the last word in setting our country's human rights policy. What the great majority of our people has recognized, what the world is increasingly recognizing, is that President Reagan represents the essence of the American character of decency and humanitarianism.

I have no doubt that in placing human concerns ahead of bureaucratic concerns in the exercise of our official responsibilities, we in the Bureau of Human Rights and Humanitarian Affairs carry out the policies of the President of the United States.

COUNTY COUNCIL OF HARFORD COUNTY, MD, ADOPTS RESOLUTION IN OPPOSITION TO THE REPEAL OF FEDERAL DEDUCTIBILITY OF STATE INCOME AND LOCAL PROPERTY TAXES

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. DYSON. Mr. Speaker, I would like to share with my colleagues in Congress a resolution adopted by the Harford County Council expressing their unanimous opposition to the proposed repeal of Federal deductibility of State income and local property taxes.

At a time when policymakers across the Nation are addressing the need to reduce the Federal deficit, many of us see the deductibility of State and local taxes as a central component of our campaign to provide our citizenry with essential services.

Passed on November 12, 1985, this resolution represents but one of the many strong expressions being heard across the country in favor of retaining this vital tool of effective government.

Resolution 49–85, as introduced by Council Member Fielder, follows:

WHEREAS, the County Council of Harford County, Maryland, recognizes the need to make the Maryland State income tax more progessive in order to finance the prospective growth in government expenditures and to achieve a more equitable sharing of the costs of government among income groups; and

WHEREAS, the federal government has encouraged states to assume greater responsibilities as part of the "New federalism" during a time when federal funds have been reduced for the kinds of programs of particular interest to the people and local governments in our region; and

WHEREAS, we believe that states properly have a claim to their citizens' income which is prior to that of the federal government and that the proposed changes would

represent an unwarranted intrusion into states' rights; and

WHEREAS, income taxes should not be considered part of one's income, so no tax authority should include in its income tax base the taxes its citizens pay to other authorities; and

WHEREAS, state and local property taxes provide basic support for essential governmental and educational services and the lack of federal deductibility would impact local revenue-raising capacities, and the basis on which state and local governments' credit ratings are determined; and

WHEREAS, interstate transfers arising from deductibility may simply offset transfers created by the exportation of other state taxes, such as severance taxes; and

WHEREAS, deductibility improves the tax system's overall neutrality by ameliorating the bias against saving and investment; Now, therefore, be it

Resolved, That the County Council of Harford County, Maryland, wishes to go on record in opposition to the current proposal to end the federal deductibility of state and local taxes; and be it further

Resolved, That a copy of this Resolution be sent to each member of the Maryland delegation in Congress.

THE PRESIDENT'S VETO OF THE TEXTILE BILL

HON. ROD CHANDLER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. CHANDLER. Mr. Speaker, last night, the President vetoed H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985. I strongly support the President's position on this issue and I congratulate him for his actions.

I remain convinced that protectionism of the type envisioned by H.R. 1562 is bad for the country and bad for each and every American. This bill would fuel inflation, put thousands of Americans out of work, and profoundly threaten the economies of many of our trading partners to whom we look for purchase of our exports.

For a bill that advertises itself as the protector of certain domestic industries, H.R. 1562 quite curiously exempts from its coverage many of the countries which account for significant levels of foreign imports. Conversely, the bill would apply to such nations as Sweden, Norway, and Finland, which collectively account for less than one-quarter of 1 percent of the U.S. market for textiles and apparel, and which, as a group, import more textiles and apparel from the United States than they export.

I received a letter today from Sweden's Ambassador to the United States, Mr. W. Wachtmeister. His comments testify to some of the inequities caused by this bill and are, I believe, deserving of inclusion in this RECORD.

EMBASSY OF SWEDEN,
THE AMBASSADOR,
Washington, DC, December 11, 1985.

Hon. ROD CHANDLER,
House of Representatives, Washington, DC.

DEAR CONGRESSMAN CHANDLER: I noticed with pleasure a reference that you made to my country in the House debate last week on textiles and wanted to write to thank you for presenting our points of view so well. You noted that several major exporters to the United States of textiles and apparel would be exempted from the proposed restrictions while Sweden, Norway and Finland would not be, even though we hold only a minute share of the U.S. market and import more textiles and apparel from this country than we sell to you.

My government certainly feels that additional restrictions on world textile and apparel trade would be unfortunate in view of the forthcoming negotiations on a new Multifiber Agreement. Any new measures introduced should, in our view, take into consideration the conditions for production that exist in our country, where the textile industry pays high wages and in no way could be perceived as a threat to the corresponding U.S. industry.

Sincerely yours,

W. WACHTMEISTER.

THERE WAS NO NEED TO RUSH ON THE TAX BILL

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. GAYDOS. Mr. Speaker, once again we in the House have been pressured into acting with undue haste on a bill, H.R. 3838, the Tax Reform Act of 1985, that will have a tremendous impact on the lives of all Americans.

Once again, we have another example of what I call legislation by crisis. Only, as far as I can tell, no crisis exists.

There has been no clamor from my constituents for this bill or, for that matter, for any of the tax reform proposals that have been floating around this Congress for the past several months. So there was no real rush, except in the minds of some here, for dealing with this bill now while racing to adjourn.

One of the things that bothered me most as we rushed into this vote was that I really don't know what this bill contains. I only received my copies of the bill, the Ways and Means Committee report, and the committee summary last week.

And, when you consider that the bill itself is almost 1,400 pages—about the thickness of a good-sized telephone book—and weights more than 4 pounds, it's going to take more than just a couple of days to examine it thoroughly and to understand all of the implications.

But, in my cursory reading so far, I have found some good things in the bill, items that will benefit people, and I have found proposals that are so detrimental that it is impossible for me to support this measure.

I am very concerned about the provisions to tax some retirement benefits of Federal employees while exempting Members of Congress and their staffs. It's too bad the crafters of H.R. 3838 couldn't be straightforward with us by just using simple and understandable language in the bill rather than the typical convoluted language we have before us. At least then we and our constituents would know what we were dealing with.

I am concerned about the elimination of accelerated cost recovery that exists under current law. This program is a real benefit to many capital-intensive industries, such as steel and other manufacturing entities, and its elimination will do serious harm to those companies suffering most from the impact of import competition.

I am concerned about the repeal of the investment tax credit program on industry because, again, it will hurt most those companies that are struggling to regain the degree of competitiveness necessary to stave off pressure from imports.

I am concerned also about the treatment of industrial development bonds in this tax bill, bonds that are vital to depressed areas as a means of attracting new industries that will create jobs in parts of this country that have not been blessed with the fantastic recovery this adminstration says exists.

All in all, Mr. Speaker, while this tax bill may provide some benefits for some people, the negatives I have already found lead me to stand in opposition to the bill.

Further, as there seems to be no immediate need to rush into action, no pressure from the citizenry to pass the bill, I believe it would have been in our own interests to wait and look at the package more carefully before we put our seal of approval on it.

Our colleagues in the Senate are in no rush. In fact, they can't act on the tax bill until we do. Given that as a fact, there is no need for the House to rush into action on this measure when we have had only a short time to look it over.

Besides, despite the efforts by the President to convince Members to support H.R. 3838, he has already said that if the final bill contains many of its provisions, he will veto it!

Are we so involved in the political struggle that we can't see that we are being used? Let's wait, take our time and produce a tax package that will really mean something to the American people.

Quite frankly, there are too many unknowns in a measure of this size and import. I, for one, would rather say that I voted no because of not fully knowing what was in the bill rather than be criticized by my constituents later for failing to see some minor paragraph that has a negative impact on people.

I believe we should have waited rather than consider H.R. 3838. This is far too important an issue to do in a hurry. The danger now is that we have lost control and the Senate will be free to do what it is the President wants them to. After that, only the conferees will know what shape the final version will take.

RETIREMENT OF GEN. ROSCOE ROBINSON

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. CLAY. Mr. Speaker, it is with a great deal of pride and pleasure to bring to the attention of my colleagues the retirement of Gen. Roscoe Robinson, Jr., from the U.S. Army.

General Robinson, a constituent from the First Congressional District of Missouri, and a contemporary of mine, was retired from the military with honors on November 27, 1985 at Fort Meyers, Virginia with more than 30 years of dedicated service to our country. I am indeed honored to know him and to be his Representative in Congress. But, I do have some regrets about his retirement for I am no longer able to state that two of the top ranked black officers in the Armed Forces claim residence in my district.

Mr. Speaker, I submit for insertion into the CONGRESSIONAL RECORD a portion of the program from General Robinson's retirement ceremony.

The information follows:

ROSCOE ROBINSON, Jr., General, United States Army

General Roscoe Robinson was born in St. Louis, Missouri on 11 October 1928. He was commissioned a second lieutenant and awarded a Bachelor of Science degree in Engineering in 1951 from the United States Military Academy. He also completed a Masters program in International Relations from the University of Pittsburgh. His military education includes completion of the Infantry Basic and Advanced Courses, the United States Army Command and General Staff College, and the National War College.

He has held a wide variety of important command and staff position culminating in his final assignment as United States Representative to the North Atlantic Treaty Organization Military Committee. Other key assignments held recently include Commanding General, 82d Airborne Division, Fort Bragg, North Carolina; Deputy Chief of Staff for Operations, United States Army Europe and Seventh Army; and Commanding General, United States Army Japan/IX Corps.

General Robinson also served as Personnel Management Officer, Infantry Branch, Officer Personnel Directorate, Office of Personnel Operations, Washington, DC. In Vietnam, he was Deputy Chief of Staff, G4 (logistics), 1st Cavalry Division, and subsequently Commander, 2d Battalion, 7th Cavalry, 1st Cavalry Division. After completion of the National War College at Fort Lesley J. McNair, Washington, DC, he became Plans Officer, later Southeast Asia Special Actions Officer, J5 (Plans), United States Pacific Command, Hawaii and executive to the Chief of Staff, CINCPAC. He was Commander, 2d Brigade, 82d Airborne Division at Fort Bragg, North Carolina and then departed for Okinawa where he became Deputy Commander of the United States Army Garrison, later becoming Commanding General, United States Army Garrison, Okinawa.

Awards and decorations which General Robinson has received include the Distinguished Service Medal, Silver Star (with Oak Leaf Cluster), Legion of Merit (with two Oak Leaf Clusters), Distinguished Flying Cross, Bronze Star Medal, Air Medals, Army Commendation Medal, Combat Infantryman Badge (2d Award), Master Parachutist Badge, and the Joint Chiefs of Staff Indentification Badge.

He is married to the former Mildred E. Sims (Millie). They have two children: Carol Robinson Royal and Bruce (US Army).

Mr. Speaker, I ask that my colleagues join me in thanking General Robinson for his many years of dedicated and unselfish service to our nation and extend to him and his wife and family our best wishes.

PROGRESSIVE DISCIPLINE

HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. KINDNESS. Mr. Speaker, we are probably all sorely aware of the depth of discipline problems in our Nation's schools. I want to call the attention of my colleagues to an innovative program meant to deal with such problems in a constructive manner.

John Lazares, assistant principal of Wilson Junior High School in Hamilton, OH, has developed a "progressive discipline code" which has received a lot of attention over the past few months. To date, the code has been implemented by schools systems in Cincinnati and Harrison, OH, as well as a school system in North Carolina.

John Lazares and his colleagues at Wilson Junior High School are to be commended for their efforts in developing this idea, which emphasizes parent-teacher communication in an era where such communication may often be lacking.

I'm sure that there are many of us who share Mr. Lazares' hope that the increased involvement of parents in the discipline of their children will be helpful in translating discipline problems into better academic performance and increased parent awareness.

The following article by Mr. Lazares explains the "progressive discipline code" in greater detail:

HAMILTON CITY SCHOOL DISTRICT,
Hamilton, OH.

At Wilson Junior High School in Hamilton, Ohio, a progressive discipline code is utilized. A minor offense by a student results in a representative punishment. As a student continues to break school rules, the punishment becomes more severe. As the severity of offenses increases, the student may eventually be suspended out of school. We have decided to add one more step to our code before a student is suspended out of school.

In this additional step, a student who has continued to exhibit undesired behavior will receive a suspension until his/her parent comes to school for a conference. At that meeting, the parent is told the next time their child is involved in an infraction of the discipline code, the parent will be required to attend school with his/her child for the entire day(s).

The rationale for this procedure is as follows:

1. Students are embarrassed by having their parents with them at school. Several students, who when faced with the prospect of having their parents attend school, have pleaded with me to do anything else. This addition to our code has drastically reduced repeat-student problems. Students see parents in the building and realize that they could be next. Thus a great "preventive discipline" factor develops.

2. If a student receives a suspension, but the parent is willing to accompany him/her to school for an entire day, the suspension will be rescinded. Because the procedure is used in lieu of an out-of-school suspension, instruction time is not lost.

3. The parents observe the school day first hand. The lines of communication between the parent and teacher are greatly improved.

This is a good way for parents to actually see what type of education their children are receiving. One parent stated, "I finally realize what a hard job teachers have". Our schools need improved public relations and this can be another method of attaining this goal.

In conclusion, this program will help to decrease discipline problems and make parents more aware of their youngster's behavior and academic progress in school.

JOHN LAZARES, *Assistant Principal,*
Wilson Junior High School.

U.S. RELATIONS WITH EASTERN EUROPE

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. GARCIA. Mr. Speaker, the Secretary of State has just completed a visit to three Eastern European nations. It is important to note that not all Eastern bloc nations are identical. There are some important differences between both the domestic and foreign policies of these nations.

Our relationship with the nations of Eastern Europe has always been overshadowed by our relationship with the Soviet Union. While it is important not to diminish the control the Soviet Union has over these nations, it is equally important not to lump them together, ignoring their differences. In that light, I am inserting in the RECORD an article from the December 15 edition of the New York Times on Secretary Shultz' trip and on United States-Eastern European relations in general.

[The New York Times, Dec. 15, 1985]

SHULTZ HEADS FOR THE OTHER SIDE OF EUROPE

(By Bernard Gwertzman)

WEST BERLIN.—The Reagan Administration is showing renewed interest in Eastern Europe, spurred by last month's Reagan-Gorbachev meeting and the knowledge that a thaw in Soviet-American relations often produces openings as Moscow's allies made the most of a Russian smile. After stopping in this Western enclave, Secretary of State George P. Shultz planned to visit Rumania and Hungary today and tomorrow. He was

to spend a day in Yugoslavia before returning to Washington.

The longstanding American objective in dealing with the East Europeans has been both simple and complex. Any weakening of Communist cohesion is a military plus for the West, and—more important—a serious problem for the Russians. And beyond the security aspect, there is the perhaps sentimental hope that somehow, freedom can be brought to Eastern Europe by means short of war. But policy toward these governments has long seemed riddled with inconsistencies and dilemmas. Questions are again being asked about how to deal with the region.

Should the United States continue to follow President Lyndon Johnson's policy of "building bridges" in the hope that the East Europeans could turn westward? Or is it misleading and cynical to encourage seeds of independence, which only make clear Western importance in the face of Soviet-forced crackdowns and repression, as in Hungary in 1956, Czechoslovakia, 1968, and Poland, 1981? Would it not be more productive in the long run to treat the Soviet Union and the other European Communists as being in the same boat, perhaps with country-by-country adjustments? If relations with Moscow improved, ties with the others would, too. This might strengthen Moscow's veto over its allies but could also foster East European self-interest in change in Moscow.

The United States does not accept the incorporation of Eastern Europe "into a Soviet sphere of influence," Mr. Shultz said yesterday in West Berlin.

The Reagan Administration calls its policy "differentiation." As defined by Vice President Bush in 1983 after a similar quick trip to the region, it explains why Mr. Shultz is visiting Rumania and Hungary while leaving Bulgaria, Czechoslovakia, East Germany and Poland off his itinerary. Yugoslavia's Communist Government, which left the Soviet bloc in 1948, is a special case, while Albania belongs to no bloc and has resisted repeated American overtures.

"We look to what degree countries pursue autonomous foreign policies, independent of Moscow's direction," Mr. Bush said, "and to what degree they foster domestic liberalization, politically, economically and in their respect for human rights." He added: "The United States will engage in closer political economic and cultural relations with those countries such as Hungary and Rumania, which assert greater openness or independence."

Hungary has permitted private enterprises to flourish alongside moribund state farms and factories and has been relatively tolerant of individualism in the arts. But on foreign policy, it dutifully follows the Soviet line. The opposite is true of Rumania. Under President Nicolas Ceausescu, intellectuals and evangelical Christians are severely repressed. Living standards are the lowest in East Europe. But in foreign policy, Mr. Ceausescu has been the most independent leader in the Warsaw Pact, even refusing to participate in joint military maneuvers outside of Rumania. He also allows Jews and Germans to emigrate fairly freely, meeting United States conditions for preferential status on tariffs.

But some United States officials are concerned that Rumania's independence may not outlast Mr. Ceausescu, who will be 68 next month and is said to be in poor health. Rumania, which is in severe economic difficulty, may be tempted to return to the Soviet fold, they say, if independence is not materially encouraged.

Hungary is the only other Warsaw Pact member approved for Most Favored Nation tariff treatment. In Administration parlance, Mr. Shultz is "rewarding" Hungary, for its relative domestic leniency, and Rumania, for foreign policy independence, by singling them out on his first visit to the region.

But many critics would like to end the reward. Bills now before Congress would strip Rumania of its tariff preference because of its shoddy human rights record. And Senator Alfonso D'Amato says he may seek to revoke Hungary's preferred status because free debate was stifled during the recent forum on East-West cultural relations in Budapest.

Moreover, given the renewed concerns about espionage, there is concern that all the East Europeans may be helping Moscow gather information. Some officials, however, say the Hungarians and Rumanians are less active in spying than the other Communists. That is why they were left off the list when the Bulgarians, Czechoslovaks, East Germans and Poles were recently told to book their travel in the United States through the State Department, a procedure that helps the Federal Bureau of Investigation keep close tabs on their whereabouts.

CITY COUNCIL OF BALTIMORE ADOPTS RESOLUTION URGING SUPPORT FOR ELDERLY CITIZENS WHO NEED NURSING CARE

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. DYSON. Mr. Speaker, I would like to share with my colleagues in Congress a resolution adopted by the City Council of Baltimore pertaining to nursing care for the elderly.

Introduced by council members DiBlasi, Murphy, Myers, Ambridge, and Mfume on November 18, 1985, the resolution is entitled, "Federal and State Assistance for Elderly Citizens in Need of Nursing Care."

The resolution follows:

For the purpose of requesting the Federal and State governments to study the need for extended benefits for elderly citizens in need of nursing care.

Whereas, Elderly citizens experience a higher incidence of illnesses and accidents that require short term or long term nursing care as a course of medical treatment; and

Whereas, The cost of this nursing care has accelerated over the past 10 years and now, after a short period of time, exhausts the income and assets of all but a few; and

Whereas, People who work hard all their lives to be secure in their senior years are entitled to their personal dignity in spite of incapacitation; and

Whereas, Persons in need of nursing care should be able to rely on Medicare for this treatment but under the present rules they become economic pawns of State and Federal governments; and

Whereas, The Federal and State governments should study the issue of nursing care for elderly citizens and seek ways to build in protection for the nursing care needs of elderly citizens; now, therefore, be it

Resolved, That the President and the U.S. Congress and the Governor and General Assembly be urged to investigate the need for expanded Medicare and State support for elderly citizens who need nursing care; and be it further

Resolved, That copies of this Resolution be sent to the President of the United States, the Maryland delegation to the U.S. Congress, the Governor and the Baltimore City delegation to the General Assembly.

AFTER GENEVA

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. HAMILTON. Mr. Speaker, I insert my Foreign Affairs Newsletter for December 1985 into the CONGRESSIONAL RECORD:

AFTER GENEVA

President Reagan deserves the praise of Americans for his "fresh start" at Geneva. Although the November summit produced nothing concrete on the central issues of arms control and arms reduction, it improved the mood in U.S.-Soviet relations, reducing tension and signalling a return to diplomacy. The summit's significance depends on what happens next. It is up to the U.S. and the Soviets to try to build on its momentum.

The second summit, likely to be held next June or July, will be much tougher. It was easy this time for the leaders to meet, shake hands, exchange smiles and pledge to accelerate arms control talks. Next time the summit will be called a failure if it does not produce real movement on arms control. A summit can spur bureaucracies into action, but it can also obscure inaction. Painstaking diplomacy is not always advanced by highly visible public meetings. A second or third summit, if unproductive, could unsettle Europe and increase East-West tension.

The President has his work cut out for him. Preparation for the next meeting needs to begin now. The President must quickly assemble an arms control consensus within his own Administration, something he has so far been unable to do. He must give his negotiators guidance if progress is to occur before the next summit. He must resist pressure to compromise, which our allies will apply in coming months. He must choose whether to observe existing treaties while he accuses the Soviets of violating them. Most importantly, he will have to decide whether to accept limits on his Strategic Defense Initiative (SDI) to achieve deep cuts in Soviet nuclear weapons.

Mr. Gorbachev has his own set of problems. He must consolidate his power at the Party meetings in Moscow in February, 1986. He must decide if NATO or the Congress will induce President Reagan to make concessions, or whether Soviet compromises will be needed.

Under the domestic limits each leader faces, neither side can credibly threaten sharp increases in military spending. The outlook here is for more cuts in the President's defense budget. Mr. Gorbachev does not hide his preoccupation with the stagnating Soviet economy, or his reluctance to see

military spending go up to keep pace with U.S. technological efforts.

Observers are alert for early signs of movement in superpower relations. U.S. allies have already put forward a proposal at the Vienna talks on Mutual and Balanced Force Reductions. It calls for a small reduction in U.S. and Soviet forces to precede an agreement on verification measures. U.N.-sponsored talks on Afghanistan will resume soon and could provide a post-summit test of Soviet intentions. At the Stockholm Conference on Disarmament in Europe, each side has pledged to work on "confidence building" measures and the principle of non-use of force. Bilateral talks are also planned on preventing the spread of nuclear weapons and establishing centers to reduce the risk of nuclear war.

In Geneva, nuclear and space arms talks will resume in mid-January. Both sides agreed at the summit to seek progress in areas of common agreement, including cutting strategic arms by 50% and working out an interim agreement on intermediate range weapons in Europe. Neither side budged on the central issue of spaced-based defense, but there is some room in U.S. and Soviet positions to discuss the acceptability of SDI research.

There are major differences, however, in the terms defining the reduction of U.S. and Soviet arsenals. The Soviet proposal would include U.S. weapons in Europe, and apparently allows the deployment of Soviet SS-24 and SS-25 missiles while prohibiting our MX, Trident II and the future Midgetman missile. The U.S. proposal would ban all Soviet mobile missiles including SS-24s and SS-25s and the proposed U.S. Midgetman, but permit other U.S. systems. These terms of definition alone will be difficult to negotiate.

A further difference is compliance with past arms control agreements. In June, President Reagan announced a "no undercut" policy of adhering to SALT I and II to the extent that the Soviets did. He contends, however, that the Soviets have violated SALT II by deploying two new types of land-based missiles—SALT II allowed only one new type—and by encoding data from missile tests. Some cite these as reasons for U.S. abrogation of the SALT II Treaty. Others argue that without U.S. compliance the Soviets could "break out" rapidly from SALT II, which would complicate arms talks and undermine the effectiveness of defense systems contemplated under SDI.

Another critical compliance issue concerns the Anti-Ballistic Missile (ABM) Treaty of 1977. The U.S. charges that Soviet construction of a large new radar system at Krasnoyarsk in Siberia violates the ABM Treaty. The Administration also decided this October that the testing and development of SDI technologies is not a legal violation of the ABM Treaty, reversing the U.S. position of the previous 13 years. This change led to an outcry here and in Europe, and the U.S. decided for policy reasons to return to the original Treaty interpretation. How compliance disputes such as these are resolved will greatly affect the future of arms control.

The summit's outcome on arms control has yet to be written. Will we be able to reach agreements that for the first time really cut arsenals, or will we begin an accelerated arms race? Can we keep both nations on the track started at Geneva or will the next international incident derail us? Can we translate the moment of Geneva and what the President calls American new strength into specific agreements which will manage the arms competition?

The summit did not give us a breakthrough arms control or the difficult relationship between the United States and the Soviet Union. But in an improved climate it does give us a chance to keep trying.

LIMITING ARMS TRANSFERS

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. LEVINE of California. Mr. Speaker, today I am introducing a bill to limit the sale of sophisticated conventional arms and technology to the Third World. It is identical to a bill introduced today by Senator BINGAMAN and several of his colleagues in the Senate. The bill asks the President to undertake negotiations with governments of the key arms suppliers to establish a consultative commission for multilateral arms restraint. The consultative commission would be comprised of the United States and the Soviet Union, historically the largest arms suppliers, as well as France, the United Kingdom, Italy, and West Germany.

The functions of the consultative commission would be: First, to establish guidelines to regulate the effect of multilateral limitations on arms sales on the national economies of its member countries, and second, to address other areas pertinent to limiting the sale or transfer of arms including the adoption of mechanisms to safeguard against the circumvention of the arms restraint regime by its member countries and the establishment of a procedural timetable for the purpose of creating an additional forum to facilitate deliberations between member countries of the consultative commission and other developed, as well as newly industrialized, countries on the limitation of arms transference.

This bill would also require an annual arms sales report to include certain information enumerated in section 3 of the bill.

Mr. Speaker, the need for this legislation is clear. Over the past two decades, arms sales worldwide have increased tenfold from $3 to $4 billion a year to $30 to $35 billion a year. Some $25 to $30 billion of this annual amount represents arms transfer agreements with countries of the Third World. The Congressional Research Service reports that from 1977 to 1984. Third World countries doubled their purchases of arms. Between 1980 and 1984, Third World countries contracted to buy arms from the United States, the Soviet Union, and the major West European countries totaling $40,249,000, $40,201,000, and $33,328,000, respectively.

The proliferation of arms in developing countries tends to undermine geopolitical regional balances, which have direct implications for North-South and East-West relations. Experts agree that military confrontation between the United States and the Soviet Union is most likely to result from a regional conflict in the Third World. Even as we meet here today, conflicts continue in Afghanistan, the Persian Gulf, Southeast Asia, Africa, and Central America—all fueled by a supply of new and more sophisticated arms, and all possibly provoking wider wars that could involve the two superpowers.

Consider these facts, presented in the April 19, 1985 Congressional Research Service report, "Trends in Conventional Arms Transfers to the Third World by Major Supplier, 1977–84":

Both the Soviet Union and France substantially increased their shares of Third World arms transfer agreement values between 1983 and 1984. The value of the Soviet Union's agreements with the Third World increased to $10.4 billion in 1984 from $4.8 billion in 1983.

Arms transfer agreements with Latin America became much more polarized during 1981–84 than they had been during 1977–80. The United States and the Soviet Union, which collectively accounted for 24% of the arms transfer agreements with Latin America in the earlier period, were responsible for 53% of these agreements between 1981–84. The United States' share increased from 3% to 15%, and the Soviet Union's share increased from 21% to 38%.

The real issue of all non-Communist nation's arms transfer agreements with, and arms deliveries to, the Third World have exceeded that of such agreements by all Communist nations every year since 1977.

It should be of concern to us all that an increasing number of countries participate in the arms trade, and in selling arms to the Third World. Brazil, Israel, India, North and South Korea, Taiwan and China have developed arms industries.

Mr. Speaker, sophisticated conventional arms are dangerous instruments of war, made more dangerous by the fact that conflicts using conventional weapons can escalate into those using nuclear weapons. Clearly, it is in the best interest of our own country, indeed in the interest of all countries in the world, to establish a system of multilateral controls on the export and proliferation of conventional arms.

As evidence of the House Foreign Affairs Committee's and Congress' recognition of the need to control arms transfers, a provision was included in Public Law 99–83, the International Security and Development Cooperation Act of 1985, calling for discussisons with the Soviet Union and France aimed at beginning multilateral negotiations to limit and control the transfer of conventional arms to less developed countries. In addition, the law calls for a report to examine certain aspects of these arms transfers.

The bill I am introducing today goes a step further, not only by requirng an even more detailed report, but by actually establishing a formal body to consider this important problem.

The proliferation of sophisticated conventional arms is something over which all responsible nations must gain control. These weapons can and do create instability in various regions of the world, they can lead to the use of even more dangerous weapons, and their purchase is draining the scarce resources of many Third World countries—resources which could be more

productively used to foster their economic growth. Surely arms exporting nations would better serve all humanity by trying to achieve a concensus on halting the proliferation of these dangerous weapons. Enactment of this bill would be a solid contribution toward this goal.

The complete text of my bill follows:

H.R. 3987

A bill to provide for multilateral limitations on arms sales, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FINDINGS.

The Congress finds that—

(1) arms sales worldwide have increased from $3-4 billion per year to $30-35 billion per year over the past two decades;

(2) $25-30 billion of this annual amount represents arms transfer agreements with countries of the Third World;

(3) the accelerating pace of arms transfers to developing countries absorbs resources which could be more productively utilized to foster economic growth;

(4) the proliferation of arms in the developing world tends to undermine geopolitical regional balances;

(5) the deterioration of regional balances has direct implications for North-South relations and East-West relations;

(6) experts agree that any military confrontation between the United States and the Union of Soviet Socialist Republics, and thus another global war, is most likely to stem from a regional conflict in the Third World; and

(7) between 1980-1984, Third World countries contracted to buy arms from the United States, the Union of Soviet Socialist Republics, and the major West European suppliers totaling $40,249,000, $40,201,000, and $33,328,000, respectively.

SEC. 2. CONSULTATIVE COMMISSION FOR MULTILATERAL ARMS RESTRAINT.

(a) CALL FOR NEGOTIATIONS TO ESTABLISH.—It is the sense of the Congress that the President should undertake negotiations with governments of the key arms suppliers in order to establish a consultative commission, modeled after the Coordinating Committee for Multilateral Security Export Controls and the nuclear suppliers group, which should be called the Consultative Commission for Multilateral Arms Restraint (hereafter in this Act referred to as the "Consultative Commission").

(b) MEMBERSHIP.—The Consultative Commission should be comprised of the United States and the Union of Soviet Socialist Republics, historically the largest arms suppliers, as well as France, the United Kingdom, Italy, and the Federal Republic of Germany.

(c) FUNCTIONS.—The Consultative Commission should meet in Geneva, Switzerland, at intervals to be determined by its members in order to negotiate restrictions on sophisticated combat weaponry and the technology of conventional arms production. The Consultative Commission should—

(1) establish guidelines to regulate the effect of multilateral limitations on arms sales on the national economies of its member countries; and

(2) address other areas pertinent to limiting the sale or transfer of arms, including—

(A) the adoption of mechanisms to safeguard against the circumvention of the arms restraint regime by its member countries; and

(B) the establishment of a procedural timetable for the purpose of creating an additional forum to facilitate deliberations between member countries of the Consultative Commission and other developed, as well as newly industrialized, countries on the limitation of arms transfers.

SEC. 3. ANNUAL ARMS SALES REPORT.

Paragraph (5) of section 25(a) of the Arms Export Control Act (22 U.S.C. 2765(a)(5)) is amended—

(1) by striking out "and" at the end of subparagraph (A); and

(2) by adding after subparagraph (B) the following new subparagraphs:

"(C) the aggregage dollar value and quantity of defense articles, defense services, and design and construction services furnished by the United States to each foreign country and international organization, by category, for the preceding fiscal year, specifying whether such articles and services were furnished—

"(i) by sale under chapter 2 of this Act,

"(ii) by sale under chapter 2A of this Act,

"(iii) by commercial sale licensed for permanent export under section 38 of this Act (including separate listings for the value and quantity of the defense articles and defense services which were licensed for permanent export during that fiscal year and for the value and quantity of the defense articles and defense services which were actually exported on a permanent basis during that fiscal year), or

"(iv) by other authority;

"(D) the aggregate dollar value of all commercial manufacturing license agreements approved under section 38 of this Act during the preceding fiscal year, listed by foreign country and international organization;

"(E) the aggregate dollar value of all commercial technical assistance agreements approved under section 38 of this Act during the preceding fiscal year, listed by foreign country and international organization; and

"(F) the aggregate dollar amount of all offset agreements (as defined for purposes of section 309 of the Defense Production Act of 1950 (50 U.S.C. App. 2099)) associated with commercial licensed sales or government-to-government sales under this Act, which were entered into during the preceding calendar year by the United States suppliers of the defense articles, defense services, or design and construction services sold, listed by foreign country and international organization;".

THE TRADE ACT OF 1962

HON. BARBARA B. KENNELLY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mrs. KENNELLY. Mr. Speaker, I am today introducing legislation to correct a serious deficiency in the Trade Act of 1962, a deficiency that affects both our international trade and our national security. My bill would set a 120-day time limit on Presidential decisions under section 232, the national security provisions of this law.

Section 232 of the 1962 Trade Act provides for import relief if these imports threaten our national security. Once a petition for this relief is filed with or by the Secretary of Commerce, the Secretary has 1 year to forward his findings and to recommend whether and what type of relief should be granted. However, there is no time limit on how long the President may take to act or not act on these recommendations. As a result, trade cases with national security implications may languish for months, even years once they reach the President's desk.

At least one such case is before the President now. The machine tool industry has waited for nearly 2 years for a decision in their import relief case, despite the fact that machine tools are responsible, directly or indirectly, for almost every manufactured product; despite the fact that even in peacetime, up to 20 percent of our Nation's use of machine tools is linked directly or indirectly to our national defense, and despite the fact that no manufactured product—a tank, a gun, or even another machine can be made without a machine tool.

In the past few years, the import penetration into the machine tool market has increased and increased dramatically—from 27 to 47 percent of the market. Employment in the industry has dropped by 40 percent and is continuing to shrink. In late November of this year, I had the opportunity to tour the Pratt and Whitney Machine Tool plant in West Hartford. It was a festive occasion—the 125th anniversary celebration of Pratt and Whitney Machine Tool. Yet there was a lingering shadow over this visit: Employment had dropped from almost 1,000 people a few years ago to approximately 350 employees now.

It is difficult to say what kind of future the machine tool industry will have unless it receives some kind of relief. But at a minimum, we owe the industry, and this administration owes the industry, a decision one way or another. For this reason, my legislation also requires the President to make a determination within 120 days on pending recommendations that have been forwarded by the Secretary of Commerce, including the recommendations on machine tools.

Another industry of importance to the security of this Nation, the ball bearing industry, could also be benefited by this legislation. In early January, the International Trade Commission will send to Congress a report on the state of the ball bearing industry. Although this study is not yet available, I have seen figures that lead me to believe that we may be losing our ball bearing industry in this country to foreign imports. If that is indeed the case, and if the ball bearing industry does seek relief under the national security provisions of our trade laws, this legislation will ensure that the ball bearing industry, as well as other industries vital to our national security, will not continue to decline while their cases languish on the President's desk.

My legislation ensures that section 232 cases are decided in an expeditious manner. This legislation fills a gap in our national trade laws. I urge my colleagues to join me in supporting it.

51-059 O-87-37 (Pt. 27)

THE NEW AMERICAN FRONTIER

HON. BEN GARRIDO BLAZ

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. BLAZ. Mr. Speaker, imagine that the American frontier did not end in 1890, but instead set sail from our west coast, reaching to Hawaii and Alaska and then advancing toward the Asian rim of the Pacific. Imagine that far, far western American frontier exists today.

Envision that frontier transformed into an oceanic State as large as the 48 contiguous United States, covering 3 million square miles between Hawaii and the Philippines. Envision 2,100 tropical islands strung in necklaces of archipelagoes along strategic lines within that expanse.

Picture a 51st State at the doorway to East Asia, a lynchpin in America's front line of defense in one of the most vital and dynamic regions of the world. Picture a new member of the American political family astride our major lines of communication to Asia during the century of the Pacific.

If you can see these images in your mind's eye, then you can appreciate how strongly I feel about the potential of Guam and Micronesia and the historic importance of the Compact of Free Association. When President Reagan signs the historic compact at a White House ceremony, he will be doing much more than ratifying a complex geopolitical agreement, paving the way for an end to our Pacific island trusteeship.

Those are the images I often see when I wing my way west from Hawaii by commercial jet, following the Sun across the vast expanse of the western Pacific to reach my congressional district, the Territory of Guam—the hub of the American presence in Micronesia.

True, the compact negotiated with the Federated States of Micronesia and the Republic of the Marshalls will fulfill our sacred international responsibility to promote the development of the farflung islands toward self-government. The President's signature will also secure our Nation's strategic interests and responsibilities in the region, ensuring that the region will be closed to the machinations of third powers and guaranteeing the continued peaceful development of the Freely Associated States' 150,000 residents.

But more importantly, the agreement paves the way for a continuing, closer and more mature relationship between the United States and these Freely Associated States. It will allow them the freedom of initiative to chart and work toward their continued social, economic, and political development. But it will also cement the bonds of friendship we have created with the Micronesians.

Indeed, one of the island groups—the Northern Marianas—has chosen to join the American family as a commonwealth. And I submit that the strong pro-American feelings of the Micronesians leave open the clear and present possibility that in time, the Freely Associated States may choose to join our family.

I offer you these images because I see them and feel them. As a Micronesian, a man born and raised in the region, I feel a unique closeness to the people of Micronesia. When I reflect on my Micronesian friends and brothers, I think of the times we sat in the rubble of our homes after World War II had swept across our lives. Then I think of the opportunities afforded me when my land became a U.S. territory and my people became American citizens. I pause, I hope not presumptuously, to ponder the opportunity that would be offered to our neighbors as full fledged members of the American political family.

I dream and I see this. And if we can see it, the philosophers say, it can be. And for those who would ask, why?, I would answer, Why not?

On this, the eve of the century of the Pacific, our country—the champion of freedom—has welcomed new friends not in aggrandizement but in association. When future authors write a sequel to James Mitchner's marvelous "Tales of the South Pacific," they will do so with the knowledge that dreams do come true. They do. They do.

EDUCATION VOUCHERS: NO SALE

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. HAWKINS. Mr. Speaker, once again the Reagan administration is trying to sell the American public on an idea which, if put in place, would seriously jeopardize our system of free public education. I am speaking of the proposal, announced earlier this year by Education Secretary William J. Bennett, to replace the successful chapter 1 compensatory education program for educationally disadvantaged children with a system of "education vouchers." Instead of funds going directly to eligible school districts for remedial programs, the Government would give vouchers to parents of children receiving chapter 1 services, with which they could "purchase" an education at the school of their choice.

The administration has embarked on a full-scale marketing effort to sell its idea. Its advertising campaign is full of catchy phrases designed to win the support of any American who values freedom and equality. The voucher system, the administration claims, would promote equality between poor children and wealthy children by giving the former an opportunity to attend "better" schools they might not otherwise have been able to afford. Vouchers, we are told, will give poor children a "choice" as to which school they will attend. And if you're not sold on choice and equality, perhaps the administration can convince you that a voucher system will promote "healthy competition" between public and private schools.

Not a bad way to try and sell an idea. Unfortunately, the product up for sale is fatally defective. Fortunately, many 'consumers' have realized that even the most rhetorically appealing promotional campaign will not save an idea that is unworkable, misleading, and will, in reality, undermine the one national institution which can best fulfill the promise of equality—the Nation's public school systems.

I would like to share with my colleagues the November 15 Clarion-Ledger Mississippi newspaper editorial in reaction to the education voucher proposal. This editorial demonstrates that it is not so easy to sell a flawed idea to the public with worn-out slogans and hollow promises. From around the country, the response is clear: No sale!

WRONG TRACK—EDUCATIONAL VOUCHER ARGUMENT FALLACIOUS

The Reagan administration, through Secretary of Education William J. Bennett, has renewed its attempt to authorize the use of vouchers that some parents could use to choose the school, public or private, their children will attend.

Congress was not persuaded to enact the proposal when an earlier version of it was proposed in 1983 and it should remain unpersuaded now.

Bennett Thursday asked Congress to give vouchers worth an average of $600 yearly to parents of poor children so they can shop for "the best possible schools for their children." He predicted approval of the plan would spur a "healthy rivalry" among public and private schools to provide a better education for disadvantaged children.

He is wrong on several counts.

For starters, private school enrollment has been going up for years, and the "rivalry" has caused public schools to suffer without noticeably improving the private schools. The competition is more for money than educational excellence.

In addition, there is the constitutional problem with using tax money for private education, particularly when the private institution is a church school.

Perhaps most important, the vast majority of Americans are educated in public elementary and secondary schools, and these schools badly need strengthening. Mississippi public school backers are especially familiar with the problems of adequately supporting public schools, financially and otherwise.

Private schools already have an advantage because they are generally well financed and can limit their enrollment. They don't have to take every student of school age, including many with serious problems.

Further, parents who pay high bills for private schools are usually cool to school bond issues and tax rates sufficient to provide the quality needed in the public school systems.

Bennett said the vouchers would be "a ticket to find the best possible schools." However, not more than a small percentage of students can get in "the best possible schools." Better to upgrade the "disadvantaged" schools educating the masses than to send some of the "disadvantaged" children to the "best schools."

Congress should give short shrift to Bennett's proposal. It's inequitable, illogical, unsound and very likely unconstitutional.

H.R. 1083, THE LOW-LEVEL RADIOACTIVE WASTE DISPOSAL ACT OF 1985

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. DASCHLE. Mr. Speaker, I am very pleased with the strong support shown recently for H.R. 1083, the Low-Level Radioactive Waste Disposal Act of 1985. This legislation has been offered to address the nationwide disposal of low-level nuclear waste.

Nearly all low-level radioactive waste is disposed in sites located in three States—Washington, Nevada, and South Carolina. In 1980, legislation was signed into law—the Low-Level Radioactive Waste Policy Act of 1980—which encouraged States to dispose of waste generated within their own regions by entering into disposal compacts. Because these compacts were considered to be agreements covering interstate commerce, and thus a possible violation of consitutional prohibitions against States regulating interstate commerce, Congress must ratify these compacts.

While nuclear plants are responsible for most low-level radioactive contaminents, waste is generated through medical supplies, protective clothing, and mildly contaminated trash. It is estimated that 53 percent of waste is deposited in Washington, 46 percent in South Carolina, and 1 percent in Nevada.

Through adoption of this legislation, continued access to existing sites is guaranteed through 1992, provided progress is made in developing regional sites.

Progress is determined through the adherance to certain milestones, including:

By July 1, 1986, States are required to have joined a regional compact, or indicate by State legislation that the State will establish a single-State disposal site by December 31, 1992.

By January 1988, the compact must have prepared a plan describing the location of the disposal site.

Finally, a NRC license request must be filed by each compact with respect to the operation of a low-level radioactive waste site, or the single site State must certify to the NRC that it will have its own disposal site ready by December 1992.

Existing operating sites are allowed additional surcharges for acting as the host sites during this interim period. These surcharges include: maximum of $10 per cubic foot in 1986 and 1987; $20 per cubic foot in 1988 and 1989; and $40 per cubic foot in 1990 and 1992.

This legislation is necessary to continue the development of a coordinated, nationwide plan for the disposal of low level waste. Above all, H.R. 1083 provides this framework at the same time it remains sensitive to the needs and requirements of specific States. Above all, it provides States with flexibility in dealing with the disposal of low-level nuclear waste. Because it preserves the flexibility of States rights, it deserves the support of this body.

TRIBUTE TO BEN NORDMAN

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. LAGOMARSINO. Mr. Speaker, I rise today to take special note of the passing of one of the most prominent individuals of the legal community in Ventura County, CA.

Born in San Francisco in 1913, Benjamin Emil Nordman was the founder of one of the county's most influential law firms. He graduated from Oxnard High School, the University of California at Berkeley, Boalt Hall, and Hastings Schools of Law. At the onset of World War II, he joined the Army, went to Officers Candidate School and joined the Air Corps. He served in intelligence and counterintelligence functions in Britain, Switzerland, Italy, France, and Germany. For his work, he received the Bronze Star, the Legion of Merit, the Croix de Guerre and the Order of the British Empire. He left the Army as lieutenant colonel and returned to Ventura County to practice law.

A community leader, Ben Nordman served as director of United Fund, the Ventura County Economic Development Association, Seaboard Lemon Association, Bank of A. Levy, Real Estate Investment Trust of California, the Livingston Memorial Foundation, the Achille Levy Foundation, Ventura County Taxpayers Association, the Ojai Valley School District Board of Trustees, Board of Review of Oxnard and the Ventura County and California Bar Associations.

I ask all my colleagues to join me in expressing our deepest sympathy to his wife Joan, son Mark, and daughter Leslie. I will remember Ben Nordman as a good friend and one who cared about his community and about justice.

A TRIBUTE TO GORDON McKAY

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. MOAKLEY. Mr. Speaker, a few days ago Gordon McKay, senior vice president, celebrated his 20th year with the Public Affairs Department of New England Life, a Boston-based company with a solid reputation for integrity, commitment to community concerns, and a deep involvement with the critical economic and social issues facing the Nation and the Congress.

As is often said, the success of an effort relies on the achievements and efforts of many individuals. Gordon McKay has played a strategic role for these past many years in New England Life's Public Affairs Department, forming its own goals, guiding its principles and assuring that his department continues contributing significantly to the positive place New England Life has assumed in the region, on Capitol Hill, and throughout the Nation.

Gordon McKay, a resident of Lexington, MA, graduated from Ohio State, joining New England Life virtually right out of college. It was his vision, aims, and sense of purpose that were the genesis of New England Life's first Public Affairs Department 20 years ago. It is his knowledge, commitment to quality, his expertise, and superb managerial skills that are underpinning of the public affairs staff's drive for excellence. Gordon is, as well, one of the most personable, pleasant, and good-humored individuals I've ever met. I think most all of my New England colleagues would agree. Amazingly, I've seen him retain his goodnature even when the strange unknown fates that guide golf balls across the greens have conspired to drive him mad.

But with all seriousness, Mr. Speaker, I am pleased for our good friend Gordon McKay, who celebrates his 20th year with New England Life's Public Affairs Department, a department that gives substance and vigor to the concept of corporate responsibility to the community and the Nation. I add my praise to those of my colleagues from both sides of the aisle and both Chambers who sent Gordon letters praising his anniversary with the Public Affairs Department.

I am reminded of the wise old saying that the definition of an institution is merely the lengthened shadow of one man. For the Public Affairs Department at New England Life that man is and always will be Gordon McKay.

MARY TWITTY COMPLETES 24 YEARS OF GOVERNMENT SERVICE

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. DYMALLY. Mr. Speaker, in 1961 when our esteemed colleague AUGUSTUS HAWKINS was completing his last year in the California State Assembly, he hired Mary Twitty to run his office. That began a career in government for Mary that has now spanned 24 years. Mary has spent 14 of those 24 years here in Washington, serving first in Mr. HAWKIN's office and then in mine. Mary has countless dear friends among Hill staffers and Members of Congress. It is, therefore, with distinctly mixed emotions that I inform her friends that Mary will be retiring from full-time government service at the end of this year. It is with great sadness that my staff and I realize we must say goodbye to Mary as a coworker. Her effervescence has always brightened the office. And her sense of caring for her fellow workers has soothed many a ruffled staffer. She is one of those people who has put in countless hours of overtime unquestioningly year in and year out. She leaves when the work is done, not

before. To Mr. HAWKINS and to myself she has been much, much more than a staffer. She has been a warm, close, and trusted friend.

Her friends know that for some time now it has been Mary's ambition to found a magazine aimed at women in their middle years. In the little free time that she has had while working for me, she has laid the groundwork for the magazine, but her full-time career in government has prevented her from devoting sufficient attention to this project of the heart. Mary is leaving government service. But those who know Mary know she could never retire. She has too much energy, too much of a zest for activity for that. When I say that we say goodbye to her with mixed emotions, I have to acknowledge our sadness at losing her daily presence in the office, but I also have to acknowledge that we are happy for Mary. She now can dedicate herself to a project that fills her with excitement.

While Mary will no longer be on the Hill, she will continue to be associated with activities that are close to my interests and the interests of a number of my colleagues. Mary has agreed to work part time for the Caribbean American Research Institute. The institute is based at Shaw University in North Carolina. But Mary will be opening a Washington office for the institute. Like I said, Mary has too much energy to retire in the way most people think of retirement. For Mary, retirement is more like transition, an opportunity to use her many talents in new and creative ways. Mary, we love you and we wish you spectacular successes in your new careers.

GRAMM-RUDMAN IS A STEP TOWARD SOLVING THE DEFICIT CRISIS

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. WIRTH. Mr. Speaker, I want to express my support for the conference agreement on the so-called Gramm-Rudman deficit reduction bill. Although there are some problems with this legislation, I firmly believe that sustained, multiyear deficit reduction must begin this year.

The deficit is no longer just a problem—it is a national crisis requiring immediate attention. We simply cannot afford to postpone the tough choices which must be made to bring the deficit under control.

In 1980, the national debt was about $900 billion. Today, we are considering legislation to raise the debt ceiling to $2 trillion—which means that we have borrowed more in the past 5 years than in the first 200 years of our national history.

Borrowing of that magnitude crowds out private borrowing and puts upward pressure on interest rates. Today, the Federal Government consumes about 64 percent of this country's net private savings, making it harder for businesses to expand, homeowners to pay their mortgages, and parents to send their children to college.

High interest rates also attract foreign investors, and as foreign savings are converted into dollars, the value of the dollar rises. Since 1980, the dollar has risen 60 percent against other foreign currencies and is now overvalued by 30 percent. This overvaluation acts like a 30-percent tax on American products shipped overseas and a 30-percent discount on foreign goods sold here.

The result is a record trade deficit of $130 billion added to the budget deficit of $200 billion. By 1990, we will be paying $245 billion a year just in interest on these debts—a national economic bounty of $1,000 for every man, woman, and child in the United States.

Mr. Speaker, 3 years ago as a member of the House Budget Committee, I argued that the only way to solve the deficit problem was for leaders of the House, the White House, and the Senate to negotiate a comprehensive 5-year deficit reduction plan aimed at balancing the budget. The Congress is finally getting around to doing just that. The long-term approach I have advocated has been incorporated into the Gramm-Rudman legislation. With the 5-year deficit targets agreed upon, the President and the Congress must now operate within the constraints of responsible fiscal policy.

I intend to vote for this conference agreement because we must begin cutting the deficit now, and because our country desperately needs a multiyear plan to solve this crisis. I do, however, have some serious reservations about its automatic spending reduction mechanism. Not only does this mechanism exclude half of the budget from supposedly across-the-board reductions, it also takes the pressure off Congress to conduct the critical program-by-program reviews which have always been the keystone of responsible budget policy.

As a result, many of the programs which have been scaled back substantially by past budget cutting may end up taking a disproportionate share of the cuts in the future—including those key investments in education, infrastructure, and research and development which are so vital to our long-term economic growth.

I am also concerned that the automatic cuts would fall too heavily on military readiness accounts, while wasteful procurement spending like the famous $7,600 coffee pot would go untouched. By some estimates, 70 percent of the savings in defense spending will come from reductions in training, spare parts, maintenance, and other readiness accounts. These have been the most neglected areas of the administration's defense buildup—yet they are the most important elements in winning the kind of conflict we are most likely to face.

Despite these reservations, I believe that Gramm-Rudman represents an important first step in solving the deficit crisis. It is not completely clear what affect this bill will have on this Nation; it is very much an imperfect experiment in budget policy. One thing we do know for sure, however, is that the alternative—doing nothing—is considerably worse.

Ultimately, the impact of Gramm-Rudman will depend on the actions of this and future Congresses. If we act responsibly by carefully reviewing the budget and making the tough decisions, we can meet the specified targets, and automatic spending reductions will never occur. Only if we fail will we abdicate our responsibility to the budgetary robot.

Gramm-Rudman has raised the public's expectations. Our task is to follow through on this beginning and develop a consensus on the specific changes in budget policies which will be required to meet the deficit reduction targets. No less than the future of our Nation's economy is at stake.

ECONOMIC OUTLOOK

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, December 18, 1985, into the CONGRESSIONAL RECORD:

ECONOMIC OUTLOOK

Despite recent economic growth, there is increasing uneasiness and uncertainty about our ability to sustain it. The current economic expansion is now in its fourth year, about the time most upswings begin to falter. The American economy has been listless with relatively slow and erratic growth for the last year and a half. Most signs point to modest gains again next year, with no recession, but not much vigor either.

Despite early optimism, economic performance in 1985 was a disappointment. The economy grew about 2.5%, a below average year, and lower than expected. Unemployment fell slightly from 7.2% to 7.0%, though the number of unemployed (8.2 million) remained unchanged. 2.5 million new jobs were created, most of them in service industries, but manufacturing employment declined by 250,000 jobs. The inflation rate fell from 4.0% to about 3.2%. Some goods—gasoline, dairy products, and vegetables—are cheaper than they were last year, but the cost of services is up by almost 5%. Interest rates have been relatively stable, but they are almost 3% lower than a year ago. The bad news for the year was the burgeoning trade deficit and the largest budget deficit in U.S. history.

Predicting the future of the U.S. economy is always chancy, but uncertainty about tax reform and budget deficits makes the process even riskier today. Most estimates are that the economy will do no better than continue moderate growth—about 3%—for another year, with some increase in both unemployment and inflation.

There are several promising signs for the year ahead. The stock market sets a new record almost daily. The dollar has declined by about 20%, and may slide more, making our exports more competitive in world markets. Oil prices continue to fall. With a new intensity of competition in the economy, the outlook on inflation is good. That is welcome news for consumers, but it also means that workers should expect small pay hikes and that savers will not find high interest rates. There is also hope that smaller federal deficits targeted by the recently-passed

Gramm-Rudman deficit reduction plan will lead to lower interest rates and stimulate long-term economic growth.

Several potential sources of weakness in the economy bear watching.

INTEREST RATES

Despite this year's decline, real interest rates are still high. A drop in oil prices and progress against the federal deficit could lead to further drops. Lower interest rates would ease the debt burden of developing nations, reduce the dollar's value, and encourage business investment. If real interest rates go up, the prospects for growth would suffer. Falling rates would also hurt those who rely on interest earnings; personal interest income dropped by $10 billion in the last year, the only source of household income except farm income to decline.

FARM PROBLEMS

The farm depression continues. Farm prices and income have plunged in the last 12 months. Some prices improved recently, but it is too early to tell if this trend will last. The recent drop in the dollar's value may increase exports of U.S. farm products, but if farm bankruptcies continue and land prices drop further, farm areas will continue to decline. Farm problems cannot alone cause a recession, but, by undermining banks and consumer buying in the midwest, they could lead to a general downturn in 1987.

INVESTMENT

Business investment—a major source of the recovery's strength—seems to have peaked. Spending on new equipment and factories in 1984 and 1985 grew at its fastest pace since World War II. But output has not caught up. In 1985, manufacturers met demand with factories running at only 80% of capacity. Some businesses plan to invest less in 1986, the first reduction ever in a nonrecession year. Uncertainty about tax reform is one reason: businesses are waiting to see how funds spent for new investments will be taxed.

DEBT

Another worry is the degree to which debt—in the home, on the farm, at banks and businesses, in Washington, and abroad—permeates the economy. Even with record consumer debt, buying continues, but at the cost of savings which recently fell below 3% of disposable income. The worry is that debt buildup will inhibit future purchases and hurt the economy, with large-scale defaults, inflation, or a combination of both the only remedy.

TRADE DEFICIT

In 1985, the U.S. imported some $150 billion more than it exported, our worst trade deficit ever. Imports brought lower prices, but cost jobs, especially in manufacturing. Protectionist pressure is mounting. If enacted, more jobs might result. But if other nations retaliate, a dangerous contraction of world trade could occur. A major trade war could have severe repercussions in the U.S. and abroad.

BUDGET DEFICIT

The federal budget deficit hit a record-breaking $211.9 billion last year. The deficit inhibits capital formation, leads to higher interest rates, makes us depend on foreign capital, and, by driving the dollar up, puts us at a disadvantage in world markets. Growth in the federal debt also increases the government's payments for interest on the debt, reducing federal spending on other programs. So far, the economy has suffered little from huge federal deficits. If it had, the deficits would be dealt with. Instead, their effect is long term, a gradual erosion of U.S. living standards as investment and productivity slacken.

In 1986, the economy will be sustained by massive government spending (especially on defense), lower oil prices, and generally low inflation and inventories. But high interest rates, an overvalued dollar, low savings rates, weak profits, and high excess capacity suggest only modest growth. The balance of these factors will determine if 1986 is a good year. There is a frustrating gap between what we produce and what we could produce. My impression is that the economy will limp along, but that trouble looms. While a recession is unlikely before 1987, so is sustained growth.

TRIBUTE TO THE NATIONAL CONFERENCE ON SOVIET JEWRY

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. FOWLER. Mr. Speaker, as a cochairman of the Congressional Coalition for Soviet Jews, it has been and is my privilege to work with the leaders of the National Conference on Soviet Jewry. Every time that I have been in touch with the Washington staff of the national conference, I have been extremely impressed by their professionalism and competence. Without their assistance and guidance, the numerous important achievements of the coalition would not have been possible. I am looking forward to continuing our vital work of helping to improve the sad plight of Soviet Jews.

An article in the December 12, 1985 edition of the New York Times aptly describes the fine work of the National Conference on Soviet Jewry and of its Washington Representative, a man whom I am proud to have had the opportunity to work with, Mr. William Keyserling. I am submitting it for your review.

The text of the article follows:

CONFERENCE ON SOVIET JEWRY REACHES OUT

(By Irvin Molotsky)

WASHINGTON, Dec. 11.—For many years, American activity in behalf of Jews in the Soviet Union has been largely centered in places like New York and Los Angeles, where there are large Jewish populations.

In recent months, however, the National Conference on Soviet Jewry has been reaching out from its Washington office to broaden its constituency, gaining allies in such regions as the South and Middle West and from people of other religious faiths.

The effort is led by William Keyserling, a former political operative who is applying many lessons learned in both winning and losing campaigns.

According to Mr. Keyserling, one consequence of this effort, at least in part, was the message that the Rev. Jesse Jackson delivered to the Soviet leader, Mikhail S. Gorbachev, at the recent summit meeting in Geneva.

The message was the one that the National Conference on Soviet Jewry has been trying to get out since 1971: that the 2.5 million Jews in the Soviet Union ought to be given the freedom to practice their religion openly and that, if they choose, they ought to have the right to emigrate.

"Jesse Jackson, without being asked specifically, chose this as the issue he selected when he met Gorbachev, and that something we appreciate," Mr. Keyserling said. "He had been given material from individuals in our organization."

It was, of course, a bit of consensus-building as well for Mr. Jackson, the black leader who offended many Jews in last year's Presidential campaign by an offhand remark that many considered anti-Semitic.

A SOUTH CAROLINIAN

Consensus-building is familiar to Mr. Keyserling, who brought his skills in that field to the national conference in 1984, after having worked for such politicians as Senator Ernest F. Hollings and former Representative John W. Jenrette Jr., both Democrats from South Carolina, as well as for Robert F. Drinan when he was a Representative from Massachusetts.

"I was reluctant to take the job at first because my past experience had been the excitement of the political campaign," said Mr. Keyserling, who is a South Carolinian himself. "This does not have the day-to-day thrill and there's not the sense of satisfaction because, when you achieve a goal, you don't take credit for it."

Politics, of course, had its frustrations, including Senator Hollings' ill-fated campaign for the Presidency, which Mr. Keyserling headed for a time.

But, Mr. Keyserling said, a political campaign always had a definable goal: election day. The campaign for the rights of Soviet Jews, Mr. Keyserling said, "has no end—it will have to go on."

Another difference, Mr. Keyserling said, is that there is no relationship between money and success in his current job, while success in politics could often be directly related to the amount of money spent.

"There is no way to spend it," Mr. Keyserling said. "You don't need a slick campaign. It is an educational effort."

An example of this lack of a need to spend large amounts of money could be seen this week when representatives from groups around the country gathered here for a meeting of the National Conference on Soviet Jewry. One of their main activities was a protest rally near the Soviet Embassy that cost little more than the rental of buses to take the participants downtown from their hotel.

Most of those participants appeared to have come from Jewish groups, but the conference has recently also received backing from the United States Conference of Catholic Bishops and the Baptist Church, from John Cardinal O'Connor of New York and fundamentalist churches. "They said that this issue was absolutely fundamental to their constituencies and the American public," Mr. Keyserling said.

Mr. Keyserling did not get into politics by accident. His mother is a member of the South Carolina Legislature, and an uncle, Leon, is familiar to many in Washington for having served as chairman of the Council of Economic Affairs in the Truman Administration.

HE KNOWS CAPITOL HILL

Because of his work in the House and Senate, Mr. Keyserling knows his way around Capitol Hill, and he knows how to win the support of Government leaders.

The National Conference on Soviet Jewry held briefings recently, for example, for most members of Congress before they took trips to the Soviet Union, and it got all 100 members of the Senate to sign a letter to President Reagan declaring that the treatment of Jews in the Soviet Union was a fundamental human rights issue.

One result of this work, Mr. Keyserling said, was an emphasis on that matter when Mr. Reagan met privately with Mr. Gorbachev in Geneva, according to reports he has received on the summit meeting.

"It's a campaign that didn't begin yesterday and won't end tomorrow." Mr. Keyserling said. "As long as Jews in the Soviet Union can't get on an airplane and leave when they want to, it cannot end."

HAROLD STEARNS—MONTANA'S TEACHER OF THE YEAR

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. WILLIAMS. Mr. Speaker, 10,000 Montanans teach in the public schools of our State. Their responsibility is great and their achievements vital. In their classrooms, young folks are gaining the curiosity, wisdom, and hope necessary for informed citizenry.

Each fall, one of the 10,000 is chosen as Montana Teacher of the Year and graced with the respect and recognition due but not often enough accorded in their profession.

Harold J. Stearns is this year's Montana Teacher of the Year, and his selection is truly deserved. For 20 years, Harold Stearns has displayed the very best of the commitment and caring spirit that marks teaching as special.

He grew up on the wide plains and high hills of eastern Montana, the son of Harold G. and Jean Stearns. They were newspaper folks, running the Harlowton Times and Ryegate's Clarion. Now retired in Helena, they always have had a love of learning and a need to share the knowledge gained. It was a wonderfully infectious upbringing that helped lead their son to a career in teaching. He went off to the University of Notre Dame for a bachelor's degree and then returned to Missoula's University of Montana for a master's and then a doctorate.

He married Sheila MacDonald of Glendive and, together, teaching has been a shared pursuit. For 3 years, they taught at the American Dependents School in Wiesbaden, West Germany.

She now is executive director of the University of Montana Alumni Association. He now teaches history and sociology at Missoula's Sentinel High School and instructs in the Department of Education at UM. Their two children are Scott, 13, and Malin, 8.

Mr. Speaker, Harold Stearns has earned the admiration of his students and their parents, of his community and of his many teacher colleagues. It is recognition much deserved. We are proud of Harold Stearns—our Teacher of the Year.

THANK YOU, OFFICER MONTERA

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. GREEN. Mr. Speaker, on December 24, 1985, Mr. Vincent Montera, community affairs officer for the 17th precinct, will be leaving the police department to serve as a recruiting officer in the armed services.

As the Representative from the precinct's district I should like to offer my thanks to Officer Montera for a job well done. Having spoken before the officers of the 17th precinct on several occasions, I know first hand of his efforts to improve relations between the community and the police department. His work on the various problems that often arise has helped my staff to be more responsive to the needs of my district. I know that any Member of Congress would have been happy to have had Officer Montera performing such work in his district.

My warmest regards to Officer Montera in his future endeavors. He will be sorely missed.

WINE EQUITY ACT

HON. WILLIAM M. THOMAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. THOMAS of California. Mr. Speaker, I wish to discuss a subject of serious concern to California winemakers. The U.S. wine industry has matured over the last decade, becoming one of the world's best. Currently, the quality and purity of U.S. wines and particularly California wines go unchallenged. While we read of contamination and adulteration of wines by the Austrians, Germans, Italians, and Japanese, where chemicals like diethylene glycol are added to wine at a risk to the health of the consumer, the United States winemaking industry produces high quality wine that it has been unable to sell in many foreign markets because of foreign tariff and nontariff barriers. The consumers of the world do not have the free and open opportunity to make a choice between their domestic brands and U.S. wines.

The passage of the Wine Equity Act in 1984 empowered the President to study and review barriers restricting U.S. wine sales abroad and to negotiate with designated countries for reductions in trade barriers. On September 9 of this year, six countries, including Japan, were designated under the provisions of that act. Negotiations have been conducted with officials from those countries and were concluded as of October 31, the deadline set by Congress. The President must now report to this body discussing his progress, or in the event the barriers have not been reduced, actions he proposes to take in order to seek their removal. Because of our continued interest in this subject, I have followed the development of these negotiations and it is with great regret that I have heard informally the Japanese have not responded in any meaningful way to the requests of our negotiators for a reduction in Japanese barriers restricting sales of United States wine.

Japan has only a small number of wine grape growers and the bulk of Japan's grapes are used as table grapes. Japanese producers blend the remaining portion with predominantly imported bulk wines that the Government has chosen to make eligible for tariff preference that frequently allow the importation of the bulk wines free of duty.

The nature of the Japanese tariff and taxing system discriminates against United States importers of finished wine in favor of the domestic bottlers or fillers at a time when Japanese producers are enjoying open and free access to our alcoholic beverage and other markets.

Our primary intent in passing the Wine Equity Act was to obtain greater access for U.S. wine products in foreign countries, not to impose restrictions on alcoholic beverages entering the United States. It is my hope that officials in Japan will seriously reconsider their position and at least make some positive response to the request of our negotiators. The President has authority under the Wine Equity Act to use any of his existing authorities including section 301 of the 1974 Trade Act and section 854 of the 1979 Trade Act. Certainly we would encourage the President to use these powers against those countries that do not respond in any positive way to our desire to have an open and free trading system.

We have many trade bills that have been introduced and are awaiting consideration and passage by this body. While I am sympathetic to the desire of many of my colleagues to seek new legislation, here is a case of existing legislation that can be used to improve the current trade imbalance that is of such great concern to all of us. I feel confident that you will join with me as you have in the past when we approved this legislation, to encourage the President to exercise his authority under this statute to its fullest.

THERE IS NO CHRISTMAS HOLIDAY IN ROMANIA

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. WOLF. Mr. Speaker, on December 25, 1983, in a Christmas message, Father Geza Palfy, Roman Catholic priest of Hungarian minority in Romania, made the following statement: "I believe in Romania, Christmas should be an official holiday."

For that, he was arrested by secret police, interrogated, severely beaten, and left the police station two days later unconscious. He died 2 months later in a hospital, Tirgu-Mores. Romanian officials say he died of cancer of the liver; however, all evidence

gathered by Christian Response International indicated: "Father Palfy died of internal injuries sustained during police beatings."

This is the same country to which we give preferential trade status—most favored nation. Can we support such religious repression and violation of human rights? As we reflect during this Christmas season on our own liberties, won't you join me and 60 of our own colleagues in supporting a 6-month suspension of the MFN trade status to Romania to make a moral statement that Americans will have no part in the economy or support of such a repressive regime?

Please cosponsor H.R. 3599 to suspend MFN for 6 months in Romania.

DIVINE CHILD HIGH SCHOOL IS CLASS B STATE CHAMPION

HON. SANDER M. LEVIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. LEVIN of Michigan. Mr. Speaker, my colleague, JOHN DINGELL, and I have the privilege of representing those young men and women who attend Divine Child High School in Michigan. Divine Child has a long reputation of offering an exceptional academic curriculum and a most respectable athletic program. This year, they provided one of the best high school football records ever in class B competition here in Michigan. The season was exciting and even more memorable than the school's last State championship in 1975.

This year's Falcons, who finished a near perfect season that registered only one game in the loss column, allowed their opponents only 41 points. They were ready when the State finals began. In the playoff games, not one team was able to score against them, and in the final's they allowed only 76 offensive yards.

Throughout the season and the playoffs, the Falcons demonstrated the poise and humility that are the marks of true champions. Mr. DINGELL and I extend our heartiest congratulations to the new class B State champs, Coach Wishart, the faculty and administration of Divine Child High School, and the Dearborn—Dearborn Heights—community on this "Divine Season."

HUMAN RIGHTS VIOLATIONS IN IRAN

HON. MIKE LOWRY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. LOWRY of Washington. Mr. Speaker, recently, two Iranian women visited my office. Each escaped from their native country after being imprisoned and tortured. Their stories—and the physical evidence of the torture that they suffered—are appalling. I do not endorse the political views of any Iranian opposition group. But I think it is important for us to make it clear that we find no possible justification for the brutal acts described by these two women.

Mrs. Narges Shayesteh, now 27 years old, was a high school teacher. She was arrested in September 1980. During her imprisonment, her nose was broken and her knees suffered permanent damage because she was tied up and hanged from the prison ceiling for 48 hours. Prison guards also tortured her with lit cigarettes; the resulting wounds are still clearly visible. She was also forced to watch the execution of 150 other prisoners.

Ms. Mojgan Homayounfar, aged 24, was a math teacher and fine arts student. She was arrested in September 1981 and beaten severely. She lost part of her left leg when she was attacked with a matchete, and her right knee was shattered when her captors drove a car over it. She will be confined to a wheelchair for the rest of her life.

Obviously, the United States Congress has little influence on the Iranian Government. But Mrs. Shayesteh and Ms. Homayounfar are convinced that Iranian prisoners benefit from the worldwide outcry against these cruelties. If only for a while, they believe, conditions in the prisons improve in response to protests. For this humanitarian reason, I wish to add my own voice to that of the U.N. General Assembly, which has voted to condemn Iranian human rights violations, and others who have protested these violations.

AT&T'S WALT DAVIS RETIRES

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. FLORIO. Mr. Speaker, at the end of this month, New Jersey will lose one of its most dedicated and effective spokesmen for our State's industry when Walter J. Davis retires from AT&T after completing a successful multifaceted career with AT&T and the Bell System.

Walt Davis began his career at New Jersey Bell as a messenger in March 1937 and, except for his service in the U.S. Navy during World War II, has spent his entire working career in the Bell System and AT&T. During this time Walt held over 20 different positions with the company including installer, repairman, line foreman, and plant service supervisor.

In March 1971, Walt became manager of public affairs for New Jersey Bell, and I began a long and productive working relationship with him during my service in the State legislature. Following my election to Congress and the House Energy and Commerce Committee, I continued to work with Walt and his colleagues in the Bell System on the important Federal aspects of telecommunications policy.

Walt even found time to serve as mayor of Bloomfield from 1966 through 1971, supplementing this experience with service as first vice president of the New Jersey Council of Mayors.

In the past 14 years, Walt Davis has developed and earned a reputation as a visible and capable advocate for a key part of our State's business community. When Walt retires he will be missed by the entire New Jersey congressional delegation. We wish him all the best.

GRAMM-RUDMAN: AN EXERCISE IN CONGRESSIONAL SHAME

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. STOKES. Mr. Speaker, I am inserting in the CONGRESSIONAL RECORD an insightful article which appeared in the Cleveland Plain Dealer regarding the debt limit/Gramm-Rudman bill, adopted by Congress last week. This commentary, written by columnist David Broder, mirrors my own sentiments about the shameful situation Congress has wrought upon itself by the abrogation to the President of the power to determine congressional priorities.

I commend this article to the attention of my colleagues.

GRAMM-RUDMAN: AN EXERCISE IN NATIONAL SHAME

(By David S. Broder)

WASHINGTON.—The biggest gap in elective politics these days is not between Republicans and Democrats. It is between state-level officials who are meeting responsibilities and gaining confidence and federal officials who are falling down in their jobs and suffering a loss of self-esteem.

To move from a meeting of Republican governors in Wilmington, Del., to the sessions of Congress in Washington, D.C., as I did last week, was to travel backward in time and downward in scope. The governors were talking in straightforward terms about concrete achievements in their states and their hopeful plans for the future.

The legislators, debating and passing the Gramm-Rudman budget bill, were confessing their past failures in fiscal policy and warning of worse confusion and dire consequences ahead.

The spectacle of Congress voting to strip itself of the power of the purse, which has been the hallmark of legislative supremacy since the origins of Parliament, was remarkable but not reassuring.

For those with any sense of institutional history, the most poignant moment in the House debate came when Rep. Peter Rodino, D-N.J., said "This is a flagrant abdication of congressional responsibility."

Rodino gave the House one of its proudest moments, 11 years ago, as he guided the Judiciary Committee to the painful but profoundly necessary impeachment of President Richard Nixon for his violation of the Constitution and his oath of office. Now, Rodino came forward again in what he knew to be a vain effort to slow his colleagues' headlong rush to discard their own constitutional authority.

Rodino and such Republican elders as Rep. Silvio Conte, R-Mass., said they could

not understand how the Congress could vote "to bring itself to its knees."

Why did it? Not because the proponents believed in the process they were creating.

"I'm going to get into specifics," said Rep. Trent Lott, R-Miss., the minority whip, speaking for Gramm-Rudman, "because I'm afraid what we might find out."

"Gramm-Rudman is going to tie the Congress in knots," said Rep. Richard Gephardt, D-Mo., chairman of the House Democratic caucus and one of the principal architects of the final compromise. "It could be a disaster."

There were ample reasons for thinking it so. Gramm-Rudman adds a whole new layer of decision-making to an already complex budget process. It sets tough and arbitrary deficit targets for each of the next five years, exempts large parts of the budget from any cuts, significantly increases the president's leverage over Congress in determining how scarce resources are spent, but ultimately subjects both the president and Congress to mandated cuts imposed by the calculations of unelected civil servants.

The reason—the only reason—that Congress voted this irresponsible and possibly unconstitutional procedure was its shame at its inability to force itself and the president to pay the bills for the defense and domestic programs both support.

Because they know that to be true, there was more embarrassment than exultation in Congress over the passage of Gramm-Rudman. By contrast, the atmosphere among the governors in Wilmington was genuinely upbeat.

It was not because they were Republicans; if anything, Republicans have reason to be hangdog about their status in the states. They control just 16 of the 50 governorships and only a baker's dozen of them were on hand for the meeting.

But, like their more numerous Democratic counterparts, these governors speak as people who measured up to their responsibilities when times were hard, and now are enjoying the benefits of that courage.

Their current hero is Gov. Tom Kean of New Jersey, who was reelected last month with 70% of the vote. Kean's first election—the closest in state history—four years ago coincided with the onset of the recession. Like many other governors of both parties, he cut spending and raised taxes in that crisis, kept his budget balanced, and now is reaping the rewards of a surging economy.

Kean said that his objection to Gramm-Rudman is that "it's a straitjacket and an avoidance of responsibility."

He is right, and because he and his fellow-governors have met their responsibilities while Washington officials from the President on down have ducked, the gap in their performance and their morale continues to grow.

IN MEMORY OF EDWARD JOSEPH: SIR KNIGHT

HON. J.J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. PICKLE. Mr. Speaker, Edward Joseph of Austin was the perfect example of the American dream come true. A son of immigrant parents from Syria, Edward Joseph became an accountant, attorney, businessman, and one of the Austin's leading citizens.

Many of Edward Joseph's friends referred to him as "Sir Knight" because he had been knighted by Pope John XXIII in 1960. And indeed he was a "Knight in Shining Armor" to those less fortunate than him and who had benefited from his philanthrophy.

I am proud to say that he was one of my closest friends. There was no one I respected more in my community than Edward Joseph. Over the years, he has been a strong and loyal supporter of this office, and he never once asked for something for himself. All he wanted was good government for this country which he loved so much.

Last week, we laid Edward Joseph to rest. I would like to include in the RECORD the following remembrance of Edward Joseph's life and accomplishments.

EDWARD WILLIAM JOSEPH, OCTOBER 19, 1901 TO DECEMBER 12, 1985

Edward William Joseph was born in Austin, Texas on October 19, 1901. He attended St. Edward's University and The University of Texas at Austin.

Formerly the owner of a chain of indoor and outdoor theatres, Edward Joseph served on the Board of National Theatre Owner's Association. He was the Founder and Chairman of the Board of Edward Joseph Developments, Inc. which has developed many Texas properties.

Throughout his life, Edward Joseph gave unselfishly of his time to community and charitable organizations. For thirty-two years he served on the Board of Directors of the Home of the Holy Infancy. In addition, he served on the following Boards of Directors: Goodwill Industries, Child and Family Services (President for three terms), Chairman of the Board of Catholic Charities, the Catholic Student Center, United Fund, and the United States Small Business Administration. He was most recently serving on the Board of Directors of the Seton Fund, the Board of Directors of Marywood Maternity and Adoption Services, and the Board of Directors of the Institute of Texan cultures.

Edward William Joseph, baptized a Roman Catholic, was involved in religious affairs for several decades. He was honored by Pope John XXIII as a Papal Knight in 1960. He was a Knight Commander of the Order of St. Sylvester, a Private Chamberlain with Cape and Sword, a Knight of the Grand Cross (elevated by Pope Paul with Silver Cross) and a Knight of Columbus of the 4th Degree.

Education was always important to Edward Joseph. He was a life member of the Texas Ex-Student's Association and past President of the University of Men's Business Association. He was a member of the University of Texas President's Associates, the Chancellor's Council, a Bronze Member of the University of Texas College of Business Administration's Century Club, and a member of the Board of Trustees of the California College of Podiatric Medicine. He was awarded an Honorary Doctor of Science Degree from the College of Podiatric Medicine in 1984.

WALLISVILLE SALT WATER BARRIER PROJECT

HON. CHARLES WILSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. WILSON. Mr. Speaker, I would like my colleagues to be aware of an editorial that appeared in the December 1 issue of the Houston Post and two letters that were written as rebuttal to the editorial. The issue under discussion in the editorial and the letters is the Wallisville salt water barrier project for the Trinity River in Texas. The first letter was sent to the editor of the Post by the Honorable Price Daniels, former Governor of Texas. The second was written to the editor by the Honorable C. Scott Parker, mayor of Liberty, TX.

Former Governor Daniels and Mayor Parker argue a solid and reasonable case in support of completion of the Wallisville project, and I agree with them entirely. Accordingly, I insert the editorial and letters be entered at this point in the CONGRESSIONAL RECORD.

The material follows:

[From the Houston Post, Dec. 1, 1985]

DAMMED IF WE DO

If the story of the Wallisville Reservoir project were made into a film, it would have to be titled The Boondoggle That Would Not Die.

First authorized by Congress in 1962, the original project was halted by a 1973 injunction due to a faulty Army Corps of Engineers environmental review. A scaled-down $28.5 million version, less than one-third the acreage of the original, was brought back before Congress. In 1983 it won approval. This was based in part on preliminary raw data that mysteriously—and possibly illegally—found its way from the Corps to Congress.

The Corps wants the project completed. So do, among others, the Trinity River Authority and the City of Houston, which has a thirsty eye on the potential drinking water. To this end, they are asking U.S. District Judge Carl O. Bue to lift his 1973 injunction.

Congress cannot authorize a water project whose benefits do not exceed the costs. And the Corps contends this one has a yearly positive margin of $800,000, largely from controlling salinity of the Trinity River. The difficulty with the analysis is, it follows a long Corps tradition of being long on physics and short on biology.

In fact, the project appears to spell environmental trouble both above and below the dam. The lake that Houston wants would be so shallow it would soon choke with weeds, posing huge water treatment problems. The Corps plans to control the plants with a herbicide well known for its foul taste. So much for drinking.

In Galveston Bay, the U.S. Fish and Wildlife Service expects the changes in salinity and nutrients to wreak havoc on fishing. So, how big a deal is that? Only $40 million a year at dockside commercially. Only half the state's annual sport boat fishery harvest. So much—and this crucial—for the benefit-cost ratio.

If Congress had all the facts, odds are it could never have authorized this project at

all. As for Houston, if our water consumption doubled we still would be within our allotment from Lake Livingston. There is plenty of time to explore alternatives.

Judge Bue's injunction is fine with us. We hope he sticks by it.

PRICE DANIEL,
Liberty, TX, December 3, 1985.

To the EDITOR,
The Houston Post,
Houston, TX.

DEAR SIR: As a boy I delivered the *Post* in Liberty, Texas and was proud of it. Under the Hobby ownership, Liberty and Chambers Counties were not ignored. Now at 75, with the *Post* in Canadian ownership, it has fallen in circulation in Liberty County from the most popular daily to the lowest circulation of any Houston paper, according to the Audit Bureau of Circulation for 1984. I predict it will fall lower if you continue your vigorous opposition to our life-saving Wallisville Reservoir and Salt Water Barrier on the Trinity River.

You stress only the objections of environmentalists and possible damage to commercial fishermen, ignoring completely the great damage to a 40 million dollar rice crop in Liberty and Chambers Counties and the immeasurable damage to the City of Houston if the salt water barrier is not constructed.

Your environmentalist writer, Harold Scarlett, has been fairly presenting both sides of the recent hearings in Judge Bue's court. However, your special feature by Dr. B.C. Robinson in the November 30 issue and your editorial of December 1 entitled "Damned if we do" are grossly one-sided and contain several major errors. So much so that I hope you will permit me the space to state the other side and correct one or two errors.

Having been born and reared on the Trinity in Liberty County and having served in the U.S. Senate when the salt water barrier was first conceived, I know some of the history and facts which Dr. Robinson and your editorial writer have ignored. One of my saddest days in Washington was when then Senator Lyndon Johnson and I were told by the late Guy Cade Jackson, Jr. of Anahuac that all work on the Trinity Channel would have to stop lest salt water from Trinity Bay would begin intruding upstream into the rice irrigation pumping plants at Moss Bluff and Moores Bluff, which were then watering a 50 million dollar annual rice crop in Chambers and Liberty Counties.

Also we were told that the salt water encroachment would threaten the then planned CIWA canal which would pick up Houston's allotment of water from Lake Livingston at a point on the Trinity between the two rice irrigation canals. All three of these sites are only a few miles north of Trinity Bay and the mouth of the Trinity River, and all were under dire threat of salt water intrusion which could destroy the rice crops and ruin the water which the City of Houston needed.

Thus, then Senator Johnson and I supported the construction of a salt water barrier at the mouth of the Trinity. After it was authorized, the City of Houston and the Trinity River Authority later advocated the building of the Wallisville Reservoir in connection with the salt water barrier so as to contain within the project a lake of about 19,700 acres. It was to increase the amount of water available for Houston and the Trinity River Authority. This was authorized by Congress and was three-fourths completed when stopped by Judge Bue's injunction in 1973. The environmentalists won this case after millions of dollars were spent on the nearly completed dam which now stands in Trinity Bay as a monument to the Sierra Club and the commercial fishermen.

If the same group had opposed the Houston Ship Channel when it was first conceived, it is possible that ships would never have navigated Buffalo Bayou to Houston. No one can doubt that the deepening of the Houston Ship Channel and Buffalo Bayou damaged some fish, crabs, shrimp and oysters and altered the ecology of Galveston Bay even more than the redesigned 5,600 Lake Wallisville would do. Dr. B.C. Robinson, the naturalist, if he had been around when the ship channel was being planned, would probably have railed against it as an "idiotic venture" of a "pack of troglodytes" playing engineers. At least those are his "impartial" designations of the U.S. Corps of Engineers, which built the Houston Ship Channel and maintain it for the benefit of Houston and its world-wide ocean going commerce. The Posts' predecessor supported this great project of the Corps of Engineers, and while it changed the marine environment and caused some damage in that regard, the benefits to the people of Houston have far out-weighed any such damage.

So will the redesigned smaller Wallisville Reservoir and Salt Water Barrier now authorized by Congress be a great boon to Trinity River barge line traffic to Anahuac and Liberty as well as a lifesaver for Liberty and Chambers Counties and a protection for Houston's water supply from the Trinity.

Whatever damage this causes to fish, shrimp, crabs and oysters in Trinity Bay has been reduced by nearly three-fourths (from 19,700 down to 5,600 acres) by the latest act passed by Congress as an accommodation of the conflicting interests. Yet, the environmentalists are not satisfied, and they probably would not be even if the project killed a single crab, a single fish or a single oyster. In fact, they seem to be making this fight a precedent for stopping all dams, dredging and further progress at the mouth of any stream or estuary.

Both Dr. Robinson's article and your editorial speak of the scaled-down project as though it was harmful to all of Galveston Bay. This project does not touch Galveston Bay. The Trinity River empties into Trinity Bay, which is marked on coastal maps between Smith's Point on the south and Umbrella Point on the north. Only Trinity Bay and the wetlands, north thereof, are affected by this barrier and reservoir.

The worst error in your editorial is the statement that Houston has plenty of water allotted to it from Lake Livingston, as though you could get it directly without going through the Trinity River. Do you realize that the city has no way of getting one drop of water from Lake Livingston except through the Trinity River at the CIWA lift station near the mouth of the river and just a few miles north of salt water in Trinity Bay? The Trinity River Carries your water allotment from Lake Livingston to the Houston pump station for a distance of over 100 miles before it is lifted into your canal. As heretofore stated, without the Wallisville Reservoir and Salt Water Barrier, Houston's water supply from Lake Livingston via the Trinity is in as much danger as our two rice growers pumping plants at Moss Bluff and Moores Bluff.

You write well about protection of crabs, fish, oysters and shrimp, but say nothing about protecting the people in these adjoining counties who depend upon a fresh water supply for jobs in a 40 million dollar annual rice crop or the possible threat of immeasurable damage to the City of Houston if the salt water barrier is not constructed. Congress has reached the fairest accommodation possible between environmentalists and fishermen on the one hand and the main income crop for Chambers and Liberty Counties and Houston's need for industrial water on the other hand.

Why should you or the Court express so much concern over what reports Congress had on this latest bill before it was enacted? As a former legislator and judge I have never known of any Court going behind a legislative act except to see if it is constitutional or for help in interpreting terms of the act itself. Neither issue is raised in this case. It is time the Court and your newspaper allow the latest expression of Congress to be carried out unless you want to see the economy of this area stifled and your Houston industrial water supply endangered.

Yours very truly,

PRICE DANIEL.

CITY OF LIBERTY,
Liberty, TX, December 10, 1985.

Mr. LYNN ASHBY,
Editor, Houston Post,
Houston, TX.

DEAR LYNN: The editorial of December 1, 1985, entitled "Damned if we do" was disconcerting to say the least. I have been intimately involved with the efforts to control flooding, provide additional fresh water for consumers, prevent saltwater intrusion, and effect the economic development of the lower Trinity River for over 20 years. I have traveled to Washington, at my own expense, every year for the past 15, to testify before House and Senate Subcommittees on funding requests for dredging, snag removal, studies, and construction of various projects on the Trinity.

The Trinity River is, in my opinion, the most important river in the State of Texas. This opinion is shared by many others also. When you consider the fact that its watershed affects over one half of the entire population of the state, I believe you will understand the truth in that belief. I have attended too many local and regional hearings to recount them, and have given oral testimony at most of them. I have heard environmental experts such as Ned Fritz and Dr. B. C. Robinson testify time after time that we must not allow one change to occur in the ecological structure. That floods are "God Made" and we should move out of flood prone areas and leave them to nature. That we should legislatively prevent additional persons from coming into an area if the natural environment will not support them through natural means. One is led to wonder which side of the advocacy they would take if a move were started to drain Lake Livingston and/or Lake Houston and return those areas to their original natural habitat. Both sides would have legitimate basis from an environmental purist's standpoint.

Certainly the construction of the Wallisville Saltwater Barrier would change that specific area, but the change would be minimal and the resulting change would better serve all interests and conditions. I cannot believe that a status quo serves anyone. We cannot continue to allow land subsidence through removal of ground water to continue unchecked. There are only a certain number of ways to obtain fresh water and not a one of these is through wishful think-

ing or hoping. The water from Lake Livingston that is dedicated to the City of Houston comes from the CIWA canals and pump stations located in the area that would be protected by Wallisville. An extended drought would effect the complete shutdown of this source without the protection of the barrier.

The thousands of acres of land that have subsided and are subjected to flooding by rain water or saltwater tidal surges have been adversely affected from an ecological perspective. We have learned to live in concert with nature and the pluses of these proposed changes will far outweigh the speculative negatives of these changes. Water need is real. Saltwater encroachment is real. Flooding is real.

The issue is not a narrow scoped or parochial one. Literally millions of lives are affected. The issue is not a boondoggle for some local land owner. The facts are well documented in the reams of testimony available to all interested persons as to the far reaching economic advantages and the minimal environmental impact. We all must plan for and look to the future and stop being tunnel visioned or knee-jerking reactionaries. The development of the Wallisville Barrier is vital and must be allowed to proceed within the confines of good sense and judgement.

I offer this letter as a rebuttal to your editorial. I would further be pleased to submit a more detailed and factual rebuttal to Dr. Robinson's article if you would allow such.

Sincerely yours,

C. SCOTT PARKER,
Mayor.

LANDMARK NEW JERSEY SUPREME COURT RULING WILL HELP PROTECT WORKERS FROM ASBESTOS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. FLORIO. Mr. Speaker, a ruling made earlier this month by the New Jersey Supreme Court will likely have profound effects in terms of protecting workers from the hazards of asbestos. The ruling will enable injured workers in certain cases to sue their employers for damage. The ruling will likely provide greater compensation to afflicted workers while making employers more responsible regarding employee exposure to hazardous substances like asbestos.

It is estimated that as many as 750,000 public buildings contain potentially friable asbestos. Friable or flaking asbestos is a known human carcinogen which can cause lung cancer, asbestosis or mesothelioma, among other deadly diseases.

The court ruled that injured workers can sue their employers for exposure to asbestos or other hazardous materials when they can prove that the employers intended to harm them. The plaintiffs who bought the class action suit are 32 former or current Du Pont employees And their spouses. They argued that Du Pont and the company's doctors intentionally and deliberately exposed them to asbestos, concealed the risk of exposure and fraudulently concealed medical information that revealed diseases contracted by the workers.

The court's ruling enables workers to demand one of their most basic rights—the ability to work under safe conditions. Employers have been put on notice that knowingly exposing workers to hazardous substances, like asbestos, will no longer be tolerated in the State of New Jersey.

I commend to my colleagues a most informative article in the Camden Courier-Post detailing this most recent New Jersey Supreme Court ruling.

[From the Courier-Post, Wednesday, Dec. 11, 1985]

COURT OK'S SUITS FOR ASBESTOS ILLS—DU PONT FACES FIVE CIVIL CASES

TRENTON.—A New Jersey Supreme Court ruling that opened the door for injured workers in certain cases to sue their employers for damages will provide greater compensation and make employers more responsible, an attorney who represented injured workers said yesterday.

"This is another step in the line of protecting workers," said attorney David Jacoby, the Haddonfield lawyer who represented 32 current and former Du Pont workers and their spouses.

"It potentially affects every man and woman in the state who works for an employer."

The Supreme Court decision came on five lawsuits filed by workers against E.I. du Pont de Nemours & Co. of Wilmington, Del., its company doctors and asbestos manufacturers.

The employees worked at Du Pont's Chambers Works in Deepwater, Salem County, or Repauno plant in Gibbstown for more than 20 years. They contracted asbestos-related ailments from inhaling asbestos fibers from insulation that at one time coated pipes, the court said.

Jacoby explained that it will send a message to employers that they face the threat of civil damages if they are cavalier about workers' health and safety.

The ruling court could affect every worker in the state by giving injured employees a new forum to seek substantial damages for injuries beyond the "miserly" benefits provided in workers compensation court, Jacoby said.

The workers initially filed a civil suit against Du Pont four or five years ago, he said. In that time, some of them have died, but some are still working for Du Pont, Jacoby said.

"They have varying stages of asbestos-related disease. Because it (the disease) takes 15 to 20 years to show itself, the men generally are in their late 40s and older."

Until yesterday's decision, Du Pont did not have to legally answer the lawsuit, he said. The case will be scheduled sometime in the future in Superior Court in Camden County, he said.

The plaintiffs argued that Du Pont and company doctors intentionally and deliberately exposed them to asbestos, concealed the risk of exposure and fradulently concealed medical information that revealed diseases contracted by the workers.

The justices said workers can sue their employers and company doctors for concealing that the workers had contracted health problems associated with asbestos exposure and sending them back into the workplace, where their conditions were aggravated.

Only courts in California and Ohio have allowed such suits, Jacoby said.

But New Jersey's high court said inured workers cannot sue their employers for exposure to asbestos or other hazardous substances unless they can prove that the employers intended to harm them.

At issue was whether the employees' only remedy was collecting workers' compensation. The state Workers' Compensation Act usually serves as an employee's exclusive remedy for work-related injuries.

But under the law, workers can sue in civil court if they can prove an "intentional wrong."

The Supreme Court narrowly interpreted the exception to the law. While "defendants' conduct in knowingly exposing plaintiffs to asbestos clearly amounts to deliberately taking risks with employees' health," the mere knowledge and appreciation of a risk is not intentional, said Associate Justice Robert Clifford, who wrote the majority's 39-page opinion.

"We acknowledge a certain anomaly in the notion that employees who are severely ill as a result of their exposure to asbestos in their place of employment are forced to accept the limited benefits available to them through the Compensation Act," Clifford said.

Four other justices sided with Clifford while two agreed in part and dissented in part.

But the court said the Legislature could not have intended to insulate corporate doctors who deceive employees about their health. The court said workers could seek damages from the doctors because it was proper that they "be held to answer for their misconduct."

Likewise, Du Pont was also subject to be sued, the court said.

LAUREL GIRLS CROSS COUNTRY TEAM—STATE CHAMPIONS

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. HOYER. Mr. Speaker, there are a group of young women in my congressional district who are superstars. They are the members of the Laurel High School Girls Cross Country Team, and this fall they experienced what Bruce Springsteen would call their glory days. They went from underdog status to the Maryland Class AA State Championship. For the first time since 1980, and for the first time ever in cross country, Laurel High has a State championship, and the whole community is very proud.

After a perfect 9–0 season, the Laurel cross country squad won the Prince Georges County Championship, the Region II AA Championship, and finally, on November 9, the State AA Championship. On the way, the team also won three invitational meets—Broadneck/South River, Palotti, and Salesianum—and came in second in the Hereford Invitational.

The Community of Laurel has every reason to be proud of this group which has worked so very well together. One most frequently thinks of cross country as a sport of individuals, but these young women have operated truly as a team. Always, they run

together in practice and support each other through their various competitions.

The squad's coach is Peter Adams, and he is obviously an inspiring, innovative, and gifted leader. This year, his team was made up of young women who, as he said, "have what it takes." Coach Adams is a lucky man as well, because only one team member is a senior. The community of Laurel can expect to hear much more from the cross country team next year.

The following young women make up the 1985 Laurel High School Cross Country Maryland State Championship Team: Cocaptain Diane Huber, Cocaptain Carole Anne "E.T." Parish, Jenny Athey, Donna Driver, Christy Peters, Catherine Repass, Jodi Shindle, and Kenice U'ren.

Coach Adams' three able assistant coaches are: Jim Sampson, Eric Morton, and Nancey Rose.

Mr. Speaker, I know all of the Members of the House will want to join me in extending congratulations to the team on their championship season.

HARRIS POLL SUPPORTS VOLUNTARY FAMILY PLANNING

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. PORTER. Mr. Speaker, I would like to bring to the Members' attention the remarks by Dr. Louis Harris, chairman of Louis Harris & Associates who recently conducted a public opinion survey of teen pregnancy, family planning, and abortion.

The survey results overwhelmingly support family planning efforts both in the United States and abroad, and show exceptional support for relevant education on television and in schools. Dr. Harris presented his findings last week to the members and staff of the Congressional Coalition on Population and Development. The following are his remarks for the benefit of those Members of Congress who did not attend:

REMARKS OF LOUIS HARRIS, CHAIRMAN, LOUIS HARRIS & ASSOCIATES, PLANNED PARENTHOOD FEDERATION OF AMERICA, INC.

In many ways, we live in an era of quick and easy poll results. Members of Congress, people in politics, reporters grab a couple of poll numbers and run. Thus, a common experience is to get the results of 3 or 4 quick questions on abortion, sex education, and birth control. This survey does not just ask 6 or 10 questions. It asks more than 60 different questions and is the most detailed and comprehensive analysis of a wide range of issues relevant to these subjects. It includes many questions never before even asked.

This survey is not only comprehensive. I believe any reasonable person will find it fair and unbiased. Our firm has stringent rules about all surveys on important public issues. They insist that all of the relevant questions must be asked, no matter how tough the answer for our own clients. We are adamant about including tests of questions and arguments used by both sides. In this study, for example, you will find a question that equates abortion with murder. Our hope is that anyone going over this study in fine detail would not be able to tell whether our clients were Planned Parenthood, the Right-to-Life movement, or a group which might have avoided partisanship on any of these issues.

Here is what we set out to test in this study:

What exactly do parents feel must be done to prevent their teenage children from becoming pregnant or causing pregnancy?

To what extent parents have discussed sex and birth control with their kids?

What are attitudes toward the proposed so-called Squeal Law?

How do people feel about television programing on the subject of birth control, specifically giving information on how to avoid pregnancy?

What about sex education in the schools, including a requirement that a link should be established between the schools and family planning clinics where young people can find out about and can obtain contraceptives?

How do people feel about the proposed constitutional ban on abortion and the 1973 U.S. Supreme Court decision legalizing abortion?

Do the American people favor or oppose the U.S. providing aid for developing countries with birth control programs?

Given this roster of questions, it is unlikely that any single group, including our own clients in this case, will be pleased with all of the results. In all, we surveyed a representative cross-section of 2,500 adults across the nation in August and September of this year.

Well, what about public attitudes about teenage pregnancy, sex education, and contraception?

An overwhelming majority of 84 percent of the American people recognize that teenage pregnancy is a serious problem in this country. In the view of 64 percent the problem arises fundamentally from the fact that parents have little or no control over their teenagers' sexual activity. As a consequence, they are convinced that something needs to be done. Help is needed.

One key, of course, is what parents can do themselves? And the answer there overwhelmingly is that they can have frank and open communications with teenagers about sex and birth control. But in the past, such discussion has not taken place for the most part. Only one in four adults recall having learned about sex from their own parents. Most learned from friends or sexual partners, which may have been a bit late.

Today's parents want to change that pattern. A substantial 76 percent with children 6-18 years of age say a parent has talked to their children about sex. The median age for this is 10. But note: only 1 in 3 say the subject of birth control has been part of the discussion. That casts some doubt about just how candid those discussions have been.

In fact, many parents seem to be crying out for outside help when it comes to dealing with teenage pregnancy and informing children about birth control. At the same time, many also want to keep some control over what their children learn and do. That is why they are so deeply divided over the so-called "Squeal Law." This would prohibit family planning clinics from giving contraceptives to anyone under 18 without written permission from their parents. The country now splits right down the middle: 48 percent favoring such a law and 47 percent opposing it. This latest result shows a four point, modest drop in opposition to the Squeal Rule and a comparable pick-up in support of it.

You see, parents would like to know about these things and be in on the decisions governing them. But, at the same time, a clear 53-47 percent majority also hold the view that "if it became more difficult for teenagers to obtain contraceptives," there would be more teenage pregnancies.

Perhaps the most decisive findings of this study emerged on the subject of sex education. A substantial 62 percent are convinced that more open discussion of sexual subjects would lead to fewer teenage pregnancies. And two of the chief channels of communication they want to see change on are television and the schools.

TV is widely believed to give a biased, wholly unreal portrayal of sex, of pregnancy, and of contraception. By 68-18 percent, a big majority think TV gives an exaggerated picture of people making love. Some 45 percent say that TV just doesn't deal with the subject of pregnancy and the consequences of sex. A higher 68 percent believe television ignores family planning to prevent pregnancy and to control family size. And 63 percent are convinced that television also just doesn't deal with information about sexually transmittal diseases, although this might be changing with the furor over AIDS. Put bluntly, television is heavily criticized for either ignoring or romanticizing the consequences of sex and of birth control. By an overwhelming 78-18 percent, a big majority give a powerful mandate that there be messages on TV about birth control. The reason for this strong feeling is that the very young people who are least inclined to be influenced by home life or the classroom are precisely the ones who are most likely to be reached through television.

Now if the networks and TV stations say there is simply no mandate out there for their carrying targeted and effective birth control messages, as we understand they have told prominent medical professional groups, then the answer is that such a claim is patent nonsense.

Indeed, by an overwhelming 85-14 percent, a big majority of adult Americans believe that sex education should be taught in the public schools. And by 54-45 percent, a clear majority are convinced that elimination of sex education in the schools woud lead to more pregnancies among teenagers not fewer.

The American people are playing for keeps on this one. They want sex education to be not only blunt and to the point, but they want it to be practical. By 67-29 percent, better than 2-1, a substantial majority want to require that public schools establish links with family planning clinics, so that as our question read "teenagers can learn about contraceptives and obtain them." This is the first time any poll has ever asked this question. Mark it well, it is a clear and decisive mandate for sex education in the schools that both explicitly informs students about contraceptives, but also refers sexually active students to sources to contraceptives.

The incredible part of these results is that they are not even close. They are decisive and overwhelming. They are not controversial. They indicate a broad and growing consensus, born at least in part of the quiet desperation of parents of all types and stripes of family backgrounds in America today. Those who oppose sex education and birth control are at best a highly vocal but very

small minority in the USA today. Instead, the desire, the demand for real leadership out of the establishment in this area is widespread, real and abiding.

By contrast, abortion is by any measure highly controversial. In fact, there is some evidence of slippage in support of the 1973 U.S. Supreme Court decision (*Ros* v. *Wade*). The current division is 50–40 percent in support of that decision nationwide, but that is down 6 points from our previous measurement. The slippage may not be as great as this, however, since the biggest shift on this trend question is among Blacks. And there is other Harris evidence that Blacks have veered from having high faith in the Supreme Court in the past to showing a massive erosion in faith in the High Court, as, indeed, Blacks have come to distrust most of the Washington Governmental establishments these days—a complete turnabout compared with the 1060's and 1070's. On other measures of pro or con on abortion, for example, Blacks are slightly more pro-abortion than Whites. But not on the Supreme Court measurement.

A more accurate measure of the slippage in pro-abortion sentiment can be obtained on the issue of constitutional ban on abortion. A majority of adults nationwide oppose such a ban by a decisive 55–37 percent. However, a year ago, as slightly higher 58–33 percent majority opposed such a ban. Thus, slippage of 3–4 points.

A key reason for the slight slippage may well be the exposure given to the film, "The Silent Scream." Fully 42 percent say they have read about or heard about the film, and 44 percent have seen it. Of those who saw it, 45 percent say it made them more opposed to abortion. That adds up to 6 percent of all adults in the country. Of course, it is dangerous to therefore conclude that 6 percent have in fact shifted their views. There is no way of telling how may of these people were opposed to abortion in the first place, and merely had their underlying convictions reinforced. On the other side, by 56–39 percent, a sizable majority of those who saw the "Silent Scream" felt it was biased and not mostly objective.

In fact, when the negative consequences of particular types of pregnancies are discussed with people, then to opposition to any ban on abortions rises to over 7 in every 10 adults across the USA. For example, if a women's life or physical health were endangered by a pregnancy, then sizable majorities would oppose a ban on abortion. Similar majorities feel the same if pregnancy results from rape or incest, or if a woman might have to go on welfare if she had the child, or when a child would be unwanted or unloved. Or if a woman's mental health were endangered or if the child was found to be deformed or retarded or if a teenage mother's future life would be seriously affected by having the baby.

Of course, as time goes by, an increasing number of people know someone who has had an abortion. Half the country now reports knowing someone and 3 in 10 say that someone is close to them, meaning in their own family or in a friend's family. As it becomes a more personalized experience, then the consequences of not allowing abortions troubles people all the more. A bottom line, therefore, is that 58 percent of the public rejects the claim that abortion is an immoral act. Indeed, by 74–19 percent, a big majority are now convinced that society in this country has decided this issue and they doubt that abortion will ever be outlawed again.

Finally, allow me to dwell on yet another important issue we tested for the first time: U.S. Governmental aid for birth control overseas. That is a subject you have heard much heat and controversy on. By an overwhelming 74–23 percent, a sizable majority favors this government helping with birth control in developing countries. And when the smoking gun is added, "even if those countries have abortion programs," a substantial 61–35 percent majority still would favor our sending the aid and assistance on birth control. The sadness and shock of the Ethiopean famine and the consequences of birth rates out of control have dismayed the American people and touched them deeply.

Perhaps the most striking result of all in this in-depth and comprehensive survey is that the American people do not want the highly serious problems of teenage pregnancies swept under the rug or made the object of selective attention by religious or parents along, but instead they want society as a whole, including the government, including the schools, including the media to open doors of candor and to spell out the consequences and also to take the load in explaining pragmatically what can be done to relieve the problem. They are saying the job must be done today not tomorrow and that procrastination is no longer acceptable. The highest irony is that most of what I have reported are broad consensus findings. I would not stand here and say that because large numbers of the American people want something, you must therefore automatically do it. But, I do say to you that if you do not do something in this area, then you will find that your own constituents will increasingly want an explanation of why you did oppose action. For these are not subjects and are not attitudes that are likely to disappear or to change or to grow less concerned any time soon. Mark that well.

ENHANCEMENT OF LOBSTER CONSERVATION LAWS

HON. JOHN R. McKERNAN, JR.

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. MCKERNAN. Mr. Speaker, today, along with my colleagues, Mr. STUDDS and Mrs. SCHNEIDER, I am introducing legislation which will help to preserve the integrity of our fishery conservation laws. Specifically, it is a bill to enhance the enforcement of laws and regulations conserving American lobster—Homarus americanus.

This legislation is intended to make the conservation measures imposed upon the domestic fishermen by the American lobster fishery management plan [FMP] (50 C.F.R. 649) more enforceable by stopping the trade in sublegal-sized, egg-bearing, and "scrubbed" lobsters which currently takes place in the United States. It is action necessary because of a "loophole" in United States law which permits foreign exporters, primarily Canadian, to ship into this country lobsters which fishermen and dealers in producing States are prohibited from handling.

This legislation is not an attempt to avoid the legal obligations of the United States under the General Agreement on Tariffs and Trade [GATT]. Article XX(g) of the GATT allows for the kind of trade restrictions that would be imposed by the bill because of the relationship of those restrictions to the domestic production and consumption restrictions which are imposed on fishermen and dealers by the conservation laws of the producing States and the lobster FMP.

By January 1, 1987, all of the States with fishermen who harvest American lobster will have enacted laws which coincide with the possession standards of the Federal lobster management plan. Although some American lobster is legally harvested in Canada at a size smaller than the minimum size allowed by the FMP, the laws of the producing States and the Lacey Act combine to create a Federal prohibition against a trade in small lobsters in the Northeast and Middle-Atlantic regions. These laws also work to restrict a trade in egg-bearing and scrubbed lobsters in these States. However, because other States, which import but do not produce lobster, have not enacted similar possession laws, the Lacey Act restrictions do not apply and a trade exists in these States which is illegal in the producing States.

Lobster fishermen believe that this situation decreases the effectiveness of the conservation laws and regulations they are required to abide by. Further, they are concerned that this has encouraged an illegal or "black market" trade in lobster harvested by domestic fishermen in violation of State possession laws and the lobster FMP. While others argue that such a black market trade does not exist, and that no U.S.-harvested illegal lobster is being sold in this country, it is very difficult to obtain data on the amount or origin of the sublegal-sized, egg-bearing, and scrubbed lobsters that are sold here.

It is for this reason that we are introducing this legislation today. By restricting the importation of all American lobster that does not meet the standards of the FMP, the bill would strengthen domestic laws that are designed to conserve a valuable, exhaustible natural resource. The legislation that we are introducing today is a straightforward approach to solving this problem and is a remedy that is available to the lobster industry through our international trading agreements. I urge the House to expedite its passage.

HELPING OUR TOBACCO GROWERS

HON. HAROLD ROGERS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. ROGERS. Mr. Speaker, I recently came across an article which I think really shows how committed the people of my region are to the preservation of the tobacco program.

I recently visited several tobacco warehouses on the opening day of the annual burley sales in Kentucky, including one in London, KY, run by Graham Cole. Thanks

to his work and those of men like him, this year's tobacco sales are going extremely well under trying circumstances.

I enclose the article for my colleagues, so that they too can come to understand the warmth of feeling for tobacco which permeates Kentucky and the tobacco belt. And I salute Graham Cole for his leadership in keeping our proud tobacco tradition alive.

[From the Lexington Herald-Leader, Dec. 18, 1985]

WAREHOUSEMAN'S EFFORT HAS KEPT BURLEY FROM "POOL"

(By Roger Nesbitt)

LONDON.—A burley tobacco warehouseman—by cutting his profit to benefit growers and the federal price-support program—has helped London compile the most impressive statistic of the 1985-86 market season.

The London market is the only one in Kentucky—and four other states—that has had no burley go to the program's surplus "pool" of leaf that fails to bring a price above the government support level, according to government statistics.

And the success at the small London market can be traced to Graham Cole's crusade to improve sales.

Cole, a co-owner and general manager of London's three auction warehouses, has kept tobacco out of the pool by buying it on behalf of the warehouse.

If tobacco buyers fail to bid the required price of at least 1 cent above the support rate, Cole makes the bid. He then resells the leaf at a later auction or stores it until he can find a buyer.

Thus far, Cole has bought 1.2 million pounds, or about 20 percent of leaf sold in London. He estimates a loss of between $25,000 and $30,000 on the resale of that burley. But he says that's a small price to pay to satisfy his customers and help preserve a tobacco program threatened by a huge debt on surplus leaf.

"If the farmer sees you're doing the very best you can to help him get top dollar, then you've got a satisfied customer who will come back. We lost a little money, but it's good public relations," he said yesterday.

It's not uncommon for a warehouse to buy tobacco to protect customer interest. But few warehouses take 20 percent of the offerings, said Ben Crain, the president of the Burley Auction Warhouse Association.

Crain said he would buy from 10 percent to 12 percent at his two Lexington warehouses. "But with the high (priced) grades you find in this area, you can't afford to buy much more," he said.

Before yesterday, pool receipts were 32.3 million pounds, or 10.6 percent of sales in Kentucky, Indiana, West Virginia, Missouri and Ohio.

"We've taken tobacco from every market except London," said A.R. Beckley, the executive secretary of the Burley Tobacco Growers Cooperative Association of Lexington, which handles the surplus in those states.

Cole, 51, has been in the warehouse business for 26 years in Moultrie and Pelham, Ga. This is his second year as co-owner of the London warehouses and, under his leadership, customers have come to expect a strong sale.

"I've seen years when most of the crop went to the pool around here, but not with Cole. I don't know of any grower who has left here dissatisfied with what he got," said Lonnie Robinson, a warehouse employee for 15 years.

Last year, when 30 percent of the nation's burley crop went into surplus, London's 8 percent was the lowest among the 80 markets throughout the eight-state Burely Belt, Cole said.

"And most of that went after Christmas. I was trying to keep it all out (of the pool), but there was just too much for me," he said.

Cole said he wants to do his part to help the program because "it has served us well for nearly 50 years."

In sales volume, London ranks 22nd among Kentucky's 30 markets. Its customers come from 15 counties in the region, with most from Laurel, Clay, Knox and Whitley counties, said Chester McCracken, a warehouse employee for 30 years.

Charlie Chappel, a 76-year-old Jackson County grower, said he had sold tobacco for 38 years in London and never had much go to the pool.

"These boys have always stuck with me," he said. "I've been satisfied. I wouldn't be here today if I wasn't."

Cole acknowledged that he buys a lot of lower-grade leaf and that the quality of tobacco from the area pales in comparison with the Bluegrass region.

Statistics, however, indicate that London has its share of good burley. Its average market price of $180.46 a hundredweight is slightly above the state average.

"Our overall quality doesn't match some other areas, but most of our growers are at a disadvantage because they are small, part-time farmers," Cole said. "This is not like the Lexington area, where you have a lot of big growers who are in this for most of their income. That makes a difference."

Cole said he hopes to keep his "pool record" intact for the Christmas recess that follows Thursday's sales. But he doubts he can go through the whole market season this way.

"It gets harder (to resell the burley) after Christmas," he said. "You can't cut your own throat, you know."

OPPOSITION TO THE McCLURE-VOLKMER BILL

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. STOKES. Mr. Speaker, Federal gun control legislation has been debated in each succeeding Congress since the 91st session. With the McClure-Volkmer bill working its way through Congress, it has come to my attention that our Nation's law enforcement community has been misrepresented by certain lobbying organizations concerning their views on this issue. Contrary to information you may have received, our Nation's law enforcement community is unanimously opposed to the McClure-Volkmer bill.

As individuals charged with the responsibility of ferreting out crime, it is the law enforcement communities view that passage of this bill will result in easier accessibility to these weapons by criminals, juveniles, and other high risk individuals. Every day, members of the law enforcement community place their lives in peril so that you and I might enjoy a safer community. By opposing the McClure-Volkmer bill we have an opportunity not only to assist our friends in law enforcement, but to help ourselves in providing for the safety of our communities.

I fully support the right of responsible individuals to keep and bear arms. However, legislation such as that passed by the Senate and presently before the House of Representatives, will seriously undo many of the recent advances made in the area of curbing handgun violence, and will result in easier accessibility to these weapons by criminals and irresponsible citizens.

I strongly encourage members of this body to oppose the McClure-Volkmer bill and vote for the safety of our communities and our law enforcement officers. With these concerns in mind, I commend the following Cleveland Plain Dealer article on the Fraternal Order of Police and their views on the McClure-Volkmer bill, to my colleagues in Congress.

FOP HEAD HOLDS GUN BAN A BOON

(By Robert Boyd)

At a time when killing of police officers is on the increase, it would be wrong to weaken federal handgun laws. But legislation now before Congress would do just that, and a strong gun lobby is pushing hard for enactment—even to the extent of misrepresenting the stated positions of law-enforcement groups.

Most Law-enforcement organizations believe that law-abiding citizens have the right to own handguns. But at the same time, there must be legislative safeguards to keep handguns from falling easily into criminal hands. Retaining current federal laws regarding handguns is vital to effective law enforcement. Laws to protect the police and the public from the threat of additional handguns in the hands of criminals, such as waiting periods and criminal records checks for handgun purchasers and a ban on armor-piercing bullets, will make society safer.

In recent months, the Fraternal Order of Police, which represents more than 170,000 American police officers and other law-enforcement leades have been misused by gun lobbyists who are spearheading a drive to allow interstate sale of handguns and permit the continued sale of armor-piercing bullets.

Leading the gun lobbyists' attack is the National Rifle Association, with which law enforcement has a history of strong ties. In our relationship over current federal legislation, however, the views of the law-enforcement community, and the Fraternal Order of Police in particular, have been distorted and misrepresented.

In the House of Representatives, gun lobbyists are crusading for quick passage of the McClure-Volkmer bill, which would allow interstate handgun sales. The bill, sponsored by Sen. James A. McClure, R-Idaho, and Rep. Harold L. Volkmer, D-Mo., was pushed through the Senate without any public hearings, and is now lodged in a House Judiciary subcommittee on crime. Supporters in the House are petitioning to have the bill discharged from the subcommittee and brought to the House floor; its sponsors say that could happen by spring.

The NRA portrays the bill as a pro-law-enforcement measure and has convinced members of Congress and the public that

police are for the bill. While aware of our opposition, the NRA sent material to Capitol Hill erroneously stating that both the Fraternal Order of Police and the National Sheriffs' Association were in favor of the bill.

As president of the Fraternal Order of Police, I attempted to set the record straight several times. Every major law-enforcement organization in America solidly opposes the McClure-Volkmer bill. Yet the NRA and other proponents of the bill have persisted in naming our group as one of its supporters. The fact that law enforcement opposes the bill appears to make little difference to the NRA.

Our reasons for involvement in this legislative debate are simple. As law-enforcement officers, we are charged with enforcing the law. We live with that responsibility every day. Despite the NRA's claims to the contrary, this bill is against our interests. McClure-Volkmer will make it easier for criminals to get handguns.

In 1968, Congress passed the Safe Streets Act to aid state and local law enforcement in their fight against violent crime. The centerpiece of the act was the prohibition on the interstate sale of handguns, which enhances the ability of states and localities to keep handguns out of criminal hands. McClure-Volkmer would authorize gun dealers to sell to out-of-state customers if the sale would be lawful under the laws of the buyer's and seller's states. As a practical matter, this provision is unenforceable and would only serve to encourage illegal handgun sales.

Because handgun laws vary not only from state to state but city to city, it would be virtually impossible for a dealer to make sure that sales to out-of-state purchasers conform to law. Local laws are constantly changing and although several states may have similarly worded provisions, the actual application of those statutes may vary greatly according to individual state court decisions. Allowing interstate handgun sales destroys the ability of law enforcement to enforce state and local handgun laws.

Gun lobbyists also are working against law enforcement on another front, by campaigning for the continued availability of armor-piercing ammunition—bullets that easily penetrate bulletproof vests. Every day, officers risk their lives protecting citizens from criminal attack, and yet the NRA refuses to support these officers by working to ban the sale of such bullets. In fact, NRA lobbyists have blocked the bill for nearly four years.

As officers, we look to Congress to give us the tools to make society safer. To that end, the law-enforcement community, especially the Fraternal Order of Police, is asking members of Congress to resist the pressure to make our jobs more difficult. We want armor-piercing bullets banned. We need the continued prohibition on interstate handgun sales. And we want a national waiting period and background check for handgun purchases to help screen out those criminals who are buying handguns, and to eliminate the possibility of the heat-of-passion purchase of handguns.

Our legislators have heard the views of the Fraternal Order of Police, the National Sheriffs Association, the International Association of Chiefs of Police, the National Troopers Coalition, the Police Executive Research Forum, the Police Foundation, the National Organization of Black Law Enforcement Executives and the Major City Police Chiefs Association. We all hope that Congress will listen to the law-enforcement community and put the interests of a safer society ahead of the goals of the National Rifle Association.

STATES ACTIVE ON CHEMICAL DISASTER LEGISLATION

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. FLORIO. Mr. Speaker, as my colleagues know, the Superfund legislation just passed by the House (H.R. 2817) contained landmark provisions designed to encourage local officials and industry to develop emergency preparedness plans for possible chemical disasters.

The tragedy in Bhopal, India, a little over a year ago raised the Nation's consciousness about the need to institute comprehensive emergency response plans to cope with potentially catastrophic accidents. Dozens of smaller-scale incidents across the country over recent months have underscored the importance of such planning. Many State legislatures are beginning to recognize the need to establish disaster prevention and response programs.

My own State of New Jersey has been in the forefront of such developments and the State senate recently passed a bill entitled the "Toxic Catastrophe Prevention Act." I commend a recent article from the Philadelphia Inquirer describing the legislation to my colleagues' attention.

SENATE APPROVES BILL AIMED AT AVERTING A CHEMICAL DISASTER

(By Paul Horvitz)

TRENTON.—Legislation designed to prevent a disastrous chemical leak at New Jersey manufacturing plants received final legislative approval yesterday in the state Senate.

The bill, titled the Toxic Catastrophe Prevention Act, calls for chemical plants that generate, store or handle certain extraordinarily hazardous chemicals to develop plans demonstrating what safety steps they would take to prevent a minor accident from turning into a chemical disaster like the one that occurred last year in Bhopal, India. In that accident, 2,000 people were killed when methyl isocyanate leaked from a Union Carbide plant.

The bill won Senate approval on a vote of 38–0, without debate, and now goes to Gov. Kean.

Its Senate sponsor, Sen. Paul Contillo, a Bergen County Democrat, said that, under the legislation, the state Department of Environmental Protection could impose its own risk-reduction plan if it believed the one submitted by the manufacturer was inadequate. The companies would have 18 months to submit a plan.

Contillo said the bill applied only to certain highly toxic substances, including phosgene, a poisonous liquid that has been used in chemical warfare. It also is used in some chemical-manufacturing processes and in dye-making.

LAUNCHING OF VOYAGER SPACECRAFT

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. HOYER. Mr. Speaker, 1986 will be a truly momentous year in space exploration. NASA will launch a Voyager spacecraft which will travel past Uranus, and a Galileo spacecraft destined to explore Jupiter. Our Nation can be especially proud of NASA's contribution to this latest step by the United States in the "Age of Discovery."

To highlight these events our colleague Congressman WYCHE FOWLER of Georgia, on October 8–10, 1985 sponsored the Space Caucus Conference on the Future of Space Science. Many eminent scientists from all space science disciplines participated, sharing their insights with Members and congressional staff. One conference participant of particular note was Dr. Noel Hinners, Director of NASA's Goddard Space Flight Center which is located in my congressional district. Dr. Hinners has a Ph.D. in Geochemistry and Geology and is a specialist in planetary geology. From 1979 to 1982 he served as the Director of the National Air and Space Museum and in 1982 began his tenure as the Director of the Goddard Space Flight Center.

I would like to share the remarks made by Dr. Hinners at the conference for the benefit of my colleagues:

STATEMENT OF NOEL W. HINNERS

I welcome this opportunity to address the topic of Space Science in an atmosphere of inquiry and desire to learn. That is, after all the basis of the scientific endeavor—a quest for knowledge. That quest is unbounded and never ending, attributes inherently harmless, yet the world of budget constraints, competing societal and individual needs, and occasional misgivings about the practical value of scientific inquiry result in the establishment of limits and priorities. My challenge is to provide you with views of space science relevant to your decision process, a process crucial to creating the means by which space science progresses.

I worry about whether or not I am up to the task; what can I bring to you today that couldn't better be done by my colleagues actively involved in the hands-on conduct of space research? Perhaps a different perspective, for though trained as a scientist I have made a career of science management and administration, the rewards of which flow from helping create the opportunities for "practicing" scientists to be innovative and productive. That career has seen a progression of incarnations ranging from student to technical contractor to NASA to NASA Associate Administrator for Space Science to Goddard Center Director. In that time I've been exposed to a spectrum of scientific, budgeting, political, and social issues associated with space science and which span its history as measured from the launch of Sputnik in 1957.

I also had the good fortune to spend (1979–1982) a rather pleasant and informative interlude as Director of the National Air and Space Museum, an unparalleled op-

portunity to assess and contribute to public knowledge of and interest in space science and exploration. A side-benefit, or possibly a side-effect, was the acquisition of think-time, in which to dwell on what had transpired over the past 20 years and to sort out what in my career to do next. The end result was a re-commitment to space exploration. I just could not think of anything more rewarding, exciting or worthwhile. Let this pre-amble be fair warning that you are listening to a devotee, albeit one tempered with a conviction that it is our obligation to assure quality science and to share the excitement and fruits of our ventures with those who pay for it—the U.S. public through you, its representatives.

I will give you my thoughts on the essential character of space science, examples of its contributions to knowledge and national well-being, its role vis-a-vis technology, and international cooperation and competitiveness. Along the way, I'll also given my assessment of future trends and needs. This could be dismissed as interesting, but just another look into a cloudy crystal ball. Possibly, but I believe that the future is largely under our control rather than subject to whims of "random events" or the wiles of nature: many things will happen because the initial steps are already in motion or because someone wants them too; let us therefore plan determinedly for our future.

Best to begin with a definition of Space Science: as stated by Homer Newell in his excellent book "Beyond the Atmosphere", space science consists of . . . "those scientific investigations made possible or significantly aided by rockets, satellites and space probes." Thus it is that existing scientific disciplines and more narrowly focused subdisciplines in astronomy, physics, and earth and planetary science gained opportunity to expand by dint of new technology enabling escape from the earth-bound laboratory.

For astronomy the vantage point of space opened up new regions of the spectrum quite simply by astronomers ridding themselves of the obscuring effect of earth's atmosphere. Completely new discoveries involving basic physics and hard-to-believe phenomena commenced immediately and continue to this day to come forth as we peer into new parts of the spectrum with detectors of increasing sensitivity and resolution. There appears to be no end in sight for the potential of yet further discoveries, ones helping elucidate answers to such basic questions as how did the universe and its features begin and how did it evolve, what are quasars and black holes, do black holes really exist?

For what use, you say? "Knowledge for sake of knowledge" might be a typical response but I personally find that to be a flip answer, repugnant, and providing fuel for those who accuse scientists of elitism. Rather, there is incredible excitement and elation involved in learning about the power, complexities and wonders of nature on such a cosmic scale; this is mimicked no less on the other end of the size scale by today's discoveries in the biological sciences. Obviously there is emotion involved in this; excellent! D. H. Lawrence in his 1931 "Apocalypse" rightly complained "Men are far more fools today, for stripping themselves of their emotional and imaginative reactions, feeling nothing." While Lawrence bemoans the loss of the sun as the mythological entity of old civilizations . . . . "All we see is a scientific little luminary, dwindled to a ball of blazing gas", had he today's knowledge and scientific understanding I think he could have found a new awe and mystery far more satisfying than the make-believe of old. It is our imperative to bring the excitement and emotion of discoveries about nature to the masses who by necessity participate second-hand. My museum experience convinces me that it is possible to do so, that the public wants to understand and will support our research if we but successfully convey to them the results and their inherent excitement.

For space physics, space platforms have provided not only new places from which to peer but they allow immersion and measurement in the new medium of magnetic and electrical fields, particles, solar wind, cosmic rays and the like. The picture we now have of earth's envelope in the solar system is one for which there was only a hint pre-1957. Basic discoveries abounded in the 1960's; in the 70's and 80's the challenge has changed from one of discovering "what's there?" to a greater one of deciphering and understanding details of how the physical processes work. A mature science, some would call it, sometimes with a hint of derision. If realizing that a topic is complex, that interactions among components are strong, and that the easy discoveries are over defines maturity, so be it. But to some of us near the age of 50, maturity means wisdom, careful selection and prioritization of tasks, calling upon experience to select a fruitful experiment, and recognition of the broader implications and significance of what we do.

The results of space physics studies are, like those of astronomy largely of pure scientific interest. However, because our earth is embedded in the magnetosphere, phenomena occuring there have direct bearing on closer-in events such as aurora, disturbances in the ionosphere which disrupt radio communications, radiation damage to satellites, and quite possibly on long-term weather and climate trends. To obtain a better understanding of the environment in which we live is an added inducement for the study of space physics. So is the fact that basic processes occur there which cannot be duplicated in the laboratory but which are of great interest for such things as fusion energy research—in this sense we can use the space environment as an in-situ laboratory.

The study of space physics also occurs in our planetary exploration program. The detailed knowledge built up by studying the earth's physical environment has allowed us to greatly increase our understanding of similar phenomenon at Jupiter and Saturn where the data has been limited mostly to that obtained by a few transits by the Voyager and Pioneer spacecraft. In a grander extrapolation, we are beginning to see in astronomical data that some of the phenomenon observed near earth may be occurring on a galactic scale.

Earth science—geology, planetology, call it what you will. If space physics is mature, earth science by the same measures would be senile, being over 200 years old by any accounting. We know the earth to be exceedingly complex and in contrast to the space physics environment, most of the solid earth is hidden from direct view. Yet the last twenty years have seen a revolution in our understanding of the earth, how it may have formed and evolved, how its engine is fueled and moves major chunks of crust about willy-nilly. Rebirth? Rejuvenation? Yes. Made possible by several factors: the tedious buildup of immense detail over the years by many plodders (and far fewer big thinkers), detail waiting for the integrating framework of: plate tectonics; new technology allowing us to "see" the ⅔ of the earth's surface hidden under the oceans and to peer into the interior via geophysical probing; meteorite studies; and remote and in-situ investigations of the other planets of the solar system.

The latter is a unique contribution from the space science program. Just as physical laws seem to be the same everywhere in the universe, so do fundamental geological and geophysical processes. But what we see in the earth and planets is a summation of billions of years of evolution and of a multitude of processes working at different rates on different starting materials. The ability to decipher the history of any one of the resulting complex bodies in isolation is not as good as one might wish. Our overall understanding can be enhanced however, if one has a spectrum of planets to study, each of which has evolved in a different manner. You can think of this as analagous in some sense to mathematics which requires multiple equations to solve for multiple unknowns. This approach has some times been termed comparative planetology and brings renewed focus to thinking of our earth in a planetological sense. It is not only the study of the origin and evolution of the earth that benefits from the use of space techniques; over two decades of evolution of earth-orbiting weather, atmospheric and oceanic research satellites has led to a dependence on them for making progress in eventually, obtaining a global-scale comprehension of earth systems.

Just as one learns about the general properties of terrestrial evolution from planetary studies, so too do atmospheric scientists gain greater insight into earth's atmospheric circulation and chemistry from planetary data. One does not, however, study the planets primarily to understand the earth. It is to arrive at a comprehension of the basic origin and evolution of planets per se; planetary studies are complementary to meteorite studies and to space-and ground-based astronomical investigations which are just beginning to tell us how stellar origins involve the formation of planets. For example, NASA's Infrared Astronomy Satellite has detected what is probably a disc of dust or rocky material surrounding a young star and which appears to be a progenitor of planetary formation.

The convergence of the astronomical and geological lines of evidence regarding planetary or solar system formation is a bonus of our times, brought to us solely because of our new capabilities in space. Equally astonishing is the sheer beauty of the discoveries from our planetary exploration—the scientific beauty of the likes of the volcanism of Io, the canyons of Mars, the Red Spot on Jupiter, the rings of Saturn. Likewise, their aesthetics. Human artistry pales when compared to what nature produces—so much so that we often seem linguistically incapable of expressing adequately the impact on our senses and emotions, reducing ourselves to primitive, feeble utterances of "wow, gee-whiz."

Where are we headed in the space sciences? Is anything new really happening or is it just more of the same thing? Not at all. In astronomy, we see that the traditional approach of labelling and behaving as "wavelength bin" astronomers (e.g., IR astronomers, X-ray astronomers) makes less and less sense. The attack on fundamental problems more and more requires observing the same event or object in a multitude of wavelengths. Our goal, then, is to create a

set of long-life space observatories (physics dictates multiple detectors and telescopes) complemented by ground-based facilities, which will enable an astronomer to pick a problem, easily access any of the telescopes and make the coordinated observations. We would like those to be made from the home university or laboratory location, where the scientist interacts with the students and where the environment is most conducive to scientific productivity. The Hubble Space Telescope, to be launched in 1986, is the first of the long-life observatories, with gamma-ray, X-ray and Infrared observatories to follow. We are making progress on distributed or remote access to space observatories, the International Ultraviolet Explorer and the Upper Atmospheric Research Satellite leading the way. The remote access advances are enabled by the technology of modern communications and computers; the advent of the Space Shuttle and the Space Station make or will make possible the long-term maintenance, repair and experiment up-grade of our space observatories. The conduct of space science is rapidly evolving in style towards that traditional for other sciences.

In space physics, we clearly see that one part of the environment interacts or is closely coupled with other parts. The opportunities for major advancement in understanding thus arises in the possibility of making multiple, simultaneous space measurements in the various regions: the solar wind, the auroral zones, the electrical arcs, the radiation belts and magnetic tail. The types of measurements needed are well known, guided by the previous experiments and by a firmer theory and computational modeling than existed in the past. Theory and computational modeling are deeply rooted in work going on in understanding basic plasma (fully ionized gas) physics for purposes additional to the direct needs of space science (e.g., fusion research).

The earth sciences present a special challenge which we are beginning to comprehend: that is, interconnections, feedbacks, cause and effect dominate the behavior of the atmosphere and oceans. For very practical reasons we are trying to understand the global dynamics of earth's environment sufficiently well that we can construct predictive models of its behavior. To do so requires global-scale multiple and sumultaneous observations of the atmosphere, hydrosphere, ice caps, biota, and land masses. Space techniques using polar orbiting satellites and space station polar platforms are the sine qua nons to accomplish our objectives.

It is evident by now that technology has been and will always be key to new discoveries in space or anywhere else. Space science has not just benefitted from technological developments but has been a puller of technology. The scientist has a need and looks to the engineer to provide him with the means. The resulting new basic discoveries then become part of our store of basic knowledge from which future technologies and applications will evolve—the two are connected and the eventual health of our U.S. technology, which inarguably is necessary to a healthy U.S. economic competitiveness, demands a healthy scientific underpinning. Where does space science fit into the overall scheme of U.S. science?

Space science is a forefront science. By that I mean it involves the making of fundamental new discoveries or significant advances in understanding non-trivial physical processes. Obviously judgments are involved here and differences of opinion abound about what is significant and what is trivial. One measure among many however, impresses me: where do the young bright students go? Science students are pretty smart—they'll go where the intellectual action is (given reasonable financial return.)

Space science and exploration has historically attracted excellent students and researchers. It excites youth at an early age and is a stimulant to the career choices into science and engineering. It continues to do so but there are strom warnings: the U.S. historically has been a world leader. The rest of the world has progressed rapidly and collectively may pass the U.S.

Should we care? After all, science is universal, and international cooperation is traditional and has paid dividends in terms of more science results than if we were to go it alone. And science results from other free-world nations are available to us.

Mr. Chairman and Members of the Subcommittee: I do care and am worried. I favor international cooperation and healthy open national endeavors from other countries. In structuring future cooperations, however, and in prioritizing our own programs we need to look carefully at how to maintain a strong element of U.S. space science leadership. We need to assess the pace of our programs and to think more about how scientific leadership relates to technological leadership and eventual economic competitiveness. Competition is inherently healthy and stimulating and, because we cannot do everything, we must assess our national strengths and weaknesses and put our resources behind the winners. I believe that U.S. space science has served the country well both intellectually and in bringing about practical applications. Prospects are excellent for continuing to do so. It is gratifying to work with you towards that goal.

INTRODUCTION OF UNITARY TAX LEGISLATION (H.R. 3980) ON BEHALF OF THE ADMINISTRATION

HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. DUNCAN. Mr. Speaker, I am introducing today, at the request of the administration, legislation designed to deal with a long-standing issue: the unitary tax.

As of now, I have not had a chance to complete an examination of this bill; therefore, I am in no position to comment specifically with respect to its merits. After I have reviewed it carefully, it may well be that I will be able to endorse the legislation. The reverse, also, might be true. My purpose in introducing the bill today is to get it before the House prior to the close of this session of the Congress. Members will be able to judge it, as I will, after a close look at its provisions.

Generally, the legislation introduced today would: First, prohibit States from imposing a corporate income tax on a worldwide unitary basis; second, limit the ability of States to tax dividends received by U.S. companies from foreign corporations; and third, provide States with Federal assistance in gathering information necessary to administer their tax laws relating to multinational businesses. The legislation has been prepared in cooperation with the Treasury Department and at the express direction of the President.

Over the past 2 years, the administration has worked closely with States and affected businesses in an attempt to arrive at a voluntary resolution of the unitary tax problem. The Treasury Department organized a worldwide unitary taxation working group which, in 1984, agreed on principles for the voluntary resolution of the unitary issue at the State level. A number of States responded by ceasing to use the worldwide unitary method. Other States have not yet acted.

The absence of voluntary compliance by all States with the working group principles, plus increasing international difficulties caused by continued adherence by a few States to the worldwide unitary method, have combined to cause this Federal legislation.

While leading foreign commerce issues raised by State worldwide unitary taxation would be resolved if States were to agree that they would not impose such a tax on foreign controlled entities, that kind of limited resolution would cause other serious problems. If a "foreign only" solution were adopted, domestically controlled businesses could be disadvantaged. For this main reason: the foreign income of foreign controlled multinationals would not be subject to tax by the States, whereas the foreign income of domestically controlled multinationals would continue to be subject to tax at the State level, either on a worldwide unitary combination basis or when repatriated in the form of dividends. The working group recognized expressly the need for competitive balance for domestic multinationals, foreign multinationals and purely domestic businesses in any resolution of the unitary issue. That principle requires that legislation restricting State worldwide unitary taxation also must address the question of equitable State taxation of foreign source dividends.

This legislation does not require that any specific method of dividend taxation be imposed by the States. Arguments of State fiscal sovereignty strongly indicate that States should have leeway to tailor their own systems of taxing to the extent that they do not cause serious foreign commerce difficulties and do not result in systematic overtaxation and double taxation of U.S. business in contravention of strong Federal policy. The legislation, therefore, provides in broad terms for the equitable taxation of dividends and suggests certain guidelines that States could follow in satisfying that standard. Many States, including a number of former worldwide unitary States, already comply with these guidelines.

I hope the legislation will be scheduled for prompt consideration in the second session of the 99th Congress.

NORTON, MA, LANCERS SCORE BIG WIN

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. FRANK. Mr. Speaker, December 7 was a day to remember for the residents of Norton, MA. The Norton High School Lancers rose to the occasion to win the Eastern Massachusetts State Division 5 Superbowl championship when they defeated the Dorchester High School football team by a score of 25–20.

Head coach Larry Larocque, a member of Norton's first football team, is to be congratulated for putting together an excellent squad that distinguished itself by its tenacity, sportsmanship, and mental toughness. This victory clearly affirms the faith that the Town of Norton has had in its football program.

The following article from the Taunton Daily Gazette tells the story well:

[From the Taunton Daily Gazette, Dec. 9, 1985]

THE LANCERS PREVAIL IN DIVISION 5

LANCERS ENJOY A 'SUPER' SATURDAY—NORTON BATTLES BACK IN 4TH PERIOD TO RALLY PAST THE BEARS, 25–20

(By Ron Lancaster)

BOSTON.—At approximately 12:15 on Saturday afternoon, the years of frustration suffered on the football field by the Lancers of Norton High School were vindicated.

Head coach Larry Larocque's Purple and White, enjoying only their second winning season in their 20-year history, became champions by defeating Dorchester High, 25–20, in the EMASS state Division 5 Super Bowl match-up staged here at Boston University's Nickerson Field.

"Our kids played just super today," an elated Larocque stated after the game. "What really surprised me was how our guys kept their composure throughout the game. They never got down and never gave up on themselves. This is definitely a 'team' win in the true sense of the word."

A contest, pre-game, built up to be a match-up that would feature two of the toughest teams to score on in the division, both teams displaying their hard-hitting style throughout the morning. Add that to the subfreezing temperature at game time and you had the setting for a ball game that would be hampered by turnovers.

In all, the Lancers coughed up the ball a total of three times, all via fumbles while the Bears relinquished control of the pigskin to their foe seven times. Four of those came on fumbles and three by way of interceptions.

"There were a lot of bodies hitting each other pretty hard out there today," noted Larocque. "That, along with the conditions, contributed to the high number of turnovers both teams made."

Linebacker David Shaw and defensive ends Rich Defreitas led in the takeaway department for the Lancers with the former picking off two passes, running one back for a touchdown while the latter recovered two fumbles.

A light covering of snow coupled with a gametime temperature of 30 degrees made the field more like the ice surface at Walter Brown Arena. This gave the Lancers a slight advantage as they relied on the balance and straight-ahead running of Jim Sicard.

The senior managed to lead all rushers in the half with 36 yards, before an injury forced him to sit out the rest of the game. The Bears meanwhile, who relied on speed and quick cuts, found the field not to their liking and managed a total of only 13 yards in the half.

After shutting down Dorchester on the game's opening series, Norton put together a respectable drive moving the ball all the way down to the Bear 27. However, on a third down play, defensive end Nate Johnson stormed in and dropped quarterback Scott Shambre for a eight yard loss, forcing the locals to surrender the ball.

Late in the opening quarter, Dorchester's Reggie Usher recovered a fumble on the Lancer 26 to give the Bears its first great field position of the day. The Boston District champions ventured as far as the eight yard line, but on fourth down, quarterback Jerome Davis' pass fell incomplete to kill the drive.

The Red and White defense then managed to keep the Lancers deep in their own territory and after forcing the Mayflower League champs to punt, regained possession of the football on the Norton 40.

The Bears went to the halfback option with success as Tony Norman fired a 29-yard strike to Johnson which put them back in scoring distance at the 11. A bad snap dropped them back to the 15, but a Davis-to-Ivan Caesar pass put the ball on the two yard line where they faced a fourth down situation.

Dorchester decided to hand the ball to the usually-reliable Norman, but the Lancers read the play perfectly and led by Bill Burgess, dropped the senior back for a yard loss and once again prevented them from scoring.

Norton turned the game's first big break into a score with some three-and-a-half minutes to play in the first half.

Davis went back to pass and after getting some pressure from the Lancer line, underthrew the ball right into the arms of Shaw. The Lancer linebacker moved left and sped down the sideline and into the endzone untouched for the game's first score. Steve Peck added the extra point and that would prove to be all of the scoring that would be done in the first half.

The second half saw the temperature rise a bit, allowing the field to thaw out. It also saw a rejuvenated Bear team take the field and dominate the entire third period, scoring 14 points to vault into the lead.

It started on the opening series, with the Red and White traveling 60 yards in just three plays for their first points of the game. After two runs netted a total of six yards, Davis rolled left on a keeper and rambled down the field all the way to the endzone to make it 7–6. The Bears tried for a two-point conversion, but Davis' pass was knocked down by defensive back Steve Nuttall to keep the Lancers out in front.

The Lancers gave the ball right back to their foe as Johnson recovered a fumble at the Lancer 22. Once again, the Bears would nearly travel the distance. They got as close as the four yard line, but on a crucial fourth down situation, the Norton defense came up with the big play to keep them out of the endzone. This time, on an attempted reverse to Derek Wright, Shaw came up and hammered him for a two-yard loss.

However, another fumble recovery by Jason Randall later in the period, put the Red and White back into scoring position at Norton's 27. This time the Bears would not be denied. It took four plays and a little bit of luck, but they were able to reach the endzone and take the lead.

The drive's first play saw Norman gain five yards and also saw Norton's Sicard leave the game on a stretcher (it was reported after the game that he suffered a hip pointer, with a possible bruised kidney).

Then, from the six, Norman ran left fumbled, but Caesar pounded on the ball in the endzone for the touchdown. Davis rushed in the two point conversion to put Dorchester out on top 14–7 and it stayed that way through period three.

The next 11 minutes would be a living nightmare for the Bears and their faithful. It seemed that the Boston District champ wanted to give their Mayflower League counterpart every opportunity to stage a comeback.

It started on the period's opening play, when Caesar, after catching a pass, coughed up the ball and Defreitas fell on the pigskin at the Bear 48. Norton could not move the ball and was forced to punt, but got the ball back when Davis pitched the ball to no one and Dave Rich came up with the recovery.

Still the Purple and Gold could not move the ball and was forced to punt it away again. This time however, the Lancers got down the field and forced the punt returner to fumble, with Chris Gaddy recovering on the Bears' 12 yard line.

Two plays later, Shambre borrowed a play from the Steve Grogan bag of tricks, by faking a handoff, bootlegging left and rambling eight years for the touchdown. But, a bad snap from center made the usually automatic Peck miss and kept the Bears on top, 14–13.

Now it was time for the Lancer defense to rise to the occasion and they did so getting the ball back into the offense's hands. Led by two fine plays by Rich and John Finch, Dorchester's three plays netted a loss of three yards and forced the Bears to punt. That exchange left the Lancers the ball on their own 38.

A five yard penalty was negated by a seven yard run by Shaw, putting the ball at the 40. Then came surprise play No. 2 from Shambre.

The senior signal-caller took off on a quarterback draw and after breaking several would-be tackles, found his way into the clear before turning on the afterburners. he streaked 60 yards for the score to stake Norton to a 19–14 advantage with just over four minutes left to play.

TRAGEDY IN NEWFOUNDLAND

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. FORD of Tennessee. Mr. Speaker, the 248 men and women of the 101st Airborne Division who were lost tragically in Gander, Newfoundland, had just finished 6 months of peacekeeping as part of the Multinational Force in the Sinai Desert. They contributed greatly toward maintaining the peace, a thankless job in a faraway land. The 101st represented their country admirably.

Words cannot express the deep grief I feel about this loss of life, particularly

during the holiday season. These men and women were on their way home to spend a special time with loved ones. They never had a chance to defend themselves, their fate sealed when they stepped on that charter plane. I only hope the families can take some solace in the fact that all Americans grieve with them. Their sadness is shared by all of us.

Out of this tragedy, we should start thinking about how to prevent similar disasters in the future. There is no reason for our service people to be traveling on inferior aircrafts. While it may be cheaper to move military personnel on charter flights, we have learned too late that it is safety, and not price, that must remain the bottom line when the Pentagon plans future troop movements.

ANOTHER TEST OF TRUTH FOR THE ARMY

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. LEVINE of California. Mr. Speaker, for the last 3 years, I have attempted to get the Pentagon to conduct realistic live-fire tests on the Bradley fighting vehicle. I have been concerned about whether the Bradley could, under actual battlefield conditions, perform the tasks which the Army has used to justify the program.

The Bradley results are in, although the jury is still out as to whether the tests were accurate and meaningful.

In an editorial entitled "Another Test of Truth for the Army," the New York Times provides an exceptionally insightful summary of the situation.

I commend this editorial to the attention of my colleagues and ask that it be printed in the RECORD.

ANOTHER TEST OF TRUTH FOR THE ARMY

Another major weapons program seems to be in serious technical trouble. It's the Army's $13 billion program to buy an armored troop carrier known as the Bradley Fighting Vehicle. With almost 2,000 Bradleys already produced, the Army has discovered they are extremely flammable when hit by a standard Soviet antitank round.

An armored truck is a good way to transport infantry to a battle zone. But the Army wanted much more than a battle taxi. It intended the Bradley to go right into battle, fighting and shooting alongside its new M-1 tank. So it put on a roof, and a gun turret on the roof, and a missile launcher to back up the gun. Combined effect: A rolling fortress that costs $1.6 million and is so crammed with ammunition and equipment it holds only seven riflemen.

Even before the Bradley went into production, critics worried that it would be a mobile powder keg. They noted that its fuel tanks and ammunition are located in and around the tightly packed occupants. Also, its armor is made of aluminum, which, when hit, creates explosive vapor and hazardous fragments inside.

The Army ignored these warnings. It refused even to conduct a realistic test of the Bradley by firing live Soviet ammunition at a combat-laden vehicle. When required to do so last year by an Air Force colonel in the Pentagon's testing program, it rigged the test to avoid discovering how flammable the Bradley is. The colonel said shots were changed from agreed positions to "the only-possible entry point where the shaped charge would not penetrate stowed ammunition containers" and the test dummies and their sleeping bags "were watered down with a hose to prevent any fires." The colonel was notified he would be posted to Alaska.

Sickened by the Army's behavior, Representatives Mel Levine of California and Denny Smith of Oregon won an amendment requiring that the Bradley be tested realistically. Last week Lieut. Gen. Louis Wagner announced the Army's interpretation of the tests, but not the results.

He said the critics had been proved wrong but that half a billion dollars' worth of safety improvements would be made. That sounds like the critics had a point. Some say the results are even more damning—so serious that the Army has decided to keep the Bradley off the battlefield.

"It would be a pretty dumb commander who would . . . have his Bradleys right behind his tanks." That's what Maj. Gen. John Foss, the Army's chief of infantry, now says. But the Bradley was sold to Congress on just that premise. "The Army feels rather strongly there is an urgent requirement for [Bradley] Fighting Vehicles to fight side by side with the XM-1 tank," Brig. Gen. Stan Sheridan told Congress in 1978.

If the Bradley is now to be just a battle taxi, it doesn't need to cost $1.6 million. An armored truck, costing $100,000, would do the job just as well—in fact much better. Closed vehicles intensify blast, fire and injury when hit by shaped charges or mines, and they can't be easily evacuated. The Bradley is half battle taxi, half light tank, a hybrid inadequate in either role.

Like the inadequate Sergeant York gun, which Secretary Weinberger canceled in August, the Bradley should never have gotten so far into production. As with the Sergeant York, realistic tests, honestly conducted, would have stopped it cold. When will the Army learn? A habit of evading the truth guarantees disaster in battle.

A MOST TRAGIC LOSS

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. GAYDOS. Mr. Speaker, today in this Chamber we, the House, adopted a resolution expressing our sorrow at the tragic loss of those members of the 101st Air Assault Division who died while returning home from their duty stations in the Middle East.

This resolution expresses the sorrow not only of the Congress, but also that of the American people and their condolences to the families of those soldiers who were returning home from their tour of peacekeeping duty in the Sinai Peninsula where, as part of the multinational force and observers, under the constant threat of terrorist attacks, they labored to insure peace for the peoples of Israel and Egypt.

One of the young people who died in that tragic crash on December 12 after taking off from Gander International Airport in Newfoundland, Canada, was Sgt. Peter Schremp, whose family lives in my congressional district.

To Mrs. Schremp, David, Lisa, and the family and friends of Sgt. Peter Schremp, I extend my condolences, those of my colleagues, and, through this resolution passed by the Congress, those of the American people.

Normally, the death of a loved one is a private affair, a time when family and friends gather together to comfort and strengthen one another.

But, a tragedy of the magnitude which claimed the life of Sergeant Schremp and the more than 200 of his comrades in arms knows no such boundary. At such a time, all America grieves.

Yet no one has the words to ease your pain; no one has the means to fill the void that has suddenly occurred in your lives.

And, the anxiety you feel comes at a time when most of the world is preparing to observe the most joyous of seasons—Christmas—and the birth of Christ.

However, it is through His birth that Christians find the words, find the means, and find the faith that sustains them through any crisis, including the death of a loved one.

"I am the resurrection and the life," Christ said, "he who believes in me though he die, yet shall he live and whoever lives and believes in me shall never die."

Sergeant Schremp died serving his country; he lives again serving his God.

CONGRESSIONAL SALUTE TO RABBI DR. EUGENE MARKOVITZ IN COMMEMORATION OF THE 50TH ANNIVERSARY OF OUTSTANDING SERVICE TO THE JEWISH COMMUNITY OF CLIFTON, NJ

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. ROE. Mr. Speaker, on Saturday, January 11, 1986, residents of the city of Clifton, my congressional district and State of New Jersey will join with the Jewish community and congregation of the Clifton Jewish Center in testimony to the most distinguished Rabbi Dr. Eugene Markovitz in commemoration of the 35th anniversary of his outstanding service as the spiritual leader of this most prestigious synagogue center. I know that you and our colleagues here in the Congress will want to join with me in extending our warmest greetings and felicitation to Dr. Markovitz, his good wife Klara, daughters: Rachel Lea and husband Sandford Lurie; Geraldine and husband Cantor Morris Wolk; Heidi Markovitz and husband Steven Stern; and Susan Barbara and husband Brett Walver; son Raphael Sam; and grandchildren: Michael Stefan Wolk; Stephanie Marie and Morgan Stern;

Calanit and Margaret Sarah Walver on this most joyous occasion and join with his family in great pride of his lifetime of achievement in devotion and dedication to the Jewish community and to all of our people.

Mr. Speaker, Dr. Eugene Markovitz has served with distinction in promulgating, enhancing, and preserving the richness of the Hebrew religious and cultural heritage redounding to the spiritual and moral integrity of those of his religious belief as well as materially contributing to the ecumenical spirit of brotherhood, the truth of knowledge, and cultural enrichment of all of our people.

Rabbi Markovitz was ordained at Rabbi Isaac Elcanan Theological Seminary in 1946. He received his B.A. degree from Yeshiva University, his M.A. degree from the University of New Hampshire, and his doctorate from the Bernard Revel Graduate School of Yeshiva University. He also received a postmaster's degree in gerontological practice from Wurzweiler School of Social Work. His advanced degrees in education were acquired in history and political science with American and American-Jewish history as specialties.

As an author and educator, he has earned the highest respect and esteem of all of us. Rabbi Markovitz has served as instructor in American history at Fairleigh Dickinson University and is adjunct professor in history at Seton Hall University. The thesis he advanced as a candidate for his academic degree is entitled, "Henry Pereira Mendes, Architect of Modern Orthodox Judaism in America." Among his many scholarly papers which have been published in national periodicals, we are especially proud of his publications entitled, "The American-Jewish Historical Quarterly," "Jewish Life," and the "Jewish Experience in America" edited by Abraham J. Karp, five volumes.

A gifted speaker, he has lectured before a variety of synagogue centers as well as non-Jewish groups in the field of American-Jewish history as well as current Jewish problems. He has read scholarly papers before the American Jewish Historical Society of Rhode Island, the American Jewish Historical Society and many other prominent institutions of learning and higher education.

Mr. Speaker, there is so much that can be said about Rabbi Markovitz as an ordained spiritual leader and his outstanding record of service to his congregational families, to the entire Jewish people, to Israel, and to the larger community. He served as rabbi at Temple Israel, Dover, NH, for 3 years and has been with the Clifton Jewish Center since September 1949. As a member of Rabbinical Council of America, he has served on many of its committees including: the Israel Commission, Family Life Commission as well as college youth. As a member of the Rabbinic Alumni of Yeshiva University, he has served as vice president and currently as treasurer. He served as chairman of Special Conference on College Youth and is a member of New York Board of Rabbis.

During the three decades-plus that Rabbi Dr. Eugene Markovitz has been with the Clifton Jewish Center he has guided its growth increasing its stature as a fledgling congregation to a strong, unified and prestigious congregation. Two building campaigns during his tenure saw the center's development from a modest edifice at its present site to an imposing beautiful building housing every conceivable Jewish and communal activity.

Dr. Markovitz has been a staunch supporter and active participant in many civic and community programs and we applaud his leadership endeavors in the vanguard of service to people's needs. He is senior chaplain of the police and fire departments in Clifton. He served as a member of the juvenile conference committee and is a founding member and former president of the Family Mental Health Clinic, Clifton. He is a member, human relations commission, the social studies commission for planning sex education for the school system in Clifton, the board of directors of the Senior Citizens Housing Corp., of Clifton, served as vice chairman of the bicentennial commission for the city of Clifton and is a member of the Historical Commission of Clifton.

Mr. Speaker, with the deepest respect and admiration for the honoree, it is a pleasure to call to the attention of you and our colleagues this gala celebration that is taking place in my congressional district in testimony to the good works of Dr. Markovitz whose richness of wisdom and quality leadership have immeasurably contributed to the spiritual, cultural and educational endeavors of our community, State, and Nation. In commemoration of his 35th anniversary as a distinguished spiritual adviser with the Clifton Jewish Center, we do indeed salute a good friend, outstanding community leader, distinguished rabbi and great American—Rabbi Dr. Eugene Markovitz of Clifton, NJ.

REDUCING THE FEDERAL DEFICIT

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. MANTON. Mr. Speaker, when President Reagan took office in 1981, the annual Federal deficit was $78 billion. The deficit for fiscal year 1985 which just ended was a whopping $211.9 billion, up from $185 billion last year. The total Federal debt of almost $2 trillion has more than doubled from $914 billion in 1981. The 1985 Federal deficit is larger than the entire Federal budget was just 14 years ago. this uncontrolled growth in the Federal deficit is a serious threat to the continued economic health of this nation.

On December 11, after months of negotiations, Congress approved legislation that is designed to bring our serious deficit crisis under control. The balanced budget measure signed into law by the President establishes maximum allowable deficits declining by $36 billion each year to reach zero by 1991. If the President and the Congress fail to enact a budget that meets the annual deficit targets, the bill requires automatic across the board spending cuts to reach the deficit goal.

I strongly opposed the original version of the Gramm-Rudman proposal passed by the Senate in October. Under that legislation, the President would have been given broad discretionary power to rework congressional spending priorities, dismantle vital domestic programs, and shield the Defense Department from its fair share of cuts.

The final compromise version of the balanced budget measure passed by Congress closely resembles the first Democratic alternative to Gramm-Rudman overwhelmingly approved by the House in a number of important areas.

First, like the Democratic alternative, the compromise bill requires that one-half of any automatic cuts come from defense programs. Second, the measure exempts the following important domestic programs future automatic cuts: Social Security cost-of-living adjustments; Medicaid; Aid to Families with Dependent Children; Child Nutrition; Food Stamps; Supplemental Security Income; Veterans' Pensions; Veterans' Compensation; and the special supplemental food program for women, infants, and children. Finally, the agreement requires that any automatic cuts must be uniform and across the board. The measure specifically states that it is not intended to give the President any authority to alter budget priorities established by Congress.

Mr. Speaker, I voted for the final compromise version of the balanced budget measure because I believe we must take immediate action to reduce the Federal deficit.

These huge deficits have forced massive borrowing by the Federal Government. As a result, real interest rates have remained far too high, restricting the ability of businesses to expand, modernize, and create jobs. These high interest rates have also contributed to a dramatic decline in homeownership. In addition, high real interest rates have resulted in an extraordinary increase in the value of the U.S. dollar on foreign exchange markets. The overvalued dollar is the primary cause of last year's recordbreaking $123 billion trade deficit which cost approximately 2.5 million Americans their jobs.

Furthermore, interest payments on the Federal debt have risen dramatically over the past several years due to growing deficits. In fiscal year 1986, interest payments on the Federal debt will cost $142 billion, or 15 percent of the entire Federal budget. Barring action on the Federal deficit, interest payments are expected to rise 77 percent between 1985 and 1990, making it the fastest growing item in the Federal budget. These rising interest payments mean fewer Federal dollars are available to fund important domestic programs.

Mr. Speaker, the growing Federal deficit is one of the most serious economic issues

facing the Nation. Failing to address the deficit crisis could result in an economic catastrophe that would cost millions of American jobs and impact each and every Federal program. I believe that the threat of automatic budget cuts will force President Reagan and the Congress to take action to reduce the Federal deficit.

One way to meet these reductions is to bring runaway defense spending under control. I believe in a strong national defense. But defense spending must be based on a sound and consistent policy aimed at assuring our military readiness while modernizing vital strategic forces. Nevertheless, despite the largest ever peacetime increase in defense spending, there are serious questions pertaining to our military readiness. Furthermore, the administration has failed to effectively prioritize our defense needs while allowing defense contractors to waste taxpayers' dollars. We cannot afford to throw billions of dollars at wasteful and needless weapons systems like the MX missile. Nor can we afford to pay contractors $7,000 for a coffee pot or $600 for a toilet seat.

However, another way for Congress to reach the deficit targets established by the balanced budget measure is to provide for revenue enhancement along with reductions in defense spending. In that regard, I support a tough minimum tax on profitable corporations and wealthy individuals that have escaped paying their fair share of taxes over the past several years.

Over the past several years, the Federal tax burden has dramatically shifted from the wealthy and corporations to the middle class. In the 1960's when the economy grew at record levels, corporate taxes accounted for 25 percent of Federal revenues. Last year corporate taxes financed just 8.8 percent of Government spending. As a percentage of GNP, corporate income taxes fell from 4.3 percent in 1960 to 1.6 percent in 1984.

Between 1981 and 1984, almost half of the Nation's 275 most profitable companies paid no taxes at all or actually received cash rebates from the Treasury for at least 1 year. In fact, 50 major U.S. corporations not only paid no income taxes from 1981 to 1984, but actually received $2.4 billion in tax refunds even though they made $57 billion in profits during that period. In order to reduce the Federal deficit, these profitable corporations must be required to pay their fair share of taxes. If the Congress will close tax loopholes for wealthy corporations and individuals, and bring defense spending to a more realistic level, the Federal Government will not be forced to cut important domestic programs.

Mr. Speaker, I will continue to work closely with my colleagues to develop a realistic and compassionate Federal budget that brings the deficit under control without imposing unfair cuts on important safety net programs. The Nation's elderly and less fortunate are not responsible for our existing deficit crisis, and they should not be forced to bear the brunt of further budget cuts.

The President and the Congress have an opportunity and a duty to make meaningful reductions in the Federal deficit without resorting to automatic budget cuts. We must take advantage of this opportunity.

THE AMERICAN INSTITUTE FOR FREE LABOR SPEAKS THE TRUTH ABOUT THE SANDINISTAS

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. BROOMFIELD. Mr. Speaker, I commend Mr. William C. Doherty of the American Institute for Free Labor Development [AIFLD] for his frank comments on what the Sandinistas are doing to freedom in Nicaragua. I salute Mr. Doherty for his deep commitment to the development and promotion of free labor in Central America.

In a recent Washington Times article, Mr. Doherty noted that the Sandinista regime has co-opted the revolution and has completely oppressed the people of that poor country. The original goals and democratic orientation of the Sandinista revolution are gone. The Communists in that revolution pushed out the real democrats after the Sandinistas came to power. Those true democrats who backed the Sandinista revolution are now with the Contras and other democratic groups actively opposing the Sandinista government. It is clear that the early revolution was betrayed.

What do the Sandinistas think about a free labor movement? After coming to power, they expelled all AIFLD personnel from that country. The Communist junta then proceeded to take over the entire labor movement. They ordered all workers to become members of a government-sponsored union. Those who refused to join that government union have reportedly been harassed, and others imprisoned.

All of us know of the fine work of AIFLD. It was founded in 1962 with the goal of training and developing Central American labor union leaders. Also included in AIFLD's efforts are the development of labor-related programs and community improvement efforts. That organization supports the concept of letting workers organize freely. AIFLD supports the international free trade union movement, and has promoted its growth. Much progress has been made in Central American countries. In El Salvador, progress in free trade union development has been particularly noteworthy. Unlike the Sandinistas, the Duarte government in El Salvador has welcomed free union development in that country.

I believe that the evidence is abundant. The Sandinistas in every respect are consolidating their Communist revolution in nearby Central America. By any standard, Nicaragua is becoming another Cuba. It is ready, willing, and able to deprive its people of human rights as it undermines neighboring governments and U.S. interests in the region.

With these concerns in mind, I commend the following Washington Times article to my colleagues in the House:

[From the Washington Times, Dec. 16, 1985]

AFL-CIO LEADER HITS SANDINISTA ABUSES

(By Tom Diaz)

Nicaragua's Marxist Sandinista regime is worse than the dictatorship it replaced, says the head of the AFL-CIO's operating arm in Central America.

"The Sandinista dictatorship is even worse than the [Anastasio] Somoza dictatorship," William C. Doherty, executive director of the American Institute for Free Labor Development [AIFLD], said in an interview.

"Slowly but surely . . . day by day the Sandinistas are closing down what few freedoms remain," he said.

Mr. Doherty, who has been active in labor union organizing in Central America for more than 30 years, said he gives the Sandinista regime a grade of "F," compared to a "high C or B" for the Christian Democrat government of Jose Napoleon Duarte in El Salvador.

"Somoza was a bad guy . . . no question about that," Mr. Doherty said of the ruler who was toppled in 1979 by a broad-based revolution and later assassinated in Paraguay by a Sandinista death squad. "He was a selfish, gluttonous and evil person. He denied democracy to his people. There was good reason to have a Sandinista revolution."

But, he said, Marxist-Leninist elements in the Sandinista directorate that now rules the country co-opted the revolution and "completely oppressed the people."

"The majority of the people who were in that revolution were democrats, they believed in democracy," Mr. Doherty said.

Now, he said, "There are more Sandinistas, the true Sandinistas, fighting in the freedom forces than there are in the Sandinista militia. . . . Most of the people who fought in the mountains against Somoza are back in the mountains, fighting against the new Somoza."

The AIFLD, founded in 1962, trains central American labor union leader and works with them in developing labor-related programs, such as community development and credit projects.

The organization, and its officials, from time to time have been thrown out of Central American countries by both right- and left-wing governments offended by its activities.

The Sandinista government expelled AIFLD in 1980, even though the organization worked with labor unions oppressed by then-dictator Somoza.

"We're against fascism . . . and we're very much against communism or any other form of 'ism' that deprives workers of their rights to associate freely," Mr. Doherty said.

The AFL-CIO—which is the parent of the AIFLD—adopted a resolution at its biennial convention in October that asked the international free trade union movement to "condemn the Sandinista regime's violations of trade union rights" and compared Sandinista treatment of labor unions to "Fidel Castro's subjugation of Cuba's trade union movement."

The resolution also condemned "the Nicaraguan government's censorship of the media, its establishment of 'block commit-

tees' to enforce political conformity, its massive military buildup, its alignment with Soviet foreign policy, and other activities leading to the consolidation of totalitarian power."

Mr. Doherty said that "within 24 hours of coming into power" the Sandinista government "did what all communists do."

"They took over the whole labor movement and said, now all workers will by order of the government be a member of a government-sponsored union," he said. "Typical communism, in the same way there are no unions in the Soviet Union. They're appendages of the state . . . apparatus."

Mr. Doherty said in recent months the Sandinista government increased pressure on labor organizations and workers who refused to join the official state unions.

"There are hundreds of workers in jail today, the only accusation against them being that they have been disloyal because they're members of free trade unions," he said. "They have been tortured, they have been beaten, their human rights have been totally violated."

On the subject of El Salvador, Mr. Doherty said the country has "evolved into a legitimate, true democracy" led by a popular president, Mr. Duarte.

"The people have spoken and elected their leader," he said. "He continues to try to improve the economic and social conditions of his people and guarantee them liberty, while fighting a full scale civil war which is supported by Nicaragua, Cuba, and the Soviet Union."

He said the "right-wing death squads have been mostly eliminated" in El Salvador and "terrorism in 1985 is coming from the left . . . the communists."

"Labor leaders . . . have to travel with bodyguards and security protection [because of] . . . threats and almost daily signs that the communists would like to knock them off," Mr. Doherty said.

He said the communists are "making new attempts" to take over the Salvadoran trade movement" to "strike politically against the Duarte regime."

Although he generally praised the Duarte government, Mr. Doherty said the country still has a "totally corrupt" judicial system.

Two AIFLD workers—Michael Hammer and Mark Pearlman—were gunned down in a San Salvador coffee shop in January 1981. Mr. Doherty blamed judicial corruption for the country's failure to bring to justice military officers he said are responsible for the slayings.

"The judges are either intimidated by the oligarchy or bought off by them," he said. "That's why no Army officers have ever been convicted."

The labor leader said the United States should continue the Reagan administration's policy of giving aid to El Salvador conditioned on continued progress in human rights and representative government.

He said he opposed a military solution in Nicaragua and called for a world-wide economic and political boycott of Nicaragua.

"If the Sandinistas were revealed to be the pariah that they are . . . the government would fall and you wouldn't have to have any type of outside armed intervention," he said.

Mr. Doherty said the Sandinistas have an effective propaganda organization, and that "some well-intentioned but misguided religious groups in this country," along with a "very strict minority" in the labor movement have been used by the Sandinista regime to promote its cause.

The record of the government in Guatemala still is under study, he said. But the country has made enough progress in its recent election of Christian Democrat Vinicio Cerezo to merit U.S. aid if the president-elect actually is installed, he said.

WATCH ON SURINAME

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 18, 1985

Mr. COURTER. Mr. Speaker, Libya is an African country of modest size and only 3 million people, but its reigning dictator has used oil money surpluses and Soviet bloc support to build international networks of global proportions. Sponsorship of international terrorists and the provision of military training to citizens and armies of the Third World are Colonel Qadhafi's two specialties.

The colonel may now be reaching across the Atlantic into the small coastal country of Suriname, according to reports of recent months. The reigning dictator in former Dutch Guiana is a pro-Castro military officer like Qadhafi; his name is Lt. Col. Desi Bouterse. In spite of continuing and generous Dutch assistance—$100 million a year until 1990, according to Jack Anderson—Bouterse is apparently incapable of carrying on without other aid, and has recently been promised $100 million by Qadhafi.

According to Michael van Notten, a consultant to a Surinamese opposition party based in Holland, money is only part of a Libyan package for the Governor of Suriname. He states that there are 243 Libyans in the country, some of whom are training troops and others who may be training non-Surinamese guerrillas. The United States State Department is aware of 14 Surinamese training in Libya at present, though for unknown purposes.

While these charges are extremely important, none of them is very surprising. We all recall the varied internationalist mix of Eastern Europeans, Cubans, Soviets, North Koreans, and so forth, present in Grenada when that Caribbean country was ruled by Marxist-Leninists. Colonel Qadhafi has been involved with radical movements and guerrilla and terrorist organizations in Central America, and once praised the revolutionaries there "who are going to follow the Vietnamese and Nicaraguan precedents and destroy the bases of U.S. fascism." The President of Costa Rica has complained of both Libyan and PLO interference in his democratic country. Qadhafi's relations with the Sandinistas are particularly warm, and have been the subject of a State Department study of last August; they include weapons transfers to Nicaragua.

The recent reports about Suriname thus deserve to be taken with gravity. Allow me to introduce into today's RECORD two articles detailing some of them in order that my colleagues will notice this quiet geopolitical change. The first is by the columnist Jack Anderson, as carried by the Washington Post. The second was an exclusive report by Vicki Rivera of the Washington Times.

The articles follow:

[From the Washington Post, Dec. 2, 1985]

SURINAME BECOMING ANOTHER CUBA

(By Jack Anderson and Dale Van Atta)

Suriname is developing into another Cuba-style dictatorship in the Western Hemisphere. Marxist strongman Desi Bouterse, desperate for cash to keep his repressive regime afloat, has turned to two tainted sources of money: Libya's dictator and Colombia's drug dealers. But he's learning that there's no free lunch in foreign aid.

When the Netherlands granted its South American colony independence in 1975, the Dutch promised $100 million a year in aid until 1990. The stipend continued even after Bouterse's military coup in 1980 and his growing leftward tilt.

Bouterse cultivated and modeled himself after Maurice Bishop, then the Marxist prime minister of Grenada. At Bishop's suggestion, Bouterse succumbed to Fidel Castro's overtures and welcomed a Cuban ambassador to Paramaribo in September 1982.

Cuban aid soon followed, as did the quid pro quo, Dozens of Cubans arrived in Suriname to assist Bouterse in setting up a Marxist dictatorship—which would be under Castro's control. The Cubans trained Bouterse's bodyguards, and even acted in that capacity themselves. Surinamese officials were sent to Cuba for indoctrination.

Both the Dutch and U.S. governments (the United States was also sending Suriname some modest aid) grew increasingly uneasy at the blossoming Bouterse-Castro relationship. In December 1982, when Bouterse rounded up and executed 15 opposition leaders, Dutch and American aid was cut off.

Castro, himself dependent on Moscow gold to bolster the shaky Cuban economy and his foreign adventures, proved slow in providing the money he had promised Bouterse. So, according to our CIA sources, the Surinamese dictator accepted the offer of a loan from Colombian marijuana and cocaine traffickers.

Meanwhile, Brazil, which borders Suriname on the south, woke up to the danger of this Castro foothold and sent a military force across the border in April 1983. Literally under the gun, Bouterse agreed to decrease the Cuban presence in his country in return for a $300 million aid deal with Brazil.

Bouterse dragged his feet on the bargain, until Bishop was deposed and murdered by Cuban-backed Grenadan Marxists. Blaming Castro for the death of his friend and mentor, and fearing for his own neck after the U.S.-led invasion of Grenada, Bouterse sent his Cuban advisers packing. Though he had previously claimed that there were only 15 Cubans in Suriname, about 100 were kicked out (leaving only eight, according to our sources).

This left Bouterse with nothing but his own poverty-stricken populace and the Brazilians to support his dictatorship. He needed more money, and gratefully accepted a promise of $100 million from Libyan dictator Muammar Qaddafi.

What does Qaddafi expect for his money? Our sources say he hopes to expand his influence in South America. He also wants Surinamese passports for Libyan assassination squads, and hopes to supply them to his Palestinian terrorist sidekicks as well.

[From the Washington Times, Oct. 24, 1985]

LIBYA REPORTED DRILLING TERRORISTS IN SURINAME

(By Vicki Rivera)

In return for the promise of $100 million in badly needed aid, Suriname strongman Desi Bouterse is permitting Libya to train terrorists in his country to use against other Caribbean nations, according to a Dutch political analyst.

With the cutoff of Dutch aid after the 1982 execution of 15 prominent opposition leaders and the falloff in revenues from bauxite, the main export commodity of Suriname, Bouterse's regime is desperate for cash, said Michael van Notten, a consultant to the Council for the Liberation of Suriname, based in the Netherlands.

Mr. van Notten was to accompany a delegation of Surinamese resistance leaders in exile on a visit to Washington, but the members of the delegation were apparently intimidated after seeing some of Mr. Bouterse's men in New York and decided to return to the Netherlands.

Mr. Bouterse, a former sergeant who took power in a 1980 coup, addressed the U.N. General Assembly in New York on Tuesday.

The agreement between Libya and Suriname was reached in February, Mr. van Notten said, and a Libyan's People Bureau was set up in July. A total of 243 Libyans are now reported to be in Suriname, 30 of whom came from neighboring Guyana, where they were believed to have conducted training in subservice activities, and 50 from Chad.

However, the State Department said it had no information to verify what it characterized as "rumors" of Libyan activities in Suriname.

"The Surinamese government is well aware of our concern about the development of relations with Libya," a State Department official said. "We made a point of saying that we don't want to see Libya using Suriname as a base of operations. They appear to be taking our concerns into consideration."

"The Libyans had learned to speak the local language, so they obviously planned a long stay," Mr. van Notten said.

About 40 Libyans are training Surinamese troops in the main airport, and another 200 set up a military camp in the midwestern part of the country where they are reported to be training non-Surinamese, he said.

"Most likely they are training rebels from [neighboring] French Guiana who are opposed to French rule. We also assume they're in contact with the independence movement in Guadeloupe."

A number of terrorist bombings have occurred in Guadeloupe in the past year.

The Libyans have established contacts with sympathizers in Aruba and Curacao and are believed to be building up a network that would use Aruba (an island off the Venezuelan coast) as a springboard from which to launch operations in Venezuela and Colombia, Mr. van Notten said.

A BULLISH PERSPECTIVE ON THE ECONOMY

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. KEMP. Mr. Speaker, the critics of Reaganomics are confused and in disarray. Despite their dire warnings of economic catastrophe, the U.S. economy keeps growing, generates record new jobs, and reaches closer to full employment without inflation. Tax rate reductions have begun a sea change in economic thinking about incentives and economic growth—a change in thought as sweeping as in 1932.

In a recent speech, William F. Gorog, president of the Magazine Publishers Association, has contributed to this revolution in economic thinking. His speech not only reviews the strength of this recovery, but he also punctures some common myths about jobs, interest rates, and deficits. My colleagues will be interested in Mr. Gorog's predictions of 5 to 5½ percent economic growth next year, and will find persuasive his reasons for optimism.

Bill Gorog's speech is an insightful, lucid, and intelligent look at today's economy, and I insert it into the RECORD for the attention of my colleagues and others.

REMARKS OF WILLIAM F. GOROG, PRESIDENT, MAGAZINE PUBLISHERS ASSOCIATION BEFORE THE 1985 AMERICAN MAGAZINE CONFERENCE

THE MAGAZINE INDUSTRY IN 1986 AND BEYOND

Several months ago, two of our board members suggested that it might be valuable for me to devote my time at this magazine conference to a forecast for the magazine industry for the year 1986. It brought to mind a comment that I frequently hear from my friends in Washington concerning the need for economists to cloak themselves in Heller's law—which simply stated is, "Never put a forecast and a date in the same sentence".

I find myself trapped in this instance by the title of the speech and will be forced to look at the specific time frame of 1986 but first will spend some time trying to analyze the confusing factors that must be considered before we can say that 1986 will be rare, medium, or well-done for the magazine industry.

It is apparent from recent published articles that the state of the art of economic forecasting is in total disarray. To show you what I mean, let's examine what we have read over the last few years concerning federal deficits, strength of the U.S. dollar, debtor nation status, and the problem of our international trade imbalance. We have been hearing doom and gloom for over three years on all of these subjects, and yet as my friend, Sid Jones, Under Secretary for Economic Affairs at Commerce said recently, "The U.S. economy appears to be running on an empty tank and has been doing so for three years—but without any impairment".

Let's first look at the issue of the deficit. Our leading prognosticators, both inside of the administration and out, stridently told us that huge government deficits would cause an inflation crowding-out, high interest rates, lack of funds for private capital investment and high unemployment. What in truth has happened? Inflation is now down to the lowest point since 1972, crowding-out has not happened—apparently because of the massive influx of foreign investment, interest rates have dropped, and the unemployment rate, rather that rising, has been falling. All of which is unexplainable in normal economic terms.

We have also read a great deal about the problems of the U.S. dollar. Everyone wants to bring its value down and no one quite seems to understand why it's staying up. At one point we were told that the dollar was strong because of high inflation and high interest rates, sucking investment dollars from the rest of the world to the United States for treasuries and other commercial paper.

Strangely enough, when inflation rates went down and treasury rates went down accordingly, the dollar ascended to an all-time high, blowing that theory of why the dollar is overvalued. It's interesting to point out that many of these analysts seem to adapt their theories to the current situation, because there was a time when the strength of the dollar was based on sound U.S. fiscal and monetary practices, low inflation rate, and high GNP growth—the reverse of the explanation that is now being given for the same situation.

Let's look for a moment at the confusion picture concerning the U.S. trade imbalance. Again many analysts tell us that we're on the verge of absolute disaster because of the trade deficit. The imbalance should be pulling massive numbers of manufacturing jobs out of the United States creating high unemployment. A short trip through history, however, points at some unusual statistics. Our worst unemployment picture in history was during the great depression of the '30's when we had a relatively high trade surplus and the dollar was very competitively positioned. The largest trade deficit in history occurred in recent months and interestingly enough, unemployment has gone down. We have actually added nine million new jobs since 1979. In the same time period Japan added three million and Europe lost one million. In August of this year, the total number of manufacturing jobs rebounded in a major way.

Let's talk for a moment about our debtor nation status. Columns have been filled with the story of our sudden shift not only to a debtor nation status but they also predicted that we will shortly become the biggest debtor nation in the world—with the insinuation that the United States has suddenly become a banana republic with credit stature similar to many of the lesser developed nations. But what do those numbers really mean? The numbers reflect what foreigners have invested in the United States, and what we have invested overseas—in plant, equipment and properly as well as in commercial paper. Part of the underlying story, however, hasn't been told. Most major capital investments on the part of U.S. companies overseas were made several decades ago. These numbers represent our book value dollar investments made 10, 20 or 30 years ago. It's interesting to note that the major foreign investment in the United States has taken place in the last 10 years, with the bulk of the investment in the last 6. Which means on the basis of calculating value, what's carried at book two or three decades ago does not reflect the huge appreciation in value of those assets. When balanced to current value, we probably have a positive balance in the range of 300 billion dollars rather than being a debtor nation.

What does all this analytical confusion mean, as far as 1986 is concerned? Attempting to forecast for our industry on the basis of the prediction we've just discussed would be futile. I fully expect anytime now to hear Irving R. Levine state on the evening news that "There's bad economic news tonight—in the last quarter meaningless statistics were up five percent!" I would, then, suggest that the current econometric models don't work, that looking at any single piece of the picture can be very dangerous, and that we are entering a period of global economics that will require us to reevaluate our entire system for predicting the future.

Interestingly enough, with much talk about looking at the world economy, almost all of the issues that I have discussed, result from forecasts based on historical data from the sample of the American economic system. Our experts tell us, for example, that we can't have a strong economy if we don't have a strong base of manufacturing jobs. If this is true on a national and international scale, why wouldn't it also be true state by state? Why is it possible for North Dakota, Idaho and Wyoming to be relatively prosperous states without a manufacturing base? The answer given quickly of course, is that the U.S. economy is an entity; it works together and balances. But if this is true and we have truly entered a global economic environment, what's wrong with manufacturing in Taiwan, using the product at a lower price, providing a higher standard of living or U.S. consumers and moving U.S. workers to service industries? I am not proposing this as a solution and an answer. But I am suggesting that there are forces at work defining our future that are much too complex for mere computers looking at historical statistics to solve.

Let's forget the meaningless statistics and try to apply some common sense to estimate the 1986 business environment. Looking at the economy, '86 and beyond, and specifically what it means to our industry, I would suggest that if we're going to have a good 1986, we need three fundamentals: (1) a continued low rate of inflation, (2) interest rates which are lower than they are today, and (3) a major resurgence in a major sector of our economy.

Let's ask ourselves the question before we forecast 1986—What are our chances that these fundamentals can be in place? First, let's consider inflation. Contrary to predictions of some significant forecasters, I cannot believe that we're going to see an increase in inflation in 1986. These forecasts, I believe, are based on all of the fears we just discussed: the deficit, crowding-out, strength of the dollar, our international trade imbalance and our so-called debtor nation status. But going back to the fundamentals we spoke of before, let's really think through the inflation issue. How can we have accelerated inflation in 1986 when there is a world abundance of everything: beef, cotton, corn, soy beans, copper, steel, automobiles, VCR's telephones, semi-conductors, oil, gas, coal, and an international over-supply of labor. There is also an abundance of money and banks are shopping for loans. Think about our own industry, there is not a single thing that we purchase that isn't terrifically competitive and even our fears of a paper shortage have disappeared.

Therefore, basic #1 for 1986 says to me, forget the econometric models—we will continue to have a low inflation rate through the entire year. We may see deterioration of corporate profits of manufacturing companies but in the sea of oversupply, the inflation rate will remain steady.

This in turn, means that we should see a drop in long-term interest rates. Historically, long-term rates should not be more than 3 to 3½ percentage points above the inflation rate, but for a long period of time, we have experienced artificially high rates because of national concern about the resurgence of inflation. If the prognosticators are wrong and I am right, we should see a drop in long-term rates as early as the beginning of the first quarter 1986. When those rates descend below 11½ percent, I believe we'll see the third needed factor for 1986 falling into place—and that is, we will experience a major housing boom. The 11½ percent point seems to be a psychological barrier for many and a real barrier for most concerning the ability to either up-grade or buy new housing. When that barrier passes, the pent-up demand for housing will energize the forest products, appliance, plumbing, electrical, and the construction industries. This in turn will accelerate GNP growth in all other segments of the economy. Now, I am not suggesting that 1986 is going to be a boom year. As a matter of fact, I would hope that it's not, for what we need more that anything is a continued period of stability without major fluctuations. But if I have to pin myself to a GNP forecast for 1986, I would suggest that we will see between a 5 and a 5½ percent growth for the year.

Now that I have stuck my neck out on the subject of the economy as a whole, what can we expect for magazines in 1986? We've done a lot of hand-wringing in 1985 with the current outlook being a flat year for lineage and no more than a 5 percent increase for advertising revenues. Again you have to be careful about being too pessimistic about these results. The numbers are flat, but compared to what? You have to remember that we have just come off two incredible years. 1983 and 1984 represented a 33 percent increase in ad revenues for our industry—up 1 billion, 200 million in total dollars. 1984 also had the Olympics and the elections, causing a major lift in ad lineage. So in perspective, '85 is slightly up over '84 but it is still going to be the best year in magazine history in revenues.

More important, however, is how we can position ourselves as an industry to put ourselves back on the growth track of 10 to 12 percent a year. I suggest we can only accomplish that objective if we reevaluate our marketing programs, recognize the major change that has taken place in consumer demographics, and seize the opportunities that this change offers our industry.

We were recently present at a sales meeting of a major consumer magazine that happens to be #1 in pages and ad revenue in its field. The sales manager was complaining about a slight loss in pages for the first seven months and exhorted his sales people to get after the competition to make up the deficit. Think just a moment about that kind of solution to his problem. He's already #1 on everybody's schedule, and a reduction in pages probably means that his advertisers were reducing expenditures for media across the board. His opportunity for improving his position is not in growth at the expense of other magazines in his class—the opportunity for growth is in convincing major clients and advertising agencies that they need to spend a larger portion of their total media budget in magazines. Our research has shown that when clients increase their print budget, everybody wins, the schedule gets longer and the original magazines get additional pages. When budgets are cut, schedules are shortened, and pages diminish. The bottom line is that we must place more emphasis on greater use of magazines and then everyone wins.

MPA's efforts and emphasis in 1985 have been devoted to major presentations to clients who have the potential of making major changes in their media mix. Included have been presentations to Pontiac, Oldsmobile, Kraft Foods, Tandy/Radio Shack, IBM, and Compaq. Our message is simple—consumer demographics have changed dramatically. 51 percent of the adult women are now in the work force. Women in the 35 to 44 age group, have reached the phenomenal level of 67 percent in the work force. These families have more discretionary income—are watching less television and reading more magazines. When this message reaches clients, they can be convinced that more effective use of their advertising dollar can be made if they change their media mix to reach their lost audience through magazines. In the case of Kraft for example, we pointed out that a shift in media mix from 20 percent magazines and 80 percent television to 50/50 would create a major increase in gross rating points at no additional dollar cost.

These messages are powerful and effective. As you know 18 months ago we made major presentations of this nature to 24 cosmetics and toiletries companies. We tracked their magazine expenditures very carefully over the following 12 month period and some startling facts were apparent. The companies who heard our presentations on media mix increased their magazine spending by 25 percent—a total of 34 million dollars in the 12 month period. A control group of companies that did not have the presentation had less than a 5 percent increase in the same period. The story is loud and clear. If we all start to sell magazines generically, we'll not only get more pages for our own books but the results will increase schedules down the line.

In 1986, MPA will continue to emphasize presentations to major package good manufacturers, continue efforts in the computer field, and start a new effort in financial services. You have to understand, however, that MPA's resources are limited, and while we have a better opportunity to reach clients who may be cautious of individual sales reps, everyone has to start selling above the level of the print buyer. The story of the new American consumer demographics has to reach advertising executives who make media planning decisions and the client's major advertising executives.

This is our challenge for 1986 and beyond. We can expect a 5 or 6 percent growth if we just roll with the economy but if we want to get up to the 10 to 12 percent range in 1986, we're going to have to do it by creative selling and by understanding that we need to sell as an industry.

We have the best research, authentic audience data, and the best trained sales force in the media business. I'm not satisfied with a 21 percent share of total national media revenue. Let's make it change in 1986.

REDUCING FEDERAL SPENDING

HON. DICK CHENEY

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. CHENEY. Mr. Speaker, earlier this year, Mr. James Rouse of Saratoga, WY, came up with the idea of sponsoring an essay contest with cash prizes for the best essays on what the average citizen can do to reduce waste of the Government's money. Using his own money, Mr. Rouse paid $1,000 for the first prize, $500 for the second, and $250 for the third prize, to three young people in his community who researched and wrote essays on this important subject.

I am pleased today to submit for publication in the RECORD an essay entitled, "What the Average American Can Do to Reduce Our National Debt," by Alysia Andrikopoulos of Encampment, WY, who received first prize for her work. I hope it serves as an inspiration to others to take an interest in the affairs of their Government.

WHAT THE AVERAGE AMERICAN CAN DO TO REDUCE OUR NATIONAL DEBT

(By Alysia Andrikopoulos)

Can you fathom 90 million miles? In inches, that is 5.5 trillion—or the number of dollars our federal goverment will spend in the year 2000 if it maintains its present policies. The result of spending more than the government takes in means that by the year 2000 our federal deficit could reach $2 trillion. That affects each American taxpayer—$18,000 a year in interest alone. Government waste and spending inefficiency has contributed to a present deficit of $195.4 billion.

If the government continues to spend as it currently does, it will erode the American social and economic systems. The deficit burden will effect future generations; if nothing is done now, the deficit will cause higher taxes, inflation, interest rates and unemployment. To resolve these problems, the government must assess priorities and make government programs more efficient. This essay will discuss the Grace Report and the ways that we, as average citizens, have the opportunity to influence these problems by publicizing them and organizing pressure groups, keeping in mind the resources available to us and the progress that has been made, remembering that hard work, sacrifice and perserverance will be absolutely necessary.

In 1982, President Reagan appointed J. Peter Grace head of the President's Private Sector Survey on Cost Control to suggest ways to eliminate excessive federal expenditures. The Grace Commission Report produced ninety-eight pounds of reports and 2,478 proposals for reducing waste, overspending and inefficiency. Their main recommendations were: correcting organizational defects, reducing program waste and inefficiency, improving management of federal work force, overcoming systems management. If implemented, these programs would save $424.4 billion in only three years.

Now that the Grace Report has been concluded, the urgency to resolve this Armageddon of spending, waste and inefficiency is extremely tangible. The American people need to realize this urgency and work toward stimulating government action. The average American citizen has a responsibility to demand a halt to wasteful government operations and spending.

The United States has a democracy that works of, by and for its people; and people should become more involved in making the government work! This must occur through a return to active communication with our local representatives. As the central portion of our federal government seems so distant, Americans don't always think of how they can influence it. Before the Grace Commission reported its findings, Americans thought their government worked efficiently. Now we know better, and can, from the local level, demand greater efficiency and governance in the spending of our tax dollars. Our federal government consists of representatives from states; the state governments consist of local representatives. It works like nature's good chain pyramid; therefore, if we demand action at the base, the top will be effected and know how to represent us. Let us cultivate at our local levels an attitude and a desire to save and be more efficient. More directly in this pyramid, we can elect the representatives and officials that we know will work toward our demands; with the present problem at hand, we can make the government deficit, spending waste and inefficiency a major part of campaigns. As seventy-three percent of the Grace Report's proposals will require direct congressional action, and the remaining proposals can be influenced by Congress, the citizens of this country need to take advantage of the freedom to voice their opinions.

The people aware of the Grace Commission's survey need to increase public awareness of the report. One can do this in many ways: essay contests, book and resource distribution, public speaking, letters to news editors, etc. There is no end to the things an individual can do to increase public awareness of the Grace Report. Organizing pressure groups will have a snowballing effect and make a greater impact on Congress to reduce the federal debt. Our Constitution provides us with many means of communicating our thoughts: petitioning, lobbying, freedom of speech and press. Organizations should take advantage of these freedoms in working toward their common goal.

One thing to keep in mind, is the fact that much has been accomplished in working toward reducing government inefficiency: Don't reinvent the wheel. First of all, the Grace Commission has already researched everything one need to know on the subject; use their pamphlet, books and leaflets—they are for us. Next, groups have already been formed; become directly involved with them to make their force stronger. Peter Grace and Jack Anderson formed a group in which one goal is a petition of 50 million signatures urging fiscal discipline. Citizens Against Waste is another Grace-inspired pressure group. Finally, economists have proven advice that could better our economy and eliminate a deficit; read about such outside information to direct yourself or organization toward accomplishment. Creative use of available resources will expediate work toward government efficiency.

People need to be prepared to sacrifice something to put this country on the right track. Whether this sacrifice be social security, farm subsidies, defense spending, welfare or food stamps, we all know that something will inevitably have to be given up. However, what an individual gives up is small compared to the good it will do the national economy.

A large federal debt has been pinpointed as an economic problem to the U.S.; this is something that we cannot afford to be apathetic about; this is something that in a democracy we can do something about. There are many things one can do to work toward the reduction of this debt: demand government efficiency through our representatives, elect people to represent our ideas, publicize our ideas, join groups, use available resources.

As a Taxpayer Survey of the Grace Commission Report says, "If everyone who read this book did just one thing to help implement the Grace proposals, the impact on Congress would be overwhelming."

This is the problem, this is a democracy, we are the people, and we can help.

JAPAN-TARGET OF UNFAIR TRADE PRACTICES

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. DORNAN of California. Mr. Speaker, we are all concerned about the unfair trade practices of other countries that rob American manufacturers of overseas markets. But I was recently reminded of one particular case of unfair trade being practiced by one of our closest allies, Japan, against another of our closest allies, Israel. It has very little to do with trade and everything to do with blackmail, cowardice, and anti-Semitism.

Our former colleague, Mayor Ed Koch of New York City, for whom I have strong admiration and respect for his guts and plain talk, recently wrote me a letter outlining what surely is Arab blackmail of Japan, which imports all its oil, is engaging in a boycott of Israeli made products at the request—read "demand"—of Arab oil countries. That this also adversely affects American companies put on an Arab boycott list for doing business with Israel is reason enough for American anger and action. But that Japan, our close friend and ally, remains content to submit to this blackmail—as it did during the Arab oil embargo of our country—is a source of great disappointment and frustration. It is my fervent hope that our Japanese friends will soon realize that Israel is our most reliable ally in the Middle East and have the guts to end their embargo against Israel.

Mr. Speaker, I urge all my colleagues to read the following remarks by Mayor Koch and the transcript of his conversation with Norishige Hasegawa, vice chairman of the Keidanren, the Japanese equivalent of the Chamber of Commerce.

THE CITY OF NEW YORK,
OFFICE OF THE MAYOR,
New York, NY, December 6, 1985.

Hon. ROBERT K. DORNAN,
U.S. House of Representatives,
The Capitol,
Washington, DC.

DEAR BOB: I just returned from eight days in Japan. While there I met with a number of government officials, from Yasuhiro Nakasone, the Prime Minister of Japan, to Shunichi Suzuki, the Governor of Tokyo. I

also met with a number of businessmen including members of the economic business council known as Keidanren.

On every occasion there was a discussion about free trade and Japan's fear that the United States might in some way restrict access to its markets through protectionist legislation. In each instance I was asked for my opinion on the subject. In sum, I responded as I think many other Americans would with the opinion that I do not believe Japan practices what it preaches. Japan, itself, does not engage in free trade. I pointed out the following three illustrations to underscore that point, although I am sure there are others.

First, Japan engages in cartel operations where businesses receive substantial government support. Indeed, government/bank financing is arranged in a way that would not only be unacceptable practice in the United States but indeed would be an illegal restraint of trade. This support structure gives Japanese companies inordinate advantage in their competition with United States firms.

Second, there is an inbred predisposition among the Japanese to buy Japanese made goods, in preference to foreign made goods whenever they are available. Culturally, the Japanese aren't moved by the concept of free trade and open markets when it comes to their own buying decisions. This is not meant to be a criticism of the Japanese, in fact to the contrary, I wish more Americans felt the same way about our own products.

Third, the Japanese government allows, and I believe engages in, a boycott of Israel at the request of Arab oil countries. The boycott has been extremely effective in limiting purchases by Japanese firms of Israeli-made merchandise to minimal proportions. It has also had the effect of severely limiting the sale of high-technology products produced by Japanese firms, which are available for sale to other countries of the world.

I raised these three illustrations with Norishige Hasegawa, who is the Vice Chairman of the Keidanren, which is the counterpart of the National Association of Manufacturers here in the United States. It is perceived as the most important business group in Japan. Mr. Hasegawa conceded that all three of my accusations had substance. He personally believed that these circumstances should be addressed and corrected. The actual conversation that I had was recorded, and I'm attaching a transcript which I believe you will find of interest.

I raised the subject the next day with Prime Minister Nakasone. While he was willing to concede the need to address the first two issues, he was adamant in his refusal to take any action to eliminate Japan's support of the Arab boycott against Israeli firms.

The brazenness of the Japanese companies was recently demonstrated when Mazda, a major Japanese automobile company, announced that since the Ford Motor Company had been removed from the Arab boycott list, it would now work with Ford in some collaborative effort.

What we are now seeing by Japanese companies, and I believe it is with the full support of the Japanese government, is not only a boycott of Israeli manufacturers, but a boycott of American companies complying with American law prohibiting submission to such Arab blackmail. Such a circumstance must enter into any consideration of our trade relations with Japan. American companies should be protected against unfair competition and it is hypocritical for the Japanese to hide behind the principles of free trade in opposing such legislation, when their business practices are quite the opposite.

If to date you have been guided by your beliefs in free trade or were undecided on the issue of protectionism vis-a-vis the Japanese, I urge you to consider what I have said.

All the best.

Sincerely,

EDWARD L. KOCH,
Mayor.

ED KOCH AND KEIDANREN

First let me say to you Mr. Hasegawa, and the members of the various firms who are here: I appreciate the opportunity to talk to you and answer a few questions. Let me also say at the outset that most people of America by virtue of Japan's economy believe that Japan won the war.

Secondly, let me say about the strength of the dollar when I'm in New York City, I get so upset that the dollar is so strong and so adversely affects our exports—but when I am in Japan as a tourist I am so upset that the dollar is so weak.

Just a word on the relationship that affects the United States from my vantage point. Obviously I am not a member of the federal government, but I think I know the thinking of a lot of people in the United States just by being mayor of the largest city in the United States.

People are upset, rightly or wrongly, that the United States has such an adverse balance of trade with Japan and what they see is that unlike the U.S. where we have true total free economy that the economy we believe that Japan is so organized with the government—with the banks and with the industry, that you are able to use business methods, cartels, dumping of products, subsidizing of products that we are not able to do under our law. We may be wrong about it but that's the general feeling.

That may be totally wrong and probably the true answer is that the Japanese businessman happen to be the best businessman in the world. But you're going to have to get us a little handicap. If in fact it is only attributable to your business ability even though you would believe that that's simply an asset we have to deal with vis-a-vis you, the perception is that it is not the reason—perceptions are the prior reasons I gave you, and you have to deal with that.

Two other things that affect the Congress as it now discusses taking measures that relate to our export/import relations with Japan are: One, the perception that in Japan the Japanese citizen is conditioned to just buy Japanese whereas in America the American citizen is conditioned to buy foreign. The American citizen when he buys a piece of junk (never from Japan because Japan does not sell junk)—but when he buys a piece of junk that has the name of a foreign country on it, he shows it off with pride. So you have to condition Japanese citizens not to buy American junk but to buy American good things and show them off with pride.

The third thing that is on the minds of a number of people in the Congress and elsewhere, mine included, is the lack of rationality in the argument that the Japanese use to support free trade. They say free trade is food for the world and you in America should not be protectionists.

We say that the argument of the Japanese is flawed because they don't engage in free trade yet some people will say—look at the boycott they have of Israel. They don't buy Israeli products in any large amount nor do they sell the top line technology to Israel because of the Arab boycott. That's unacceptable to Americans who believe that you may not, if you believe in free trade, engage in anti-free trade with a friendly country like Israel with which you have diplomatic relations and with which we have diplomatic relations.

I would urge you to ask your government to address all of those issues because I think it is important to the good relations between Japan and the United States from an economic point of view.

One last word by way of invitation coming from the City of New York and then if you have questions I will be delighted to respond.

I, as Mayor of the City of New York, have established a climate in that City that is helpful to business.

Alair Townsend, who is the deputy mayor on economic development, each and every day does what she can with my support to cut business taxes, to reduce the price of energy and to make it easy for you to acquire large plots of land cheaply where you can build factories.

Let me give you one industry that if you could get people to come to New York City to create you have no competitors in a lot of businesses.

We have in New York City a vacancy rate for residential buildings of less than 2 percent. We need private, one or two family homes to be built and apartment houses, not necessarily skyscrapers, but 6–8 stories high and to be built cheaply.

We do not have in New York City a factory that creates prefabricated housing. We need one. If you came there and built such a factory, it's unlimited the number of apartment units that we would be able to buy if you sold them cheaply.

Why don't I stop there and take questions:

Firstly, we have in the City of New York foreign trade zones where you can build a factory, and you're not taxed on what you create there unless you bring it in to the country for sale. But if it's for sale in other countries—there's no tax—and the benefit we get out of it is that you use our workers.

If you want to build a real factory not in a foreign trade zone for transmission to some other country, but because you want to sell in our country it's not just simply in the north part of the city that you referred to that land is available. The most attractive property in the City of New York today was formerly the Brooklyn army base which is right along the water, has wharves that your ships can come to and has 5 million sq. ft. of vacant space that is available today, and she has got the lease to it. Four dollars a square foot.

In the same Brooklyn army base you can get 5 million sq. ft. or any part you want at $4.00 a ft. The energy costs have been reduced for the first 5 years by 48 percent of what anybody else pays in Manhatten and then after 5 years it's 30 percent. That's a real bargain, and I don't know how long I'm going to be able to offer it.

Now I want to turn to the subject of the boycott of Israel which you can see is in effect here in Japan, and I know it to be so. It is unacceptable from an American point of view that the great country of Japan would knuckle under. The western European countries have not knuckled under. They do not permit the boycott. In addition,

there may have been a time when Japan worried about the purchase of Arab oil. Today the Arab counties beg you to buy their oil, because there is a world surplus of oil. So today is the day when you should say to the Arabs—we have the same courage—we have the same philosophy as our allies in America and as our allies in Europe. They did not submit to your blackmail. We will not any longer.

HASEGAWA. We feel that the requests that you mentioned are very correct and that you wisely mentioned the oil situation has been changed so I think this gives a good chance at present to make that sort of assertion which you mentioned.

So we will work on our part to talk to our colleagues and also work on the Japanese government. I am embarrassed to confess that we were not aware of some of the points that you have mentioned so we would like to relay the points that you mentioned to our colleagues and like to give it serious thought.

When are you next coming to New York? I want to take you to a nice Japanese restaurant.

PROFILE: GERALD GIDWITZ

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday December 19, 1985

Mr. HYDE. Mr. Speaker, one of America's most patriotic and energetic citizens is Gerald Gidwitz of Chicago, IL.

I am proud to know him and count him as a good friend and to provide for my colleagues a profile of his career that appeared in the Chicago Tribune of December 16, 1985:

GIDWITZ CLAN GENERATES GOOD BUSINESS

(By Sally Saville Hodge)

Gerald Gidwitz speaks with mock self-pity. He has started various businesses—most notably Helene Curtis Industries Inc. and Continental Materials Corp.—and brought his family into them, as any good father would.

"I let them run the companies," he said of his sons Ronald, 40, chief executive of Helene Curtis, and James, 39, who, along with his uncle Joseph, 80, runs Continental Materials. "And they took my jobs away."

But he shrugs it off with a grin: "So I just start something else."

At 79, when most men have long since given up the grind for a life of leisure in the Sun Belt, the patriach of these old-line Chicago businesses is actively pursuing business and civic interests.

On the business end, he has bought several small, ailing farm equipment companies, consolidating them in one plant for better operating margins or greater productive efficiencies.

On the civic side, his interests range from fighting Communism—through pamphlets he writes and his involvement in the Jamestown Foundation, an organization dedicated to helping Communist defectors—to education, particularly to help people get off welfare.

It keeps Gidwitz busy enough that he's trying to hire an assistant.

In his office at the downtown headquarters of Helene Curtis, a hair care product firm, he gestures at a pile of books and papers cluttering a table. They all relate to a farm equipment company, whose sales have plummeted to $8 million from $25 million and is verging on reorganization under Chapter 11 bankruptcy laws.

Gidwitz is trying to decide whether the company is salvageable.

Why the interest in farm equipment companies? "I look at things all the time, farm machinery among others," he said.

Besides, Gidwitz added with a smile, he has not lured his youngest son, Tom, into business. He expresses exasperation that his persuasive powers have not budged the 32-year-old aspiring novelist but modest pride that some of his literary leanings have been passed on. Two other children, Nancy 37, and Peter, 35, also aren't in family-related business.

Gidwitz got into the farm machinery business several years ago when he acquired a Mankato, Minn., manufacturer. He later acquired a second company and consolidated operations in one plant in Minnesota.

He's undecided whether the latest manufacturer to come to his attention will join the fold. "This company doesn't have the margins," he said. "The question is what has to be done to improve them. Maybe their prices are too low. If so, a 10 percent increase might help. Could they cut costs? Is it an efficient plant?"

He doesn't sound optimistic. He has seen the plant and considers it efficient. Most farm-related companies have cut their costs to the bone, and low prices are about the only way to achieve the little selling done by the industry, he says.

Gidwitz's interest in such companies is part of his larger concern for the country, including its defense posture, economy, competitive edge and social consciousness.

"You can't get off the world," he said, explaining his efforts. "We [the U.S.] don't have a plan. And unless we find a way to cure our problems, we're going to be in real trouble—like England, only they weren't as bad off in the educational area as we are."

Education, or the nation's shortcomings in that area, has long been a concern of Gidwitz.

Thirty or 40 years ago, he said, Helene Curtis held after-hours educational programs for workers. At first, he said, classes were established in any subject in which enough people expressed an interest.

"One year, though, they asked for tap dancing and pastry making classes," he said. "After that, we made it more restrictive."

When the Russians launched Sputnik and the space race in the late 1950s, workers developed an interest in Russian language lessons. Twenty-seven signed up for classes. Roosevelt University, which saw a similar interest among its students, contacted Gidwitz to see if its students could be sent to Helene Curtis' class.

At the same time, Gidwitz began a national organization known as "Education for Survival Foundation." According to press clippings from 1957, he said the purpose was "to make every school district in the nation aware of the grim fact that we are engaged in a battle of the classroom with Russia."

"Education for Survival" has long since died. "You need money for these things, Gidwitz said. "How much could I afford to spend?"

His interest in education, however, still is going strong.

He combined his concern over education with his concern over the welfare population to devise a program under which welfare recipients would be re-educated by their peers to gain basic qualifications to join the work rolls.

His literacy program, conducted with Roosevelt University, has been in pilot stages since 1982. Gidwitz is attempting to cut through bureaucratic red tape to expand it.

"His basic thrust is that those on welfare will always be on it unless we can re-educate them," said Michael Woelffer, director of the Illinois Department of Commerce and Community Affairs, which has funded Gidwitz's program in the past.

"Everything points to education as being the No. 1 priority of business in the future," Woelffer said.

Gidwitz's program sprang from an article he read in 1977 that said 50 percent of welfare recipients boasted high school degrees. It got his creative juices running.

"I went to Roosevelt Univesity—I'm on the board—and asked if they could take these high school graduates on welfare and teach them to be tutors, so they would work with others on welfare, those who didn't learn when they went to poor schools," he said.

The answer was positive, and Gidwitz worked to get the funding for a pilot. As he explained in a 1982 proposal to Gov. James Thompson and Peter Fox, then Commerce and Community Affairs director: "Both groups are on the welfare rolls. The talents of the educated would be better applied than in ordinary social service work or charity work.

"The [proposed] 100 hours of learning time would not only improve the skills of the uneducated, but would keep them off the streets. Emphasis should be on teaching ordinary skills . . . and the need to participate in our democracy in order to make it work," he said.

The program showed mixed results the first year with 60 tutors overseeing 5 students. The state budget crunch in 1983 disrupted the program, because some tutors and students stopped attending sessions when their workfare funds were cut off and didn't return when the funds were released.

Even including the dropouts, though, the average student showed a median two-year gain in reading proficiency, in keeping with the program's goals.

Curtis, C. Melnick, the late dean of Roosevelt's College of Education, pointed out in a memo to Gidwitz that literacy gains—or, in some cases, losses—were correlated to attendance, as one might expect.

Gidwitz said, however, that many students discovered they would receive their workfare payments whether they attended the program or not. "It underscored to me the fact that you really need a carrot-and-stick approach," he said. "There was no check on truancy and no threat if they didn't attend."

Now, after several years of pilot programs, Gidwitz and Roosevelt would like to see the literacy program expanded outside of the university.

As George Olson, dean of the College of Education, said in a recent memo, the city's community colleges are undertaking literacy programs, and he would like to see the efforts linked.

The program recently received another $50,000 from the state for another six months of operations.

Gidwitz is appreciative but his plans for the program are bigger than another pilot. He is seeking $30 million to $40 million of funding.

"Well, sure," he says in defense of such numbers. "We need enough money to raise the general level of education of our population to meet the competition that we're now

facing from better educated countries such as Japan."

HAZARD MANAGEMENT

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mrs. LLOYD. Mr. Speaker, in a separate entry in the RECORD, I voiced my concern over the growing problems of effective decisionmaking with regard to public risks and pointed to the increasing costs of this problem and its close association with science and technology. For an excellent perspective on the generic nature of this critical situation, I recommend to the Members' attention the section entitled "Managing Hazards" in the fall issue of Issues in Science and Technology. In this series of four thoughtful essays, geographer Robert Kates, physicist Alvin Weinberg, attorney and engineer Peter Huber, and psychologist Baruch Fishchoff, discuss the increasing intensity of the stresses being placed on science to identify hazards and assess their associated risks, the difficulties of our judicial and regulatory institutions in responding to the physical and economic realities of public risks with balanced rational procedures, and the barriers to obtaining meaningful resolution of conflicts between the public and technical experts.

The costs of this dilemma to society, which include the unintentional increases of public exposure to hazards through inadequate appreciation of the relative risks presented by various alternatives, and relatedly, the deterrence of risk-reducing technology through fear of inappropriate judicial decisions on liability and compensation, are high. In my opinion, the challenge of resolving the imperative for public management of public risks with the current problems of public decisionmaking institutions is today's key issue in tranferring the benefits of science and technology to society.

The activities associated with the Superfund bill, including the development and application of technologies to clean up toxic waste sites, the setting of standards for cleanup, and the allocation of costs and of present and future liabilities among the involved parties, furnish a timely example of these complex and generic problems. The escalating frequency with which these problems occur in an increasingly technical world will soon foreclose on the luxury of dealing with them on the ponderous case-by-case basis characteristic of our current efforts. An active search for generic approaches to improving the efficiency with which we address these issues must, in my opinion, be given our highest priority in all three branches of Government.

EDDIE BOLAND, THE HOUSE'S "MR. INTELLIGENCE," RECEIVES WELL-DESERVED CIA RECOGNITION

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. HAMILTON. Mr. Speaker, on Monday, our colleague EDDIE BOLAND, who chaired the Permanent Select Committee on Intelligence from its inception in 1977 until the end of the 98th Congress, was presented the CIA's Agency Seal Medallion by Director William J. Casey. The seal medallion is the Agency award presented to those from outside the Agency who render distinguished service to the U.S. intelligence effort. The Agency could not have presented this award to a more deserving American than EDDIE BOLAND.

Quite simply, EDDIE BOLAND made the House Intelligence Committee what it is today. His leadership, integrity, fairness, and understanding of the need for secrecy firmly established the excellent reputation of the Permanent Select Committee on Intelligence in the House and in the intelligence community for good judgment and good security. He recognized early that to be effective, the committee's work, which must remain secret, would have to be trusted implicitly by House Members. He recognized further that the intelligence community would not cooperate with a congressional oversight committee that did not pay strict attention to security and whose judgments were not based on a firm factual predicate. EDDIE BOLAND gave the committee that legacy. He was, as the CIA recognized, a firm supporter of the need for strong U.S. intelligence effort, but at the same time, he was never a captive of the intelligence community. When he disagreed with intelligence policy, he said so and he led the committee very effectively in making important improvements in our U.S. intelligence planning and capabilities. Oversight got a good name from EDDIE BOLAND and from the committee that he led.

Mr. Speaker, the award EDDIE BOLAND received on Monday was recognition by intelligence professionals of the real contributions that the Permanent Select Committee on Intelligence made under EDDIE BOLAND's leadership. But, it is not the intelligence community alone which recognized his contributions. The Vice President of the United States, GEORGE BUSH, attended the ceremony. His presence and his praise of EDDIE BOLAND showed that he and the President recognize that, while there may be disagreement at times, by far the greater share of issues raised in the oversight process result in agreement and strong congressional support. This administration, with whom EDDIE has had his disagreements, recognizes bipartisan support was the rule under his chairmanship. The administration recognizes that its emphasis on improvements in intelligence capabilities received steady, strong support from the House Intelligence Committee under the leadership of a man whose Democratic credentials cannot be challenged but whose bipartisan support for every President since Eisenhower is unquestioned.

As his remarks in accepting the award reflect, EDDIE continues to be a strong supporter of intelligence oversight and remains the committee's ambassador to the intelligence community in explaining the important and useful role that intelligence oversight can play within our frame of government.

Mr. Speaker, I ask unanimous consent to insert at this point the citation that accompanied the award of the CIA's Seal Medallion and a copy of EDDIE BOLAND's remarks.

CENTRAL INTELLIGENCE AGENCY CITATION

Edward P. Boland is hereby awarded the Agency Seal Medallion in recognition of his outstanding accomplishments as Chairman of the House Permanent Select Committee on Intelligence from 27 July 1977 to 29 January 1985. His superb leadership established oversight of intelligence which was and is today in the finest spirit of bipartisan government. Consistently adhering to the highest standards of personal and professional integrity in furtherance of the national security interests of the United States, Congressman Boland clearly demonstrated that effective oversight of intelligence can be realized in a democratic nation without risk to the intelligence process. Serving with full knowledge that his achievements would never receive public recognition, he chose to align himself with the thousands of men and women who have devoted their lives to support the intelligence needs of our country. Congressman Boland's extraordinary contributions and exemplary dedication as the first Chairman of the House Permanent Select Committee on Intelligence reflect great credit on himself and the Congress of the United States.

REMARKS OF THE HONORABLE EDWARD P. BOLAND

Thank you for those kind remarks.

I am delighted to be able to bring some Christmas cheer to Langley.

It is the season of joy and thanksgiving after all, and I want you to know that your joy over the fact that Congress will adjourn tomorrow or the next day, nearly matches my thanksgiving at the same prospect.

I am thankful as well for the honor you have accorded to me this evening.

The United States intelligence service is the finest in the world, and your good opinion is something that I deeply appreciate.

In fact, the good opinion of the intelligence community is an indespensible element of good congressional oversight.

You can't do one without the other, and that reminds me of a story the bishop of Springfield tells.

He was flying to Rome. As his flight was nearing Rome, the pilot reported that one of the engines had quit and that they were operatiing on only three. There would be no problem, however, because, Rome wasn't too far away.

So he said he would keep them informed. A little while later, he said that they were still going strong. They only had the three engines, but there was no problem, they would land safely. "In fact," he said, "I have some good news. There are four bishops aboard. We'll get to Rome all right." Bishop

McGuire then heard a woman sitting behind him say, "I'd feel better if we had four engines and only three bishops."

Some would say we haven't been running on all four engines in the intelligence community lately.

We have been rocked by espionage scandals, confused by two-way defectors, and genuinely concerned about serious leaks.

I understand that leaks lead some in the community to suggest we would be better off without congressional oversight.

I truly believe that sentiment is mistaken—intelligence needs oversight.

Oversight which is sensitive to the extraordinary difficulty of intelligence work and the need for secrecy in it but oversight which is nonetheless independent!

Sir William Stephenson, the wartime head of British intelligence, summarized the great conundrum of intelligence oversight in two questions: How can we wield the weapons of secrecy without damage to ourselves? How can we preserve secrecy without endangering constitutional law and individual guarantees of freedom?

Stephenson knew that the resolution of the inherent conflicts between the need for secrecy in intelligence and the dictates of a free society was essentially a human problem noting with respect to intelligence that "as in all enterprise, the character and wisdom of those to whom it is entrusted will be decisive."

I believe that if I did anything in 7 years as chairman of the Permanent Select Committee on Intelligence, I helped put the committee in a posture of good, honest inquiry, good security, and hopefully, good judgment.

There will be those who question the committee's record in one or more of these areas.

Today, security looms as the largest legitimate concern.

What isn't legitimate is undermining the institution itself.

I don't see critics of the oversight committees suggesting the elimination of the NSC staff or the State Department.

This isn't because they have impeccable security.

They clearly don't.

Rather, they are thought to be permanent. If not always useful, institutions of Government.

Well, the intelligence committees are also permanent institutions.

Further, they can be very useful.

Theirs is a broad overview shared by few outside the Director's Office.

They are small and they can, given the kind of leadership Lee Hamilton and Bob Stump now exercise, provide the necessary security for the very sensitive matters they review.

It is my judgment that, in balance, oversight has been good for the intelligence community, for this Agency.

Your numbers and your budget have increased in time of fiscal austerity.

You are now more capable and more confident to perform an ever broadening array of intelligence tasks.

Congress played a major, supportive role in that build-up.

It did so with its eyes wide open.

Sometimes opponents of covert action provided resources to conduct covert action.

And critics of some intelligence operations supported many others.

I believe members and staff of the Intelligence Committees deserve the recognition that they too are part of the national intelligence community.

As to the difficulties that now confront the intelligence community, I have no doubt that you'll come through in good shape.

Perhaps on only three engines from time to time, but you'll land safely.

You'd better, because the Congress is now on board.

RISK ASSESSMENT AND PUBLIC DECISIONMAKING

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mrs. LLOYD. Mr. Speaker, I would like to share with my colleagues my growing concern regarding the effectiveness with which we, as a society, are addressing the issue of risks in our decisions on the development and applications of technology. A list of topics which have or will require some form of risk assessment and subsequent public decision would include: The release of genetically engineered microorganisms for agricultural disease control, nuclear plant safety, siting of a nuclear waste repository, selection of an acid rain abatement strategy, food irradiation in lieu of chemical perservatives, and the establishment of standards for toxic waste cleanup projects. The benefits of new technologies seem inevitably accompanied by some degree of risk and our technological health depends increasingly on the skill with which we are able to address and resolve such issues.

There is a broad feeling in the technical community that the general public, including many public opinion and decisionmakers, is hampered in arriving at meaningful resolutions of questions in this critical area by an unfamiliarity with the fundamental concepts employed in scientific risk assessment. The emphasis here is not on an understandable lack of specific technical knowledge or theoretical insight in a particular instance, but rather, the generic lack of a qualitative appreciation for the significance, implications, and limitations of the methodology for rational treatment of risks.

As an illustration, I quote the following excerpt taken from an editorial by Daniel E. Koshland, Jr., entitled "Scientific Literacy," which appeared in a recent issue of Science magazine:

*** * * scientists in every discipline understand that certain decisions that must be made are associated with some level of risk, but we watch with consternation as society acts as if zero risk could be achieved. The same parents, for instance, who drive their children to school without seat belts demand a flat statement of certainty about the risk posed to their children by being in school with a child with AIDS. The ever-rising levels of malpractice awards are based on the premise that if doctors are punished enough they will become perfect, but ignore the possible outcome that the consequent fee increases will inhibit those with marginal incomes from going to the doctor. Living near a nuclear powerplant may be safer than attending a rock concert, but what television viewer would believe that?**

There is a diversity of opinion among competent technical authorities on many of the specific issues I have mentioned. However, the framework in which they are discussed by the technical community is qualitatively different from that used in the media, in many public forums, and often in the courts, and is significantly more effective in leading to balanced, rational, and productive decisionmaking. The costs of our inability to follow a similar approach in the public decisionmaking process on these same issues are increasingly high. In my opinion, this represents one of the most formidable generic problems facing us today and one which pervades essentially all areas of science and technology. As such, it is clearly a problem of intense concern to me as chairman of an energy subcommittee, and I feel that we must assume the responsibility to actively seek and encourage responsible approaches to its alleviation.

REDUCING FEDERAL SPENDING

HON. DICK CHENEY

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. CHENEY. Mr. Speaker, earlier this year, Mr. James Rouse of Saratoga, WY, came up with the idea of sponsoring an essay contest with cash prizes for the best essays on what the average citizen can do to reduce waste of the Government's money. Using his own money, Mr. Rouse paid $1,000 for the first prize, $500 for the second, and $250 for the third prize, to three young people in his community who researched and wrote the best essays on this important subject.

I am pleased today to submit for publication in the RECORD an essay titled, "The Deficit Budget," by Stephanie Bartholomew of Saratoga, WY, who received the third place prize for her work. I hope her essay serves as an inspiration to other young people to take an interest in their affairs of their Government.

THE DEFICIT BUDGET

(By Stephanie Bartholomew)

Irresponsibility has led the American economy into its most serious crisis ever: massive deficits. The deficit is the gap between what the government spends and what it takes in. If this irresponsibility in government spending is allowed to continue, the high standard of living Americans have grown accustomed to could easily become a part of the past. We are at a critical point affecting the future of the American economy, and the federal deficit must be reduced now.

In 1960 and 1970 the United States had a balanced budget. The federal deficit now stands at approximately $222 billion. That is approximately $1,000 for every man, woman, and child in the United States. Without action, the deficit will continue to rise, and will reach almost $300 billion by the end of the decade. How did such preposterous deficits, that were unimaginable just a few years ago, come to exist? The irresponsibility of the politicans, local, state,

and federal governments, and all those who benefit from government-sponsored programs have carried us into such a debt. This irresponsibility must be corrected. Reduction in spending, cutbacks on government programs, and a structured change in the tax rules are all possibilities that could help reduce the deficit.

The first step in reducing the deficit is the most obvious and most necessary; the United States must cut back on government spending. Total government spending has increased ridiculously within the last ten years. If this spending rate is allowed to continue, the government will be spending more than $1 trillion by 1990; an increase in spending that in this decade alone is greater than the entire increase in the 200 years our nation has prospered.

Americans will find that there are no easy cuts left; these cuts are federal programs that most often benefit the middle class. One proposed budget, that includes only slight defense trims, contains $40 billion in cuts in domestic programs. These domestic programs that are being considered for budget cuts are housing loans, community services programs, general revenue sharing (provides funds to local governments), Job Corps, library grants, student loans, the Small Business Administration, federal farm subsidies, and research and education grants. Unfortunately, this deficit package is still $175 billion short of a balanced budget.

President Reagan claims that the deficit can be treated without raising taxes, without altering social security benefits, and without tampering with the monies alloted for the United State's massive defense program. I believe it is necessary to make a cut, or at least a freeze, in social security benefits. Lately, there has been a rapid rise in social security and medicare benefits; in the past decade, social security benefits have tripled. Currently, $175 billion is spent on social security. These benefits are being paid without regard to financial need, though; and much of this money goes to individuals who are certainly not poor.

Cuts being made on government spending should not be restricted to non-defense programs such as social security benefits and the domestic programs as mentioned above. In recent years there has been a sharp increase in defense outlays. The fact is that although Congress wishes to continue military spending, the need to reduce the deficit has become very great. We cannot have it both ways; reduced government spending means reduced defense spending. Our present deficit situation cannot be resolved otherwise, as Washington Senator Slade Gorton states, "We simply can't get from here to there without a defense freeze."

The above actions of tough domestic program cuts, a reduction in defense spending, and a freeze of social security benefits could create a savings of up to $160 billion. After Congress has completed a thorough search for federal spending cuts, it will be time to turn to the responsibility of raising revenue.

New sources of revenue have to be found if the budget is ever to come closer to being balanced. I believe it is inevitable that taxes will have to go up. Some well-structured changes in the tax rules will become necessary. President Reagan firmly states that a tax increase need not be a part of the deficit reduction plan. The American economy has reached a critical point, though; and what we want may be in contradiction to what we need to do. Taxes, as a source of revenue, will not be used until all the loopholes can be closed by a simplified tax program. There is much talk, and perhaps much need, about and for new taxes; but there is poor probability of any action soon. Are we shirking yet another responsibility?

One possibility for an increased revenue is a proposed 5 percent tax on energy. This relatively small tax could produce, by the end of the decade, an annual $15 billion. Another way to increase revenue would be a tax that places an extra ten cents on each gallon of gasoline. This increase in price only offsets half of the twenty cents per gallon decline in price that has occurred over the past four years. A gasoline tax such as this would produce a revenue of approximatley $10 billion a year.

The Great Budget Battle of 1985, a political battle, has begun. Characteristic of all battles, it will result with "winners" and "losers." The "losers" include the poor, middle-income families with children in elementary school through college, the elderly, federal workers and retirees, school systems and libraries, city dwellers, suburbanites, rural residents, farmers, veterans, subway riders, Amtrak passengers, small businesses, and the list goes on until each and every one of us is included. This battle will cause pain, but a pain that must be endured. A loss of benefits for each of the above mentioned groups is small in comparison to the losses that would be caused by the destruction of our economy. "It's a burden on future generations," says Jack Albertines, president of the American Business Conference in Washington, D.C. "If deficits are not reduced, we will leave our children with a legacy of high taxes, reduced federal services, and slower growth."

The deficit problem cannot be solved overnight. Gradually, though, with the response of the people, the ugly deficit can be controlled, and our children can continue to live prosperously. "I am proud of the state of the economy," President Reagan declares. The President and all Americans do indeed have the right to be proud of the present economy. What Americans don't realize is that while the present seems comfortable, the future economy could be destroyed because of the irresponsibility surrounding the national debt. We, the people of the United States, need to take the above actions to cure the ills caused by years of fiscal irresponsibility.

AIR POLLUTION AND ACID RAIN

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1985

Mrs. LLOYD. Mr. Speaker, and Members, I would like to call your attention to a recent editorial appearing in Science magazine entitled, "Air Pollution and Acid Rain." In this editorial, Philip Abelson gives an excellent sketch of the direction of our evolving understanding of the complex chemistry associated with acid rain—a phenomenon which has been popularly perceived almost entirely in the context of sulfur emissions from the combustion of coal. In his comments on ongoing research, Abelson points out the increasing refinement this work is providing in demonstrating the importance of NO_x emissions and ozone, both as significant pollutants in their own right and because of their key roles in the overall atmospheric chemistry associated with deleterious effects. As he notes, this emerging picture seriously questions the effectiveness of an acid rain control strategy which focuses exclusively on limiting the SO_x emissions from coal-fired electric utility plants.

In the past, many of us have joined in opposing an immediate mandate for such a simplistic strategy and instead have vigorously supported the accelerated assessment program whose benefits, in terms of improved understanding of critical acid rain phenomena, are now beginning to be realized. While this understanding is still far from complete, it is clear that our improved knowledge already suggests the possibility of more effective avenues for addressing this issue than by the imposition of costly SO_x controls on coal-fired boilers as has been prematurely proposed as a solution to the acid rain problem. It is my opinion that only continued research can proivde the crucial guidance necessary for developing a balanced and affordable strategy for acid rain abatement.

The effectiveness of an acid rain control strategy will necessarily be dictated by the degree to which it recognizes the effects of all relevant pollutants and all sources in balancing the benefits of given levels of emissions control against the cost of achieving those levels. I am confident that the current research will ultimately provide a firm basis for such an assessment.

I recommend Dr. Abelson's editorial to all Members as an authoritative and balanced perspective on these issues.

[From Science Magazine, Nov. 8, 1985]

AIR POLLUTION AND ACID RAIN

(By Philip H. Abelson)

Research being conducted on air pollution and acid rain is leading to a changing picture of the relative importance of SO_2 and NO_x. Political and regulatory efforts have been focused on sulfur oxides because they produced about twice as much acid as NO_x. However, that emphasis disregards the role of NO_x in the formation of toxic photochemical oxidants. Controlled studies at experimental facilities and observations in the field have identified effects of ozone and NO_x as more damaging to vegetation than SO_2 alone.

In sunlight a complex series of reactions occurs in the troposphere, including photolysis of NO_2 to produce excited atomic oxygen and thence ozone. Additional reactive species formed include hydrogen peroxide, methyl hydroperoxide, peroxyacetic acid, and reactive free radicals, including OH, NO_3 and HO_2. Maxima in the amounts of these species usually occur between 9:00 a.m. and 4:00 p.m. in midsummer. Monitoring has revealed considerable variability in concentrations of the oxidizing pollutants related to abundance of the input substances. Some oxone may be present that originates in the stratosphere.

It has been know that SO_2, NO_x and O_3 can have toxic effects on plants. In the early days, experiments tended to be performed "scientifically"; that is, plants were exposed in chambers in which the chemicals were tested one at a time. Under those circumstances, it was noted that concentrations of SO_2 and NO_2 greater than ambient were required to produce notable pathology.

Indeed, low concentrations of NO_2 were sometimes beneficial (perhaps a fertilizer effect). However, in the real world, pollutants are present together. When experiments were conducted with ambient midday levels of ozone present (for example, 50 to 100 parts per billion), toxicity was noted. When the ozone was supplemented with NO_2, there was usually a substantial additional toxicity attributable to NO_2. Similar results were noted when ozone was supplemented with SO_2.

The deleterious effects of ozone on agricultural crops has been documented and analyzed in a report issued by the Environmental Protection Agency. It is estimated that a reduction in ambient ozone levels of 25 percent would produce nearly $2 billion in benefits, while a 25 percent increase in ozone would lead to an additional $2.3 billion in crop losses.

The photochemical oxidants, particularly OH, have an important role in the oxidation of SO_2 leading to H_2SO_4. In the summer, with abundant OH present, the oxidation proceeds much more rapidly than in winter. Sulfur dioxide emissions in winter and summer are about the same, but the total deposition of sulfate in January and February at stations in northeastern states was found to be a third or less than what it was in midsummer. Deposition of nitrate showed little seasonal effect. Thus, at the critical time of the spring runoff, the contribution of nitric acid was about equivalent to that of sulfuric acid.

Initiatives to reduce acid rain tend to be centered on the electrical utilities and on their emissions of SO_2. When new coal-fired plants are built, they are required to include facilities for flue gas desulfurization. This adds substantially to the cost of the plant, decreases the efficiency of energy conversion to electricity, and diminishes overall reliability. While the process is effective in capturing SO_2, it is ineffective in removing NO. Any program aimed at reducing acid rain should take into consideration the total air pollution problem, including NO_x. Efforts to reduce SO_2 emissions should be accompanied by a corresponding emphasis on reducing NO_x, whatever the source. For the electrical utilities, this would mean providing more flexibility to use technologies that reduce both SO_2 and NO_x. But in addition, the other large contributors to NO_x, such as motor vehicles, should come under scrutiny.

REENGAGING IN GUATEMALA

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. BARNES. Mr. Speaker, we have been presented with a historic opportunity in Guatemala. Because of the election of Vinicio Cerezo to the Presidency, that unfortunate country has its first opportunity in a generation to insitute truly democratic government. And if Guatemala succeeds in developing a stable democracy that is responsive to its people, that will be the best possible guarantee of U.S. security in the area.

Whether President Cerezo and the Guatemalan people succeed in this historic endeavor will depend a great deal on the policies of the United States. There is an enormous danger that we will fail to understand that the crucial contribution that we must make is, above all, to give political support—and I emphasize the word "political"—to President Cerezo as he attempts to consolidate his power, exercise authority, and produce benefits for his people. "They—the military—will give us the office," he said at a news conference the other day. "We are going to have to recover the power." In doing so, President Cerezo will require the support of fellow democrates throughout the region and the world. But, as he also said at the news conference, "If you are a leftist you can get support, and if you are a rightist you can get support, but the hardest thing to get support for is democracy."

Mr. Speaker, there is a lot of talk of increasing aid to Guatemala, and I am for that. But we can double, triple, quadruple aid, but if we do not do it in a way that helps President Cerezo politically, it will do no good. An insightful editorial in today's Washington Post captured the importance of keeping "full solidarity with the democratic cause," and "taking—our—cues in these matter directly from Mr. Cerezo." There is going to be a temptation in the administration to punish Mr. Cerezo for failing to line up behind U.S. Nicaragua policy. But, as the Post correctly points out, "No direct support that Guatemala might conceivably lend to U.S. policy in Nicaragua could serve Americans more than stability within Guatemala itself."

I urge my colleages to pay careful attention to this editorial which follows:

REENGAGING IN GUATEMALA

Guatemala defies the common image of Central America as a place where nothing important happens without an American hand. On its own—true, with a viciousness that repelled the United States—Guatemala beat down a guerrilla challenge in the 1970s. Again on its own—and with a promise that is attracting the United States now—Guatemala is putting an elected civilian government atop the country's military-run power structure. The question is how the United States ought to reengage in this dominant Central American land.

The prime requirement is to keep full solidarity with the democratic cause. President-elect Vinicio Cerezo, 42, a man of courage and vision, won a huge popular mandate, and his Christian Democratic party controls the legislature. This gives him a foundation on which, necessarily by degrees, to assert the claims of democracy and law against a military unaccustomed to acknowledging either.

Some suggest the armed forces are ready to yield their traditional privileged but demeaning role as the far right's gendarme and to become a self-respecting professional army. But it's a long way from happening. The United States can help a bit by taking its cues in these matters directly from Mr. Cerezo—in particular, by deferring all talk of military and police aid until he indicates interest. In Washington this week, he put this matter off. The United States also needs to be responsive to Guatemala's economic needs. Brazil's drought, pushing up Guatemalan coffee prices, won't be enough.

The second requirement for Washington is to subordinate its concern about Nicaragua to the American interest in a democratic Guatemala. A country whose whole modern history was bent by the American-directed coup of 1954, Guatemala has pursued neutrality in Central America's raging conflicts. Mr. Cerezo visited Managua before coming to Washington. He looks to a policy of "active neutrality," a vague concept but one that the apparent eclipse of the Contadora process may leave a little room for. Guatemala shares no border with Nicaragua, feels beyond the reach of its guerrillas, and hopes to gain both in trade and in regional standing by keeping lines open to Managua. In any event, no direct support that Guatemala might conceivably lend to U.S. policy in Nicaragua could serve Americans more than stability within Guatemala itself.

Guatemala has been a metaphor for state violence. Four hundred members of Mr. Cerezo's party have been assassinated, and yet men and women like him are still willing to put their lives on the line. His election is a moment of rare potential to a country that desperately needs democracy and peace. The United States must help him, carefully, to use it well.

SOME WELL-DESERVED PRAISE FOR GUATEMALA'S DEMOCRATS

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. GARCIA. Mr. Speaker, today's Washington Post ran an editorial on Guatemala, saying that the recent election of Vinicio Cerezo, as that nation's President, "is a moment of rare potential."

In an article in yesterday's New York Times, reporter Stephen Kinzer called Guatemala's recent elections, "one of the most orderly * * * ever held in Central America."

All of this praise is not undeserved, nor should it go unnoticed. This is a historic opportunity for Guatemala, a chance to establish an authentic, indigenous democracy. Certainly, one election does not a democracy make. Nonetheless, Mr. Cerezo's victory is auspicious, if for no other reason than an honest election actually took place, and a popular political leader has been allowed to claim victory.

This is a tribute to Mr. Cerezo's tenacity and to the tenacity of those who have believed in the possibility of democracy taking root in Guatemala. Both the democrats in Guatemala and members of the staff at the Guatemalan Embassy in Washington have held on to that belief, asking over the past few difficult years only that others listen to them. They too must share in their new President's victory.

None of this is to say that suddenly all will be well in Guatemala, that the military will suddenly behave like the U.S. military, that the oligarchy will suddenly be open to taxation and land reform. It is only to say that this is an abertura, or opening, for those democrats in Guatemala who have never lost sight of or veered from their worthy purpose.

I am submitting the Post editorial and the Times article for the RECORD.

[From the Washington Post, Dec. 19, 1985]

REENGAGING IN GUATEMALA

Guatemala defies the common image of Central America as a place where nothing important happens without an American hand. On its own—true, with a vicousness that repelled the United States—Guatemala beat down a guerrilla challenge in the 1970s. Again on its own—and with a promise that is attracting the United States now—Guatemala is putting an elected civilian government atop the country's military-run power structure. The question is how the United States ought to reengage in this dominant Central American land.

The prime requirement is to keep full solidarity with the democratic cause. President-elect Vinicio Cerezo, 42, a man of courage and vision, won a huge popular mandate, and his Christian Democratic party controls the legislature. This gives him a foundation on which, necessarily by degrees, to assert the claims of democracy and law against a military unaccustomed to acknowledging either.

Some suggest the armed forces are ready to yield their traditional privileged but demeaning role as the far right's gendarme and to become a self-respecting professional army. But it's a long way from happening. The United States can help a bit by taking its cues in these matters directly from Mr. Cerezo—in particular, by deferring all talk of military and police aid until he indicates interest. In Washington this week, he put this matter off. The United States also needs to be responsive to Guatemala's economic needs. Brazil's drought, pushing up Guatemalan coffee prices, won't be enough.

The second requirement for Washington is to subordinate its concern about Nicaragua to the American interest in a democratic Guatemala. A country whose whole modern history was bent by the American-directed coup of 1954, Guatemala has pursued neutrality in Central America's raging conflicts. Mr. Cerezo visited Managua before coming to Washington. He looks to a policy of "active neutrality," a vague concept but one that the apparent eclipse of the Contadora process may leave a little room for. Guatemala shares no border with Nicaragua, feels beyond the reach of its guerrillas, and hopes to gain both in trade and in regional standing by keeping lines open to Managua. In any event, no direct support that Guatemala might conceivably lend to U.S. policy in Nicaragua could serve Americans more than stability within Guatemala itself.

Guatemala has been a metaphor for state violence. Four hundred members of Mr. Cerezo's party have been assassinated, and yet men and women like him are still willing to put their lives on the line. His election is a moment of rare potential to a country that desperately needs democracy and peace. The United States must help him, carefully, to use it well.

[From the New York Times, Dec. 18, 1985]

AFTER 30 YEARS, GUATEMALA TESTS DEMOCRACY

(By Stephen Kinzer)

GUATEMALA, Dec. 15.—Just five years ago, Francisco Villagrán Kramer resigned his post as Vice President of Guatemala and fled the country.

"Death or exile is the fate of those who fight for justice in Guatemala," he said at the time.

Today, Mr. Villagrán's apartment in the capital is a gathering place for young activists eager to discuss what the future holds for Guatemalan democracy. He himself is said to be a possible candidate to head the Supreme Court.

The military has run Guatemala for more than 30 years, and during that period Guatemalans have suffered some of the harshest repression in Latin America. Tens of thousands of people, many of them Indians descended from Mayan tribes, have died violently. During some periods, street-corner killings of students, businessmen, political organizers, university professors and trade unionists were common.

Yet Guatemalans elected a President last week in one of the most orderly elections ever held in Central America. They overwhelmingly chose an attractive young leader of the center-left Christian Democratic Party, Marco Vinicio Cerezo Arévalo, who has built his career on demands that the military return to their barracks and leave the task of governing to civilians.

The dramatic evolution of Guatemalan politics over the last three years, according to diplomats and other political analysts here, was the product of antimilitary sentiment that was becoming explosive and of the recognition by senior officers that the army was losing popular support.

The trend toward civilian governments in Latin America, which has all but eliminated rightist military dictatorships on the continent, was also said to have strongly, if belatedly influenced Guatemalan generals to call elections.

"What Guatemala is living through now is almost a miracle, and what a thrill it is," wrote a newspaper columnist who reflected the excitement many people felt after last week's election. "This process of being able to choose the candidate one prefers after a free election like we have never seen before, and of being sure that the one who wins will actually take over the presidency, is completely new to us, but we love it!"

There have been voices of caution amid the self-congratulations. The afternoon newspaper La Hora, which has been critical of the military, warned that the nation was facing "a long and slow process" in establishing democracy, but agreed that moderate optimism" was justifiable.

NEW CHORUS OF HISTORY

With Guatemala about to inaugurate a civilian President, only two Latin American countries, Paraguay and Chile, remain under the rule of rightwing generals. A decade ago, the group included the Dominican Republic, Honduras, El Salvador, Ecuador, Argentina, Bolivia, Uruguay and Brazil, all of which have since elected civilian governments.

"Beginning in 1983, there has been a new democratic opening in Guatemala," wrote Julio Godoy, one of the country's rising young political commentators, in a recent analysis.

"The opening was made necessary by the new chorus of history in Latin America," Mr. Godoy wrote. "Fascist military regimes have become unthinkable in the region, their basis eroded by their isolation from the people they sought to rule. Corruption and official crime turned them into violators of the very state of law they were supposed to represent.

For Guatemala, the darkest period of recent history was the regime of Gen. Fernando Remeo Lucas García, who held the presidency from 1978 to 1982. He was the third general in a row to have been chosen in elections generally considered fraudulent, and during his presidency political terror reached levels that drove many Guatemalans to despair for their country's future.

In 1982, General Lucas tried to impose his Defense Minister, Gen. Angel Aníbal Guevara, as President in yet another rigged election. But a group of young officers, sensing the level of public frustration and outrage, deposed General Lucas in March 1982 and declared the election results null. They named Efrain Ríos Montt, a retired general who had been cheated of the presidency in 1974, to head the Government.

General Ríos Montt pledged to hold free elections and in a step that was to prove decisive he called on law school deans and bar association officials to nominate 20 distinguished jurists for an electoral tribunal that would supervise the transition to democracy. From the list of 20, the Supreme Court chose 10—5 members and 5 alternates.

HERO OF ELECTORAL PROCESS

The tribunal's president, Arturo Herbruger Asturias, who had been Guatemala's Chief Justice during the civilian governments that ruled in the late 1940's and early 1950's, was to become one of the heroes of the electoral process.

"I took on the job as a kind of adventure," Mr. Herburger said. "We didn't know how serious Rios Montt was, but we decided at the beginning that we would all resign if anyone in power tried to obstruct our work."

General Rios Montt revealed himself as a religious visionary and something as an eccentric, and he alienated many officers with his moralistic crackdown on corruption. He also began to hint that he wanted to stay in power for many years before holding elections. On March 23, 1983, he was overthrown by his Defense Minister, Gen Oscar Mejia Victores, who as his first official act visited the electoral tribunal and pledged his full support for its plan to hold early elections.

"I think General Mejia was taking into account that the country was at a real turning point," Mr. Herbruger said in an interview. "He wants to leave a good name in the history books. I think he has been able to convince his comrades that their job is not to govern anymore."

In many ways, the Mejia Government was not unlike its predecessors. Political killings and kidnappings continued, many thousands of peasants were kept in protective villages, corruption was said to be rampant, and human rights and church workers reported continuing abuses in the countryside. But in his determination to allow free elections, General Mejia proved different from previous military leaders.

PRESSURE FROM ABROAD

The civilian adviser closest to the Mejia Government, Foreign Minister Fernando Andrade Diaz-Duran, said last week that General Mejia was very much affected by the continental trend toward democracy.

"Rios Montt was behaving like a Savonarola who wanted to burn all the sinners, and the officers were horrified when he started to say he would need seven or eight years in power to set the country right," Mr. Andrade said in an interview. "After Mejia took over and said he would call elections, people assumed he would support his own candidate and them impose him, as had been done in the past.

"But Mejia traveled a lot, and he was received by people like Alfonsin, Belisario, Felipe Gonzalez and de la Madrid," said Mr. Andrade, referring to the elected leaders of Argentina, Colombia, Spain and Mexico.

"They treated him like a statesman and impressed upon him what a historic responsibility he had. It made a great impact on him.

The trend toward democracy in Latin America, which began in the mid-1970's, was the product of various factors, including public discontent, economic crisis and international pressure.

"You can't discount the contribution of Jimmy Carter while he was President," said Edgar Ponce Villela, a political activist who ran for Mayor of the capital city in municipal elections last month. "Carter was very firm against dictatorships, and he helped to set this process in motion."

NICARAGUAN INFLUENCE FEARED

Mr. Ponce said the consolidation of a leftist regime in nearby Nicaragua has also contributed to fears among some Guatemalan officers that if they refused to allow a transition to democracy, Marxist revolutionaries aligned with Nicaragua might grow in strength here.

Guatemalans voted for a constituent assembly in July 1984 and the election went remarkably smoothly. But twice this year, once in April and again in September, right-wing politicians linked to entrenched business interests tried unsuccessfully to seize power and disrupt the political process.

"The most serious attempt was in April, when there was street violence protesting new tax laws," Mr. Andrade recalled: "These groups actually reached the point of appealing to certain commanders to join them in a coup, but the commanders remained loyal to Mejía."

General Mejía has been traveling to military bases in all parts of the country to meet with officers. This weekend he was at bases in the eastern provinces of Zacapa and Jutiapa. Aides said he was urging his men to support the incoming Government.

"Let us hope the army never again has to participate in rescue actions because of problems in the government," the general said at a news conference after last week's election. Some took his choice of words to imply a warning that the military was not abandoning politics altogether.

GENERAL TO RETIRE

General Mejía will automatically pass into retirement when he turns power over to Mr. Cerezo on Jan. 14.

Mr. Cerezo has warned repeatedly that there will be constraints on his freedom to act. Diplomats say there are certain steps, such as beginning broad prosecutions of officers implicated in human rights abuses, that the army might view as provocative.

"There are groups in this country which are insatiable," said Mr. Andrade. "No one can assume anything, but I myself doubt there will be any adventure by the military."

Diplomats in Guatemala had high praise last week for the efficiency of the electoral process, and expressed guarded hope for the country's future.

SECURITY COUNCIL RESOLUTION ON HOSTAGE-TAKING

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. YATRON. Mr. Speaker, it is with special pride that I join in the chorus of praise for the outstanding work done by our colleagues, the Honorable DANTE B. FASCELL, chairman of the House Foreign Affairs Committee, and the Honorable DAN MICA, chairman of the Subcommittee on International Operations, in mobilizing the international community against terrorism and the taking of innocent hostages.

Their action in this cause resulted yesterday in a historic vote by the United Nations Security Council to unanimously condemn hostage-taking, which follows the recent action on a resolution voted unanimously by the United Nations General Assembly which condemns all acts of terrorism wherever they are committed and by whomever. Our U.N. Ambassador, Vernon Walters, credited our two colleagues with the success of this effort. He praised their initiatives and the meetings they arranged with the representatives of 36 member states for mobilizing the resolve of the civilized nations to condemn such criminal acts.

I certainly share Ambassador Walters' appreciation of their great work, and I have inserted the full text of the Ambassador's statement and resolution as well.

STATEMENT BY AMBASSADOR VERNON A. WALTERS

We are extremely pleased that the Security Council has unanimously gone on record in condemning all acts of hostage-taking. This is a historic step, almost without precedent in the entire 40 years of the United Nations. This resolution reflects positively on the United Nations organization; it is an act in which all members states can take pride. It is a fitting climax to this important 40th Anniversary year of the United Nations.

By condemning unequivocally all acts of hostage-taking, the Security Council has clearly stated the world community's abhorrence of such criminal acts. We can only hope that all states, all parties, that have any influence over groups now holding hostages, will take to heart today's clear and unanimous message and work for the immediate and safe release of all hostages, wherever and by whomever held.

We also hope that this Security Council resolution bodes well for improved cooperation between and among states, an essential condition for combatting terrorism. Only by concerted worldwide action can we hope to put an end to the repugnant practice of hostage-taking. It is clear from the resolution that no "cause," no "excuses," can justify such threats to human rights and human lives.

My government fully supports the Security Council's call for all states to consider, promptly and favorably, becoming parties to the International Convention Against the Taking of Hostages and other related international conventions. The United States will continue its efforts to have the world community adopt additional effective measures to protect the innocent lives of all people. As recent history has so sadly proven, international terrorism knows no boundaries.

Today's resolution re-inforces the October 9 Security Council statement on terrorism and the December 9 General Assembly resolution condemning all acts of terrorism. Together, these texts place the entire United Nations firmly on record against all terrorist crimes. While we cannot expect the lunatic fringe to desist from such acts, we do expect all law-abiding states to take all practicable measures to prevent terrorism, and to prosecute and punish all terrorists, wherever they are, in the spirit of these clear statements by the United Nations.

The United States is proud of its leadership role in today's action by the Security Council. It could not have been done without the broad support of all Security Council members which represent every sector of the globe. I thank my colleagues on the Council for the essential role they played with us in accomplishing this historic act. And let me pay special tribute to Congressman Dante Fascell, Chairman of the House Foreign Affairs Committee, and Congressman Daniel Mica, Chairman of the Subcommittee on International Operations and member of the U.S. Delegation to the 40th General Assembly, for their strong initiatives in the United States Congress and in meetings here at United Nations Headquarters toward this end. We look forward to concrete actions by all states to put into effect the resolution adopted today.

I cannot close without saying one word of thanks to my colleagues of all countries on the Security Council: The permanent members of the Security Council—China, France, the United Kingdom, the Soviet Union—for their help and cooperation in achieving this result today. Obviously, to achieve the kind of unanimous result which we achieved required a high degree of cooperation and work, work at all levels, work between the staffs of the representatives and the staffs from the non-permanent members, who also cooperated in making possible this quite extraordinary resolution passed unanimously in less than three minutes. Needless to say, a lot of work went before. But we were able to achieve the kind of agreement that enabled us this morning to produce this document, which I think represents the conscious of all mankind. Thank you.

TEXT OF U.N. SECURITY COUNCIL RESOLUTION PASSED UNANIMOUSLY DECEMBER 18

Deeply disturbed at the prevalence of incidents of hostage-taking and abduction, several of which are of protracted duration and have included loss of life;

Considering that the taking of hostages and abductions are offenses of grave concern to the international community, having severe adverse consequences for the rights of the victims and for the promotion of friendly relations and cooperation among states;

Recalling the statement of 9 October 1985 by the President of the Security Council (S/17554) resolutely condemning all acts of terrorism, including hostage-taking;

Recalling resolution 40/61 of December 11, 1985 of the General Assembly;

Bearing in mind the international convention against the taking of hostages adopted on 17 December 1979, the convention on the prevention and punishment of crimes against internationally protected persons, including diplomatic agents, the convention for the suppression of unlawful acts against the safety of civil aviation, the convention for the suppression of unlawful seizure of aircraft, and other relevant conventions.

1. Condemns unequivocally all acts of hostage-taking and abduction;

2. Calls for the immediate safe release of all hostages and abducted persons wherever and by whomever they are being held;

3. Affirms the obligation of all states in whose territory hostages or abducted persons are held urgently to take all appropriate measures to secure their safe release

and to prevent the commission of acts of hostage-taking and abduction in the future;

4. Appeals to all states that have not yet done so to consider the possibility of becoming parties to the international convention against the taking of hostages, convention on the prevention and punishment of crimes against internationally protected persons, including diplomatic agents, and other relevant conventions;

5. Urges the further development of international cooperation between states in devising and adopting effective measures which are in accordance with the rules of international law to facilitate the prevention, prosecution and punishment of all acts of hostage-taking and abduction as manifestations of international terrorism.

WHY I VOTE AGAINST GUN CONTROL

HON. JOHN R. KASICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. KASICH. Mr. Speaker, as the House continues to debate the gun control issue, I call to the attention of my colleagues an outstanding article from Outdoor Life entitled "Why I Vote Against Gun Control" by Congressman FRED ECKERT of New York.

I urge my colleagues and anyone else concerned with the gun control issue to take a few minutes to read this thoughtful article. Congressman ECKERT has written a clear and concise piece that uses commonsense reasoning to show why gun control does not work. If you read nothing else on gun control, I urge you to read this excellent piece

[From Outdoor Life, May 1982]

WHY I VOTE AGAINST GUN CONTROL

(By Fred J. Eckert, New York State Senator)

No, I'm not a gun nut. Sure, I do own one shotgun. Yes I do hunt—on opening day of deer season, sometimes the next day, on opening day of duck season and, once in a great while, I do some pheasant hunting. I never hunted until I was 22 years old, and I started mainly to be sociable with my wife's family. I didn't become interested enough in hunting to buy a gun of my own until I was 33 years old. I grew up in an urban area in a fairly liberal community. I am a native Northeasterner, reasonably well educated, and I collect books, not guns.

I make these points because hostile news media foster the inane notion that those who oppose gun control are pistol-packing fanatics with next to no brains while all crusaders for gun control are intelligent, sophisticated and reasonable.

Let me tell you something. Some of the least intelligent and unreasonable arguments I have come across in nine years as a state legislator were and are made by gun-control fanatics.

A lawmaker who opposes gun control? It must be because I live in fear of the "gun lobby." That's the usual (and simplistic) explanation. Can't hang that on me. In 1978, the National Rifle Association sent out a circular just before election day portraying me as sympathetic to gun control. I was re-elected with 67 percent of the vote. They were wrong—the NRA, not the voters—but the mistake was not caught until after election day. In 1980, the NRA correctly portrayed me as an opponent of gun control, I was re-elected again with 67 percent of the vote. The point is that gun control isn't a big issue in my district and the "gun lobby" isn't a potent political force here.

Now we can look at the real issue. And just what is the real issue? The gun-control zealots see the real issue as gun control; I see it as *crime* control. It's an important distinction.

The zealots would have the public believe that gun control and crime control are the same. It is this myth that makes gun control so attractive to liberal politicians, whose soft views on such real crime-control issues as capital punishment, stiffer sentences and preventive detention are so squarely at odds with the strong views of the public. Favoring gun control is their way of appearing tough on something they falsely label as crime-fighting.

In nine years as a state legislator, I have seen volumes of conflicting statistics, witnessed plenty of emotional outbursts and sat through hours of arguments—but I have yet to find any convincing evidence that gun-control laws ever have or could effectively curb crime.

Is there any convincing evidence that gun control laws curb crime?

There isn't. There are claims, arguments and speculation but not real evidence.

Let me share with you the arguments that I hear and my answers.

"We've got to do something!" That's the emotional plea. Any reasonable person can understand the anxiety caused by crime.

Isn't it awful that so many people are killed with guns in America? Of course it's awful.

Aren't you concerned about violence and crime? Of course I'm concerned about violence and crime.

Then do something! Pass a gun control law! Simple? No, it's simplistic. The stark reality is that the great bulk of crimes do not involve guns. For instance, guns are not involved in most burglaries, muggings or rapes.

Well, they sure are used in a lot of murders! True. But do you really believe that the kind of person who commits murder would hesitiate to obtain a gun illegally?

Am I saying that gun-control laws don't deter anyone from obtaining a gun? Not at all. They do deter some people. People like honest shopkeepers who have been repeatedly robbed by gun-carrying thugs; innocent people who fear for their lives and property and need a gun for security and protection. But gun-control laws do not deter nuts bent on assassination; dangerous terrorists or professional criminals and organized crime. Gun control is no threat to them.

They will always know how to obtain guns illegally. And it's a safe bet that they relish laws that make it more difficult for law-abiding citizens to obtain the protection a gun provides.

Senator, that's the "gun lobby" line. You should listen to the facts. Do you realize it is a proven fact that in many murders involving the use of a gun, the killer and the victim knew each other, that lots of them involve friends or relatives, that some of them are caused by lovers' quarrels? Don't you see that a lot of these spontaneous killings would be prevented if guns were not so readily available? Isn't that a good reason for gun control laws? No and no again. Why should we be surprised because many killers know their victims? Why should we assume that a murder was "spontaneous" rather than planned just because the killer knew the victim? Shouldn't we expect a killer to claim he didn't plan to kill his friend or relative or sweetheart? Would we expect a killer to ask for a stiffer sentence by admitting premeditation?

But crimes of passion do occur and some people do shoot people during a rage! Gun-control laws would stop some of this! The would-be killer would have time to cool off if a gun wasn't so handy!

I realize that some people temporarily lose control of themselves, and that they may cool off and not kill or harm if a weapon is not available. But that is not a case for gun control. It's a case for praying that no lethal weapon is handy. An enraged person does not care if he kills with a gun or a knife or a baseball bat or whatever. And you can't prevent such killings unless you can guarantee the absence of anything that could help him kill. That can't be done.

Senator, be reasonable! Certainly you must realize that controlling guns just has to help prevent killings and other crimes? When gun-control proponents are hard pressed, they invariably fall back on repeating this unsubstantiated claim in a way that suggests it is a self-evident truth. What does seem obvious to me is that gun-control laws do not control the criminal use of guns. If gun control works, how do you explain the extremely high rate of firearms killings and other crimes in a place that has had the most strict gun-control law and the most strict gun-control enforcement in the nation for decades—New York City?

You don't think New York City is a fair example? OK. What about Detroit, Boston, Washington, Los Angeles, Miami, Newark, St. Louis? They all have very strict gun laws. Yet each of these cities has an extremely high homicide rate and an extremely high robbery rate. If gun-control laws curb crime, how do you explain that?

They're big cities? Is that why? Then how is it that many other big cities that do not have strict gun control laws—Denver, Milwaukee, San Diego, Jacksonville—have considerably lower homicide and robbery rates?

You want proof that gun control works? Just compare us with some of the foreign countries. Fine. Go right ahead.

Great Britain has gun laws more strict than the strictest American laws. And the rate of violent crime involving firearms is far less in Great Britain than in the United States, right? If Great Britain has strict gun control and a low rate of violent crime involving firearms, and the United States has far less restrictive gun control and a higher rate of firearms violence, doesn't that tell us something? Sure, it tells us that England has fewer violent crimes involving firearms. Period. It makes no more sense to jump to the conclusion that Great Britain's lower rate of violent crime is caused by its strict gun-control laws than it would to believe that New York City has a higher rate of violent crime than Great Britain just because it has stricter gun laws.

There is absolutely no proof that Great Britain's lower rate of firearms violence is a result of its gun laws. It is far more reasonable to conclude that it is a result of cultural differences between Americans and Englishmen.

Oh, yeah, then how do you explain Japan? Japan has strict gun control and a far lower rate of firearms violence than we do. True, but, there is no evidence that the reason for the lower rate is gun control rather than cultural differences, just as the fact that the rate of firearms violence among Japa-

nese-American citizens is lower than the rate in Japan itself certainly does not prove that living in a country with less restrictive gun laws makes persons of Japanese descent even less prone to violence.

Both Great Britain and Japan, incidentally, have criminal justice systems that produce a significantly greater conviction rate than ours. Certainly that has to be considered a factor in their lower crime rates.

Senator, think! Doesn't it stand to reason that the more guns there are in private hands, the more gun-related crimes we are going to have? No. Gun-control advocates who like to point to the experiences of foreign countries should try explaining why the country with the highest per capita possession of guns in the world—Switzerland—has one of the lowest rates of violent crime. Israel, too, has extremely high per capita possession of firearms and a very low rate of violent crime. Despite the nearly universal availability of firearms in both Switzerland and Israel, those two countries have crime rates comparable to that of Great Britain.

Senator, at least admit that more and more people are buying guns and we are having more and more crime. Doesn't that mean something to you? Sure it does, but not what you think it means. I don't believe there is more and more crime because more and more people are buying guns. The reverse is true—more and more people are buying guns because they are scared by more and more crime.

What about the statistics? What about the studies? There are mountains of statistics and volumes of studies on the subject of gun control—much of it conflicting. I have ploughed through a great deal of it. My conclusion is that there are no statistics or studies to prove that the imposition of gun control can reduce the rate of violent crime. Indeed, the well-known Cambridge University study of the early 1970s concluded that gun-control laws have had no effect on the crime rate in Great Britain. And the University of Wisconsin study (1975) also concluded that ". . . gun control laws have no individual or collective effect in reducing the rate of violent crime."

What about the police? Isn't it true that many heads of law-enforcement agencies support gun control? Yes, just as true as it is that many of them *oppose* gun control. Neither the proponents nor the opponents of gun control can honestly claim that law-enforcement leaders stand squarely on their side. Look at Los Angeles, where the sheriff of Los Angeles County spoke out *for* gun control at the same time the chief of police of the City of Los Angeles was speaking out *against* it. If we want to cite law-enforcement leaders, why not point out that the superintendent of Scotland Yard has said that gun control in the United States is not practical.

How about this compromise? Let the people retain their ownership of guns, but let's secure all guns in safe places such as armories. The gun owners can check them out when they want to go hunting or target shooting. Next to the idiotic claim that gun owners are trying to prove their masculinity, the most foolish idea about guns is the push to round up thousands and thousands of guns and place them all in central loations where screwballs or terrorists could instantly acquire a massive arsenal that could be used against our ill-equipped police and a totally disarmed public!

Senator, are you going to stand there and say that gun control laws are not necessary? I am going to stand here and say that gun-control laws are futile and that they are totally impractical. They are only a minor inconvenience to the criminal and they are an unconstitutional infringement on the rights of law-abiding citizens.

Let's deal with the constitutional issue for a moment. The Constitution of the United States specifically states, in the Second Amendment, part of our Bill of Rights, that the right of the people to keep and bear arms shall not be infringed.

Senator, you know what the Second Amendment says! It says: "A well-regulated Militia being necessary to the security of a free State, the right of the people to keep and bear Arms shall not be infringed." Now certainly you know what that really means? Yes, I do. It means that the Founding Fathers deliberately withheld monopolistic power over firearms from the government as part of their brilliant system of checks and balances against excessive power in the hands of the government. The Second Amendment was conceived in order to preserve and protect our individual liberties.

No! No! All it means is that a militia—like the National Guard—can have guns. I think that if the Founding Fathers meant that, they would have said that. To them, the militia meant the people. I believe that they included the Second Amendment in the Bill of Rights as a check against domestic tyranny.

Even if I did not object on constitutional grounds, I would still oppose gun control because it is no more than a totally impractical illusion.

Do you know there are from 125 million to 200 million firearms in the United States today, depending on whose estimate you choose to believe? Anyone who honestly believes that we would have less violent crime if only guns were not so readily available has to believe in taking away 125 million to 200 million firearms from the citizens.

Generally speaking, gun-control proponents avoid saying that, but the views they hold logically compel them to take such a position sooner or later. How could we round up 125 million to 200 million firearms? It's impossible!

How much do you think it would cost for the government to buy up all the guns, even just all the handguns, in the country? Billions! Imagine the massive bureaucracy it would require. And who among us doubts for an instant that most guns would never be surrendered? No wonder the superintendent of Scotland Yard said that gun-control is just not practical in the United States!

Gun-control proponents usually fall back to a position that holds, in effect, that we can at least make a start by restricting possession of guns, or at least handguns, but their real long-range goal is to ban private possession of all firearms. That is a threat to individual liberty.

We know from experience and from common sense that gun-control laws don't work. We can make it impossible for the law-abiding citizen to obtain a gun, but there is no possible law that could prevent criminals from obtaining guns illegally. We can restrict cheap guns, but all that accomplishes is to increase the profits of gun dealers. We can ban short-barrel guns, but what's to prevent people from buying long-barrel guns and cutting them down? We could totally outlaw the manufacture of firearms in the United States, but that would simply create a massive gun-smuggling industry. We could severely restrict sale and possession of ammunition, but illicit ammunition makers would flourish.

Given the enormous number of firearms in private hands in the United States and the widespread support for the private ownership of firearms, real gun control in the United States today is about as practical as abolition of free speech.

I vote against gun control for three basic reasons:

(1) It is an unconstitutional infringement on a basic American right.

(2) There is no convincing evidence that gun control reduces crime.

(3) It is totally impractical.

Massachusaetts passed the kind of gun-control law that many of my colleagues tried to pass and are continuing to try to pass here in New York State. Their law imposes a minimum mandatory jail sentence for illegal possession of a handgun. The legislators who voted for these laws claimed they did so to fight crime. Interesting! Massachusetts did not impose a mandatory minimum sentence for armed robbery, burglary, rape, or even murder! Ask a gun-control proponent to explain that.

Crime—that's what we need to control. We need tougher crime-control laws, tougher courts and tougher corrections systems.

The answer to crime in America today isn't to take guns away from law-abiding citizens who feel a gun affords them protection. The answer is to put more criminals where they belong.

ESCALATION IN NICARAGUA

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. BARNES. Mr. Speaker, during the past several years many of us have lamented the fact that the Reagan administration seems determined to keep United States-Nicaraguan relations on a escalatory cycle. Our entreaties have not yet been successful in changing administration policy to one of seeking peaceful settlements in the region. But we must continue to speak out on this matter. I continue to hope that some way can be found to stop the escalation and seek peace.

In that spirit, I wish to share with my colleagues a recent column on the subject by the respected columnist of the Christian Science Monitor, Joseph C. Harsch. There is much calm wisdom in this column, in marked contrast to the administration's overheated rhetoric. I hope my colleagues will give Mr. Harsch's column their careful attention:

STRUGGLE FOR NICARAGUA: ESCALATION

According to the back files of the International Institute for Strategic Studies (IISS), there were 200 Cuban soldiers deployed in Nicaragua in 1981 when Ronald Reagan came to Washington and took over American foreign policy.

The number went to 1,000 in 1983 and then to 3,000 in 1984. The latest edition of the annual IISS report on "The Military Balance" again carries the figure of 3,000.

In other words, the presence of Cuban troops in Nicaragua in support of the present Sandinista government of Nicaragua is not new. But it climbed as the Reagan administration in Washington organized and deployed a counterrevolutionary

force against that Sandinista government in Nicaragua.

There was a flurry of excitement in Washington last week over those Cuban troops in Nicaragua. United States Assistant Secretary of State Elliott Abrams, testifying before a congressional committee on Dec. 5, said that the Cubans were, and had been for some time, taking part in combat. Surprisingly, he used the figure of 2,500 for Cubans in Nicaragua. Normally in such matters, United States government officials use the highest figure available, particularly when they want more money from Congress.

The flurry of renewed interest in the story of the United States vs. Nicaragua had started earlier in the week, on Monday, Dec. 2, when the U.S.-backed rebels, or "contras," successfully shot down a Soviet-built helicopter. The contras used a Soviet-built SA-7 guided missile for the shooting.

The Soviet SA-7 is a lightweight handheld anti-aircraft weapon. It has been deployed for over 10 years. It is widely used in the armed forces of the Soviet Union and its clients worldwide. Apparently it can be bought on the open market. The story offered in Washington of how the contras obtained a Soviet built SA-7 is that it was probably bought in Portugal.

The use of the SA-7 by the contras was apparently a shock to the Nicaraguans. Nicaraguan President Daniel Ortega Saavedra promptly denounced it as an act of "escalation."

That takes us back a ways. There has been steady escalation in and around Nicaragua for some time. It began with the 1981 decision of the Reagan administration to organize and mount an anti-Sandinista force. Deployment of that force in Honduras began in 1982. It reached its peak of effectiveness in mid-summer of 1984. At that time, contra raids penetrated within some 40 miles of the capital.

That phase of contra activity had been made possible by light planes capable of supplying the rebels well inside Nicaragua. They could, with supply by air, stay "inside" for days, even weeks at a time. But in war there is often a new answer to a new move.

The United States supplied the supply planes to the contras. The Soviets responded by sending helicopter gunships to the Sandinistas. Those gunships put the contras into a winter lull. Their supply planes fell easy victim to the Sandinista gunships. The contras have had a quiet season in which to regroup.

They were revived when Congress reluctantly authorized $27 million for "humanitarian" help. How "humanitarian" help got translated into Soviet SA-7 weapons is a story that lies hidden in that realm of action called covert in the current jargon of Washington. But obviously the SA-7s are an answer to the gunships.

So there has been steady escalation back and forth ever since 1982. The United States built the contra force. The Cubans sent 3,000 soldiers to help the Nicaraguans. The United States provided the contras with the capability of supply by air. The Soviets answered with gunships. The contras got SA-7s.

Where does it lead? U.S. Secretary of State George P. Shultz has gone off on a trip to Europe, leaving behind a hint that he might come back and ask Congress to provide overt United States military aid to the contras on the ground that the Cubans have escalated their role by going into combat with the Nicaraguans.

It begins to look as though the Sandinista regime in Nicaragua can be brought down only by actual overt use of U.S. troops. So long as United States aid is supposedly "clandestine" and "covert," it is possible for Moscow and Havana to countermove by a new move.

At some point, Mr. Reagan will probably either have to give up in Nicaragua or send in the United States Marines, plus a big chunk of the United States Army. The Sandinistas now have about 60,000 men under arms, with steadily improving training and equipment.

REDUCING FEDERAL SPENDING

HON. DICK CHENEY

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. CHENEY. Mr. Speaker, earlier this year, Mr. James Rouse of Saratoga, WY, came up with the idea of sponsoring an essay contest with cash prizes for the best essays on what the average citizen can do to reduce waste of the Government's money. Using his own money, Mr. Rouse paid $1,000 for the first prize, $500 for the second, and $250 for the third prize, to three young people in his community who researched and wrote essays on this important subject.

I am pleased today, Mr. Speaker, to submit for publication in the RECORD an essay entitled, "To Spend or Not To Spend?" by Miss Jennifer Justice of Encampment High School in Encampment, WY. Jennifer received $500 for her excellent work. I hope it serves as an inspiration to other young people to take an interest in the affairs of their Government.

TO SPEND OR NOT TO SPEND?

(By Jennifer Justice, Encampment High School, Encampment, WY)

We live in a time period that has been called the "Me Generation". The Eighties are an era in which people have come to realize the importance of personal incentive and the consequential profits. Unfortunately, this success can result in greed. This applies to the United States' government as well as individual citizens. By 1984, the U.S. government had built up a $184 billion deficit. There are three essential factors in reducing this incredible deficit: identification, information, and interest.

J. Peter Grace, prominent businessman and author of "Burning Money," a report on government waste, found in his recent research that nearly every governmental operation has an element resulting in waste and inefficiency. Grace claims that we can "'fix it' (excessive government spending) by identifying and eliminating that waste and inefficiency." Throughout his report, Grace identifies the problems with specific examples:

1. He tells of routine Social Security payments made to some 8,000 American people who are deceased.

2. Grace says that the Veteran's Administration spends twice as much per hospital bed and four times as much per nursing home bed as the private medical sector.

3. The Pentagon purchases 3-cent screws for $91, 25-cent compressor caps for $100, 9-cent batteries for $114, and 60-cent light bulbs for $511. The government pays $436 for a $7 hammer. A retired Air Force officer I know describes waste in the military. He tells the story of a large quantity of new street lights being buried at the base dump before an inspection. They were not listed on the inventory and therefore caused a problem. Two years later, a contest was held to get suggestions on how to light the missile complex parking lot at low cost. This officer turned in the suggestion to dig up the "unknown" streetlights. Not only did the officer win $100, the parking lot was lit entirely by the "problem" lamps. Had it not been for one scavenger officer, the government would have again succeeded in abusing taxpayers' money.

4. Repeatedly, we see absurd waste of the taxpayers' money. Federal travel expenses for 1984 were $4.8 billion. Had the government taken the time to centralize travel procurement and take advantage of large-business accounts, it would have saved taxpayers $984 million over a period of three years.

5. There are 4,000 military bases in the United States, but only 312 of them are considered significant; the rest are considered support facilities with less than 150 employees each. If efforts to close unecessary bases were successful, it would result in a potential savings of $2 billion per year.

6. The formula used to calculate food stamp benefits has not changed since 1971, though the American economy has. This results in $1 billion a year of taxpayers' money again being abused.

The abuse and waste goes on and on. Simply stated in the words of J. Peter Grace, "The problem is too much Federal spending, and neither ignoring it nor covering it up will make it go away."

The next factor in reducing government waste involves information. The problems lie in Federal operations. The information that is necessary for efficiency is usually inaccurate, out-of-date, unavailable, or incomplete. For the American people to really make a difference on the issue of government waste, they have to be informed as to how their government is spending their money. Unfortunately, usable data is hard to come by because of the lack of organization in the United States government. For instance, the Veterans' Administration pays $15 billion per year to six million claimants, and while they know that over $500 million is paid in error, they have no formal system to correct the problem and therefore the American people pay once more for the government's misuse of information. To truly make the American people aware of the huge waste of funds in the U.S. government, hence causing them to take steps to make a change in policy, careful study must be done on the subject of governmental waste and abuse. The citizens of the United States need to be familiar with the things taking place in their "democratic" government.

The third and final step toward reducing government waste is to peak the interest of the people. The United States government was founded on the democratic ideals; ideals that said that the people took a strong interest in their government and its operation. Grace calls for a "crusade of the people" to form a more efficient and productive government by forcing Congress to get rid of government waste and abuse. Congress is the key toward making these improvements because the legislature has the power to control spending. It is the American people who lose when the government misuses its finances. The people must show their concern for the future of America by demanding that their Congress waste less in its

functioning. Grace claims that one of the most important ways to do this is by requiring Congress to grant the President the item veto. Millions of dollars are wasted each year on "riders" attached to larger bills that the President has no control over without the item vote. This step starts with personal letters from the people.

Wyoming Congressman Dick Cheney said at a recent youth leadership seminar that one of the most effective ways to influence the government is to write personal letters to members of the Congress. Cheney stressed the significance in government, so the people should become personally involved and interested in the government of their country.

Identification, information, and interest; three important steps toward reducing government waste and abuse. The concerned citizens of the United States must first identify where the problem lies, become informed on the problem subjects, then act on what they know because of their genuine interest in the stability of the American government. If the question really is, "To spend or not to spend?", I choose not to spend and follow through by making a commitment to be a conscientious, well-informed voter, voting only for those politicians whom I have seen in action in events such as political forums, and who will recognize my concerns as a voter and taxpayer.

I commit myself to the task of writing my representatives to express those concerns. In the words of J. Peter Grace, "By taking action as an individual citizen, voter, and taxpayer, you reject the fashionable cynicism that says that the American democracy is no longer workable. We have the best, most envied form of government in the world. It is so, precisely because it does respond to the will of the people."

PROTECTIONISM COULD LEAD TO WORLD WAR III

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. FRENZEL. Mr. Speaker, a noted former professor of political science at the University of Minnesota and consultant to the well-respected Minnesota International Center, Mr. William C. Rogers, has written a short paper which paints a rather stark scenario on how passage of extreme protectionist bills, such as the textile bill, could lead to a major trade war that could actually result in isolation of the United States, a turn by our allies toward the Soviet Union and possibly the start of World War III.

I would recommend the paper to my colleagues as one worth reading.

PROTECTIONISM AND THE COMING OF WORLD WAR III

(By William C. Rogers)

For the last year the possible dire economic consequences of the current rise of protectionist pressures in the United States Congress have been trumpeted from the administration in Washington, from the media, and from practically every university economics department in the country. The message is: new barriers to U.S. imports would harm consumers, especially the poorest of our people, as well as hurt the economy of other countries including our allies and many recipients of American aid programs.

One example of this danger can be drawn from the textile bill passed by Congress. It is one of over 300 protectionist bills before Congress. Estimates are that each American textile job saved would cost our economy $42,000 for every $11,000 a year job saved. Lower income people would have to pay more for their clothes and would have less money to spend on other consumer goods, thus hurting industries such as agriculture and manufacturing. More serious, would be the inevitable retaliation from other countries injured by the proposed new barriers. Would they continue to be willing to buy U.S. products in these circumstances? Not if they could help it, we are told. Multiply the damage of the textile bill by 50 or 100 and the U.S. might find itself in the place it occupied in the 1930s when it had the dubious honor of having the highest tariffs in the world after Spain.

The Great Depression can be traced in a very direct way to the Smoot-Hawley Tariff of 1930, the highest in our history. It was signed by President Hoover to satisfy the demands of farmers and scores of industries which blamed "foreign devils" for their economic plight. Farmers who benefited from World War I food shortages which increased U.S. exports from $2.5 billion in 1913 to $8.2 billion in 1920, wanted the good days to continue. But after the war Europe began to grow its own food again and U.S. agriculture slumped. Far from helping, the new tariffs helped bring on a farm depression.

While the economic arguments against protectionism are fairly well known, against protectionism, a far more dangerous military argument against protectionism is seldom voiced. It must be faced, however. World War III could well result from a new tariff war. Bad as World War II was, it would be child's play compared to nuclear warfare. World War II had some of its deepest roots in the protectionism that developed in the 1920s and the 1930s and we shall suggest trade barriers could fuel World War III.[1] We will attempt to trace the relationship between protectionism and war as it worked in the past before examining the possible path from today's protectionism to tomorrow's disaster.

The years immediately before and after World War I are probably about as well known to most of us as the rise and fall of the Assyrian Empire. World War II is this generation's war. Yet the decade before 1914, when "the lights went out all over Europe," saw a great expansion and improvement in the world economy. Trade was very free and open as was the movement of people. The United States and Venezuela were among the few countries which even bothered with passports. The world banker was London and the British luxuriated in their vaunted free trade policy. The United States and Japan were becoming world powers. Unfortunately the search for military power and the rise of nationalism triumphed over the relatively harmless pursuit of profits. The Kaiser's Germany wanted her "place in the sun." The Czar's Russia was pursuing Pan Slavism. France wanted revenge for her 1870 humiliation and America happily isolationist and nearly disarmed after the Civil War was content to "twist the lion's tail" at election times while enjoying the open world economy, protected by the British Navy and our two oceans.

The period immediately after World War I saw a revival of high tariff policies among the victorious allies but most notably in the United States. High tariffs had been a fixture in the USA since after the Civil War when the cry was raised to protect our newly developed "infant industries." They were finally effectively opposed by Woodrow Wilson when he was elected. The needs of World War I made them obsolete. But after the war in 1920 the high tariff Republicans were in office again. According to Morrison and Commager's classic American history text, "Within a month of his accession to the Presidency, Harding announced "the urgency for an instant tariff cannot be too much emphasized."[2] Congress responded with the Emergency Tariff of 27 May, 1921, historically important because of its prohibitive agricultural schedules. "More important was the Fordney-McCumber Tariff of September, 1922, which established rates higher than ever before in our history. Duties on sugar, textiles, pig iron, rails, and chinaware were restored to the old Paine-Aldrich level while increases on toys, hardware, chemicals, dyes and lace ranged from 60-400%." The United States led the way to a protectionist world after the first world war. (Do these protectionist triumphs have a familiar ring to them? Sugar, textiles, and steel are certainly items that Congressmen in the 1980's are eager to protect once again).

Meanwhile, across the Pacific, Japan's military, which had been on the Allied side against Germany, was willing to give the newly developed Japanese business classes a try at governing. In a respite from its Samurai inspired military adventures, Japan gave peaceful economic growth a chance, but the going was hard. Britain was recovering from the War and passed an Empire Preference Trade Act in 1923. The U.S. fearing both the "yellow peril" of Japanese immigration and a flood of "cheap Japanese goods" enacted an humiliating Japanese exclusion act. The Japanese military fumed with anger but stayed confined to barracks, waiting and hoping that the business interests would fail in their peaceful commercial methods of improving the Japanese economy.[3] The army hoped to solve Japan's economic problems by conquest.

Violent reaction to the impact of protectionism across the Atlantic came from two militaristic demagogues in central Europe. Mussolini had triumphed in Italy in 1922 with his "March on Rome." He called for a new Roman Empire to meet Italy's economic needs. Adolph Hitler, frothing at the mouth in a prostrate Germany had launched his famous "beer hall pustch" in 1923 and ten years was Chancellor. Neither dictator had any faith in peaceful trade and commerce as a cure for their nations ills—quite the contrary. Hitler scorned the attempts of "bourgoise" leaders to restore Germany's economy after the war, and when they had nearly succeeded after the Locarno Pact and the first London Economic Conference he continued to demand "lebensraum" and "autarki" instead of a restored world economy. While the world economy was beginning to recover in the 1920's the Wall Street crash of 1929 gave powerful new support for the protectionist route. This tariff war eventually led to the seizure of power by military tyrants in Italy, Japan and Germany. The invasions of Manchuria, Ethiopia and Poland, and eventually the bombing of Pearl Harbor followed. If

[1] Some details about Annie Wilson and her run into Mexico have been altered to protect her anonymity.

the world had regained a free and open trading system after 1919, such as we have had for the last 40 years since World War II, there is a good chance World War II could have been prevented. And what does all of this have to do with today?[4] The Allies in 1945 were determined to avoid the economic disasters following World War I. The Bretton Woods Conference of 1944 established a new open world economic order which has made the world more prosperous than at anytime in history. But will it last?

The current alarming trade protectionist developments aimed by Congress at the Pacific Basin must remind us of the march of events which took Japan from being a peaceful trader in 1919 to taking the road to military conquest in 1931. American and European protectionism was a major cause of this tragedy.

What is the scenario by which protectionism could lead to World War III? The Soviet Union's main objective since the end of World War II has been to split the United States from its allies in Europe and from Japan. This would isolate the United States and make the Soviet Union the dominant world power. Would Soviet world hegemony lead to world peace? Some might hope so, but most would doubt it. A recent issue of the Naval Institute "Proceedings" examines the possible American military response to such a Soviet triumph in the Pacific.[5] Some may reply that this is a typical militaristic Pentagon response to an imaginery threat used as a ploy to gain bigger appropriations, yet a trade war which would cause Japan's standard of living to drop precipitously could cause her to look elsewhere than to America and Europe for economic salvation. For a long time the Russians have been wanting technical help to develop Siberia. They could get it from Japan. China, of course, remains a natural market for Japan and indeed is a large trading partner already. An arrangement of this sort would be on China's terms now, unlike the period of Japanese dominance ending in 1945. The potential of a Japanese-Chinese-Russian relationship in the Pacific should be a cause of apprehension in California at least! (See Edwin P. Hoyt's new book "The Militarists: The Rise of Japanese Militarism Since WWII" for just such a scenario).

Even more alarming than the possibility of losing our strongest and oldest ally in the Pacific is the damage we may be doing to a new friend in the area—China. Singapore Prime Minister Lee Kuan Yew spelled it out in an October 1985 speech to a joint session of Congress. He said "China is seeking growth through trade, not territorial aggrandizement . . . For nearly 30 years . . . China was a ceaseless spoiler of other countries' economic plans as she undermined their stability. She was an exporter of revolution". He pointed out that China had reduced her army by one million men to take advantage of trade with the West. He then asked "Is America willing to write off the peaceful and constructive developments of the last 40 years that she has made possible . . . when she has nearly won this contest for the hearts and minds of the Third World?"

And what about Europe? Europe in modern times has always lived on exports. Without being to able to sell to America she would have difficulty buying many of the things that are necessary for her standard of living. Again Russia and Eastern Europe beckon as a market place of last resort, again on Communist terms. Much has been written over the years about the possible "Finlandization" of Europe. A trade war would certainly make this much more of a possibility. If the Europeans were faced with the possibility of maintaining their own defenses and their own economies without the participation of the United States and with a loss of our trade there would certainly be a temptation to neutrality. A Soviet offer for a united and disarmed Germany might under these conditions have great appeal.

A growth in anti-Americanism would feed nationalism and its twin brother militarism in the Third World where the impact of a protectionist America can only be imagined. If Cuba and Nicaragua are a problem now, what would be the effect on the rest of Central America and Mexico of a new America protectionist wall?

The bogey man of world communism has been used to explain many excesses of U.S. foreign policy, but in a protectionist world it is reasonably clear which of the two super powers would benefit the most. The Soviets have lived with protectionism since the Stalin years. Their market has been virtually closed to the world for 50 years and they now have learned to live with this situation.

Would the United States accept a Soviet dominated world without resistance? Certainly the "Fortress America" concept of former President Hoover would have overwhelming support. The Strategic Defense Initiative would also be looked to for salvation. But would a purely defensive posture be acceptable to the American people even when faced with Armageddon? Would not some incident or groups of incidents trigger small armed conflicts before this scenario of "America Isolated" came to pass? With American troops in Europe and our navy in the Pacific, would we stand by as one former ally after another was absorbed willingly or unwillingly into the Soviet sphere of influence? The fate of the 300 protectionist bills in the U.S. Congress may hold the answer to the question which we failed to ask ourselves in the 1930s—"can protectionism lead to war"?

CHRONOLOGY

1921—"Emergency Tariff" in U.S.A.
1920's—Victorious allies raise tariffs.
1922—U.S. Fordney-McCumber Tariff.
1923—British Imperial Preference Act.
1924—End of rise of PW Trade barriers (Kirk and Sharp, Contemporary Politics, 1940).
1925—Locarno Pact.
1927—French-German commercial treaty.
1927—League of Nations International Economic Conference report ("excellent but not adapted").
1928—French troops leave Rhine.
1929—Midsummer "extremely promising"—U.S. German Young Plan.
1929—October—Wall Street crash.
1930—London Economic Conference I—moratorium.
1930—Smoot-Hawley Tariff Act passes.
1931—Manchuria invaded by Japan.
1933—Hitler becomes Chancellor.
1934—London Economic Conference failure partly due to U.S.'s refusal to cooperate.
1934—Ethiopian invasion by Italy.
1936—Italy, Japan and Germany in Anti Comintern Pact against USSR.
1936—German troops in Rhineland.
1941—Pearl Harbor.
1944—Bretton Woods Conference establishing Bank and Fund and new post-World War 11 open world economic order.
1945—Surrender of Axis Powers.
1985—300 protectionist bills before Congress.

FOOTNOTES

[1] Of course there is a case for "the level playing field" approach to selective protectionism. Other countries take advantage of America with their own trade barriers. The Reagan Administration has a new and aggressive policy to "even the tile" although some say it is mainly for show to stop the protectionist excesses of the Congress. The arguments for protecting our basic industries voiced by the AFL-CIO in strident terms is less convincing. (See any issue of "AFL-CIO NEWS" 815 16th Street, Washington, D.C. 20006).

[3] Shigenori, Togo, The Cause of Japan, Simon and Schuster, (1956) New York, N.Y. "Already in the years 1918 and 1932—the 'period of normal government'—three premiers and assorted other public figures had met death by violence" and by 1931 "any who opposed aggrandizement and militarism were stigmatized as "corrupt politicans" or "selfish financial magnates," who must be silenced."

[4] In the modern age, few if any wars have been fought for purely economic reasons, Marxist explanations to the contrary. Wars are fought for many reasons. Chief among them in contemporary times has been nationalism and ideology. Nevertheless, economic reasons have been used to justify armed conflict and real and genuine economic injustices and hardships which can be used to justify acts of force. (See Quincy Wright, A Study of War, for a definitive treatment of the causes of war). Other factors and fancies used by the Axis powers to gain power and mobilize public opinion for war included the desire for revenge, fear of Communism, racial hatred, "Socialism," and "population pressures." On this last point, the Japanese military complained that a nation of 75 million in 1930 could not exist without colonies. Now Japan has 100 million people living in astonishing prosperity.

[5] Proceedings," U.S. Naval Institute, August, 1985. The first article states "The Soviets have increased the size of their Pacific Ocean Fleet by more than 50 ships and submarines since 1983." Other articles deal with Japan, Oceania, New Zealand, Southeast Asia, Guam and the Pacific Coast. It warns of a world in which U.S. influence is not felt past the mid-Pacific.

NATIONAL ASSOCIATION OF HOUSING COOPERATIVES

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. HAWKINS. Mr. Speaker, nearly 500 housing cooperators from around the Nation convened in my city of Los Angeles to hold the 25th Annual Conference of the National Association of Housing Cooperatives, October 16–20. The theme of the conference was "a celebration of knowledge and experience."

Housing cooperatives are the cornerstone of providing economic democracy to our Nation, affordable, nonprofit, housing ownership. NAHC is the primary professional and consumer association for housing cooperatives in the United States. NAHC members share a belief in the principles of cooperative enterprise, and a dedication to the interests of cooperative housing communities.

NAHC's annual conference consisted of 3 days of intensive workshops designed to improve the operation and quality of life of housing cooperatives. Among the 34 workshops were such interesting subjects as cooperatives for the elderly, crisis in commercial insurance, disaster planning and recov-

ery, newsletters for your co-op, and energy conservation and rehabilitation.

At the NAHC annual meeting, members of the board of directors were elected or re-elected. These were: Charles Flannagan of Brooklyn, OH; Peter Merrill of Portland, ME; Paul Fisher of Bronx, NY; Roger Willcox of Norwalk, CT; and Lydia Joseph of Sausalito, CA. At the board of directors organizing meeting the following officers were elected: chairman emeritus, Charles Rappaport of Queens, NY; president emeritus, Roger Willcox; chairman, Marlene Cooper, Atlanta, GA; president, Herbert H. Fisher of Chicago, IL; executive vice president, Terry Lewis of Ann Arbor, MI; treasurer, Paul Fisher, secretary, Dean McKennon of Beverly, MA; immediate past president, Lydia Joseph, and members of the executive committee, Bill Magee of Chicago, IL and Kenneth Mordaunt of Brooklyn, NY.

Mr. Speaker, the keynote speech at the NAHC annual conference was delivered by the association's president, Herbert H. Fisher, a Chicago attorney. In his address he stated:

NAHC exists to serve, to provide leadership and to maintain integrity in today's cooperative housing market based upon the interests of the housing cooperators and their need and desire for decent housing operated on a democratic basis.

I commend Mr. Fisher's keynote speech to my colleagues, for it contains many words of wisdom.

KEYNOTE SPEECH (EXCERPTS), BY HERBERT H. FISHER, PRESIDENT, NATIONAL ASSOCIATION OF HOUSING COOPERATIVES

It is with utmost pleasure, pride and satisfaction that I am called upon to welcome you to this 25th Annual Conference of the National Association of Housing Cooperatives being held in this, its 35th year of organizational existence.

It is only with recognition of the significant contributions of those who have served this organization and the housing cooperative community of our Nation in the past, both housing cooperators and professionals serving housing cooperatives, many still making their contributions, that we are today able—without reservation and with legitimate recognition—engage in a "A Celebration of Knowledge and Experience" the theme of this Conference.

There is no place else in this country that anyone interested in housing cooperatives or needing information or support can turn for reliable knowledge and experience than to the National Association of Housing Cooperatives and its members.

NAHC exists to serve, to provide leadership and to maintain integrity in today's cooperative housing market based upon the interests of the housing cooperators and their need and desire for decent housing operated on a democratic basis. NAHC is dedicated to that service and to the protection of those interests—protection of housing cooperatives and you, their cooperators—present and future. As was the slogan of the labor movement of the 30's—"In Unity There is Strength", we must face the future with such strength as comes from our unity. We must soothe dissesion and avoid disunity by common and mutual efforts.

Also, with pride I can review what we have accomplished during the past year—since our most successful conference in Boston. We have contributed 4 NAHC members to the National Cooperative Bank Board. We have called our member's attention to the eligibility of GNMA certificates as investment vehicles. We have called attention to pending legislation which would require housing cooperatives to report the pass-through of mortgage interest. We warned of content in the FNMA drafted recognition agreements used by the Share Loan Service Corporation. We have sought to contribute to housing cooperatives generally by offering a definition for housing cooperatives. We have allied ourselves with the Low Income Coalition to find a solution to our Nation's housing problems. We co-sponsored with the Cooperative Housing Foundation a dinner in recognition of attendees at the International Cooperative Alliance Meeting in Washington, DC. We reinstituted our Cooperative Housing Newsletter competition. We made input into HUD's evolvement of Section 203 (n) (insured share loan program) regulations. We are seeking a definition or allowable expenses for Board functioning, conference attendance and education which all HUD offices will recognize. We published Alex Miller's work on Marketing Cooperative Memberships. We perpetuated the memory of Jerry Voorhis by continuing the Jerry Voorhis Award. We reminded cooperatives of the increased penalties for failing to provide 1099 forms for non-employees doing contracted work for the cooperative and if patronage dividends of over $10 are declared. We also got our Cooperative Housing Bulletin back on a regular bi-monthly publication and distribution schedule.

Of greater long term significance is our having reinstituted the publication of the Cooperative Housing Journal after a few years of suspended publication. We are proud of that accomplishment in reducing to writing our Knowledge and Experience into articles of lasting value for leaders of housing cooperatives—and for the entire membership.

In a most important legislative activity, NAHC took the initiative, not to dictate, but to secure the consensus upon which we can eventually defeat threatening Federal Legislation and secure the modernization of Section 216 of the Internal Revenue Code through which housing cooperatives pass through the Cooperative's mortgage interest and real estate tax expense to their cooperators' individual tax returns.

It is only NAHC, together with its affiliated associations, which is trying to find a solution to the attempts of IRS to tax reserve interest income under Section 277 of the Internal Revenue Code.

You have all proven you can survive against the most adverse economic conditions to be imposed upon housing—inflation, unemployment, utility and fuel costs escalating, increasing employee wage levels, and even internal member/shareholder dissension. Your cooperatives remain as bastions of democratic economic entities providing safe, sanitary and decent housing for your member/shareholders. You are now being asked to look outward and truly join with other housing cooperatives and their housing cooperators to fight some common battles which transcend whether or not you are a cooperative related to HUD programs or not; whether you provide housing for upper income families or for families of modest incomes; whether you are located in suburban dales or in inner city canyons.

The Internal Revenue Service and proposed changes in the Internal Revenue Code now threaten all of us. Low and moderate income families, who may not now be concerned about reserve income being taxed or about the pass through of the cooperative's real estate tax and interest expense on individual cooperator's tax returns, may be facing the day when now depleted reserves are replenished or when economic integration of their cooperatives may be their only chance at survival; or the upwardly mobile member/shareholders may desire, to remain in the cooperative and are willing to pay surcharges in order to do so because of the pass through of deductions to their own individual tax returns. Cooperatives with Section 8 contracts must plan for the day those Housing Assistance Payments contracts will expire.

Cooperators must recognize that we must all work to finding a solution to our Nation's ignored housing problems to avoid cooperatives from becoming fortresses striving to survive against the onslaughts of the housing disadvantaged. All cooperators must support NAHC's effort to find solutions, cooperative or otherwise, to the housing shortage facing the majority of our nation—a shortage due to the lack of affordable housing available today.

It is only NAHC, knowing the increased educational needs of housing cooperatives and of groups seeking to create housing cooperatives for individually tailored educational and training programs, which has in place training programs in Los Angeles and Philadelphia. We have the knowledge and experience with our own expanding resources, together with our membership and our regional associations, to do what is needed.

DICK SULLIVAN

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. HOWARD. Mr. Speaker, Members of Congress often rise to recognize an act of bravery, eulogize a patriotic constituent or pay tribute to the heroic or unselfish acts of good samaritans. But all too often, we overlook the heroes with whom we work every day.

We owe a great debt of gratitude to the individuals who staff our personal offices and the committees on which we serve. These public servants do much of the work in this institution but get little of the recognition.

For 29 years, the Public Works and Transportation Committee has benefited from the loyal and enlightened leadership of its chief counsel, Dick Sullivan. Five full committee chairmen before me relied on Mr. Sullivan's sound advice to steer landmark legislation through hearings, markups, floor debate, and often arduous conferences. Dick Sullivan has never shrunk from a showdown and is always eager and willing to defend the jurisdiction of the Public Works and Transportation Committee.

The phrase, "fiercely loyal" was never more appropriately applied than to describe Dick Sullivan. He has been loyal to his staff and to me without exception, he

has been loyal to Congress and its traditions and he has been loyal to our country.

It is for these reasons that I would like to share the attached Wall Street Journal article which provides a rare and I think, accurate, insight into Dick Sullivan as a man and as a great professional. The article follows:

[From the Wall Street Journal, Dec. 12, 1985]

A CHANGING CONGRESS IS SHOWN BY STORIES OF TWO STAFF MEMBERS

(By David Rogers)

WASHINGTON. Richard J. Sullivan remembers Jack Benny at New York's palace theater, the Ninth Infantry in World War II and the old Bronx Democratic machine. "I survived Cathopic School," reads a sign on his cluttered desk.

James D. Bond's war was Vietnam; his home, North Dakota. From the first came a certain fatalism; from the second, a Midwest Republican loyalty nurtured by his late grandfather, a Fargo newspaper publisher. "I believe in burning communist crops," he jokes, puffing on a Cuban cigar.

Generations apart, Mr. Sullivan and Mr. Bond symbolize two eras of Congress.

As the veteran counsel to the House Public Works Committee, the 68-year-old Mr. Sullivan reached the zenith of his power during a period when ambitious legislation—for public works or social policy—was Washington's agenda. Today, though, times are tougher for Mr. Sullivan; and it is the 40-year-old Mr. Bond, clerk to the Senate Appropriations subcommittee for foreign operations, who is ascendant. He is a creature of leaner times; the limits on resources in recent years have given his panel extraordinary clout because of its power to allocate those resources.

The Gramm-Rudman budget bill, that Congress passed last night, both dramatizes and accelerates the change in political eras. With its progressively lower deficit targets and mandatory spending cuts, the measure assures that limited resources will be the reality for the foreseeable future. And if Mr. Sullivan represents an era that said "yes," Mr. Bond's job more often is to say "no."

SHIFTING POWER

Together, the two men offer an unusual portrait of a changing Congress in the age of deficit politics. Their story shows how power within the institution has shifted—from the authorizing committees that set policy to the appropriations committees that control the purse strings, and from a generation of builders to one of budgeteers.

On a more personal level, a close look at the two men offers a glimpse of the little-known world of House and Senate staffers, men and women who both influence power and are its instruments.

White-haired and irascible, Dick Sullivan is the model of an urban, ethnic Democrat. His expansive style matches his view of an activist New Deal government. In nearly three decades as chief counsel, he has served six chairmen; with his gruff, theatrical manner, he has dominated the panel as few staff members ever have.

Says Frederick Salvucci, Massachusetts' transportation secretary, who has sometimes dealt with Mr. Sullivan: "This guy could be called a committee staffer, but I wish to hell he was a senator. He is a guy who has been around a long time and believes in public investment."

Mr. Sullivan's committee career stretches back to 1957, corresponding with the period in which landmark highway, water and environmental legislation was enacted. Those years of federal commitment and largess suited not only Mr. Sullivan's own political skills but also the ambitions of influential members.

SIGN OF THE TIMES

Today, however, the committee must struggle simply to protect its basic jurisdiction, let alone initiate huge new projects. A pending water bill, for instance, would mark the first major authorization of new projects in a decade. Another sign of the times: neither Public Works Chairman James Howard, a New Jersey Democrat, nor any other chairman of a major authorizing committee could initially get a seat on the House-Senate conference on the Gramm-Rudman bill.

Mr. Sullivan "is one of the finest politicians I know, but in a sense he is out of style," says George Mead, a North American Van Lines lobbyist. "When you can't get big highway and water legislation through. Dick doesn't know what to do."

The son of a New York City policeman, Mr. Sullivan went from World War II and Fordham Law School into the Bronx Democratic clubhouses. There, he "met the judges," a ritual for a politically minded young attorney, and ultimately won a job as counsel to Democratic Rep. Charles Buckley, the Bronx political chieftain who was then Public Works chairman.

Mr. Sullivan never fulfilled his ambition of succeeding Mr. Buckley in the House, but today he sometimes almost unconsciously slips into the phrasings of a congressman in floor debate. Once, during an angry meeting over the 1982 Environmental Protection Agency scandals, he delivered a long attack on uncooperative Justice Department lawyers and then exploded: "I yield back the balance of my time!"

"His flipping into member's parlance was accepted by everyone," remembers Stanley Brand, then counsel to the House clerk. "It illustrated his deep feelings about the committee. The members expected that of him—to be so committed to their position . . . to fall into that role."

Mr. Sullivan's sway within his domain can make him many friends. Back in 1975, for instance, he almost singlehandedly rewrote a legislative amendment that has since been worth hundreds of millions of dollars to mass transit systems such as the one in Boston, the home of House Speaker Thomas O'Neill. The committee had already cleared the provision, but aides drafting its precise wording differed with the phrasing sought by Massachusetts officials. In the final minutes before the bill was filed for action on the House floor, Mr. Sullivan made changes to meet the State's concerns. "It was literally Sullivan who saved that," says Mr. Salvucci, the Massachusetts transportation secretary.

Mindful of such influence, private interests sometimes have paid to hear Mr. Sullivan's views. House disclosure forms from the past six years show that Mr. Sullivan has received frequent honorariums from appearances before trade and corporate groups with a stake in legislation before Public Works. This income, though, has declined from approximately $9,490 in 1978 to $1,000 in 1984, the most recent year for which disclosure reports have been filed. "Part of it was for charity, part of it was for educating six kids," says Mr. Sullivan, who now earns $71,050 but went through years of salary freezes because of Congress's reluctance to raise its own pay or that of senior staffers.

Today, Mr. Sullivan's power is challenged by younger, specialized subcommittee chairmen. The House and Senate changes that brought about this decentralization of committee power coincided with the emergence of a formal budget process. The net effect of all these changes is a more technical, less emotional staff, and because of budget constraints, a greater preoccupation with oversight than new legislation. The attraction of higher salaries outside adds to the turnover among staff members.

Even Mr. Sullivan's hard-charging style seems a bit old-fashioned. "I have not yet gotten a call from Dick that was not 'urgent' or 'important,'" says Chairman Howard. The same impatience can chafe others.

If Mr. Sullivan seems a legend past his time, his knowledge of the past may remain his greatest asset. "He has the institutional memory that is lacking in many of the staff people," says Rep. James Oberstar, a Minnesota Democrat who once worked with him on the Public Works staff and who now chairs the investigations and oversight subcommittee. "When he retires it will be the end of an era, the once dominant staff power figure [giving way] to a network of selfless professionals."

Rep. Oberstar's description notwithstanding, Jim Bond is no wallflower. He is a man of arched eyebrows and his own peppery brand of bluster, with a taste for the good life. "He starts at the top of the menu," says one lobbyist who knows him.

In other ways, though, Mr. Bond typifies the new breed of congressional staffer. He is self-conscious about bending his activism to the wishes of the senators he serves. "To the extent I'm out front. I'm nervous," he says, and this hesitancy reflects the perils of the power he enjoys in the budget wars. In fractioning out foreign aid, he walks between what he calls the "Rambo" and "misery" lobbies of the right and left.

Mr. Bond earns $66,350 a year as an Appropriations Subcommittee clerk, a role that has grown vastly more important since the 1980 Republican takeover of the Senate and the wave of budget crises since. Officially, the far better known Senate Foreign Relations Committee is responsible for authorizing foreign-aid programs. But to an extraordinary degree, it is the Appropriations Subcommittee, whose chairman is Wisconsin Republican Robert W. Kasten, that has taken the lead in pushing the Reagan administration's policies

Indiana's Richard Lugar, the new Foreign Affairs chairman, is seeking to reassert his panel's importance, most recently in private talks on foreign aid last week. But in an era of limits, the budget process works to the advantage of the appropriations panel. "The botton line really in foreign assistance is not authority," says William Schneider, the undersecretary of state for security assistance. "The problem is resources, and this has focused on the appropriations committees."

A former House aide, Mr. Schneider knew both Mr. Bond and Sen. Kasten before they knew each other. Now, they form an unusual three-man axis that has had marked success in shaping foreign aid. Working together, they pushed the subcommittee to take the lead in directing military aid to El Salvador during the administration's first years. While satisfying Sen. Kasten's—and Mr. Bond's—pro-Israel stance the committee's annual bills have reshaped foreign-aid

priorities, nearly tripling the level of security assistance abroad since 1981.

"Jim has been very good at holding the ladder steady while Kasten climbs to success," says one Democratic observer. After eight years, he has learned the budget rules—and accounting tricks—he needs to serve his panel's interests.

His boldest ploy came this fall. To stay below budget, the panel eliminated all financing for new Export-Import Bank loans to U.S. exporters. But it then moved forward more than $3 billion in unused money from last year, spreading it over fiscal 1986 and 1987 to keep the bank in business. The maneuver allowed Sen. Kasten to please the business interests that support the Ex-Im Bank. And it even left him enough leeway to forge an alliance with Hawaii Democrat Daniel Inouye to provide up to $531 million to help Israel meet its debt costs on past U.S. loans.

In both cases, the subcommittee ultimately retreated, but only after first winning approval from the full appropriations panel and making its point with the administration. Senate financing for Ex-Im loans is still twice the House-passed level, and the State Department has promised to expedite its review of the debt problems facing Israel.

Mr. Bond's style in these dealings is often combative and impatient. But some call him "the Iron Marshmallow." His gruff exterior belies a compassion and good humor, and he has matured with the job after walking with what one colleague calls "heavy shoes" in his first years. After being so long in the minority, Republicans had to relearn the intricacies of governing, and there is a certain irony that a Vietnam infantry veteran should be the staffer to help lead foreign-aid appropriations.

His stated policy—"to reflect the views of the people I work for"—is easier said than done. Though Mr. Kasten is his immediate superior. Mr. Bond has a longer-standing relationship with Appropriations Committee Chairman Mark Hatfield of Oregon, who appointed him to his job. The two senators come from separate wings of the party, and Mr. Bond feels tugged by conflicting personal and political loyalties.

"Kasten is a political guy who will carry the administration's water on things that Mark Hatfield is flat-out opposed to," says a Senate GOP aide. There have been deeply felt differences on issues ranging from El Salvador arms to financing for aid to small farmers in developing nations.

At a 40th-birthday party at Mr. Bond's home last spring, though, such conflicts seemed far away. Guests included not just staff and administration friends, but also representatives of the American-Israel Public Affairs Committee and lobbyists representing major beneficiaries of U.S. aid.

One of Mr. Bond's gifts was a limerick celebrating the power of his panel to vote money each year after having brushed aside the old authorizing panels with the magic words, "notwithstanding any other provision of law."

Says Mr. Bond of the Appropriations Committee: "It's where all the action is."

JUSTICE REBORN IN ARGENTINA

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. BARNES. Mr. Speaker, the sentencing of five former junta leaders and the acquital of four others by the Argentine courts has completed the first stage of the crucial and sensitive process by which the Government and people of Argentina must come to terms with their own past. Some in Argentina are pleased with this outcome and some are not, and some are more confident than others that justice will continue to be done with respect to the many other cases of abuse of authority by previous military governments. There is ample scope for legitimate disagreement on these matters which, of course, must ultimately be worked out by the Argentine people themselves. But all friends of Argentina must rejoice at the process itself—the rebirth of justice under the leadership of a courageous and skillful democratic government. I know all my colleagues, on both sides of the aisle, join me in paying tribute to the government of President Raul Alfonsin for its dedicated work to return justice in Argentina.

I wish to share with the House the following three sensitive editorials on this subject:

[From the New York Times, Dec. 11, 1985]

JUSTICE REBORN IN ARGENTINA

Formal justice played little role in Jorge Videla's dictatorship in Argentina. Those who offended his regime were abducted, tortured or murdered. In the new Argentina of President Raul Alfonsin, justice is back. After a fair trial, Mr. Videla, along with Adm. Emilio Massera, was sentenced to spend the rest of his life in prison. Three other military collaborators drew lessser sentences.

During a seven-year dictatorship, General Videla and his military accomplices demoralized and bankrupted Argentina. Then, the army that had fought a dirty war against its own population launched a foolish war against Britain and ended in humiliating defeat. Mr. Alfonsin, the elected civilian successor to three military juntas, boldly ordered those junta leaders to trial for sowing "terror, pain and death throughout Argentine society."

That was a remarkably brave step. Even in retreat, the military apparatus of conspiracy and repression frightened the country. Of all the elected Presidents since World War II, the army had permitted only the ex-soldier Juan Perón to complete a full term. And he too was overthrown before completing his second mandate. When Mr. Alfonsin assumed office two years ago this week, the structures of military power were intact. In similar situations, other democrats have equated survival with deference to the generals.

Mr. Alfonsin understood that democracy would have to be audacious to survive. When military courts stalled the junta trials, they were transferred to civilian jurisdiction. He moved boldly on other fronts as well, challenging the unelected and anti-democratic labor bosses of the Peronist opposition and applying successful shock treatment to an economy previously thought incurable.

There have been some wobbles too, including a 45-day state of siege that ended this week. And more tests lie ahead in the four remaining years of Mr. Alfonsin's term: further trials and appeals and a second-stage economic strategy among them. Still, those practical challenges seem more manageable because of what underlies the sentencing of Mr. Videla and four of his military collaborators: the return of justice and self-respect to Argentina.

[From the Washington Post, Dec. 11, 1985]

VERDICT ON THE JUNTA

The Argentine court's verdict is a ringing assertion of the rule of law and the standards of public morality. It found five defendants guilty of crimes committed when they were running the country and sentenced two of them, including a former president of the country, to life imprisonment. The acquittal of four other defendants is generating further cotroversy in Argentina; in seven years, from 1976 to 1983, some 9,000 people disappeared, most of them murdered in military prisons. But the court showed discrimination in assessing the evidence against each of these men as individuals, and the salutary influence of this example of justice will reach far beyond Argentina.

The generals and admirals claimed, by way of defending themselves, that they were saving the country from communism and from revolution at the hands of urban guerrillas and subversives. The urban guerrillas and subversives were not a figment of the generals' imagination. They killed dozens of people in the early and middle 1970s. And they succeeded in bringing revolution of a sort to Argentina—one that carried to power their enemies in the military, who embarked on a hysterical and vengeful campaign against not only radical gunmen but, as time passed, against almost anyone who held any opinion that the generals and admirals took to be unorthodox. To defend even the most rudimentary concept of civil rights brought a person into dire jeopardy. The junta thought of all opposition as communism, and to stamp it out they engaged in endless brutality, torture and murder. Among the great achievements of this long trial is full and accurate public record of all that had happened.

One of the enduring inanities of politics is the assertion that, whatever its defects in principle, authoritarian government is at least strong and efficient. Is it? In Argentina, over seven years, the junta mindlessly ran down a national economy that is potentially one of the world's richest. It rolled up the gigantic foreign debts with which the country is now struggling. It spent lavishly on its own armed forces and started a war in the Falklands in which it was rapidly defeated.

In heartening contrast, there is the current democratic government under President Alfonsin. It has led the country into a series of necessary but drastic economic reforms, of a sort that the junta always dodged on grounds that they would be unpopular. The current government has now given its predecessors a fair trial with scrupulous regard to its own high standards of justice under the junta's standards, all of these men would have been shot in a barracks basement without so much as a magistrate's hearing. Argentina's democracy is

providing a memorable demonstration of moral courage and strength.

[From the Christian Science Monitor, Dec. 11, 1985]

ARGENTINA'S DEMOCRATIC PROGRESS

This week's conviction of five former top junta leaders is the latest—and most dramatic—example of the extraordinary progress Argentina has made in the two years, this week, since Raúl Alfonsín became its President.

Civilian rule then replaced military dictatorship; the armed forces, preeminent for eight years, are held in check at present. The rule of law has superseded state-led terrorism. Labor unions, previously able to defeat, anti-inflation efforts, have been faced down. And inflation, running last June at an annual rate of 1,000 percent, has been chopped to 25 percent.

From being considered a pariah in the Western Hemisphere, for human rights and economic reasons, Argentina has become an example to the world's many troubled nations of the progress that can be achieved, given strong national support for change and a determined leader with well-considered programs.

This week's convictions also sent a second message—that the day of judicial judgment may lie ahead for repressive regimes in any nation, no matter how secure they may now consider themselves. In numerous countries of the third world the armed forces have long operated with near-impunity to violating human rights, offering security reasons as an excuse. An insidious concept takes root in many nations that the demand for order justifies such repression; but this view is false.

The Argentine court's president correctly said that the military effort to combat insurgency "should never have overstepped the bounds of law."

The five junta leaders were essentially convicted of responsibility for human rights crimes by the military, passed off then as part of an effort against left-wing urban terrorists. The trial of the former top leaders, which graphically depicted torture and kidnapping, was virtually unprecedented in Latin America.

In human rights, other nations can, and should, follow Argentina's model.

Argentina's economic progress stems in large measure from having followed its own program, rather than just the more-restrictive IMF approach. Other nations should also consider devising their own programs, then gaining the confidence of the international financial community.

CORNELL UNIVERSITY'S COMMITMENT TO MERIT REVIEW

HON. MATTHEW F. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. McHUGH. Mr. Speaker, I would like to call to the attention of my colleagues the following telegram that I received from Dr. Frank H.T. Rhodes, president of Cornell University.

As my colleagues will see, Dr. Rhodes and the faculty of Cornell University continue to support independent, merit review for all projects for which Federal funds are available. Even though the university is an indirect beneficiary of earmarked research and development funds, it remains the policy of the university to accept funds only for those projects on which a merit review has been conducted.

DECEMBER 19, 1985.

DEAR MATT: Amendment No. 1378 to the Continuing Resolution for the Department of Defense provides $10 million for supercomputer development. These funds were later identified in the Conference Report with Cornell University. Cornell respects the responsibility of Congress to set priorities in broad policy areas such as access to supercomputers and restoring U.S. leadership in supercomputer technologies. The University attaches equal importance to the merit review processes used by funding agencies to select specific projects for support.

Cornell University will not accept funding awards which bypass normal review procedures. We are told that Amendment No. 1378 was intended to help restore U.S. leadership in supercomputer technology, a purpose we fully support, and was not intended to circumvent such merit review. The University did not develop or support any initiative intended to bypass merit review.

With all good wishes.

Sincerely yours,

FRANK H.T. RHODES,
President, Cornell University.

DEFENSE INTELLIGENCE COMMERCIAL ENTITIES ACT

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. WHITEHURST. Mr. Speaker, on December 16, 1985, I introduced H.R. 3963, the Defense Intelligence Commercial Entities Act. To assist those who review the legislation, I am inserting the section-by-section explanation of the legislation in the CONGRESSIONAL RECORD:

DEFENSE INTELLIGENCE COMMERCIAL ENTITIES ACT

SECTION-BY-SECTION EXPLANATION

The bill consists of three sections. Section 1 provides that the short title of the Act is the "Defense Intelligence Commercial Entities Act." Section 2 enacts a new chapter 19, entitled "Department of Defense Intelligence Commercial Entities," in part I of Subtitle A of title 10, United States Code, and makes conforming amendments to tables of chapters in title 10. Section 3 provides that the amendments made by the legislation to title 10 take effect ninety days after enactment of the legislation.

The provisions of chapter 19 of title 10 enacted by Section 2 of the bill are explained below:

Section 391

Subsection 391(a)(1) grants to the Secretary of Defense the authority, with the concurrence of the Attorney General and the Director of Central Intelligence, to establish and operate commercial entities to provide cover for foreign intelligence collection activities of the Department of Defense.

The requirement for the concurrence of the Attorney General ensures an independent high-level legal review of plans for establishment and operation of a DOD intelligence commercial entity, and ensures the harmony of the plans with the intelligence, counterintelligence, and law enforcement functions of components of the Department of Justice. The requirement for the concurrence of the Director of Central Intelligence ensures that the plans will be consistent with national intelligence needs and ensures the harmony of the plans with the intelligence, counterintelligence and special activities of other elements of the United States Intelligence Community.

To exercise his authority to establish a commercial entity, the Secretary of Defense must certify in writing that establishment and operation of that entity is essential to the conduct of an authorized foreign intelligence collection activity of the Department of Defense. Thus, the Secretary may authorize establishment of a commercial entity only when no reasonable and effective alternative method exists for carrying out an authorized DOD foreign intelligence collection activity.

The Secretary may initially authorize the establishment and operation of a commercial entity for any period not to exceed two years.

Subsection 391(a)(2) permits the Secretary of Defense to renew the authority to operate a commercial entity at the expiration of the previous period for which he has authorized its operation. The renewal requires the concurrence of the Attorney General and the Director of Central Intelligence and the written certification of the Secretary of Defense that the operation of the entity is essential to the conduct of an authorized foreign intelligence collection activity of the Department of Defense. The Secretary may renew the authority to operate the commercial entity for any period not to exceed two years. The number of successive periods for which operation of the commercial entity may be authorized is not limited.

Subsection (b) provides that the Secretary of Defense may terminate a commercial entity at any time. His authority to terminate a commercial entity is not conditioned upon any concurrence or certification.

Section 392

Section 392 grants to the Secretary of Defense authority to acquire, use and dispose of items needed in the establishment, operation and termination of DOD intelligence commercial entities. The broad authority granted ensures that the Secretary can provide the necessary administrative support for such commercial entities.

In addition to requiring administrative support comon to any governmental organization, such as workspace, equipment, and personal services, a DOD intelligence commercial entity will require special administrative support due to its commercial functions and appearance. Thus, for example, the entity may require private legal services, commercial, and occupational licenses from a State or foreign government, private liability insurance, and private banking services. Section 392 ensures that the Secretary of Defense can meet the administrative support needs of a defense intelligence commercial entity, including its unusual needs stemming from its ostensibly commercial status.

The authority granted by Section 392 is independent of, and in addition to, any other acquisition, use or disposal authority which the Secretary of Defense possesses.

Section 393

Section 393 ensures that the handling and use of funds in connection with defense intelligence commercial entities will be con-

sistent with the ostensible commercial status of those entities. Section 393 displaces several limitations contained in Section 3302 of title 31, United States Code, on governmental use of funds. Observance of the limitations contained in Section 3302 of title 31 would be inconsistent with the ostensible commercial status of defense intelligence commercial entities.

Subsection 393(a) permits the Secretary of Defense to establish and maintain commercial banking accounts in the establishment, operation, and termination of defense intelligence commercial entities. The authority to use commercial banking services applies both with respect to appropriated funds used in connection with a defense intelligence commercial entity and with respect to funds generated by the commercial activities of that entity.

Subsection 393(b) permits use of funds generated by the commercial activities of a defense intelligence commercial entity to offset the necessary and reasonable expenses incurred by that entity. The funds generated by a particularly entity may only be used to offset the expenses of that particular entity.

Subsection 393(c) provides that funds generated by a defense intelligence commercial entity that are no longer needed for the conduct of the activities of that entity shall be remitted to the Treasury as miscellaneous receipts.

Subsection 393(d) provides for the disposition of the proceeds generated by termination of a defense intelligence commercial entity. After all outstanding obligations of the entity are met, the remaining proceeds revert to the Treasury.

Section 394

Section 394 provides that the establishment, operation, and termination of a defense intelligence commercial entity; any acquisition, use or disposition with respect to such entity; and any deposit, withdrawal or use of funds with respect to such entity, will be carried out in accordance with prevailing commercial practices, consistent with the protection of intelligence sources methods and activities from unauthorized disclosure, and without regard to certain requirements of federal statutes.

To maintain its usefulness as a cover for foreign intelligence collection activities, a defense intelligence commercial entity must maintain commercial credibility. The entity must appear to anyone who scrutinizes it to be a bona fide commercial entity, rather than an entity of the United States Government. Accordingly, the entity must conduct all aspects of its activities in the same manner as would a private sector commercial entity. Circumstances may arise, however, in which observing prevailing commercial practices would not be consistent with the protection of intelligence sources, methods or activities from unauthorized disclosure, and in such cases prevailing commercial practices would not be observed.

The section grants extraordinary authority to waive the applicability of requirements in a broad spectrum of federal statutes to the extent necessary to protect intelligence sources, methods and activities from unauthorized disclosure. Without the waiver authority, a defense intelligence commercial entity would be obliged to observe federal statutes that normally apply to U.S. Government entities but do not apply to a bona fide commercial entity. Such inconsistency between the conduct of an entity and its ostensible status might reveal to an interested observer that the entity is not what it claims to be, risking the compromise of commercial cover and of the intelligence activities conducted by the entity.

A federal statute within one of the enumerated categories (federal appropriations, federal receipt and use of funds other than appropriated funds, federal acquisitions, federal property management, federal services management, federal information management, federal tort claims, federal employment or federal government corporations) ceases to apply if, and to the extent that, the Secretary of Defense certifies that compliance with the statute would be inconsistent with the protection of intelligence sources, methods and activities from unauthorized disclosure. The section provides that a statute is waived only to the extent that compliance would be inconsistent with such protection. Thus, the Secretary's authority extends not to blanket waiver of the applicability of the statute, but only to the waiver of the applicability of the particular requirements of that statute which would be inconsistent with the protection of intelligence sources, methods and activities from unauthorized disclosure (which may in some circumstances amount to waiver of the applicability of the entire statute).

The section makes clear that the Secretary's waiver authority does not apply with respect to the chapter enacted by this legislation (chapter 19 of title 10, United States Code), Title V of the National Security Act of 1947 (which relates to congressional oversight of intelligence activities) and the War Powers Resolution. Thus, nothing in the statute in any way limits the role of the Congress in oversight of intelligence activities and military activities.

Section 395

Subsection 395(a) makes clear that the chapter enacted by the legislation (chapter 19 of title 10, United States Code) provides authority only for establishment and use of commercial entities as cover for DOD foreign intelligence collection activities, and does not provide the authority for those underlying foreign intelligence collection activities.

Subsection 395(b) establishes clear limitations on the activities of defense intelligence commercial entities and their personnel within the United States. They may engage within the United States only in (1) training, (2) administration, and (3) recruitment of non-U.S. persons to serve outside the United States as intelligence sources. Administration includes the full range of support activities necessary to establish, operate and terminate a commercial entity, such as finance, logistics, and procurement, which may be performed by establishment and operation within the United States of defense intelligence commercial entities solely to provide such support. The subsection ensures that the activities of defense intelligence commercial entities will have a foreign focus and will not be used to conduct domestic intelligence activities.

Subsection 395(c) provides that no defense intelligence commercial entity may have as its overt activity communications media activity, religious activity, or traffic in arms or security-related services.

The prohibition against establishing a defense intelligence commercial entity to engage in communications media activity protects against the possibility of media activity by such an entity having an accidental or intentional effect on the domestic political processes of the United States. The prohibition prevents establishment of defense intelligence commercial entities to engage in radio broadcasting, television broadcasting, newspaper publishing, book or magazine publishing, wire services and similar activities. The prohibition against the overt activity of a defense intelligence commercial entity being communications media activity does not prevent incidental commercial use of communications media by such an entity if prevailing commercial practices so require. Thus, for example, if a defense intelligence commercial entity is engaged in a cover business of a type in which one would normally place commercial advertisements or solicitations in a local newspaper, the entity may do so.

The prohibition against establishing a defense intelligence commercial entity to engage in religious activity protects the integrity of religious freedom and religious institutions.

The prohibition against establishing a defense intelligence commercial entity to engage in traffic in arms or security-related services prevents the possibility of using defense intelligence commercial entities to circumvent United States arms transfer policies or to implement those policies. The Arms Export Control Act, the Foreign Assistance Act, and the statutory mechanisms for covert arms transfers govern the transfer of arms and defense services. The prohibition does not in any way prohibit the personnel of a defense intelligence commercial entity from defending themselves, nor does it prevent the use of such personnel on detached duty in military operations, consistent with the War Powers Resolution.

Subsection 395(d) requires that every U.S. person employed by, or assigned or detailed to, a defense intelligence commercial entity be informed prior to employment, assignment or detail that the entity as an entity of the United States Government engaged in intelligence activities. The provision thus prohibits unwitting employment, assignment or detail of United States persons.

Section 396

Subsection 396(a) authorizes and directs the Secretary of Defense, after consultation with the Attorney General and the Director of Central Intelligence, to issue regulations to implement the legislation, and specifies a number of requirements which those regulations must satisfy.

The Secretary's regulations must provide for effective centralized Department of Defense oversight of activities related to defense intelligence commercial entities. The requirement for centralization of the internal oversight role promotes consistency among DOD components in establishing policies and practices involving defense intelligence commercial entities and also facilitates oversight of defense intelligence commercial acitivities by non-DOD entities, such as the Congress. The requirement that the internal oversight role occur at the departmental level, rather than at the lower level of individual DOD components, ensures appropriate high-level attention within the Department of Defense to any problems which may come to light in the course of internal oversight activities.

The Secretary's regulations must provide effective management, operational, security, legal, and accounting controls for all matters relating to defense intelligence commercial entities. The Secretary's careful design and establishment of strict controls will be of critical importance, especially given that such controls often will replace statutory controls which the legislation authorizes

the Secretary to waive in certain circumstances.

The Secretary's regulations must provide for coordination of defense intelligence commercial entity activities with the Department of State, the Federal Bureau of Investigation, and the Central Intelligence Agency.

The Secretary's regulations must ensure compliance with the chapter enacted by the legislation (chapter 19 title 10, United States Code), Title V of the National Security Act of 1947 (relating to congressional oversight of intelligence activities), and the War Powers Resolution.

Subsection 396(b) authorizes and directs the Department of Defense Inspector General to conduct, at least annually, a program and operations review and evaluation and a financial audit of all activities relating to defense intelligence commercial entities and to report thereon to the Secretary of Defense and the intelligence committee of the Congress.

Section 397

Subsection 397(a) provides that defense intelligence commercial entities are entities of the United States Government. As such, defense intelligence commercial entities will enjoy within the constitutional scheme any immunities and privileges enjoyed by the other federal entities. Thus, for example, the sovereign immunity of the United States Government to suit, to the extent not otherwise waived by statute, will extend to defense intelligence commercial entities.

Subsection 397(b) explicitly preempts the applicability of State laws to, and the jurisdiction of State courts over, defense intelligence commercial entities. Thus, defense intelligence commercial entities will be subject exclusively to federal law. Subsection 397(b) provides that, although defense intelligence commercial entities are not subject to State laws and State court jurisdiction, they may engage in conduct which appears to comply with State laws and State court jurisdiction if the Secretary of Defense determines that doing so is necessary to protect intelligence sources, methods and activities from unauthorized disclosure or is necessary in the interests of justice.

Under the authority granted in subsection 397(b), with the appropriate certification, a defense intelligence commercial entity may engage in conduct which appears to comply with State laws in the same manner as would a bona fide commercial entity. Thus, for example, if the Secretary of Defense certifies that protection of intelligence sources, methods and activities requires doing so, he might authorize a defense intelligence commercial entity to incorporate within a particular State, even though that State's incorporation laws do not provide for incorporation by federal entities. Similarly, even though federal agencies are not subject to State taxation, the Secretary of Defense, based upon the appropriate certification, may authorize the entity to file State tax returns and remit State taxes.

Also, under the authority granted in subsection 397(b), a defense intelligence commercial entity may engage in conduct which appears to submit to State court jurisdiction in the same manner as would a bona fide commercial entity. Thus, for example, if the Secretary of Defense certifies that protection of intelligence sources, methods and activities or the interests of justice require doing so, he might authorize a defense intelligence commercial entity to participate in a lawsuit in a State court based on breach of a commercial contract in the same manner as would a bona fide commercial entity.

The Department of Defense may well make substantial use of the authority to authorize defense intelligence commercial entities to engage in conduct appearing to comply with State commercial laws, since it may become the Department's practice to establish such entities by incorporation or registration under the laws of the several States. In contrast, the Department should only rarely need to use the authority to authorize defense intelligence commercial entities to engage in conduct appearing to submit to the jurisdiction of a State court, as the authorized activities of such entities within the United States are quite restricted, and thus are not likely to give rise to many situations in which submission to State court jurisdiction would be appropriate.

Section 398 provides that the Secretary of Defense may delegate only to the Deputy Secretary of Defense the Secretary's authority, functions and duties under subsections 391(a), 394(b), 396(a) and 397(b) of title 10, United States Code, as enacted by this legislation. By requiring the Secretary or Deputy Secretary of Defense to exercise the authority, duties, and functions set forth in these subsections, the legislation ensures high-level attention to sensitive decisions involving defense intelligence commercial entities.

Under Section 398, the Secretary of Defense may delegate only to the Deputy of Secretary of Defense the authority to authorize and renew authorization for the establishment and operation of defense intelligence commercial entities based upon the requisite certification (§ 391(a)); the authority to waive the applicability of certain federal statutes based upon the requisite certification (§ 394(2)); the authority to issue implementing regulations (§ 396(a)); and the authority to authorize defense intelligence commercial entities to appear to comply with State commercial laws and court jurisdiction to which they are not subject. Authorities, duties and functions provided in the legislation, other than in the subsections specifically cited by Section 398, are subject to delegation in accordance with subsection 133(d) of title 10, United States Code.

The limitation on delegation of certain specified authorities, duties and functions will not place an inordinate administrative burden on the Secretary and Deputy Secretary. Exercise of the authority to authorize establishment and operation of a commercial entity will occur only once for each entity, and subsequent renewals to operate will occur only occasionally. Exercise of the authority to waive various federal statutory requirements applicable to an entity, to authorize apparent compliance with State statutes, and to authorize apparent submission to State court jurisdiction, will often accompany the authorization to establish and operate the entity, although changes may be necessary with respect to an entity from time to time. Exercise of the authority to issue implementing regulations should occur once, with changes to such regulations thereafter occurring only occasionally, as experience demands. The greatest burden upon the Secretary and Deputy Secretary will thus occur at the time of creation of a defense intelligence commercial entity, when the nature and scope of its activities and the legal regime governing it are established. Cabinet-level involvement in decisions of such sensitivity at that time is appropriate.

Section 399

Section 399 defines the terms "commercial entity," "foreign intelligence collection activities," "intelligence activities," and "United States person" used in the new chapter 19 of title 10, United States Code, enacted by the legislation.

The definition of "commercial entity" comprehends all forms of non-governmental legal entities, within or outside the United States, established and operated solely to conceal DOD foreign intelligence collection activities under cover of its overt function. The definition makes clear that the legislation authorizes establishment of DOD commercial entities only to provide cover for DOD foreign intelligence collection activities. The legislation does not authorize establishment of such entities to engage in any intelligence activities other than foreign intelligence collection activities, nor to provide cover for any intelligence activities other than foreign intelligence collection activities. Thus, for example, DOD may not establish such entities to engage in the conduct of, or to provide cover for, counterintelligence operations (as distinguished from the collection of counterintelligence information) or covert action. The term "commercial entity" is used throughout the legislation.

The definition of "foreign intelligence collection activities" comprehends only collection by the Department or Defense or the armed forces of foreign intelligence or counterintelligence information, and related support activities. It does not include any other types of intelligence activities, such as counterintelligence operations or covert action. The legislation authorizes the establishment of defense intelligence commercial entities only to provide cover for "foreign intelligence collection activities." The term "foreign intelligence collection activities" is used in Sections 391, 395, and 399.

The definition of "intelligence activities" comprehends all intelligence and intelligence-related activities of the United States Government. The term "intelligence activities" is used in Section 395.

The term "United States person" means only citizens of the United States and aliens admitted to permanent residence in the United States. The term "United States person" is used is Sections 395 and 399.

IMPACT OF INSURANCE CRISIS WIDESPREAD

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. FLORIO. Mr. Speaker, the crisis in the unavailability of liability insurance is widespread, affecting all kinds of activities. I am inserting in the RECORD an article from the Newark Star-Ledger regarding the impact of the crisis on charter and fishing boats.

[From the Newark (NJ) Star-Ledger, Dec. 8, 1985]

BOAT INSURANCE CRISIS TRIGGERS INDUSTRY SOS

(By Vincent R. Zarate)

Up to now the state officials had thought their insurance liability crisis existed only on land.

Not so, they have learned.

The state's insurance problem has now gone to sea.

The owners and skippers of 200 charter and fishing boats fear they are heading for rough waters because soaring insurance costs and a scarcity of firms offering the coverage.

The problem with the charter and fishing boats was revealed to state officials and legislators by the United Boatmen of New Jersey, representing party and charter boatmen from Hoboken to Cape May.

They have asked the insurance commissioner and the Legislature to come to their aid to do something about rates and to pass laws protecting them from cancellations and nonrenewal of existing policies.

Further, the Independent Agents Association of Somerset County has urged Insurance Commissioner Hazel Gluck to include ocean marine policies in the new emergency rules that require state approval before companies can cancel or refuse to renew existing liability insurance policies for commercial land-based operations and municipalities.

"We need help immediately with some sort of a retroactive price ceiling because our insurance rates have increased from 50 to 90 percent in one year, and we expect that next year it will get worse." David Bramhall of Brielle, executive director of the United Boatmen, wrote in a letter to state officials.

"Within the past six months the rates being charged have gone right through the ceiling, with no end in sight," wrote Bramhall.

And he warned, "The premiums have already reached the point where they will be driving many of us out of business."

Bramhall estimates the charter and fishing boat industry in New Jersey is a $120 million a year industry, but he fears that if the state ignores the insurance plight, "Many skippers will be unable to afford the costs."

In their letter to the officials and legislators, the boatmen complain the average rates for typical liability and hull coverage on a 24-year-old, 65-foot boat has gone up $5,000 in one year.

The group contends the insurance costs for a 20-year-old boat that is 70 feet long was $7,750 in 1984 and now costs $11,250 and will increase substantially next year. A 70-footer built in 1984 costs $18,000 to insure, an increase of $5,000 from a year ago.

The boatmen contend that while premiums continue to rise, companies have reduced the liability coverage from the once average $500,000 an incident down to $300,000.

Bramhall and Howard Bogan, the other executive director of the boatmen's group, wrote:

"When you attempt to shop and find another company it is always the same story—no one is writing policies, or the rates are sky high."

Many Luftglass, an insurance broker from Somerville who handles insurance coverage for 30 charter boats, said, "New business is very hard to place for ocean marine coverage and it is becoming extremely expensive."

He added, "We are afraid the second shoe may drop and companies will refuse to renew or pull out of the business entirely."

Luftglass estimated that average insurance on party boats can range from $15,000 all the way to $100,000 a year depending on how much liability protection a shipowner wants.

He said he feared, "A lot of boats are going out that are uninsured because the skipper cannot afford it, or cannot find any company to sell it to them . . . particularly the older boats built 20 to 50 years ago."

He said that five to six years ago when companies "wrote almost anything to get money for high investments," the company paid the bill for the appraisal of the boat before it was insured.

"Now that there is a tight market again, the boatowner must pay the usual $500 fee to have his boat appraised," said Luftglass.

The boatmen's association directors said all the charter and party boats undergo strict U.S. Coast Guard inspection every year to 18 months.

They noted that if a boat does not pass a Coast Guard or survey inspection, "It should not be insurable."

But they contended that if a boat does pass the strict examination standards of the Coast Guard then the boat should be "insurable at a realistic rate."

Gluck said she has been made aware of the problem but noted that ocean marine insurance historically has been unregulated in the state because of the special nature of that type of insurance.

She said the department is "very concerned" about companies refusing to renew existing policies or threatening cancellation of existing policies. She said the department would investigate the complaint of the boatmen.

If the Legislature finds there is a major crisis in insurance coverage for the charter fishing fleet of the state, the Legislature could pass laws to give the department greater authority over the ocean marine insurance business, she said.

Several insurance company executives said that the rising prices for premiums for the boatmen is part of the entire national problem of commercial insurance and its availability.

Officials from CIGNA and Hartford Insurance Co. said the cost of that type of insurance was underpriced but was sold so companies could obtain cash for the high investment returns dominant in the market about five years ago.

James Beatty of CIGNA said that companies are being more selective in writing new business. But many are keeping existing business but at higher rates.

LATIN DEBT DILEMMA

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. FASCELL. Mr. Speaker, I would like to bring to the Members' attention a series of editorials on the external debt crisis facing Latin America which appeared in December 1985, issues of the Miami Herald.

These editorials succinctly point out the extent which the Latin debt crisis imperils, not just the political and economic stability of the Latin debtor nations, but also our own interests here in the United States. Their political and economic prosperity is linked to our own financial and economic prospects—as we learned all too well when the economic retrenchment in Mexico and other Latin countries in 1983–84 resulted in a significant fall-off in U.S. exports to the region—and also to our foreign policy interests in promoting democracy in Latin America. The series also points out that the success in dealing with the debt crisis in 1982–83 unfortunately was only a temporary solution and did little more than postpone the day of reckoning, which increasingly looks to be just around the corner.

The impending igniting of the debt timebomb has increased the urgency of taking action to preempt that explosion. The editorials suggest such measures as writing off debt which is clearly uncollectable, further reschedulings on equitable terms, and new infusion of foreign capital. They also suggest a process for reinvesting debt service payments. Consideration should be given to other proposals, such as a limitation on debt service payments, a World Bank role in commercial lending, and pooling of commercial lending. What is needed now is open, innovative thinking—open even to radical solutions—and goodwill by all parties—the debtors, the commercial lenders, and Western governments—in order to arrive at mechanisms that will protect the interests of the existing order: That will permit the debtor nations to service the debt, while rekindling economic growth, and permit the lending institutions to secure their financial stability.

I have enclosed also a companion editorial from the December 17, 1985, New York Times which notes the role being played by the decline in international commodity prices and the need for the principal industrial countries to implement their unfulfilled decision to coordinate economic policy, with the United States reducing its budget deficit and Japan and Western Europe reducing taxes and increasing Government spending and economic expansion.

What we have to date on the debt situation and economic malaise is rhetoric and proposed action plans, but no concrete measures. We must act soon before the political/economic cost becomes unsustainable.

[From the Miami Herald, Dec. 2, 1985]

U.S. BUYS TROUBLE

Much of Latin America is bankrupt. Euphemistic "reschedulings" and "renegotiations" of the region's $380-billion foreign debt no longer can conceal these debtors' near-insolvency or the precarious state of the U.S. banks to which most of the money is owed. So far, the lenders' bookkeeping ingenuity in disguising unsound loans as healthy assets has allowed Federal banking authorities to look the other way. But investors are not so easily fooled: Depressed bank-stock prices reflect the market's anxiety about the biggest lenders' long-term solvency.

If the fallout from an abrupt bursting of the Latin debt bubble could be confined to a few thousand bank stockholders and a handful of tinhorn *generalissimos,* the U.S. Government's *laissez-faire* policy might seem reasonable enough. After all, the banks and the debtor governments share responsibility for their current debacle. Why not let them play out their mutual hostage crisis, and may the fittest survive?

But fate is not so just as that. In the mid-1970s, banks eager to recycle petro-dollar deposits from history's largest oil-price hike embarked on a Latin American lending

binge. The aggregate Latin debt has grown since then until no one in this hemisphere is immune to its disastrous potential consequences.

In the United States, questionable loans on their books exceed the total capital of some of the largest money-center banks. Most U.S. regional banks maintain large deposits and correspondent relationships with one or more of these "megabanks." That interdependency means that the collapse of one or two megabanks would reverberate throughout the land. If Federal regulators interceded to avert such a failure, taxpayers would foot the bailout bill.

In Latin America, the debt crisis already has spawned or aggravated widespread suffering. Most debtor countries have sacrificed a full decade of domestic economic growth in their largely unsuccessful efforts to keep current on interest payments. Several military regimes that accepted massive loans during the '70s—and invested the money imprudently or stole it outright—have given way to democratically elected governments. Those governments now face a double burden: bankrupt domestic economies and a population demanding compensation after years of privation. In 1985, several newly elected Latin American leaders have warned that their people will not tolerate indefinite economic hardships if their only reward is to see their nation's scant wealth transferred abroad.

Ordinary Americans will share in the costs whether the debtor countries repudiate their debts to U.S. banks, oust democratic leaders in favor of anti-U.S. regimes, or continue to trade long-term economic growth for marginal short-term solvency. The relevant question is not whether, but when and under what circumstances, the American people and their elected national leaders will confront a crisis that has become inescapable.

[From the Miami Herald, Dec. 3, 1985]

MEXICO STRUGGLING

Although analysts should have seen trouble coming much earlier, the Latin debt crisis can be said to have begun officially in August 1982. That's when Mexico suspended payments of principal on its $86-billion foreign debt. Within days, financial markets from New York to Tokyo were buzzing with rumors that Latin America's second-largest debtor was about to go bankrupt—and trigger the biggest banking disaster since the Depression. Jolted from their complacency, U.S. banks, Federal regulators, and the International Monetary Fund (IMF) joined to rescue Mexico from insolvency.

The elements of the Mexican rescue plan, and of the avalanche of similar plans designed for other troubled debtors, were straightforward enough. With IMF assistance, banks extended short-term loans to enable the debtor country to resume paying interest on its debts. Amortization of principal typically was postponed or stretched out. In return, the debtor country pledged to implement economic reforms—starting by immediately reducing government spending—designed to produce a trade surplus. By exporting more than it imports, a debtor country would earn the foreign exchange—principally dollars—needed to make debt payments.

In lending strapped countries money for interest payments, U.S. banks of course were effectively digging themselves—and troubled debtors—into a deeper hole. But perpetuating the fiction that Latin loans are being repaid allows banks to skirt Federal regulations that require them to set aside loss reserves sufficient to cover any "troubled" loan—and to subtract the amount of those reserves from current earnings.

By 1984, Mexico had imposed harsh austerity measures, and the Mexican trade surplus increased sooner than expected. Those signs were being heralded as evidence that the IMF's prescription was working—and that the worst of the Latin debt crisis was over.

The underlying reality was not so sanguine. Mexican exports did grow modestly, but most of the improvement in Mexico's trade surplus resulted from a sharp drop in imports. The resulting scarcity of imported goods fueled a 59-percent rise in Mexico's inflation. That in turn prompted outraged cries from Mexicans already reeling under austerity's impact.

In 1985, moreover, a worldwide economic slowdown and tumbling oil prices have curtailed the growth of Mexican exports. In the first seven months of the year, Mexico's trade surplus plunged 47 percent from the year-ago level. September's catastrophic earthquake quashed all hopes that Mexico might be able to meet its newly rescheduled debt payments. Even before that, however, it was evident that the IMF's "magic formula" for ending the Latin debt crisis had only postponed the day of reckoning for U.S. banks.

[From the Miami Herald, Dec. 4, 1985]

SMALL DEBTORS PINCHED

Borrow $1,000, goes the old saw, and the bank owns you. Borrow $1 billion, and you own the bank. Thus it sometimes seems in Latin America, where large debtors have been able to demand favorable rescheduling terms while uncompromising lenders force smaller borrowers to the wall.

Four nations—Brazil, Mexico, Argentina, and Venezuela—account for about four-fifths of U.S. banks' outstanding Latin loans. A default by any of these "megadebtors" could send several lenders into a tailspin. So U.S. bankers have been quick to back off, if only temporarily, whenever any of the Big Four appeared to be near the breaking point. But debtors such as Peru and Bolivia, whose loan balances don't imperil any major U.S. bank, have found their negotiations with lenders more difficult.

The consequences of that discriminatory treatment have so far been short of catastrophic—at least for the lenders. In May 1984, Bolivia claimed the dubious distinction of being the first Latin debtor to announce formally that it would no longer pay interest on its foreign debt. That event passed "almost unnoticed. Peruvian President Alan Garcia made a bigger splash last July when he declared that his country henceforth would limit debt payments to 10 percent of its foreign-exchange earnings. But Peru hasn't paid that much in years.

Even so, the perils of continuing to give small debtors short shrift are many. For creditors, the danger is that one desperate debtor's decision to repudiate its obligations will trigger a chain reaction of small-debtor defaults whose cumulative impact is far from insignificant. For the U.S. Government, the much-greater risk is that long-suffering Latin peoples will replace democratic governments with militant regimes hostile to the International Monetary Fund's dictates—and to the interests of the lending nations generally.

Americans need look no further than Cuba or Nicaragua to be reminded of how much political mischief such economic bantams can stir up. Countries that constitute only a small blip on the major lenders' balance sheets may prove menacing to neighbors whose security is threatened by the activities of a revolutionary government in their midst.

Lenders have consistently downplayed the political risks inherent in holding small-debtor governments to unrealistic payment schedules. But Peru's President Garcia, whose own government's stability is imperiled by a continuing struggle with Maosit guerrillas, scarcely overstates the perils. For the smaller Latin nations, he argues, the choice is simple: debt, or democracy.

[From the Miami Herald, Dec. 5, 1985]

FLAWED FIXES

In prescribing stringent austerity measures for Mexico and other troubled Latin American debtors, U.S. banks and the International Monetary Fund (IMF) made two critical mistakes. Unless both are rectified soon, lenders will forfeit the last opportunity to salvage their investment in Latin America. Worse, the debtor nations will be doomed to another decade of negative economic growth and political upheaval.

The first flaw in the lenders' quick-fix scheme was its failure to anticipate the political risks inherent in any effort to reduce government spending. When the debt crisis began, standards of living in many debtor countries already had been plummeting for years. Lenders ought to have foreseen that no government—much less democratic regimes dependent on broad popular support—could exact many more sacrifices from constituents already ravaged by economic adversity.

Even if their people remained stoic about their sacrifices, however, the debtor nations' recovery would founder on the second serious deficiency in the lenders' rescue plan. The plan siphons away in interest payments 6 to 8 percent of the region's gross domestic product. That simply smothers what little productive capacity the debtor countries retained. Deprived of new investment, these debtors' existing export industries languish. Thus the debtors' ability to meet their interest obligations in the years ahead grows ever more doubtful.

Encouragingly, more and more policy makers are recognizing the obvious: Latin America cannot starve itself out of debt. After preaching the gospel of austerity for years, the Reagan Administration recently did an abrupt about-face. It declared that henceforth growth would be the watchword of U.S. economic policy toward the region.

In an October speech before the annual meeting of the World Bank in Seoul, Treasury Secretary James Baker outlined a new U.S. plan. It de-emphasizes short-term lending to finance debt-service payments in favor of longer-term loans to foster export-oriented productive enterprises. Like the IMF's balance-of-payments loans, these longer-term development loans would require debtor governments to make lender-prescribed changes in economic policy.

But no multilateral lending agency boasts resources sufficient to revive Latin economies constrained to export more than half of their foreign-exchange earnings as interest payments. With new foreign investment dwindling, domestic capital fleeing to industrialized countries, and import restrictions choking supplies of raw materials, spare parts, and machinery, many debtor countries simply are wasting away. For Latin America, any hope of resuming economic

growth or achieving political stability hinges on initiatives far more dramatic than any yet proposed by this country's bureaucrats and bankers.

[From the Miami Herald, Dec. 6, 1985]

REDUCING THE BURDEN

In an ordinary corporate bankruptcy, creditors have two options:

They can liquidate the debtor's assets and divide the proceeds, or they can give the debtor breathing room to restore its profitability. Latin America's primary assets—land, labor, and natural resources—do not lend themselves readily to liquidation. Therefore, U.S. creditors and Latin debtors inevitably must sink or swim together.

But the handful of banks whose lending exposure exceeds their total capital aren't the only players with vital interests in Latin America's economic viability. The collapse of one or more money-center banks would jeopardize smaller financial institutions' own solvency. U.S. manufacturers sell nearly one-fourth of their exports to the Latin debtor countries. Industrialized nations import the region's commodities. The ability of democratically elected Latin leaders to govern is being undermined by lender-mandated austerity measures. The physical security of ordinary Americans is diminished whenever extremism takes root in the hemisphere. All of these interests thus have a stake in solving the debt conundrum.

There are ways out. As in a Chapter 11 reorganization, the creditors' first priority should be to preserve and enhance the debtor countries' productive capacity. Existing loans must be rescheduled to permit longer repayment periods and lower interest spreads. Small debtors must be accorded terms no less generous than those extended to the Big Four. Where no reasonable scenario for eventual repayment exists—Bolivia is one example—a negotiated debt cancellation may be the best alternative to a sudden, unilateral repudiation. The U.S. Government should take the lead in determining where writeoffs are appropriate, and the Treasury Department should be prepared to take necessary steps to protect the integrity of banks whose balance sheets are affected.

Reducing the burden of debt-service payments is only half of the solution though. To expand its productive sector, Latin America needs new infusions of foreign capital. But how can banks already suffering from overexposure be persuaded to extend new loans? And wouldn't that amount to throwing good money after bad?

On Sunday, in concluding this series on Latin debt, *The Herald* will outline one scholar's bold plan to recycle foreign investment in productive enterprises calculated to return the region to long-term solvency.

[From the Miami Herald, Dec. 8, 1985]

A NOVEL SOLUTION

Before a bank lends money to an individual or a business, it ordinarily wants to know how the loan will be used and how the debtor will raise sufficient funds to pay it back. But in the mid-1970s, when U.S. banks made most of their bad loans in Latin America, many lenders ignored these fundamental precepts. For most banks, any ranking minister's signature was deemed sufficient to guarantee that a sovereign government's debt would be repaid.

Today those lenders can only guess at where their money went. But it seems safe to conclude that only a fraction of it was invested in enterprises calculated to yield a return, much less profits sufficient to support any debtor country's soaring interest "nut."

Robert Wesson, director of Latin American studies at the Hoover Institution, says that much of the money lent in Latin American simply has been lost—through inefficient subsidies, bloated bureaucratic salaries, and outright theft. Suppose there were a way, over time, for banks and debtor countries to make those funds reappear. Wouldn't it be in everyone's best interest to pursue it?

Dr. Wesson proposes a way. His plan would require each Latin debtor to make payments into a fund held and managed by creditors and restricted to reinvestment within the debtor country. Lenders have learned the price of sloppy loan supervision the hard way. They could be relied upon to support only the most promising enterprises. "It would mean putting money where it should have gone in the first place," Dr. Wesson says, "into productive undertakings, instead of largely covering goverment deficits and state enterprises."

As Dr. Wesson sees it, political realities preclude debtor countries from imposing harsh austerity measures solely to make money available for interest payments. But fiscal self-discipline might appear more attractive if the fruits of their sacrifices were reinvested in these debtor's own economies.

The banks of course would demand part of any profits from their compulsory investments. And it might be prudent to give each debtor government a small equity stake in its reinvestment fund. Debtors whose forturnes were tied explicitly to the success of private enterprises would be far likelier to undertake the structural changes—in trade policy, banking practices, exchange rates—needed to enhance those enterprises. And new jobs and improved living standards would allow democratic leaders to disarm nationalist critics waiting to make political hay of lender-inspired reforms.

In concert with the Reagan Administration's plans for increased World Bank participation, this reinvestment scheme offers the best hope for restoring Latin America to solvency. The Administration has at its disposal many levers to encourage the lenders' participation—its bank-regulating authority and ability to influence interstate-banking laws come readily to mind—and it should not hesitate to work them. As all parties move toward an inevitable reckoning of the Latin debt crisis, it's past time for the U.S. Government to assert its citizens' own overriding interest in an equitable resolution.

[From the New York Times, Dec. 17, 1985]

A WORLD ECONOMY IDLING IN NEUTRAL

The prices of raw materials—rubber, copper, sugar—are in a worldwide nosedive. It's the 1970's in reverse: OPEC can't hold the line against declining oil prices. The international cartel that guarded the price of tin collapsed in a flurry of uncollectible i.o.u.'s in October.

It's hard not to cackle over chickens coming home to roost, but commodity deflation is a mixed blessing. The gains for the industrialized economies are mirrored by the losses of raw-materials exporters, many of them very poor and deeply in debt to Western banks. Common decency and self-interest require something better than gloating.

An array of raw materials that cost $100 in 1980 now costs only $74.30. Even after adjusting for the distortions created by a strong dollar, most commodity exporters' purchasing power has plummeted. According to The Economist, the decline in one year saved the industrialized economies $65 billion. Part of that is at the expense of wealthy oil producers. But oil prices have fallen less than those of most metals and farm products. The big losers include Bolivia, Ghana and the Philippines.

One direct consequence is a shorter fuse on the debt bomb. Interest rates have declined by a third in the last three years. But declining commodity prices have offset the debtors' gain. Some, including Peru, Chile, the Ivory Coast and Morocco, owe more of their export earnings for debt service than in 1982. Their living standards are declining. Worse, they must reduce imports of capital equipment, losing the growth route out of debt.

If low commodity prices are the problem, why not just raise them? In theory, both producers and consumers could benefit from "buffer stock" agreements that soak up commodity surpluses when prices are low and relieve shortages when prices are high. The Carter Administration was inclined to cooperate in their creation. Even more market-oriented Reaganites have quietly blessed a buffer-stock agreement in coffee. But it is rarely possible to satisfy both buyers and sellers for very long; these arguments usually fall apart.

Treasury Secretary Baker suggests that the quickest remedy is to reopen the loan windows of Western banks. That makes sense for debtors like Brazil and Argentina, which could use the extra capital productively. But loading more debt onto overburdened economies is a palliative at best. More effective relief requires more demand for third-world commodities, and lower interest rates.

The Federal Reserve could serve those objectives by liberalizing credit. But relying only on America's monetary policy runs the risk of re-igniting inflation. The more prudent path would be for the advanced nations to coordinate economic policies. The United States' contribution would have to be to reduce its budget deficit markedly, easing the Government's demand for private capital and letting interest rates fall. Japan and Western Europe would have to reduce taxes or increase government spending, stimulating imports of raw materials from the third world.

The industrial countries agreed in principle to this division of responsibility last fall. But their good intentions have not been translated into policy. That's understandable; the Japanese Diet is as reluctant to increase spending as Congress has been to reduce ours. But with half the world's economy idling in neutral, the inaction by all is indefensible.

GUATEMALAN ELECTIONS—A FIRST NOT A FINAL STEP TOWARD DEMOCRACY

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. MRAZEK. Mr. Speaker, the recent elections in Guatemala truly represent a positive step toward that nation's return to democratic government. While I believe we in Congress should make every possible

effort to support the new leader, Mr. Vinicio Cerezo, the recent elections are not, as this administration has claimed, the "final step in the reestablishment of democracy."

Thousands upon thousands of Guatemalans were killed or disappeared since the imposition of military rule in 1954. Thousands of people have been uprooted from their native homes—especially the Indians in the highlands. We should not expect civilian trust of Guatemala's new leaders to become embedded in the society overnight—especially because we should not anticipate that the military will readily abrogate its immense power over Guatemalan society to civilian leaders.

Guatemala's return to democracy will be a slow and arduous process, which can be hastened—or stalled—by United States policy. Mr. Cerezo has declared that Guatemala will continue its policy of neutrality toward the war in Nicaragua, and will actively seek resolution of all the conflicts in the region. If the United States tries to push Mr. Cerezo into supporting the United States position regarding Nicaragua, or if we drop millions of dollars of military aid into Mr. Cerezo's hands while the military still retains control over key elements of the government, we will only exacerbate tensions in Guatemala and impede Mr. Cerezo's efforts to establish real democratic rule in his beleagured nation.

Joseph Aldridge, director of the Washington Office on Latin America, a human rights and foreign policy educational organization, has written an excellent piece in Newsday on the significance of the Guatemalan elections. Mr. Eldridge has been following events in Guatemala for years and his observations should be taken into account by any one who truly believes that the recent elections signify the final stage—rather than an important first stage—of Guatemala's return to civilian, democratic rule.

GUATEMALA AND CIVIL RULE

(By Joseph T. Eldridge)

On Sunday, Guatemala elected its first civilian president in almost two decades. Christian Democrat Vinicio Cerezo, in an overwhelming electoral mandate, won the final round of voting by a landslide. In defeating the candidate of a center-right party, he and his center-left party garnered 68 percent of the votes, more than any other candidate in Guatemalan history.

The Reagan administration, in its briefing documents for Guatemala elections, declared the voting the "final step in the re-establishment of democracy." Unfortunately, this optimistic view seems to be limited to the White House and its faithful followers. At the very best, the Nov. 3 general election and Sunday's runoff represent only the first step. When he assumes the presidency in January, Cerezo will face the daunting task of asserting control over the military, improving the abominable human rights situations and stabilizing a disastrous economic decline.

The elections themselves were reluctantly permitted by the armed forces—who still control Guatemala—for several compelling reasons. First, the military government's dismal human rights record has eroded internal and international legitimacy. According to a British parliamentary group's findings, "The Guatemalan military has created a nation of widows and orphans. Over the past 30 years, over 100,000 people have been killed and 38,000 [have] disappeared."

Nowhere has the violence been more insidious than in the highlands. Every aspect of the Indians' lives is watched and supervised by military-appointed "interinstructional coordinators." Almost 1 million Indian males have been regimented into civil patrol, extending the military's eyes and ears into almost all rural communities.

The most pressing factor in the military's decision to convene elections, however, was that the Guatemalan economy has been verging on total collapse. Over the past year, the *quetzal* has been devalued by 300 percent, inflation is rampant and unemployment soaring. The downward spiral of the economy has sparked generalized popular unrest. In September, the government's decision to increase bus fares from the equivalent of 10 U.S. cents to 15 provoked large spontaneous demonstrations. Ten days of protests left two dead, close to 2,000 were arrested and about 60 "disappeared."

In addition, the bulk of Guatemala's short-term debt, currently estimated at $700 million, comes due by the middle of next year. At least $300 million in foreign assistance will be required for Guatemala to meet its financial obligations. Conservative business sectors, acutely affected by the economic crunch and realizing that outside help would not be forthcoming without an improvement in Guatemala's image, joined unions, political parties and religious, neighborhood and professional organizations in urging elections.

All of the presidential candidates, however, refrained from tackling issues directly related to the military. There was virtually no discussion about the need to establish an effective system of justice or to bring to trial those responsible for tens of thousands of civilian murders over the last several years. Nor did the candidates broach the subject of civilan supervision of the military's sophisticated mechanism of surveillance and control of the large Indian population in the highlands. In fact, Guatemala's new constitution institutionalizes the military's control over the rural development programs as well as the ministries of defense and communications.

Whether the results of Sunday's elections can begin to reverse decades of human rights abuses and patch up a hemorrhaging economy has yet to be determined. The Reagan administration, however, is clearly optimistic that Guatemala has reached a watershed, and is hoping that the elections will convince a skeptical Congress that Guatemala will now be a worthy recipient of military aid and more substantial economic assistance. Former U.S. Ambassador to the UN Jean Kirkpatrick observed that "a confident democratic Guatemala can be expected to play a far more important role on the Central American political scene."

Despite repeated pressure from administration officials, the Guatemalan military has remained aloof from the White House's efforts to join in the crusade against the Sandinista government of Nicaragua.

Clearly the Reagan administration feels that military and economic aid programs would give them more leverage with Guatemala's prideful military. Congress, however, has resisted repeated White House pressure to renew military aid, suspended in 1977.

In his new job as president, Cerezo will have to summon up all the skill he has accumulated in 20 years of public life to coax the military into relinquishing aspects of its monopoly power. Whatever authority he may succeed in grasping, he will have no possibility of addressing the country's urgent need for sweeping economic and social changes. Issues as basic as tax reform and land tenure were prudently, never discussed by candidate Cerezo.

The United States can, however, assist this fragile beginning. Congress must resist the Reagan administration's pressure to give Guatemala immediate and unconditional aid. Guatemala's generals do not merit even consideration of military aid.

All economic assistance, except emergency aid for basic human needs, should be made available only after the newly elected civilian government curbs human rights violations, moves toward establishing an independent judiciary, and othewise demonstrates effective control over the military. Cerezo wants and needs nothing less.

WOMEN OF THE SANCTUARY MOVEMENT

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 19, 1985

Mr. TOWNS. Mr. Speaker, as we move through the holiday season it is important to remember those who have made a personal sacrifice to ensure the safety and freedom of others. Many Americans throughout the Southwest have made a personal decision to protect the rights of refugees from El Salvador by assisting them in a modern-day version of the "Underground Railroad." Most of the people involved in the "sanctuary movement" are women. Just as the Quakers and black American leaders like Harriet Tubman who risked imprisonment and/or a return to slavery, these women risk imprisonment to smuggle refugees to the United States.

Because of the administration's refusal to grant "extended voluntary departure" to Salvadorans or Guatemalans, these American women feel compelled to smuggle and harbor these refugees to prevent them from being deported to an uncertain fate and possible death in violation of the U.N. Protocol on Refugees. Glamour magazine recently featured an article by Claudia Dreifus, "Women of the Sanctuary Movement," which described the movement and the women who participate in this extraordinary struggle which has become "one of the largest demonstrations of civil disobedience since the Vietnam war." In this season, where we will share the holidays with family and friends, I commend this article to my collegues as an example of Americans who have chosen to struggle for the freedom of others at great personal risk to themselves. Their commitment only provides more impetus for the Congress to move forward with the Moakley-DeConcini legislation, H.R. 822, to protect the rights of these refugees.

WOMEN OF THE SANCTUARY MOVEMENT

The twenty-eight-year-old woman we'll call "Annie Wilson" does not want to tell me very much about her life.

"Just tell your readers that I'm not very different from them," she suggests as we motor along the dirt roads of Northern Mexico on a warm spring morning. "I am a fulltime homemaker, a practicing Presbyterian, a college graduate, the mother of three children, the wife of a businessman. It's not that I'm coy about myself—it's just that I have young children and, for their sake, I try to be careful. Oh sure, I know that at some point I'm going to get caught at what I do, but when you have a four-year-old at home, you try to make sure that date comes later rather than sooner. So, yes, I've agreed to let you come along on this trip to show you what we do and what it means—but no, I don't want to be interviewed." [1]
